PART I. FINANCIAL INFORMATION

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including statements regarding our future results of operations and financial position, business strategy and plans and our objectives for future operations. The words "may," "will," "should," "could," "expect," "anticipate," "believe," "estimate," "intend," "continue" and other similar expressions are intended to identify forward-looking statements. We have based these forward-looking statements largely on current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives, and financial needs. These forward-looking statements involve risks and uncertainties that could cause our actual results to differ materially from those expressed or implied in our forward-looking statements. Such risks and uncertainties include, but are not limited to, risks related to volatility in our operating results; execution of our business and marketing strategies; retaining existing customers and adding new customers; challenges arising from our international operations, including fluctuations in currency exchange rates, legal and regulatory developments and any potential adverse impact from the United Kingdom's likely exit from the European Union; retaining and adding high quality merchants; our voucherless offerings; cybersecurity breaches; reliance on cloud-based computing platforms; competing successfully in our industry; changes to merchant payment terms; providing a strong mobile experience for our customers; maintaining and improving our information technology infrastructure; delivery and routing of our emails; claims related to product and service offerings; managing inventory and order fulfillment risks; litigation; managing refund risks; retaining and attracting members of our executive team; completing and realizing the anticipated benefits from acquisitions, dispositions, joint ventures and strategic investments; lack of control over minority investments; compliance with domestic and foreign laws and regulations, including the CARD Act, GDPR and regulation of the Internet and e-commerce; classification of our independent contractors or employees; tax liabilities; tax legislation; protecting our intellectual property; maintaining a strong brand; customer and merchant fraud; payment-related risks; our ability to raise capital if necessary and our outstanding indebtedness; global economic uncertainty; our common stock, including volatility in our stock price; our convertible senior notes; our ability to realize the anticipated benefits from the hedge and warrant transactions; and those risks and other factors discussed in Part I, Item 1A, Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2018, and Part II, Item 1A, Risk Factors of our Quarterly report on Form 10-Q for the quarter ended March 31, 2019, as well as in our condensed consolidated financial statements, related notes, and the other financial information appearing elsewhere in this report and our other filings with the Securities and Exchange Commission ("SEC"). Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. We do not intend, and undertake no obligation, to update any of our forward-looking statements after the date of this report to reflect actual results or future events or circumstances. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

As used herein, "Groupon," the "Company," "we," "our," "us" and similar terms include Groupon, Inc. and its subsidiaries, unless the context indicates otherwise.

1 . DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

Company Information

Groupon, Inc. and its subsidiaries, which commenced operations in October 2008, operate online local commerce marketplaces throughout the world that connect merchants to consumers by offering goods and services, generally at a discount. Customers access those marketplaces through our websites, primarily localized groupon.com sites in many countries, and our mobile applications.

Our operations are organized into two segments: North America and International. See Note 13 , *Segment Information* .

Unaudited Interim Financial Information

We have prepared the accompanying condensed consolidated financial statements pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") for interim financial reporting. These condensed consolidated financial statements are unaudited and, in our opinion, include all adjustments, consisting of normal recurring adjustments and accruals, necessary for a fair presentation of the condensed consolidated balance sheets, statements of operations and comprehensive income (loss), cash flows and stockholders' equity for the periods presented. Operating results for the periods presented are not necessarily indicative of the results to be expected for the full year ending December 31, 2019 . Certain information and disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP") have been omitted in accordance with the rules and regulations of the SEC. These condensed consolidated financial statements and notes should be read in conjunction with the audited consolidated financial statements and notes included in our Annual Report on Form 10-K for the year ended December 31, 2018 , filed with the SEC on February 12, 2019.

Principles of Consolidation

The condensed consolidated financial statements include the accounts of Groupon, Inc. and its subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation. The condensed consolidated financial statements were prepared in accordance with U.S. GAAP and include the assets, liabilities, revenue and expenses of all wholly-owned subsidiaries and majority-owned subsidiaries over which we exercise control and a variable interest entity for which we have determined that we are the primary beneficiary. In the first quarter of 2019, we extended our arrangement through July 2022 with the strategic partner in the variable interest entity that we consolidate. Outside stockholders' interests in subsidiaries are shown on the condensed consolidated financial statements as Noncontrolling interests. Investments in entities in which we do not have a controlling financial interest are accounted for under the equity method, the fair value option, as available-for-sale securities or at cost adjusted for observable price changes and impairments, as appropriate.

Adoption of New Accounting Standards

We adopted the guidance in ASU 2016-02, *Leases (Topic 842)* on January 1, 2019. This ASU requires the recognition of lease assets and liabilities for operating leases, in addition to the finance lease assets and liabilities historically recorded on our condensed consolidated balance sheets. See Note 6 , *Leases* , for information on the impact of adopting Topic 842 on our accounting policies.

We adopted the guidance in ASU 2018-07, *Compensation - Stock Compensation (Topic 718) - Improvements to Nonemployee Share-Based Payment Accounting*, on January 1, 2019. This ASU expands the scope to make the guidance for share-based payment awards to nonemployees consistent with the guidance for share-based payment awards to employees. The adoption of ASU 2018-07 did not have a material impact on the condensed consolidated financial statements.

We adopted the guidance in ASU 2018-15, *Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) - Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract*, on January 1, 2019 . This ASU requires entities in a hosting arrangement that is a service contract to follow the guidance in Subtopic 350-40, *Internal Use Software*, to determine which costs to implement the service contract would be capitalized as an asset related to the service contract and which costs would be expensed. The requirements of ASU 2018-15 have been applied on a prospective basis to implementation costs incurred on or after January 1, 2019. As a result of the adoption of ASU 2018-15, we capitalized \$1.9 million and \$2.8 million of implementation costs for the three and six months ended June 30, 2019 . Those capitalized costs are included within Other non-current assets on the condensed consolidated balance sheet as of June 30, 2019 . We have not recognized any amortization related to these implementation costs. We will amortize the implementation costs on a straight-line basis over the term of the associated hosting arrangement for each module or component of the related hosting arrangement when it is ready for its intended use. Amortization costs will be recorded in Selling, general and administrative expense on the condensed consolidated statements of operations.

Reclassifications and Terminology Changes

Certain reclassifications have been made to the condensed consolidated financial statements of prior periods and the accompanying notes to conform to the current period presentation.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with U.S. GAAP requires estimates and assumptions that affect the reported amounts and classifications of assets and liabilities, revenue and expenses, and the related disclosures of contingent liabilities in the condensed consolidated financial statements and accompanying notes. Estimates are used for, but not limited to, variable consideration from

unredeemed vouchers, income taxes, initial valuation and subsequent impairment testing of goodwill and intangible assets, investments, customer refunds, contingent liabilities and the useful lives of property, equipment and software and intangible assets. Actual results could differ materially from those estimates.

Amortization of intangible assets is computed using the straight-line method over their estimated useful lives, which range from 1 to 10 years. Amortization expense related to intangible assets was \$3.8 million and \$3.5 million for the three months ended June 30, 2019 and 2018 , and \$7.7 million and \$6.4 million for the six months ended June 30, 2019 and 2018 . As of June 30, 2019 , estimated future amortization expense related to intangible assets is as follows (in thousands):

Remaining amounts in 2019	\$	6,384
2020		7,780
2021		7,046
2022		6,730

Fair Value Option Investments

In connection with the dispositions of controlling stakes in TMON Inc. ("TMON"), an entity based in the Republic of Korea, in May 2015 and Groupon India in August 2015, we obtained minority investments in Monster Holdings LP ("Monster LP") and in Nearbuy Pte Ltd. ("Nearbuy"), respectively. We have made an irrevocable election to account for both of those investments at fair value with changes in fair value reported in earnings. We elected to apply fair value accounting to those investments because we believe that fair value is the most relevant measurement attribute for those investments, and to reduce operational and accounting complexity. Our election to apply fair value accounting to those investments has and may continue to cause fluctuations in our earnings from period to period.

We determined that the fair value of our investments in Monster LP and Nearbuy were \$0.0 million and \$4.9 million, respectively, as of June 30, 2019 and \$69.4 million and \$4.5 million, respectively, as of December 31, 2018. The following table summarizes gains and losses due to changes in fair value of those investments for the three and six months ended June 30, 2019 and 2018 (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018
Monster LP	\$ (27,949)	\$ (3,054)	\$ (69,408)	\$ (8,285)
Nearbuy	372	19	423	217
Total	<u>\$ (27,577)</u>	<u>\$ (3,035)</u>	<u>\$ (68,985)</u>	<u>\$ (8,068)</u>

During the first quarter 2019, we recognized a \$41.5 million loss from changes in the fair value of our investment in Monster LP due to the revised cash flow projections provided by TMON in March 2019 and an increase in the discount rate applied to those forecasts, which increased to 26.0% as of March 31, 2019, as compared with 21.0% as of December 31, 2018. The increase in the discount rate applied as of March 31, 2019 was due to the deterioration in the financial condition of TMON and the competitive environment in the Korean e-commerce industry, which resulted in an increase to financial projection risk. During the second quarter 2019, we recognized an additional loss of \$27.9 million from changes in the fair value of our investment in Monster LP due to revised financial projections provided by TMON in June 2019. The revisions to the financial projections were made as a result of TMON's continued underperformance as compared with prior projections along with adjustments to their business model.

The following table summarizes the condensed financial information for Monster LP for the three and six months ended June 30, 2019 and 2018 (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018
Revenue	\$ 131,816	\$ 84,525	\$ 252,016	\$ 171,384
Gross profit	9,542	6,574	17,407	13,811
Loss before income taxes	(31,253)	(35,447)	(60,324)	(68,867)
Net loss	(31,253)	(35,447)	(60,324)	(68,867)

Other Equity Investments

Other equity investments represents equity investments without readily determinable fair values. We have elected to record equity investments without readily determinable fair values at cost adjusted for observable price changes and impairments. We recorded a \$4.6 million impairment of an other equity investment for the three and six months ended June 30, 2018. That impairment is classified within Other income (expense), net on the condensed consolidated statements of operations. There were no other adjustments for observable price changes related to these investments since our adoption of ASU 2016-01, *Financial Instruments (Topic 825-10) - Recognition and Measurement of Financial Assets and Financial Liabilities*, on January 1, 2018.

5. FINANCING ARRANGEMENTS

Convertible Senior Notes

On April 4, 2016, we issued \$250.0 million in aggregate principal amount of convertible senior notes (the "Notes") in a private placement to A-G Holdings, L.P. ("AGH"). Michael Angelakis, the chairman and chief executive officer of Atairos Group, Inc. ("Atairos"), joined our Board of Directors (the "Board") in connection with the issuance of the Notes. Atairos controls the voting power of AGH. The net proceeds from this offering were \$243.2 million after deducting issuance costs. The Notes bear interest at a rate of 3.25% per annum, payable annually in arrears on April 1 of each year, beginning on April 1, 2017. The Notes will mature on April 1, 2022, subject to earlier conversion or redemption.

Each \$1,000 of principal amount of the Notes initially is convertible into 185.1852 shares of common stock, which is equivalent to an initial conversion price of \$5.40 per share, subject to adjustment upon the occurrence of specified events. Upon conversion, we can elect to settle the conversion value in cash, shares of our common stock, or any combination of cash and shares of our common stock. Holders of the Notes may convert their Notes at their option at any time until the close of business on the scheduled trading day immediately preceding the maturity date. In addition, if specified corporate events occur prior to the maturity date, we may be required to increase the conversion rate for holders who elect to convert based on the effective date of such event and the applicable stock price attributable to the event, as set forth in a table contained in the indenture governing the Notes (the "Indenture"). Based on the closing price of the common stock of \$3.58 as of June 30, 2019, the if-converted value of the Notes was less than the principal amount.

