TriplePoint Venture Growth BDC Corp.
2755 Sand Hill Road, Suite 150, Menlo Park, California 94025
(Address of principal executive office)

(650) 854-2090

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Trading Symbol(s)	Name of Each Exchange on Which Registered
Common Stock, par value \$0.01 per share	TPVG	The New York Stock Exchange
5.75% Notes due 2022	TPVY	The New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☐ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐ Accelerated filer ☐
Non-accelerated filer ☒ Smaller reporting company ☐
Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act by the registered public accounting firm that prepared or issued its audit report. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The aggregate market value of common stock held by non-affiliates of the Registrant on June 30, 2020 based on the closing price on that date of \$10.28 on the New York Stock Exchange was \$312.5 million. Solely for purposes of this disclosure, shares of common stock held by executive officers and directors of the Registrant as of such date have been excluded because such persons may be deemed to be affiliates. This determination of executive officers and directors as affiliates is not necessarily a conclusive determination for any other purposes.

There were 30,881,965 shares of the Registrant's common stock outstanding as of March 3, 2021.

Documents Incorporated by Reference: Portions of the Registrant’s Proxy Statement relating to the Registrant’s 2021 Annual Meeting of Stockholders to be filed not later than 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K are incorporated by reference into Part III of this Annual Report on Form 10-K.

Except as otherwise indicated in this Annual Report on Form 10-K, the terms:

- *“we,” “us” and “our” refer to TriplePoint Venture Growth BDC Corp., a Maryland corporation, and its wholly owned subsidiaries;*
- *“Adviser” refers to TriplePoint Advisers LLC, a Delaware limited liability company, our investment adviser and a subsidiary of TPC;*
- *“Administrator” refers to TriplePoint Administrator LLC, a Delaware limited liability company, our administrator and a subsidiary of our Adviser;*
- *“Credit Facility” refers to the our and our Financing Subsidiary’s secured revolving credit facility with the lenders and agents party thereto from time to time and Deutsche Bank AG, New York Branch, as facility agent and syndication agent, as amended or otherwise modified from time to time;*
- *“TPC” and “TriplePoint Capital” refers to TriplePoint Capital LLC, a Delaware limited liability company; and*
- *“Financing Subsidiary” refers to TPVG Variable Funding Company LLC, a Delaware limited liability company and our wholly owned subsidiary.*

Item 1. Business

Overview

We are an externally managed, closed-end, non-diversified management investment company that has elected to be treated as a business development company, or “BDC,” under the Investment Company Act of 1940, as amended, or the “1940 Act.” We have also elected to be treated, and intend to qualify annually, as a regulated investment company, or “RIC,” under Subchapter M of the Internal Revenue Code of 1986, as amended, or the “Code,” for U.S. federal income tax purposes.

We were formed as a Maryland corporation on June 28, 2013 to expand the venture growth stage business segment of TPC’s investment platform. Our investment objective is to maximize our total return to stockholders primarily in the form of current income and, to a lesser extent, capital appreciation by lending primarily with warrants to venture growth stage companies focused in technology, life sciences and other high growth industries backed by TPC’s select group of leading venture capital investors. We commenced investment activities in March 2014, at which time we acquired our initial portfolio in order to expedite the ramp-up of our investment activities and further our ability to meet our investment objectives. On March 11, 2014, we completed our initial public offering and concurrent private placement.

We originate and invest primarily in loans that have a secured collateral position and are generally used by venture growth stage companies to finance their continued expansion and growth, equipment financings and, on a select basis, revolving loans, together with, in many cases, attached equity “kickers” in the form of warrant investments, and direct equity investments. We underwrite our investments seeking an unlevered yield-to-maturity on our growth capital loans and equipment financings generally ranging from 10% to 18% and on our revolving loans generally ranging from 1% above the applicable prime rate to 10%, in each case, with potential for higher returns in the event we are able to exercise warrant investments and realize gains or sell our related equity investments at a profit. We also generally underwrite our secured loans seeking a loan-to-enterprise value of less than 25%.

We make investments that our Adviser’s senior investment team believes have a low probability of loss due to our expertise and the revenue profile, product validation, customer commitments, intellectual property, financial condition and enterprise value of the potential opportunity. We believe these investments provide us with a stable, fixed-income revenue stream along with the potential for equity-related gains on a risk-adjusted basis. We believe that the venture growth stage debt market presents a compelling growth channel for us because it has high barriers to entry and is underserved by both traditional lenders and existing debt financing providers to venture capital-backed companies given the brand, reputation and market acceptance, industry relationships, venture lending and leasing expertise, specialized skills, track record, and other factors required to lend to companies backed by leading venture capital investors. Additionally, we believe our investments are distinct compared with the investments made by more traditional lenders because our investments provide us the ability to invest alongside leading venture capital investors in companies focused in technology, life sciences and other high growth industries. We also believe that our investments are distinct compared to the investments made by existing debt financing providers to venture capital backed companies given our primary focus on venture growth stage companies backed by TPC’s select group of leading venture capital investors.

We believe we are able to successfully structure these investments as a result of the strong value proposition our secured loans offer to both borrowers and their venture capital investors. Our secured loans provide venture growth stage companies with an opportunity to:

- diversify their funding sources;
- augment their existing capital base and extend operating capital;
- scale business operations and accelerate growth;
- fund expenses ahead of anticipated corresponding revenue;
- expand product offerings through internal development or acquisitions;

- lower the upfront costs of capital expenditures;
- build and/or expand their leadership positions within their respective markets;
- accelerate and/or reduce volatility in the timing of cash collections; and
- delay and/or postpone the need for their next round of equity financing, in each case, extending their cash available to fund operations without incurring substantial equity dilution during a critical time in their lifecycle when they are meaningfully building enterprise value.

TriplePoint Capital, the Adviser, and the Administrator

TriplePoint Capital

TPC is widely recognized as a leading global financing provider devoted to serving venture capital-backed companies with creative, flexible and customized debt financing, equity capital and complementary services throughout their lifespan. TPC is located on Sand Hill Road in Silicon Valley and has a primary focus in technology, life sciences and other high growth industries. TPC's portfolio of venture capital-backed companies included and/or includes widely recognized and industry-leading companies, including, among others, Facebook, YouTube, AppNexus, Beyond Meat, Chegg, Etsy, Oncomed, Proteolix, Ring Central, Ruckus Wireless, Segway, Shazam, Splunk, Square, Varonis, and Workday.

TPC's global investment platform serves venture capital-backed companies backed by its select group of leading venture capital investors across all stages of development of a venture capital-backed company's lifecycle with dedicated business segments focused on providing creative, flexible and customized debt financings and complementary services at each stage. TPC categorizes venture capital-backed companies into the following five lifecycle stages of development: seed, early, later, venture growth and public. TPC has other business segments, in addition to the Company, that target investments in these lifecycle stages. See "Risk Factors-Risks Relating to our Conflicts of Interest-Our ability to enter into transactions with our affiliates and to make investments in venture growth stage companies along with our affiliates is restricted by the 1940 Act which may limit the scope of investment opportunities available to us."

TPC utilizes a unique, relationship-based lending strategy that primarily targets companies funded by a select group of leading venture capital investors. TPC refers to this approach as the "TriplePoint Lifespan Approach." Key elements of the TriplePoint Lifespan Approach include:

- establishing debt financing relationships with select venture capital-backed companies across all five lifecycle stages of development;
- working with TPC's select group of leading venture capital investors to identify debt financing opportunities within their portfolio companies that TPC believes have established management teams, strong investor support, large market opportunities, innovative technology or intellectual property and sufficient cash on hand and equity backing to support a potential debt financing opportunity on attractive risk-adjusted terms;
- developing debt financing relationships as early as possible in a venture capital-backed company's lifecycle in order to have a real-time understanding of the company's capital needs and be in a strategic position to evaluate and capitalize on additional investment opportunities as the company matures;
- diligently monitoring the progress and ongoing creditworthiness of a borrower; and
- serving as a creative, flexible and dependable financing partner with a focus on efficiency, responsiveness and customer service.

Our Adviser

Our investment activities are managed by our Adviser, which is registered as an investment adviser under the Investment Advisers Act of 1940, as amended (the "Advisers Act"), and is a wholly owned subsidiary of TPC. Our Adviser is responsible for sourcing, reviewing and structuring investment opportunities for us, underwriting and performing due diligence on our investments and monitoring our investment portfolio on an ongoing basis. Our Adviser was organized in August 2013 and, pursuant to an investment advisory agreement (the "Investment Advisory Agreement"), we pay our Adviser a base management fee and an incentive fee for its services. For information regarding our Adviser and the fees payable under the Investment Advisory Agreement, see "-Management Agreements-Investment Advisory Agreement."

Our Administrator

Our administrative functions are provided by our Administrator. Our Administrator is responsible for furnishing us with office facilities and equipment and provides us with clerical, bookkeeping, recordkeeping and other administrative services at such facilities. In February 2014, we entered into an administration agreement with our Administrator (the "Administration Agreement"), under which we pay our Administrator an amount equal to our allocable portion (subject to the review of our board of directors (the "Board") of our Administrator's overhead resulting from its obligations under the Administration Agreement, including rent and the allocable portion of the cost of our Chief Compliance Officer and Chief Financial Officer and their respective staffs. For information regarding our Administrator and expenses payable under the Administration Agreement, see "-Management Agreements-Administration Agreement."

Investment Strategy

Overview

Our investment objective is to maximize our total return to stockholders primarily in the form of current income and, to a lesser extent, capital appreciation. We pursue our investment objective by relying on a core investment philosophy described as the “Four Rs.” The Four Rs stand for:

- *Relationships*—We seek to develop and maintain deep, longstanding and mutually beneficial relationships with TPC’s select group of leading venture capital investors, borrowers and entrepreneurs.
- *Reputation*—We seek to preserve and extend the strong reputation of TPC’s brand and franchise as a creative, flexible and dependable financing partner with a focus on efficiency, responsiveness and customer service when interacting with venture capital investors, borrowers and entrepreneurs and when originating, structuring, underwriting and monitoring our investments.
- *References*—We seek to make every venture capital investor, borrower and entrepreneur with whom we work a reference so that they not only work with us again but also encourage others to work with us. We believe that receiving referrals from TPC’s select group of leading venture capital investors, borrowers and entrepreneurs is a critical part of our investment origination process and differentiates us from other lenders.
- *Returns*—We believe that by focusing on relationships, reputation and references, in addition to utilizing our specialized and established credit and monitoring process, we will generate attractive risk-adjusted returns over the long-term.

We invest primarily in (i) growth capital loans that have a secured collateral position and that are generally used by venture growth stage companies to finance their continued expansion and growth, (ii) equipment financings, which may be structured as loans or leases, that have a secured collateral position on specified mission-critical equipment, (iii) on a select basis, revolving loans that have a secured collateral position and that are typically used by venture growth stage companies to advance against inventory, components, accounts receivable, contractual or future billings, bookings, revenues, sales or cash payments and collections including proceeds from a sale, financing or the equivalent and (iv) direct equity investments in venture growth stage companies. In connection with our growth capital loans, equipment financings and revolving loans, we generally receive warrant investments that allow us to participate in any equity appreciation of our borrowers and enhance our overall investment returns.

Target Venture Growth Stage Companies

We primarily target investment opportunities in venture growth stage companies backed by venture capital investors. However, having backing from a venture capital investor does not guarantee financing from us. Prospective borrowers must further qualify based on our Adviser’s rigorous and established investment selection and underwriting criteria and generally have many of the following characteristics:

- financing from a member of TPC’s select group of leading venture capital investors with whom TPC has an established history of providing secured loans alongside equity investments made by these venture capital investors;
- focused in technology, life sciences or other high growth industries and targeting an industry segment with a large and/or growing market opportunity;
- completion of their primary technology and product development;
- meaningful customer sales, commitments or orders and have generated or we believe are reasonably expected to generate within the current fiscal year or on an annualized run rate at least \$20 million in revenues and a strong outlook for continued and/or potentially rapid revenue growth;
- a leadership position in its market (or the potential to establish a leadership position) with potential and/or defensible barriers to entry;
- an experienced and relatively complete senior management team with a successful track record;
- support from existing venture capital investors in the form of meaningful invested equity capital relative to our investment amount and/or reserved capital or willingness to invest additional capital as needed;
- strong likelihood of raising additional equity capital or achieving an exit in the form of an initial public offering or sale based on our determination;
- differentiated products, unique technology, proprietary intellectual property, and/or positive clinical results that may have intrinsic value on a stand-alone and/or liquidation basis;
- meaningful enterprise value relative to the size of our investment as indicated by a recent equity round valuation or as determined by a third-party with, in our Adviser’s senior investment team’s opinion, the potential for upside;
- a balanced current financial condition typically with 12 months or more of operating cash runway based on its projected cash burn and/or a path to profitability typically over a three to five year period from the date of our investment; and
- upcoming strategic and potential enterprise valuation-accreting business milestones that our investment can help provide operating cash runway for the company to achieve.

For many venture capital-backed companies, we believe that the venture growth stage is generally the point in their lifecycle at which they begin operational and financial preparations for a liquidity event, such as an initial public offering or private sale. We believe these investments provide us with a stable, fixed-income revenue stream along with the potential for equity-related gains on a risk-adjusted basis. We invest opportunistically in venture capital-backed companies at other lifecycle stages of development when our Adviser's senior investment team believes that they present an attractive investment opportunity for us.

Invest with TPC's Select Group of Leading Venture Capital Investors

We generally expect to (i) benefit from the relationships developed by TPC as part of its TriplePoint Lifespan Approach and (ii) target investment opportunities backed by a select group of leading venture capital investors with whom our Adviser's senior investment team has an established history of providing secured loans alongside equity investments made by these venture capital investors. We believe these well-recognized firms have consistently generated strong returns through superior selection processes and access to experienced entrepreneurs and quality investment opportunities based upon their strong reputations and track records, specialized knowledge and experienced investment professionals. As a result of this strategy, we focus and narrow our investment sourcing efforts to those investment opportunities backed by these leading venture capital investors with established track records targeting investments in Silicon Valley, Boston, Chicago, Los Angeles, New York City, Northern Virginia, San Diego, Seattle, the United Kingdom, Israel and other geographic areas of venture capital investments. We believe these relationships serve as an important source of investment opportunity referrals for us. We work with our select group of leading venture capital investors to identify debt financing opportunities within their portfolio companies that we believe have established management teams, strong venture capital investor support, large market opportunities, innovative technology or intellectual property, potential for meaningful warrant and/or equity investment returns and sufficient cash reserves to complement a potential debt financing opportunity.

Focus in Technology, Life Sciences and other High Growth Industries

We generally target technology, life sciences and other high growth industries and further specialize in subsectors within each of these industries including:

- *Technology*—areas of focus include: big data, cloud computing, communications, consumer, data storage, electronics, energy efficiency, hardware, information services, internet and media, networking, semiconductors, software, software-as-a-service, wireless communications and other technology related subsectors;
- *Life Sciences*—areas of focus include: biotechnology, diagnostic testing and bioinformatics, drug delivery, drug discovery, healthcare information systems, healthcare services, medical, surgical and therapeutic devices, pharmaceuticals and other life science related subsectors; and
- *Other High Growth Industries*—areas of focus vary depending upon our Adviser's investment strategy.

Our Adviser seeks to invest in those subsectors where our Adviser sees opportunities for innovation, globalization, demand and other drivers of change which create significant business opportunities for venture growth stage companies with cutting edge or disruptive technology, differentiated value propositions and sustainable competitive advantages. As a result, we believe that companies in these subsectors are more likely to attract significant investment from venture capital investors, private equity firms or strategic partners and are a more attractive candidate for a liquidity event than a company in a non-high growth industry.

Offer Creative Financing Solutions with Attractive Risk-Adjusted Pricing

Debt financings for venture growth stage companies are extremely diverse with use of proceeds, repayment structures and value propositions varying considerably among different company types. Our debt financings are customized based on a host of factors, including our review, assessment and analysis of each company's management team, business outlook, underlying technology, support from its venture capital investors, products or services, current and future financial profile, intended use of our proceeds and anticipated payback structure, timing of a liquidity event and return potential. The diversity of debt financing possibilities requires prospective lenders to demonstrate a high degree of venture lending and leasing expertise, technology, life sciences and other high growth industries knowledge and specialization, and willingness to provide customized products and flexibility. We believe the members of our Adviser's senior investment team are uniquely situated given their extensive industry background, track record, knowledge and lending experience in the technology, life sciences and other high growth industries, as well as venture capital, private equity and credit, to analyze, structure and underwrite such debt financings. We believe that we have the ability to appropriately price the investment opportunities we originate based upon the debt structures we employ and the individual risk profiles of our borrowers to generate attractive risk-adjusted returns for us and our stockholders.

Generate Equity Upside over Time through Warrant and Equity Investments

In connection with our secured loans, we generally receive warrant investments to acquire preferred or common stock in a venture growth stage company with an exercise price typically equal to the same price per share paid by the company's venture capital investors in its last round of equity financing or a recent valuation of the venture growth stage company as determined by a third party or in its next round of equity financing. Our warrant investment coverage generally ranges from 2% to 10% of the committed loan amount. The warrant investments we obtain typically include a "cashless exercise" provision to allow us to exercise these rights without any additional cash investment. We also generally receive the opportunity to invest equity directly in our venture growth stage companies. We believe that making equity investments and receiving warrant investments in venture growth stage companies with exit events on the horizon, such as an initial public offering or private sale, increases the likelihood of equity appreciation and enhanced investment returns. As a venture growth stage company's enterprise value changes we may recognize unrealized gains or losses from the fair value changes in our warrant and equity investments, and in conjunction with either a sale of the company or in connection with or following an initial public offering, we expect to achieve additional investment returns and realized gains from the exercise of these warrant investments and the sale of the underlying stock.

Utilize a Disciplined Investment Process

Our Adviser's senior investment team leverages the more than 50 years of combined experience and expertise of James P. Labe and Sajal K. Srivastava, TPC's co-founders, and the track record developed by them at TPC since its inception for reviewing prospective borrowers and potential financings, structuring those financings and subsequently monitoring those that are pursued and made, through which our Adviser's senior investment team has succeeded in making profitable investments and minimizing credit losses. Additionally, we believe that the credit performance of our venture growth stage companies and the returns associated with lending to these companies are enhanced through our Adviser's focus on originating investments primarily backed by TPC's select group of leading venture capital investors and having an understanding of their outlook and/or support of our prospective and existing borrowers.

Employ Active Portfolio Management Processes

Our Adviser utilizes an extensive internal credit tracking and monitoring approach to regularly follow a borrower's actual financial performance and achievement of business-related milestones to ensure that the internal risk rating assigned to each borrower is appropriate. This process has been refined and validated by Messrs. Labe and Srivastava, and the track record developed by TPC since its inception and is based, in part, on its expertise, familiarity and deep understanding of the risk associated with investing in various stages of a venture capital-backed company's lifespan. The analysis focuses on both quantitative metrics, such as cash balance and cash burn, and our Adviser's qualitative assessment in various areas, such as the outlook for the borrower's industry segment, progress of product development, overall adherence to the business plan, financial condition, future growth potential and ability to raise additional equity capital. Our Adviser maintains dialogue and contact with our borrowers' management teams to discuss, among other topics, business progress, cash flow, financial condition and capital structure matters. Our Adviser also typically engages in dialogue with the venture capital investors in our borrowers to understand and assess the borrower's progress and development and the venture capital investor's outlook and/or level of support for our borrower and in conjunction with the Four Rs, our core investment philosophy, determines the appropriate course of action with respect to investments in borrowers on our Credit Watch List.

Investment Structure

We offer a full range of creative, flexible and customized secured financing products which may include a combination of an initial facility fee, interest and principal payments, end-of-term payments and warrant and/or equity investment rights. Although the general components for each type of our debt financing products are substantially the same, we select and customize the specific debt financing product on a case-by-case basis based on our Adviser's senior investment team's experience and their analysis of a prospective borrower, its financing needs and its intended use of the proceeds from our debt financing product. For example, the type of debt financing transaction, the total repayment period, the interest-only period, the amortization period, the collateral position, the warrant investment coverage and the overall yield-to-maturity may vary. We make investments that our Adviser's senior investment team believes have a low probability of loss due to their expertise and the revenue profile, product validation, customer commitments, intellectual property, financial condition and enterprise value of the potential opportunity. Our debt financing products are typically structured as lines of credit, whereby a prospective borrower may be required to draw some of the commitment amount at close but may have up to 18 months from document execution to access the remaining available commitment amount of debt financing capital and, in many cases future advances may be subject to certain predetermined performance milestones and other conditions.

Growth Capital Loans

Key typical attributes of our growth capital loans include:

- Size ranges from \$5 million to \$50 million. We generally target and balance our growth capital loan size to the total equity capital base, the current or near term enterprise value, revenue run rate and current and near term cash and liquidity profile of a prospective borrower;
- Short total repayments typically ranging from 36 to 60 months or less and provide for interest-only or moderate loan amortization in the early period of the loan, with the majority of the amortization deferred until 24 to 48 months after the loan's funding date or a large lump sum payment on its maturity;

- Unlevered yield-to-maturity generally ranging from 10% to 18%, which may include current interest payments, upfront and facility fees, an end-of-term payment and/or a payment-in-kind (“PIK”) interest payment. Our end-of-term payments are contractual and fixed interest payments due at the maturity date of the loan, including upon prepayment, and are generally a fixed percentage of the original principal balance of the loan. A meaningful portion of the difference between our yield-to-maturity and the stated interest rate on the loan is recognized as non-cash income until it is paid;
- Equity “kickers” in the form of warrant investments to acquire preferred or common stock in the prospective borrower that allow us to participate in any potential equity appreciation and enhance our overall returns;
- Secured by a senior secured lien on all of the prospective borrower’s assets including a pledge or negative pledge on its intellectual property. For certain prospective borrowers we are the only form of secured debt (other than potentially specific equipment financing). Other prospective borrowers may also have a revolving loan, typically from a bank, to finance receivables, cash, billings, bookings or inventory, and the collateral for such financing may be the underlying financed asset, bank accounts and/or a senior lien having priority over our senior lien. In addition, there may be prospective borrowers that have a term loan facility, with or without an accompanying revolving loan, typically from a bank, that may have priority over our senior lien; and
- Limited and/or flexible covenant structures and with certain affirmative and negative covenants, default penalties, lien protection, investor abandonment provisions, material adverse change provisions, change-of-control provisions, restrictions on additional use of leverage and reimbursement for upfront and regular internal and third-party expenses, as well as prepayment penalties.

Equipment Financings

Key typical attributes of our equipment financings include:

- Size ranges from \$5 million to \$25 million. We generally target the size of our equipment financing to anticipate the capital equipment needs for a prospective borrower over a twelve month period balanced by the total equity capital base, the current or near term enterprise value, revenue run rate and current and near term cash and liquidity profile of a prospective borrower;
- Short total repayments typically ranging from 36 to 48 months or less and provide for short interest-only periods followed by full amortization;
- Structured as full payout loans or leases with either buyout provisions based on the fair market value of the financed equipment or a fixed end-of term payment;
- Unlevered yield-to-maturity generally ranging from 10% to 15%, which may include current interest payments, upfront and facility fees, an end-of-term payment and/or a PIK interest payment. Our end-of-term payments are contractual and fixed interest payments due at the maturity date of the loan, including upon prepayment, and are generally a fixed percentage of the original principal balance of the loan. The portion of our end-of-term payments that equal the difference between our yield-to-maturity and the stated interest rate on the loan are recognized as non-cash income until they are paid;
- Equity “kickers” in the form of warrant investments to acquire preferred or common stock in the prospective borrower that allow us to participate in any potential equity appreciation and enhance our overall returns;
- Secured solely by the underlying equipment being financed. We expect that much of the equipment financed by us will consist of standard, off-the-shelf equipment, such as computers, electronic test and measurement, telecommunications, laboratory equipment, manufacturing or production equipment. In certain cases, a portion of an equipment financing may finance customized equipment, software and/or expenses or soft-costs which may not have any resale value; and
- Limited and/or flexible covenant structures with certain affirmative and negative covenants, default penalties, lien protection, investor abandonment provisions, material adverse change provisions, change-of-control provisions and reimbursement for upfront and regular internal and third-party expenses, as well as prepayment penalties.

Revolving Loans

On a select basis, we offer revolving loans. Key typical attributes of our revolving loans include:

- Size ranges from \$1 million to \$25 million. We generally structure our revolving loans subject to an advance rate against the company’s inventory, components, accounts receivable, contractual or future billings, bookings, revenues, sales or cash payments and collections including proceeds from a sale, financing or the equivalent, that serve as our sole or primary collateral in support of the repayment of such loans;
- Short total repayments typically ranging from 12 to 36 months or less and typically provide for interest-only periods and/or moderate loan amortization in the early period of the loan, with the majority of the amortization deferred until 12 to 24 months after the loan’s funding date or on its maturity date;
- Unlevered yield-to-maturity generally ranging from 1% above the applicable prime rate to 10%, which may include current interest payments, upfront and facility fees, an end-of-term payment and/or a PIK interest payment. Our end-of-term payments are contractual and fixed interest payments due at the maturity date of the loan, including upon prepayment, and are generally a fixed percentage of the original principal balance of the loan. The portion of our end-of-term payments that equal the difference between our yield-to-maturity and the stated interest rate on the loan are recognized as non-cash income until they are paid;

- Equity “kickers” in the form of warrant investments to acquire preferred or common stock in the prospective borrower that allow us to participate in any equity appreciation and enhance our overall returns;
- Secured by a senior secured lien on all of the prospective borrower’s assets including a pledge or negative pledge on its intellectual property or on all of the specific assets financed specifically by the revolving loan such as the company’s inventory, components, accounts receivable, contractual or future billings, bookings, revenues, sales or cash payments and collections, including proceeds from a sale, financing or the equivalent; and
- Some financial covenants which may include advance rates, borrowing formulas, excess concentrations, cash requirements, business contracts or milestones along with certain affirmative and negative covenants, default penalties, lien protection, investor abandonment provisions, material adverse change provisions, change-of-control provisions, restrictions on additional use of leverage and reimbursement for upfront and regular internal and third-party expenses, as well as prepayment penalties.

Warrant Investments

In connection with our secured loans, we generally receive warrant investments to acquire preferred or common stock in a venture growth stage company with an exercise price typically equal to the same price per share paid by the company’s venture capital investors in its last round of equity financing or a recent valuation of the venture growth stage company as determined by a third party or in its next round of equity financing. As a venture growth stage company’s enterprise value changes we expect to recognize unrealized gains or losses from the fair value changes in our warrant investments, and in conjunction with either a sale of the company or in connection with or following an initial public offering, we may achieve additional investment returns and realized gains from the exercise of these warrant investments and the sale of the underlying stock. Warrant investments granted in connection with our secured loans are typically based on a percentage of the committed loan amount, are treated as original issue discount (“OID”) and may be earned at document execution and/or as the loan is funded. Warrant coverage generally ranges from 2% to 10% of the committed loan amount.

Direct Equity Investments

In connection with our secured loans, we may obtain equity investment rights that allow us to invest in a venture growth stage company’s current or next round of private equity financing on the same terms and conditions as the company’s venture capital investors and/or other equity investors in the round. As a venture growth stage company’s enterprise value changes we recognize unrealized gains or losses from the fair value changes in our direct equity investments, and in conjunction with either a sale of the company or in connection with or following an initial public offering, we may achieve additional investment returns and realized gains from the sale of the underlying stock. These equity investment rights typically range from \$100,000 to \$5.0 million in size (generally not exceeding 5% of the company’s total equity), although we are under no obligation to make any such investment. Typically, these are passive investments (we do not take a board of directors seat in the company) but can be strategically valuable and beneficial as an enhancement to our relationship with the venture growth stage company and to our economic return by generating meaningful return on capital committed.

Brokerage Allocation and Other Practices

Since we acquire and dispose of many of our investments in privately negotiated transactions, many of the transactions that we engage in do not require the use of brokers or the payment of brokerage commissions. Subject to policies established by our Board, our Adviser is primarily responsible for selecting brokers and dealers to execute transactions with respect to the publicly traded securities portion of our portfolio transactions and the allocation of brokerage commissions. Our Adviser does not execute transactions through any particular broker or dealer but seeks to obtain the best net results for us under the circumstances, taking into account such factors as price (including the applicable brokerage commission or dealer spread), size of order, difficulty of execution and operational facilities of the firm and the firm’s risk and skill in positioning blocks of securities. Our Adviser generally seeks reasonably competitive trade execution costs but does not necessarily pay the lowest spread or commission available. Subject to applicable legal requirements, our Adviser may select a broker based upon brokerage or research services provided to our Adviser and us and any other clients. In return for such services, we may pay a higher commission than other brokers would charge if our Adviser determines in good faith that such commission is reasonable in relation to the services provided. We also pay brokerage commissions incurred in connection with open-market purchases pursuant to our dividend reinvestment plan. The aggregate amount of brokerage commissions paid by us during the three most recent fiscal years is \$38,000.

Investment Criteria

Our Adviser (i) benefits from the relationships developed by TPC as part of its TriplePoint Lifespan Approach and (ii) typically sources investment opportunities with TPC’s select group of leading venture capital investors or directly from prospective borrowers who are seeking debt financing. Many of these prospective borrowers are attracted to TPC’s reputation, extensive track record in the venture growth stage debt market, Four Rs’ core investment philosophy, and/or may have previously had a lending relationship with TPC. Additional origination sources for our Adviser include an extensive network of strategic industry contacts, including former and current venture growth stage companies, financial advisers, commercial banks and accounting and law firms. Our Adviser also identifies companies with strong management teams and innovative technology to proactively generate debt financing opportunities.

We primarily target investment opportunities in venture growth stage companies backed by venture capital investors. However, having backing from a venture capital investor does not guarantee financing from us. Prospective borrowers must further qualify based on our Adviser's rigorous and established investment selection and underwriting criteria and generally have many of the characteristics discussed above under "-Investment Strategy-Target Venture Growth Stage Companies."

We underwrite our transactions to ensure that our portfolio companies have a strategic and balanced intended use of our investment proceeds without us taking excessive risk and with a low likelihood of default. We believe that the profiles of the venture growth stage companies that we target mitigate our risk because we expect these companies have several options to repay our debt financing through:

- cash flow either from achieving the strong and rapid revenue and profitability plans targeted at the time of our underwriting or in a downside risk scenario from reducing growth and associated operating expenses;
- receiving additional cash from new equity investors based on the progress and development made by the company and their outlook for growth or in a downside risk scenario from existing equity investors to avoid them from otherwise losing all of their invested capital given our ability to foreclose on our collateral;
- receiving acquisition offers from strategic or other financial investors or undertaking an initial public offering, given their large and growing market opportunities, the stage of development of their underlying technology and products and their financial profile; or
- in a worst case scenario, liquidating underlying assets including any proceeds from the sale of equipment, inventory, accounts receivable and/or intellectual property.

