The tables above provide comparisons of quarterly and annual results relative to prior periods, including sequential quarterly and year-over-year changes. A reconciliation between GAAP and non-GAAP measures is contained in this release under the section titled "Use of Non-GAAP Financial Measures." GAAP results for fiscal year 2019 include the impact of the Oclaro acquisition starting from December 10, 2018, as well as related restructuring, write-downs, amortization of intangibles and other charges.

On July 1, 2018, we adopted Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers (Topic 606) using the modified retrospective method applied to all contracts that are not completed contracts at the date of initial adoption (i.e., July 1, 2018). Results for reporting periods after July 1, 2018 are presented under Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with our historic accounting under Topic 605. The adoption of Topic 606 did not have a material impact on the nature and timing of our revenues, consolidated statements of operations, cash flows, and balance sheet and therefore, we do not present results for the three months and full year ended June 29, 2019 under Topic 605.

## Business Outlook

Lumentum expects the following for the fiscal first quarter 2020:

- Net revenue in the range of \$435 million to \$455 million

- Non-GAAP operating margin of 22.5% to 24.5%
- Non-GAAP diluted earnings per share of \$1.12 to \$1.26

We have not provided reconciliations from GAAP to non-GAAP measures for our outlook. A large portion of non-GAAP adjustments, such as stock-based compensation, inventory write down due to plans to exit certain product lines, acquisition related costs, integration related costs, amortization of acquired intangibles, amortization of fair value adjustments, restructuring charges, impairment charges, derivative liability adjustments, transferring product lines to Thailand, non-cash income tax expense and credits, and other costs and contingencies unrelated to current and future operations are by their nature highly volatile and we have low visibility as to the range that may be incurred in the future.

## Forward-Looking Statements

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements include strategies and our expectations with regard to such strategies, our expectations for our markets, any anticipation or guidance as to demand for our products, future financial performance, including the general trends in our business and the industries in which we operate, and our guidance with respect to future net revenue, earnings per share, and operating margins, and anticipated trends in our markets. These forward-looking statements involve risks and

uncertainties that could cause actual results to differ materially from those projected. Among the factors that could cause actual results to differ from those contemplated are: (a) quarter-over-quarter product mix fluctuations which can materially impact profitability measures due to the broad gross margin ranges across our portfolio; (b) continued decline of average selling prices across our businesses; (c) effects of seasonality; (d) the ability of our suppliers and contract manufacturers to meet production and delivery requirements for our forecasted demand; (e) inherent uncertainty related to global markets, including changes in the political or economic environment and the imposition of tariffs or other duties, and the effect of such markets on demand for our products; (f) changes in customer demand; (g) our ability to attract and retain new customers, particularly in the 3D sensing market; (h) the risk that synergies and non-GAAP earnings accretion related to the acquisition of Oclaro will not be realized or realized to the extent anticipated or that we will incur significant costs and charges to achieve such synergies; (i) the risk that Lumentum's financing or operating strategies will not be successful; and (j) disruption related to the integration of Oclaro making it more difficult to maintain customer, supplier, key personnel and other strategic relationships. For more information on these and other risks, please refer to the "Risk Factors" section included in the Company's Quarterly Report on Form 10-Q for the fiscal quarter ended March 30, 2019 filed with the Securities and Exchange Commission, and in the Company's other filings with the Securities and Exchange Commission, including the Company's Annual Report on Form 10-K for the fiscal year ended June 29, 2019, which will be filed within sixty days of our fiscal year end. The forward-looking statements and preliminary financial results contained in this press release are made as of the date hereof and the Company assumes no obligation to update such statements, except as required by applicable law.

