

ARGONAUT GOLD

Diversified Intermediate Producer & Developer
In North America

Corporate Presentation

July 29, 2020

TSX:AR

FORWARD LOOKING INFORMATION

This presentation contains certain “forward-looking statements” and “forward-looking information” under applicable Canadian securities laws concerning the proposed transaction and the business, operations and financial performance and condition of Argonaut Gold Inc. (“Argonaut” or “Argonaut Gold”) Forward-looking statements and forward-looking information include, but are not limited to, statements with respect to estimated production and mine life of the various mineral projects of Argonaut; expectations with respect to future cash flows from operations, net debt and financial results; the successful completion of proposed acquisitions; metal or mineral recoveries; synergies and financial impact of completed acquisitions; the benefits of the development potential of the properties of Argonaut; the future price of gold, copper, and silver; the estimation of mineral reserves and resources; the realization of mineral reserve estimates; the timing and amount of estimated future production; costs of production; success of exploration activities; market volatility and disruptions in many aspects of Argonaut’s business due to a pandemic virus outbreak, such as COVID-19, resulting from government policies restricting mobility assembly, or contact to, employees and suppliers across the global supply chain; and currency exchange rate fluctuations. Except for statements of historical fact relating to Argonaut, certain information contained herein constitutes forward-looking statements. Forward-looking statements are frequently characterized by words such as “plan,” “expect,” “project,” “intend,” “believe,” “anticipate”, “estimate” and other similar words, or statements that certain events or conditions “may” or “will” occur. Forward-looking statements are based on the opinions and estimates of the management of Argonaut at the date the statements are made, and are based on a number of assumptions and subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements. Many of these assumptions are based on factors and events that are not within the control of Argonaut and there is no assurance they will prove to be correct.

Factors that could cause actual results to vary materially from results anticipated by such forward-looking statements include risks of the mining industry, the spread of COVID-19 and the impact of government policies to ameliorate COVID-19, failure of plant, equipment or processes to operate as anticipated, changes in market conditions, variations in ore grade or recovery rates, risks relating to international operations, fluctuating metal prices and currency exchange rates, changes in project parameters, the possibility of project cost overruns or unanticipated costs and expenses and labour disputes.