Upon referral or contact, a prospective borrower is added to our Adviser's client management system and assigned to one of our Adviser's Originations professionals who becomes the prospective borrower's primary contact with us. The Originations professional evaluates the prospective borrower in more depth to understand its debt financing needs and to determine whether or not it is qualified under our criteria. Upon initial screening, the Originations professional generally meets with the prospective borrower and performs a preliminary investigation of the prospective borrower's management, operations and business outlook. The Originations professional generally consults with, and gathers information from, a wide variety of industry sources to assess the prospective borrower and its industry. In addition, the Originations professional may reach out to the prospective borrower's venture capital investors to understand the background of their investment in the company, their outlook for the company, the company's market and products, the company's goals and objectives associated with the proposed debt financing and the venture capital investors level of support for the company. If the Originations professional is satisfied with the preliminary assessment of the prospective borrower's management, operations and business prospects, the Originations professional submits an internal pre-screen memorandum of the proposed debt transaction to our Adviser's senior investment team for discussion and review, as well as for pricing and structuring guidance. Each potential investment opportunity that our Adviser's Originations professionals determine merits investment consideration is presented and evaluated at a weekly meeting in which our Adviser's senior investment team discusses the merits and risks of a potential investment opportunity, as well as the due diligence process and the pricing and structure. If our Adviser's senior investment team believes an investment opportunity fits our investment profile, the Originations professional submits a non-binding term sheet to the prospective borrower.

Diligence Process

Assuming the non-binding term sheet submitted to the prospective borrower is subsequently executed, the investment opportunity is then subject to our Adviser's rigorous diligence and credit analysis process, which is based on its senior investment team's extensive experience and tailored specifically for venture growth stage companies. This process differs notably from traditional lending analysis, combining both qualitative and quantitative analysis and assessment, versus traditional, purely quantitative credit analyses. There is a heavy orientation towards a qualitative and subjective investment-oriented review, taking into account such factors as:

- venture capital investor quality, track record and expected level of participation in future financing events;
- management team experience, completeness, performance to date, and ability to perform;
- industry segment/market attractiveness and outlook, competitive dynamics, and growth potential;
- detailed assessment and analysis of the venture growth stage company's current products or technology and future products or technology, including value proposition and return on investment to its customers and its ability to expand and grow its customer base;
- current and future financial position, including financial projections and sensitivity analyses, historical performance, cash balance and burn analysis, capitalization structure, feasibility of financial plan and underlying assumptions, break-even/profitability timing, future cash needs and future financing plans;
- stage of development and execution timeline and milestones and the likelihood and feasibility of achieving such milestones; and
- transaction risk/return profile—assessing the strengths, weaknesses, risks, loan-to-value, liquidation values and outlook of the borrower compared to the structure, pricing, potential returns, likelihood of repayment and collateral structure of the proposed debt financing.

Our Adviser's diligence and credit analysis process typically includes visits by one of our Adviser's Investment and Credit Analysis professionals to a prospective borrower's headquarters and other facilities, interviews with key management and board members and reference checks on senior management. In addition, the diligence process may include discussions with key industry research analysts, other industry participants, customers and suppliers, where appropriate. One of our Adviser's professionals also reviews the prospective borrower's organizational documents and structure, capital structure, assets, liabilities, employee plans, key customer or supplier contracts, legal and tax matters and other relevant legal documentation. The Investment and Credit Analysis professional submits a detailed credit and due diligence memorandum describing and analyzing the proposed transaction, as well as the outcome of the diligence and credit analysis activities. This memorandum is circulated to members of our Adviser's Investment Committee in advance of its meetings.

Investment Committee

The objective of our Adviser's Investment Committee is to leverage its members' broad historical experience, including significant entrepreneurial, credit, venture capital, venture lending and leasing expertise and technology, life sciences and other high growth industries knowledge assessing the risk and needs of venture growth stage companies and appropriateness of prospective transactions, assessing the risk/return profile of proposed transactions, assessing the independent diligence and credit analysis and providing a forum for independent and unbiased thought, discussion, and assessment.

Our Adviser's Investment Committee is comprised of Messrs. Labe and Srivastava. Some or all of the members of our Adviser's senior investment team are asked to attend the Investment Committee meeting and to participate in voting on an advisory basis, which the Investment Committee members use as a factor in the formal Investment Committee vote. The Investment Committee meets weekly and more frequently on an as-needed basis. The applicable Originations and Investment and Credit Analysis professional presents the transaction, results of the professional's diligence review and credit analysis and the professional's recommendations to the Investment Committee. During the presentation, Investment Committee members typically ask questions, ask for clarifications, state opinions and assessments and make other comments. When there are no further questions and the discussions have concluded, the Investment Committee holds a vote and approves the proposed transaction if it receives unanimous consent from all of the Investment Committee members. In certain situations, the Investment Committee may ask the Originations and Investment and Credit Analysis professional to perform additional analysis and resubmit the transaction at a later Investment Committee meeting. No single criterion determines a decision to invest. The Investment Committee members weigh all the factors, both qualitative and quantitative, when making an investment decision. Our Adviser has the discretion to modify the members of the Investment Committee and its approval process at any time without our consent.

Investment Monitoring and Portfolio Management

Our Adviser utilizes an extensive internal credit tracking and monitoring approach to regularly follow a borrower's actual financial performance and achievement of business-related milestones to ensure that the internal risk rating assigned to each borrower is appropriate. This process has been refined and validated by Messrs. Labe and Srivastava, and the track record developed by TPC since its inception and is based in part on its expertise and deep understanding of the risk associated with investing in various stages of a venture capital-backed company's lifespan. The analysis focuses on both quantitative metrics, such as cash balance and cash burn, and our Adviser's qualitative assessment in various areas, such as the outlook for the borrower's industry segment, progress of product development, overall adherence to the business plan, financial condition, future growth potential and ability to raise additional equity capital. Our Adviser maintains dialogue and contact with our borrowers' management teams to discuss, among other topics, business progress, cash flow, financial condition and capital structure matters. Our Adviser also typically engages in dialogue with the venture capital investors in our borrowers to understand and assess the borrower's progress and development and the venture capital investor's outlook and/or level of support for our borrower and in conjunction with the Four Rs, our core investment philosophy, determines the appropriate course of action with respect to investments in borrowers on our Credit Watch List.

Each of our borrowers is assigned a "Customer Team" consisting of staff from our Adviser's Originations, Investment and Credit Analysis, Customer Monitoring and Legal teams. We believe having a dedicated Customer Team for each borrower further strengthens the relationship we have with the borrower, which is a key component of our Adviser's strategy and affords our Adviser consistent and continuous interaction with our borrowers. A Customer Monitoring professional is assigned to all borrowers to ensure compliance with financial statement reporting, insurance filing and timely payment requirements. These professionals review the various financial statements, compliance reports and other documents received from our borrowers on a monthly or quarterly basis, as well as publicly filed financing statements, such as UCC financing statements and press releases, and enter them into our Adviser's proprietary client-management platform for review by the rest of the Customer Team. In the event of a missed payment or if other credit issues arise, the Customer Monitoring professional contacts other members of the Customer Team to initiate escalation procedures.

On a weekly basis, our Adviser's Investment Committee and our Adviser's senior investment team review material events and information on our borrowers and discuss in detail those borrowers that are performing below expectations. On a quarterly basis, or more frequently as needed, our Originations and Investment and Credit Analysis professionals undertake an extensive re-evaluation of each borrower and prepare a portfolio update. Key topics that are reviewed include timing/status of the next equity financing round, cash balance and burn rate, financial and operational progress, and covenant adherence. All of these meetings are attended by each member of our Adviser's Investment Committee, senior investment team and the Customer Team for the specific borrower being reviewed.

If the outlook for a borrower, its industry or a borrower's available cash balance or credit rating is materially deteriorating, or there is material downturn in the borrower's standing since our last review, we change the standing of the borrower on our Credit Watch List and our Originations and Investment and Credit Analysis professionals contact the borrower and its venture capital investors to discuss and understand any changes. Our Originations and Investment and Credit Analysis professionals generally actively work to maintain an open dialogue with borrowers on the Credit Watch List to work to limit the likelihood of a default. Utilizing the Four Rs, our core investment philosophy, our Adviser assesses each borrower on our Credit Watch List and, based on the recommendations from our Originations and Investment and Credit Analysis professionals and potentially from our discussions with and representations made from the borrower's venture capital investors, determines the appropriate course of action, including decisions to enforce our rights and remedies, modify or waive a provision of our investments, declare a default, request early pay-off, or wait for an external event, such as an acquisition or financing, to restructure a secured loan or receive additional consideration in the form of fees or warrant investments. In a worst case scenario, a member of our Customer Team sells collateral with the help of management, repossesses and auctions assets or negotiates and structures other potential outcomes. If bankruptcy is a possibility, a member of our Customer Team may utilize outside counsel to provide advice on avoiding this outcome or to minimize the adverse effects on us.

Consistent with TPC's existing policies, our Adviser maintains a Credit Watch List with borrowers placed into five groups based upon our Adviser's senior investment team's judgment, where 1 is the highest rating and all new loans are generally assigned a rating of 2.

Category	Category Definition	Action Item
Clear (1)	Performing above expectations and/or strong financial or enterprise profile, value or coverage.	Review quarterly.
White (2)	Performing at expectations and/or reasonably close to it. Reasonable financial or enterprise profile, value or coverage. Generally, all new loans are initially graded White.	Contact portfolio company periodically in no event less than quarterly.
Yellow (3)	Performing generally below expectations and/or some proactive concern. Adequate financial or enterprise profile, value or coverage.	Contact portfolio company monthly or more frequently as determined by our Adviser's Investment Committee; contact venture capital investors.
Orange (4)	Needs close attention due to performance materially below expectations, weak financial and/or enterprise profile, concern regarding additional capital or exit equivalent.	Contact portfolio company weekly or more frequently as determined by our Adviser's Investment Committee; contact venture capital investors regularly; our Adviser forms a workout group to minimize risk of loss.
Red (5)	Serious concern/trouble due to pending or actual default or equivalent. May experience partial and/or full loss.	Maximize value from assets.

Competition

Debt financing for venture capital-backed companies is particularly heterogeneous—the type, structures and sizes of debt financings often vary significantly depending on a particular company's industry and its current or near-term stage of development. The profile and underwriting characteristics of an early stage venture capital-backed company are very different from those of a later stage venture capital-backed company and/or those of a venture growth stage company. Furthermore, within venture growth stage companies, the uses, structures and value propositions of debt financing vary considerably among companies and industries and require a high degree of venture lending and leasing expertise and technology, life sciences and other high growth industries knowledge, specialization and flexibility from a lender. The availability of debt financing for venture growth stage companies is further limited by factors such as the brand, reputation and market acceptance, industry relationships, track record, and other factors required to lend to companies backed by leading venture capital investors, in addition to the distinct credit profiles of these companies and the deep experience and specialized set of skills required to (i) source deal flow and receive investment referrals; (ii) evaluate high growth industries and sectors, business prospects, operating characteristics and collateral; (iii) analyze potential transactions; and (iv) customize unconventional transaction structures for these companies.

We believe that venture-oriented banks tend to be the primary form of traditional lenders participating in the market for venture growth stage companies and that they generally focus on providing lower risk and lower return financings, which tend to require and impose many restrictive covenants and conditions on borrowers, such as limitations on outflows and borrowing formulas and requiring a significant depository relationship to facilitate rapid liquidation. In addition, we believe that most existing non-traditional debt providers do not regularly or actively participate in venture growth stage lending due to their reluctance to underwrite the large financings required by venture growth stage companies, as well as the desire of these providers to structure deals with lower current return but with the potential for significantly higher equity upside through warrant investments by lending to companies with lower valuations than would be possible in the venture growth stage lending market. As a result, most existing providers of debt financing tend to focus on seed, early and late stage venture capital-backed companies instead of venture growth stage companies.

Our competitors include both existing and newly formed equity and debt focused public and private funds, other BDCs, investment banks, venture-oriented banks, commercial financing companies and, to the extent they provide an alternative form of financing, private equity and hedge funds. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than us. For example, we believe some of our competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which expose them to a wider variety of investments. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC or to the distribution and other requirements we must satisfy to maintain our ability to be subject to tax treatment as a RIC.

We believe we compete effectively with these entities primarily on the basis of TPC's reputation, track record, experience, industry knowledge and relationships and our Adviser's senior investment team's contacts, efficient investment analysis, decision-making processes, creative financing products and highly customized investment terms. We believe that the Four Rs, our core investment philosophy, enable us to continue to grow our brand name reputation and differentiate us from our competitors. We do not compete primarily on the financing terms we offer and believe that some competitors make loans with rates that are comparable or lower than our rates. We also believe that our relationship-based approach to investing, which leverages our Adviser's senior investment team's expertise in developing strong relationships with venture capital investors and venture capital-backed companies, understanding the capital needs of venture growth stage companies, and structuring and customizing attractive financing solutions to meet the financing needs throughout a company's growth stage, enables us to identify, attract and proactively capitalize on venture growth stage companies' debt needs as they grow and become successful enterprises.

Employees

We do not currently have any employees and do not expect to have any employees. Services necessary for our business are provided by individuals who are employees of the Adviser or its affiliates, and the Administrator, pursuant to the terms of the Investment Advisory Agreement and/or the Administration Agreement, each as described below. Our day-to-day investment operations are managed by the Adviser, and we reimburse our Administrator for our allocable portion of expenses incurred pursuant to the Administration Agreement, as described below.

Management Agreements

Investment Advisory Agreement

Subject to the overall supervision of our Board and in accordance with the 1940 Act, our Adviser manages our day-to-day operations and provides investment advisory services to us. Under the terms of the Investment Advisory Agreement, our Adviser:

- determines the composition of our portfolio, the nature and timing of the changes to our portfolio and the manner of implementing such changes;
- identifies, evaluates and negotiates the structure of the investments we make;
- executes, closes, services and monitors the investments we make;
- determines the securities and other assets that we will purchase, retain or sell;
- performs due diligence on prospective investments; and
- provides us with such other investment advisory, research and related services as we may, from time to time, reasonably require for the investment of our funds.

Pursuant to the Investment Advisory Agreement, we have agreed to pay our Adviser a fee for its investment advisory and management services consisting of two components—a base management fee and an incentive fee. The cost of both the base management fee and the incentive fee is ultimately borne by our stockholders.

Base Management Fee

The base management fee is calculated at an annual rate of 1.75% of our average adjusted gross assets, including assets purchased with borrowed funds. For services rendered under the Investment Advisory Agreement, the base management fee is payable quarterly in arrears. The base management fee is calculated based on the average value of our gross assets at the end of our two most recently completed calendar quarters. Such amount is appropriately adjusted (based on the actual number of days elapsed relative to the total number of days in such calendar quarter) for any share issuances or repurchases during a calendar quarter. Base management fees for any partial month or quarter are appropriately pro-rated.

Incentive Fee

The incentive fee, which provides our Adviser with a share of the income that it generates for us, consists of two components—investment income and capital gains—which are largely independent of each other, with the result that one component may be payable even if the other is not payable.

Under the investment income component, we pay our Adviser each quarter 20.0% of the amount by which our pre-incentive fee net investment income for the quarter exceeds a hurdle rate of 2.0% (which is 8.0% annualized) of our net assets at the end of the immediately preceding calendar quarter, subject to a "catch-up" provision pursuant to which our Adviser receives all of such income in excess of the 2.0% level but less than 2.5% and subject to a total return requirement. The effect of the "catch-up" provision is that, subject to the total return provision discussed below, if pre-incentive fee net investment income exceeds 2.5% in any calendar quarter, our Adviser receives 20.0% of our pre-incentive fee net investment income as if the 2.0% hurdle rate did not apply. The foregoing incentive fee is subject to a total return requirement, which provides that no incentive fee in respect of our pre-incentive fee net investment income is payable except to the extent that 20.0% of the cumulative net increase in net assets resulting from operations since the effective date of our election to be regulated as a BDC (March 5, 2014) exceeds the cumulative incentive fees accrued and/or paid since March 5, 2014. In other words, any investment income incentive fee that is payable in a calendar quarter is limited to the lesser of (i) 20.0% of the amount by which our pre-incentive fee net

investment income for such calendar quarter exceeds the 2.0% hurdle rate, subject to the “catch-up” provision and (ii) (x) 20.0% of the cumulative net increase in net assets resulting from operations since March 5, 2014 minus (y) the cumulative incentive fees accrued and/or paid since March 5, 2014. For the foregoing purpose, the “cumulative net increase in net assets resulting from operations” is the sum of our pre-incentive fee net investment income, realized gains and losses and unrealized gains and losses since March 5, 2014.

Pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets at the end of the immediately preceding calendar quarter, does not include any realized capital gains, realized capital losses or unrealized capital gains or losses. Because of the structure of the incentive fee, it is possible that we may pay an incentive fee in a quarter where we incur a loss, subject to the total return requirement described in the preceding paragraph. For example, if we receive pre-incentive fee net investment income in excess of the quarterly minimum hurdle rate, we will pay the applicable income incentive fee even if we have incurred a loss in that quarter due to realized and unrealized capital losses. Our net investment income used to calculate this component of the incentive fee is also included in the amount of our assets used to calculate the 1.75% base management fee. These calculations are appropriately adjusted for any share issuances or repurchases during the relevant quarter.

The following is a graphical representation of the calculation of the income-related portion of the incentive fee.

Under the capital gains component of the incentive fee, we pay our Adviser at the end of each calendar year (or upon termination of the Investment Advisory Agreement) 20.0% of our aggregate cumulative realized capital gains from inception through the end of that year, computed net of our aggregate cumulative realized capital losses and our aggregate cumulative unrealized losses through the end of such year, less the aggregate amount of any previously paid capital gain incentive fees. For the foregoing purpose, our “aggregate cumulative realized capital gains” does not include any unrealized gains. It should be noted that we accrue an incentive fee for accounting purposes taking into account any unrealized gains in accordance with GAAP. The capital gains component of the incentive fee is not subject to any minimum return to stockholders. If such amount is negative, then no capital gains incentive fee is payable for such year. Additionally, if the Investment Advisory Agreement is terminated as of a date that is not a calendar year end, the termination date will be treated as though it were a calendar year end for purposes of calculating and paying the capital gains incentive fee.

Payment of Our Expenses

All professionals of our Adviser, when and to the extent engaged in providing investment advisory and management services to us, and the compensation and routine overhead expenses of personnel allocable to these services to us, are provided and paid for by our Adviser and not by us. We bear all other out-of-pocket costs and expenses of our operations and transactions, including, without limitation, those relating to:

- organization;
- calculating our net asset value (including the cost and expenses of any independent valuation firm);
- indemnification payments;
- providing managerial assistance to those portfolio companies that request it;
- marketing expenses;
- expenses relating to the development and maintenance of our website;
- fees and expenses payable to third parties, including agents, consultants or other advisors, in connection with monitoring financial and legal affairs for us and in monitoring our investments and performing due diligence on our prospective portfolio companies or otherwise relating to, or associated with, evaluating and making investments;
- fees and expenses incurred in connection with obtaining debt financing;
- interest payable on debt, if any, incurred to finance our investments and expenses related to unsuccessful portfolio acquisition efforts;
- offerings of our common stock and other securities;
- investment advisory and management fees;

- administration fees, expenses and/or payments payable under the Administration Agreement;
- fees payable to third parties, including agents, consultants and other advisors, relating to, or associated with, evaluating and making investments, including costs associated with meeting potential financial sponsors;
- fees and expenses associated with origination efforts;
- transfer and dividend paying agents and custodial fees and expenses;
- federal and state registration fees;
- all costs of registration of our securities with appropriate regulatory agencies;
- all cost of listing our securities on any securities exchange;
- U.S. federal, state and local taxes;
- brokerage commissions;
- independent directors' fees and expenses;
- costs of preparing and filing reports or other documents required by the Securities and Exchange Commission ("SEC") or other regulators;
- costs of any reports, proxy statements or other notices to stockholders, including printing costs;
- costs associated with individual or groups of stockholders;
- our allocable portion of any fidelity bond, directors' and officers' errors and omissions liability insurance, and any other insurance premiums;
- direct costs and expenses of administration, including printing, mailing, long distance telephone, copying, secretarial and other staff, independent auditors and outside legal costs;
- and all other expenses incurred by us or our Administrator or our Adviser in connection with administering our business, including payments under the Administration Agreement based on our allocable portion of our Administrator's overhead in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing compliance functions and the allocable portion of the costs of compensation and related expenses of our Chief Compliance Officer and Chief Financial Officer and their respective administrative support staffs.

Duration and Termination

Unless terminated earlier as described below, the Investment Advisory Agreement will continue in effect from year to year if (i) (A) approved annually by our Board or (B) by the affirmative vote of the holders of a majority of our outstanding voting securities and (ii) approved by a majority of our directors who are not "interested persons" as defined in the 1940 Act. The Investment Advisory Agreement automatically terminates in the event of its assignment, as defined in the 1940 Act, by our Adviser and may be terminated by either party without penalty upon 60 days' written notice to the other. The holders of a majority of our outstanding voting securities may also terminate the Investment Advisory Agreement without penalty upon 60 days' written notice. See "Risk Factors-Risks Relating to our Business and Structure-We are dependent upon our executive officers and our Adviser's senior investment team and members of its Investment Committee, in particular, Messrs. Labe and Srivastava, for our success and upon our Adviser's access to such individuals pursuant to the Staffing Agreement (as defined below). If our Adviser were to lose such access, our ability to achieve our investment objective could be significantly harmed."

The Investment Advisory Agreement provides that, absent criminal conduct, willful misfeasance, bad faith or gross negligence in the performance of its duties or by reason of the reckless disregard of its duties and obligations under the Investment Advisory Agreement, our Adviser and its professionals and any other person or entity affiliated with it are entitled to indemnification from us for any damages, liabilities, costs and expenses (including reasonable attorneys' fees and amounts reasonably paid in settlement) arising from the rendering of our Adviser's services under the Investment Advisory Agreement or otherwise as our investment adviser.

Board Approval of the Investment Advisory Agreement

The Investment Advisory Agreement between us and our Adviser was initially approved by our Board at an in-person meeting in November 2013 and entered into in February 2014. Our Board most recently determined to re-approve the Investment Advisory Agreement at a meeting held on October 29, 2020. In reaching a decision to re-approve the Investment Advisory Agreement, the Board reviewed a significant amount of information and considered, among other things:

- the nature, extent and quality of services provided by the Adviser to us;
- the investment performance of the Company and the Adviser;
- comparative data with respect to the investment performance of other BDCs with similar investment objectives, strategies, risks, restrictions and types of securities purchased;
- the fee structure under the Investment Advisory Agreement and the Adviser's anticipated costs of providing services to us;

- comparative data with respect to advisory and incentive fees or similar expenses paid by other BDCs with similar investment objectives and asset levels;
- our operating expenses compared to those of other BDCs with similar investment objectives, strategies, risks, restrictions and types of securities purchased;
- any existing and potential sources of indirect income to the Adviser from its relationships with us and the profitability of those relationships;
- information about the services performed and the personnel performing such services under the Investment Advisory Agreement;
- economies of scale realized by the Adviser (or that possibly might be realized by the Adviser in the future) in connection with the Adviser's provision of services to us; and
- the organizational capability and financial condition of the Adviser.

Based on the information reviewed and the discussions detailed above, the Board, including all of the directors who are not "interested persons" as defined in the 1940 Act, concluded that the investment advisory fee rates and terms are reasonable in relation to the services provided and re-approved the Investment Advisory Agreement as being in the best interests of our stockholders. The Board did not assign relative weights to the above factors or the other factors considered by it. Individual members of the Board may have given different weights to different factors.

Administration Agreement

The Administration Agreement provides that our Administrator is responsible for furnishing us with office facilities and equipment and providing us with clerical, bookkeeping, recordkeeping and other administrative services at such facilities. Under the Administration Agreement, our Administrator performs, or oversees, or arranges for, the performance of, our required administrative services, which includes being responsible for the financial and other records that we are required to maintain and preparing reports to our stockholders and reports and other materials filed with the SEC or any other regulatory authority. In addition, our Administrator assists us in determining and publishing our net asset value, oversees the preparation and filing of our tax returns and the printing and dissemination of reports and other materials to our stockholders, and generally oversees the payment of our expenses and the performance of administrative and professional services rendered to us by others. Under the Administration Agreement, our Administrator also provides significant managerial assistance on our behalf to those companies that have accepted our offer to provide such assistance.

In full consideration of the provision of the services of our Administrator, we reimburse our Administrator for the costs and expenses incurred by our Administrator in performing its obligations and providing personnel and facilities under the Administration Agreement. Payments under the Administration Agreement are equal to our allocable portion (subject to the review of our Board) of our Administrator's overhead resulting from its obligations under the Administration Agreement, including rent and the allocable portion of the cost of our Chief Compliance Officer and Chief Financial Officer and their respective staffs. In addition, if requested to provide significant managerial assistance to our portfolio companies, our Administrator is paid an additional amount based on the services provided, which shall not exceed the amount we receive from such companies for providing this assistance. The Administration Agreement between us and the Administrator was initially approved by our Board at an in-person meeting in November 2013 and was entered into in February 2014. Our Board most recently determined to re-approve the Administration Agreement at a meeting held on October 29, 2020. In connection with such approval, the Board, including a majority of independent directors, reviewed the payments made by us to the Administrator to determine that the provisions of the Administrative Agreement are carried out satisfactorily and to determine, among other things, whether the payments made by us under the Administration Agreement are reasonable in light of the services provided. The Board also reviewed the methodology employed in determining how the expenses are allocated to us and the proposed allocation of administrative expenses among us and the affiliates of TPC. The Board then assessed the reasonableness of such reimbursements for expenses allocated to us based on the nature and quality of the administrative services provided to us by the Administrator, our projected operating expenses and expense ratio compared to BDCs with similar investment objectives, any existing and potential sources of indirect income to the Administrator from its relationship with us, information about the administrative services to be performed and the personnel performing such administrative services, the organizational capability of the Administrator, and the possibility of obtaining similar services from other third-party service providers.

The Administration Agreement will continue in effect from year to year if approved annually by the Board. The Administration Agreement may be terminated by either party without penalty upon 60 days' written notice to the other party. Stockholder approval is not required to amend the Administration Agreement.

The Administration Agreement provides that, absent criminal conduct, willful misfeasance, bad faith or gross negligence in the performance of its duties or by reason of the reckless disregard of its duties and obligations, our Administrator and any person or entity affiliated with it are entitled to indemnification from us for any damages, liabilities, costs and expenses (including reasonable attorneys' fees and amounts reasonably paid in settlement) arising from the rendering of our Administrator's services under the Administration Agreement or otherwise as our administrator.

Staffing Agreement

In February 2014, our Adviser entered into the Staffing Agreement with TPC (the “Staffing Agreement”). Pursuant to the Staffing Agreement, TPC has made and will continue to make, subject to the terms of the Staffing Agreement, its investment and portfolio management and monitoring teams available to our Adviser. We believe that the Staffing Agreement (i) provides us with access to deal flow generated by TPC in the ordinary course of its business; (ii) provides us with access to TPC’s investment professionals, including its senior investment team led by Messrs. Labe and Srivastava, and TPC’s non-investment employees; and (iii) commits certain key senior members of TPC’s Investment Committee to serve as members of our Adviser’s Investment Committee. Our Adviser is responsible for determining if we will participate in deal flow generated by TPC. Our Adviser takes advantage of the significant deal origination channels, rigorous due diligence process, disciplined underwriting methods, creative investment structuring and hands-on portfolio management and investment monitoring capabilities of TPC’s senior investment team. The Staffing Agreement may be terminated by either party with 60 days’ prior written notice.

License Agreement

In February 2014, we entered into the License Agreement with TPC under which TPC granted us a non-exclusive, royalty-free license to use the name “TriplePoint” and the TriplePoint logo. Under the License Agreement, we have a right to use the “TriplePoint” name for so long as our Adviser or one of its affiliates remains our investment adviser. Other than with respect to this limited license, we have no legal right to the “TriplePoint” name.

Determination of Net Asset Value

Quarterly Determinations

We determine the net asset value per share of our common stock quarterly. The net asset value per share is equal to the value of our total assets minus liabilities and any preferred stock outstanding divided by the total number of shares of common stock outstanding. As of the date of this Annual Report on Form 10-K, we do not have any preferred stock outstanding.

Our investment assets are carried at fair value in accordance with the 1940 Act and Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosure, or ASC Topic 820. Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market price for those securities for which a market quotation is readily available and (ii) for all other securities and assets, fair value is as determined in good faith by our Board. Our investments are primarily made to venture growth stage companies in technology, life sciences and other high growth industries. Given the nature of lending to these types of companies, our investments are generally considered Level 3 assets under ASC Topic 820 because there is no known or accessible market or market indexes for these investments to be traded or exchanged. As such, we value substantially all of our investments at fair value as determined in good faith by our Board pursuant to a consistent valuation policy in accordance with the provisions of ASC Topic 820 and the 1940 Act. Due to the inherent uncertainty in determining the fair value of investments that do not have a readily available market value, the fair value of our investments determined in good faith by our Board may differ significantly from the value that would have been used had a readily available market existed for such investments, and the differences could be material.

The valuation process is conducted at the end of each fiscal quarter, with a portion of our valuations of portfolio companies without market quotations subject to review by one or more independent valuation firms each quarter. When an external event with respect to one of our portfolio companies, such as a purchase transaction, public offering or subsequent equity sale occurs, we use the pricing indicated by the external event to corroborate our valuation.

We have adopted ASC Topic 820. ASC Topic 820 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. ASC Topic 820 also provides guidance regarding a fair value hierarchy, which prioritizes information used to measure fair value and the effect of fair value measurements on earnings and provides for enhanced disclosures determined by the level of information used in the valuation. In accordance with ASC Topic 820, these inputs are summarized in the three levels listed below:

- *Level 1*—Valuations are based on quoted prices in active markets for identical assets or liabilities that are accessible at the measurement date.
- *Level 2*—Valuations are based on quoted prices (in non-active markets or in active markets for similar assets or liabilities), observable inputs other than quoted prices and inputs that are not directly observable but are corroborated by observable market data.
- *Level 3*—Valuations are based on inputs that are unobservable and significant to the overall fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models incorporating significant unobservable inputs, such as discounted cash flow models and other similar valuations techniques. The valuation of Level 3 assets and liabilities generally requires significant management judgment due to the inability to observe inputs to valuation.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment’s level within the fair value hierarchy is based on the lowest level of observable input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and consideration of factors specific to the investment.

Under ASC Topic 820, the fair value measurement also assumes that the transaction to sell an asset occurs in the principal market for the asset or, in the absence of a principal market, the most advantageous market for the asset, which may be a hypothetical market, and excludes transaction costs. The principal market for any asset is the market with the greatest volume and level of activity for such asset in which the reporting entity would or could sell or transfer the asset. In determining the principal market for an asset or liability under ASC Topic 820, it is assumed that the reporting entity has access to such market as of the measurement date. Market participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable and willing and able to transact.