With certain exceptions, upon a fundamental change (as defined in the Indenture), the holders of the Notes may require us to repurchase all or a portion of their Notes for cash at a purchase price equal to the principal amount plus accrued and unpaid interest. In addition, we may redeem the Notes, at our option, at a purchase price equal to the principal amount plus accrued and unpaid interest on or after April 1, 2020, if the closing sale price of the common stock exceeds 150% of the then-current conversion price for 20 or more trading days in the 30 consecutive trading-day period preceding the exercise of this redemption right.

The Notes are senior unsecured obligations that rank equal in right of payment to all senior unsecured indebtedness and rank senior in right of payment to any indebtedness that is contractually subordinated to the Notes.

The Indenture includes customary events of default. If an event of default, as defined in the Indenture, occurs and is continuing, the principal amount of the Notes and any accrued and unpaid interest may be declared immediately due and payable. In the case of bankruptcy or insolvency, the principal amount of the Notes and any accrued and unpaid interest would automatically become immediately due and payable.

We have separated the Notes into their liability and equity components in the accompanying condensed consolidated balance sheets. The carrying amount of the liability component was calculated by measuring the fair value of a similar liability that does not have an associated conversion feature. The carrying amount of the equity component, representing the conversion option, was determined by deducting the fair value of

the liability component from the principal amount of the Notes. The difference between the principal amount of the Notes and the liability component (the "debt discount") is amortized to interest expense at an effective interest rate of 9.75% over the term of the Notes. The equity component of the Notes is included in additional paid-in capital in the condensed consolidated balance sheets and is not remeasured as long as it continues to meet the conditions for equity classification.

We incurred transaction costs of approximately \$6.8 million related to the issuance of the Notes. Those transaction costs were allocated to the liability and equity components in the same manner as the allocation of the proceeds from the Notes. Transaction costs attributable to the liability component of \$4.8 million were recorded as a debt discount in the condensed consolidated balance sheet and are being amortized to interest expense over the term of the Notes. Transaction costs attributable to the equity component of \$2.0 million were recorded in stockholders' equity as a reduction of the equity component.

The carrying amount of the Notes consisted of the following as of June 30, 2019 and December 31, 2018 (in thousands):

	June 30, 2019	December 31, 2018
Liability component:		
Principal amount	\$ 250,000	\$ 250,000
Less: debt discount	(41,900)	(48,331)
Net carrying amount of liability component	\$ 208,100	\$ 201,669
Net carrying amount of equity component	\$ 67,014	\$ 67,014

The estimated fair value of the Notes as of June 30, 2019 and December 31, 2018 was \$267.1 million and \$257.1 million, and was determined using a lattice model. We classified the fair value of the Notes as a Level 3 measurement due to the lack of observable market data over fair value inputs such as our stock price volatility over the term of the Notes and our cost of debt.

As of June 30, 2019, the remaining term of the Notes is approximately 2 years and 9 months. During the three and six months ended June 30, 2019 and 2018, we recognized interest costs on the Notes as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018
Contractual interest (3.25% of the principal amount per annum)	\$ 2,032	\$ 2,032	\$ 4,064	\$ 4,064
Amortization of debt discount	3,256	2,940	6,431	5,806
Total	\$ 5,288	\$ 4,972	\$ 10,495	\$ 9,870

Note Hedges and Warrants

In May 2016, we purchased convertible note hedges with respect to our common stock for a cost of \$59.1 million from certain bank counterparties. The convertible note hedges provide us with the right to purchase up to 46.3 million shares of our common stock at an initial strike price of \$5.40 per share, which corresponds to the initial conversion price of the Notes, and are exercisable upon conversion of the Notes. The convertible note hedges are intended to reduce the potential economic dilution upon conversion of the Notes. The convertible note hedges are separate transactions and are not part of the terms of the Notes. Holders of the Notes do not have any rights with respect to the convertible note hedges.

In May 2016, we also sold warrants for total cash proceeds of \$35.5 million to certain bank counterparties. The warrants provide the counterparties with the right to purchase up to 46.3 million shares of our common stock at a strike price of \$8.50 per share. The warrants expire on various dates between July 1, 2022 and August 26, 2022 and are exercisable on their expiration dates. The warrants are separate transactions and are not part of the terms of the Notes or convertible note hedges. Holders of the Notes and convertible note hedges do not have any rights with respect to the warrants.

The amounts paid and received for the convertible note hedges and warrants were recorded in additional paid-in capital in the condensed consolidated balance sheets as of June 30, 2019 and December 31, 2018. The convertible note hedges and warrants are not remeasured as long as they continue to meet the conditions for equity classification. The amounts paid for the convertible note hedges are tax deductible over the term of the Notes, while the proceeds received from the warrants are not taxable.

Under the if-converted method, the shares of common stock underlying the conversion option in the Notes are included in the diluted earnings per share denominator and the interest expense on the Notes, net of tax, is added to the numerator. However, upon conversion, there will be no economic dilution from the Notes, as exercise of the convertible note hedges eliminates any dilution from the Notes that would have otherwise occurred when the price of our common stock exceeds the conversion price. Taken together, the purchase of the convertible note hedges and sale of warrants are intended to offset any actual dilution from the conversion of the Notes and to effectively increase the overall conversion price from \$5.40 to \$8.50 per share.

Revolving Credit Agreement

In May 2019, we entered into a second amended and restated senior secured revolving credit agreement (the "2019 Credit Agreement") which provides for aggregate principal borrowings of up to \$400.0 million and matures in May 2024. The 2019 Credit Agreement replaced our previous \$250.0 million amended and restated credit agreement that was scheduled to mature in June 2019 (the "2016 Credit Agreement"). We recorded a liability for debt issuance costs of \$2.3 million related to the 2019 Credit Agreement. Those costs will be amortized to interest expense

over the term of the agreement.

Borrowings under the 2019 Credit Agreement bear interest, at our option, at a rate per annum equal to (a) an adjusted LIBO rate or (b) a customary base rate (with loans denominated in certain currencies bearing interest at rates specific to such currencies) plus an additional margin ranging between 0.50% and 2.00% . We are required to pay quarterly commitment fees ranging from 0.25% to 0.35% per annum of the average daily amount of unused commitments available under the 2019 Credit Agreement. The 2019 Credit Agreement also provides for the issuance of up to \$75.0 million in letters of credit, provided that the sum of outstanding borrowings and letters of credit do not exceed the maximum funding commitment of \$400.0 million .

The 2019 Credit Agreement is secured by substantially all of our tangible and intangible assets, including a pledge of 100% of the outstanding capital stock of substantially all of our direct and indirect domestic subsidiaries and 65% of the shares or equity interests of first-tier foreign subsidiaries and each U.S. entity whose assets substantially consist of capital stock and/or intercompany debt of one or more foreign subsidiaries, subject to certain exceptions. Certain of our domestic subsidiaries are guarantors under the 2019 Credit Agreement.

The 2019 Credit Agreement contains various customary restrictive covenants that limit our ability to, among other things: incur additional indebtedness; make dividend and other restricted payments, including share repurchases; enter into sale and leaseback transactions; make investments, loans or advances; grant or incur liens on assets; sell assets; engage in mergers, consolidations, liquidations or dissolutions; and engage in transactions with affiliates. The 2019 Credit Agreement requires us to maintain compliance with specified financial covenants, comprised of a minimum fixed charge coverage ratio, a maximum leverage ratio, a maximum senior secured leverage ratio and a minimum liquidity ratio, each as set forth in the 2019 Credit Agreement. We are also required to maintain, as of the last day of each fiscal quarter, unrestricted cash of at least \$250.0 million , including \$125.0 million in accounts held with lenders under the 2019 Credit Agreement or their affiliates. Non-compliance with these covenants may result in termination of the commitments under the 2019 Credit Agreement and any then outstanding borrowings may be declared due and payable immediately. We have the right to terminate the 2019 Credit Agreement or reduce the available commitments at any time.

As of June 30, 2019 , we had no borrowings outstanding under the 2019 Credit Agreement and as of December 31, 2018 , we had no borrowings outstanding under the 2016 Credit Agreement. As of June 30, 2019 , we had outstanding letters of credit of \$18.2 million under the 2019 Credit Agreement and as of December 31, 2018 , we had outstanding letters of credit of \$19.2 million under the 2016 Credit Agreement.

6 . LEASES

Adoption of ASC Topic 842, Leases

On January 1, 2019, we adopted ASC Topic 842 using the modified retrospective transition method. Topic 842 requires the recognition of lease assets and liabilities for operating leases, in addition to the finance lease assets and liabilities previously recorded on our condensed consolidated balance sheets. Beginning on January 1, 2019, our condensed consolidated financial statements are presented in accordance with the revised policies, while prior period amounts are not adjusted and continue to be reported in accordance with our historical policies. The modified retrospective transition method required the cumulative effect, if any, of initially applying the guidance to be recognized as an adjustment to our accumulated deficit as of our adoption date. As a result of adopting Topic 842, we recognized additional lease assets and liabilities of \$109.6 million as of January 1, 2019. The discount rate used to calculate that adjustment was the rate implicit in the lease, unless that rate was not readily determinable. For leases for which the rate was not readily determinable, the discount rate used was our incremental borrowing rate as of the adoption date, January 1, 2019. There was no cumulative effect adjustment to our accumulated deficit as a result of initially applying the guidance.

We elected the package of practical expedients permitted under the transition guidance within Topic 842, which allowed us to carry forward prior conclusions about lease identification, classification and initial direct costs for leases entered into prior to adoption of Topic 842. Additionally, we elected to not separate lease and non-lease components for all of our leases. For leases with a term of 12 months or less, we elected the short-term lease exemption, which allowed us to not recognize right-of-use assets or lease liabilities for qualifying leases existing at transition and new leases we may enter into in the future.

General Description of Leases

We have entered into various non-cancelable operating lease agreements for our offices and data centers and non-cancelable finance lease agreements for property and equipment. We classify leases at their commencement as either operating or finance leases and may receive renewal or expansion options, rent holidays and leasehold improvement or other incentives on certain lease agreements.

Our operating leases primarily consist of leases for real estate throughout the world with lease expirations between 2019 and 2026. These arrangements typically do not transfer ownership of the underlying asset as we do not assume, nor do we intend to assume, the risks and rewards of ownership. Our finance leases are related to purchases of property and equipment, primarily computer hardware, with expirations between 2019 and 2023.

GROUPON, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(unaudited)

We recognize a right-of-use asset and lease liability for all of our leases at the commencement of the lease. Lease liabilities are measured based on the present value of the minimum lease payments discounted by a rate determined as of the date of commencement. Right-of-use assets are measured based on the lease liability adjusted for any initial direct costs, prepaid rent, or lease incentives. Minimum lease payments made under operating and finance leases are apportioned between interest expense and a reduction of the related operating and finance lease obligations. The interest expense on operating leases is presented within Selling, general and administrative expense on the condensed consolidated statements of operations and the related operating lease obligation is presented within Accrued expenses and other current liabilities and Operating lease obligations on the condensed consolidated balance sheets. The interest expense on finance leases is presented within Other income (expense), net on the condensed consolidated statements of operations and the related finance lease obligation is presented within Accrued expenses and other current liabilities and Other non-current liabilities on the condensed consolidated balance sheets.