## Use of Non-GAAP Financial Measures

In this press release, Lumentum provides investors with gross margin, gross profit, operating margin (loss), operating income (loss), income (loss) before income taxes and certain expenses, net income (loss), and net income (loss) per share on a non-GAAP basis. Lumentum believes this non-GAAP financial information provides additional insight into the Company's on-going cash generation and has therefore chosen to provide this information to investors for a more consistent basis of comparison and to help them evaluate the results of the Company's on-going operations and enable more meaningful period to period comparisons. Specifically, the Company believes that providing this information allows investors to better understand the Company's cash flows and, importantly, to evaluate the efficacy of the methodology and information used by management to evaluate and measure such cash flows. However, these measures may be different from non-GAAP measures used by other companies, limiting their usefulness for comparison purposes. The non-GAAP financial measures used in this press release should not be considered in isolation from measures of financial performance prepared in accordance with GAAP. Investors are cautioned that there are material limitations associated with the use of non-GAAP financial measures as an analytical tool. In particular, many of the adjustments to our GAAP financial measures reflect the exclusion of items that are recurring and will be reflected in our financial results for the foreseeable future. Further, these non-GAAP financial measures may not be comparable to similarly titled measurements reported by other companies.

Non-GAAP gross margin, non-GAAP gross profit, non-GAAP expenses, non-GAAP operating margin, non-GAAP operating income, non-GAAP income before income taxes, non-GAAP net income, and non-GAAP net income per share exclude (i) stock-based compensation, (ii) inventory write-downs due to cancelled programs, plans to exit certain lines of business and other costs and contingencies unrelated to current and future operations, (iii) acquisition related costs, (iv) integration related costs, (v) amortization of acquired intangibles, (vi) amortization of fair value adjustments, (vii) restructuring and related charges, (viii) impairment charges, (ix) non-cash interest expense, (x) unrealized gain (loss) on derivative liability, (xi) transferring product lines to Thailand, and (xii) non-cash income tax provision impacts, for example, a release of a U.S. valuation allowance, and the write down of deferred tax assets due to the 2017 Tax Cuts and Jobs Act. The presentation of these and other similar items in Lumentum's non-GAAP financial results should not be interpreted as implying that these items are non-recurring, infrequent or

unusual.

A quantitative reconciliation between GAAP and non-GAAP financial data with respect to historical periods is included in the supplemental financial table attached to this press release.

(1) Other charges for the three and twelve months ended June 29, 2019, primarily include costs of transferring product lines to Thailand of \$7.9 million and \$48.7 million, respectively. Other charges for the three and twelve months ended June 30, 2018 primarily relate to set-up costs of our Thailand facility, including costs of transferring product lines to Thailand of \$12.7 million and \$30.5 million, respectively.

(2) During the twelve months ended June 29, 2019, we recorded restructuring and related charges of \$31.9 million, primarily in connection with the decision to exit Lithium Niobate and Datacom module product lines as well as employee related benefits associated with Oclaro's executive severance and retention agreements.

(3) During the fiscal second quarter of 2019, we recorded one-time stock-based compensation of \$15.2 million attributable to severance and employee related benefits associated with Oclaro's executive severance and retention agreements.

(4) In connection with the acquisition of Oclaro, we recorded a fair value adjustment of \$60.3 million to inventory, resulting in \$38.8 million and \$54.6 million of amortization expense of the fair value adjustment during the three and twelve months ended June 29, 2019, respectively.

(5) During the twelve months ended June 29, 2019, interest and other (expense) income includes a one-time benefit of \$2.5 million related to a non-trade reimbursement, offset by a one-time charge of \$2.7 million, related to a ticking fee to Deutsche bank.

(6) During the twelve months ended June 29, 2019, we recorded an impairment charge of \$30.7 million in Property Plant and Equipment, related to the decision to exit the Datacom module product line.

(7) During the three and twelve months ended June 29, 2019, we recorded an inventory write down charge of \$1.4 million and \$20.8 million, respectively, related to the decision to exit the Datacom module and Lithium Niobate product lines.

(8) This adjustment represents weighted-average potentially dilutive securities from our stock-based benefit plans excluded from the computation of diluted net loss per share attributable to common stockholders on a GAAP basis because the effect would have been anti-dilutive. This adjustment amount is added for the computation of diluted net income per share on a non-GAAP basis as we had a net income on a non-GAAP basis.

(9) During the twelve months ended June 30, 2018, 1.5 million shares related to the potential conversion of the Series A Preferred Stock were added to the calculation of diluted shares available on a non-GAAP basis because their inclusion results in more dilutive earnings per share.