With respect to investments for which market quotations are not readily available, our Board undertakes a multi-step valuation process each quarter, as described below:

- Our quarterly valuation process begins with each portfolio company or investment being initially valued by our Adviser's professionals that are responsible for the portfolio investment;
- Preliminary valuation conclusions are then documented and discussed with our Adviser's senior investment team and approved by the Adviser's executive management team;
- Each quarter, certain of our portfolio companies or investments are reviewed by an independent third-party valuation firm. At least once annually, the valuation for each portfolio investment is reviewed by such an independent third-party valuation firm. However, our Board does not have de minimis investments of less than 1.0% of our gross assets (up to an aggregate of 10% of our gross assets) independently reviewed, given the expenses involved in connection therewith;
- The Valuation Committee of the Board then reviews these preliminary valuations and makes fair value recommendations to the Board; and
- Our Board then discusses valuations and determines the fair value of each investment in our portfolio in good faith, based on the input of our Adviser, the respective independent third-party valuation firms and our Valuation Committee.

Determinations in Connection with our Offerings

In connection with each offering of shares of our common stock, our Board or an authorized committee thereof is required by the 1940 Act to make the determination that we are not selling shares of our common stock at a price below our then-current net asset value at the time at which the sale is made. Our Board or an authorized committee thereof considers the following factors, among others, in making such determination:

- the net asset value of our common stock disclosed in the most recent periodic report we filed with the SEC;
- our management's assessment of whether any material change in the net asset value has occurred (including through the realization of net gains on the sale of our investments) from the period beginning on the date of the most recently disclosed net asset value per share of our common stock and ending as of a time within 48 hours (excluding Sundays and holidays) of the sale of our common stock; and
- the magnitude of the difference between (i) a value that our Board or an authorized committee thereof has determined reflects the current (as of a time within 48 hours, excluding Sundays and holidays) net asset value of our common stock, which is based upon the net asset value disclosed in the most recent periodic report we filed with the SEC, as adjusted to reflect our management's assessment of any material change in the net asset value since the date of the most recently disclosed net asset value, and (ii) the offering price of the shares of our common stock in the proposed offering.

Moreover, to the extent that there is even a remote possibility that we may (i) issue shares of our common stock at a price below the then-current net asset value of our common stock at the time at which the sale is made or (ii) trigger the undertaking (which we provided to the SEC) to suspend the offering of shares of our common stock if the net asset value fluctuates by certain amounts in certain circumstances, our Board or an authorized committee thereof will elect, in the case of clause (i) above, either to postpone the offering until such time that there is no longer the possibility of the occurrence of such event or to undertake to determine net asset value within two days prior to any such sale to ensure that such sale will not be below our then-current net asset value, and, in the case of clause (ii) above, to comply with such undertaking or to undertake to determine net asset value to ensure that such undertaking has not been triggered.

These processes and procedures are part of our compliance policies and procedures. Records are made contemporaneously with all determinations described in this section and these records are maintained with other records we are required to maintain under the 1940 Act.

Material U.S. Federal Income Tax Considerations

Taxation of the Company

We have elected to be treated, and intend to qualify annually, as a RIC under Subchapter M of the Code. As a RIC, we generally do not pay corporate-level U.S. federal income taxes on any ordinary income or capital gains that we timely distribute (or are deemed to timely distribute) to our stockholders as dividends.

To qualify as a RIC, we must, among other things:

- derive in each taxable year at least 90% of our gross income from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, other income derived with respect to our business of investing in stock, securities or currencies, or net income derived from an interest in a “qualified publicly traded partnership,” or “QPTP,” hereinafter the “90% Gross Income Test;” and
- diversify our holdings so that, at the end of each quarter of each taxable year:
 - at least 50% of the value of our total assets is represented by cash and cash items, U.S. Government securities, the securities of other RICs, and other securities, with other securities limited, in respect of any one issuer, to an amount not greater than 5% of the value of our total assets and not more than 10% of the outstanding voting securities of such issuer, and
 - not more than 25% of the value of our total assets is invested in the securities of any issuer (other than U.S. Government securities and the securities of other RICs), the securities of any two or more issuers that we control and that are determined to be engaged in the same business or similar or related trades or businesses, or the securities of one or more QPTPs, hereinafter the “Diversification Tests.”

In the case of a RIC that furnishes capital to development corporations, there is an exception relating to the Diversification Tests described above. This exception is available only to RICs which the SEC determines to be principally engaged in the furnishing of capital to other corporations which are principally engaged in the development or exploitation of inventions, technological improvements, new processes, or products not previously generally available, which we refer to as “SEC Certification.” We have not sought SEC Certification, but we may seek SEC Certification in future years. If we receive SEC Certification, we generally will be entitled to include, in the computation of the 50% value of our assets (described above), the value of any securities of an issuer, whether or not we own more than 10% of the outstanding voting securities of the issuer, if the basis of the securities, when added to our basis of any other securities of the issuer that we own, does not exceed 5% of the value of our total assets.

As a RIC, we (but not our stockholders) generally are not subject to U.S. federal income tax on investment company taxable income and net capital gains that we distribute to our stockholders in any taxable year with respect to which we distribute an amount equal to at least 90% of the sum of our (i) investment company taxable income (which includes, among other items, dividends, interest and the excess of any net realized short-term capital gains over net realized long-term capital losses and other taxable income (other than any net capital gain), reduced by deductible expenses) determined without regard to the deduction for dividends and distributions paid and (ii) net tax-exempt interest income (which is the excess of our gross tax-exempt interest income over certain disallowed deductions), (the “Annual Distribution Requirement”). We intend to distribute annually all or substantially all of such income. Generally, if we fail to meet this Annual Distribution Requirement for any taxable year, we will fail to qualify for tax treatment as a RIC for such taxable year. Although we may meet our Annual Distribution requirement, we will be subject to a nondeductible 4% U.S. federal excise tax on certain of our undistributed income, unless we timely distribute (or are deemed to have timely distributed) an amount equal to the sum of:

- at least 98% of our ordinary income (not taking into account any capital gains or losses) for the calendar year;
- at least 98.2% of the amount by which our capital gains exceed our capital losses (adjusted for certain ordinary losses) for a one-year period generally ending on October 31 of the calendar year (unless an election is made by us to use our taxable year); and
- certain undistributed amounts from previous years on which we paid no U.S. federal income tax.

We are authorized to borrow funds and to sell assets in order to satisfy distribution requirements. However, under the 1940 Act, we are not permitted to make distributions to our stockholders while any senior securities are outstanding unless we meet the applicable asset coverage ratios. See “—Regulation—Senior Securities.” Moreover, our ability to dispose of assets to meet our distribution requirements may be limited by (1) the illiquid nature of our portfolio and/or (2) other requirements relating to our status as a RIC, including the Diversification Tests. If we dispose of assets in order to meet the Annual Distribution Requirement or to avoid the 4% U.S. federal excise tax, we may make such dispositions at times that, from an investment standpoint, are not advantageous.

A RIC is limited in its ability to deduct expenses in excess of its “investment company taxable income” (which is, generally, ordinary income plus the excess of net short-term capital gains over net long-term capital losses). If our expenses in a given year exceed investment company taxable income, we would experience a net operating loss for that year. However, a RIC is not permitted to carry forward net operating losses to subsequent years. In addition, expenses can be used only to offset investment company taxable income, not net capital gain. Due to these limits on the deductibility of expenses, we may for tax purposes have aggregate taxable income for several years that we are required to distribute and that is taxable to our stockholders even if such income is greater than the aggregate net income we actually earned during those years. Such required distributions may be made from our cash assets or by liquidation of investments, if necessary. We may realize gains or losses from such liquidations. In the event we realize net capital gains from such transactions, you may receive a larger capital gain distribution than you would have received in the absence of such transactions.

Taxation of Company Investments

Certain of our investment practices are subject to special and complex U.S. federal income tax provisions that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions, including the dividends received deduction, (ii) convert lower taxed long-term capital gains and qualified dividend income into higher taxed short-term capital gains or ordinary income, (iii) convert ordinary loss or a deduction into capital loss (the deductibility of which is more limited), (iv) cause us to recognize income or gain without a corresponding receipt of cash, (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur, (vi) adversely alter the characterization of certain complex financial transactions and (vii) produce income that will not qualify as good income for purposes of the 90% Gross Income Test. We monitor our transactions and may make certain tax elections and may be required to borrow money or dispose of securities to mitigate the effect of these rules and to prevent disqualification of us as a RIC but there can be no assurance that we will be successful in this regard.

Debt Instruments

In certain circumstances, we may be required to recognize taxable income prior to which we receive cash. For example, if we hold debt instruments that are treated under applicable tax rules as having OID (such as debt instruments with an end-of-term payment and/or PIK interest payment or, in certain cases, increasing interest rates or issued with warrant investments), we must include in taxable income each year a portion of the OID that accrues over the life of the obligation, regardless of whether cash representing such income is received by us in the same taxable year. We may also have to include in income other amounts that we have not yet received in cash, such as PIK interest, deferred loan origination fees that are paid after origination of the loan or are paid in non-cash compensation such as warrant investments or stock, or certain income with respect to equity investments in foreign corporations. Because any OID or other amounts accrued will be included in our investment company taxable income for the year of accrual, we may be required to make a distribution to our stockholders in order to satisfy the Annual Distribution Requirement and to avoid the 4% U.S. federal excise tax, even though we will not have received any corresponding cash amount.

Warrant Investments

Gain or loss realized by us from the sale or exchange of warrant investments acquired by us as well as any loss attributable to the lapse of such warrant investments generally are treated as capital gain or loss. The treatment of such gain or loss as long-term or short-term generally depends on how long we held a particular warrant.

Foreign Investments

In the event we invest in foreign securities, we may be subject to withholding and other foreign taxes with respect to those securities. We do not expect to satisfy the requirement to pass through to our stockholders their share of the foreign taxes paid by us.

Passive Foreign Investment Companies

We may invest in the stock of a foreign corporation which is classified as a “passive foreign investment company” (within the meaning of Section 1297 of the Code), or “PFIC.” In general, unless a special tax election has been made, we are required to pay tax at ordinary income rates on any gains and “excess distributions” with respect to PFIC stock as if such items had been realized ratably over the period during which we held the PFIC stock, plus an interest charge. Certain adverse tax consequences of a PFIC investment may be limited if we are eligible to elect alternative tax treatment with respect to such investment. No assurances can be given that any such election will be available or that, if available, we will make such an election. Additionally, even if we make any such election, the U.S. Treasury Department and Internal Revenue Service (“IRS”) have issued proposed regulations that provide that the income inclusion resulting from the election will not be considered qualifying income for purposes of the 90% Gross Income Test unless we receive a cash distribution from the PFIC during the same year. These regulations, if finalized, could make it more difficult to qualify as a RIC if we invest in PFICs and elect the alternative tax treatment with respect to those entities.

Foreign Currency Transactions

Under the Code, gains or losses attributable to fluctuations in exchange rates which occur between the time we accrue income or other receivables or accrue expenses or other liabilities denominated in a foreign currency and the time we actually collect such receivables or pay such liabilities generally are treated as ordinary income or loss. Similarly, on disposition of debt instruments and certain other instruments denominated in a foreign currency, gains or losses attributable to fluctuations in the value of the foreign currency between the date of acquisition of the instrument and the date of disposition also are treated as ordinary income or loss. These currency fluctuations related gains and losses may increase or decrease the amount of our investment company taxable income to be distributed to our stockholders as ordinary income.

Failure to Qualify as a RIC

If we were unable to qualify for treatment as a RIC, and if certain cure provisions described below are not available, we would be subject to tax on all of our taxable income (including our net capital gains) at regular corporate rates. We would not be able to deduct distributions to stockholders, nor would they be required to be made. Distributions, including distributions of net long-term capital gain, would generally be taxable to our stockholders as ordinary dividend income to the extent of our current and accumulated earnings and profits. Subject to certain limitations under the Code, corporate stockholders would be eligible to claim a dividend received deduction with respect to such dividend; non-corporate stockholders would generally be able to treat such dividends as “qualified dividend income,” which is subject to reduced rates of U.S. federal income tax. Distributions in excess of our current and accumulated earnings and profits would be treated first as a return of capital to the extent of the stockholder’s tax basis, and any remaining distributions would be treated as a capital gain. If we fail to qualify as a RIC for a period greater than two taxable years, to qualify as a RIC in a subsequent year we may be subject to regular corporate tax on any net built-in gains with respect to certain of our assets (i.e., the excess of the aggregate gains, including items of income, over aggregate losses that would have been realized with respect to such assets if we had been liquidated) that we elect to recognize on requalification or when recognized over the next five years.

Regulation

We are regulated as a BDC under the 1940 Act. The 1940 Act contains prohibitions and restrictions relating to transactions between BDCs and their affiliates (including any investment advisers), principal underwriters and affiliates of those affiliates and requires that a majority of the directors of a BDC be persons other than “interested persons,” as that term is defined in the 1940 Act. In addition, the 1940 Act provides that we may not change the nature of our business so as to cease to be, or withdraw our election as, a BDC without the approval of a majority of our outstanding voting securities.

We do not intend to acquire securities issued by any investment company in excess of the limits imposed by the 1940 Act. Under these current limits, we generally cannot acquire more than 3% of the voting stock of any registered investment company or BDC, invest more than 5% of the value of our total assets in the securities of one registered investment company or BDC, or invest more than 10% of the value of our total assets in the securities of registered investment companies and BDCs.

We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock at a price below then-current net asset value per share of our common stock if our Board determines that such sale is in our best interests, and if our stockholders approve such sale. In any such case, the price at which our securities are to be issued and sold may not be less than a price that, in the determination of our Board, closely approximates the market value of such securities (less any distributing commission or discount). If we raise additional funds by issuing common stock or senior securities convertible into, or exchangeable for, our common stock, then the percentage ownership of our stockholders at that time will decrease and you may experience dilution.

At our 2018 Annual Stockholders Meeting, our stockholders authorized our ability to issue options, warrants or rights to subscribe to, convert to, or purchase shares of our common stock, which may include convertible preferred stock and convertible debentures, under appropriate circumstances in connection with our capital raising and financing activities, subject to applicable restrictions under the 1940 Act (including, without limitation, that at the date of issuance of the options, warrants or rights, (i) the number of shares that would result from the exercise or conversion of all of the Company’s options, warrants or rights to subscribe to, convert to, or purchase our common stock does not exceed 25% of our then-outstanding shares, and (2) the exercise or conversion price thereof is not less than the market value per share of our common stock). Such authorization has no expiration.

Qualifying Assets

Under the 1940 Act, a BDC may not acquire any asset other than assets of the type listed in Section 55(a) of the 1940 Act, which are referred to as “qualifying assets,” unless, at the time the acquisition is made, qualifying assets represent at least 70% of the BDC’s total assets. The principal categories of qualifying assets that are applicable to us are the following:

- (1) securities purchased in transactions not involving any public offering from the issuer of such securities, which issuer (subject to certain limited exceptions) is an eligible portfolio company, or from any person who is, or has been during the preceding 13 months, an affiliated person of an eligible portfolio company, or from any other person, subject to such rules as may be prescribed by the SEC. An “eligible portfolio company” is defined in the 1940 Act as any issuer that:
 - is organized under the laws of, and has its principal place of business in, the United States;
 - is not an investment company (other than a small business investment company wholly owned by the BDC) or a company that would be an investment company but for certain exclusions under the 1940 Act; and
 - satisfies either of the following:
 - i. does not have any class of securities listed on a national securities exchange or has any class of securities listed on a national securities exchange subject to a \$250 million market capitalization maximum; or
 - ii. is controlled by a BDC or a group of companies including a BDC, the BDC actually exercises a controlling influence over the management or policies of the eligible portfolio company, and, as a result, the BDC has an affiliated person who is a director of the eligible portfolio company.

- (2) securities purchased in a private transaction from a U.S. issuer that is not an investment company or from an affiliated person of the issuer, or in transactions incident to such a private transaction, if the issuer is in bankruptcy and subject to reorganization or if the issuer, immediately prior to the purchase of its securities, was unable to meet its obligations as they came due without material assistance other than conventional lending or financing arrangements.
- (3) securities received in exchange for or distributed on or with respect to securities described above, or pursuant to the exercise of warrant investments or rights relating to such securities.
- (4) cash, cash equivalents, U.S. government securities or high-quality debt securities that mature in one year or less from the date of investment.

The regulations defining and interpreting qualifying assets may change over time. We may adjust our investment focus as needed to comply with and/or take advantage of any regulatory, legislative, administrative or judicial actions in this area.

We generally look through our subsidiaries to the underlying holdings (considered together with portfolio assets held outside of our subsidiaries) for purposes of determining compliance with the 70% qualifying assets requirement of the 1940 Act. On a consolidated basis, we expect that at least 70% of our assets will be eligible assets.

Under Section 55(b) of the 1940 Act, the value of a BDC's assets shall be determined as of the date of the most recent financial statements filed by such company with the SEC pursuant to Section 13 of the 1934 Act, and shall be determined no less frequently than annually.

Managerial Assistance to Portfolio Companies

BDCs generally must offer, and must provide upon request, significant managerial assistance to certain of their portfolio companies, except in circumstances where either (i) the BDC controls such issuer of securities or (ii) the BDC purchases such securities in conjunction with one or more other persons acting together and one of the other persons in the group makes available such managerial assistance. Making available managerial assistance means any arrangement whereby the BDC, through its directors, officers or employees, offers to provide, and, if accepted, does so provide, significant guidance and counsel concerning the management, operations or business objectives and policies of a portfolio company. The Administrator may provide all or a portion of this assistance pursuant to the Administration Agreement, the costs of which will be reimbursed by us at cost. We may receive fees for these services.

Temporary Investments

Pending investment in other types of qualifying assets, as described above, our investments may consist of cash, cash equivalents, U.S. government securities, repurchase agreements and high-quality debt investments that mature in one year or less from the date of investment, which we refer to, collectively, as "temporary investments," so that 70% of our assets are qualifying assets or temporary investments. Typically, we invest in U.S. Treasury bills or in repurchase agreements, so long as the agreements are fully collateralized by cash or securities issued by the U.S. government or its agencies. A repurchase agreement involves the purchase by an investor, such as us, of a specified security and the simultaneous agreement by the seller to repurchase it at an agreed-upon future date and at a price that is greater than the purchase price by an amount that reflects an agreed-upon interest rate. There is no percentage restriction on the proportion of our assets that may be invested in such repurchase agreements. However, if more than 25% of our total assets constitute repurchase agreements from a single counterparty, we would not meet the "Diversification Tests," in order to qualify as a RIC for U.S. federal income tax purposes. Accordingly, we do not intend to enter into repurchase agreements with a single counterparty in excess of this limit. Our Adviser monitors the creditworthiness of any counterparties with which we enter into repurchase agreement transactions.

Senior Securities

The Small Business Credit Availability Act ("SBCAA"), which was signed into law in March 2018, among other things, amended Section 61(a) of the 1940 Act to add a provision that reduces the asset coverage requirement applicable BDCs from 200% to 150% so long as the BDC meets certain disclosure requirements and obtains certain approvals. On April 24, 2018, the Board unanimously approved the application of the modified asset coverage requirements set forth in Section 61(a) of 1940 Act. In addition, at a special meeting of stockholders held on June 21, 2018, our stockholders approved the application of the 150% minimum asset coverage requirements under the 1940 Act, and we became subject to the 150% minimum asset coverage ratio effective June 22, 2018. Thus, we are permitted, under specified conditions, to issue multiple classes of debt and one class of stock senior to our common stock if our asset coverage, as defined in the 1940 Act, is at least equal to 150% immediately after each such issuance. As of December 31, 2020, the Company's asset coverage for borrowed amounts was 252%.

In addition, while any senior securities remain outstanding, we generally must make provisions to prohibit any cash distribution to our stockholders or the repurchase of such securities or shares unless we meet the applicable asset coverage ratios after deducting the amount of the distribution or repurchase. We may also borrow amounts up to 5% of the value of our total assets for temporary purposes without regard to asset coverage. We consolidate our financial results with all of our wholly owned subsidiaries for financial reporting purposes and measure our compliance with the leverage test applicable to BDCs under the 1940 Act on a consolidated basis. For a discussion of the risks associated with leverage, see "Risk Factors-Risks Relating to our Business and Structure-Regulations governing our operation as a BDC affect our ability to, and the way in which we, raise additional capital. As a BDC, the necessity of raising additional capital may expose us to risks, including the typical risks associated with leverage. The net asset value per share of our common stock may be diluted if we issue or sell securities to subscribe for or convertible into shares of our common stock."

Codes of Ethics

We and our Adviser have adopted a joint code of ethics pursuant to Rule 17j-1 under the 1940 Act and Rule 204A-1 under the Advisers Act that establishes procedures for personal investments and restricts certain personal securities transactions. Personnel subject to the code may invest in securities for their personal investment accounts, including securities that may be purchased or held by us, so long as such investments are made in accordance with the code's requirements. The joint code of ethics is available free of charge on our website at www.tpv.com and on the EDGAR Database on the SEC's website at <http://www.sec.gov>.

Proxy Voting Policies and Procedures

We have delegated our proxy voting responsibility to our Adviser. The proxy voting policies and procedures of our Adviser are set out below. The guidelines are reviewed periodically by our Adviser and our directors who are not "interested persons," and, accordingly, are subject to change.

Introduction

As an investment adviser registered under the Advisers Act, our Adviser has a fiduciary duty to act solely in our best interests. As part of this duty, our Adviser recognizes that it must vote our securities in a timely manner free of conflicts of interest and in our best interests.

Our Adviser's policies and procedures for voting proxies for its investment advisory clients are intended to comply with Section 206 of, and Rule 206(4)-6 under, the Advisers Act.

Proxy Policies

Our Adviser votes proxies relating to any of our portfolio equity securities in what it perceives to be the best interest of our stockholders. Our Adviser reviews on a case-by-case basis each proposal submitted to a stockholder vote to determine its effect on any of the portfolio equity securities we hold. In most cases our Adviser will vote in favor of proposals that our Adviser believes are likely to increase the value of any of the portfolio equity securities we hold. Although our Adviser generally votes against proposals that may have a negative effect on any of our portfolio equity securities, our Adviser may vote for such a proposal if there exist compelling long-term reasons to do so.

Our proxy voting decisions are made by our Adviser's senior investment team. To ensure that our Adviser's vote is not the product of a conflict of interest, our Adviser requires that (1) anyone involved in the decision-making process disclose to our Chief Compliance Officer any potential conflict that he or she is aware of and any contact that he or she has had with any interested party regarding a proxy vote and (2) employees involved in the decision-making process or vote administration are prohibited from revealing how our Adviser intends to vote on a proposal in order to reduce any attempted influence from interested parties. Where conflicts of interest may be present, our Adviser discloses such conflicts to us, including our independent directors and may request guidance from us on how to vote such proxies.

Proxy Voting Records

You may obtain information without charge about how our Adviser voted proxies by making a written request for proxy voting information to: 2755 Sand Hill Road, Suite 150, Menlo Park, California 94025, Attention: Investor Relations.

Privacy Principles

We are committed to maintaining the privacy of our stockholders and to safeguarding their nonpublic personal information. The following information is provided to help you understand what personal information we collect, how we protect that information and why, in certain cases, we may share information with select other parties.

Generally, we do not receive any nonpublic personal information relating to our stockholders, although certain nonpublic personal information of our stockholders may become available to us. We do not disclose any nonpublic personal information about our stockholders or former stockholders to anyone, except as permitted by law or as are necessary in order to service stockholder accounts (for example, to a transfer agent or third-party administrator).

We restrict access to nonpublic personal information about our stockholders to employees of our Adviser and its affiliates with a legitimate business need for the information. We maintain physical, electronic and procedural safeguards designed to protect the nonpublic personal information of our stockholders.

Other

Under the 1940 Act, we are required to provide and maintain a bond issued by a reputable fidelity insurance company to protect us against larceny and embezzlement. Furthermore, as a BDC, we are prohibited from protecting any director or officer against any liability to us or our stockholders arising from willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of such person's office.

We and our Adviser are each required to adopt and implement written policies and procedures reasonably designed to prevent violation of relevant federal securities laws, review these policies and procedures annually for their adequacy and the effectiveness of their implementation, and designate a Chief Compliance Officer to be responsible for administering these policies and procedures.

We are prohibited under the 1940 Act from participating in certain transactions with our affiliates without the prior approval of our independent directors and, in some cases, the SEC. Any person that owns, directly or indirectly, 5% or more of our outstanding voting securities will be our affiliate for purposes of the 1940 Act and we are generally prohibited from buying or selling any security from or to such affiliate without the prior approval of our independent directors. The 1940 Act also prohibits certain “joint” transactions with certain of our affiliates, which could include concurrent investments in the same company, without prior approval of our independent directors and, in some cases, the SEC. We are prohibited from buying or selling any security from or to any person that controls us or who owns more than 25% of our voting securities and certain of that person’s affiliates, or entering into prohibited joint transactions with such persons, absent the prior approval of the SEC. As a result of these restrictions, we may be prohibited from buying or selling any security (other than any security of which we are the issuer) from or to any company that is advised or managed by TPC, our Adviser or their affiliates without the prior approval of the SEC, which may limit the scope of investment opportunities that would otherwise be available to us.

We may co-invest with TPC and/or investment funds, accounts and vehicles managed by TPC or its affiliates where doing so is consistent with our investment strategy as well as applicable law and SEC staff interpretations. We generally are only permitted to co-invest with TPC and/or such investment funds, accounts and vehicles where the only term that is negotiated is price. However, on March 28, 2018, we, TPC and our Adviser received an exemptive order (the “Exemptive Order”) from the SEC, which permits greater flexibility to negotiate the terms of co-investments with TPC and/or investment funds, accounts and investment vehicles managed by TPC or its affiliates in a manner consistent with our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors. Pursuant to the Exemptive Order, we are permitted to co-invest with our affiliates if a “required majority” (as defined in Section 57(o) of the 1940 Act) of our independent directors make certain conclusions in connection with a co-investment transaction, including, but not limited to, that (1) the terms of the potential co-investment transaction, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching in respect of us or our stockholders on the part of any person concerned, and (2) the potential co-investment transaction is consistent with the interests of our stockholders and is consistent with our then-current investment objective and strategies.

Sarbanes-Oxley Act

The Sarbanes-Oxley Act of 2002, as amended, or the “Sarbanes-Oxley Act,” imposes a wide variety of regulatory requirements on publicly held companies and their insiders. Many of these requirements affect us. For example:

- (1) pursuant to Rule 13a-14 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) our principal executive officer and principal financial officer must certify the accuracy of the financial statements contained in our periodic reports;
- (2) pursuant to Item 307 under Regulation S-K, our periodic reports must disclose our conclusions about the effectiveness of our disclosure controls and procedures;
- (3) pursuant to Rule 13a-15 under the Exchange Act, our management must prepare an annual report regarding its assessment of our internal control over financial reporting and, to the extent that we are a “large accelerated filer” or an “accelerated filer” under Rule 12b-2 under the Exchange Act, must obtain an audit of the effectiveness of internal control over financial reporting performed by our independent registered public accounting firm; and
- (4) pursuant to Item 308 of Regulation S-K and Rule 13a-15 under the Exchange Act, our periodic reports must disclose whether there were significant changes in our internal control over financial reporting or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

The Sarbanes-Oxley Act requires us to review our current policies and procedures to determine whether we comply with the Sarbanes-Oxley Act and the regulations promulgated under such act. We continue to monitor our compliance with all regulations that are adopted under the Sarbanes-Oxley Act and will take actions necessary to ensure that we comply with that act.

Corporate Governance Regulations

The NYSE has adopted corporate governance regulations that listed companies must comply with. We are in compliance with these corporate governance listing standards. We monitor our compliance with all future listing standards and take all necessary actions to ensure that we are in compliance therewith.

Available Information

Our address is 2755 Sand Hill Road, Suite 150, Menlo Park, CA 94025. Our phone number is (650) 854-2090 and our internet website is at www.tpv.com. We make available free of charge on our website our proxy statement, annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports as soon as reasonably practical after we electronically file such material with, or furnish it to, the SEC. Information contained on our website is not incorporated by reference into this Annual Report on Form 10-K and you should not consider information contained on our website to be part of this Annual Report on Form 10-K or any other report we file with the SEC.

Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports and other public filings are also available free of charge on the EDGAR Database on the SEC’s Web site at <http://www.sec.gov>.

Item 1A. Risk Factors

You should carefully consider these risk factors, together with all of the other information included in this Annual Report on Form 10-K and other reports and documents filed by us with the SEC. The risks set out below are not the only risks we face. Additional risks and uncertainties not presently known to us or not presently deemed material by us may also impair our operations and performance. If any of the following events occur, our financial condition, results of operations and cash flows could be materially and adversely affected. In such case, our net asset value and the trading price of our common stock could decline and you may lose all or part of your investment. The risk factors presented below are those we believe to be the principal risk factors associated with our Company given our investment objectives, investment policies and capital structure.

The following is a summary of the principal risk factors associated with an investment in the Company. Further details regarding each risk included in the below summary list can be found further below.

- We are dependent upon our executive officers and our Adviser's senior investment team and members of its Investment Committee, in particular, Messrs. Labe and Srivastava, for our success and upon our Adviser's access to such individuals pursuant to the Staffing Agreement. If our Adviser were to lose such access, our ability to achieve our investment objective could be significantly harmed.
- Our business model depends, in part, upon TPC's relationships with a select group of leading venture capital investors. Any inability of TPC to maintain or develop these relationships, or the failure of these relationships to result in referrals of investment opportunities for us, could have a material adverse effect on our business.
- We operate in a highly competitive market for investment opportunities and we may not be able to compete effectively.
- Regulations governing our operation as a BDC affect our ability to, and the way in which we, raise additional capital. As a BDC, the necessity of raising additional capital may expose us to risks, including the typical risks associated with leverage. The net asset value per share of our common stock may be diluted if we issue or sell securities to subscribe for or convertible into shares of our common stock.
- We finance certain of our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and increases the risk of investing in us.
- We may default under the Credit Facility, the 2022 Notes or the 2025 Notes or any future indebtedness or be unable to amend, repay or refinance any such facility or financing arrangement on commercially reasonable terms, or at all, which could have a material adverse effect on our financial condition, results of operations and cash flows.
- Because we use debt to finance certain of our investments, if market interest rates were to increase, our cost of capital could increase, which could reduce our net income. In addition, if the Credit Facility were to become unavailable, it could have a material adverse effect on our business, financial condition and results of operations.
- Our investment portfolio is recorded at fair value, with our Board having final responsibility for overseeing, reviewing and approving, in good faith, its estimate of fair value and, as a result, there is uncertainty as to the value of our portfolio investments, which may impact our net asset value.
- Our ability to enter into transactions with our affiliates and to make investments in venture growth stage companies along with our affiliates is restricted by the 1940 Act which may limit the scope of investment opportunities available to us.
- The advisory fee structure we have with our Adviser may create incentives that are not fully aligned with the interests of our stockholders.
- Our investments are concentrated in technology, life sciences and other high growth industries, including clean technology, some of which are subject to extensive government regulation, which exposes us to the risk of significant loss if any of these industry sectors experiences a downturn.
- Our investment strategy includes a primary focus on venture growth stage companies, which are subject to many risks, including dependence on the need to raise additional capital, volatility, intense competition, shortened product life cycles, changes in regulatory and governmental programs, periodic downturns, and below investment grade ratings, which could cause you to lose all or part of your investment in us.
- Our existing and/or future portfolio companies may not draw on any of our unfunded obligations or may draw our outstanding unfunded obligations at a time when our capital is not readily available.
- If the assets securing the loans that we make decrease in value, then we may lack sufficient collateral to cover losses.
- Our portfolio companies may have limited operating histories and financial resources.
- The lack of liquidity in our investments may materially and adversely affect our ability to meet our investment objectives.
- Prepayments of our loans could have a material adverse impact on our results of operations and our ability to make stockholder distributions, increase the risk of violating 1940 Act provisions applicable to BDCs and breaching covenants under our borrowing arrangements, and could result in a decline in the market price of our shares.
- Our common stock may trade below our net asset value per share, which limits our ability to raise additional equity capital.