We have also subleased certain office facilities under operating lease agreements, with expirations between 2019 and 2026. We recognize sublease rentals on a straight-line basis over their respective lease terms.

The following summarizes right-of-use assets as of June 30, 2019 (in thousands):

	June 30, 2019
Right-of-use assets - operating leases	\$ 127,305
Right-of-use assets - finance leases ⁽¹⁾	35,201

Right-of-use assets, net	\$ 136,934

(1) Right-of-use assets for finance leases are included in Property, equipment and software, net on the condensed consolidated balance sheet.

Related Party Sublease Agreement

On December 28, 2016, we entered into a sublease for portions of our office space at 600 West Chicago to Uptake, Inc. ("Uptake"), a Lightbank LLC ("Lightbank") portfolio company. Eric Lefkofsky, our co-founder and Chairman of the Board, is a co-founder and owns a significant equity interest in Lightbank. The sublease was a market rate transaction on terms that we believe are no less favorable than would have been reached with an unrelated third party. The sublease extends through January 31, 2026 and the sublease rentals over the entire term total approximately \$18.2 million. Pursuant to our related party transaction policy, our Audit Committee approved the sublease. We recognized income from the sublease of \$0.5 million and \$0.5 million for the three months ended June 30, 2019 and 2018, and \$1.2 million and \$1.0 million for the six months ended June 30, 2019 and 2018.

Significant Assumptions and Judgments

Significant judgment is required when determining whether a contract is or contains a lease. We review contracts to determine whether the language conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As discussed above, the present value of minimum lease payments is used in determining the value of our operating and finance leases. The discount rate used to calculate the present value for lease payments is the rate implicit in the lease, unless that rate cannot be readily determined. For leases in which the rate implicit in the lease is not readily determinable, the discount rate is our incremental borrowing rate, which is determined based on information available at lease commencement and is equal to the rate of interest that we would have to pay to borrow on a collateralized basis over a similar term in an amount equal to the lease payments in a similar economic environment. The discount rate used for our lease obligations as of June 30, 2019 and January 1, 2019 ranged from 1.5% to 6.9%. As of June 30, 2019, the weighted-average remaining lease term for our finance leases and operating leases was 2 years and 5 years. As of June 30, 2019, the weighted-average discount rate for our finance leases and operating leases was 5.1% and 5.6%.

7. COMMITMENTS AND CONTINGENCIES

Our purchase obligations as of June 30, 2019 did not materially change from the amounts set forth in our 2018 Annual Report on Form 10-K.

Legal Matters and Other Contingencies

From time to time, we are party to various legal proceedings incident to the operation of our business. For example, we currently are involved in proceedings brought by former employees and merchants, intellectual property infringement suits, customer lawsuits, consumer class actions and suits alleging, among other things, violations of state consumer protection or privacy laws.

In addition, third parties have from time to time claimed, and others may claim in the future, that we have infringed their intellectual property rights. We are subject to intellectual property disputes, including patent infringement claims, and expect that we will continue to be subject to intellectual property infringement claims as our services expand in scope and complexity. In the past, we have litigated such claims, and we are presently involved in several patent infringement and other intellectual property-related claims, including pending litigation or trademark disputes relating to, for example, our Goods category, some of which could involve potentially substantial claims for damages or injunctive relief. We may also become more vulnerable to third-party claims as laws such as the Digital Millennium Copyright Act are interpreted by the courts, and we become subject to laws in jurisdictions where the underlying laws with respect to the potential liability of online intermediaries are either unclear or less favorable. We believe that additional lawsuits alleging that we have violated patent, copyright or trademark laws will be filed against us. Intellectual property claims, whether meritorious or not, are time consuming and often costly to resolve, could require expensive changes in our methods of doing business or the goods we sell, or could require us to enter into costly royalty or licensing agreements.

We also are subject to consumer claims or lawsuits relating to alleged violations of consumer protection or privacy rights and statutes, some of which could involve potentially substantial claims for damages, including statutory or punitive damages. Consumer and privacy related claims or lawsuits, whether meritorious or not, could be time consuming, result in costly litigation, damage awards, fines and penalties, injunctive relief or increased costs of doing business through adverse judgment or settlement, or require us to change our business practices, sometimes in expensive ways.

We are also subject to, or in the future may become subject to, a variety of regulatory inquiries, audits, and investigations across the jurisdictions where we conduct our business, including, for example, inquiries related to consumer protection, employment matters and/or hiring practices, marketing practices, tax, unclaimed property and privacy rules and regulations. Any regulatory actions against us, whether meritorious or not, could be time consuming, result in costly litigation, damage awards, fines and penalties, injunctive relief or increased costs of doing business through adverse judgment or settlement, require us to change our business practices in expensive ways, require significant amounts of management time, result in the diversion of significant operational resources or otherwise harm our business.

We establish an accrued liability for loss contingencies related to legal and regulatory matters when the loss is both probable and reasonably estimable. Those accruals represent management's best estimate of probable losses and, in such cases, there may be an exposure to loss in excess of the amounts accrued. For certain of the matters described above, there are inherent and significant uncertainties based on, among other factors, the stage of the proceedings, developments in the applicable facts of law, or the lack of a specific damage claim. However, we believe that the amount of reasonably possible losses in excess of the amounts accrued for those matters would not have a material adverse effect on our business, condensed consolidated financial position, results of operations or cash flows. Our accrued liabilities for loss contingencies related to legal and regulatory matters may change in the future as a result of new developments, including, but not limited to, the occurrence of new legal matters, changes in the law or regulatory environment, adverse or favorable rulings, newly discovered facts relevant to the matter, or changes in the strategy for the matter. Regardless of the outcome, litigation and other regulatory matters can have an adverse impact on us because of defense and settlement costs, diversion of management resources and other factors.

Indemnifications

In connection with the disposition of our operations in Latin America in the first quarter of 2017, we recorded \$5.4 million in indemnification liabilities for certain tax and other matters upon the closing of the transactions as an adjustment to the net loss on the dispositions within discontinued operations at their fair value. We estimated the indemnification liabilities using a probability-weighted expected cash flow approach. During the first quarter of 2019, we decreased our indemnification liabilities due to the expiration of certain indemnification obligations. The resulting benefit of \$2.2 million is recorded within Income (loss) from discontinued operations on the condensed consolidated statement of operations for the

six months ended June 30, 2019 . Our remaining indemnification liabilities were \$3.2 million as of June 30, 2019 . We estimate that the total amount of obligations that are reasonably possible to arise under the indemnifications in excess of amounts accrued as of June 30, 2019 is approximately \$13.3 million .

In the normal course of business to facilitate transactions related to our operations, we indemnify certain parties, including employees, lessors, service providers, merchants, and counterparties to investment agreements and asset and stock purchase agreements with respect to various matters. We have agreed to hold certain parties harmless against losses arising from a breach of representations or covenants, or other claims made against those parties. These agreements may limit the time within which an indemnification claim can be made and the amount of the claim. We are also subject to increased exposure to various claims as a result of our divestitures and acquisitions, particularly in cases where we are entering into new businesses in connection with such acquisitions. We may also become more vulnerable to claims as we expand the range and scope of our services and are subject to laws in jurisdictions where the underlying laws with respect to potential liability are either unclear or less favorable. In addition, we have entered into indemnification agreements with our officers, directors and underwriters, and our bylaws contain similar indemnification obligations that cover officers, directors, employees and other agents.

Except as noted above, it is not possible to determine the maximum potential amount under these indemnification agreements due to the limited history of prior indemnification claims and the unique facts and circumstances involved in each particular agreement. Historically, any payments that we have made under these agreements have not had a material impact on the operating results, financial position or cash flows.

8 . STOCKHOLDERS' EQUITY AND COMPENSATION ARRANGEMENTS

Common Stock

Pursuant to our restated certificate of incorporation, the Board has the authority to issue up to a total of 2,010,000,000 shares of common stock. Each holder of common stock is entitled to one vote per share on any matter that is submitted to a vote of stockholders. In addition, holders of our common stock will vote as a single class of stock on any matter that is submitted to a vote of stockholders.

Share Repurchase Program

In May 2018, the Board authorized us to repurchase up to \$300.0 million of our common stock under our share repurchase program. During the three and six months ended June 30, 2019 , we repurchased 4,228,148 and 8,636,143 shares for an aggregate purchase price of \$15.1 million and \$30.1 million (including fees and commissions) under our

repurchase program. As of June 30, 2019, up to \$260.0 million of common stock remained available for purchase under our program. The timing and amount of share repurchases, if any, will be determined based on market conditions, limitations under the 2019 Credit Agreement, share price and other factors, and the share repurchase program may be terminated at any time.

Groupon, Inc. Stock Plans

In January 2008, we adopted the 2008 Stock Option Plan, as amended (the "2008 Plan"), under which options for up to 64,618,500 shares of common stock were authorized to be issued to employees, consultants and directors. The 2008 Plan was frozen in December 2010. In April 2010, we established the Groupon, Inc. 2010 Stock Plan, as amended in April 2011 (the "2010 Plan"), under which options and restricted stock units ("RSUs") for up to 20,000,000 shares of common stock were authorized for future issuance to employees, consultants and directors. No new awards may be granted under the 2010 Plan following our initial public offering in November 2011. In August 2011, we established the Groupon, Inc. 2011 Incentive Plan (the "2011 Plan"), as amended in November 2013, May 2014, June 2016 and June 2019, under which options, RSUs and performance stock units for up to 187,500,000 shares of common stock were authorized for future issuance to employees, consultants and directors.

The Groupon, Inc. Stock Plans (the "Plans") are administered by the Compensation Committee of the Board (the "Compensation Committee"). As of June 30, 2019, 64,223,134 shares of common stock were available for future issuance under the Plans.

The stock-based compensation expense related to stock awards issued under the Plans and acquisition-related awards are presented within the following line items of the condensed consolidated statements of operations for the three and six months ended June 30, 2019 and 2018 (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,

Other income (expense), net	—	52	—	100
Total stock-based compensation expense	\$ 26,563	\$ 16,318	\$ 42,974	\$ 35,644

We capitalized \$2.2 million and \$2.0 million of stock-based compensation for the three months ended June 30, 2019 and 2018, and \$3.5 million and \$3.7 million for the six months ended June 30, 2019 and 2018 in connection with internally-developed software and cloud computing arrangements.

Employee Stock Purchase Plan

The Groupon, Inc. 2012 Employee Stock Purchase Plan ("ESPP"), as amended in June 2019, authorizes us to grant up to 20,000,000 shares of common stock under that plan. For the six months ended June 30, 2019 and 2018, 719,297 and 746,773 shares of common stock were issued under the ESPP.

Restricted Stock Units

The restricted stock units granted under the Plans generally have vesting periods between one and four years and are amortized on a straight-line basis over their requisite service period. Additionally, we are required to issue restricted stock units to settle amounts that exceed targeted bonus amounts under our primary bonus plans. We account for those obligations, if any, as liability-classified awards with performance conditions.

As of June 30, 2019 , \$118.4 million of unrecognized compensation costs related to unvested restricted stock units are expected to be recognized over a remaining weighted-average period of 1.65 years .