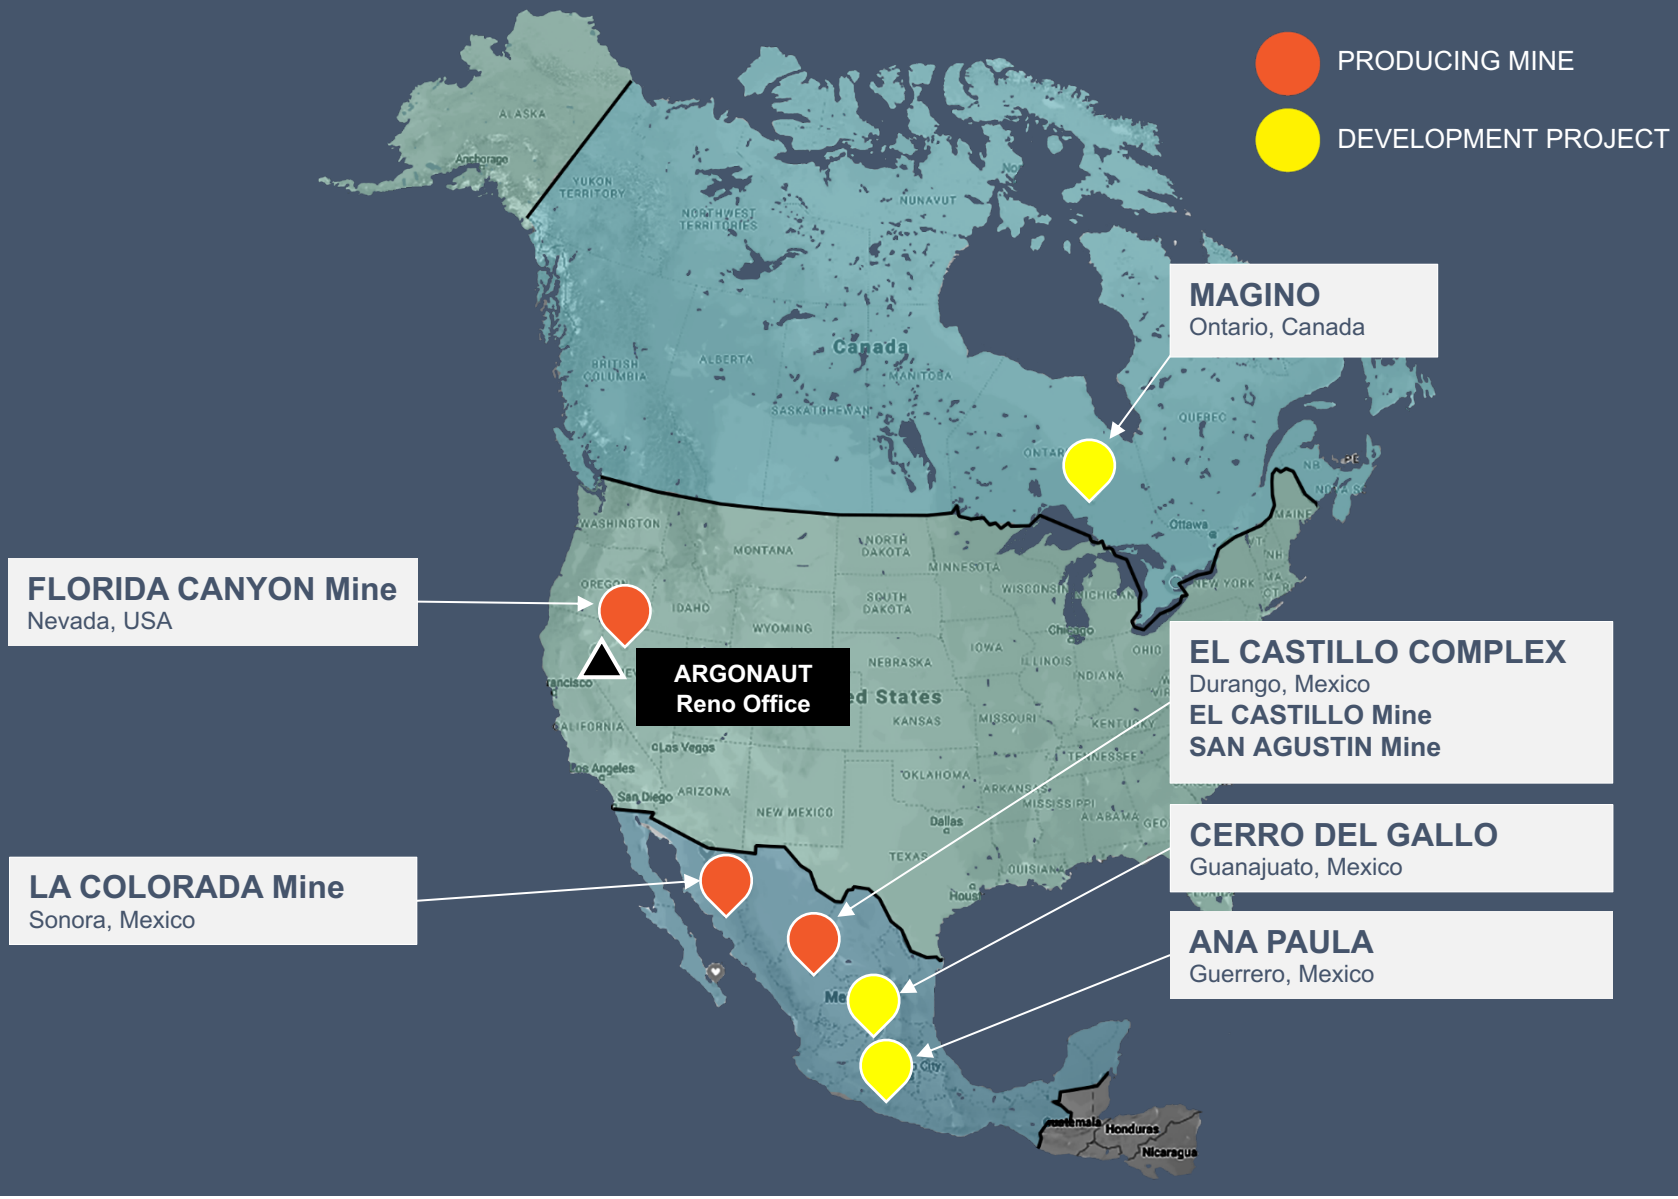

These factors are discussed in greater detail in Argonaut’s (i) most recent Annual Information Forms, and (ii) most recent Management Discussion and Analysis, which are each filed on Argonaut’s respective SEDAR profiles and provide additional general assumptions in connection with these statements. Argonaut cautions that the foregoing list of important factors is not exhaustive. Investors and others who base themselves on forward-looking statements should carefully consider the above factors as well as the uncertainties they represent and the risk they entail. Argonaut believes that the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in this presentation should not be unduly relied upon. These statements speak only as of the date of this presentation.

Although Argonaut has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements.

Argonaut does not undertake any obligation to update forward-looking statements if circumstances or management’s estimates or opinions should change except as required by applicable securities laws. The reader is cautioned not to place undue reliance on forward-looking statements. Statements concerning mineral reserve and resource estimates may also be deemed to constitute forward-looking statements to the extent they involve estimates of the mineralization that will be encountered if the property is developed. Comparative market information is as of a date prior to the date of this document.

References to dollars or “$” are to U.S. dollars unless specified otherwise.

North American Focused Intermediate Producer

Argonaut's Vision & Strategy

Transitioning our production and cost profile while minimizing equity dilution:

- **Generating cash flow to finance growth**
- **Favourable gold price environment**
- **De-risking our development project pipeline**

Executing Our Strategy – Our 3-Phase Approach

HARVEST

- **HARVEST** cash from existing operations
- Significant free cash flow as capital comes down and production rises

REPLACE

- **REPLACE** short mine life operations
- Florida Canyon provides immediate growth and then replaces El Castillo

GROWTH

- **GROWTH** through the development project pipeline
- All development stage assets provide much longer mine life and significantly lower operating costs

Phase 1 – HARVEST CASH

Not sexy assets, but they make MONEY!

El Castillo Complex

El Castillo

M&I 36.4 Mt at 0.35 g/t Au for 409k Contained Au oz.[1]

P&P 19.5 Mt at 0.38 g/t Au for 241K Contained Au oz.[1]

Mine life: 2022
Potential to extend life: Low

San Agustin

M&I 72.1 Mt at 0.27 g/t Au for 638k Contained Au oz.[1]

P&P 44.3 Mt @ 0.29 g/t Au for 418K Contained Au oz.[1]

Mine life: 2025+
Potential to extend life: Medium

La Colorada

M&I 30.9 Mt at 0.65 g/t Au for 555k Contained Au oz.[1]

P&P 19.8 Mt at 0.59 g/t Au for 375K Contained Au oz.[1]

Mine life: 2024+
Potential to extend life: Medium

Florida Canyon

Indicated 137.0 Mt at 0.38 g/t Au for 1.67M Contained Au oz.[1]

Probable 74.5 Mt at 0.43 g/t Au for 1.02M Contained Au oz.[1]

Mine life: 2030+
Potential to extend life: High

2020 FCF[2] Sensitivity to Gold Price ($M)

$1,500	$1,600	$1,700	$1,800	$1,900
40 - 62	51 - 75	62 - 87	70 - 97	78 - 108

[1] Please refer to Mineral Resource disclosure on slide 25 for full details.
[2] Please refer to section on slide 26 entitled “Non-IFRS Measures” for a discussion of these Non-IFRS Measures.