- The market price of our common stock may fluctuate significantly.
- Global capital markets could enter a period of severe disruption and instability or an economic recession. These conditions have historically affected and could again materially and adversely affect debt and equity capital markets in the United States and around the world and could impair our portfolio companies and harm our operating results.
- Events outside of our control, including relating to public health crises, could negatively affect our portfolio companies' and our results of operations and financial condition, as well as the amount or frequency of our distributions to stockholders.

Risks Relating to our Business and Structure

Deterioration in the economy and financial markets increases the likelihood of adverse effects on our financial position and results of operations. Such economic adversity could impair our portfolio companies' financial positions and operating results and affect the industries in which we invest, which could, in turn, harm our operating results.

The broader fundamentals of the United States economy remain mixed. In the event that the United States economy contracts, it is likely that the financial results of venture growth stage companies, like those in which we invest, could experience deterioration or limited growth from current levels, which could ultimately lead to difficulty in meeting their debt service requirements and an increase in defaults. Consequently, we can provide no assurance that the performance of certain portfolio companies will not be negatively impacted by economic cycles, industry cycles or other conditions, which could also have a negative impact on our future results.

Although we have been able to secure access to additional liquidity, including through the Credit Facility, public debt issuances and equity offerings, the potential for volatility in the debt and equity capital markets provides no assurance that debt or equity capital will be available to us in the future on favorable terms, or at all. Further, if the price of our common stock falls below our net asset value per share, we will be limited in our ability to sell new shares if we do not have stockholder authorization to sell shares at a price below net asset value per share. We did not seek stockholder authorization to sell shares of our common stock below the then-current net asset value per share of our common stock at our 2020 annual meeting of stockholders and do not intend to seek such authorization at our 2021 annual meeting of stockholders.

A failure on our part to maintain our status as a BDC may significantly reduce our operating flexibility.

If we fail to maintain our status as a BDC, we might be regulated as a closed-end investment company that is required to register under the 1940 Act, which would subject us to additional regulatory restrictions and significantly decrease our operating flexibility. In addition, any such failure could cause an event of default under our outstanding indebtedness, which could have a material adverse effect on our business, financial condition or results of operations.

We are dependent upon our executive officers and our Adviser's senior investment team and members of its Investment Committee, in particular, Messrs. Labe and Srivastava, for our success and upon our Adviser's access to such individuals pursuant to the Staffing Agreement. If our Adviser were to lose such access, our ability to achieve our investment objective could be significantly harmed.

Our Adviser has entered into the Staffing Agreement with TPC. Pursuant to the Staffing Agreement, TPC has made and will continue to make, subject to the terms of the Staffing Agreement, its investment and portfolio management and monitoring teams available to our Adviser. We believe that the Staffing Agreement (i) provides us with access to deal flow generated by TPC in the ordinary course of its business; (ii) provides us with access to TPC's investment professionals, including its senior investment team led by Messrs. Labe and Srivastava, and TPC's non-investment employees; and (iii) commits certain key senior members of TPC's Investment Committee to serve as members of our Adviser's Investment Committee. Under the Staffing Agreement, TPC is required to make the Adviser aware of any financings that TPC evaluates, originates, or in which TPC participates, and the Adviser is responsible for allocating the investment opportunities among its affiliates fairly and equitably over time in accordance with its allocation policy. We depend on the diligence, skill and network of business contacts of our Adviser's senior investment team and our executive officers to achieve our investment objective. We cannot assure you that TPC will fulfill its obligations under the Staffing Agreement or its allocation policy. Further, the Staffing Agreement may be terminated with 60 days' prior written notice, and we cannot assure you that the Staffing Agreement will not be terminated by TPC or that our Adviser will continue to have access to the professionals and Investment Committee of TPC or its information and deal flow. The loss of any such access would limit our ability to achieve our investment objective and operate as we anticipate. This could have a material adverse effect on our financial condition, results of operations and cash flows.

Our business model depends, in part, upon TPC's relationships with a select group of leading venture capital investors. Any inability of TPC to maintain or develop these relationships, or the failure of these relationships to result in referrals of investment opportunities for us, could have a material adverse effect on our business.

We depend, in part, upon TPC to maintain industry relationships, including with a select group of leading venture capital investors, and we utilize these relationships to source and identify potential investment opportunities, although this group of leading venture capital investors, which may be modified from time to time, is not obligated to provide us with referrals for investment opportunities. If TPC fails to maintain or develop such relationships, or if we fall out of favor with such venture capital investors, it could decrease our access to these investors or their support and we may not be able to grow our investment portfolio. We can offer no assurance that these relationships will result in any investment opportunities for us in the future. In addition, any harm to the reputation of TPC and/or its select group of leading

venture capital investors or their relationships could decrease our deal flow and the outlook of our investments which could have a material adverse effect on our financial condition, results of operations and cash flows.

Our success depends on the ability of TPC and our Adviser to attract and retain qualified personnel in a competitive environment.

Our growth requires that TPC and our Adviser retain and attract new investment and administrative personnel in a competitive market. Their ability to attract and retain personnel with the requisite credentials, experience and skills depends on several factors including, but not limited to, their and our reputations and their ability to offer competitive wages, benefits and professional growth opportunities. Many of the entities with whom TPC and our Adviser compete for experienced personnel, including investment funds, have greater resources than they have.

We may not replicate the historical results achieved by TPC or members of its senior investment team.

Our focus in making investments differs from that of TPC. For example, while TPC's portfolio consists primarily of providing financing to venture capital-backed companies across all stages of their development, including the venture growth stage, we pursue an investment strategy that is focused primarily on the venture growth stage. The profile and underwriting characteristics of an early stage venture capital-backed company are very different from those of a later stage venture capital-backed company and/or those of a venture growth stage company. Furthermore, within venture growth stage companies, the uses, structures and value propositions of debt financing vary considerably among companies and industries and require a high degree of venture lending and leasing expertise and technology, life sciences and other high growth industries knowledge, specialization and flexibility from a lender. As a result, we cannot assure you that we will replicate the historical results achieved by TPC or members of its senior investment team and we caution you that our investment returns could be substantially lower than the returns achieved by them in prior periods.

The nature of our approach to our business may lead to volatility and variability from period to period with respect to new originations. Our financial condition and results of operations depends upon our ability to effectively manage credit, deploy capital and grow our business.

Our ability to achieve our investment objective depends on our Adviser's ability to manage our business and to grow our investments and earnings. This depends on our Adviser's ability to identify, invest in and monitor companies that meet our underwriting criteria. Furthermore, our Adviser may choose to slow or accelerate new business originations depending on market conditions, rate of investment of TPC's select group of leading venture capital investors, our Adviser's knowledge, expertise and experience, and other market dynamics. The achievement of our investment objective on a cost-effective basis depends upon our Adviser's execution of our investment process, its ability to provide competent, attentive and efficient services to us and, to a lesser extent, our access to financing on acceptable terms. Accomplishing this result on a cost-effective basis is largely a function of our Adviser's origination capabilities, management of the investment process, ability to provide efficient services and access to financing sources on acceptable terms. Our Adviser's senior investment team also has substantial responsibilities in connection with the management of TPC's investment vehicles and business segments. We caution you that the principals of our Adviser may be called upon to provide and currently do provide significant managerial assistance to portfolio companies and other investment vehicles which are managed by the Adviser. These activities may distract them from servicing new investment opportunities for us or slow our rate of investment. Any failure to manage our business and our future growth effectively could have a material adverse effect on our financial condition, results of operations and cash flows.

We operate in a highly competitive market for investment opportunities and we may not be able to compete effectively.

Our competitors include both existing and newly formed equity and debt focused public and private funds, other BDCs, investment banks, venture-oriented banks, commercial financing companies and, to the extent they provide an alternative form of financing, private equity and hedge funds. One or more of our competitors may have or develop relationships with TPC's select group of leading venture capital investors. We may also be limited in our ability to make an investment pursuant to the restrictions under the 1940 Act to the extent one or more of our affiliates has an existing investment with such obligor. Additionally, many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than us. For example, we believe some of our competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC or to the distribution and other requirements we must satisfy to maintain our ability to be subject to tax as a RIC.

The competitive pressures we face may have a material adverse effect on our financial condition, results of operations and cash flows. We do not compete primarily on the financing terms we offer and believe that some competitors make loans with rates that are comparable or lower than our rates. We may lose some investment opportunities if we do not match our competitors' pricing, terms and structure. However, if we match our competitors' pricing, terms and structure, we may experience decreased net interest income, lower yields and increased risk of credit loss. As a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we may not be able to identify and make investments that are consistent with our investment objective.

We will be subject to corporate-level income tax and may default under the Credit Facility if we are unable to qualify or maintain our qualification and tax treatment as a RIC under Subchapter M of the Code.

To qualify for tax treatment as a RIC under Subchapter M of the Code, we must meet certain source-of-income, asset diversification and distribution requirements. The distribution requirement for a RIC generally is satisfied if we distribute at least 90% of our net ordinary income and net realized short-term capital gains in excess of net realized long-term capital losses, if any, to our stockholders on an annual basis.

Because we incur debt, we are subject to certain asset coverage ratio requirements under the 1940 Act and financial covenants under loan and credit agreements that could, under certain circumstances, restrict us from making distributions necessary to qualify for tax treatment as a RIC. If we are unable to obtain cash from other sources, we may fail to qualify for tax treatment as a RIC and, thus, may be subject to corporate-level income tax and default under applicable covenants under any financing arrangements. To qualify as a RIC, we must also meet certain asset diversification requirements at the end of each calendar quarter. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of our qualification as a RIC. Because most of our investments are in private companies, any such dispositions may be made at disadvantageous prices and may result in substantial losses. If we fail to qualify as a RIC for any reason and become subject to corporate income tax, the resulting corporate income taxes could substantially reduce our net assets, the amount of funds available for distributions to our stockholders and the amount of funds available for new investments.

We may need to raise additional capital to grow. If additional capital is not available or not available on favorable terms, our ability to grow will be impaired.

We may need additional capital to fund new investments or unfunded commitments and grow our portfolio of investments. We intend to access the capital markets periodically to issue debt or equity securities or borrow from financial institutions in order to obtain such additional capital. Unfavorable economic conditions could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. In addition, there may be fewer lenders familiar with, or willing to provide credit to, firms in our industry. The availability of debt from lenders may be more limited than it is for firms that are not in our industry due to the credit profile of our targeted borrowers or the structure and risk profile of our unrated loans. As a result, we may have difficulty raising additional capital in order to fund our loans and grow our business.

In order to maintain our ability to be subject to tax as a RIC, we will be required to distribute at least 90% of our net ordinary income and net realized short-term capital gains in excess of net realized long-term capital losses, if any, to our stockholders. As a result, these earnings will not be available to fund new investments. Under the 1940 Act, we generally are required to meet a coverage ratio of total assets to total borrowings and other senior securities, which includes all of our borrowings and any preferred stock that we may issue in the future, of at least 150%. This requirement limits the amount that we may borrow. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may be required to sell a portion of our investments or sell additional common stock and, depending on the nature of our leverage, to repay a portion of our indebtedness at a time when such sales and repayments may be disadvantageous. In addition, the issuance of additional securities could dilute the percentage ownership of our current stockholders in us. We cannot assure you that debt and equity financing will be available to us on favorable terms, or at all, and debt financings may be restricted by the terms of any of our outstanding borrowings.

In addition, shares of closed-end investment companies have recently traded at discounts to their net asset values. If our common stock trades below its net asset value, we will not be able to issue additional shares of our common stock at its market price without first obtaining the approval for such issuance from our stockholders and our independent directors. If additional funds are not available to us, we could be forced to curtail or cease new lending and investment activities and our net asset value could decline.

A reduction in the availability of new capital or an inability on our part to access the capital markets successfully could limit our ability to grow our business and execute our business strategy fully and could decrease our earnings, if any, which would have a material adverse effect on our financial condition, results of operations and cash flows.

We may have difficulty paying our required distributions if we recognize income before, or without, receiving cash representing such income.

For U.S. federal income tax purposes, in certain circumstances, we may be required to recognize taxable income prior to when we receive cash, such as the accrual of end-of-term payments, PIK, interest payments and/or OID. Our end-of-term payments are contractual and fixed interest payments due at the maturity date of the loan, including upon prepayment, and are generally a fixed percentage of the original principal balance of the loan. OID decreases our loan balance by an amount equal to the cost basis of the upfront warrant investment received and certain capitalized fees we receive in connection with our loan and is recognized by us as non-cash income over the life of the secured loan. Our secured loans generally include an end-of-term payment and/or PIK interest payment. Such payments, which could be significant relative to our overall investment activities are included in income before we receive any corresponding cash payment. We are also required to include in income certain other amounts that we will not receive in cash, including OID.

To the extent OID instruments, such as zero coupon bonds and PIK loans, constitute a significant portion of our income, investors will be exposed to typical risks associated with such income that are required to be included in taxable and accounting income prior to receipt of cash, including the following: (a) the higher interest rates of PIK loans reflect the payment deferral and increased credit risk associated with these instruments, and PIK instruments generally represent a significantly higher credit risk than coupon loans; (b) PIK loans may have unreliable valuations because their accruals require continuing judgments about the collectability of the deferred payments and the value of any associated collateral; (c) an election to defer PIK interest payments by adding them to loan principal increases our gross assets, thus increasing our Adviser's future base management fees, and increases future investment income, thus increasing the Adviser's future income incentive fees at a compounding rate; (d) market prices of zero-coupon or PIK securities are affected to a greater extent by interest rate changes and may be more volatile than securities that pay interest periodically and in cash; (e) because OID income is accrued without any cash being received by us, required cash distributions may have to be paid from offering proceeds or the sale of our assets without investors being given any notice of this fact; (f) the deferral of PIK interest increases the loan-to-value ratio, which is a measure of the riskiness of a loan; (g) even if the accounting conditions for income accrual are met, the borrower could still default when our actual payment is due at the maturity of the loan; (h) OID creates risk of non-refundable cash payments to our Adviser on-cash accruals that may never be realized; and (i) because OID will be

included in our “investment company taxable income” for the year of the accrual, we may be required to make distributions to stockholders to satisfy the Annual Distribution Requirement applicable to RICs, even where we have not received any corresponding cash amount.

Since, in these cases we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirement to distribute at least 90% of our net ordinary income and net realized short-term capital gains in excess of net realized long-term capital losses, if any, to maintain our tax treatment as a RIC and to avoid a 4% U.S. federal excise tax on certain of our undistributed income. In such a case, we may have to sell some of our investments at times we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations to meet these distribution requirements. If we are not able to obtain sufficient cash from other sources, we may fail to qualify for tax treatment as a RIC and thus be subject to corporate-level income tax.

You may not receive distributions or our distributions may not grow over time.

We intend to make distributions on a quarterly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. Our ability to pay distributions might be materially and adversely affected by the impact of one or more of the risks described herein. Due to the asset coverage test applicable to us under the 1940 Act as a BDC, we may be limited in our ability to make distributions. All distributions will be made at the discretion of our Board and will depend on our earnings, financial condition, maintenance of RIC status, compliance with applicable BDC, SBA regulations (when and if applicable) and such other factors as our Board may deem relevant from time to time. We cannot assure you that we will make distributions to our stockholders in the future.

Regulations governing our operation as a BDC affect our ability to, and the way in which we, raise additional capital. As a BDC, the necessity of raising additional capital may expose us to risks, including the typical risks associated with leverage. The net asset value per share of our common stock may be diluted if we issue or sell securities to subscribe for or convertible into shares of our common stock.

We may issue debt securities or preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as “senior securities,” up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we are permitted as a BDC to issue senior securities in amounts such that our asset coverage ratio, as defined in the 1940 Act, equals at least 150% (i.e., the amount of debt may not exceed $66\frac{2}{3}\%$ of the value of our assets) of our gross assets less all liabilities and indebtedness not represented by senior securities, after each issuance of senior securities. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may be required to sell a portion of our investments at a time when such sales may be disadvantageous to us in order to repay a portion of our indebtedness. Also, any amounts that we use to service our indebtedness would not be available for distributions to our common stockholders. To the extent we have senior securities outstanding, we will be exposed to typical risks associated with leverage, including an increased risk of loss.

We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock at a price below then-current net asset value per share of our common stock if our Board determines that such sale is in our best interests, and if our stockholders approve such sale. In any such case, the price at which our securities are to be issued and sold may not be less than a price that, in the determination of our Board, closely approximates the market value of such securities (less any distributing commission or discount). If we raise additional funds by issuing common stock or senior securities convertible into, or exchangeable for, our common stock, then the percentage ownership of our stockholders at that time will decrease and you may experience dilution.

In addition, at our 2018 Annual Stockholders Meeting, our stockholders authorized our ability to issue options, warrants or rights to subscribe to, convert to, or purchase shares of our common stock, which may include convertible preferred stock and convertible debentures, under appropriate circumstances in connection with our capital raising and financing activities, subject to applicable restrictions under the 1940 Act (including, without limitation, that at the date of issuance of the options, warrants or rights, (i) the number of shares that would result from the exercise or conversion of all of the Company’s options, warrants or rights to subscribe to, convert to, or purchase our common stock does not exceed 25% of our then-outstanding shares, and (2) the exercise or conversion price thereof is not less than the market value per share of our common stock). Such authorization has no expiration. We may also use newly issued shares to implement our dividend reinvestment plan, whether our shares are trading at a premium or at a discount to our then-current net asset value per share. Any decision to issue or sell securities to subscribe for or convertible into shares of our common stock would be subject to the determination by our board of directors that such issuance or sale is in our and our stockholders’ best interests. If we issue warrants or securities to subscribe for or convertible into shares of our common stock, subject to certain limitations, the exercise or conversion price per share at the time of exercise or conversion could be less than the net asset value per share of our common stock at the time of exercise or conversion, and because we would incur expenses in connection with any such issuance of options, warrants or convertible debt, such exercise or conversion could result in a dilution of net asset value per share of our common stock at the time of such exercise. Any exercise of options, warrants or securities to subscribe for or convertible into shares of our common stock at an exercise or conversion price that is below net asset value at the time of such exercise or conversion, would result in an immediate dilution to our then-existing common stockholders. This dilution would include reduction in net asset value as a result of the proportionately greater decrease in a stockholder’s interest in our earnings and assets and voting interests in us than the increase in our assets resulting from such issuance.

Previously enacted legislation allows us to incur additional leverage.

The 1940 Act generally prohibits us from incurring indebtedness unless immediately after such borrowing we have an asset coverage for total borrowings of at least 200% (i.e., the amount of debt may not exceed 50% of the value of our assets). However, the SBCAA, signed into law in March 2018, modified the 1940 Act by allowing a BDC to increase the maximum amount of leverage it may incur by lowering the required asset coverage ratio of 200% to an asset coverage ratio of 150% (i.e., the amount of debt may not exceed 66²/₃% of the value of our assets), if certain requirements are met. On April 24, 2018, the Board unanimously approved the application of the modified asset coverage requirements set forth in Section 61(a) of 1940 Act. In addition, at a special meeting of stockholders held on June 21, 2018, our stockholders approved the application of the 150% minimum asset coverage requirements under the 1940 Act, and we became subject to the 150% minimum asset coverage ratio effective June 22, 2018. Thus, we are permitted, under specified conditions, to issue multiple classes of debt and one class of stock senior to our common stock if our asset coverage, as defined in the 1940 Act, is at least equal to 150% immediately after each such issuance. As of December 31, 2020, the Company's asset coverage for borrowed amounts was 252%.

Incurring additional leverage could increase the risk of investing in the Company. The use of leverage may increase the likelihood of our defaulting on our obligations.

Leverage magnifies the potential for loss on investments in our indebtedness and on invested equity capital. As we use leverage to partially finance our investments, you will experience increased risks of investing in our securities. If the value of our assets increases, then leveraging would cause the net asset value attributable to our common stock to increase more sharply than it would have had we not leveraged. Conversely, if the value of our assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged our business. Similarly, any increase in our income in excess of interest payable on the borrowed funds would cause our net investment income to increase more than it would without the leverage, while any decrease in our income would cause net investment income to decline more sharply than it would have had we not borrowed. Such a decline could negatively affect our ability to pay common stock dividends, scheduled debt payments or other payments related to our securities. The effects of leverage would cause any decrease in net asset value for any losses to be greater than any increase in net asset value for any corresponding gains. We are permitted, as a BDC, to issue senior securities only in amounts such that our asset coverage, as defined in the 1940 Act, equals at least 150% after each issuance of senior securities. If we incur additional leverage, you will experience increased risks of investing in our common stock. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor the holders of our common stock or of securities convertible into our common stock or warrant investments representing rights to purchase our common stock or securities convertible into our common stock.

We finance certain of our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and increases the risk of investing in us.

We finance certain of our investments with borrowed money when we expect the return on our investment to exceed the cost of borrowing. As of December 31, 2020, we had \$118.0 million of principal outstanding under the Credit Facility, \$74.8 million of principal outstanding on our 5.75% notes due 2022 (the "2022 Notes") and \$70.0 million of principal outstanding on our 4.50% notes due 2025 (the "2025 Notes"), before reducing the unamortized debt issuance costs. The use of leverage magnifies the potential for gain or loss on amounts invested. The use of leverage is generally considered a speculative investment technique and increases the risks associated with investing in shares of our common stock. Lenders will have fixed dollar claims on our assets that are superior to the claims of our common stockholders and we would expect such lenders to seek recovery against our assets in the event of a default. We may pledge up to 100% of our assets or the assets of a subsidiary under the terms of any debt instruments we may enter into with lenders. In addition, under the terms of the Credit Facility and any borrowing facility or other debt instrument we may enter into in the future, we are or will likely be required to use the net proceeds of any investments that we sell to repay a portion of the amount borrowed under such facility or instrument before applying such net proceeds to any other uses. If the value of our assets decreases, leveraging would cause our net asset value to decline more sharply than it otherwise would have had we not leveraged, thereby magnifying losses, potentially triggering mandatory debt payments or asset contributions under the Credit Facility or eliminating our stake in a leveraged investment. Similarly, any decrease in our revenue or income will cause our net income to decline more sharply than it would have had we not borrowed. Such a decline would also negatively affect our ability to make distributions with respect to our common stock. Our ability to service any debt depends largely on our financial performance and is subject to prevailing economic conditions and competitive pressures.

As a BDC, we generally are required to meet a coverage ratio of total assets to total borrowings and other senior securities, which include all of our borrowings (other than potential leverage in future Small Business Investment Company, or "SBIC," subsidiaries, should we receive an SBIC license(s), subject to exemptive relief) and any preferred stock that we may issue in the future, of at least 150%. If our asset coverage ratio declines below 150%, we will not be able to incur additional debt and could be required to sell a portion of our investments to repay some debt when it is otherwise disadvantageous for us to do so. This could have a material adverse effect on our operations, and we may not be able to make distributions. The amount of leverage that we employ depends on our Adviser's and the Board's assessment of market and other factors at the time of any proposed borrowing. We cannot assure you that we will be able to obtain credit at all or on terms acceptable to us.

The following table illustrates the effect of leverage on returns from an investment in our common stock as of December 31, 2020, assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing in the table below.

	Assumed Return on our Portfolio (Net of Expenses)				
	(10.0)%	(5.0)%	0.0%	5.0%	10.0%
Corresponding return to common stockholder assuming actual asset coverage as of December 31, 2020 ⁽¹⁾	(20.1)%	(11.6)%	(3.0)%	5.5 %	14.0 %

(1) The calculation assumes the Company had (i) \$683.5 million in total assets, (ii) \$262.8 million in total debt outstanding, (iii) \$400.4 million in net assets, (v) and a weighted average cost of borrowings of 4.6%.

Based on our outstanding indebtedness of \$262.8 million as of December 31, 2020, our investment portfolio would have been required to experience an annual return of at least 1.8% to cover annual interest payments on the outstanding debt.

As required by Section 18(a) and 61(a) of the 1940 Act, in connection with the issuance of certain senior securities, a provision must be made by us to prohibit the declaration of any dividend or distribution on the Company's stock, other than a dividend payable in our common stock, or the repurchase of any stock unless at the time of the dividend or distribution declaration or repurchase there is asset coverage (computed in accordance with Section 18(h) of the 1940 Act) of at least 150% on our senior securities after deducting the amount of the dividend, distribution or repurchase.

In addition, each of the Credit Facility and the Master Note Purchase Agreement (the "Note Purchase Agreement") governing the 2025 Notes imposes, and any debt facilities or other borrowing arrangements we may enter into in the future may impose, financial and operating covenants that restrict our business activities, including limitations that hinder our ability to finance additional loans and investments or to make the distributions required to maintain our ability to be subject to tax treatment as a RIC under Subchapter M of the Code.

We may default under the Credit Facility, the 2022 Notes or the 2025 Notes or any future indebtedness or be unable to amend, repay or refinance any such facility or financing arrangement on commercially reasonable terms, or at all, which could have a material adverse effect on our financial condition, results of operations and cash flows.

In the event we default under the Credit Facility, the 2022 Notes or the 2025 Notes or any future indebtedness or are unable to amend, repay or refinance any such indebtedness on commercially reasonable terms, or at all, our business could be materially and adversely affected as we may be forced to sell all or a portion of our investments quickly and prematurely at what may be disadvantageous prices to us in order to meet our outstanding payment obligations and/or support working capital requirements under the Credit Facility, the 2022 Notes and the 2025 Notes or any future indebtedness, any of which would have a material adverse effect on our financial condition, results of operations and cash flows.

Events of default under the Credit Facility include, among other things, (i) a payment default; (ii) a change of control; (iii) bankruptcy; (iv) a covenant default; and (v) breach of a key man clause relating to our Chief Executive Officer, James P. Labe, and our President and Chief Investment Officer, Sajal K. Srivastava; and (vi) our failure to maintain our qualification as a BDC. Following any such default, the administrative agent under the Credit Facility could assume control of the disposition of any or all of our assets or restrict our utilization of any indebtedness, including the selection of such assets to be disposed and the timing of such disposition, including decisions with respect to our warrant investments, which would have a material adverse effect on our business, financial condition, results of operations and cash flows.

The indenture governing the 2022 Notes contains certain covenants, including covenants (i) requiring our compliance with the asset coverage requirements set forth in Section 18(a)(1)(A) as modified by Section 61(a) of the 1940 Act, whether or not we are subject to the such provisions of the 1940 Act, but giving effect, in either case, to any exemptive relief granted to us by the SEC; (ii) if our asset coverage has been below the 1940 Act minimum asset coverage requirements (after giving effect to any exemptive relief granted to us by the SEC) for more than six consecutive months, prohibiting the declaration of any cash dividend or distribution on our common stock (except to the extent necessary for us to maintain our treatment as a RIC under Subchapter M of the Code), or purchasing any of our common stock, unless, at the time of the declaration of the dividend or distribution or the purchase, and after deducting the amount of such dividend, distribution, or purchase, we are in compliance with the 1940 Act asset coverage requirements (after giving effect to any exemptive relief granted to us by the SEC); and (iii) requiring us to provide financial information to the trustee, if we cease to be subject to the reporting requirements of the Exchange Act.

The Note Purchase Agreement under which the 2025 Notes were issued contains customary terms and conditions for unsecured notes issued in a private placement, including, without limitation, affirmative and negative covenants such as information reporting, maintenance of our status as a BDC within the meaning of the 1940 Act, a minimum asset coverage ratio of 1.50 to 1.00, a minimum interest coverage ratio of 1.25 to 1.00, and a minimum stockholders' equity requirement. The Note Purchase Agreement also contains customary events of default with customary cure and notice periods, including, without limitation, nonpayment, incorrect representation in any material respect, breach of covenant, cross-default under other indebtedness we have incurred or of our subsidiary guarantors (if any), certain judgments and orders, certain events of bankruptcy, and breach of a key man clause relating to Messrs. Labe and Srivastava.

Our continued compliance with the covenants under the Credit Facility, the indenture governing the 2022 Notes and the Note Purchase Agreement depends on many factors, some of which are beyond our control, and there can be no assurance that we will continue to comply with such covenants. Our failure to satisfy the respective covenants could result in foreclosure by the lenders under the applicable credit facility or governing instrument or acceleration by the applicable lenders or noteholders, which would accelerate our repayment obligations under the relevant agreement and thereby have a material adverse effect on our business, liquidity, financial condition, results of operations and ability to pay distributions to our stockholders. Because the Credit Facility and the Note Purchase Agreement have, and any future credit facilities will likely have, customary cross-default provisions, if the indebtedness under the Credit Facility or represented by the 2022 Notes or the 2025 Notes, or under any future credit facility, is accelerated, we may be unable to repay or finance the amounts due.

Because we use debt to finance certain of our investments, if market interest rates were to increase, our cost of capital could increase, which could reduce our net income. In addition, if the Credit Facility were to become unavailable, it could have a material adverse effect on our business, financial condition and results of operations.

Because we borrow money to finance certain of our investments, including under the Credit Facility, our net income will depend, in part, upon the difference between the rate at which we borrow funds and the rate at which we invest those funds. As a result, we can offer no assurance that a significant change in market interest rates would not have a material adverse effect on our net income in the event we use debt to finance our investments. In periods of rising interest rates, our cost of funds would increase, which could reduce our net income. In addition, if the Credit Facility were to become unavailable to us and attractive alternative financing sources were not available, it could have a material adverse effect on our business, financial condition and results of operations.

