

PRESS RELEASE

Oceaneering Announces Anadarko Constellation Umbilical Contract

HOUSTON, April 6, 2017 – Oceaneering International, Inc. (“Oceaneering”) (NYSE:OII) announced that it secured a contract from Anadarko Petroleum Corporation (“Anadarko”) (NYSE: APC) to supply the umbilical for Anadarko’s Constellation subsea tieback in the U.S. Gulf of Mexico.

The contract is for a dynamic and static electro-hydraulic steel tube control umbilical, and associated hardware. Oceaneering plans to design and manufacture the umbilical at its facility in Panama City, Florida.

The control umbilical for the Constellation project is expected to be used to transmit hydraulic control fluid and chemicals, as well as provide the electrical power and fiber optic requirements to operate and monitor the subsea wells which are located in approximately 1,370 meters (4,500 feet) of water within Green Canyon Block 627. The umbilical is expected to be tied back to Anadarko’s Constitution spar.

Statements in this press release that express a belief, expectation or intention, as well as those that are not historical fact, are forward-looking. The forward-looking statements in this press release include the statements concerning Oceaneering’s planned design and manufacturing location, as well as the expected use and tie back of the umbilicals. These forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and are based on current information and expectations of Oceaneering that involve a number of risks, uncertainties, and assumptions, including risks and uncertainties related to counterparty performance under contracts and market conditions and other economic factors affecting Oceaneering’s business. Should one or more of these risks or uncertainties materialize, or should the assumptions underlying the forward-looking statements prove incorrect, actual outcomes could vary materially from those indicated. These and other risks are more fully described in Oceaneering’s latest annual report on Form 10-K and its other periodic filings with the Securities and Exchange Commission.

Oceaneering is a global provider of engineered services and products, primarily to the offshore oil and gas industry, with a focus on deepwater applications. Through the use of its applied technology expertise, Oceaneering also serves the defense, entertainment, and aerospace industries.
