Investor Update: **July 2019**

Cautionary Statement Regarding Forward-Looking Information

Much of the information contained in this presentation is forward-looking information based upon management's current expectations and projections that involve risks and uncertainties. Forward-looking information includes, among other things, information concerning earnings per share, rate case activity, earnings per share growth, cash flow, sources of revenue, dividend growth and dividend payout ratios, capital plans, construction costs, generating unit retirements, investment opportunities, corporate initiatives (including any generation reshaping plan), rate base, and environmental matters (including emission reductions). Readers are cautioned not to place undue reliance on this forward-looking information. Forward-looking information is not a guarantee of future performance and actual results may differ materially from those set forth in the forward-looking information.

Factors that could cause actual results to differ materially from those contemplated in any forward-looking statements include, but are not limited to: general economic conditions, including business and competitive conditions in the company's service territories; timing, resolution and impact of rate cases and other regulatory decisions; the company's ability to continue to successfully integrate the operations of its subsidiaries; availability of the company's generating facilities and/or distribution systems; unanticipated changes in fuel and purchased power costs; key personnel changes; varying weather conditions; continued industry restructuring and consolidation; continued adoption of distributed generation by the company's customers; energy and environmental conservation efforts; the company's ability to successfully acquire and/or dispose of assets and projects; cyber-security threats and data security breaches; construction risks; equity and bond market fluctuations; changes in the company's and its subsidiaries' ability to access the capital markets; the impact of tax reform and any other legislative and regulatory changes, including changes to environmental standards; political developments; current and future litigation and regulatory investigations, proceedings or inquiries; changes in accounting standards; the financial performance of American Transmission Co. as well as projects in which the company's energy infrastructure business invests; the ability of the company to obtain additional generating capacity at competitive prices; goodwill and its possible impairment; and other factors described under the heading "Factors Affecting Results, Liquidity and Capital Resources" in Management's Discussion and Analysis of Financial Condition and Results of Operations and under the headings "Cautionary Statement Regarding Forward-Looking Information" and "Risk Factors" contained in WEC Energy Group's Form 10-K for the year ended December 31, 2018, and in subsequent reports filed with the Securities and Exchange Commission. WEC Energy Group expressly disclaims any obligation to publicly update or revise any forward-looking information.

WEC Energy Group

Company Statistics

$26.3 billion market cap (1)

1.6 million electric customers

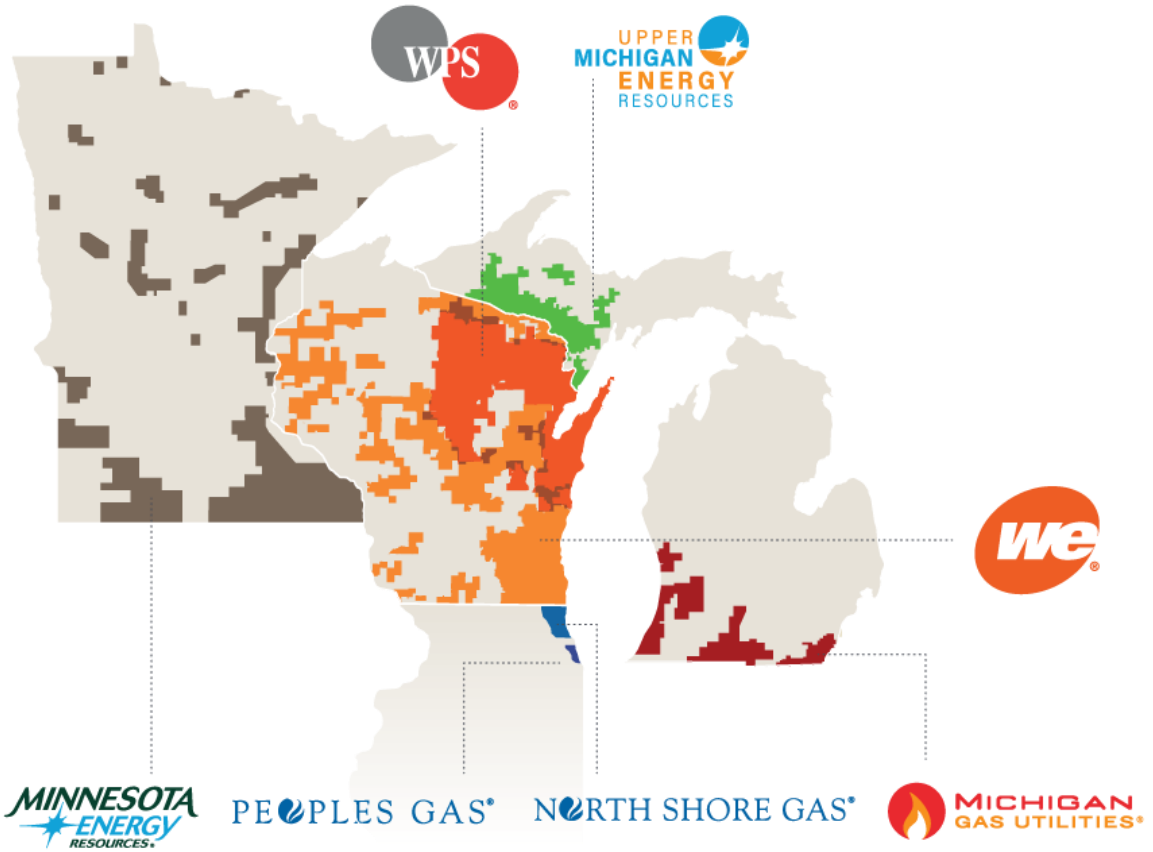
2.9 million natural gas customers

60% ownership of American Transmission Company

70,100 miles of electric distribution

49,000 miles of gas distribution

$19.8 billion of asset base (2)



