### McDermott and Chiyoda Introduce Feed Gas to Train 1 at Cameron LNG

- Achievement builds on McDermott's experience in the LNG industry
- Feed gas marks transition from construction to startup

HOUSTON, April 15, 2019 /PRNewswire/ -- McDermott International, Inc. (NYSE: MDR) and its joint venture partner, Chiyoda International Corporation, a U.S.-based wholly-owned subsidiary of Chiyoda Corporation, Japan, today announced that Train 1 of the Cameron LNG project in Hackberry, La., has reached the final commissioning stage. This includes the introduction of pipeline feed gas into Train 1 of the liquefaction export facility, the precursor for the production of liquefied natural gas (LNG).

"We are extremely proud of the Cameron LNG project team for this achievement and their remarkable safety performance," said Mark Coscio, McDermott's Senior Vice President for North, Central and South America. "Their accomplishment is more than just a project milestone; it is an impressive feat of engineering and construction. Once Train 1 is fully operational, it will have the capacity to produce 4 million tonnes of LNG per year."

Since the initial award in 2014, McDermott and Chiyoda have provided the engineering, procurement and construction for the Cameron LNG project. The project includes three liquefaction trains with a projected export of 12 million tonnes per annum of LNG, or approximately 1.7 billion cubic feet per day.

Cameron LNG is jointly owned by affiliates of Sempra LNG LLC, Total, Mitsui & Co. Ltd. and Japan LNG Investment, LLC, a company jointly owned by Mitsubishi Corporation and Nippon Yusen Kabushiki Kaisha (NYK).

#### About McDermott

McDermott is a premier, fully integrated provider of technology, engineering and construction solutions to the energy industry. For more than a century, customers have trusted McDermott to design and build end-to-end infrastructure and technology solutions to transport and transform oil and gas into the products the world needs today. Our proprietary technologies, integrated expertise and comprehensive solutions deliver certainty, innovation and added value to energy projects around the world. Customers rely on McDermott to deliver certainty to the most complex projects, from concept to commissioning. It is called the "One McDermott Way." Operating in over 54 countries, McDermott's locally focused and globally-integrated resources include approximately 32,000 employees, a diversified fleet of specialty marine construction vessels and fabrication facilities around the world.