Phase 2 - REPLACE

Florida Canyon - The 4 Keys to Success

1. Personnel

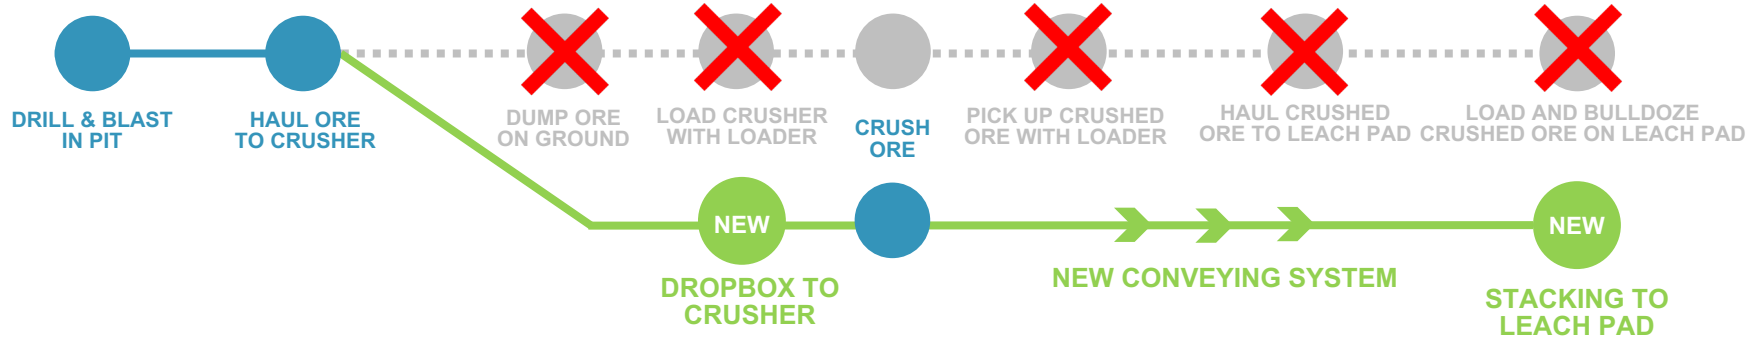

2. New Mobile Fleet

- Replaced old fleet at the end of 2019.
- Reduced mining cost per ton from >$2.00 in 2019 to $1.41 in Q1 2020

3. Leach Pad Expansion

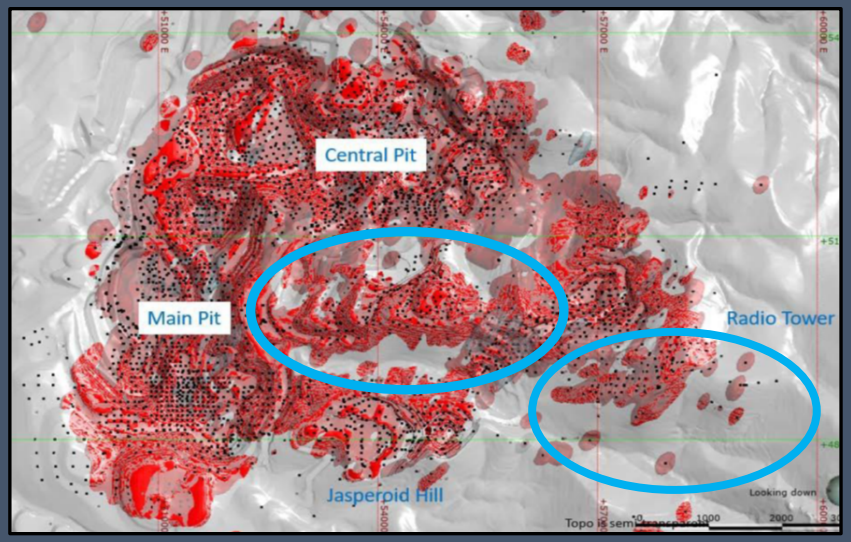

- Expansion of leach pad to allow for more efficient recoveries
- Leaching on new pad started April 24, 2020

