TASER Wireless eXtended Range Electronic Projectile (XREP) Successfully Deployed to Save Woman's Life

SCOTTSDALE, Ariz., Nov 6, 2009 (GlobeNewswire via COMTEX) -- TASER International, Inc. (Nasdaq:TASR), a market leader in digital evidence solutions and electronic control devices (ECDs), announced that on November 4 the Waukesha Police Department in Wisconsin successfully deployed the TASER® eXtended Range Electronic Projectile (XREP™) from a TASER® X12™ Less Lethal Shotgun (LLS) to subdue a suicidal woman.

According to Waukesha Police, officers responded to a report of a suicidal woman with a knife. She was not only threatening her own life, but the life of another. Upon arrival officers received information that the subject of the call was a 47-year-old woman with a history of mental illness.

Officers located the woman in a highly agitated state. In order to safely take her into protective custody officers deployed the XREP. The deployment was successful and no higher forms of force were needed. Neither the woman nor any officers were injured.

"This is a momentous event for our law enforcement partners as this is the first life protected without injury outside of our pilot programs through the combined use of our production advanced wireless TASER XREP and our TASER X12 Less Lethal Shotgun," said Tom Smith, Chairman and founder of TASER International. "We are pleased with the performance of these two life-saving systems integrating successfully. We applaud the Waukesha Police Department's successful intervention to protect life with TASER technology."

About TASER XREP and TASER X12

The XREP is a wireless self-contained electronic ECD deployed from a 12-gauge pump-action. It delivers a similar Neuro Muscular Incapacitation (NMI) bio-effect as our handheld TASER® X26™ ECD with a maximum effective range approaching 100 feet (30.48 meters).

The battery supply is fully integrated into the chassis and provides the power to drive the XREP projectile engine and thereby "wireless" compared to traditional hand held TASER ECDs.

While the XREP can be deployed from any 12-gauge pump-action shotgun, Mossberg and TASER International joined forces to produce the TASER® X12™ LLS, utilizing a re-engineered Mossberg 500 pump-action shotgun to optimize the TASER XREP. The TASER X12 includes Radial Key™ Ammunition technology to prevent the system from deploying lethal 12-gauge rounds in order to remove the possibility of end users accidentally firing a lethal round in a less-lethal system during high stress situations.

No other system on the market today prevents the operator from inadvertently deploying a lethal round. In addition, it incorporates a uniquely designed twist, rifled barrel that optimizes the performance of the XREP, ensuring that an optimum spin rate is imparted upon the projectile as it exits the barrel to ensure the greatest distance, stabilization, and accuracy possible.

About TASER International, Inc.

TASER International's products Protect Life and Protect Truth. TASER provides advanced Electronic Control Devices (ECDs) and innovative secured digital evidence collection and management solutions for use in the law enforcement, medical, military, corrections, professional security, and personal safety markets. TASER ECDs use proprietary technology to incapacitate dangerous, combative, or high-risk subjects who pose a risk to law enforcement officers, innocent citizens, or themselves in a manner that is generally recognized as a safer alternative to other uses of force. The TASER® AXON™, a revolutionary on-officer tactical computer and video/audio recorder, combines with an integrated digital multi-media evidence storage and management platform -- EVIDENCE.COM -- to provide an end-to-end solution to capture, store securely, and analyze digital

evidence and information in ways that enables tactical and strategic decision making by law enforcement, as well as for legal evidentiary use. For more information please call TASER International at (800) 978-2737 or visit our website at www.TASER.com.