Performance Share Units

We grant performance share units under the Plans that vest in shares of our common stock upon the achievement of financial and operational targets specified in the respective award agreement ("Performance Share Units"). During the six months ended June 30, 2019 , we also granted performance share units that will vest if our average daily closing stock price is equal to or greater than \$6.00 per share over a period of 30 consecutive trading days prior to December 31, 2022 or if a change in control occurs during the performance period at the specified stock price (and on a proportional basis for a change in control price between the grant date price and the specified stock price) ("Market-based Performance Share Units"). We determined these awards are subject to a market condition, and therefore we used a Monte Carlo simulation to calculate the grant date fair value of the awards and the related derived service period over which we will recognize the expense. The key inputs used in the Monte Carlo simulation were the risk-free rate, our volatility of 49.8% and our cost of equity of 12.8% .

All of our performance share awards are subject to both continued employment through the performance period dictated by the award and certification by the Compensation Committee that the specified performance conditions have been achieved.

The table below summarizes Performance Share Unit activity under the Plans for the six months ended June 30, 2019 :

	Performance Share Units	Weighted-Average Grant Date Fair Value (per unit)	Market-based Performance Share Units	Weighted-Average Grant Date Fair Value (per unit)

Stock Options

The exercise price of stock options granted is equal to the fair value of the underlying stock on the date of grant. The contractual term for stock options expires ten years from the grant date. Stock options generally vest over a three - or four -year period, with 25% of the awards vesting after one year and the remainder of the awards vesting on a monthly or quarterly basis thereafter. We did not grant any stock options during the six months ended June 30, 2019 .

The table below summarizes stock option activity for the six months ended June 30, 2019 :

	Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands) ⁽¹⁾
Outstanding and exercisable at December 31, 2018	212,787	\$ 1.80	1.37	\$ 298
Exercised	(42,500)	0.96		
Outstanding and exercisable at June 30, 2019	170,287	\$ 1.95	0.92	\$ 278

- (1) The aggregate intrinsic value of options outstanding and exercisable represents the total pretax intrinsic value (the difference between the fair value of our stock on the last day of each period and the exercise price, multiplied by the number of options where the fair value exceeds the exercise price) that would have been received by the option holders had all option holders exercised their options as of June 30, 2019 and December 31, 2018 .

9 . REVENUE RECOGNITION

Refer to Note 13 , *Segment Information* , for revenue summarized by reportable segment and category for the three and six months ended June 30, 2019 and 2018 .

Contract Balances

A substantial majority of our deferred revenue relates to product sales for which revenue will be recognized as the products are delivered to customers, generally within one week following the balance sheet date. Our deferred revenue was \$19.9 million and \$25.5 million as of June 30, 2019 and December 31, 2018 . The amount of revenue recognized for the six months ended June 30, 2019 that was included in the deferred revenue balance at the beginning of the period was \$25.4 million .

The following table summarizes the activity in the liability for customer credits for the six months ended June 30, 2019 (in thousands):

	Customer Credits
Balance as of December 31, 2018	\$ 15,118
Credits issued	56,477
Credits redeemed ⁽¹⁾	(49,928)
Breakage revenue recognized	(4,177)
Foreign currency translation	26
Balance as of June 30, 2019	\$ 17,516

- (1) Customer credits can be redeemed through our online marketplaces for goods or services provided by a third-party merchant or for merchandise inventory sold by us. When customer credits are redeemed for goods or services provided by a third-party merchant, service revenue is recognized on a net basis as the difference between the carrying amount of the customer credit liability derecognized and the amount due to the merchant for the related transaction. When customer credits are redeemed for merchandise inventory sold by us, product revenue is recognized on a gross basis equal to the amount of the customer credit liability derecognized. Customer credits are typically used within one year of issuance.

Costs of Obtaining Contracts

Incremental costs to obtain contracts with third-party merchants, such as sales commissions, are deferred and recognized over the expected period of the merchant arrangement, generally from 12 to 18 months. Those costs are

GROUPON, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(unaudited)

classified within Selling, general and administrative expense in the condensed consolidated statements of operations. As of June 30, 2019 and December 31, 2018, we had deferred contract acquisition costs of \$2.6 million and \$2.9 million, respectively, recorded within Prepaid expenses and other current assets, and \$10.2 million and \$11.3 million, respectively, recorded within Other non-current assets. We amortized \$5.1 million and \$6.5 million of deferred contract acquisition costs during the three months ended June 30, 2019 and 2018, and \$10.5 million and \$13.3 million for the six months ended June 30, 2019 and 2018. We did not recognize any impairment losses in relation to the deferred costs.

Variable Consideration for Unredeemed Vouchers

In our International segment and, to a lesser extent, in our North America segment, our merchant agreements have redemption payment terms, under which the merchant is not paid its share of the sale price for a voucher sold through one of our online marketplaces until the customer redeems the related voucher. If the customer does not redeem a voucher with such merchant payment terms, we retain all of the gross billings for that voucher, rather than retaining only our net commission. We estimate the variable consideration from vouchers that will not ultimately be redeemed using our historical voucher redemption experience and recognize that amount as revenue at the time of sale. We only recognize amounts in variable consideration when we believe it is probable that a significant reversal of revenue will not occur in future periods, which requires us to make significant estimates of future redemptions. If actual redemptions differ from our estimates, the effects could be material to the condensed consolidated financial statements. As of June 30, 2019 and December 31, 2018, we constrained \$15.3 million and \$13.7 million in revenue from unredeemed vouchers that we may recognize in future periods when we determine it is probable that a significant amount of that revenue will not be subsequently reversed.

10 . INCOME TAXES

Our income tax provision for interim periods is determined using an estimate of our annual effective tax rate, adjusted for discrete items.

For the three months ended June 30, 2019, we recorded an income tax expense from continuing operations of \$2.0 million on a pretax loss from continuing operations of \$35.6 million. For the three months ended June 30, 2018, we recorded an income tax expense from continuing operations of \$1.6 million on a pretax loss from continuing operations of \$90.7 million. For the six months ended June 30, 2019, we recorded an income tax benefit from continuing operations of \$1.5 million on a pretax loss from continuing operations of \$80.3 million. For the six months ended June 30, 2018, we recorded an income tax benefit from continuing operations of \$0.8 million on a pretax loss from continuing operations of \$95.8 million.

Our U.S. Federal income tax rate is 21%. The primary factor impacting the effective tax rate for the three and six months ended June 30, 2019 and 2018 was the pretax losses incurred in jurisdictions that have valuation allowances against their net deferred tax assets. We expect that our consolidated effective tax rate in future periods will continue to differ significantly from the U.S. federal income tax rate as a result of our tax obligations in jurisdictions with profits and valuation allowances in jurisdictions with losses. The effective tax rate for the six months ended June 30, 2019 also reflected the reversal of reserves for uncertain tax positions due to the closure of a tax audit. The effective tax rate for the six months ended June 30, 2018 also reflected a \$6.4 million income tax benefit resulting from the impact of Accounting Standards Codification Topic 606, *Revenue from Contracts with Customers* ("Topic 606") on intercompany activity in certain foreign jurisdictions.

We are currently undergoing income tax audits in multiple jurisdictions. It is likely that the examination phase of some of those audits will conclude in the next 12 months. There are many factors, including factors outside of our control, which influence the progress and completion of those audits. We are subject to claims for tax assessments by foreign jurisdictions, including a proposed assessment for \$109.9 million. We believe that the assessment, which primarily relates to transfer pricing on transactions occurring in 2011, is without merit and we intend to vigorously defend ourselves in that matter. In addition to any potential increases in our liabilities for uncertain tax positions from the ultimate resolution of that assessment, we believe that it is reasonably possible that reductions of up to \$21.0 million in unrecognized tax benefits may occur within the 12 months following June 30, 2019 upon closing of income tax audits or the expiration of applicable statutes of limitations.

In general, it is our practice and intention to reinvest the earnings of our non-U.S. subsidiaries in those operations. Additionally, while we did not incur the deemed repatriation tax, an actual repatriation from our non-U.S. subsidiaries could be subject to foreign and U.S. state income taxes. Aside from limited exceptions for which the related deferred tax liabilities recognized as of June 30, 2019 and December 31, 2018 are immaterial, we do not intend to distribute earnings of foreign subsidiaries for which we have an excess of the financial reporting basis over the tax basis of our investments and therefore have not recorded any deferred taxes related to such amounts. The actual tax cost resulting from a distribution would depend on income tax laws and circumstances at the time of distribution. Determination of the amount of unrecognized deferred tax liability related to the excess of the financial reporting basis over the tax basis of our foreign subsidiaries is not practical due to the complexities associated with the calculation.

Groupon uses a cost-sharing arrangement under which controlled members agree to share the costs and risks of developing intangible properties in accordance with their reasonably anticipated share of benefits from the intangibles. On July 24, 2018, the Ninth Circuit Court of Appeals issued an opinion in *Altera Corp. v. Commissioner* requiring related parties in an intercompany cost-sharing arrangement to share expenses related to stock-based compensation. This opinion reversed an earlier decision of the United States Tax Court. On August 7, 2018, the Ninth Circuit Court of Appeals withdrew its July 24, 2018 opinion. On June 7, 2019, the United States Court of Appeals for the Ninth Circuit reversed the Tax Court decision and ruled that stock-based compensation must be included in the shared pool of expenses. We do not expect that the ruling will have a material net impact on our provision for income taxes for the year ending December 31, 2019 due to the valuation allowances against our net deferred tax assets in the related jurisdictions.

11 . FAIR VALUE MEASUREMENTS

Fair value is defined under U.S. GAAP as the price that would be received to sell an asset or paid to transfer a liability in an orderly

transaction between market participants at the measurement date. Fair value is a market-based measurement that is determined based on assumptions that market participants would use in pricing an asset or a liability.

To increase the comparability of fair value measures, the following hierarchy prioritizes the inputs in valuation methodologies used to measure fair value:

Level 1 - Measurements that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 - Measurements that include other inputs that are directly or indirectly observable in the marketplace.

Level 3 - Measurements derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable. These fair value measurements require significant judgment.

In determining fair value, we use various valuation approaches within the fair value measurement framework. The valuation methodologies used for our assets and liabilities measured at fair value and their classification in the valuation hierarchy are summarized below:

Fair value option investments and available-for-sale securities. To determine the fair value of our fair value option investments each period, we first estimate the fair value of each entity in its entirety. We primarily use the discounted cash flow method, which is an income approach, to estimate the fair value of the entities. The key inputs to determining fair values under that approach are cash flow forecasts and discount rates. We also use a market approach valuation technique, which is based on market multiples of guideline companies, to determine the fair value of each entity. The discounted cash flow and market multiple valuations are then evaluated and weighted to determine the amount that is most representative of the fair value of each entity. Once we determine the fair value of each entity, we then determine the fair value of our specific investments in those entities. The entities have complex capital structures, so we apply an option-pricing model that considers the liquidation preferences of each entity's respective classes of ownership interests to determine the fair value of our investment in each entity.

We also have investments in redeemable preferred shares and had investments in convertible debt securities issued by nonpublic entities. We measure the fair value of those available-for-sale securities using the

discounted cash flow method.

We have classified our fair value option investments and our investments in available-for-sale securities as Level 3 due to the lack of observable market data over fair value inputs such as cash flow projections and discount rates. Increases in projected cash flows and decreases in discount rates contribute to increases in the estimated fair values of the fair value option investments and available-for-sale securities, whereas decreases in projected cash flows and increases in discount rates contribute to decreases in their fair values.