(1) As of 6/30/2019
(2) 2018 average asset base

WEC Energy Group

Our strategy is to create long-term value by focusing on the fundamentals: safety, world-class reliability, operating efficiency, financial discipline and customer care.

Investing in Zero-Carbon Generation

Solar generation technology has improved in efficiency, become more cost-effective and complements our summer demand curve.

Wisconsin Public Service and Madison Gas & Electric have partnered on two major solar projects. Received PSCW approval on April 18, 2019:

- Badger Hollow Solar Farm
  - Located in Iowa County, Wisconsin
  - WPS will own 100 MW (MGE 50 MW)
- Two Creeks Solar Project
  - Located in Two Rivers, Wisconsin
  - WPS will own 100 MW (MGE 50 MW)
- WPS total expected purchase price of ~ $260 million
- Commercial operation targeted for 2020

On December 20, 2018, Wisconsin Electric received PSCW approval for two innovative renewable energy pilot programs:

- Solar Now Pilot (35 MW)
- Dedicated Renewable Energy Resource Pilot (150 MW)

Additional projects being actively developed

New Generation in Upper Peninsula

~180 MW of clean, natural gas-fired generation from *Reciprocating Internal Combustion Engines* (RICE)

- Provides a long-term generation solution for electric reliability in Upper Peninsula
- Projected investment of $242 million ($255 million including AFUDC) made by Michigan utility – UMERC
  - Half of investment recovered in retail rates
  - Half of investment recovered by 20-year agreement with Cliffs Natural Resources
- Commercial operation of the RICE units began March 31, 2019
- Allowed for the retirement of Presque Isle Power Plant on March 31, 2019

Infrastructure Investments

- Expected to provide returns that are higher than those in our regulated business
  - Approximately mid-8% unlevered internal rate of return
- Expected to qualify for 100% bonus depreciation and production tax credits
- With the tax credits associated with these investments, we now expect to be a partial cash taxpayer in 2020

Project	Developer	Location	Investment	Offtaker	Offtake Agreement	Closing Date	Capacity
Upstream Wind Energy Center	Invenergy	Antelope County, Nebraska	$276M for 80% ownership	Affiliate of Allianz	10-years	1/10/19	~200MW
Bishop Hill III Wind Energy Center	Invenergy	Henry County, Illinois	$166M for 90% ownership	WPPI Energy	22-years	80% on 8/31/18 Incremental 10% on 12/5/18	~132MW
Coyote Ridge Wind Farm	Avangrid Renewables	Brookings County, South Dakota	$145M projected for 80% ownership and 99% of tax benefits	Google Energy LLC	12-years	Estimated: End of 2019	~97MW

Wisconsin Rate Reviews

- Wisconsin Electric, Wisconsin Gas and Wisconsin Public Service filed applications with the PSCW on March 28, 2019.
- After a 4-year base rate freeze, proposed rate increases will keep bills below the national average.

Revenue Increase Summary	2020	2021
Wisconsin Electric		
Electric*	2.9%	2.9%
Natural Gas	3.9%	-
Steam	4.9%	-
Wisconsin Gas		
Natural Gas	1.8%	-
Wisconsin Public Service		
Electric*	4.9%	4.9%
Natural Gas	2.4%	2.4%