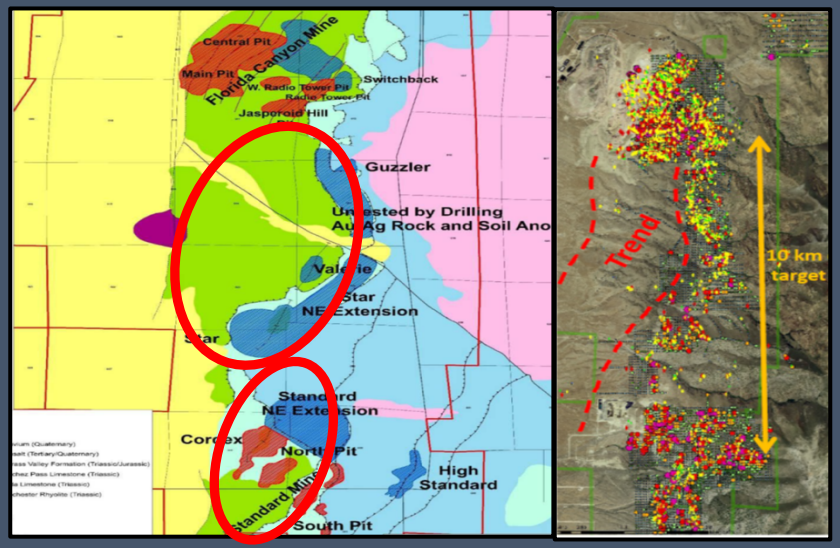

4. Modifications to Crushing / Stacking Circuit

- <$10M investment will pay back in one year
- Timing to complete: End of 2020
- Eliminate multiple re-handling with investment in dump box and conveying/stacking system

Florida Canyon Possibilities

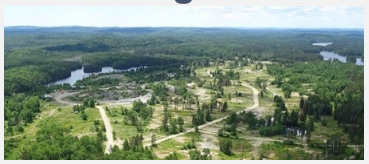

Exploration Upside

- Production to date:
  - Florida Canyon – ~2M ounces
  - Standard Mine – ~600k ounces
- Connection in pit = low hanging fruit
  - Investment in additional drilling
- Transitional and sulphide ores potential
- Land package of over 11,800 hectares

Phase 3 - GROWTH

THE DEVELOPMENT PIPELINE

Mineral Resource Notes and Disclosures

Mineral Reserves and Mineral Resources have been estimated as at December 31, 2019 in accordance with NI 43-101 as required by Canadian securities regulatory authorities. Mineral Resources are presented inclusive of Mineral Reserves. Numbers may not sum due to rounding.

The Mineral Reserves for El Castillo and San Agustin, which together form the El Castillo Complex, are based on updated models, mine plans and topography, including depletion through mining activities and changes to recovery and cost assumptions as of December 31, 2019. El Castillo used a gold price of $1,450 per ounce; San Agustin used a gold price of $1,350 per ounce and silver price of $16.75 per ounce. Cut-off grades for El Castillo range from 0.10 g/t Au to 0.71 g/t Au depending on ore type; cut-off grades at San Agustin range from 0.11 g/t gold equivalent ("AuEQ") to 0.25 g/t AuEQ depending on ore type.

The Mineral Reserves for La Colorada are based on updated models, mine plans and topography as well as updated recoveries and cost assumptions as of December 31, 2019. La Colorada used a gold price of $1,350 per ounce and a silver price of $16.75 per ounce. Cut-off grade for La Colorada was 0.13 g/t AuEQ.