Contingent consideration. We are subject to a contingent consideration arrangement to transfer a maximum payout in cash of \$2.5 million to the former owners of a business acquired on April 30, 2018.

Liabilities for contingent consideration are measured at fair value each reporting period, with the acquisition-date fair value included as part of the consideration transferred in the related business combination and subsequent changes in fair value recorded in earnings within Selling, general and administrative expense on the condensed consolidated statements of operations.

We use an income approach to value contingent consideration obligations based on the present value of probability-weighted future cash flows. We classify the contingent consideration liabilities as Level 3 due to the lack of relevant observable market data over fair value inputs such as probability-weighting of payment outcomes.

The following tables summarize assets that are measured at fair value on a recurring basis as of June 30, 2019 and December 31, 2018 (in thousands):

(2) Represents a gain at maturity of a previously impaired convertible debt security, accretion of interest income and changes in the fair value of an embedded derivative.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Certain assets and liabilities are measured at fair value on a nonrecurring basis, including assets that are written down to fair value as a result of an impairment. We did not record any significant nonrecurring fair value measurements after initial recognition for the three and six months ended June 30, 2019. During the three months ended June 30, 2018, we recorded a \$4.6 million impairment of an other equity investment. To determine the fair value of the investment, we considered the financial condition of the investee and applied a market approach. We classified the fair value measurement of that other equity investment as Level 3 because it involves significant unobservable inputs. We did not record any other nonrecurring fair value measurements after initial recognition for the three and six

months ended June 30, 2018.

Estimated Fair Value of Financial Assets and Liabilities Not Measured at Fair Value

Our financial instruments not carried at fair value consist primarily of accounts receivable, restricted cash, accounts payable, accrued merchant and supplier payables and accrued expenses. The carrying values of those assets and liabilities approximate their respective fair values as of June 30, 2019 and December 31, 2018 due to their short-term nature.

12 . INCOME (LOSS) PER SHARE

Basic net income (loss) per share is computed using the weighted-average number of common shares outstanding during the period. Diluted net income (loss) per share is computed using the weighted-average number of common shares and the effect of potentially dilutive securities outstanding during the period. Potentially dilutive securities include stock options, restricted stock units, performance share units, ESPP shares, warrants and convertible senior notes. If dilutive, those potentially dilutive securities are reflected in diluted net income (loss) per share by application of the treasury stock method, except for the convertible senior notes, which are subject to the if-converted method.

The following table sets forth the computation of basic and diluted net income (loss) per share of common stock for the three and six months ended June 30, 2019 and 2018 (in thousands, except share and per share amounts):

	Three Months Ended June 30,		Six Months Ended June 30,

The following weighted-average potentially dilutive instruments are not included in the diluted net income (loss) per share calculations above because they would have had an antidilutive effect on the net income (loss) per share from continuing operations:

We had outstanding performance share units as of June 30, 2019 and 2018 that were eligible to vest into shares of common stock subject to the achievement of specified performance conditions. Contingently issuable shares are excluded from the computation of diluted earnings per share if, based on current period results, the shares would not be issuable if the end of the reporting period were the end of the contingency period. There were up to 16,966,170 and 7,706,474 shares of common stock issuable upon vesting of outstanding performance share units as of June 30, 2019 and 2018 that were excluded from the table above as the performance conditions were not satisfied as of the end of the respective periods.

13 . SEGMENT INFORMATION

The segment information reported in the tables below reflects the operating results that are regularly reviewed by our chief operating decision maker to assess performance and make resource allocation decisions. Our operations are organized into two segments: North America and International.

The following table summarizes revenue by reportable segment and category for the three and six months ended June 30, 2019 and 2018 (in thousands):

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read together with our condensed consolidated financial statements and related notes included under Part I, Item 1 of this Quarterly Report on Form 10-Q. This discussion contains forward-looking statements about our business and operations. Our actual results may differ materially from those we currently anticipate as a result of many factors, including those we describe under *Risk Factors* and elsewhere in this Quarterly Report. See Part I, *Financial Information, Forward-Looking Statements*, for additional information.

Overview

Groupon operates online local commerce marketplaces in 15 countries that connect merchants to consumers by offering goods and services, generally at a discount. Consumers access those marketplaces through our websites, primarily localized groupon.com sites in many countries, and our mobile applications. Traditionally, local merchants have tried to reach consumers and generate sales through a variety of methods, including online advertising, paid telephone directories, direct mail, newspaper, radio, television and other promotions. By bringing the brick and mortar world of local commerce onto the Internet, Groupon is helping local merchants to attract customers and sell goods and services. We provide consumers with savings and help them discover what to do, eat, see, buy and where to travel.

Our operations are organized into two segments: North America and International. For the six months ended June 30, 2019, we derived 61.4% of our revenue from our North America segment and 38.6% of our revenue from our International segment. See Item 1, Note 13, *Segment Information*, for additional information. We offer goods and services through our online marketplaces in three primary categories: Local, Goods and Travel.

We generate both product and service revenue from our business operations. Our product revenue from transactions in which we sell merchandise inventory in our Goods category is the purchase price received from the customer. Our service revenue from transactions in which we earn commissions by selling goods or services on behalf of third-party merchants is the purchase price collected from the customer less the portion of the purchase price paid to the merchant.

Our focus is on driving long-term gross profit growth by enhancing the customer experience, establishing Groupon as an open platform, continuing to realize our international potential and maintaining a culture of operational efficiency. We have developed and are testing a number of product enhancements intended to make our offerings easier to use for both customers and merchants and to improve purchase frequency, including cash back offers linked to customer credit cards, booking capabilities and a paid membership program in North America, Groupon Select, which offers greater discounts on our offerings and other benefits. We have also entered into commercial agreements with third parties that enable us to feature additional merchant offerings through our marketplaces and for our inventory to be distributed through other marketplaces. We maintain a long-term focus on driving International to achieve gross profit that is more comparable to that of North America. Our initiatives to grow International include increasing our marketing spend and leveraging enhanced marketing analytics, investing more technology resources toward expanding product and service offerings, and growing our inventory of deal offerings. While we expect to invest in our key initiatives, we will continue to do so as disciplined operators and seek opportunities to improve our efficiency.

How We Measure Our Business

We use several financial and operating metrics to assess the progress of our business and make decisions on where to allocate capital, time and technology investments. Certain of the financial metrics are reported in accordance with U.S. GAAP and certain of those metrics are considered non-GAAP financial measures. As our business evolves, we may make changes to the key financial and operating metrics that we use to measure our business. For further information and reconciliations to the most applicable financial measures under U.S. GAAP, refer to our discussion under Non-GAAP Financial Measures in the *Results of Operations* section.

Financial Metrics

- *Revenue* is earned through product and service revenue transactions. We earn product revenue from direct sales of merchandise inventory in our Goods category and report product revenue on a gross basis as the purchase price received from the customer. We earn service revenue from transactions in which we generate commissions by selling goods or services on behalf of third-party merchants, primarily through sales of vouchers and similar transactions in which we collect the transaction price from the customer and remit a portion of that transaction price to the third-party merchant who will provide the related goods or services. We report service revenue from those transactions on a net basis as the purchase price collected from the customer less the portion of the purchase price that is payable to the third-party merchant. Service revenue also includes commissions we earn when customers make purchases with retailers using digital coupons accessed through our websites and mobile applications and from voucherless merchant offerings in which customers earn cash back on their credit card statements when they transact with third-party merchants.
- *Gross profit* reflects the net margin we earn after deducting our cost of revenue from our revenue. Due to the lack of comparability between product revenue, which is reported on a gross basis, and service revenue, which primarily consists of transactions reported on a net basis, we believe that gross profit is an important measure for evaluating our performance.
- *Adjusted EBITDA* is a non-GAAP financial measure that we define as net income (loss) from continuing operations excluding income taxes, interest and other non-operating items, depreciation and amortization, stock-based compensation, acquisition-related expense (benefit), net and other special charges and credits, including items that are unusual in nature or infrequently occurring. For further information and a reconciliation to Income (loss) from continuing operations, refer to our discussion under Non-GAAP Financial Measures in the *Results of Operations* section.
- *Free cash flow* is a non-GAAP financial measure that comprises net cash provided by (used in) operating activities from continuing operations less purchases of property and equipment and capitalized software. For further information and a reconciliation to Net cash provided by (used in) operating activities from continuing operations, refer to our discussion in the *Liquidity and Capital Resources* section.

The following table presents the above financial metrics for the three and six months ended June 30, 2019 and 2018 (in thousands):

Operating Metrics

- *Gross billings* is the total dollar value of customer purchases of goods and services. Gross billings is presented net of customer refunds, order discounts and sales and related taxes. The substantial majority of our service revenue transactions are comprised of sales of vouchers and similar transactions in which we collect the transaction price from the customer and remit a portion of the transaction price to the third-party merchant who will provide the related goods or services. For these transactions, gross billings differs from revenue reported in our condensed consolidated statements of operations, which is presented net of the merchant's share of the transaction price. For product revenue transactions, gross billings are equivalent to product revenue reported in our condensed consolidated statements of operations. Gross billings is an indicator of our growth and business performance as it measures the dollar volume of transactions generated through our marketplaces. Tracking gross billings on service revenue transactions also allows us to monitor the percentage of gross billings that we are able to retain after payments to merchants. However, management is primarily focused on optimizing the business for long-term gross profit and Adjusted EBITDA growth.
- *Active customers* are unique user accounts that have made a purchase during the trailing twelve months ("TTM") either through one of our online marketplaces or directly with a merchant for which we earned a commission. We consider this metric to be an important indicator of our business performance as it helps us

to understand how the number of customers actively purchasing our offerings is trending. Some customers could establish and make purchases from more than one account, so it is possible that our active customer metric may count certain customers more than once in a given period. For entities that we have acquired in a business combination, this metric includes active customers of the acquired entity, including customers who made purchases prior to the acquisition. We do not include consumers who solely make purchases with retailers using digital coupons accessed through our websites and mobile applications in our active customer metric, nor do we include consumers who solely make purchases of our inventory through third-party marketplaces with which we partner.

Our active customer metric for the trailing twelve months ended June 30, 2019 has declined both on a year-over-year basis and sequentially from the trailing twelve months ended March 31, 2019. The decline is primarily attributable to a decline in traffic, including traffic from email and search engine optimization ("SEO"), as well as our efforts to improve the efficiency of our marketing spend by focusing that spend on customers who we believe will have higher long-term value. That strategy has resulted in lower marketing spend on less valuable customers, particularly in North America, and led to a decrease in the number of active customers. We expect the trend of declining active customers in North America to continue in 2019 and, to some extent, into 2020 due to ongoing traffic declines and our continued focus on attracting and retaining high-quality customers.

- *Gross billings and gross profit per active customer* are the TTM gross billings and gross profit generated per active customer. We use these metrics to evaluate trends in customer spend and in the average contribution to gross billings and gross profit on a per-customer basis.
- *Units* is the number of purchases during the reporting period, before refunds and cancellations, made either through one of our online marketplaces, a third-party marketplace, or directly with a merchant for which we earn a commission. We do not include purchases with retailers using digital coupons accessed through our websites and mobile applications in our units metric. We consider unit growth to be an important indicator of the total volume of business conducted through our marketplaces.

Our total units sold declined by 12.0% for the three and six months ended June 30, 2019 as compared with the prior year, primarily reflecting unit declines in our North America segment. The decline in total units sold in the current year was primarily attributable to fewer customers, lower customer traffic, including traffic from email and SEO, and shifting impressions to support our strategic initiatives. We expect that trend to continue in 2019.