* Electric targeted increases include fuel in 2020 and exclude fuel in 2021

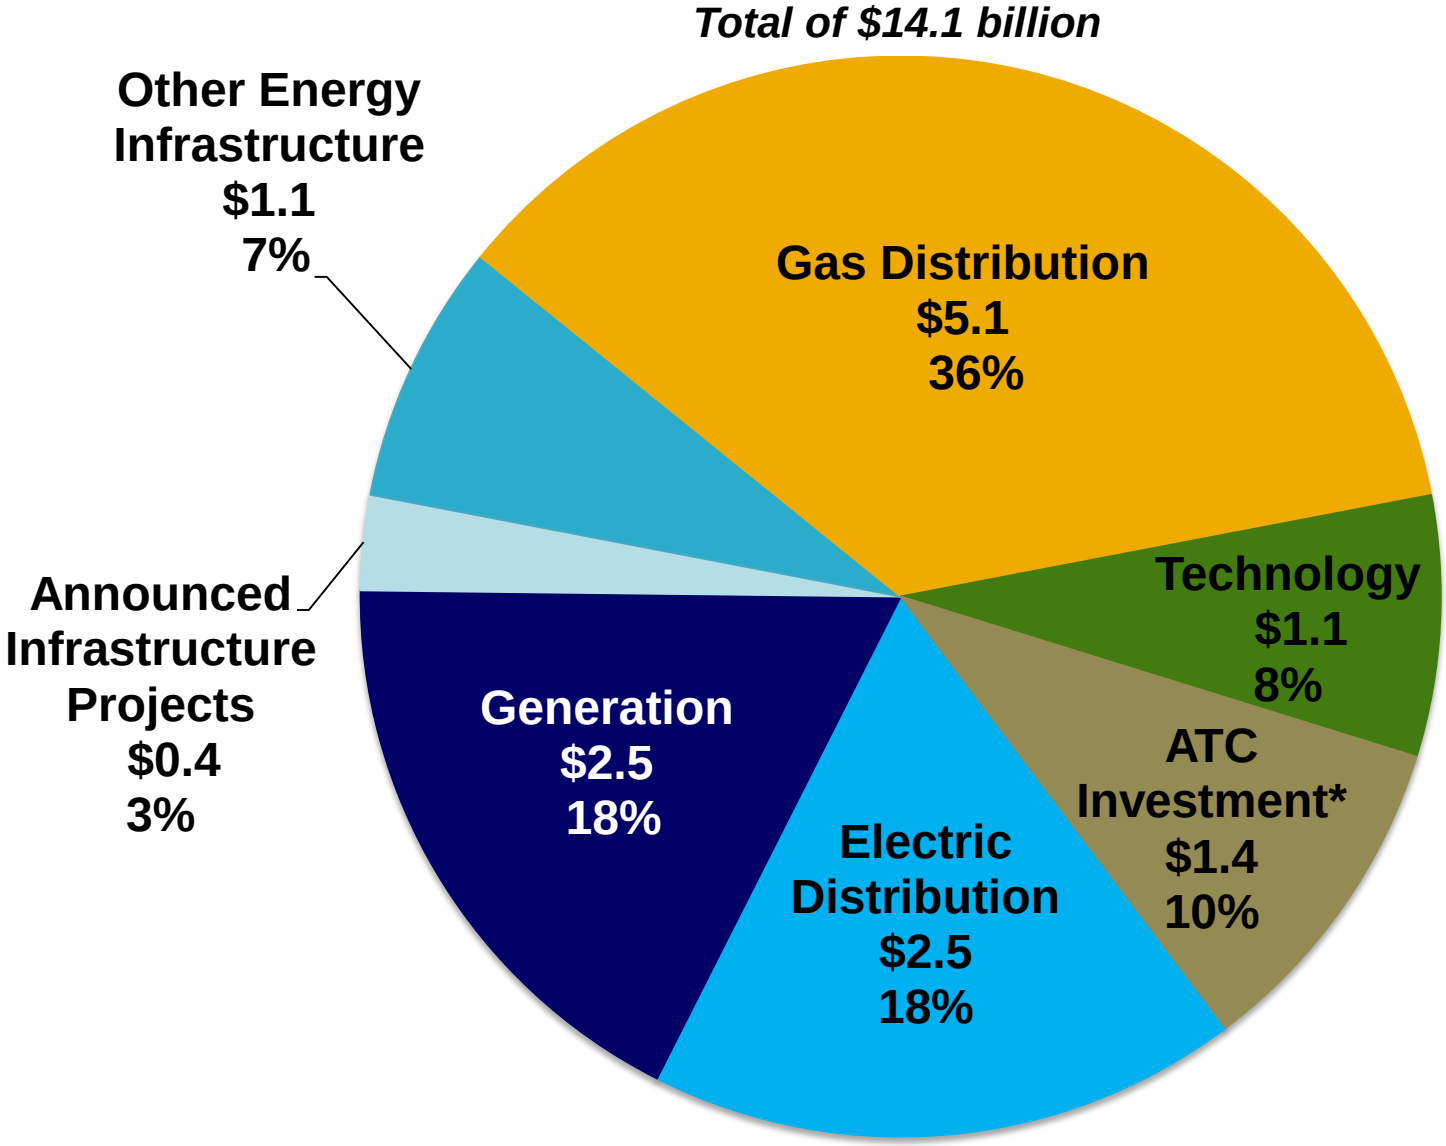
Order expected in Q4 2019 for new rates effective January 1, 2020

Key Rate Review Drivers	
Wisconsin Electric	Wisconsin Public Service
• Higher transmission charges currently capped at 2010 levels. • Revenue the PSCW assumed the company would receive from the Midwest grid operator that was not received. • Cost escalation in the Point Beach power purchase agreement approved by the PSCW in 2007.	• Acquisition of Forward Wind Energy Center. • Distribution System upgrades approved by the PSCW. • Final costs for ReACT environmental project at Weston Unit 3.

