

8x8, Inc. Reports Packet8 Virtual Office Subscriber Base Now Exceeds 7,000 Businesses

SANTA CLARA, Calif., April 3 /PRNewswire-FirstCall/ -- 8x8, Inc. (Nasdaq: [EGHT](#)), provider of Packet8 residential, business and video Voice over Internet Protocol (VoIP) phone services, today announced that as of the end of the March 2007 quarter, over 7,000 U.S. based small to medium sized businesses (SMB) were using the Packet8 Virtual Office VoIP hosted PBX phone service.

Offering a combination of unlimited local and long distance calling in the United States and Canada plus advanced PBX features for just \$49.99 per month/extension, the Packet8 Virtual Office solution has grown to become one of the most popular VoIP phone services in the SMB market today. Virtual Office enables small and medium sized enterprises to secure distributed corporate class telecommunications capabilities for a fraction of the cost of wireline business services from traditional phone companies. Unlike comparably priced single line VoIP phone services which offer features more suited to individual residential users, Packet8 Virtual Office provides companies with complete business phone system functionality along with the flexibility to operate each extension from any geographically dispersed location with high-speed Internet access.

"We are very pleased to report this continued growth in our Virtual Office subscriber base, in spite of the recent increase in our monthly service fees," said 8x8 Vice President of Sales and Marketing Huw Rees. "More and more businesses are experiencing firsthand how Packet8 Virtual Office offers their company unsurpassed features and functionality as well as incredible value. As our visibility in the SMB market increases with partners such as Office Depot, who has begun to merchandise Packet8 Virtual Office services with end cap displays in selected store locations, we are reaching more prospective companies and business owners who are looking to upgrade to VoIP services than ever before."

Virtual Office is an affordable, easy-to-use replacement for traditional PBX phone systems, allowing users anywhere in the world to be part of a hosted VoIP virtual phone service. The service includes an auto attendant, worldwide extension dialing, business class voicemail, a full featured conference bridge and ring groups, in addition to a rich variety of other business class PBX and dial tone features not normally found on premise-based PBX systems. Packet8 Virtual Office reduces an organization's total cost of ownership for telecommunications services because of its minimal initial investment combined with unlimited worldwide calling to other business extensions and Packet8 subscribers, unlimited local and long distance business calling in the United States and Canada and access to Packet8's low per-minute international calling rates to overseas wireline and mobile phone numbers.

About 8x8, Inc.

VoIP (voice over internet protocol) service provider 8x8, Inc. offers internet-based telephony solutions (<http://www.packet8.net>) for individual residential and business users as well as small to medium sized business organizations. In addition to regular Packet8 VoIP service plans priced as low as \$24.99 per month for unlimited anytime calling to the U.S. and Canada, 8x8 offers the Packet8 Tango Video Terminal Adapter and DV 326 VideoPhone along with accompanying monthly service plans also priced at \$24.99 per month. Packet8 Virtual Office, 8x8's VoIP phone system for small to medium sized businesses, is a hosted PBX solution comprised of powerful business class features. Companies subscribing to Virtual Office pay just \$49.99 per month per extension for enterprise class PBX functionality along with unlimited local and long distance calling in the U.S. and Canada. Packet8 Softalk™, 8x8's PC-based soft phone client, offers high quality voice and video in-network calling as well as outbound calling to the PSTN.