Our gross billings and units for the three and six months ended June 30, 2019 and 2018 were as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,

Factors Affecting Our Performance

Attracting and Retaining Local Merchants. As we seek to build a more complete online local commerce marketplace platform, we depend on our ability to attract and retain merchants who are willing to offer discounted products and services through our marketplaces. Additionally, merchants can generally withdraw their offerings from

our marketplaces at any time and their willingness to continue offering products and services through our platform depends on the effectiveness of our marketing and promotional services. We primarily source the deal offerings available on our marketplaces through our sales teams, which comprise a significant portion of our global employee base. We have also entered into commercial agreements with third parties that enable us to feature additional merchant offerings through our marketplaces. We continue to focus much of our sales efforts on sourcing local deal offerings in subcategories that we believe provide us with the best opportunities for high frequency customer purchase behavior. In connection with our efforts to grow our offerings in those high frequency subcategories, which include health, beauty and wellness, events and activities, and food and drink, we may be willing to offer more attractive terms to local merchants that could reduce our deal margins in future periods.

Growing our Active Customer Base and Customer Value . We must acquire and retain customers that we expect to have long-term value, and increase gross profit per customer in order to grow our business. Our marketing spending is intended to attract and retain active customers and to promote increased purchase frequency. We have made enhancements to our customer segmentation in recent periods that are intended to better focus our marketing efforts on customers that we believe have a greater potential for long-term gross profit generation. In addition to online marketing, such as search engine marketing ("SEM"), our marketing spending includes investments in offline campaigns intended to increase customer awareness and understanding of the Groupon brand and our product and service offerings. Additionally, we consider order discounts and certain other initiatives to drive customer acquisition and activation to be marketing-related activities, even though such activities may not be presented as marketing expense in our condensed consolidated statements of operations. The organic traffic to our websites and mobile applications from consumers responding to our emails has declined in recent years, such that an increasing proportion of our traffic is generated from SEM and other paid marketing channels. We have also experienced declines from other sources of organic traffic, such as email and SEO. As such, we are focused on developing sources of organic traffic other than email and optimizing the efficiency of our marketing spending, which is primarily guided by return on investment thresholds that are currently based on expected months-to-payback targets ranging from 12 to 18 months. Additionally, our product and supply initiatives are intended to increase the rates at which visitors to our websites and mobile applications complete a purchase.

Investing in Growth . We have invested significantly in product and technology enhancements intended to support the growth of our online marketplaces and we intend to continue to do so in the future. We have also invested in business acquisitions to grow our merchant and customer base and advance our product and technology capabilities. We are currently developing and testing a number of product enhancements intended to make our offerings easier to use for both customers and merchants and to improve purchase frequency, including cash back offers linked to customer credit cards, booking capabilities and a paid membership program in North America, Groupon Select, which offers greater discounts on our offerings and other benefits. We believe that those initiatives may be important drivers for increasing customer purchase frequency and growing our business over time. We are currently focusing our efforts on growing customer awareness of those products and scaling the related merchant base. As such, our gross profit and operating income may be adversely impacted in the near term as we focus more on driving our strategic initiatives. Additionally, many of our cash back offers linked to customer credit cards involve collecting a net fee from the merchant, rather than selling a voucher to the customer and then remitting a portion of the proceeds to the merchant. As we report sales of vouchers to customers as gross billings, the growth of voucherless cash back transactions with this merchant payment structure could adversely impact our gross billings trends in future periods. Mobile consumers, particularly those accessing our marketplaces through the mobile web, generally complete purchases at a lower rate and at lower average transaction prices than consumers accessing our marketplaces through desktop computers. As a substantial majority of our traffic comes from consumers on mobile devices, we are focused on improving the mobile experience in order to increase purchase rates. Our initiatives to improve the mobile experience include improving page speeds, enhancing our relevance algorithms, streamlining the checkout process and bringing our mobile web experience to parity with that of our mobile applications.

Managing Operating Efficiency . We are focused on effectively managing our cost structure as we seek to grow our profitability in future periods. Our prior restructuring actions and our continuing efforts to automate internal processes have allowed us to centralize many of our back office activities in lower cost shared service centers resulting in significant reductions in our selling, general and administrative expense in recent periods. We have primarily used those savings to invest in marketing, people and product enhancements intended to drive the long-term growth of our business. We intend to continue to focus on driving operating efficiency.

North America

North America gross billings were 65.6% and 66.3% of total gross billings for the three months ended June 30, 2019 and 2018 . North America gross billings decreased for the three months ended June 30, 2019 compared with the prior year period due to fewer customers, lower customer traffic, including traffic from email and SEO, and shifting impressions to support our strategic initiatives. Those decreases were partially offset by higher gross billings per unit due to a shift in mix of offerings sold.

The above factors also resulted in lower gross billings per active customer, which was \$113.02 for the TTM ended June 30, 2019 , as compared with \$114.52 in the corresponding prior year period and total units sold, which decreased to 21.9 million units for the three months ended June 30, 2019 , as compared with 26.6 million units in the prior year period.

International

International gross billings were 34.4% and 33.7% of total gross billings for the three months ended June 30, 2019 and 2018 . International gross billings decreased \$40.2 million for the three months ended June 30, 2019 compared with the prior year period, primarily due to a \$23.2 million unfavorable impact from year-over-year changes in foreign currency rates, weak consumer sentiment in Europe, particularly in the United Kingdom, and intensifying competition in home and garden offerings.

The percentages of service gross billings that we retained after deducting the merchant's share for the three months ended June 30, 2019 and 2018 were as follows:

North America

North America revenue was 61.0% and 61.6% of total revenue for the three months ended June 30, 2019 and 2018 . North America revenue decreased \$55.6 million for the three months ended June 30, 2019 compared with the prior year period, primarily driven by the decline in transaction volume and gross billings, as discussed above, partially offset by a shift in mix of offerings sold.

International

International revenue was 39.0% and 38.4% of total revenue for the three months ended June 30, 2019 and 2018 . International revenue decreased \$29.2 million for the three months ended June 30, 2019 compared with the prior year period, primarily driven by lower gross billings as discussed above and a \$12.7 million unfavorable impact from year-over-year changes in foreign exchange rates. These declines were partially offset by a shift in our Goods category mix from service revenue transactions, which are reported on a net basis, toward product revenue transactions, which are reported on a gross basis.

The percentages of service gross billings that we retained after deducting the merchant's share for the six months ended June 30, 2019 and 2018 were as follows:

North America

North America revenue was 61.4% and 62.2% of total revenue for the six months ended June 30, 2019 and 2018 . North America revenue decreased \$91.7 million for the six months ended June 30, 2019 compared with the prior year period, primarily driven by the decline in transaction volume and gross billings, as discussed above, partially offset by a shift in mix of offerings sold.

International

International revenue was 38.6% and 37.8% of total revenue for the six months ended June 30, 2019 and 2018 . International revenue decreased \$41.3 million for the six months ended June 30, 2019 compared with the prior year period, primarily driven by a \$30.4 million unfavorable impact from year-over-year changes in foreign exchange rates and lower gross billings as discussed above. These declines were partially offset by the expansion of our digital coupons offerings through our acquisition of Cloud Savings in April 2018 and a shift in our Goods category mix from service revenue transactions, which are reported on a net basis, toward product revenue transactions, which are reported on a gross basis.

Cost of Revenue

Cost of revenue is comprised of direct and certain indirect costs incurred to generate revenue including credit card processing fees, editorial costs, compensation expense for technology support personnel who are responsible for maintaining the infrastructure of our websites, amortization of internal-use software relating to customer-facing applications, web hosting and other processing fees. For product revenue transactions, cost of revenue also includes the cost of inventory, shipping and fulfillment costs and inventory markdowns. Fulfillment costs are comprised of third-party logistics provider costs, as well as rent, depreciation, personnel costs and other costs of operating our fulfillment center.

North America

North America gross profit was 68.3% and 67.7% of total gross profit for the six months ended June 30, 2019 and 2018 . The decrease in North America gross profit for the six months ended June 30, 2019 compared with the prior year period reflects a decline in transaction volume and gross billings, as discussed above.

International

International gross profit was 31.7% and 32.3% of total gross profit for the six months ended June 30, 2019 and 2018 . The decrease in International gross profit for the six months ended June 30, 2019 compared with the prior year period was primarily attributable to a \$13.2 million unfavorable impact from year-over-year changes in foreign exchange rates and lower gross billings as discussed above. These declines were partially offset by the expansion of our digital coupons offerings through our acquisition of Cloud Savings in April 2018.

Marketing

Marketing expense consists primarily of online marketing costs, such as search engine marketing, advertising on social networking sites and affiliate programs, and offline marketing costs, such as television and radio advertising. Additionally, compensation expense for marketing employees is classified within marketing expense. We record these costs within Marketing on the condensed consolidated statements of operations when incurred. From time to time, we offer deals with well-known national merchants for customer acquisition and activation purposes, for which the amount we owe the merchant for each voucher sold exceeds the transaction price paid by the customer. Our gross billings from those transactions generate no service revenue and our net cost (i.e., the excess of the amount owed to the merchant over the amount paid by the customer) is classified as marketing expense. We evaluate marketing expense as a percentage of gross profit because it gives us an indication of how well our marketing spend is driving gross profit performance.

Three Months Ended June 30, 2019 and 2018 :

Marketing expense by segment as a percentage of gross profit for the three months ended June 30, 2019 and 2018 was as follows (dollars in thousands):

North America

North America segment marketing expense was 64.2% and 70.5% of total marketing expense for the three months ended June 30, 2019 and 2018 . North America marketing expense and marketing expense as a percentage of gross profit for the three months ended June 30, 2019 decreased from the prior year period as we leveraged improved marketing analytics to drive efficiency in our marketing spend and maximize the lifetime value of our customer base.

International

International segment marketing expense was 35.8% and 29.5% of total marketing expense for the three months ended June 30, 2019 and 2018 . International marketing expense and marketing expense as a percentage of gross profit for the three months ended June 30, 2019 increased from the prior year period, as we continue to invest in the long-term potential of the International segment. The increase in marketing expense was partially offset by a \$1.8 million favorable impact from year-over-year changes in foreign exchange rates.

Six Months Ended June 30, 2019 and 2018 :

Marketing expense by segment as a percentage of gross profit for the six months ended June 30, 2019 and 2018 was as follows (dollars in thousands):

North America marketing expense and marketing expense as a percentage of gross profit for the six months ended June 30, 2019 decreased from the prior year period as we leveraged improved marketing analytics to drive efficiency in our marketing spend and maximize the lifetime value of our customer base.

International

International segment marketing expense was 35.9% and 28.7% of total marketing expense for the six months ended June 30, 2019 and 2018. International marketing expense and marketing expense as a percentage of gross profit for the six months ended June 30, 2019 increased from the prior year period, as we continue to invest in the long-term potential of the International segment. The increase in marketing expense was partially offset by a \$4.4 million favorable impact from year-over-year changes in foreign exchange rates.

Selling, General, and Administrative

Selling expenses reported within Selling, general and administrative ("SG&A") on the condensed consolidated statements of operations consist of sales commissions and other compensation expenses for sales representatives, as well as costs associated with supporting the sales function such as technology, telecommunications and travel. General and administrative expenses include compensation expense for employees involved in customer service, operations, technology and product development, as well as general corporate functions, such as finance, legal and human resources. Additional costs included in general and administrative include depreciation and amortization, rent, professional fees, litigation costs, travel and entertainment, recruiting, office supplies, maintenance, certain technology costs and other general corporate costs. We evaluate SG&A expense as a percentage of gross profit because it gives us an indication of our operating efficiency.