Five-Year Capital Plan

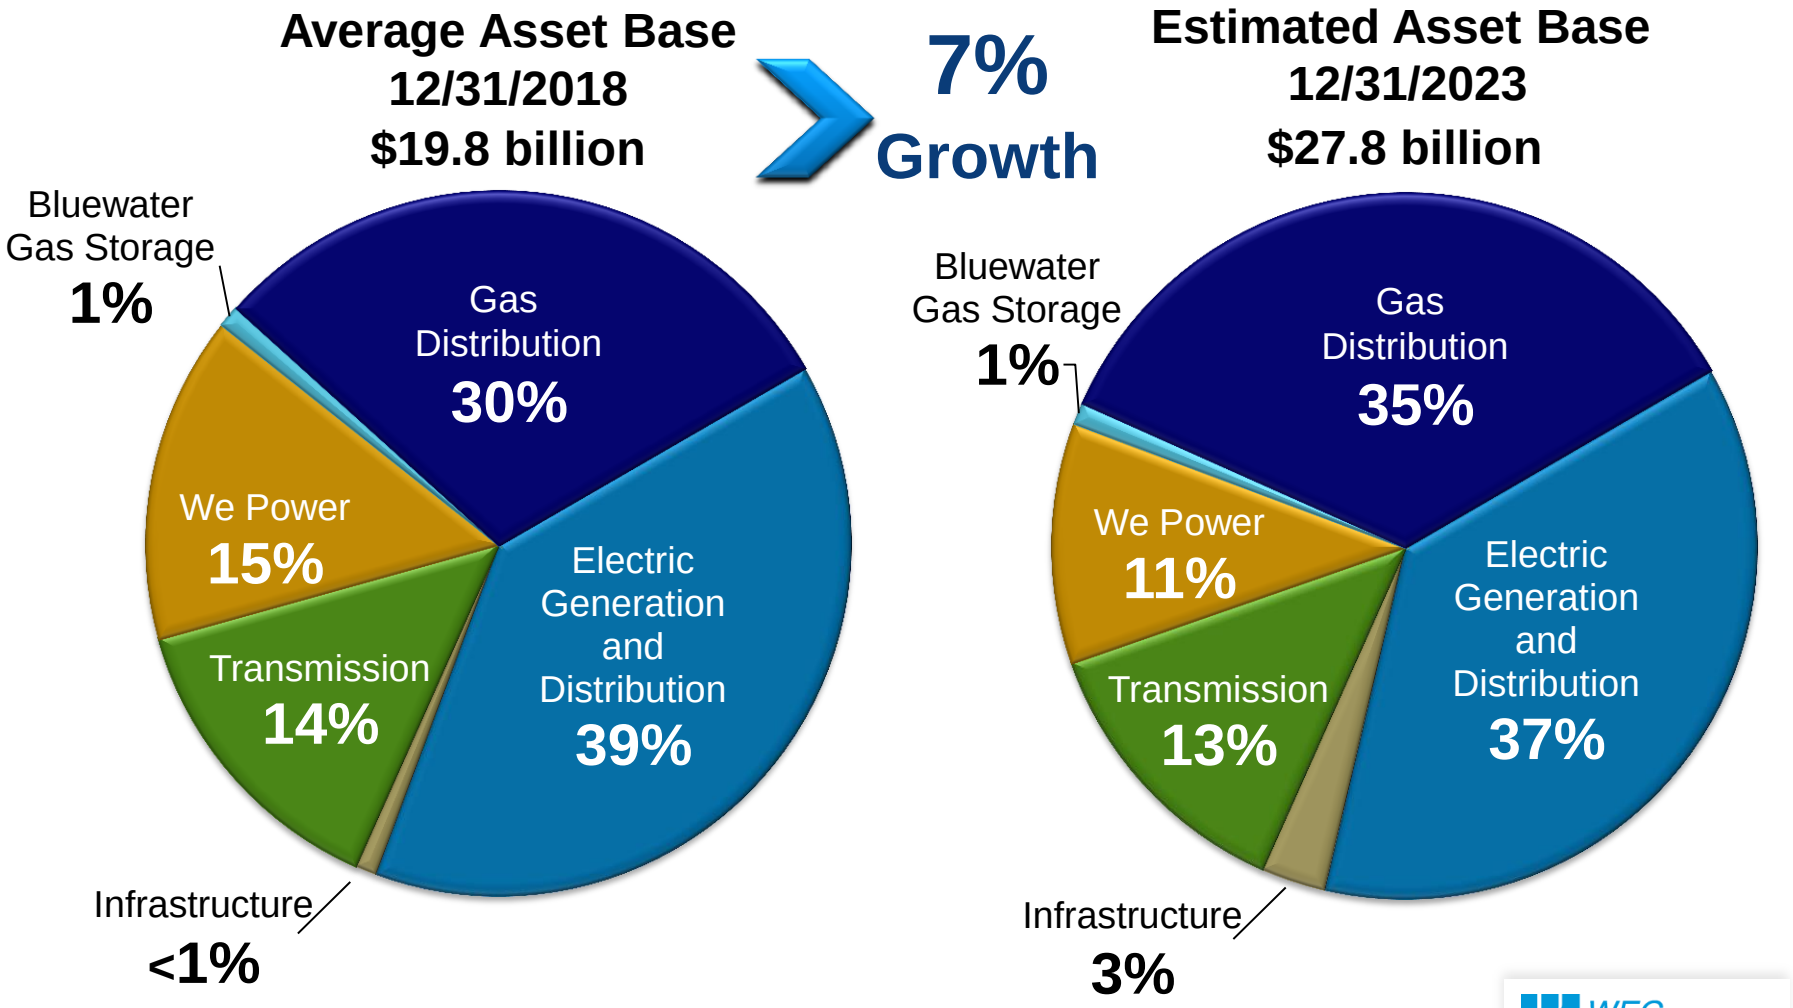
2019-2023 Capital Plan *($ in billions)*