In July 2017, the head of the United Kingdom Financial Conduct Authority (the “FCA”) announced that it intends to phase out the use of London Interbank Offered Rate (“LIBOR”) by the end of 2021. Although there have been consultations regarding the extension of the LIBOR transition deadline to the end of June 2023, there is currently no definitive information regarding the future utilization of LIBOR or of any particular replacement rate. The U.S. Federal Reserve, in conjunction with the Alternative Reference Rates Committee, a steering committee comprised of large U.S. financial institutions, is considering replacing U.S. dollar LIBOR with a new index calculated by short term repurchase agreements, backed by Treasury securities, called the Secured Overnight Financing Rate (“SOFR”). SOFR is a measure of the cost of borrowing cash overnight, collateralized by U.S. Treasury securities, and is based on directly observable U.S. Treasury-backed repurchase transactions. The first publication of SOFR was released in April 2018. Other jurisdictions have also proposed their own alternative to LIBOR, including the Sterling Overnight Index Average for Sterling markets, the Euro Short Term Rate for Euros and Tokyo Overnight Average Rate for Japanese Yens. Although SOFR appears to be the preferred replacement rate for U.S. dollar LIBOR, at this time, it is uncertain whether SOFR will attain market traction or the effect of any such changes as the establishment of alternative reference rates or other reforms to LIBOR. As such, the potential effect of any such event on our cost of capital and net investment income cannot yet be determined. Following any replacement of LIBOR, some or all of our loan agreements may bear interest at a lower interest rate, which could have an adverse impact on our results of operations. Moreover, if LIBOR ceases to exist, we may need to renegotiate certain terms of the Credit Facility. If we are unable to do so, amounts drawn under the Credit Facility may bear interest at a higher rate, which would increase the cost of our borrowings and, in turn, affect our results of operations. In addition, any further changes or reforms to the determination or supervision of LIBOR may result in a sudden or prolonged increase or decrease in reported LIBOR, which could have an adverse impact on the market value for, or value of, any LIBOR-linked securities, loans, and other financial obligations or extensions of credit held by or due to us and could have a material adverse effect on our business, financial condition and results of operations.

Alteration of the terms of a debt instrument or a modification of the terms of other types of contracts to replace an interbank offered rate with a new reference rate could result in a taxable exchange and the realization of income and gain/loss for U.S. federal income tax purposes. The IRS has issued proposed regulations regarding the tax consequences of the transition from interbank offered rates to new reference rates in debt instruments and non-debt contracts. Under the proposed regulations, to avoid such alteration or modification of the terms of a debt instrument being treated as a taxable exchange, the fair market value of the modified instrument or contract must be substantially equivalent to its fair market value before the qualifying change was made. The IRS may withdraw, amend or finalize, in whole or part, these proposed regulations and/or provide additional guidance, with potential retroactive effect.

In addition, a rise in the general level of interest rates typically leads to higher interest rates applicable to our secured loans. Accordingly, an increase in interest rates may result in an increase of our income and, as a result, an increase in the incentive fee payable to our Adviser.

Provisions in the Credit Facility and the Note Purchase Agreement or any future indebtedness may limit our discretion in operating our business.

The Credit Facility is, and any future indebtedness may be, backed by all or a portion of our assets on which the lenders may have a security interest. We may pledge up to 100% of our assets or the assets of our Financing Subsidiary and may grant a security interest in all of our assets under the terms of any debt instrument we enter into with lenders. Any security interests that we grant will be set forth in a security agreement and evidenced by the filing of financing statements by the agent for the lenders. Any restrictive provision or negative covenant in the agreements governing our indebtedness, including the Credit Facility and the Note Purchase Agreement, including applicable diversification and eligibility requirements, or any of our future indebtedness limits or may limit our operating discretion, which could have a material adverse effect on our financial condition, results of operations and cash flows. A failure to comply with the restrictive provisions or negative covenants in the Credit Facility or the Note Purchase Agreement or any of our future indebtedness would or may result in an event of default and/or restrict our ability to control the disposition of our assets and our utilization of any indebtedness. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations-Contractual Obligations.”

Adverse developments in the credit markets may impair our ability to enter into any other future borrowing facility.

During the economic downturn in the United States that began in mid-2007, many commercial banks and other financial institutions stopped lending or significantly curtailed their lending activity. In addition, in an effort to stem losses and reduce their exposure to segments of the economy deemed to be high risk, some financial institutions limited refinancing and loan modification transactions and reviewed the terms of existing facilities to identify bases for accelerating the maturity of existing lending facilities. If these conditions recur, it may be difficult for us to enter into a new borrowing facility, obtain other financing to finance the growth of our investments or refinance any outstanding indebtedness on acceptable economic terms or at all.

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to qualify as a BDC or be precluded from investing according to our current business strategy.

As a BDC, we may not acquire any assets other than “qualifying assets” unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. See “Business-Regulation.”

We believe that most of the investments that we may acquire in the future will constitute qualifying assets. However, we may be precluded from investing in what we believe to be attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could violate the 1940 Act provisions applicable to BDCs. As a result of such violation, specific rules under the 1940 Act could require us to dispose of investments at inappropriate times in order to come into compliance with the 1940 Act. If we need to dispose of such investments quickly, it could be difficult to dispose of such investments on favorable terms or at all. We may not be able to find a buyer for such investments and, even if we do find a buyer, we may have to sell the investments at a substantial loss. Any such outcomes would have a material adverse effect on our financial condition, results of operations and cash flows.

If we do not maintain our status as a BDC, we would be subject to regulation as a registered closed-end investment company under the 1940 Act. As a registered closed-end investment company, we would be subject to substantially more regulatory restrictions under the 1940 Act, which would significantly decrease our operating flexibility. For these reasons, loss of our status as a BDC likely would have a material adverse effect on our business, financial condition and results of operations. Similarly, these rules could prevent us from making follow-on investments in existing portfolio companies (which could result in the dilution of our position).

Our investment portfolio is recorded at fair value, with our Board having final responsibility for overseeing, reviewing and approving, in good faith, its estimate of fair value and, as a result, there is uncertainty as to the value of our portfolio investments, which may impact our net asset value.

Most of our investments take the form of secured loans, warrant and direct equity investments that are not publicly traded. The fair value of loans and other investments that are not publicly traded may not be readily determinable, and we value these investments at fair value as determined in good faith by our Board. Most of our investments (other than cash and cash equivalents) are classified as Level 3 under ASC Topic 820. This means that our valuations are based on unobservable inputs and our own assumptions about how market participants would price the asset or liability in question. Inputs into the determination of the fair value of our investments require significant management judgment or estimation. We retain the services of one or more independent third-party valuation firms to review the valuation of these loans and other investments. The valuation for each portfolio investment, including our Level 3 investments, is reviewed at least annually by an independent third-party valuation firm. However, the Board does not intend to have de minimis investments of less than 1.0% of our gross assets (up to an aggregate of 10.0% of our gross assets) reviewed by an independent third-party valuation firm, given the expenses involved in connection therewith. The Board discusses valuations on a quarterly basis and determines, in good faith, the fair value of each investment in our portfolio based on the input of our Adviser, the independent third-party valuation firm and the Valuation Committee. The types of factors that our Board takes into account in determining the fair value of our investments generally include, as appropriate, such factors as yield, maturity and measures of credit quality, the enterprise value of the company, the nature and realizable value of any collateral, the company's ability to make payments and its earnings and discounted cash flow, our assessment of the support of their venture capital investors, the markets in which the company does business, comparisons to similar publicly traded companies and other relevant factors. Because such valuations, and particularly valuations of private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a ready market for these loans and other investments existed. Our net asset value could be materially and adversely affected if our determinations regarding the fair value of our loans and other investments were materially higher than the values that we ultimately realize upon the disposal of such loans and other investments.

We incur significant costs as a result of being a public company.

Public companies incur legal, accounting and other expenses, including costs associated with the periodic reporting requirements applicable to a company whose securities are registered under the Exchange Act, as well as additional corporate governance requirements, including requirements under the Sarbanes-Oxley Act. Accordingly, we incur significant additional costs as a result of being a public company. These requirements may place a strain on our systems and resources. The Sarbanes-Oxley Act requires that we maintain effective disclosure controls and procedures and internal control over financial reporting, which are discussed below. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal controls, significant resources and management oversight are required. We have implemented procedures, processes, policies and practices for the purpose of addressing the standards and requirements applicable to public companies. These activities may divert management's attention from other business concerns, which could have a material adverse effect on our business, financial condition, results of operations and cash flows. We expect to incur significant additional annual expenses related to these steps and, among other things, directors' and officers' liability insurance, director fees, reporting requirements of the SEC, transfer agent fees, additional administrative expenses payable to the Administrator to compensate it for hiring additional accounting, legal and administrative personnel, increased auditing and legal fees and similar expenses.

We are obligated to maintain proper and effective internal control over financial reporting. We may not complete our analysis of our internal control over financial reporting in a timely manner, or our internal controls may not be determined to be effective, which may adversely affect investor confidence in our company and, as a result, the value of our securities.

Complying with Section 404 requires a rigorous compliance program as well as adequate time and resources. We may not be able to complete our internal control evaluation, testing and any required remediation in a timely fashion. If we are not able to implement the applicable requirements of Section 404 in a timely manner or with adequate compliance, our operations, financial reporting or financial results could be adversely affected. Matters impacting our internal controls may cause us to be unable to report our financial information on a timely basis and thereby subject us to adverse regulatory consequences, including sanctions by the SEC or violations of applicable stock exchange listing rules, and result in a breach of the covenants under the agreements governing any of our financing arrangements. There could also be a negative reaction in the financial markets due to a loss of investor confidence in us and the reliability of our financial statements. Additionally, if we identify one or more material weaknesses in our internal control over financial reporting, we will be unable to assert that our internal controls are effective. If we are unable to assert that our internal control over financial reporting is effective, we could lose investor confidence in the accuracy and completeness of our financial reports. This could have a material adverse effect on us and lead to a decline in the price of our securities.

Our internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations. Even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. If we fail to maintain the adequacy of our internal controls, including any failure to implement required new or improved controls, or if we experience difficulties in their implementation, our business and operating results could be harmed and we could fail to meet our financial reporting obligations.

Our Board may change our investment objective, operating policies and strategies without prior notice or stockholder approval, the effects of which may be adverse.

Our Board has the authority, except as otherwise provided in the 1940 Act, to modify or waive certain of our operating policies and strategies without prior notice and without stockholder approval. However, absent stockholder approval, we may not change the nature of our business so as to cease to be, or withdraw our election as, a BDC. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results and the market price of our common stock. Nevertheless, any such changes could materially and adversely affect our business and impair our ability to make distributions to our stockholders.

Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

The Maryland General Corporation Law, our charter and our bylaws contain provisions that may discourage, delay or make more difficult a change in control or the removal of our directors. We are subject to the Maryland Business Combination Act, or the “Business Combination Act,” the application of which is subject to and may not conflict with any applicable requirements of the 1940 Act. Our Board has adopted a resolution exempting from the Business Combination Act any business combination between us and any other person, subject to prior approval of such business combination by our Board, including approval by a majority of our directors who are not “interested persons” as such term is defined in the 1940 Act. If the resolution exempting business combinations is repealed or our Board does not approve a business combination, the Business Combination Act may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer. Our bylaws exempt from the Maryland Control Share Acquisition Act, or the “Control Share Acquisition Act,” acquisitions of our common stock by any person. If we amend our bylaws to repeal the exemption from the Control Share Acquisition Act, the Control Share Acquisition Act also may make it more difficult for a third party to obtain control of us and increase the difficulty of consummating such an offer. However, we will not amend our bylaws to repeal the current exemption from the Control Share Acquisition Act without our Board determining that it would be in the best interests of our stockholders and without the Company first notifying the SEC staff of its intention. The SEC staff has issued informal guidance setting forth its position that certain provisions of the Control Share Acquisition Act would, if implemented, violate Section 18(i) of the 1940 Act.

Our charter and bylaws contain other provisions that may make it difficult for a third party to obtain control of us, including supermajority vote requirements for business transactions that are not approved by a majority of our “continuing directors,” provisions of our charter classifying our Board in three classes serving staggered three-year terms, and provisions of our charter authorizing our Board to classify or reclassify shares of our stock in one or more classes or series and to cause the issuance of additional shares of our stock, and to amend our charter, without stockholder approval, to increase or decrease the number of shares of stock of any class or series that we have authority to issue. These provisions, as well as other provisions of our charter and bylaws, may delay, defer or prevent a transaction or a change in control that might otherwise be in the best interests of our stockholders.

Our Adviser or our Administrator can resign upon 60 days’ notice and we may not be able to find a suitable replacement within that time, or at all, resulting in a disruption in our operations that could materially and adversely affect our financial condition, results of operations and cash flows.

Our Adviser has the right under the Investment Advisory Agreement to resign at any time upon 60 days’ written notice, whether we have found a replacement or not. Similarly, our Administrator has the right under the Administration Agreement to resign at any time upon 60 days’ written notice, whether we have found a replacement or not. If our Adviser or our Administrator were to resign, we may not be able to find a new investment adviser, administrator or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our

financial condition, results of operations and cash flows as well as our ability to pay distributions to our stockholders are likely to be materially and adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment or administrative activities, as applicable, is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by our Adviser and our Administrator. Even if we are able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may materially and adversely affect our financial condition, results of operations and cash flows.

The failure in cyber security systems, as well as the occurrence of events unanticipated in our Adviser's disaster recovery systems and management continuity planning or a support failure from external providers during a disaster could impair our ability to conduct business effectively.

The occurrence of a disaster, such as a cyber-attack against us or against a third-party that has access to our data or networks, a natural catastrophe, an industrial accident, failure of our disaster recovery systems, or consequential employee error, could have an adverse effect on our ability to communicate or conduct business, negatively impacting our operations and financial condition. This adverse effect can become particularly acute if those events affect our electronic data processing, transmission, storage, and retrieval systems, or impact the availability, integrity, or confidentiality of our data.

We depend heavily upon computer systems to perform necessary business functions. Despite our implementation of a variety of security measures, our computer systems, networks, and data, like those of other companies, could be subject to cyber-attacks and unauthorized access, use, alteration, or destruction, such as from physical and electronic break-ins or unauthorized tampering. If one or more of these events occurs, it could potentially jeopardize the confidential, proprietary, and other information processed, stored in, and transmitted through our computer systems and networks. Such an attack could involve gaining unauthorized access to our information systems for purposes of misappropriating assets, stealing confidential information, corrupting data or causing operational disruption and result in disrupted operations, misstated or unreliable financial data, regulatory penalties, liability for stolen assets or information, increased cybersecurity protection and insurance costs, litigation and damage to our business relationships, any of which could have a material adverse effect on our business, financial condition and results of operations.

Third parties with which we do business may also be sources of cybersecurity or other technological risk. We outsource certain functions and these relationships allow for the storage and processing of our information, as well as client, counterparty, employee, and borrower information. While we engage in actions to reduce our exposure resulting from outsourcing, ongoing threats may result in unauthorized access, loss, exposure, destruction, or other cybersecurity incident that affects our data, resulting in increased costs and other consequences as described above.

If we are unable to manage our growth, our results of operations could suffer.

Rapid growth of our portfolio would require expanded portfolio monitoring, increased personnel, expanded operational and financial systems and new and expanded control procedures. Our Adviser may be unable to attract sufficient qualified personnel or successfully manage expanded operations. As our portfolio expands, we may periodically experience constraints that would adversely affect our Adviser's ability to identify and capitalize on investment opportunities, conduct a thorough and efficient diligence and credit analysis, close financing transactions in a timely fashion and/or effectively monitor our portfolio companies. Failure to manage growth effectively could materially and adversely affect our financial condition, results of operations and cash flows.

Risks Relating to our Conflicts of Interest

Our ability to enter into transactions with our affiliates and to make investments in venture growth stage companies along with our affiliates is restricted by the 1940 Act which may limit the scope of investment opportunities available to us.

We are prohibited under the 1940 Act from participating in certain transactions with our affiliates without the prior approval of our independent directors and, in some cases, the SEC. Any person that owns, directly or indirectly, 5% or more of our outstanding voting securities will be our affiliate for purposes of the 1940 Act. In addition, any venture growth stage company in which TPC or its affiliates own 5% or more of its outstanding voting securities will be our affiliate for purposes of the 1940 Act. We are generally prohibited from buying or selling any security from or to such affiliate without the prior approval of our independent directors and, in certain cases, the SEC. The 1940 Act also prohibits certain "joint" transactions with certain of our affiliates, which could include concurrent investments in the same company, without prior approval of our independent directors and, in some cases, the SEC. We are prohibited from buying or selling any security from or to any person that controls us or who owns more than 25% of our voting securities and certain of that person's affiliates, or entering into prohibited joint transactions with such persons, absent the prior approval of the SEC. As a result of these restrictions, we may be prohibited from (i) buying or selling any security (other than any security of which we are the issuer) from or to any company that is advised or managed by TPC or our Adviser or any of their affiliates or (ii) modifying any security that we hold in a company in which TPC or our Adviser or any of their affiliates also hold an interest without the prior approval of the SEC, which may limit our ability to take any action with respect to an existing investment or potential investment regardless of whether we conclude that the action may be in the best interest of our stockholders.

Our investment strategy includes investments in secured loans to companies, together with, in many cases, attached equity "kickers" in the form of warrant investments, and direct equity investments. TPC and the Adviser also manage, and in the future may manage, other investment funds, accounts or vehicles that invest or may invest in companies and investments similar to those in our investment portfolio. Although we were formed to expand the venture growth stage business segment of TPC's investment platform, subject to its allocation policy

and applicable law, other vehicles sponsored or managed by our Adviser's senior investment team also invest in venture growth stage companies. As a result, members of our Adviser's senior investment team and the Investment Committee, in their roles at TPC, may face conflicts in the allocation of investment opportunities among us and other investment vehicles managed by TPC with similar or overlapping investment objectives. Generally, when a particular investment would be appropriate for us as well as one or more other investment funds, accounts or vehicles managed by our Adviser's senior investment team, such investment will be apportioned by our Adviser's senior investment team in accordance with (1) our Adviser's internal conflict of interest and allocation policies, (2) the requirements of the Advisers Act and (3) certain restrictions under the 1940 Act regarding co-investments with affiliates. Co-investment opportunities will be allocated amongst us, TPC and/or investment funds, accounts and vehicles managed by the Adviser or its affiliates: (1) consistent with both the Adviser's allocation policies and procedures and the conditions of the Exemptive Order, as applicable; and (2) and in a manner reasonably designed to ensure that investment opportunities are allocated fairly and equitably over time. Such apportionment may not be strictly pro rata, depending on the good faith determination of all relevant factors, including, without limitation, differing investment objectives, amount of capital available for each potential investing entity, diversification considerations, regulatory restrictions and the terms of our or the respective governing documents of such investment funds, accounts or investment vehicles. These procedures could, in certain circumstances, limit whether or not a co-investment opportunity is available to us, the timing of acquisitions and dispositions of investments, the price paid or received by us for investments or the size of the investment purchased or sold by us.

We may co-invest with TPC and/or investment funds, accounts and vehicles managed by TPC or its affiliates where doing so is consistent with our investment strategy as well as applicable law and SEC staff interpretations. We generally are only permitted to co-invest with TPC and/or such investment funds, accounts and vehicles where the only term that is negotiated is price. However, on March 28, 2018 we, TPC and our Adviser received the Exemptive Order from the SEC, which permits greater flexibility to negotiate the terms of co-investments with TPC and/or investment funds, accounts and investment vehicles managed by TPC or its affiliates in a manner consistent with our investment objective, positions, policies, strategies and restrictions as well as regulatory requirements and other pertinent factors. Pursuant to the Exemptive Order, we are permitted to co-invest with our affiliates if a "required majority" (as defined in Section 57(o) of the 1940 Act) of our independent directors make certain conclusions in connection with a co-investment transaction, including, but not limited to, that (1) the terms of the potential co-investment transaction, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching in respect of us or our stockholders on the part of any person concerned, and (2) the potential co-investment transaction is consistent with the interests of our stockholders and is consistent with our then-current investment objective and strategies.

Our Adviser may be subject to conflicts of interest with respect to taking actions regarding many investments in which TPC or its affiliates also have an interest.

Although our Adviser has adopted a compliance program that includes conflicts of interest policies and procedures, that are designed to mitigate the potential actual or perceived conflicts between us, on the one hand, and TPC and its affiliates, on the other hand, it may not eliminate all potential conflicts. TPC and its affiliates may have previously made investments in secured loans, together with, in many cases, attached equity "kickers" in the form of warrant investments, and direct equity investments in some of the same venture growth stage companies in which we expect to invest. In certain of these circumstances, we may have rights and privileges that give us priority over others associated with the issuer, such as TPC or its affiliates. These rights, if exercised, could have a detrimental impact on the value of the investment made by TPC or its affiliates in the issuer, and as a result and subject to the applicable provisions of the Advisers Act and the 1940 Act, our Adviser may not exercise the Company's rights if the Adviser believes TPC or its affiliates would be disadvantaged by the Company taking such action, even if it is in the best interests of our stockholders. In addition, our Adviser may be subject to a conflict in seeking to make an investment in an issuer in which TPC or its affiliates have already invested, and we may still choose to make such investment, where permissible, subject to the approval of a majority of our directors who have no financial interest in the investment and a majority of our independent directors. In such a scenario, our Adviser may be influenced to make an investment or take actions in order to protect the interests of TPC or its affiliates in the issuer.

The advisory fee structure we have with our Adviser may create incentives that are not fully aligned with the interests of our stockholders.

In the course of our investing activities, we pay a base management fee and an incentive fee to our Adviser. The Investment Advisory Agreement that we entered into with our Adviser provides that these fees are based on the value of our adjusted gross assets. As a result, investors in our common stock will invest on a "gross" basis and receive distributions on a "net" basis after expenses, resulting in a lower rate of return than one might achieve through direct investments. Because these fees are based on the value of our total assets, our Adviser benefits when we incur debt or use leverage. This fee structure may encourage our Adviser to cause us to borrow money to finance additional investments. Our Board is charged with protecting our interests by monitoring how our Adviser addresses these and other conflicts of interest associated with its management services and compensation. While our Board does not review or approve each investment decision, borrowing or incurrence of leverage, our independent directors periodically review our Adviser's services and fees as well as its portfolio management decisions and portfolio performance. In connection with these reviews, our independent directors consider whether our fees and expenses (including those related to leverage) remain appropriate. As a result of this arrangement, our Adviser may from time to time have interests that differ from those of our stockholders, giving rise to a conflict.

Our incentive fee may induce our Adviser to pursue speculative investments and to use leverage when it may be unwise to do so.

The incentive fee payable by us to our Adviser may create an incentive for our Adviser to make investments on our behalf that are risky or more speculative than would be the case in the absence of such compensation arrangement. The way in which the incentive fee payable to our Adviser is determined, which is calculated separately in two components as a percentage of the interest and other investment income in excess of a quarterly minimum hurdle rate and as a percentage of the realized gain on invested capital, may encourage our Adviser to use

leverage or take additional risk to increase the return on our investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor the holders of our common stock or of securities convertible into our common stock or warrant investments representing rights to purchase our common stock or securities convertible into our common stock. In addition, our Adviser receives the incentive fee based, in part, upon net capital gains realized on our investments. Unlike the portion of the incentive fee based on investment income, there is no minimum level of gain applicable to the portion of the incentive fee based on net capital gains. As a result, our Adviser may have an incentive to invest more in investments that are likely to result in capital gains as compared to income producing securities or to advance or delay realizing a gain in order to enhance its incentive fee. This practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns. A rise in the general level of interest rates can be expected to lead to higher interest rates applicable to certain of our debt investments and may accordingly result in a substantial increase of the amount of incentive fees payable to our Adviser with respect to our pre-incentive fee net investment income.

We may pay our Adviser an incentive fee on certain investments that include a deferred interest feature.

We underwrite our loans to generally include an end-of-term payment, a PIK interest payment and/or OID. Our end-of-term payments are contractual and fixed interest payments due at the maturity date of the loan, including upon prepayment, and are generally a fixed percentage of the original principal balance of the loan. The portion of our end-of-term payments which equal the difference between our yield-to-maturity and the stated interest rate on the loan are recognized as non-cash income or OID until they are paid. In addition, in connection with our equity related investments, we may be required to accrue OID which decreases the balance on our secured loans by an amount equal to the value of the warrant investment we receive in connection with the applicable secured loan over its lifetime. Under these types of investments, we accrue interest during the life of the loan on the end-of-term payment, PIK interest payment and/or OID but do not receive the cash income from the investment until the end of the term. However, our pre-incentive fee net investment income, which is used to calculate the income portion of our incentive fee, includes accrued interest. Thus, a portion of this incentive fee is based on income that we have not yet received in cash, such as an end-of-term payment, a PIK interest payment and/or OID.

The valuation process for certain of our investments may create a conflict of interest.

For many of our investments, no market-based price quotation is available. As a result, our Board determines the fair value of these secured loans, warrant and equity investments in good faith as described above in “-Relating to our Business and Structure-Our investment portfolio is recorded at fair value, with our Board having final responsibility for overseeing, reviewing and approving, in good faith, its estimate of fair value and, as a result, there is uncertainty as to the value of our portfolio investments, which may impact our net asset value.” In connection with that determination, our Adviser’s senior investment team provides our Board with valuation recommendations based upon the most recent and available information, which generally includes industry outlook, capitalization, financial statements and projected financial results of each portfolio company. Other than *de minimis* investments of less than 1% of our gross assets (up to an aggregate of 10% of our gross assets), the valuation for each investment is reviewed by an independent valuation firm annually and the ultimate determination of fair value is made by our Board, including our interested directors, and not by such independent valuation firm. The Board, however, may request at its discretion to have such *de minimis* investments valued by an independent valuation firm. In addition, Messrs. Labe and Srivastava, each an interested member of our Board, have a material pecuniary interest in our Adviser. The participation of our Adviser’s senior investment team in our valuation process, and the pecuniary interest in our Adviser by certain members of our Board, could result in a conflict of interest as our Adviser’s base management fee is based, in part, on the value of our average adjusted gross assets, and our Adviser’s incentive fee is based, in part, on realized gains and realized and unrealized losses.

There are conflicts related to our arrangements with TPC and our Administrator.

In February 2014, we entered into the License Agreement with TPC under which TPC granted us a non-exclusive, royalty-free license to use the name “TriplePoint” and the TriplePoint logo. In addition, in February 2014, we entered into the Administration Agreement with our Administrator pursuant to which we are required to pay our Administrator an amount equal to the allocable portion of our Administrator’s overhead resulting from its obligations under the Administration Agreement, including rent and the allocable portion of the cost of our Chief Compliance Officer and Chief Financial Officer and their respective staffs. This creates conflicts of interest that our Board will monitor. For example, under the terms of the License Agreement, we are unable to preclude TPC from licensing or transferring the ownership of the “TriplePoint” name to third parties, some of which may compete against us. Consequently, we are unable to prevent any damage to goodwill that may occur as a result of the activities of TPC or others. Furthermore, in the event the License Agreement is terminated, we will be required to change our name and cease using “TriplePoint” as part of our name. Any of these events could disrupt our recognition in the market place, damage any goodwill we may have generated and otherwise harm our business.

The Investment Advisory Agreement was not negotiated at arm’s length and may not be as favorable to us as if it had been negotiated with an unaffiliated third party.

Pursuant to the terms of the Investment Advisory Agreement, our Adviser is responsible for sourcing, reviewing and structuring investment opportunities for us, underwriting and performing diligence of our investments and monitoring our investment portfolio on an ongoing basis. The Investment Advisory Agreement was negotiated between related parties. Consequently, its terms, including fees payable to our Adviser, may not be as favorable to us as if it had been negotiated with an unaffiliated third party. In addition, we may choose not to enforce, or to enforce less vigorously, our rights and remedies under the Investment Advisory Agreement because of our desire to maintain our ongoing relationship with our Adviser.

Our Adviser's liability is limited under the Investment Advisory Agreement and we have agreed to indemnify our Adviser against certain liabilities, which may lead our Adviser to act in a riskier manner on our behalf than it would when acting for its own account.

Under the Investment Advisory Agreement, our Adviser has not assumed any responsibility to us other than to render the services called for under that agreement. It is not responsible for any action of our Board in following or declining to follow our Adviser's advice or recommendations. Under the Investment Advisory Agreement, our Adviser and its professionals and any person controlling or controlled by our Adviser are not liable to us, any subsidiary of ours, our directors, our stockholders or any subsidiary's stockholders or partners for acts or omissions performed in accordance with and pursuant to the Investment Advisory Agreement, except those resulting from acts constituting criminal conduct, gross negligence, willful misfeasance, bad faith or reckless disregard of the duties that our Adviser owes to us under the Investment Advisory Agreement. In addition, as part of the Investment Advisory Agreement, we have agreed to indemnify our Adviser and its professionals from and against any claims or liabilities, including reasonable legal fees and other expenses reasonably incurred, arising out of or in connection with our business and operations or any action taken or omitted on our behalf pursuant to authority granted by the Investment Advisory Agreement, except where attributable to criminal conduct, willful misfeasance, bad faith or gross negligence in the performance of the Adviser's or such person's duties or by reason of the reckless disregard of the Adviser's duties and obligations under the Investment Advisory Agreement. These protections may lead our Adviser to act in a riskier manner when acting on our behalf than it would when acting for its own account.

Risks Relating to our Investments

Our investments are concentrated in technology, life sciences and other high growth industries, including clean technology, some of which are subject to extensive government regulation, which exposes us to the risk of significant loss if any of these industry sectors experiences a downturn.

A consequence of our investment strategy is that our investment returns will be materially and adversely affected if the companies or the industries we target perform poorly. Beyond the asset diversification requirements to which we will be subject as a RIC and any concentration limitations we have agreed or may agree to as part of the Credit Facility or any future indebtedness, we do not have fixed guidelines for diversification or limitations on the size of our investments in any one company and our investments could be concentrated in relatively few industries.

Our investments may be subject to extensive regulation by U.S. and foreign federal, state and/or local agencies. Changes in existing laws, rules or regulations, or judicial or administrative interpretations thereof, or new laws, rules or regulations could have an adverse impact on the business and industries of our portfolio companies. In addition, changes in government priorities or limitations on government resources could also adversely impact our portfolio companies. We are unable to predict whether any such changes in laws, rules or regulations will occur and, if they do occur, the impact of these changes on our portfolio companies and our investment returns. Furthermore, if any of our portfolio companies fail to comply with applicable regulations, they could be subject to significant penalties and claims that could materially and adversely affect their operations. Our portfolio companies may be subject to the expense, delay and uncertainty of the regulatory approval process for their products and, even if approved, these products may not be accepted in the marketplace.

Our portfolio investments are concentrated the technology, life sciences and other high growth industries, including clean technology. As a result, a downturn in any of these industries and particularly those in which we are heavily concentrated could materially and adversely affect our financial condition, results of operations and cash flows.

Our portfolio may lack diversification among portfolio companies which may subject us to a risk of significant loss if one or more of these companies defaults on its obligations under any of its debt instruments.

Our portfolio consists of a limited number of portfolio companies. Beyond the asset diversification requirements associated with our qualification as a RIC under the Code and any concentration limitations we have agreed or may agree to as part of the Credit Facility or any future indebtedness, we do not have fixed guidelines for diversification, and our investments may be concentrated in relatively few companies. As our portfolio may be less diversified than the portfolios of other investment vehicles, we may be more susceptible to failure if a single loan fails. Similarly, the aggregate returns we realize may be significantly adversely affected if a small number of investments perform poorly or if we need to write down the value of any one investment.

Our financial condition, results of operations and cash flows would be negatively affected if a significant portfolio investment fails to perform as expected.

Our total investment in an individual company may be significant. As a result, if a significant investment fails to perform as expected, it may be subject to multiple credit rating downgrades on our internal rating scale within a short period of time. As a result of such deterioration in the performance of a significant investment, our financial condition, results of operations and cash flows could be more negatively affected and the magnitude of the loss could be more significant than if we had made smaller investments in more companies.