Three Months Ended June 30, 2019 and 2018 :

SG&A as a percentage of gross profit for the three months ended June 30, 2019 and 2018 was as follows (dollars in thousands):

	Three Months Ended June 30,

Selling, general and administrative	\$ 210,348	72.0%	\$ 293,725	90.8%	\$ (83,377)	(28.4)%

The decrease in SG&A for the three months ended June 30, 2019 as compared with the prior year period was primarily attributable to:

- a \$75.0 million charge recorded in the three months ended June 30, 2018 to increase our contingent liability related to a patent litigation case with IBM;
- a \$4.9 million favorable impact from year-over-year changes in foreign currency exchange rates; and
- decreases in facilities costs, system costs, litigation and other general expenses.

Provision (Benefit) for Income Taxes**Three Months Ended June 30, 2019 and 2018 :**

Provision (benefit) for income taxes for the three months ended June 30, 2019 and 2018 was as follows (dollars in thousands):

	Three Months Ended June 30,			
	2019	2018	\$ Change	% Change
Provision (benefit) for income taxes	\$ 2,012	\$ 1,552	\$ 460	29.6%
Effective tax rate	(5.6)%	(1.7)%		

Our U.S. Federal income tax rate is 21%. The primary factor impacting the effective tax rate for the three months ended June 30, 2019 and 2018 was the pretax losses incurred in jurisdictions that have valuation allowances against their net deferred tax assets. We expect that our consolidated effective tax rate in future periods will continue to differ significantly from the U.S. federal income tax rate as a result of our tax obligations in jurisdictions with profits and valuation allowances in jurisdictions with losses. See Item 1, Note 10 , *Income Taxes* , for additional information relating to tax audits and assessments and regulatory and legal developments that may impact our business and results of operations in the future .

Six Months Ended June 30, 2019 and 2018 :

Provision (benefit) for income taxes for the six months ended June 30, 2019 and 2018 was as follows (dollars in thousands):

	Six Months Ended June 30,			
	2019	2018	\$ Change	% Change
Provision (benefit) for income taxes	\$ (1,478)	\$ (783)	\$ (695)	(88.8)%
Effective tax rate	1.8%	0.8%		

Our U.S. Federal income tax rate is 21%. The primary factor impacting the effective tax rate for the six months ended June 30, 2019 and 2018 was the pretax losses incurred in jurisdictions that have valuation allowances against their net deferred tax assets. The effective tax rate for the six months ended June 30, 2019 also reflected the reversal of reserves for uncertain tax positions due to the closure of a tax audit. The effective tax rate for the six months ended June 30, 2018 also reflected a \$6.4 million income tax benefit resulting from the impact of Topic 606 on intercompany activity in certain foreign jurisdictions. We expect that our consolidated effective tax rate in future periods will continue to differ significantly from the U.S. federal income tax rate as a result of our tax obligations in jurisdictions with profits and valuation allowances in jurisdictions with losses. See Item 1, Note 10, *Income Taxes*, for additional information relating to tax audits and assessments and regulatory and legal developments that may impact our business and results of operations in the future.

Non-GAAP Financial Measures

In addition to financial results reported in accordance with U.S. GAAP, we have provided the following non-GAAP financial measures: Adjusted EBITDA, free cash flow and foreign currency exchange rate neutral operating results. Those non-GAAP financial measures, which are presented on a continuing operations basis, are intended to aid investors in better understanding our current financial performance and prospects for the future as seen through the eyes of management. We believe that those non-GAAP financial measures facilitate comparisons with our historical results and with the results of peer companies who present similar measures (although other companies may define non-GAAP measures differently than we define them, even when similar terms are used to identify such measures). However, those non-GAAP financial measures are not intended to be a substitute for those reported in accordance with U.S. GAAP.

Adjusted EBITDA . Adjusted EBITDA is a non-GAAP performance measure that we define as net income (loss) from continuing operations excluding income taxes, interest and other non-operating items, depreciation and amortization, stock-based compensation, acquisition-related expense (benefit), net and other special charges and credits, including items that are unusual in nature or infrequently occurring. Our definition of Adjusted EBITDA may differ from similar measures used by other companies, even when similar terms are used to identify such measures. Adjusted EBITDA is a key measure used by our management and Board of Directors to evaluate operating performance, generate future operating plans and make strategic decisions for the allocation of capital. Accordingly, we believe that Adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and Board of Directors. However, Adjusted EBITDA is not intended to be a substitute for income (loss) from continuing operations.

We exclude stock-based compensation expense and depreciation and amortization because they are primarily non-cash in nature and we believe that non-GAAP financial measures excluding those items provide meaningful supplemental information about our operating performance and liquidity. Acquisition-related expense (benefit), net is comprised of the change in the fair value of contingent consideration arrangements and external transaction costs related to business combinations, primarily consisting of legal and advisory fees. The composition of our contingent consideration arrangements and the impact of those arrangements on our operating results vary over time based on a number of factors, including the terms of our business combinations and the timing of those transactions. For the three and six months ended June 30, 2019 and 2018 , special charges and credits included charges related to our restructuring plan. For the three and six months ended June 30, 2018 , special charges and credits also included the \$75.0 million charge recorded in the second quarter 2018 related to a patent litigation case with IBM. We exclude special charges and credits from Adjusted EBITDA because we believe that excluding those items provides meaningful supplemental information about our core operating performance and facilitates comparisons with our historical results.

The following is a reconciliation of Adjusted EBITDA to the most comparable U.S. GAAP financial measure, Income (loss) from continuing operations for the three and six months ended June 30, 2019 and 2018 (in thousands):

Free cash flow . Free cash flow is a non-GAAP liquidity measure that comprises net cash provided by operating activities from continuing operations less purchases of property and equipment and capitalized software. We use free cash flow to conduct and evaluate our business because, although it is similar to cash flow from continuing operations,

we believe that it typically represents a more useful measure of cash flows because purchases of fixed assets, software developed for internal use and website development costs are necessary components of our ongoing operations. Free cash flow is not intended to represent the total increase or decrease in our cash balance for the applicable period.

Free cash flow has limitations due to the fact that it does not represent the residual cash flow available for discretionary expenditures. For example, free cash flow does not include cash payments for business acquisitions. In addition, free cash flow reflects the impact of the timing difference between when we are paid by customers and when we pay merchants and suppliers. Therefore, we believe it is important to view free cash flow as a complement to our entire condensed consolidated statements of cash flows. For a reconciliation of free cash flow to the most comparable U.S. GAAP financial measure, see *Liquidity and Capital Resources* below.

Foreign currency exchange rate neutral operating results . Foreign currency exchange rate neutral operating results show current period operating results as if foreign currency exchange rates had remained the same as those in effect in the prior year period. Those measures are intended to facilitate comparisons to our historical performance. For a reconciliation of foreign currency exchange rate neutral operating results to the most comparable U.S. GAAP financial measures, see *Results of Operations* above.

Liquidity and Capital Resources

Our principal sources of liquidity are cash flows from operations, cash balances, which totaled \$596.8 million as of June 30, 2019 , and available borrowing capacity under our 2019 Credit Agreement.

Our net cash flows from operating, investing and financing activities from continuing operations for three and six months ended June 30, 2019 and 2018 were as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018
Cash provided by (used in):				
Operating activities	\$ (1,219)	\$ 44,175	\$ (148,702)	\$ (75,572)
Investing activities	(17,235)	(75,714)	(35,350)	(96,096)
Financing activities	(31,581)	(18,729)	(59,358)	(39,628)

Our free cash flow for the three and six months ended June 30, 2019 and 2018 and reconciliations to the most comparable U.S. GAAP financial measure, Net cash provided by (used in) operating activities from continuing operations, for those periods are as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018
Net cash provided by (used in) operating activities from continuing operations	\$ (1,219)	\$ 44,175	\$ (148,702)	\$ (75,572)
Purchases of property and equipment and capitalized software from continuing operations	(16,684)	(17,373)	(34,161)	(37,517)
Free cash flow	<u>\$ (17,903)</u>	<u>\$ 26,802</u>	<u>\$ (182,863)</u>	<u>\$ (113,089)</u>

Our revenue-generating transactions are primarily structured such that we collect cash up-front from customers and pay third-party merchants at a later date, either based on a fixed payment schedule or upon the customer's redemption of the related voucher. For merchants on fixed payment terms, we remit payments on an ongoing basis, generally bi-weekly, throughout the term of the merchant's offering. For purchases of merchandise inventory, our supplier payment terms generally range from net 30 to net 60 days. We have primarily paid merchants on fixed payment terms in North America and upon voucher redemption internationally. In the third quarter 2017, we began to increase our use of redemption payment terms with our North America merchants and we expect that trend to continue.

Our cash balances fluctuate significantly throughout the year based on many variables, including gross billings growth rates, the timing of payments to merchants and suppliers, seasonality and the mix of transactions between Goods and Local. For example, we typically generate strong cash inflows during the fourth quarter holiday season, driven primarily by our Goods category, followed by significant cash outflows in the following period when payments are made to inventory suppliers. We are currently developing and testing voucherless offerings that are linked to customer credit cards. For our card-linked offerings, we offer cash back on customers' credit card statements based

on qualifying purchases with participating merchants. For many of those offerings, we typically remit payment to a card brand network within two weeks of the qualifying purchase for the customer's cash back incentive and then we collect from the merchant both our commission and reimbursement for the customer's cash back incentive, usually on a monthly basis. The working capital impact of card-linked offerings with this merchant payment structure is less favorable to us than voucher transactions, for which we collect payment from customers at the time of sale and remit payment to merchants at a later date. As such, our cash flows will initially be adversely impacted to the extent we scale these types of card-linked offerings in future periods.

For the six months ended June 30, 2019, our net cash used in operating activities from continuing operations was \$148.7 million, as compared with a \$78.8 million net loss from continuing operations. That difference was primarily due to \$174.3 million of non-cash items, including depreciation and amortization, stock-based compensation and a \$69.4 million loss from changes in fair value of our investment in Monster LP, partially offset by a \$244.2 million decrease from changes in working capital and other assets and liabilities. The working capital impact was primarily related to the seasonal timing of payments to inventory suppliers and to a lesser extent a reduction in gross billings.

For the six months ended June 30, 2018, our net cash used in operating activities from continuing operations was \$75.6 million, as compared with a \$95.0 million net loss from continuing operations. That difference was primarily due to \$111.6 million of non-cash items, including depreciation and amortization and stock-based compensation, partially offset by a \$92.1 million decrease from changes in working capital and other assets and liabilities. The working capital impact was primarily related to the seasonal timing of payments to inventory suppliers and to a lesser extent a reduction in gross billings.

Our net cash used in investing activities from continuing operations was \$35.4 million and \$96.1 million for the six months ended June 30, 2019 and 2018. Our net cash used in investing activities from continuing operations included purchases of property and equipment and capitalized software of \$34.2 million and \$37.5 million for the six months ended June 30, 2019 and 2018. For the six months ended June 30, 2018, net cash used in investing activities also included net cash paid of \$57.8 million related to the acquisition of Cloud Savings.