Total of $14.1 billion



* ATC is accounted for using the equity method; this represents WEC's portion of the investment

Increasing Natural Gas Distribution Investment



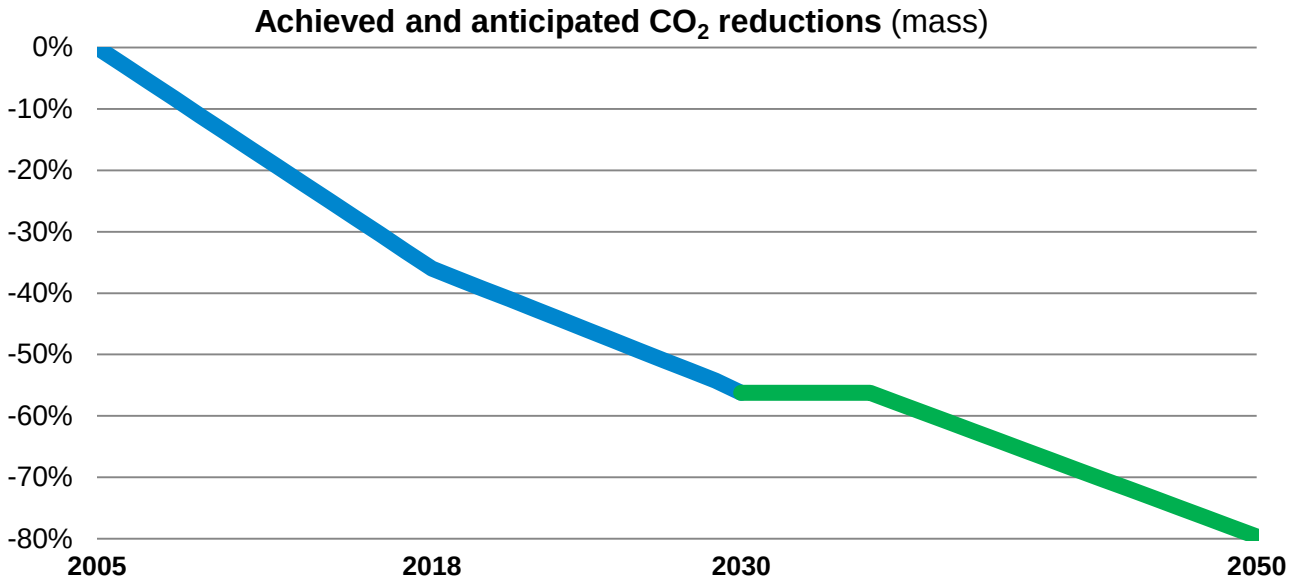
Balancing reliability and customer cost with environmental stewardship

Reshaping our generation includes:

- Retiring older fossil-fueled generating units – already more than 1,800 MW since 2017
- Building state-of-the-art natural gas generation
- Investing in cost-effective zero-carbon generation

Resulting in:

- Reduced costs to customers
- Maintenance of fuel diversity
- Lower carbon emissions



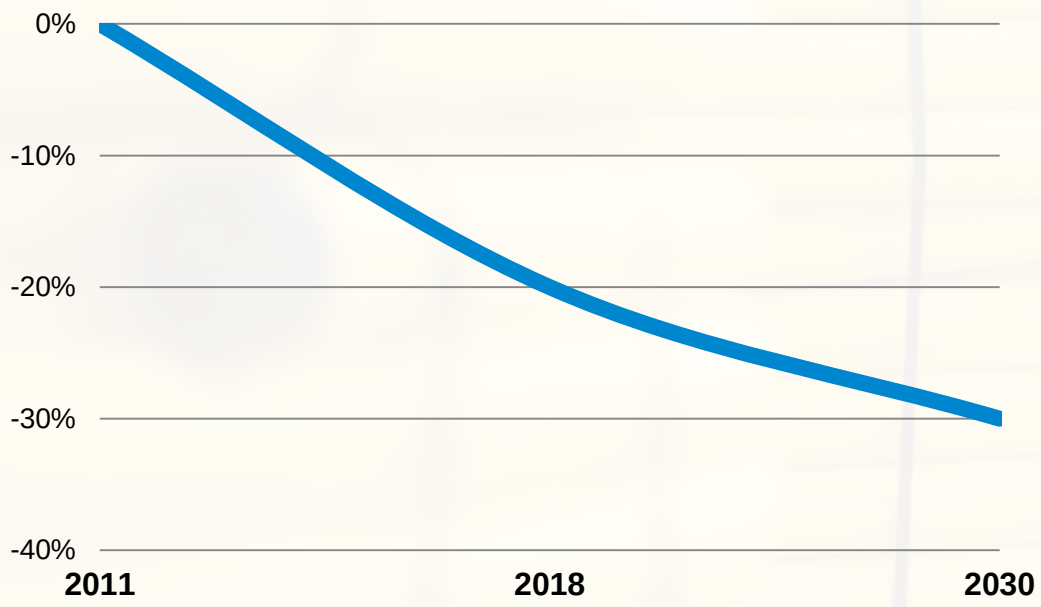
Reduction Goals:

