CalAmp Announces New Solutions Based on Intel(R) Technology

9/8/2004

CalAmp Introduces New Software; Joins Intel Communications Alliance

SAN DIEGO, Sept. 8 /PRNewswire-FirstCall/ -- CalAmp Corp. (Nasdaq: CAMP - News) today announced a new range of technology solutions for the Intel® IXP425 network processor. As part of its efforts to promote the new offerings and other Intel based products, the company also announced it has joined the Intel® Communications Alliance (ICA) as an affiliate member.

The IXP425 is a single chip network processor for use in products that require network connectivity and high performance to run software applications. CalAmp is introducing software offerings that enable emerging wireless capabilities for mobile devices that utilize IXP425.

"The IXP425 offerings announced today and our membership in the ICA enhances our relationship with Intel to provide greater depth of technology and services for Intel's customers, as well as our own customers," said Tracy Trent, President of CalAmp's Solutions Division. "This participation will help us to further establish our capabilities and leadership in the most prevalent technologies shaping wireless development today."

CalAmp's software drivers support 802.11a/b/g multi-band wireless networking capabilities for the Intel IXP425 product line of networking processors. These drivers are licensed specifically for either Linux or Microsoft WinCE Operating Systems and were designed to help expand wireless device applications beyond PCs and laptops to wireless routers, access points, industrial controllers, set-top boxes and other devices.

"The Intel Communications Alliance provides companies such as CalAmp with a broad range of hardware, software and services to speed development and deployment of standards-based communications products," said Kevin

Johnson, Director, Intel Communications Alliance. "CalAmp's membership in the ICA will help us work together to deliver next generation wireless solutions to our customers."

The alliance membership is an extension of a relationship initiated in 2001 that established CalAmp's Solutions Division, formerly known as Vytek, as an authorized design center for the Personal Connectivity Alliance Developers Network within Intel. CalAmp also offers reference designs and services for the Intel PXA255 processor and the newly introduced PXA270 processor.

About CalAmp, Inc.

CalAmp is a leading provider of breakthrough wireless and content delivery solutions, services and products. With comprehensive capabilities ranging from product inception through production, CalAmp is a trusted partner delivering cost-effective high quality solutions to a broad array of customers and markets. CalAmp is one of the largest suppliers of direct broadcast satellite (DBS) outdoor customer premise equipment to the U.S. satellite television market and offers solutions for digital multimedia delivery, residential broadband data delivery, healthcare, retailing applications, public safety markets and wireless enterprise connectivity. The company is headquartered in Oxnard, California and has approximately 600 employees. Founded in 1981, CalAmp has been publicly traded since 1983 as NASDAQ: CAMP.

Forward-Looking Statements

Statements in this press release that are not historical in nature are forward-looking statements, which involve known and unknown risks and uncertainties. Words such as "may," "will," "expects," "intends," "plans," "believes," "seeks," "could," "estimate" and variations of these words and similar expressions are intended to identify forward-looking statements. Actual results could differ materially from those implied by such forward-looking statements due to a variety of factors, including general and industry economic conditions, competition, development factors, operating costs, the Company's ability to integrate the Vytek acquisition successfully and other risks and uncertainties that are detailed from time to time in the Company's filings with the Securities and Exchange Commission. Although the Company believes the expectations reflected in such forward-looking statements are based upon reasonable assumptions, it can give no assurance that its expectations will be attained. The Company undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
