## **8x8, Inc. Signs Agreement with Avtex to Acquire iTELConnect Business Subscriber Base**

SANTA CLARA, Calif., July 30 /PRNewswire-FirstCall/ -- 8x8, Inc. (Nasdaq: EGHT), provider of Packet8 (<http://www.packet8.net>) business, mobile and residential communication services, today announced it has signed an agreement with Minneapolis-based unified communications solution provider Avtex LLC calling for the migration of its iTELConnect subscriber base to the Packet8 business services platform.

Under terms of the agreement, 8x8 will immediately begin transitioning Avtex's hosted PBX and unified messaging subscribers, approximately 1,500 companies, to appropriate Packet 8 business solutions, including the Virtual Office hosted PBX phone service. To mitigate the transition process, 8x8 will provide these new subscribers with free equipment, free activation and a discount on the first month of service and will also arrange for the porting of the customer telephone number over to the Packet8 service.

"We are pleased to welcome iTELConnect subscribers to Packet8 and look forward to a seamless transition as we provision our services to these customers," said 8x8 Vice President of Sales and Marketing Huw Rees. "Our goal is to provide the same exceptional quality of service and support they had been receiving from Avtex and to deliver cost-effective, best in class business communications solutions that contribute to the growth and success of their organizations."

In addition to signing on iTELConnect customers, 8x8 will also be working with existing Avtex partners and resellers to provide them with the resources needed to support current customers as well as develop new business relationships.

"I am very impressed with the technology behind the Packet8 solution and the ease with which it can be deployed in any business setting," said Jay Groenke, managing partner at InTouch Services Group, an Avtex value added reseller that recently began selling Packet8 services. "With today's challenging economy, more and more businesses are looking to trim expenses without sacrificing quality and Packet8's innovative IP communications solutions deliver on both fronts."