40%
below 2005 levels by 2030

80%
below 2005 levels by 2050

WEC Energy Group

Methane Reduction Goal



Reduction Goal:*

30%

by the year 2030
from a 2011 baseline

*This goal represents a decrease in the rate of methane emissions from the natural gas distribution lines in our network of 30% per mile by the year 2030 from a 2011 baseline.

WEC Energy Group

Regional Economy

Foxconn in Wisconsin

FOXCONN®

Foxconn announced July 26, 2017, Wisconsin's largest economic development project and largest corporate attraction project in U.S. history, as measured by jobs.

- Expected capital investment by Foxconn of **$10 billion** dollars
- Goal of creating **13,000 jobs**, and an estimated **22,000 indirect jobs** created throughout Wisconsin
- Largest greenfield investment by a foreign-based company in U.S. history as measured by jobs
- One of the largest manufacturing campuses in the world
- Groundbreaking ceremony held on June 28, 2018, and significant construction is underway
- North American headquarters in Milwaukee, and innovation centers in Green Bay, Eau Claire and Racine
- Operations expected to begin in 2020, ramping up through 2023

Annual Sales Growth Forecast
(weather-normalized)

Year-over-Year

	2019 – 2021	2022 - 2023
Electric	Flat – 0.5%	1.2% - 1.5%
Gas	0.5% – 1%	1.2% - 1.5%

Key Takeaways for WEC Energy Group

- Track record of exceptional performance
- Portfolio of premium businesses
- Investment opportunities support 5-7 percent EPS growth with minimal impact on base rates
- 100 percent of capital allocated to regulated businesses or contracted renewables/gas storage
- Dividend growth projected to be in line with earnings growth
- No need to issue additional equity through forecast period
- Poised to deliver among the best risk-adjusted returns in the industry

“Delivering” the Future

Project Highlights

Natural Gas System Modernization Program

- Extensive effort to modernize natural gas infrastructure in city of Chicago
- Ultimately PGL expected to replace 2,000 miles of piping
- Project $280-300 million annual average investment
- Illinois law authorizes rider through 2023

Technology Enhancements

- Advanced metering program uses integrated system of smart meters to enable two-way communication between utilities and customers
- Upgrading We Energies customer information system
- Project to spend ~ $1.1 billion (2019 – 2023) across four states we serve

Electric Redesign

- Major investments planned to address aging infrastructure
- Expect to spend $2.5 billion over the next 5 years on electric delivery, including resilience program
- Committed to delivering the future with infrastructure that will reduce operating costs and meet new environmental standards

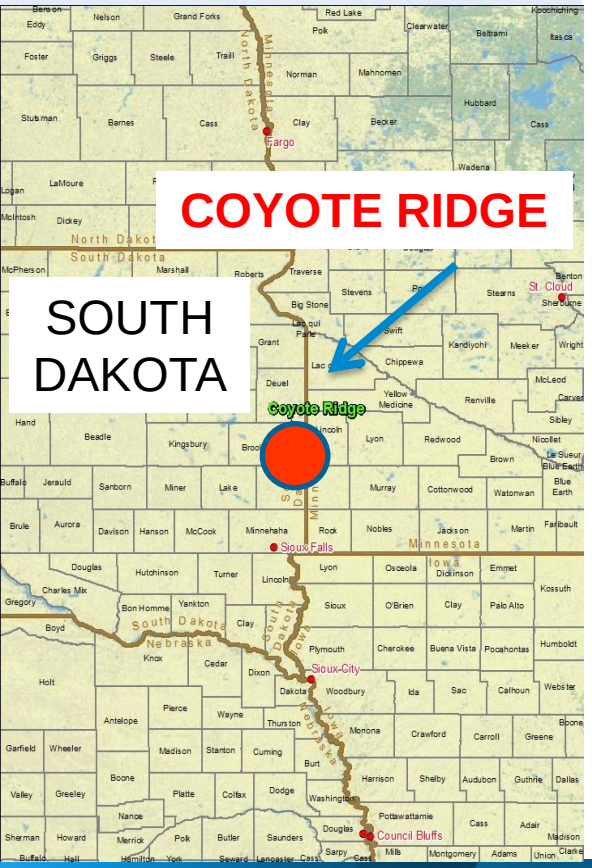
Electric Resilience

- Installing 2,200 miles of underground circuits to replace troublesome overhead lines, and adding distribution automation equipment through our System Modernization and Reliability Project at WPS
- $430 million investment expected to be complete by the end of 2021

