Emso Asset Management leverages SS&C's Treasury Management Platform to automate treasury functions

Using SS&C's Treasury Management Platform, Emso monitors the daily cash balances of 36 funds and accounts and ensures unencumbered cash is managed in real-time. The platform also enables Emso to forecast cash flows by the fund, custodian, currency or additional attributes based on future trading activity.

"SS&C's Treasury Management Platform simplifies and optimizes the operational side of cash management, so we can focus on alpha opportunities and maximizing returns for our clients," said Gareth Jamieson, Treasury Manager at Emso Asset Management. "Strong data analysis and ease of use within the tool allows Emso to monitor cash balances in real-time, allowing our portfolio managers to have more confidence in available liquidity."

"We are pleased to expand our relationship with Emso Asset Management and to help them enhance their treasury management," said Jon Anderson, Head of Middle Office Solutions at SS&C Technologies. "SS&C's latest technology reimagines the treasury process on a single, flexible and scalable platform empowering our clients with more efficient, timely and accurate information to manage their portfolios."
