## CalAmp and General Dynamics Broadband Forge Alliance to Bring Wireless 4G LTE Products to Customers Worldwide

10/15/2013

CalAmp's Multi-Mode Fusion LTE 4G Broadband Router Platform for Public and Private Communications Networks to Be First Product Offered Under the Partnership Agreement  
OXNARD, CA -- (Marketwired) -- 10/15/13 -- CalAmp (NASDAQ: CAMP), a leading provider of wireless products, services and solutions, today announced a partnership with General Dynamics (GD) Broadband to provide customized versions of CalAmp's high-performance, multi-carrier broadband routers for use with GD Broadband LTE communications systems supporting mission-critical public safety, defense and industrial applications worldwide.

"GD Broadband products and technologies can be found in public safety networks worldwide," said Chris Marzilli, president of General Dynamics C4 Systems. "The addition of the CalAmp routers to the company's product portfolio ensures that our customers receive high-quality, cost-effective product options for their 4G/LTE network projects."

The first product under the agreement is CalAmp's Fusion-LTE broadband router, which operates on the latest 4G cellular networks and provides users with high-speed communications for data-intensive applications. The multi-mode broadband router provides wireless data connectivity at 4G speeds in band 13 and 17 LTE networks. In addition, GD Broadband will offer band 12 and band 20 variants to enable access to privately licensed networks serving oil and gas, energy, utilities, public safety, defense and other high-end industrial applications. To ensure reliable connectivity, the multi-radio version of Fusion automatically falls back to 3G performance when 4G networks are unavailable.

"The versatility of our Fusion broadband router enables a wide range of mission-critical applications for GD

Broadband infrastructure customers, providing exceptional performance with highly reliable network connectivity. CalAmp's multi-carrier solution allows GD Broadband customers to connect to both private and public LTE networks with a single device platform," said Mike Zachan, General Manager of CalAmp's Wireless Networks business.

GD Broadband is a part of General Dynamics C4 Systems, a business unit of General Dynamics (NYSE: GD).

#### **About CalAmp**

CalAmp (NASDAQ: CAMP) is a proven leader in providing wireless communications solutions to a broad array of vertical market applications and customers. CalAmp's extensive portfolio of intelligent communications devices, robust and scalable cloud service platform, and targeted software applications streamline otherwise complex machine-to-machine (M2M) deployments. These solutions enable customers to optimize their operations by collecting, monitoring and efficiently reporting business critical data and desired intelligence from high-value remote assets.