Our investment strategy includes a primary focus on venture growth stage companies, which are subject to many risks, including dependence on the need to raise additional capital, volatility, intense competition, shortened product life cycles, changes in regulatory and governmental programs, periodic downturns, and below investment grade ratings, which could cause you to lose all or part of your investment in us.

We invest primarily in venture growth stage companies, many of which may have narrow product lines and small market shares, which tend to render them more vulnerable to competitors' actions and market conditions, as well as to general economic downturns, compared to more mature companies. The revenues, income (or losses), and projected financial performance and valuations of venture growth stage companies can and often do fluctuate suddenly and dramatically. For these reasons, investments in our portfolio companies, if rated by one or more ratings agency, would typically be rated below "investment grade," which refers to securities rated by ratings agencies below the four highest rating categories. Our target venture growth stage companies may be geographically concentrated and are therefore highly susceptible to materially negative local, political, natural and economic events. In addition, high growth industries are generally characterized by abrupt business cycles and intense competition. Overcapacity in high growth industries, together with cyclical economic downturns, may result in substantial decreases in the value of many venture growth stage companies and/or their ability to meet their current and projected financial performance to service our debt. Furthermore, venture growth stage companies also typically rely on venture capital and private equity investors, or initial public offerings, or sales for additional capital.

Venture capital firms in turn rely on their limited partners to pay in capital over time in order to fund their ongoing and future investment activities. To the extent that venture capital firms' limited partners are unable or choose not to fulfill their ongoing funding obligations, the venture capital firms may be unable to continue operationally and/or financially supporting the ongoing operations of our portfolio companies, which could have a material adverse impact on our financing arrangement with the portfolio company.

These companies, their industries, their products and customer demand and the outlook and competitive landscape for their industries are all subject to change, which could have a material adverse impact on their ability to execute their business plans and generate cash flow or raise additional capital that would serve as the basis for repayment of our loans. Therefore, the venture growth stage companies in which we invest may face considerably more risk of loss than do companies at other stages of development.

Some of our portfolio companies may need additional capital, which may not be readily available.

Venture growth stage companies may require additional equity financing if their cash flow from operating activities is insufficient to satisfy their continuing growth, working capital and other requirements. Each round of venture financing is typically intended to provide a venture capital-backed company with only enough capital to reach the next stage of development. We cannot predict the circumstances or market conditions under which our venture growth stage companies will seek additional capital. It is possible that one or more of our venture growth stage companies will not be able to raise additional financing or may be able to do so only at a price or on terms unfavorable to us, either of which would negatively impact our investment returns, the fair value of our portfolio and our ability to restructure our investments. Some of these companies may be unable to obtain sufficient financing from private investors, public or private capital markets or traditional lenders. This may have a significant impact if the companies are unable to obtain certain federal, state or foreign agency approval for their products or the marketing thereof, if regulatory review processes extend longer than anticipated and the companies need continued funding for their operations during these times. Accordingly, financing these types of companies may entail a higher risk of loss than would financing companies that are able to utilize traditional credit sources.

Our existing and/or future portfolio companies may not draw on any of our unfunded obligations or may draw our outstanding unfunded obligations at a time when our capital is not readily available.

A commitment to extend credit is a formal agreement to lend funds to our portfolio companies as long as there is no violation of any condition established under the agreement. The actual borrowing needs of our portfolio companies under these commitments have historically been lower than the contractual amount of the commitments. A portion of these commitments expire without being drawn upon, and as such, the total amount of unfunded commitments does not reflect our expected future cash funding requirements.

As of December 31, 2020, our unfunded obligations to 16 portfolio companies totaled \$132.3 million. Our credit agreements generally contain customary lending provisions that allow us relief from funding obligations for previously made commitments in instances where the underlying company experiences material adverse events that affect the financial condition or business outlook for the company. We cannot assure you that any of these unfunded commitments or any future obligations will be drawn by the venture growth stage companies. We have also entered into commitments with certain portfolio companies that permit an increase in the commitment amount in the future in the event that conditions to such increases are met. If such conditions to increase are met, these amounts may become unfunded commitments if not drawn prior to expiration. As of December 31, 2020, this backlog of potential future commitments totaled \$20.8 million.

The actual borrowing needs of our portfolio companies may exceed our expected funding requirements, especially during a challenging economic environment when our portfolio companies may be more dependent on our credit commitments due to the lack of available credit elsewhere, an increasing cost of credit or the limited availability of financing from venture capital firms. In addition, investors in some of our portfolio companies may fail to meet their underlying investment commitments due to liquidity or other financing issues, which may increase our portfolio companies' borrowing needs. Any failure to meet our unfunded credit commitments in accordance with the actual borrowing needs of our portfolio companies may have a material adverse effect on our business, financial condition and results of operations. We intend to use cash flow from normal and early principal repayments, indebtedness, any proceeds from any subsequent equity or debt offerings, and available cash to fund our outstanding unfunded obligations. However, there can be no assurance that we will have sufficient capital available to fund these commitments as they come due. We may rely on assumptions, estimates, assurances and other information

related to potential non-utilization of unfunded commitments by our portfolio companies as well as related to potential exit events, principal prepayments, and fee payments. To the extent these assumptions, estimates, assurances and other information are incorrect or events are delayed, we may not be able to fund commitments as they come due. To the extent we are not able to fund commitments as they come due, we may be forced to sell assets, modify the terms of our commitments or default on our commitments, and as a result, our business could be materially and adversely affected.

Unlike traditional lenders, we offer a flexible payment and covenant structure to our portfolio companies and may choose not to take advantage of certain opportunities due to our long-term investment philosophy to develop and maintain deep and longstanding relationships with TPC's select group of leading venture capital investors, borrowers and entrepreneurs and to preserve our reputation.

As part of the Four Rs, our core investment philosophy, we seek to develop and maintain deep and longstanding relationships with TPC's select group of leading venture capital investors, borrowers and entrepreneurs and to preserve our reputation. Accordingly, our debt-financing products generally offer borrowers a flexible payment and covenant structure that may not provide us with the same level of protection as more restrictive conditions that traditional lenders typically impose on borrowers. Furthermore, there may be situations with borrowers on our Credit Watch List where we believe that a member of TPC's select group of venture capital investors intends to, expresses their intent to, or provides subject to milestones or contingencies, continued support, assistance and/or financial commitment to the borrower and our Adviser, based on such representation, may determine to modify or waive a provision or term of our existing loan which we would otherwise be entitled to enforce. The terms of any such modification or waiver may not be as favorable to us as we could have required, or had the right to require, and we may choose to enforce less vigorously our rights and remedies under our loans than traditional lenders due to our investment philosophy to preserve our reputation and maintain a strong relationship with the applicable venture capital investor or borrower based on their representations made to us.

If our portfolio companies are unable to protect their intellectual property rights, our business and prospects could be harmed. If our portfolio companies are required to devote significant resources to protecting their intellectual property rights, then the value of our investment could be reduced.

Our future success and competitive position depend in part upon the ability of our venture growth stage companies to obtain and maintain proprietary technology used in their products and services, which will often represent a significant portion of the collateral securing our loans. Venture growth stage companies will rely, in part, on patent, trade secret and trademark law to protect that technology, but competitors may misappropriate their intellectual property, and disputes as to ownership of intellectual property may arise. Venture growth stage companies may have also failed to properly obtain intellectual property ownership that, under intellectual property laws, by default resides with the personnel who created the intellectual property. Consequently, venture growth stage companies may, from time to time, be required to institute litigation in order to enforce their patents, copyrights or other intellectual property rights, to protect their trade secrets, to determine the validity and scope of the proprietary rights of others or to defend against claims of infringement. Such litigation could result in substantial costs and diversion of resources. Similarly, if a venture growth stage company is found to infringe upon or misappropriate a third party's patent or other proprietary rights, that company could be required to pay damages to such third party, alter its own products or processes, obtain a license from the third party and/or cease activities utilizing such proprietary rights, including making or selling products utilizing such proprietary rights. Any of the foregoing events could negatively affect both the company's ability to service our debt obligation and the value of any equity securities that we own, as well as any collateral securing our obligation.

Our relationship with certain portfolio companies may expose us to our portfolio companies' trade secrets and confidential information which may require us to be parties to non-disclosure agreements and restrict us from engaging in certain transactions.

Our relationship with some of our portfolio companies may expose us to our portfolio companies' trade secrets and confidential information (including transactional data and personal data about their employees and clients) that may require us to be parties to non-disclosure agreements and restrict us from engaging in certain transactions. Unauthorized access or disclosure of such information may occur, resulting in theft, loss or other misappropriation. Any theft, loss, improper use, such as insider trading or other misappropriation of confidential information could have a material adverse impact on our competitive positions, our relationship with our portfolio companies and our reputation and could subject us to regulatory inquiries, enforcement and fines, civil litigation and possible financial liability or costs.

Our financial condition, results of operations and cash flows could be negatively affected if we are unable to recover our principal investment as a result of a negative pledge or lack of a security interest on the intellectual property of our venture growth stage companies.

In some cases, we collateralize our loans with a secured collateral position in a venture growth stage company's assets, which may include a negative pledge or, to a lesser extent, no security on their intellectual property. In the case of a negative pledge, the venture growth stage company cannot encumber or pledge their intellectual property without our permission. In the event of a default on a loan, the intellectual property of the venture growth stage company will most likely be liquidated to provide proceeds to pay the creditors of the company. There can be no assurance that our security interest, if any, in the proceeds of the intellectual property will be enforceable in a court of law or bankruptcy court or that there will not be others with senior or *pari passu* credit interests.

If the assets securing the loans that we make decrease in value, then we may lack sufficient collateral to cover losses.

We believe that our borrowers generally are able to repay our loans from their available capital, future capital-raising transactions or current and/or future cash flow from operations. However, to attempt to mitigate credit risks, we typically take a secured collateral position. There is a risk that the collateral securing our secured loans may decrease in value over time, may be difficult to sell in a timely manner, may

be difficult to appraise, may be liquidated at a price lower than what we consider to be fair value and may fluctuate in value based upon the success of the business and market conditions, including as a result of the inability of a borrower to raise additional capital.

In some circumstances, other creditors have claims having priority over our senior lien. Although for certain borrowers, we may be the only form of secured debt (other than potentially specific equipment financing), other borrowers may also have other senior secured debt, such as revolving loans and/or term loans, having priority over our senior lien. At the time of underwriting our loans, we generally only consider growth capital loans for prospective borrowers with sufficient collateral that covers the value of our loan as well as the revolving and/or term loans that may have priority over our senior lien; however, there may be instances in which we have incorrectly estimated the current or future potential value of the underlying collateral or the underlying collateral value has decreased, in which case our ability to recover our investment may be materially and adversely affected.

In addition, a substantial portion of the assets securing our investment may be in the form of intellectual property, inventory and equipment and, to a lesser extent, cash and accounts receivable. Intellectual property, if any, that is securing our loan could lose value if, among other things, the borrower's rights to the intellectual property are challenged or if the borrower's license to the intellectual property is revoked or expires. Inventory may not be adequate to secure our loan if our valuation of the inventory at the time that we made the loan was not accurate or if there is a reduction in the demand for the inventory.

Similarly, any equipment securing our loan may not provide us with the anticipated security if there are changes in technology or advances in new equipment that render the particular equipment obsolete or of limited value, or if the borrower fails to adequately maintain or repair the equipment. The residual value of the equipment at the time we would take possession may not be sufficient to satisfy the outstanding debt and we could experience a loss on the disposition of the equipment. Any one or more of the preceding factors could materially impair our ability to recover our investment in a foreclosure.

Our portfolio companies may have limited operating histories and financial resources.

Our portfolio consists of investments in companies that have relatively limited operating histories. Generally, very little public information exists about these companies, and we are required to rely on the ability of our Adviser to obtain adequate information to evaluate the potential returns from investing in these companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investments. These companies may be particularly vulnerable to U.S. and foreign economic downturns such as the recent recession and may have limited access to capital. These businesses also frequently have less diverse product lines and a smaller market presence than larger competitors and may experience substantial variations in operating results. They may face intense competition, including from companies with greater financial, technical, operational and marketing resources, and typically depend upon the expertise and experience of a single individual executive or a small management team. Our success depends, in large part, upon the abilities of the key management personnel of our portfolio companies, who are responsible for the day-to-day operations of our portfolio companies. Competition for qualified personnel is intense at any stage of a company's development. The loss of one or more key managers can hinder or delay a company's implementation of its business plan and harm its financial condition. Our portfolio companies may not be able to attract and retain qualified managers and personnel. Any inability to do so may negatively affect our investment returns.

In addition, our existing and future portfolio companies may compete with each other for investment or business opportunities and the success of one could negatively impact the other. Furthermore, some of our portfolio companies do business in regulated industries and could be affected by changes in government regulation. Accordingly, these factors could impair their cash flow or result in other events, such as bankruptcy, which could limit their ability to repay their obligations to us, and may materially and adversely affect the return on, or the recovery of, our investment. As a result, we may lose our entire investment in any or all of our portfolio companies.

We make debt investments in venture growth stage companies that generally do not have sufficient cash resources to repay our loan in full at the time of its origination.

We invest primarily in venture growth stage companies that generally do not have sufficient cash-on-hand to satisfy our loan in full at the time we originate the loan. Following our investment, these companies may be unable to successfully scale operations and increase revenue as we had anticipated at the time we made the investment. In certain circumstances, these companies may not be able to generate meaningful customer sales, commitments or orders due to unfavorable market conditions. As a result, the company may not generate sufficient cash flow to service our loan and/or the company's venture capital investors may no longer provide the company with meaningful invested equity capital to provide a debt financing cushion to our loan. As a consequence, the company may (i) request us to restructure our loan resulting in the delay of principal repayment, the reduction of fees and/or future interest rates and/or the possible loss of principal or (ii) experience bankruptcy, liquidation or similar financial distress. We may be unable to accommodate any such restructuring request due to the eligibility requirements under the Credit Facility or otherwise. The bankruptcy, liquidation and/or recovery process has a number of significant inherent risks for us as a creditor. Many events in a bankruptcy proceeding are the product of contested matters and adversarial proceedings and are beyond the control of the creditors. A bankruptcy filing by one of our portfolio companies may adversely and permanently affect our investment in that company. If the proceeding is converted to liquidation, the liquidation value of the company may not equal the fair value that was believed to exist at the time of our investment. The duration of a bankruptcy, liquidation and/or recovery proceeding is also difficult to predict, and a creditor's return on investment can be materially and adversely affected by delays until the plan of reorganization or liquidation ultimately becomes effective. The administrative costs in connection with a bankruptcy proceeding are frequently high and would be paid out of the debtor's estate prior to any return to creditors. Because the standards for classification of claims under bankruptcy law are vague, our influence with respect to the obligations we own may be lost by increases in the number and amount of claims or by different treatment. In the early stages of the bankruptcy process, it is often difficult to estimate the extent of, or even to identify, any contingent claims that might be made. In addition, certain claims that have priority by law (for example, claims for taxes) may be substantial.

There may be circumstances when our debt investments could be subordinated to claims of other creditors or we could be subject to lender liability claims.

Even though we structure many investments as secured loans, if one of our portfolio companies were to go bankrupt, depending on the facts and circumstances, and based upon principles of equitable subordination as defined by existing case law, a bankruptcy court could subordinate all or a portion of our claim to that of other creditors and transfer any lien securing such subordinated claim to the bankruptcy estate. The principles of equitable subordination defined by case law have generally indicated that a claim may be subordinated only if its holder is guilty of misconduct or where the senior loan is re-characterized as an equity investment and the senior lender has actually provided significant managerial assistance to the bankrupt debtor. We may also be subject to lender liability claims for actions taken by us with respect to a borrower's business or instances where we exercise control over the borrower. It is possible that we could become subject to a lender's liability claim, including as a result of actions taken in rendering significant managerial assistance or actions to compel and collect payments from the borrower outside the ordinary course of business. Such risk of equitable subordination may be potentially heightened with respect to various portfolio investments that we may be deemed to control.

The lack of liquidity in our investments may materially and adversely affect our ability to meet our investment objectives.

The majority of our assets are invested in illiquid loans and a substantial portion of our investments in leveraged companies are subject to legal and other restrictions on resale or are otherwise less liquid than more broadly traded public securities. The illiquidity of these investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments.

To the extent that we invest in equity or equity-linked securities of privately-held companies, there can be no assurances that a trading market will develop for the securities that we wish to liquidate, or that the subject companies will permit their shares to be sold through such marketplaces. A lack of initial public offering opportunities for venture capital-backed companies could lead to companies staying longer in our portfolio as private entities that continue to require private funding. This situation may adversely affect the amount of available funding for venture growth stage companies. A lack of initial public offering opportunities for venture capital-backed companies can also cause some venture capital firms to change their strategies, leading some of them to reduce funding of their portfolio companies and making it more difficult for such companies to access capital and to fulfill their potential, which can result in unrealized depreciation and realized losses in such companies by other companies such as ourselves who are co-investors in such companies.

Even if a subject portfolio company completes an initial public offering, we are typically subject to lock-up provisions that prohibit us from selling our investments into the public market for specified periods of time after the initial public offering. As a result, the market price of securities that we hold may decline substantially before we are able to sell these securities following an initial public offering.

Publicly traded securities involve significant risks that differ from those associated with non-traded securities.

Certain of the companies in which we have invested have in the past conducted initial public offerings and become publicly traded, and other current and future portfolio companies may seek to do the same. In the event that a portfolio company completes an initial public offering, we will hold publicly traded securities in such company. Publicly traded securities involve significant risks that differ in type and degree from the risks associated with investments in private companies. These risks include greater volatility in the valuation of such companies, increased likelihood of shareholder litigation against such companies, and increased costs associated with each of the aforementioned risks. As a result, the market value of the publicly traded securities we hold may fluctuate significantly.

In addition, we are typically subject to lock-up provisions that prevent us from disposing of our investments for specified periods of time after a portfolio company's initial public offering. In the event that we dispose of any such securities, such securities may be sold at a price less than they otherwise would have been absent restrictions on transfer and/or for less than their initial cost.

Any unrealized losses we experience on our investment portfolio may be an indication of future realized losses, which could reduce our funds available for distribution and could have a material adverse effect on our ability to service our outstanding borrowings.

As a BDC, we are required to carry our investments at fair value as determined in good faith by or under the direction of our Board. Decreases in the market values or fair values of our investments are recorded as unrealized losses. Any unrealized losses in our investment portfolio could be an indication of a portfolio company's inability to meet its repayment obligations to us with respect to the affected investments. This could result in realized losses in the future and ultimately in reductions of our funds available for distribution in future periods and could materially and adversely affect our ability to service our outstanding borrowings.

Our stockholders do not have any input in our Adviser's investment decisions.

Our investments are selected by our Adviser, subject to the approval of its Investment Committee. Our stockholders do not have input into our Adviser's investment decisions. As a result, our stockholders are unable to evaluate any of our potential portfolio investments. These factors increase the uncertainty, and thus the risk, of investing in shares of our common stock.

Because we do not hold controlling equity interests in our portfolio companies, we are not able to exercise control over our portfolio companies or prevent decisions by management that could decrease the value of our investment.

We do not hold controlling equity positions in any of our portfolio companies. As a result, we are subject to the risk that a portfolio company may make business decisions with which we disagree and that the management and/or stockholders of a portfolio company may take risks or otherwise act in ways that have a material adverse effect on our interests. Due to the lack of liquidity of the debt and equity investments that we hold in our portfolio, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company and may therefore suffer a decrease in the value of our investment.

We may suffer a loss if a portfolio company defaults on a loan, including the entire or partial loss of the accrued PIK interest, the end-of-term payment and/or OID, such as warrant investments and facility fees due to us. To the extent we invest in OID instruments, including PIK loans, zero coupon bonds, and debt securities with attached warrants, you will be exposed to certain risks associated with such investments.

Our debt-financing products generally offer a flexible payment and covenant structure to our portfolio companies that may not provide the same level of protection to us as more restrictive conditions that traditional lenders typically impose on borrowers. For example, our secured loans generally include an end-of-term payment, PIK interest payment and/or OID, such as warrant investments and facility fees. If a portfolio company fails to satisfy financial or operating covenants imposed by us or other lenders, the company may default on our loan which could potentially lead to termination of its loans and foreclosure on its assets. If a portfolio company defaults under our loan, this could trigger cross-defaults under other agreements and jeopardize such portfolio company's ability to meet its obligations under the loans or equity securities that we hold, including payment to us of the end-of-term payment, PIK interest payment and/or OID, such as warrant investments and facility fees. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting portfolio company.

To the extent that we invest in OID instruments, including PIK loans, zero coupon bonds, and debt securities with attached warrants, investors will be exposed to the risks associated with the inclusion of such non-cash income in taxable and accounting income prior to receipt of cash, including the following risks:

- the interest payments deferred on a PIK loan are subject to the risk that the borrower may default when the deferred payments are due in cash at the maturity of the loan;
- the interest rates on PIK loans are higher to reflect the time-value of money on deferred interest payments and the higher credit risk of borrowers who may need to defer interest payments;
- PIK instruments may have unreliable valuations because the accruals require judgments about ultimate collectability of the deferred payments and the value of the associated collateral;
- an election to defer PIK interest payments by adding them to principal increases our gross assets and, thus, increases future base management fees to the Adviser and, because interest payments will then be payable on a larger principal amount, the PIK election also increases the Adviser's future income incentive fees at a compounding rate;
- market prices of OID instruments are more volatile because they are affected to a greater extent by interest rate changes than instruments that pay interest periodically in cash;
- the deferral of interest on a PIK loan increases its loan-to-value ratio, which is a measure of the riskiness of a loan;
- OID creates the risk of non-refundable cash payments to the Adviser based on non-cash accruals that may never be realized;
- for U.S. federal income tax purposes, we will be required to make distributions of OID income to shareholders without receiving any cash and such distributions have to be paid from offering proceeds or the sale of assets without investors being given any notice of this fact; and
- the required recognition of OID, including PIK, interest for U.S. federal income tax purposes may have a negative impact on liquidity, because it represents a non-cash component of our taxable income that must, nevertheless, be distributed in cash to investors to avoid it being subject to U.S. federal corporate-level taxation.

Prepayments of our loans could have a material adverse impact on our results of operations and our ability to make stockholder distributions, increase the risk of violating 1940 Act provisions applicable to BDCs and breaching covenants under our borrowing arrangements, and could result in a decline in the market price of our shares.

We are subject to the risk that the loans we make to our portfolio companies may be repaid prior to maturity. We expect that our investments will generally allow for repayment at any time subject to penalties in certain limited circumstances. When this occurs, we generally reinvest these proceeds in temporary investments, pending their future investment in accordance with our investment strategy. These temporary investments typically have substantially lower yields than the loan being prepaid and we could experience significant delays in reinvesting these amounts. Any future investment may also be at lower yields than the loan that was repaid. As a result, our financial condition, results of operations and cash flows could be materially and adversely affected if one or more of our portfolio companies elect to prepay amounts owed to us. Prepayments could also negatively impact our ability to make, or the amount of, stockholder distributions with respect to our common stock, which could result in a decline in the market price of our shares. In addition, any such prepayments could materially increase the risk of failing to meet 1940 Act provisions applicable to BDCs, including the qualifying asset test, and increases the risk of breaching covenants under

the Credit Facility, under the indenture governing the 2022 Notes, and under the Note Purchase Agreement, or otherwise triggering an event of default under the relevant borrowing arrangement. These risks are increased to the extent that prepayment levels during a period increase unexpectedly.

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.

We invest a portion of our capital in loans that have a secured collateral position. Our portfolio companies may have, or may be permitted to incur, other debt that is secured by and ranks equally with, or senior to, all or a portion of the collateral secured by the loans in which we invest. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we are entitled to receive payments in respect of the loans in which we invest or are entitled to receive payment from the disposition of certain collateral or all collateral senior to us. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying senior creditors, a portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with loans in which we invest, we would have to share any distributions on an equal and ratable basis with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the portfolio company.

The senior liens on the collateral secure the portfolio company's obligations under any outstanding senior debt and may secure certain other future debt that may be permitted to be incurred by the portfolio company under the agreements governing the loans. The holders of obligations secured by senior liens on the collateral generally control the liquidation of, and are entitled to receive proceeds from, any realization of the collateral to repay their obligations in full before us. In addition, the value of the collateral in the event of liquidation depends on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from sales of all of the collateral would be sufficient to satisfy the loan obligations secured by the senior liens after payment in full of all obligations secured by other liens on the collateral. If such proceeds were not sufficient to repay amounts outstanding under the loan obligations secured by other liens, then we, to the extent not repaid from the proceeds of the sale of the collateral, will only have an unsecured claim against the portfolio company's remaining assets, if any.

The rights we may have with respect to the collateral securing the loans we make to our portfolio companies with senior debt outstanding may also be limited pursuant to the terms of one or more intercreditor agreements that we enter into with the holders of such senior debt. Under a typical intercreditor agreement, at any time that obligations that have the benefit of the senior liens are outstanding, any of the following actions that may be taken in respect of the collateral will be at the direction of the holders of the obligations secured by the senior liens:

- the ability to cause the commencement of enforcement proceedings against the collateral;
- the ability to control the conduct of such proceedings;
- the approval of amendments to collateral documents;
- releases of liens on the collateral;
- waivers of past defaults under collateral documents; and
- we may not have the ability to control or direct such actions, even if our rights, including our security interest in the collateral, are materially and adversely affected.

The disposition of our investments may result in contingent liabilities.

A substantial majority of our investments are loans. In connection with the disposition of an investment in loans, we may be required to make representations about the business and financial affairs of the portfolio company typical of those made in connection with the sale of a business. We may also be required to indemnify the purchasers of such investment to the extent that any such representations turn out to be inaccurate or with respect to potential liabilities. These arrangements may result in contingent liabilities that ultimately result in funding obligations that we must satisfy through our return of distributions previously made to us.

Our equity related investments are highly speculative, and we may not realize gains from these investments.

When we make a secured loan, we generally acquire warrant investments in the portfolio company. From time to time we may also acquire equity participation rights in connection with an investment which will allow us, at our option, to participate in current or future rounds of equity financing through direct capital investments in our portfolio companies. In addition, we may be required to accrue OID which decreases the balance on our secured loans by an amount equal to the value of the warrant investment we receive in connection with the applicable secured loan over its lifetime. To the extent we hold these equity related investments, we attempt to dispose of them and realize gains upon our disposition of them. However, the equity related investments we receive and make may not appreciate in value or may decline in value. We also may be unable to realize any value if a portfolio company does not have a liquidity event, such as a sale of the business or public offering, or if the portfolio company defaults under its outstanding indebtedness, which could materially decrease the value of, or prevent us from being able to sell, the underlying equity related investment. As a result, we may not be able to realize gains from our equity related investments and any gains that we do realize on the disposition of any equity related investment may not be sufficient to offset any other losses or OID we experience or accrue.

Our investments in the life sciences industry are subject to extensive government regulation, litigation risk and certain other risks particular to that industry.

We have invested and plan to continue investing in venture growth stage companies in the life sciences industry that are subject to extensive regulation by the Food and Drug Administration and, to a lesser extent, federal, state and other foreign agencies. If any of these companies fail to comply with applicable regulations, they could be subject to significant penalties and claims that could materially and adversely affect their operations. In addition, governmental budgetary constraints affecting the regulatory approval process, new laws, regulations or judicial interpretations of existing laws and regulations might materially and adversely affect a company in this industry. Venture growth stage companies in the life sciences industry may also have a limited number of suppliers of necessary components or a limited number of manufacturers for their products, and therefore face a risk of disruption to their manufacturing process if they are unable to find alternative suppliers when needed. Any of these factors could have a material adverse effect on the operations of a company in this industry and, in turn, impair our ability to timely collect principal and interest payments owed to us.

Investments in secured loans to companies with foreign operations may involve significant risks in addition to the risks inherent in U.S. investments.

Our investment strategy contemplates making secured loans to companies with foreign operations. As of December 31, 2020, 23.0% of our portfolio at fair value consisted of companies not domiciled in the United States as they did not have their principal place of business in the United States. Investing in such companies may expose us to additional risks not typically associated with investing in U.S. companies or U.S. companies with no foreign operations. These risks include changes in exchange control regulations, intellectual property laws, political and social instability, limitations in our ability to perfect our security interests, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility. In addition, we expect that investing in such companies will expose us to higher administrative, legal and monitoring costs and expenses not typically associated with investing in U.S. companies or U.S. companies with no foreign operations.

We may expose ourselves to risks resulting from our use of interest rate hedging transactions.

As of December 31, 2020, 58.6% of our portfolio (at principal balance) had a floating interest rate indexed to the U.S. Prime rate (“Prime Rate”). The remaining 41.4% of our portfolio had a fixed interest rate. Our Credit Facility bears interest at a floating rate indexed to certain indices, including LIBOR and commercial paper rates. We may utilize instruments such as interest rate swaps, caps, collars and/or floors to seek to hedge against fluctuations in the relative values of our fixed-rate portfolio positions and/or to hedge against the impact on our net investment income from changes in market interest rates. When we engage in interest rate hedging transactions, we may expose ourselves to risks associated with such transactions. We believe that any hedging transactions that we enter into in the future will not be considered “qualifying assets” under the 1940 Act, which may limit our hedging strategy more than other companies that are not subject to the 1940 Act. Our ability to engage in hedging transactions may also be adversely affected by rules adopted by the U.S. Commodity Futures Trading Commission (“CFTC”), unless our Adviser registers with CFTC as a commodity pool operator or obtains an exemption from such requirement. On February 18, 2020, our Adviser claimed an exclusion from the definition of the term “commodity pool operator” under the Commodity Exchange Act and therefore, is not subject to registration or regulation as a commodity pool operator under such Act.

Hedging transactions do not eliminate the risks associated with possible interest rate fluctuations on the value of our investments. These risks include: (i) the possibility that the market will move in a manner or direction that would have resulted in gain for us had an interest rate hedging transaction not been utilized, in which case our performance would have been better had we not engaged in the interest rate hedging transaction; (ii) the risk of imperfect correlation between the risk sought to be hedged and the interest rate hedging transaction used; (iii) potential illiquidity for the hedging instrument used, which may make it difficult for us to close-out or unwind an interest rate hedging transaction; and (iv) the possibility that the counterparty fails to honor its obligation. Furthermore, it may not be possible to hedge against an interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price. Moreover, for a variety of reasons, we may not seek to establish a perfect correlation between such hedging instruments and the interest rate being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss.

Our failure to make protective or follow-on investments in our portfolio companies could impair the value of our portfolio.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as “protective” and/or “follow-on” investments, in order to attempt to preserve or enhance the value of our initial investment. We may elect not to make follow-on investments or otherwise lack sufficient funds to make those investments. We have the discretion to make any follow-on investments, subject to the availability of capital resources. The failure to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company, result in a diminished current value or impair the ability or likelihood for a full recovery of the value of our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we do not want to increase our concentration of risk, we prefer other opportunities, we are subject to BDC requirements that would prevent such follow-on investments or the follow-on investment would affect our qualification as a RIC.

The effect of global climate change may impact the operations of our portfolio companies.

