

NEWS RELEASE

CalAmp to Provide Mobile Data Communications Equipment for the State of Oregon Wireless Interoperability Network

1/4/2011

OXNARD, CA, Jan 04, 2011 (MARKETWIRE via COMTEX) -- CalAmp Corp. (NASDAQ: CAMP), a leading provider of wireless products, services and solutions, today announced its alliance partner, Harris Corporation, has been selected by the State of Oregon as the radio system and service provider for the Oregon Wireless Interoperability Network (OWIN). As a member of the project implementation team, CalAmp will provide its Dataradio base stations and mobile radios for the wireless data portion of this multi-phased project.

OWIN follows a mandate from the Oregon State Legislature to consolidate the radio networks currently operated independently by the Oregon Department of Transportation, State Police, Forestry Department and Oregon Department of Corrections. A statewide "network of systems" will be created for mission-critical, interoperable, public safety communications. Local firefighters, police officers and emergency medical responders will be able to use the enhanced system in addition to their own radio systems.

About CalAmp

CalAmp develops and markets wireless communications solutions that deliver data, voice and video for critical networked communications and other applications. The Company's two business segments are Wireless DataCom, which serves utility, governmental and enterprise customers, and Satellite, which focuses on the North American Direct Broadcast Satellite market.
