

Night Work Approval Process

- Contractors conducting night work activities on SBA Towers will provide notice to SBA via the Notice to Proceed Portal (NTP). Tasks that involve rigging to tower or hoisting materials at night will require a rigging plan for all class I, II, III, IV lifts and be in compliance with the latest revision of ANSI A10.48. This approval process will be included in the NTP application.
- When performing night work tasks, contractors should address the items below in a tailgate/Job Safety Analysis:
 - Ensure the proper amount of illumination is in place for tower and ground operations. OSHA1926.56a
 - Ensure the crew has adequate means of communication to 911, their supervisor and inter-crew operations.
 - Ensure the rescue equipment is secured at the highest work location.
 - Ensure that a minimum of 3 employees are on site with 1 being on the ground at all times.