Infrastructure Investment

Coyote Ridge Wind Farm

39 GE wind turbines with a capacity of ~97 MW



- Currently being built by Avangrid Renewables in Brookings County, South Dakota, within MISO footprint
- Total investment: $145 million for an 80% ownership interest and substantially all of the tax benefits
- Expected returns are higher than those in our regulated business
  - Approximately mid-8% unlevered internal rate of return
- Expected to qualify for 100% bonus depreciation and production tax credits
- 12-year offtake agreement with Google Energy LLC for 100 percent of the energy produced
- Projected in service date: End of 2019
- With the tax credits associated with this investment, we now expect to be a partial cash taxpayer in 2020

Infrastructure Investment

Upstream Wind Energy Center

81 GE wind turbines with a capacity of ~200 MW

- Built by Invenergy and located in Antelope County, Nebraska
- Total investment: $276 million for an 80% ownership interest
- Expected to provide returns that are higher than those in our regulated business
  - Approximately mid-8% unlevered internal rate of return
- Qualifies for 100% bonus depreciation and production tax credits
- 10-year offtake agreement with affiliate of an A-rated publicly traded company (Allianz)
- Transaction closed on January 10, after commercial operation was achieved

Infrastructure Investment

Bishop Hill III Wind Energy Center

53 GE wind turbines with a capacity of ~132 MW

- Developed by Invenergy and placed into service in May 2018
- Located in Henry County, Illinois
- Total investment: $166 million for a 90% ownership interest
- Expected to provide returns that are higher than those in our regulated business
  - Approximately mid-8% unlevered internal rate of return
- Expected to qualify for 100% bonus depreciation and production tax credits
- 22-year offtake agreement with a current wholesale customer, WPPI Energy

