

APS RENEWABLE ENERGY SOURCES

The following table summarizes APS's renewable energy sources currently in operation and under development as of December 31, 2018.

Agreements for the development and completion of future resources are subject to various conditions, including successful siting, permitting and interconnection of the projects to the electric grid.

(a) Includes Flagstaff Community Power Project, APS School and Government Program and APS Solar Partner Program.

(b) Includes rooftop facilities owned by third parties. Distributed generation is produced in DC and is converted to AC for reporting purposes.