The Mineral Reserves for Cerro del Gallo were taken from the Cerro del Gallo Technical Report. The Mineral Reserves were estimated at a gold price of $1,200 per ounce and a silver price of $14.50 per ounce. The Mineral Reserves used a gold cutoff grade of between 0.30 g/t AuEQ and 0.39 g/t AuEQ depending on ore type.

The Mineral Reserves for Magino were taken from the Magino Technical Report. The Mineral Reserves were estimated at a gold price of $1,200 per ounce. The Mineral Reserves used a gold cutoff grade of 0.41 g/t.

The M&I Mineral Resources and Inferred Mineral Resources for El Castillo and San Agustin, which together form the El Castillo Complex, were based on pit cones using $1,600 per ounce gold and $19.75 per ounce silver. Cut-off grades range from 0.08 g/t Au to 0.62 g/t Au for El Castillo and 0.11 to 0.25 g/t AuEQ for San Agustin, depending on ore type.

The M&I Mineral Resources and Inferred Mineral Resources for La Colorada were based on pit cones using $1,600 per ounce gold and $19.75 per ounce silver. Cut-off grade was 0.10 g/t AuEQ.

The M&I Mineral Resources and Inferred Mineral Resources for the Cerro del Gallo Project were taken from the Cerro del Gallo Technical Report. The Mineral Resources were estimated at a gold price of $1,600 per ounce and a silver price of $20.00 per ounce. Cut-off grades range from 0.25 g/t AuEQ to 0.30 g/t AuEQ depending on ore type.

The M&I Mineral Resources and Inferred Mineral Resources for the San Antonio Project were taken from the San Antonio Technical Report. The Mineral Resources were estimated at a gold price of $1,500 per ounce using a cutoff grade of 0.11 g/t Au for oxide and transition and 0.15 g/t Au for sulphide.

The M&I Mineral Resources and Inferred Mineral Resources for the Magino Project were taken from the Magino Technical Report. The Mineral Resources were estimated at a gold price of $1,300 per ounce. The Mineral Resources used a gold cutoff of 0.25 g/t.

The Mineral Reserves and Mineral Resources for Florida Canyon were taken from the technical report entitled " Technical Report Mineral Resource and Mineral Reserve Florida Canyon Gold Mine Pershing County Nevada" effective date of June 1, 2020.

The Mineral Reserves and Mineral Resources for the Ana Paula Project were taken from the technical report entitled "Ana Paula Project NI 43-101 Preliminary Feasibility Study, Guerrero, Mexico" dated May 16, 2017.

Notes and Disclosures

Argonaut Gold is a Canadian gold company engaged in exploration, mine development and production. Its primary assets are the El Castillo mine and San Agustin mine, which together form the El Castillo Complex in Durango, Mexico and the La Colorada mine in Sonora, Mexico. Advanced exploration projects include the San Antonio project in Baja California Sur, Mexico, the Cerro del Gallo project in Guanajuato, Mexico and the Magino project in Ontario, Canada. The Company also has several exploration stage projects, all of which are located in North America.

QUALIFIED PERSON

Technical information included in this presentation was supervised and approved by Brian Arkell, Argonaut Gold's Vice President of Exploration, and a Qualified Person under National Instrument 43-101 – *Standards of Disclosure for Mineral Projects*. ("NI 43-101").

NATIONAL INSTRUMENT 43-101

Brian Arkell, Argonaut Gold's Vice-President of Exploration and a Qualified Person under NI 43-101, has read and approved the scientific and technical information in this presentation as it relates to Argonaut. This presentation contains information regarding mineral resources that are not mineral reserves and do not have demonstrated economic viability.

