CalAmp Introduces Vanguard 5530 4G LTE Cellular Router for Fixed and Mobile Applications

2/2/2015

Newest Addition to Vanguard Line Delivers Best-in-Class Speed, Low Latency and Persistent Connectivity for a Variety of Mission Critical Applications

OXNARD, CA -- (Marketwired) -- 02/02/15 -- CalAmp (NASDAQ: CAMP), a leading provider of wireless products, services and solutions, today announced the availability of the Vanguard™ 5530 multi-band cellular router. A rugged industrial-grade wireless communications platform, Vanguard features secure 4G LTE broadband connectivity with optional WiFi, high-precision GPS and a broad array of I/O ports, ideal for a wide variety of fixed and mobile applications.

With 4G LTE broadband and 3G fallback capability, the Vanguard 5530 delivers high speed, low latency and persistent connectivity to support the most demanding real-time applications with the highest degree of reliability. In addition, the Vanguard 5530 seamlessly integrates with DeviceOutlook™, CalAmp's cloud-based enterprise-grade remote management and control application, to streamline large-scale device deployments and significantly reduce the total cost of ownership for the complete product lifecycle. With its proven rugged design, Vanguard is ideal for countless industrial applications, providing reliable wireless connectivity even in the most challenging environmental conditions. For the utmost in versatility and extensibility, the Vanguard continues to support CalAmp's Open Developer Platform (ODP), a rich Linux-based embedded application development environment that partners and customers rely on to deliver custom features and valued-added applications to the market.

"The Vanguard 5530 combines the fastest available broadband connectivity with the broad set of router features customers have come to associate with the Vanguard product line," said Michael Zachan, Senior Vice President and General Manager of CalAmp's Wireless Networks business. "The combination of highly-reliable broadband performance, extensive flexibility, integration options and a proven rugged design make the Vanguard 5530 ideal

for a wide range of mission-critical applications, now and for years to come."

About CalAmp

CalAmp (NASDAQ: CAMP) is a proven leader in providing wireless communications solutions to a broad array of vertical market applications and customers. CalAmp's extensive portfolio of intelligent communications devices, robust and scalable cloud service platform, and targeted software applications streamline otherwise complex Machine-to-Machine (M2M) deployments. These solutions enable customers to optimize their operations by collecting, monitoring and efficiently reporting business critical data and desired intelligence from high-value remote assets.