There may be evidence of global climate change. Climate change creates physical and financial risk, and some of our portfolio companies may be adversely affected by climate change. Extreme weather conditions in general require more system backup, adding to costs, and can contribute to increased system stresses, including service interruptions. In addition, as a result of the potential governmental response to climate change, some of our portfolio companies may become subject to new or strengthened regulations or legislation that could increase their operating costs and/or decrease their revenues.

Risks Relating to our Common Stock and Securities

Our common stock may trade below our net asset value per share, which limits our ability to raise additional equity capital.

If our common stock is trading below our net asset value per share, we are not able to issue additional shares of our common stock at the market price without first obtaining the approval for such issuance from our stockholders and our independent directors. If our common stock trades below our net asset value per share, the higher cost of equity capital may result in it being unattractive to raise new equity, which may limit our ability to grow. The risk of our common stock trading below our net asset value per share is separate and distinct from the risk that our net asset value per share may decline. We cannot predict whether shares of our common stock will trade above, at or below our net asset value per share.

Our stockholders will experience dilution in their ownership percentage if they opt out of our dividend reinvestment plan and participating stockholders can experience dilution in the value of their shares if we distribute shares through our dividend reinvestment plan at a price below the then-current NAV.

All dividends declared in cash payable to stockholders that are participants in our dividend reinvestment plan may be reinvested in newly-issued shares of our common stock. As a result, our stockholders that opt out of our dividend reinvestment plan will experience dilution in their ownership percentage of our common stock over time. In addition, we may distribute shares through our dividend reinvestment plan at a price that is below our then-current NAV per share, which would result in dilution of the value of the shares held by stockholders who participate in our dividend reinvestment plan.

You may receive shares of our common stock through our dividend reinvestment plan, and we may otherwise choose to pay dividends in our common stock, in which case you may be required to pay tax in excess of the cash you receive.

Our cash distributions to stockholders will be automatically reinvested in additional shares of our common stock unless such stockholder has specifically “opted out” of our dividend reinvestment plan so as to receive cash distributions. In addition, we may in the future distribute taxable dividends that are payable in part in shares of our common stock. In accordance with certain applicable U.S. Treasury regulations and published guidance issued by the IRS, a RIC may treat a distribution of its own common stock as fulfilling the RIC distribution requirements if each stockholder may elect to receive his or her entire distribution in either cash or common stock of the RIC, subject to a limitation that the aggregate amount of cash to be distributed to all stockholders must be at least 20% of the aggregate declared distribution. If too many stockholders elect to receive cash, the cash available for distribution must be allocated among the stockholders electing to receive cash (with the balance of the distribution paid in stock). In no event will any stockholder electing to receive cash, receive less than the lesser of (a) the portion of the distribution such stockholder has elected to receive in cash or (b) an amount equal to his or her entire distribution times the percentage limitation on cash available for distribution. If these and certain other requirements are met, for U.S. federal income tax purposes, the amount of the dividend paid in common stock will be equal to the amount of cash that could have been received instead of common stock. Taxable stockholders receiving such dividends will be required to include the full amount of the dividend as ordinary income (or as long-term capital gain to the extent such distribution is properly reported as a capital gain dividend) to the extent of our current and accumulated earnings and profits for U.S. federal income tax purposes. As a result, a U.S. stockholder may be required to pay tax with respect to such dividends in excess of any cash received. If a U.S. stockholder sells the stock it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our common stock at the time of the sale. Furthermore, with respect to Non-U.S. stockholders, we may be required to withhold U.S. tax with respect to such dividends including in respect of all or a portion of such dividend that is payable in common stock. In addition, if a significant number of our stockholders determine to sell shares of our common stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our common stock.

Investing in our common stock may involve an above average degree of risk.

The investments we make in accordance with our investment strategy may result in a higher amount of risk and higher volatility or loss of principal than alternative investment options. Our investments in venture growth stage companies with secured loans, warrant investments and direct equity investments may be speculative and, therefore, an investment in our common stock may not be suitable for someone with lower risk tolerance.

The market price of our common stock may fluctuate significantly.

The market price and liquidity of the market for shares of our common stock may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

- price and volume fluctuations in the overall stock market from time to time;

- significant volatility in the market price and trading volume of securities of BDCs or other companies in our sector, which is not necessarily related to the operating performance of these companies;
- any inability to deploy or invest our capital;
- fluctuations in interest rates;
- any inability to access the capital markets;
- realized and unrealized losses in investments in our portfolio companies;
- the financial performance of the industries in which we invest;
- announcement of strategic developments, acquisitions, and other material events by us or our competitors or operating performance of companies comparable to us;
- changes in regulatory policies or tax guidelines, particularly with respect to RICs or BDCs;
- perception or reputation of TPC;
- loss of our qualification as a RIC or BDC;
- changes in earnings or variations in operating results;
- changes in accounting guidelines governing valuation of our investments;
- any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;
- departure of, or loss of access to, members of our Adviser's senior investment team;
- operating performance of companies comparable to us; and
- general economic trends and other external factors.

Our business and operation could be negatively affected if we become subject to any securities litigation or shareholder activism, which could cause us to incur significant expense, hinder execution of investment strategy and impact our stock price.

In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has often been brought against that company. Shareholder activism, which could take many forms or arise in a variety of situations, has been increasing in the BDC space in recent years. While we are currently not subject to any securities litigation or shareholder activism, due to the potential volatility of our stock price and for a variety of other reasons, we may in the future become the target of securities litigation or shareholder activism. Securities litigation and shareholder activism, including potential proxy contests, could result in substantial costs and divert management's and our board of directors' attention and resources from our business. Additionally, such securities litigation and shareholder activism could give rise to perceived uncertainties as to our future, adversely affect our relationships with service providers and make it more difficult to attract and retain qualified personnel. Also, we may be required to incur significant legal fees and other expenses related to any securities litigation and activist shareholder matters. Further, our stock price could be subject to significant fluctuation or otherwise be adversely affected by the events, risks and uncertainties of any securities litigation and shareholder activism.

Sales of substantial amounts of our common stock in the public market may have an adverse effect on the market price of our common stock.

Sales of substantial amounts of our common stock, or the availability of such common stock for sale, could have an adverse effect on the prevailing market prices for our common stock. If this occurs and continues, it could impair our ability to raise additional capital through the sale of securities should we desire to do so.

The trading market or market value of our publicly issued debt securities may fluctuate.

Our publicly issued debt securities may or may not continue to have an established trading market. We cannot provide assurance that a trading market for our publicly issued debt securities will be maintained. In addition to our creditworthiness, many factors may have a material adverse effect on the trading market for, and market value of, our publicly issued debt securities. These factors include, but are not limited to, the following:

- the time remaining to the maturity of these debt securities;
- the outstanding principal amount of debt securities with terms identical to these debt securities;
- the ratings assigned by national statistical ratings agencies;
- the general economic environment;
- the supply of debt securities trading in the secondary market, if any;
- the redemption or repayment features, if any, of these debt securities;
- the level, direction and volatility of market interest rates generally; and

- market rates of interest higher or lower than rates borne by the debt securities.

An investor should also be aware that there may be a limited number of buyers when such investor decides to sell its debt securities. This too may have a material adverse effect on the market value of the debt securities or the trading market for the debt securities.

Terms relating to redemption may have a material adverse effect on the return on any debt securities that we may issue.

If debt securities are redeemable at our option, such as the 2022 Notes and 2025 Notes, we may choose to redeem debt securities at times when prevailing interest rates are lower than the interest rate paid on debt securities. In addition, if debt securities are subject to mandatory redemption, we may be required to redeem debt securities also at times when prevailing interest rates are lower than the interest rate paid on debt securities. In this circumstance, an investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as the debt securities being redeemed.

We may redeem the 2022 Notes in whole or in part at any time or from time to time at our option at par plus all accrued and unpaid interest payments to but not including the date fixed for redemption. In addition, subject to the terms of the Note Purchase Agreement, we may redeem the 2025 Notes in whole or in part at any time or from time to time at our option at par plus accrued interest to the prepayment date and, if applicable, a make-whole premium. In addition, we are obligated to offer to prepay the 2025 Notes at par plus accrued and unpaid interest up to, but excluding, the date of prepayment, if certain change in control events occur.

We may not be able to prepay the 2025 Notes upon a change in control.

The Note Purchase Agreement governing the 2025 Notes requires us to offer to prepay all of the issued and outstanding notes upon the occurrence of certain change in control events, which could have a material adverse effect on our business, financial condition and results of operations. Upon a change in control event, holders of the 2025 Notes and any additional notes issued under the terms of the Note Purchase Agreement may require us to prepay for cash some or all of the notes at a prepayment price equal to 100% of the aggregate principal amount of the notes being prepaid, plus accrued and unpaid interest to, but not including, the date of prepayment. If a change in control were to occur, we may not have sufficient funds to prepay any such accelerated indebtedness.

The 2022 Notes and 2025 Notes are unsecured and therefore are effectively subordinated to any secured indebtedness we have currently incurred or may incur in the future.

The 2022 Notes and 2025 Notes are not secured by any of our assets or any of the assets of our subsidiaries and rank equally in right of payment with all of our existing and future unsubordinated, unsecured indebtedness. As a result, the 2022 Notes and 2025 Notes are effectively subordinated to any secured indebtedness we or our subsidiaries have currently incurred and may incur in the future (or any indebtedness that is initially unsecured to which we subsequently grant security) to the extent of the value of the assets securing such indebtedness. In any liquidation, dissolution, bankruptcy or other similar proceeding, the holders of any of our existing or future secured indebtedness and the secured indebtedness of our subsidiaries may assert rights against the assets pledged to secure that indebtedness in order to receive full payment of their indebtedness before the assets may be used to pay other creditors, including the holders of the 2022 Notes and 2025 Notes.

The 2022 Notes and 2025 Notes are structurally subordinated to the indebtedness and other liabilities of our subsidiaries.

The 2022 Notes and 2025 Notes are obligations exclusively of TriplePoint Venture Growth BDC Corp. and not of any of our subsidiaries. None of our current subsidiaries is a guarantor of the 2022 Notes or the 2025 Notes, and the 2022 Notes and the 2025 Notes are generally not required to be guaranteed by any subsidiaries we may acquire or create in the future. Except to the extent we are a creditor with recognized claims against our subsidiaries, all claims of other creditors of our subsidiaries, including claims under the Credit Facility, have priority over our equity interests in such subsidiaries (and therefore over the claims of our creditors, including holders of the 2022 Notes and the 2025 Notes) with respect to the assets of such subsidiaries. Even if we are recognized as a creditor of one or more of our subsidiaries, our claims would still be effectively subordinated to any security interests in the assets of any such subsidiary and to any indebtedness or other liabilities of any such subsidiary senior to our claims, including under the Credit Facility. Consequently, the 2022 Notes and the 2025 Notes, as well as any additional notes issued under the terms of the Note Purchase Agreement, are or will be structurally subordinated to all indebtedness and other liabilities of any of our subsidiaries and any subsidiaries that we may in the future acquire or establish. In addition, our subsidiaries may incur substantial additional indebtedness in the future, including under the Credit Facility or otherwise, all of which would be structurally senior to the 2022 Notes and the 2025 Notes.

An active trading market for the 2022 Notes may not develop or be sustained, which could limit the market price of the 2022 Notes or your ability to sell them.

Although the 2022 Notes are listed on the NYSE under the symbol “TPVY,” we cannot provide any assurances that an active trading market will develop or be sustained for the 2022 Notes or that any of the notes will be able to be sold. At various times, the 2022 Notes may trade at a discount from their initial offering price depending on prevailing interest rates, the market for similar securities, our credit ratings, general economic conditions, our financial condition, performance and prospects and other factors. To the extent an active trading market is not sustained, the liquidity and trading price for the 2022 Notes may be harmed.

A downgrade, suspension or withdrawal of the credit rating, if any, assigned by a rating agency to us or any of our outstanding unsecured notes, including the 2025 Notes, or change in the debt markets could cause the liquidity or market value of our securities to decline significantly.

Our credit ratings are an assessment by rating agencies of our ability to pay our debts when due. Consequently, real or anticipated changes in our credit ratings will generally affect the value and trading prices, if any, of our outstanding unsecured notes, including the 2025 Notes. These credit ratings may not reflect the potential impact of risks relating to the structure or marketing of the notes. Credit ratings are not a recommendation to buy, sell or hold any security, and may be revised or withdrawn at any time by the issuing organization in its sole discretion. We undertake no obligation to maintain our credit ratings or to advise any holders of our unsecured notes of any changes in our credit ratings, except as may be required under the terms of any applicable indenture or other governing document, including the Note Purchase Agreement. There can be no assurance that our credit ratings will remain for any given period of time or that such credit ratings will not be lowered or withdrawn entirely by the rating agency if in their judgment future circumstances relating to the basis of the credit ratings, such as adverse changes in our business or operations, so warrant. Any downgrades to us or our securities could increase our cost of capital or otherwise have a negative effect on our results of operations and financial condition. In this regard, the fixed rate of the 2025 Notes and any additional notes that may be issued under the Note Purchase Agreement is subject to a 1.00% increase in the event that a Below Investment Grade Event (as defined in the Note Purchase Agreement) occurs, which risk is increased as a result of the impact of the COVID-19 pandemic. The conditions of the financial markets and prevailing interest rates have fluctuated in the past and are likely to fluctuate in the future, which could have an adverse effect on the market prices and value of our unsecured notes.

General Risk Factors

Global capital markets could enter a period of severe disruption and instability or an economic recession. These conditions have historically affected and could again materially and adversely affect debt and equity capital markets in the United States and around the world and could impair our portfolio companies and harm our operating results.

The U.S. and global capital markets have, from time to time, experienced periods of disruption characterized by the freezing of available credit, a lack of liquidity in the debt capital markets, significant losses in the principal value of investments, the re-pricing of credit risk in the broadly syndicated credit market, the failure of major financial institutions and general volatility in the financial markets. During these periods of disruption, general economic conditions deteriorated with material adverse consequences for the broader financial and credit markets, and the availability of debt and equity capital for the market as a whole, and financial services firms in particular, was reduced significantly. These conditions may reoccur for a prolonged period of time or materially worsen in the future. Increases to budget deficits or direct and contingent sovereign debt may create concerns about the ability of certain nations to service their sovereign debt obligations, and risks resulting from any current or future debt crisis in Europe, the United States or elsewhere could have a detrimental impact on the global economy and the financial condition of financial institutions generally.

The Chinese capital markets have experienced periods of instability over the past several years. The current political climate has also intensified concerns about a potential trade war between the U.S. and China in connection with each country's recent or proposed tariffs on the other country's products. These market and economic disruptions, the potential trade war with China and the impact of public health epidemics may have a material adverse impact on the ability of our portfolio companies to fulfill their end customers' orders due to supply chain delays, limited access to key commodities or technologies or other events that impact their manufacturers or their suppliers. Such events have affected, and may in the future affect, the global and U.S. capital markets, and our business, financial condition or results of operations.

In addition, there will likely continue to be considerable uncertainty as to the United Kingdom's post-transition and post-withdrawal framework following its agreement to leave the European Union (the "Brexit"), in particular as to the arrangements which will apply to its relationships with the European Union and with other countries. The new Trade and Cooperation Agreement reached between the European Union and United Kingdom in late 2020 is untested and may lead to ongoing political and economic uncertainty and periods of exacerbated volatility in both the United Kingdom and in wider European and global markets for some time. The current global financial market situation, as well as various social and political circumstances in the U.S. and around the world (including wars and other forms of conflict, terrorist acts, security operations and catastrophic events such as fires, floods, earthquakes, tornadoes, hurricanes and global health epidemics), may contribute to increased market volatility and economic uncertainties or deterioration in the U.S. and worldwide. Additionally, the U.S. government's credit and deficit concerns, the European sovereign debt crisis, and the potential trade war with China could cause interest rates to be volatile, which may negatively impact our ability to access the debt and equity capital markets on favorable terms and could have a material adverse effect on our business, financial condition and results of operations. Unfavorable economic conditions, including future recessions, also could increase our funding costs or result in a decision by lenders not to extend credit to us.

Market conditions may in the future make it difficult to extend the maturity of or refinance our existing indebtedness, including the Credit Facility, the 2022 Notes and the 2025 Notes, and any failure to do so could have a material adverse effect on our business. If we are unable to raise or refinance debt, then our equity investors may not benefit from the potential for increased returns on equity resulting from leverage and we may be limited in our ability to make new commitments or to fund existing commitments to our portfolio companies. In addition, the illiquidity of our investments may make it difficult for us to sell such investments if required. As a result, we may realize significantly less than the value at which we have recorded our investments.

Events outside of our control, including relating to public health crises, could negatively affect our portfolio companies' and our results of operations and financial condition, as well as the amount or frequency of our distributions to stockholders.

Periods of market volatility have occurred and could continue to occur in response to pandemics or other events outside of our control. These types of events have adversely affected, and could continue to adversely affect, operating results for us and for our portfolio companies. For example, the COVID-19 pandemic has led to, and for an unknown period of time will continue to lead to, disruptions in local, regional, national and global markets and economies affected thereby, including the United States. With respect to U.S. and global credit markets and the economy in general, this outbreak has resulted in, and until fully resolved is likely to continue to result in, the following (among other things): (i) restrictions on travel and the temporary closure of many corporate offices, retail stores, and manufacturing facilities and factories, resulting in significant disruption to the business of many companies, including supply chains and demand, as well as layoffs of employees; (ii) increased draws by borrowers on lines of credit; (iii) increased requests by borrowers for amendments or waivers of their credit agreements to avoid default, increased defaults by borrowers and/or increased difficulty in obtaining refinancing; (iv) volatility in credit markets, including greater volatility in pricing and spreads; and (v) evolving proposals and actions by state and federal governments to address the problems being experienced by markets, businesses and the economy in general, which may not adequately address the problems being facing such persons. The pandemic is having, and any future continuation of the pandemic could have, an adverse impact on the markets and the economy in general.

Although it is impossible to predict the precise nature and consequences of these events, or of any political or policy decisions and regulatory changes occasioned by emerging events or uncertainty on applicable laws or regulations that impact us and our portfolio companies and investments, it is clear that these types of events are impacting and will, for at least some time, continue to impact us and our portfolio companies; in many instances the impact will be adverse and material. Any potential impact to our results of operations will depend to a large extent on future developments and new information that could emerge regarding the duration and severity of the COVID-19 pandemic and the actions taken by authorities and other entities to contain the spread or treat its impact, all of which are beyond our control. These potential impacts, while uncertain, could adversely affect our and our portfolio companies' operating results and financial condition.

The COVID-19 pandemic and the uncertainty regarding the extent and duration of its impact has had a material adverse impact on the venture capital fundraising environment, including with respect to the venture growth stage companies in which we invest. Our portfolio companies generally require additional equity financing every twelve to twenty-four months. Due to the effects of the COVID-19 pandemic, there is an increased risk that one or more of our venture growth stage portfolio companies will not be able to raise additional financing or may be able to do so only at a price or on terms unfavorable to us, which risk may be amplified with respect to portfolio companies that have already taken steps to reduce or modify business operations or are operating in industries that are, or are perceived to be, more adversely affected by the COVID-19 pandemic. Such events would likely have a negative impact our investment returns, the fair value of our investment and our ability to restructure such investment on favorable terms if such portfolio company's cash flow from operating activities is insufficient during the COVID-19 pandemic to satisfy its continuing growth, working capital and other requirements or if such portfolio company is otherwise unable to access the benefits of one of the U.S. federal government stimulus programs that may be made available or meet the performance requirements necessary to forgive all or a portion of any loans made to it thereunder, as applicable. In addition, as a result of the financial stress caused by the effects of the COVID-19 pandemic, other investors in our portfolio companies may be unable to, or may choose not to, fulfill their ongoing funding obligations with respect to certain of our portfolio companies, may be unable to continue supporting the ongoing operations of our portfolio companies operationally and/or financially, or may seek to restructure or otherwise modify their existing investments in our portfolio companies in a manner that is detrimental to our investment, which could have a material adverse impact on our financing arrangement with the portfolio company and on our results of operations and financial condition. In addition, we intend to use cash and cash equivalents on hand, our available borrowing capacity under the Credit Facility, our anticipated cash flows from operations, including from contractual monthly portfolio company payments and cash flows and prepayments, and any proceeds from equity or debt offerings, to fund our outstanding unfunded obligations. Depending on the severity and duration of the impact of the COVID-19 pandemic on our results of operations and financial condition, there can be no assurance that we will have sufficient capital available to fund these commitments as they come due, which could harm the reputation of the Company and TPC among its select group of venture capital investors and in the venture capital market generally. Any such occurrence could decrease our deal flow and the outlook of our investments, resulting in a material adverse effect on our financial condition, results of operations and cash flows.

Developments related to the COVID-19 pandemic have already contributed to a decrease in the fair value of certain of our portfolio investments as of December 31, 2020, and there may be further decreases in the fair value of our portfolio investments going forward. In addition, the COVID-19 pandemic and the related disruption and financial distress experienced by our portfolio companies may have a material adverse effect on our investment income received from portfolio investments, particularly our interest income. We may need to modify our investments in some portfolio companies as a result of the adverse effects of the COVID-19 pandemic, which could reduce the amount or extend the time for payment of principal, reduce the rate or extend the time of payment of interest, and/or increase the amount of PIK interest we receive with respect to such investment, among other things. If an investment included in the borrowing base for the Credit Facility is downgraded to "Red (5)" on our credit watch list (as discussed under "Portfolio Composition, Investment Activity and Asset Quality - Asset Quality" in "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" of Part II of this Annual Report on Form 10-K), or if we materially modify the terms of such an investment, then the borrowing base under the Credit Facility will generally be reduced to the extent of the fair value of such investment, which may have a material adverse effect on our results of operations, financial condition and available liquidity. Any decreases in our net investment income would increase the portion of our cash flows dedicated to servicing existing borrowings under the Credit Facility, the 2022 Notes and the 2025 Notes and distribution payments to stockholders.

Depending on the duration of the COVID-19 pandemic and the extent of its impact on our portfolio companies' operations and our net investment income, any future distributions to our stockholders may be for amounts less than our historical distributions, may be made less

frequently than historical practices, and may be made in part cash and part stock (as per each stockholder's election), subject to a limitation that the aggregate amount of cash to be distributed to all stockholders must be at least 20% of the aggregate declared distribution.

We are currently operating in a period of capital markets disruption and economic uncertainty.

The U.S. capital markets have experienced extreme volatility and disruption following the global outbreak of COVID-19 that began in December 2019. Some economists and major investment banks have expressed concern that the continued spread of the virus globally could lead to a sustained period of world-wide economic downturn. Disruptions in the capital markets have increased the spread between the yields realized on risk-free and higher risk securities, resulting in illiquidity in parts of the capital markets. These and future market disruptions and/or illiquidity would be expected to have an adverse effect on our business, financial condition, results of operations and cash flows. Unfavorable economic conditions also would be expected to increase our funding costs, limit our access to the capital markets or result in a decision by lenders, including existing lenders, not to extend credit to us or renew or expand existing credit facilities. These events have limited and could continue to limit our investment originations, limit our ability to grow and have a material negative impact on our operating results and the fair values of our debt and equity investments.

We may experience fluctuations in our quarterly operating results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including our originations and underwriting processes, the interest rate payable on the secured loans we acquire, any prepayments or repayments made on our secured loans, the timing and amount of any warrant or equity investment returns, the timing of any drawdowns requested by our borrowers, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. In light of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

Changes in laws or regulations governing our operations may adversely affect our business or cause us to alter our business strategy.

We and our portfolio companies are subject to regulation by laws and regulations at the local, state, federal and, in some cases, foreign levels. These laws and regulations, as well as their interpretation, may be changed from time to time, and new laws and regulations may be enacted. Accordingly, any change in these laws or regulations, changes in their interpretation, or newly enacted laws or regulations could require changes to certain business practices of us or our portfolio companies, negatively impact the operations, cash flows or financial condition of us or our portfolio companies, impose additional costs on us or our portfolio companies or otherwise adversely affect our business or the business of our portfolio companies.

Additionally, changes to the laws and regulations governing our operations related to permitted investments may cause us to alter our investment strategy in order to avail ourselves of new or different opportunities. Such changes could result in material differences to the strategies and plans set forth herein and may shift our investment focus to other types of investments in which our Adviser's senior investment team may have little or no expertise or experience. Any such changes, if they occur, could have a material adverse effect on our financial condition, results of operations and cash flows.

Worldwide economic conditions, economic recessions or downturns, as well as political and economic conditions, could impair our venture growth stage companies and harm our operating results.

The business and operating results of our venture growth stage companies may be impacted by worldwide economic conditions. Any conflict or uncertainty, including due to regulatory changes, natural disasters, public health concerns, political unrest or safety concerns, could harm their financial condition and results of operations and cash flows. In addition, if the government of any country in which products are developed, manufactured or sold sets technical or regulatory standards for products developed or manufactured in or imported into their country that are not widely shared, it may lead some of their customers to suspend imports of their products into that country, require manufacturers or developers in that country to manufacture or develop products with different technical or regulatory standards and disrupt cross-border manufacturing, marketing or business relationships which, in each case, could harm the business of our venture growth stage company investments.

Many of the venture growth stage companies in which we make investments are susceptible to economic slowdowns or recessions and may be unable to repay our secured loans during such periods. Adverse economic conditions may decrease the value of collateral securing some of our secured loans. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing our investments and materially and adversely impact our financial condition, result of operations and cash flows.

Changes to U.S. tariff and import/export regulations may have a negative effect on our portfolio companies and, in turn, harm us.

There has been ongoing discussion and commentary regarding potential significant changes to U.S. trade policies, treaties and tariffs, creating significant uncertainty about the future relationship between the United States and other countries with respect to trade policies, treaties and tariffs. These developments, or the perception that any of them could occur, may have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global trade and, in particular, trade between the impacted nations and the United States. Any of these factors could depress economic activity and restrict our portfolio companies' access to suppliers or

customers and have a material adverse effect on their business, financial condition and results of operations, which in turn would negatively impact us.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We do not own any real estate or other physical properties materially important to our operations. Our executive offices are located at 2755 Sand Hill Road, Suite 150, Menlo Park, California 94025. These offices are provided by our Administrator pursuant to the Administration Agreement. We believe that our facilities are suitable and adequate for our business.

Item 3. Legal Proceedings

Neither we, the Adviser, nor our subsidiaries are currently subject to any material pending legal proceedings, other than ordinary routine litigation incidental to our businesses. We, the Adviser, and our subsidiaries may from time to time, however, be involved in litigation arising out of our operations in the normal course of business or otherwise. Furthermore, third parties may seek to impose liability on us in connection with the activities of our portfolio companies. While the outcome of any current legal proceedings cannot at this time be predicted with certainty, we do not expect any current matters will materially affect our financial condition or results of operations; however, there can be no assurance whether any pending legal proceedings will have a material adverse effect on our financial condition or results of operations in any future reporting period.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Common Stock, Holders and Distributions

Our common stock is traded on the NYSE under the symbol "TPVG." The following table sets forth, for each fiscal quarter during the last two fiscal years and the current fiscal year to date, the net asset value ("NAV") per share of our common stock, the high and low closing sales prices for our common stock, such sales prices as a percentage of NAV per share and quarterly distributions per share.

Period	NAV ⁽¹⁾	Closing Sales Price ⁽²⁾		Premium/(Discount) of High Sales Price to NAV ⁽³⁾	Premium/(Discount) of Low Sales Price to NAV ⁽³⁾	Declared Distributions
		High	Low			
First Quarter of 2021 (through March 2, 2021)	*	\$ 14.73	\$ 12.83	*	*	\$ 0.36
Fourth Quarter of 2020	\$ 12.97	\$ 13.56	\$ 10.49	4.5 %	(19.1)%	\$ 0.46 ⁽⁴⁾
Third Quarter of 2020	\$ 13.28	\$ 12.48	\$ 9.58	(6.0)%	(27.9)%	\$ 0.36
Second Quarter of 2020	\$ 13.17	\$ 11.55	\$ 4.69	(12.3)%	(64.4)%	\$ 0.36
First Quarter of 2020	\$ 12.85	\$ 14.42	\$ 2.90	12.2 %	(77.4)%	\$ 0.36
Fourth Quarter of 2019	\$ 13.34	\$ 16.98	\$ 13.92	27.3 %	4.3 %	\$ 0.36
Third Quarter of 2019	\$ 13.47	\$ 17.04	\$ 14.33	26.5 %	6.4 %	\$ 0.36
Second Quarter of 2019	\$ 14.19	\$ 14.50	\$ 13.31	2.2 %	(6.2)%	\$ 0.36
First Quarter of 2019	\$ 13.59	\$ 13.76	\$ 11.12	1.3 %	(18.2)%	\$ 0.36

- (1) NAV per share is determined as of the last day in the relevant quarter and therefore may not reflect the NAV per share on the date of the high and low sales prices. The NAVs shown are based on outstanding shares at the end of each period.
- (2) Closing sales price as provided by the NYSE.
- (3) Calculated as of the respective high or low closing sales price divided by the quarter end NAV and subtracting 1.
- (4) Includes a \$0.10 per share special distribution.
- * Not determinable at the time of filing.

On March 2, 2021, the reported closing sales price of our common stock was \$14.52 per share. As of March 2, 2021, we had 20 stockholders of record, which did not include stockholders for whom shares are held in "nominee" or "street name".

Distributions

It is our intention to distribute all or substantially all of our taxable income earned over the course of the year. However, we may choose not to distribute all of our taxable income for a number of reasons, including retaining excess taxable income for investment purposes and/or defer the payment of distributions associated with the excess taxable income for future calendar years. During the year ended December 31, 2020, we recorded \$478,000 for U.S. federal excise tax in our consolidated statements of operations. For the year ended December 31, 2020, total distributions of \$1.54 per share were declared and paid, which includes a \$0.10 per share special distribution paid on January 13, 2021. On February 24, 2021, our Board declared a first quarter 2021 dividend of \$0.36 per share payable on March 31, 2021, to stockholders of record on March 15, 2021. We will not be able to determine whether any specific distribution will be treated as made out of our taxable earnings or as a return of capital until after the end of our taxable year. Any amount treated as a return of capital will reduce a stockholder's adjusted tax basis in his or her common stock, thereby increasing his or her potential gain or reducing his or her potential loss on the subsequent sale or other disposition of his or her common stock. While such return of capital distributions are not taxable, because they are a return of the stockholder's investment, net of fund expenses, they reduce a stockholder's basis in his, her, or its shares of common stock, which may result in the stockholder recognizing more taxable capital gains, or a lower capital loss, when the shares of common stock are eventually sold.