CAUTIONARY NOTE TO U.S. INVESTORS CONCERNING ESTIMATES OF MEASURED, INDICATED AND INFERRED RESOURCES

This presentation uses the terms "Measured", "Indicated" and "Inferred" Resources as defined in accordance with NI 43-101. United States readers are advised that while such terms are recognized and required by Canadian securities laws, the United States Securities and Exchange Commission does not recognize them. Under United States standards, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve calculation is made. United States readers are cautioned not to assume that all or any part of the mineral deposits in these categories will ever be converted into reserves. In addition, "Inferred Resources" have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Resource will ever be upgraded to a higher category. United States readers are also cautioned not to assume that all or any part of an Inferred Resource exists, or is economically or legally mineable.

NON-IFRS MEASURES

The Company has included certain non-IFRS measures including "Cash cost per gold ounce sold", "Adjusted cash cost per gold ounce sold", "All-in sustaining cost per gold ounce sold", "Adjusted all-in sustaining cost per gold ounce sold" and "Free Cash Flow" in this presentation to supplement its financial statements which are presented in accordance with International Financial Reporting Standards ("IFRS"). Cash cost per gold ounce sold is equal to production costs plus the total impact of impairment write downs related to work-in-process inventory less silver sales divided by gold ounces sold. Adjusted cash cost per gold ounce sold is equal to production costs plus only the impact of non-cash impairment write downs related to the net realizable value of work-in-process inventory less silver sales divided by gold ounces sold. AISC per gold ounce sold is equal to production costs plus the total impact of impairment write downs related to work-in-process inventory less silver sales plus general and administrative, exploration, accretion and other expenses and sustaining capital expenditures divided by gold ounces sold. Adjusted AISC per gold ounce sold is equal to production costs plus only the impact of non-cash impairment write downs related to the net realizable value of work-in-process inventory less silver sales plus general and administrative, exploration, accretion and other expenses and sustaining capital expenditures divided by gold ounces sold. Free cash flow is equal to the change in the company's net cash (cash and cash equivalents less debt), excluding cash increases related to equity financing. The Company believes that these measures provide investors with an alternative view to evaluate the performance of the Company. Non-IFRS measures do not have any standardized meaning prescribed under IFRS. Therefore they may not be comparable to similar measures employed by other companies. The data is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Please see the management's discussion and analysis ("MD&A") for full disclosure on non-IFRS measures.

2020 Guidance

2020 FCF[1] Sensitivity to Gold Price

$1,500	$1,600	$1,700	$1,800	$1,900
40 - 62	51 - 75	62 - 87	70 - 97	78 - 108

2020 GEO[2] Production Guidance (in 000s)

Mine	Q1 Actual	Q2 Actual	H2 Estimate	Full Year 2020 Estimate
El Castillo	15	9	21 – 26	45 – 50
San Agustin	14	14	34 – 40	62 – 68
La Colorada	13	8	32 – 34	53 – 55
Florida Canyon*	11	13	26 – 33	50 – 57
Consolidated*	53	44	113 – 133	210 – 230

*Florida Canyon production during Q1 2020 and Q2 2020 was under Alio Gold Inc. prior to the closing of the merger between Alio Gold Inc. and Argonaut on July 1, 2020. 2020 GEO production guidance estimates the combined production for the two companies for the full year 2020.

2020 Cost and Capital Guidance

		El Castillo Complex	La Colorada	Florida Canyon	Magino, Cerro del Gallo, Ana Paula & Other	Consolidated
GEO Production	In 000s	107 – 118	53 – 55	50 – 57		210 – 230
Cash Costs[2]	$ per/oz Au	850 – 950	850 – 950	1,150 – 1,250		925 – 1,025
Capital	$M	12 – 13	10 – 11	25 – 30	17 – 18*	64 – 72
AISC[2]	$ per/oz Au					1,225 – 1,350

[1] Please refer to section on slide 24 entitled “Non-IFRS Measures” for a discussion of these Non-IFRS Measures.
[2] GEOs are based on a conversion ratio of 80:1 for silver to gold. The silver to gold conversion ratio is based on the three-year trailing average silver to gold ratio.