Our net cash used in financing activities was \$59.4 million and \$39.6 million for the six months ended June 30, 2019 and 2018. For the six months ended June 30, 2019, net cash used in financing activities included \$29.6 million in purchases of treasury stock under our share repurchase program, \$12.6 million in payments of finance lease obligations and \$10.2 million in taxes paid related to net share settlements of stock-based compensation awards. For the six months ended June 30, 2018, net cash used in financing activities included \$17.2 million in payments of finance lease obligations and \$16.1 million in taxes paid related to net share settlements of stock-based compensation awards.

In May 2019, we entered into the 2019 Credit Agreement which provides for aggregate principal borrowings of up to \$400.0 million and matures in May 2024. The 2019 Credit Agreement replaced our previous \$250.0 million amended and restated credit agreement that was scheduled to mature in June 2019. As of June 30, 2019, we had no borrowings outstanding under the 2019 Credit Agreement and were in compliance with all covenants. See Item 1, Note 5, *Financing Arrangements*, for additional information.

As of June 30, 2019, we had \$231.1 million in cash held by our international subsidiaries, which is primarily denominated in Euros, Pounds Sterling, Canadian dollars, and, to a lesser extent, Australian dollars and Japanese yen. In general, it is our practice and intention to re-invest the earnings of our non-U.S. subsidiaries in those operations. We have not, nor do we anticipate the need to, repatriate funds to the United States to satisfy domestic liquidity needs arising in the ordinary course of business.

In May 2018, the Board of Directors authorized us to repurchase up to \$300.0 million of our common stock under our share repurchase program. During the three and six months ended June 30, 2019, we repurchased 4,228,148 and 8,636,143 shares for an aggregate purchase price of \$15.1 million and \$30.1 million (including fees and commissions) under our repurchase program. As of June 30, 2019, up to \$260.0 million of common stock remained available for purchase under our program. The timing and amount of share repurchases, if any, will be determined based on market conditions, limitations under our 2019 Credit Agreement, share price and other factors, and the share repurchase program may be terminated at any time. Repurchases will be made in compliance with SEC rules and other legal requirements and may be made, in part, under a Rule 10b5-1 plan, which permits share repurchases when we might otherwise be precluded from doing so.

Our cash balances and cash flows generated from our operations may be used to fund strategic investments, business acquisitions, working capital needs, investments in technology, marketing and share repurchases.

Additionally, we have the ability to borrow funds under our 2019 Credit Agreement. We could also seek to raise additional financing, if available on terms that we believe are favorable, to increase the amount of liquid funds that we can access for acquisitions, share repurchases or other strategic investment opportunities. Although we can provide no assurances, we believe that our cash balances and cash generated from operations should be sufficient to meet our working capital requirements and capital expenditures for at least the next twelve months.

Contractual Obligations and Commitments

Our contractual obligations and commitments as of June 30, 2019 did not materially change from the amounts set forth in our 2018 Annual Report on Form 10-K, except as disclosed in Item 1, Note 6 , *Leases* .

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangements as of June 30, 2019 .

Critical Accounting Policies and Estimates

The preparation of condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts and classifications of assets and liabilities, revenue and expenses, and related disclosure of contingent liabilities. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Management's Discussion and Analysis of Financial Condition and Results of Operations is based upon our condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP. Our significant accounting policies are discussed in Item 2, Note 2 , *Summary of Significant Accounting Policies* , and in the notes to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2018 . In addition, refer to the critical accounting policies and estimates under Part II, Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2018 .

The changes to our lease recognition policies upon the adoption of Topic 842 on January 1, 2019 represent a material change to our critical accounting policies and estimates during the six months ended June 30, 2019 . See Item 1, Note 6 , *Leases* , for additional information related to our new lease recognition policies.

Recently Issued Accounting Standards

In June 2016, the FASB issued ASU 2016-13, *Financial Instruments - Credit Losses (Topic 326) - Measurement of Credit Losses of Financial Instruments* . This ASU requires entities to measure credit losses for financial assets measured at amortized cost based on expected losses rather than incurred losses. For available-for-sale debt securities with unrealized losses, entities will be required to recognize credit losses through an allowance for credit losses. The ASU will be effective for annual reporting periods beginning after December 15, 2019 and interim periods within those annual periods. While we are still assessing the impact of ASU 2016-13, we currently believe that the adoption of this guidance will not have a material impact on our condensed consolidated financial statements.

In January 2017, the FASB issued ASU 2017-04, *Intangibles - Goodwill and Other (Topic 350) - Simplifying the Test for Goodwill Impairment* . This ASU eliminates Step 2 of the goodwill impairment test and requires a goodwill impairment to be measured as the amount by which a reporting unit's carrying amount exceeds its fair value, not to exceed the carrying amount of its goodwill. The ASU is effective for annual or any interim goodwill impairment tests

in fiscal years beginning after December 15, 2019. We believe that the adoption of this guidance will not have a material impact on our condensed consolidated financial statements.

In August 2018, the FASB issued ASU 2018-13, *Fair Value Measurement (Topic 820) - Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement*. This ASU modifies the disclosure requirements in Topic 820, *Fair Value Measurement*, by removing, modifying, or adding certain disclosures. The ASU will be effective for annual reporting periods beginning after December 15, 2019 and interim periods within those annual periods. Early adoption is permitted, and entities are permitted to early adopt any removed or modified disclosures and delay adoption of the additional disclosures until the effective date. We are still assessing the impact of ASU 2018-13 on our condensed consolidated financial statements.

There are no other accounting standards that have been issued but not yet adopted that are expected to have a material impact on our condensed consolidated financial position or results of operations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have operations both within the United States and internationally, and we are exposed to market risks in the ordinary course of our business, including the effect of foreign currency fluctuations, interest rate changes and inflation. Information relating to quantitative and qualitative disclosures about those market risks is set forth below.

Foreign Currency Exchange Risk

We transact business in various foreign currencies other than the U.S. dollar, principally the euro, British pound sterling, Canadian dollar and Australian dollar, which exposes us to foreign currency risk. For the three and six months ended June 30, 2019, we derived approximately 39.0% and 38.6% of our revenue from our International segment. Revenue and related expenses generated from our international operations are generally denominated in the local currencies of the corresponding countries. The functional currencies of our subsidiaries that either operate or support those markets are generally the same as the corresponding local currencies. However, the results of operations of, and certain of our intercompany balances associated with, our international operations are exposed to foreign currency exchange rate fluctuations. Upon consolidation, as exchange rates vary, our revenue and other operating results may differ materially from expectations, and we may record significant gains or losses on the re-measurement of intercompany balances.

We assess our foreign currency exchange risk based on hypothetical changes in rates utilizing a sensitivity analysis that measures the potential impact on working capital based on a 10% change (increase and decrease) in currency rates. We use a current market pricing model to assess the changes in the value of the U.S. dollar on foreign currency denominated monetary assets and liabilities. The primary assumption used in this model is a hypothetical 10% weakening or strengthening of the U.S. dollar against those currency exposures as of June 30, 2019 and December 31, 2018.

As of June 30, 2019, our net working capital surplus (defined as current assets less current liabilities) from subsidiaries that are subject to foreign currency translation risk was \$12.7 million. The potential increase in this working capital surplus from a hypothetical 10% adverse change in quoted foreign currency exchange rates would be \$1.3 million. This compares with a \$20.8 million working capital surplus subject to foreign currency exposure as of December 31, 2018, for which a 10% adverse change would have resulted in a potential increase in this working capital surplus of \$2.1 million.

Interest Rate Risk

Our cash balance as of June 30, 2019 consists of bank deposits, so exposure to market risk for changes in interest rates is limited. In April 2016, we issued convertible notes with an aggregate principal amount of \$250.0 million (see Item 1, Note 5, *Financing Arrangements*). The convertible notes bear interest at a fixed rate, so we have no financial statement impact from changes in interest rates. However, changes in market interest rates impact the fair value of the convertible notes along with other variables such as our credit spreads and the market price and volatility of our common stock. In May 2019, we entered into the 2019 Credit Agreement which provides for aggregate principal borrowings of up to \$400.0 million. As of June 30, 2019, we had no borrowings outstanding under the 2019 Credit Agreement. Because the 2019 Credit Agreement bears interest at a variable rate, we are exposed to market risk relating to changes in interest rates if we borrow under the 2019 Credit Agreement. We also have \$174.0 million of lease obligations. Interest rates on existing leases typically do not change unless there is a modification to a lease agreement and as such, we do not believe that the interest rate risk on the lease obligations is significant.

Impact of Inflation

We believe that our results of operations are not materially impacted by moderate changes in the inflation rate. Inflation and changing prices did not have a material effect on our business, financial condition or results of operations for the three and six months ended June 30, 2019.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), as of the end of the period covered by this Quarterly Report on Form 10-Q.

Based on this evaluation, our management concluded that, as of June 30, 2019, our disclosure controls and procedures are effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on Effectiveness of Controls and Procedures

In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a description of our material pending legal proceedings, please see Item 1, Note 7, *Commitments and Contingencies*, to our condensed consolidated financial statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

ITEM 1A. RISK FACTORS

There have been no material changes from the risk factors previously disclosed in Part I, Item 1A, *Risk Factors* of our Annual Report on Form 10-K for the year ended December 31, 2018, and Quarterly Report on Form 10-Q for the quarter ended March 31, 2019.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Recent Sales of Unregistered Securities

During the three months ended June 30, 2019, we did not issue any unregistered equity securities.

Issuer Purchases of Equity Securities

On May 7, 2018, the Board authorized us to repurchase up to \$300.0 million of our common stock under our share repurchase program. During the three and six months ended June 30, 2019, we repurchased 4,228,148 and 8,636,143 shares for an aggregate purchase price of \$15.1 million and \$30.1 million (including fees and commissions) under our repurchase program. As of June 30, 2019, up to \$260.0 million of common stock remained available for purchase under our program. The timing and amount of share repurchases, if any, will be determined based on market conditions, limitations under the 2019 Credit Agreement, share price and other factors, and the share purchase program may be terminated at any time. We will fund the repurchases, if any, through cash on hand, future cash flows and borrowings under our credit facility. Repurchases will be made in compliance with SEC rules and other legal requirements and may be made in part under a Rule 10b5-1 plan, which permits stock repurchases when we might otherwise be precluded from doing so.

A summary of our common stock repurchases during the three months ended June 30, 2019 under our share repurchase program is set forth in the following table:

Date	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under Program
April 1-30, 2019	—	\$ —	—	\$ 275,000,002
May 1-31, 2019	1,221,792	3.54	1,221,792	270,685,687
June 1-30, 2019	3,006,356	3.57	3,006,356	260,000,005
Total	4,228,148	\$ 3.56	4,228,148	\$ 260,000,005

The following table provides information about purchases of shares of our common stock during the three months ended June 30, 2019 related to shares withheld upon vesting of restricted stock units for minimum tax withholding obligations:

Date	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under Program
April 1-30, 2019	271,025	\$ 3.51	—	—
May 1-31, 2019	208,786	3.52	—	—
June 1-30, 2019	1,044,591	3.54	—	—
Total	1,524,402	\$ 3.53	—	—

- (1) Total number of shares delivered to us by employees to satisfy the mandatory tax withholding requirement upon vesting of stock-based compensation awards.

ITEM 5. OTHER INFORMATION

On July 29, 2019, Joey Levin resigned as a director of the Company. The departure of Mr. Levin was not the result of any disagreement with the Company, and we thank him for his dedicated service to Groupon.

Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
