## SYNNEX Corporation and CalAmp Simplify ELD Compliance with V-Series Bundle

11/6/2017

ELD compliant bundle enables dealers to generate new business related to transportation mandate

GREENVILLE, S.C. and IRVINE, Calif. – Nov. 6, 2017 – **SYNNEX Corporation** (NYSE: SNX), a leading business process services company, and CalAmp (Nasdaq: CAMP), a telematics pioneer leading transformation in a global connected economy, today announced the launch of the CalAmp V-Series electronic logging device (ELD) bundle available through SYNNEX. As the deadline for compliance with new federal rules for transportation fleets approaches, SYNNEX has expanded its options for partners to meet the market demand. The CalAmp V-Series offering enables the trucking industry to meet the December 18, 2017, deadline for the Federal Motor Carrier Safety Administration ELD mandate with easy deployment and reliable support.

“SYNNEX is excited to work with CalAmp in bringing crucial fleet management technology to the market,” said Tim Acker, Vice President Mobility and Connected Solutions, SYNNEX Corporation. “Our existing relationship with CalAmp and extensive support options provide an excellent opportunity for partners looking to grow and deepen customer relationships by helping fleet managers transition amid new federal regulations.”

“By offering our V-Series bundle through SYNNEX we are able to expand access to our turn-key ELD solution to a broad network of resellers, integrators and fleet managers looking to meet the mandate deadline,” said Carl Burrow, Senior Vice President of Global Sales for CalAmp. “With SYNNEX’s expertise in IoT deployments and post-sale support services, fleet managers can take advantage of many other ELD benefits beyond mandate compliance, such as workforce optimization, fleet safety and fuel cost reductions.”

The CalAmp V-Series is an all-in-one, purpose-built offering including hardware, software and support, making it an attractive choice for customers. The self-installation bundle features a removable tablet, custom designed cradle with embedded telematics and a programmable LED malfunction indicator. Through SYNEX, resellers can offer a superior solution free from the connectivity, durability, and battery malfunction problems common to lesser, bring-your-own-device options.

The integrated V-Series hardware solution comes preloaded with the certified Pedigree Technologies Hours of Service (HoS) application and support for resellers or end-users after the sale. Simplified self-installation lets resellers quickly respond to customer needs and present an accessible option for ELD solutions. The new offering builds on SYNEX's relationship with CalAmp as a top-tier distributor.