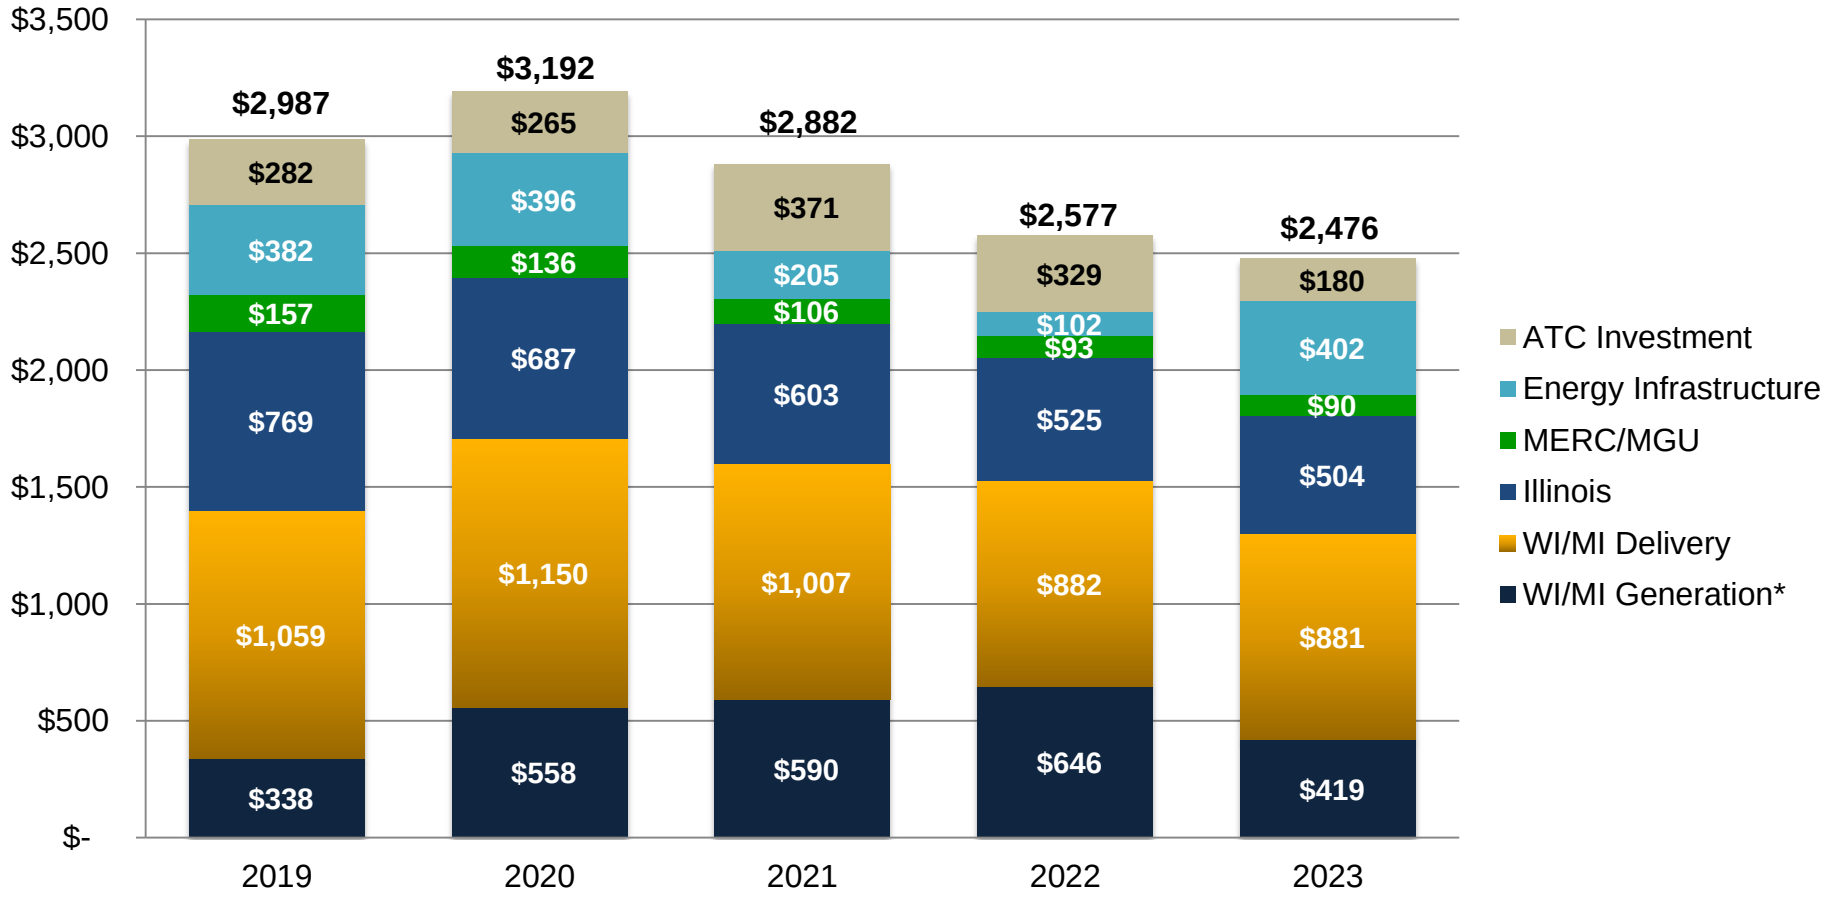
Power the Future Investments

	Natural Gas	Coal
Capacity	1,090 MW	1,030 MW[1]
Investment	$664 million	$2 billion[1]
ROE	12.7%	12.7%
Equity	53%	55%
In Service Dates	Unit 1 – July 2005 Unit 2 – May 2008	Unit 1 – February 2010 Unit 2 – January 2011
Lease Terms	25 years	30 years
Cost Per Unit of Capacity	$609/kW	$1,950/kW

1. All capacity and investment amounts reflect WEC ownership only.
   Demonstrated capacity for the coal units is 1,056 MW – value shown in table is amount guaranteed in lease agreement.

$14.1 billion projected capital spend from 2019-2023

Capital Plan Drives 5% to 7% EPS Growth



Depreciation at the utilities expected to average $960 million annually, and $124 million at ATC, over the 2019-2023 period

* Generation includes ~$275 million of capital spend at We Power

Our Capital Plan in Context

Capital plan extends the runway for 5 to 7 percent growth from our core business well into the future

- Electric sales growth expected to accelerate in later part of five-year plan
- Electric distribution capital expected to grow in next iteration of five-year capital plan
- Beginning to plan for replacement of energy supply from Point Beach PPA (generation represents ~25% of Wisconsin Electric kilowatt-hour sales)

American Transmission Company

WEC portion of investment from 2019-2023: $1.4 billion

Key Assumptions

- ATC's 2018 average rate base: $3.7 billion
- Implies WEC's average rate base growth of $115 million
- ROE currently under FERC review
- 5-year (2019-2023) WEC projected capital investment:
  - Inside footprint: $1.2 billion
  - Outside footprint: $250 million

Projected Capital Expenditures *(millions)*

WEC Energy Group

Reconciliation of Reported EPS (GAAP) to Adjusted EPS (Non-GAAP)

	2017	2016
Reported EPS – GAAP basis	$ 3.79	$ 2.96
Tax benefit related to Tax Cuts and Jobs Act of 2017	$ (0.65)	–
Acquisition Costs	–	$ 0.01
Adjusted EPS – Non-GAAP basis*	$ 3.14	$ 2.97

* WEC Energy Group has provided adjusted earnings per share (non-GAAP earnings per share) as a complement to, and not as an alternative to, reported earnings per share presented in accordance with GAAP. Adjusted earnings per share exclude a one-time reduction in income tax expense related to a revaluation of our deferred taxes as a result of the Tax Cuts and Jobs Act of 2017 as well as costs related to the acquisition of Integrys, neither of which is indicative of WEC Energy Group's operating performance. Therefore, WEC Energy Group believes that the presentation of adjusted earnings per share is relevant and useful to investors to understand the company's operating performance. Management uses such measures internally to evaluate the company's performance and manage its operations.