We estimate the source of our distributions as required by Section 19(a) of the 1940 Act to determine whether payment of dividends are expected to be paid from any other source other than net investment income accrued for current period or certain cumulative periods, but we will not be able to determine whether any specific distribution will be treated as made out of our taxable earnings or as a return of capital until after the end of our taxable year. Any amount treated as a return of capital will reduce a stockholder's adjusted tax basis in his or her common stock, thereby increasing his or her potential gain or reducing his or her potential loss on the subsequent sale or other disposition of his or her common stock. On a quarterly basis, for any payment of dividends estimated to be paid from any other source other than net investment income accrued for current period or certain cumulative periods based on the Section 19(a) requirement, we post a Section 19(a) notice through the Depository Trust Company's Legal Notice System and our website, as well as send our registered stockholders a printed copy of such notice along with the dividend payment. The estimates of the source of the distribution are interim estimates based on GAAP that are subject to revision, and the exact character of the distributions for tax purposes cannot be determined until the final books and records are finalized for the calendar year. Therefore, these estimates are made solely in order to comply with the requirements of Section 19(a) of the 1940 Act and should not be relied upon for tax reporting or any other purposes and could differ significantly from the actual character of distributions for tax purposes.

We have elected to be treated, and intend to qualify annually, as a RIC under the Code. To obtain and maintain RIC tax treatment, we must distribute at least 90% of our net ordinary income and net realized short-term capital gains in excess of our net realized long-term capital losses, if any, to our stockholders. In order to avoid a nondeductible 4% U.S. federal excise tax on certain of our undistributed income, we would need to distribute during each calendar year an amount at least equal to the sum of: (a) 98% of our ordinary income (not taking into account any capital gains or losses) for such calendar year; (b) 98.2% of the amount by which our capital gains exceed our capital losses (adjusted for certain ordinary losses) for a one-year period ending on October 31 of the calendar year (unless an election is made by us to use our taxable year); and (c) certain undistributed amounts from previous years on which we paid no U.S. federal income tax. For the tax years ended December 31, 2020, 2019 and 2018, we were subject to a 4% U.S. federal excise tax and we may be subject to this tax in future years. In such cases, we will be liable for the tax only on the amount by which we do not meet the foregoing distribution requirement.

We currently intend to distribute net long-term capital gains if any, at least annually out of the assets legally available for such distributions. However, we may in the future decide to retain some or all of our long-term capital gains but designate the retained amount as a “deemed distribution.” In that case, among other consequences, we will pay tax on the retained amount, each U.S. stockholder will be required to include their share of the deemed distribution in income as if it had been distributed to the U.S. stockholder, and the U.S. stockholder will be entitled to claim a credit equal to their allocable share of the tax paid on the deemed distribution by us. The amount of the deemed distribution net of such tax will be added to such stockholder’s tax basis in such stockholder’s common stock. Since we expect to pay tax on any retained capital gains at our regular corporate tax rate, and since that rate is in excess of the maximum rate currently payable by individuals on long-term capital gains, the amount of tax that individual stockholders will be treated as having paid and for which they will receive a credit will exceed the tax they owe on the retained net capital gain. Such excess generally may be claimed as a credit against such individual stockholder’s other U.S. federal income tax obligations or may be refunded to the extent it exceeds such individual stockholder’s liability for U.S. federal income tax. We cannot assure any stockholder that we will achieve results that will permit us to pay any cash distributions, and if we issue senior securities, we may be prohibited from making distributions if doing so would cause us to fail to maintain the asset coverage ratios stipulated by the 1940 Act or if such distributions are limited by the terms of any of our borrowings.

Unless a stockholder elects to receive distributions in cash, we intend to make such distributions in additional shares of our common stock under our dividend reinvestment plan. Although distributions paid in the form of additional shares of our common stock will generally be subject to U.S. federal, state and local taxes in the same manner as cash distributions, investors participating in our dividend reinvestment plan will not receive any corresponding cash distributions with which to pay any such applicable taxes. If a stockholder holds shares of our common stock in the name of a broker or financial intermediary, such stockholder should contact such broker or financial intermediary regarding the election to receive distributions in cash in lieu of shares of our common stock. Any distributions reinvested through the issuance of shares through our dividend reinvestment plan will increase our assets on which the base management fee and the incentive fee are determined and paid to our Adviser.

Stock Performance Graph

The graph below compares the cumulative total stockholder return on our common stock from March 6, 2014 (the first day of trading following our initial public offering) to December 31, 2020, with that of the NASDAQ Financial 100 Stock Index and the Standard & Poor’s 500 Stock Index. This graph assumes that on March 6, 2014, \$100 was invested in our common stock, the NASDAQ Financial 100 Stock Index, and the Standard & Poor’s 500 Stock Index, as we do not believe there is an appropriate index of companies with an investment strategy similar to our own with which to compare the return on our common stock. The graph also assumes the reinvestment of dividends into additional shares of the same class of equity securities at the frequency with which dividends are paid on such securities during the applicable fiscal year, prior to any tax effect. The stock price performance included in this graph is based on historical data and is not necessarily indicative of future stock performance.

COMPARISON OF CUMULATIVE TOTAL RETURNS
For the Period from March 5, 2014 (TPVG’s IPO) to December 31, 2020

Our IPO was priced at \$15.00 per share and the chart is based on what our stock price was at the end of the first trading day, which was \$15.65 per share.

Sales of Unregistered Securities

During the year ended December 31, 2020, we issued a total of 198,053 shares of common stock under our dividend reinvestment plan. These issuances were not subject to the registration requirements under the Securities Act of 1933, as amended (the “Securities Act”). The cash paid for shares of common stock issued under our dividend reinvestment plan during the year ended December 31, 2020 was \$1.8 million.

Issuer Purchases of Equity Securities

We did not repurchase any of our securities during the fiscal year ended December 31, 2020.

Item 6. Selected Financial Data

The following selected financial and other data for the years ended December 31, 2020, 2019, 2018, 2017 and 2016, respectively, has been derived from our audited financial statements. This data should be read in conjunction with our consolidated financial statements and related notes thereto and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included elsewhere in this Annual Report on Form 10-K. Historical data is not necessarily indicative of results to be expected for any future period.

Selected Consolidated Financial Data (in thousands, except per share data)	For the Year Ended December 31, or as of December 31,				
	2020	2019	2018	2017	2016

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

The information contained in this section should be read in conjunction with our consolidated financial statements and related notes and schedules thereto appearing elsewhere in this Annual Report on Form 10-K. Except as otherwise specified, references to "the Company", "we", "us", and "our" refer to TriplePoint Venture Growth BDC Corp. and its subsidiaries.

This Annual Report on Form 10-K contains forward-looking statements that involve substantial risks and uncertainties. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about us, our current and prospective portfolio investments, our industry, our beliefs, and our assumptions. Words such as "anticipates," "expects," "intends," "plans," "will," "may," "continue," "believes," "seeks," "estimates," "would," "could," "should," "targets," "projects," and variations of these words and similar expressions are intended to identify forward-looking statements. The forward-looking statements contained in this Annual Report on Form 10-K include statements as to:

- our and our portfolio companies' future operating results and financial condition, including the ability of us and our portfolio companies to achieve our respective objectives;
- our business prospects and the prospects of our portfolio companies;
- our relationships with third parties, including but not limited to lenders and venture capital investors, including other investors in our portfolio companies;
- the impact and timing of our unfunded commitments;
- the expected market for venture capital investments;
- the performance of our existing portfolio and other investments we may make in the future;
- the impact of investments that we expect to make;
- actual and potential conflicts of interest with TPC, the Adviser and its senior investment team and Investment Committee;
- our contractual arrangements and relationships with third parties;
- the dependence of our future success on the U.S. and global economies, including with respect to the industries in which we invest;
- our expected financings and investments;
- the ability of our Adviser to attract, retain and have access to highly talented professionals, including our Adviser's senior management team;
- our ability to qualify and maintain our qualification as a RIC and as a BDC;
- the adequacy of our available liquidity, cash resources and working capital and compliance with covenants under our borrowing arrangements; and
- the timing of cash flows, if any, from the operations of our portfolio companies.

These statements are not guarantees of future performance and are subject to risks, uncertainties, and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements, including without limitation:

- changes in laws and regulations, changes in political, economic or industry conditions, and changes in the interest rate environment or other conditions affecting the financial and capital markets, including with respect to changes resulting from or in response to, or potentially even the absence of changes as a result of, the impact of the COVID-19 pandemic;
- the length and duration of the COVID-19 outbreak in the United States as well as worldwide, and the magnitude of its impact and time required for economic recovery, including with respect to the impact of travel restrictions and other isolation and quarantine measures on the ability of the Adviser's investment professionals to conduct in-person diligence on, and otherwise monitor, existing and future investments;
- an economic downturn and the time period required for robust economic recovery therefrom, including the current economic downturn as a result of the impact of the COVID-19 pandemic, which has already generally had a material impact on our portfolio companies' results of operations and financial condition and will likely continue to have a material impact on our portfolio companies' results of operations and financial condition, for its duration, which could lead to the loss of some or all of our investments in such portfolio companies and have a material adverse effect on our results of operations and financial condition;
- a contraction of available credit, an inability or unwillingness of our lenders to fund their commitments to us and/or an inability to access capital markets or additional sources of liquidity, including as a result of the impact and duration of the COVID-19 pandemic, could have a material adverse effect on our results of operations and financial condition and impair our lending and investment activities;

- interest rate volatility could adversely affect our results, particularly given that we use leverage as part of our investment strategy;
- currency fluctuations could adversely affect the results of our investments in foreign companies, particularly to the extent that we receive payments denominated in foreign currency rather than U.S. dollars;
- risks associated with possible disruption in our or our portfolio companies' operations due to wars and other forms of conflict, terrorist acts, security operations and catastrophic events such as fires, floods, earthquakes, tornadoes, hurricanes and global health epidemics; and
- the risks, uncertainties and other factors we identify in "Risk Factors" in this Annual Report on Form 10-K under Part I, Item 1A, and in our other filings with the SEC that we make from time to time.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be inaccurate. Important assumptions include, without limitation, our ability to originate new loans and investments, borrowing costs and levels of profitability and the availability of additional capital. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this Annual Report on Form 10-K should not be regarded as a representation by us that our plans and objectives will be achieved. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this Annual Report on Form 10-K.

Overview

We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a BDC under the 1940 Act. We have elected to be treated, and intend to qualify annually, as a RIC under Subchapter M of the Code for U.S. federal income tax purposes.

Our shares are currently listed on the New York Stock Exchange (the "NYSE") under the symbol "TPVG". The 2022 Notes are currently listed on the NYSE under the symbol "TPVY".

We were formed to expand the venture growth stage business segment of TPC's investment platform. TPC is widely recognized as a leading global financing provider devoted to serving venture capital-backed companies with creative, flexible and customized debt financing, equity capital and complementary services throughout their lifespan. TPC is located on Sand Hill Road in Silicon Valley and has a primary focus in technology, life sciences and other high growth industries.

Our investment objective is to maximize our total return to stockholders primarily in the form of current income and, to a lesser extent, capital appreciation by lending primarily with warrants to venture growth stage companies focused in technology, life sciences and other high growth industries backed by TPC's select group of leading venture capital investors.

COVID-19 Developments

The COVID-19 pandemic, and the related effect on the U.S. and global economies, including the recent economic downturn and the uncertainty associated with the timing and likelihood of economic recovery, has had adverse consequences for the business operations of some of our portfolio companies and has adversely affected, and threatens to continue to adversely affect, our operations and the operations of the Adviser.

While we have been monitoring, and continue to monitor, the COVID-19 pandemic and its impact on our and our portfolio companies' business, we have continued to raise capital, maintain appropriate levels of available liquidity, support and monitor our existing portfolio companies, fund existing unfunded commitments, and selectively deploy capital in new investment opportunities in venture growth stage companies. As a result of our focus on maintaining adequate liquidity amid current market uncertainty, our interest expense has increased from comparable prior year periods due to maintaining a higher weighted average outstanding principal balance on borrowings and increased cash reserves.

We have seen, and expect to continue to see, certain of our portfolio companies experience financial distress and, depending on the duration of the COVID-19 pandemic and the extent of its disruption to operations, expect that certain of our portfolio companies may default on their financial obligations to us and their other capital providers. In addition, as a result of the adverse effects of the COVID-19 pandemic and the related disruption and financial distress, certain portfolio companies may seek to modify their loans from us, which could reduce the amount or extend the time for payment of principal, reduce the rate or extend the time of payment of interest, and/or increase the amount of PIK interest we receive with respect to such investment, among other things. The effects of the COVID-19 pandemic have also impeded, and may continue to impede, the ability of certain of our portfolio companies to raise additional capital and/or pursue asset sales or otherwise execute strategic transactions, which could have a material adverse effect on the valuation of our investments in such companies. Portfolio companies operating in certain industries may be more susceptible to these risks than other portfolio companies in other industries in light of the effects of the COVID-19 pandemic. Some of our portfolio companies have already taken steps to significantly reduce, modify, or alter business strategies and operations, and we expect that additional portfolio companies may take similar steps if subjected to prolonged and severe financial distress, which may impair their business on a permanent basis. In addition, due to the completion of equity rounds by certain portfolio companies at lower valuations than rounds completed prior to the onset of the COVID-19 pandemic, we have experienced unrealized depreciation on certain of our warrant and equity investments despite the relevant companies' ability to mitigate disruptions on their business strategies and operations. There can be no assurance that future equity rounds completed by our portfolio companies will be at levels greater than or equal to previous rounds, which may result in net unrealized depreciation on our warrant and equity portfolio in future periods.

In part due to these COVID-19-related developments, the fair value of certain of our portfolio investments as of December 31, 2020 and our expected recoveries for certain investments have decreased as compared to their fair value and expected recoveries as of December 31, 2019, and there may be further decreases in the fair values of our portfolio investments going forward. As of December 31, 2020, we had two portfolio companies in which our investments were on non-accrual status, with an aggregate cost and fair value of \$61.8 million and \$36.4 million, respectively. The various effects of the COVID-19 pandemic, including those discussed above, increase the risk that we will place additional investments on non-accrual status in the future.

As of December 31, 2020, we are permitted under the 1940 Act, as a BDC, to borrow amounts such that our asset coverage, as defined in the 1940 Act, equals at least 150% after such borrowing. In addition, the indenture governing the 2022 Notes contains certain covenants, including covenants (i) requiring our compliance with the asset coverage requirements set forth in Section 18(a)(1)(A) as modified by Section 61(a) of the 1940 Act (after giving effect to any exemptive relief granted to us by the SEC); and (ii) if our asset coverage has been below the 1940 Act minimum asset coverage requirements (after giving effect to any exemptive relief granted to us by the SEC) for more than six consecutive months, prohibiting the declaration of any cash dividend or distribution on our common stock (except to the extent necessary for us to maintain our treatment as a RIC under Subchapter M of the Code), or purchasing any of our common stock, unless, at the time of the declaration of the dividend or distribution or the purchase, and after deducting the amount of such dividend, distribution, or purchase, we are in compliance with the 1940 Act asset coverage requirements (after giving effect to any exemptive relief granted to us by the SEC). The Credit Facility also includes certain covenants, including without limitation, a covenant requiring 150% asset coverage in accordance with the 1940 Act, and the Note Purchase Agreement governing the 2025 Notes contains certain covenants, including without limitation, a minimum asset coverage ratio of 150%, a minimum interest coverage ratio of 125%, and a minimum stockholders' equity threshold. Moreover, the fixed rate of the 2025 Notes is subject to a 1.00% increase in the event that a Below Investment Grade Event (as defined in the Note Purchase Agreement) occurs, which risk is increased as a result of the impact of the COVID-19 pandemic. See "Note 6. Borrowings" in the notes to consolidated financial statements for more information regarding the terms of the Credit Facility, the 2022 Notes, and the 2025 Notes.

As discussed below under "Results of Operations," our net asset value per share as of December 31, 2020 decreased moderately as compared to our net asset value per share as of December 31, 2019. Any significant increase in aggregate unrealized depreciation of our investment portfolio or significant reductions in our net asset value as a result of the effects of the COVID-19 pandemic or otherwise increases the risk of failing to meet the 1940 Act asset coverage requirements and breaching covenants under the Credit Facility, under the indenture governing the 2022 Notes, and under the Note Purchase Agreement governing the 2025 Notes, or otherwise triggering an event of default under the relevant borrowing arrangement. Any such breach of covenant or event of default, if we are not able to obtain a waiver from the required lenders or debt holders, would have a material adverse effect on our business, liquidity, financial condition, results of operations and ability to pay distributions to our stockholders. See "Risk Factors" in this Annual Report on Form 10-K under Part I, Item 1A for more information. As of December 31, 2020, we were in compliance with the asset coverage requirements under the 1940 Act, and we were not in breach of any covenants under the Credit Facility, under the indenture governing the 2022 Notes, or under the Note Purchase Agreement governing the 2025 Notes. We do not expect to breach any of these covenants in the near term assuming that conditions do not materially deteriorate further or for a prolonged period of time.

We will continue to monitor the evolving situation relating to the COVID-19 pandemic and related guidance from U.S. and international authorities, including federal, state and local public health authorities. Given the dynamic nature of this situation and the fact that there may be developments outside of our control that require us or our portfolio companies to adjust plans of operation, we cannot reasonably estimate the full impact of COVID-19 on our financial condition, results of operations or cash flows in the future. However, it could have a material adverse impact for a prolonged period of time on our future net investment income, particularly with respect to our interest income, the fair value of our portfolio investments, and the results of operations and financial condition of us and our portfolio companies. See "Risk Factors" in this Annual Report on Form 10-K under Part I, Item 1A, and in our other filings with the SEC that we make from time to time, for more information.

Portfolio Composition, Investment Activity and Asset Quality

Portfolio Composition

We originate and invest primarily in venture growth stage companies. Companies at the venture growth stage have distinct characteristics differentiating them from venture capital-backed companies at other stages in their development lifecycle. We invest primarily in (i) growth capital loans that have a secured collateral position and that are generally used by venture growth stage companies to finance their continued expansion and growth, (ii) equipment financings, which may be structured as loans or leases, that have a secured collateral position on specified mission-critical equipment, (iii) on a select basis, revolving loans that have a secured collateral position and that are typically used by venture growth stage companies to advance against inventory, components, accounts receivable, contractual or future billings, bookings, revenues, sales or cash payments and collections including proceeds from a sale, financing or the equivalent and (iv) direct equity investments in venture growth stage companies. In connection with our growth capital loans, equipment financings and revolving loans, we generally receive warrant investments that allow us to participate in any equity appreciation of our borrowers and enhance our overall investment returns.

As of December 31, 2020, we had 195 investments in 69 companies. Our investments included 94 debt investments, 75 warrant investments, and 26 direct equity and related investments. As of December 31, 2020, the aggregate cost and fair value of these investments were \$662.4 million and \$633.8 million, respectively. As of December 31, 2020, one of our portfolio companies was publicly traded. As of December 31, 2020, the 94 debt investments had an aggregate fair value of \$583.3 million and a weighted average loan to enterprise value ratio at the time of underwriting of 8.9%. Enterprise value of a portfolio company is estimated based on information available, including any information regarding the most recent rounds of equity funding, at the time of origination.

As of December 31, 2019, we had 187 investments in 68 companies. Our investments included 102 debt investments, 64 warrant investments, and 21 direct equity and related investments. As of December 31, 2019, the aggregate cost and fair value of these investments were \$660.7 million and \$653.1 million, respectively. As of December 31, 2019, two of our portfolio companies were publicly traded. As of December 31, 2019, the 102 debt investments had an aggregate fair value of \$604.5 million and a weighted average loan to enterprise value ratio at the time of underwriting of 9.3%. Enterprise value of a portfolio company is estimated based on information available, including any information regarding the most recent rounds of equity funding, at the time of origination.

The following tables show information on the cost and fair value of our investments in companies along with the number of companies in our portfolio as of December 31, 2020 and 2019:

Investments by Type (dollars in thousands)	December 31, 2020				
	Cost	Fair Value	Net Unrealized Gains (losses)	Number of Investments	Number of Companies

Growth capital loans in which the borrower held a term loan facility, with or without an accompanying revolving loan, in priority to our senior lien represent 30.6% and 31.0% of our debt investments at fair value as of December 31, 2020 and 2019, respectively.

Investment Activity

During the year ended December 31, 2020, we entered into commitments with 11 new portfolio companies and 12 existing portfolio companies totaling \$276.7 million, funded 42 debt investments for \$204.6 million in principal value, acquired warrant investments representing \$3.8 million of value, and made equity investments of \$2.3 million and sold equity in two portfolio companies for \$29.9 million.

During the year ended December 31, 2019, we entered into commitments with 18 new portfolio companies and 11 existing portfolio companies totaling \$507.4 million, funded 72 debt investments for \$418.1 million in principal value, acquired warrant investments representing \$6.6 million of value, made equity investments of \$3.3 million and sold equity in one portfolio company for \$1.4 million.

During the year ended December 31, 2020, we received \$138.1 million of principal prepayments, \$17.0 million of early repayments, and \$48.3 million of scheduled principal amortization.

During the year ended December 31, 2019, we received \$164.1 million of debt prepayments and \$37.5 million of scheduled amortization and repayments.

The following table shows the total portfolio investment activity for the years ended December 31, 2020 and 2019 was as follows:

(in thousands)	For the Year Ended December 31,	
	2020	2019
Beginning portfolio at fair value	\$ 653,129	\$ 433,417
New debt investments, net ⁽¹⁾	200,068	407,582
Scheduled principal amortization	(48,262)	(37,490)
Principal prepayments and early repayments	(155,116)	(164,118)
Accretion of debt investment fees	14,795	9,502
Payment-in-kind coupon	8,139	2,477
New warrant investments	3,757	6,585
New equity investments	2,315	3,342
Proceeds from dispositions of investments	(32,926)	(1,673)
Net realized gains (losses) on investments	8,978	(621)
Net unrealized gains (losses) on investments	(21,098)	(5,874)
Ending portfolio at fair value	<u>\$ 633,779</u>	<u>\$ 653,129</u>

(1) Debt balance is net of fees and discounts applied to the loan at origination.

As of December 31, 2020, our unfunded commitments to 16 companies totaled \$132.3 million. During the year ended December 31, 2020, \$160.7 million in unfunded commitments expired or were terminated.

As of December 31, 2019, our unfunded commitments to 15 companies totaled \$226.1 million. During the year ended December 31, 2020, \$167.1 million in unfunded commitments expired or were terminated.

The following table shows additional information on our unfunded commitments regarding milestones, expirations, and types of loans as of December 31, 2020 and 2019:

Unfunded Commitments ⁽¹⁾ (in thousands)	December 31, 2020	December 31, 2019
Dependent on milestones	\$ 17,500	\$ 59,333
Expiring during:		
2020	\$ —	\$ 188,083
2021	122,250	38,000
2022	7,000	—
2024	3,000	—
Total	<u>\$ 132,250</u>	<u>\$ 226,083</u>

(1) Does not include backlog of potential future commitments.

Our credit agreements contain customary lending provisions that allow us relief from funding obligations for previously made commitments in instances where the underlying company experiences material adverse events that affect the financial condition or business outlook for the company. Since these commitments may expire without being drawn upon, unfunded commitments do not necessarily represent future cash requirements or future earning assets for us. We generally expect 50% - 75% of our gross unfunded commitments to eventually be drawn before the expiration of their corresponding availability periods.

The fair value at the inception of the delay draw credit agreements with our portfolio companies is equal to the fees and/or warrants received to enter into these agreements, taking into account the remaining terms of the agreements and the counterparties' credit profile. The unfunded commitment liability reflects the fair value of these future funding commitments. As of December 31, 2020 and 2019, the fair value for these unfunded commitments totaled \$1.7 million and \$2.2 million, respectively, and was included in "other accrued expenses and liabilities" in our consolidated statements of assets and liabilities.

Our level of investment activity can vary substantially from period to period as our Adviser chooses to slow or accelerate new business originations depending on market conditions, rate of investment of TPC's select group of leading venture capital investors, our Adviser's knowledge, expertise and experience, our funding capacity (including availability under the Credit Facility and our ability or inability to raise equity or debt capital), and other market dynamics.

The following table shows the debt commitments, fundings of debt investments (principal balance) and equity investments and non-binding term sheet activity for the years ended December 31, 2020 and 2019:

Commitments and Fundings (in thousands)	For the Year Ended December 31,	
	2020	2019
Debt Commitments		
New portfolio companies	\$ 134,500	\$ 362,000
Existing portfolio companies	142,181	145,419
Total ⁽¹⁾	\$ 276,681	\$ 507,419
Funded Debt Investments	\$ 204,626	\$ 418,093
Equity Investments	\$ 2,315	\$ 3,343
Non-Binding Term Sheets	\$ 490,256	\$ 869,131

(1) Includes backlog of potential future commitments.

We may enter into commitments with certain portfolio companies that permit an increase in the commitment amount in the future in the event that conditions to such increases are met ("backlog of potential future commitments"). If such conditions to increase are met, these amounts may become unfunded commitments if not drawn prior to expiration. As of December 31, 2020 and 2019, this backlog of potential future commitments totaled \$20.8 million and \$15.5 million, respectively.

Asset Quality

Consistent with TPC's existing policies, our Adviser maintains a credit watch list which places borrowers into five risk categories based on our Adviser's senior investment team's judgment, where 1 is the highest rating and all new loans are generally assigned a rating of 2.

Category	Category Definition	Action Item
Clear (1)	Performing above expectations and/or strong financial or enterprise profile, value or coverage.	Review quarterly.
White (2)	Performing at expectations and/or reasonably close to it. Reasonable financial or enterprise profile, value or coverage. Generally, all new loans are initially graded White.	Contact portfolio company periodically in no event less than quarterly.
Yellow (3)	Performing generally below expectations and/or some proactive concern. Adequate financial or enterprise profile, value or coverage.	Contact portfolio company monthly or more frequently as determined by our Adviser's Investment Committee; contact venture capital investors.
Orange (4)	Needs close attention due to performance materially below expectations, weak financial and/or enterprise profile, concern regarding additional capital or exit equivalent.	Contact portfolio company weekly or more frequently as determined by our Adviser's Investment Committee; contact venture capital investors regularly; our Adviser forms a workout group to minimize risk of loss.
Red (5)	Serious concern/trouble due to pending or actual default or equivalent. May experience partial and/or full loss.	Maximize value from assets.

The following table shows the credit rankings for the portfolio companies that had outstanding debt obligations to us as of December 31, 2020 and 2019:

Credit Category (dollars in thousands)	December 31, 2020			December 31, 2019		
	Fair Value	Percentage of Total Debt Investments	Number of Portfolio Companies	Fair Value	Percentage of Total Debt Investments	Number of Portfolio Companies
Clear (1)	\$ 74,276	12.7 %	5	\$ 121,866	20.2 %	8
White (2)	413,193	70.8	24	425,016	70.3	23
Yellow (3)	59,489	10.2	2	31,103	5.1	3
Orange (4)	21,377	3.7	1	22,956	3.8	1
Red (5)	15,000	2.6	1	3,577	0.6	3
	<u>\$ 583,335</u>	<u>100.0 %</u>	<u>33</u>	<u>\$ 604,518</u>	<u>100.0 %</u>	<u>38</u>

As of December 31, 2020, the weighted average investment ranking of our debt investment portfolio was 2.13. During the year ended December 31, 2020, portfolio company credit category changes, excluding fundings and repayments, consisted of the following: one portfolio company with a principal balance of \$25.0 million was upgraded from White (2) to Clear (1); one portfolio company with a principal balance of \$16.4 million was upgraded from Yellow (3) to White (2); two portfolio companies with an aggregate principal balance of \$61.2 million were downgraded from White (2) to Yellow (3); one portfolio company with a principal balance of \$29.5 million was downgraded from White (2) to Red (5); and three portfolio companies with an aggregate principal balance of \$21.2 million were removed from Red (5) and from our investment portfolio as a result of the finalization of asset sales.

As of December 31, 2019, the weighted average investment ranking of our debt investment portfolio was 1.94. During the year ended December 31, 2019, portfolio company credit category changes, excluding fundings and repayments, consisted of the following: three portfolio companies with an aggregate principal balance of \$24.7 million were upgraded from White (2) to Clear (1); one portfolio company with a principal balance of \$10.4 million was upgraded from Orange (4) to Yellow (3); one portfolio company with a principal balance of \$5.7 million was downgraded from Clear (1) to White (2); one portfolio company with a principal balance of \$10.0 million was downgraded from White (2) to Yellow (3); one portfolio company with a principal balance of \$20.0 million was downgraded from Yellow (3) to Orange (4); and two portfolio companies with an aggregate principal balance of \$19.9 million were downgraded from Yellow (3) to Red (5).

Results of Operations

Set forth below is a comparison of the results of operations for the years ended December 31, 2020 and 2019. The comparison of the fiscal years ended December 31, 2019 and 2018 can be found within “Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations” included in Part II of our annual report on Form 10-K for the fiscal year ended December 31, 2019, which is incorporated herein by reference.

Comparison of operating results for the years ended December 31, 2020 and 2019

An important measure of our financial performance is net increase (decrease) in net assets resulting from operations, which includes net investment income (loss), net realized gains (losses) and net unrealized gains (losses). Net investment income (loss) is the difference between our income from interest, dividends, fees and other investment income and our operating expenses including interest on borrowed funds. Net realized gains (losses) on investments is the difference between the proceeds received from dispositions of portfolio investments and their amortized cost. Net unrealized gains (losses) on investments is the net change in the fair value of our investment portfolio.

For the year ended December 31, 2020, our net increase in net assets resulting from operations was \$35.3 million, which was comprised of \$47.9 million of net investment income and \$12.5 million of net realized and unrealized losses. On a per share basis for the year ended December 31, 2020, net investment income was \$1.57 per share and the net increase in net assets from operations was \$1.16 per share.

For the year ended December 31, 2019, our net increase in net assets resulting from operations was \$31.8 million, which was comprised of \$38.3 million of net investment income and \$6.5 million of net realized and unrealized losses. On a per share basis for the year ended December 31, 2019, net investment income was \$1.54 per share and the net increase in net assets from operations was \$1.28 per share.

Investment Income

For the year ended December 31, 2020, total investment income was \$91.2 million as compared to \$73.4 million for the year ended December 31, 2019. The increase in total investment income for the year ended December 31, 2020, compared to 2019, is primarily due to higher weighted average principal outstanding on our income-bearing debt investment portfolio, partially offset by a lower effective yield due to lower prepayment activity and a decrease in the Prime Rate.

For the year ended December 31, 2020, we recognized \$2.6 million in other income consisting of \$1.4 million from the termination or expiration of unfunded commitments, and \$1.2 million from the realization of certain fees paid by portfolio companies and other income related to prepayment activity. For the year ended December 31, 2019, we recognized \$2.9 million in other income consisting of \$1.7 million from the termination or expiration of unfunded commitments, and \$1.2 million from the realization of certain fees paid by portfolio companies and other income related to prepayment activity.

Operating Expenses

Total operating expenses consist of base management fee, income incentive fee, capital gains incentive fee, interest expense and amortization of fees, administration agreement expenses, and general and administrative expenses. In determining the base management fee, our Adviser has agreed to exclude U.S. Treasury bill assets acquired at the end of each applicable quarter from the calculation of the gross assets. We anticipate operating expenses will increase over time as our portfolio continues to grow. However, we anticipate operating expenses, as a percentage of totals assets and net assets, will generally decrease over time as our portfolio and capital base expand. We expect base management and income incentive fees will increase as we grow our asset base and our earnings. The capital gains incentive fee will depend on realized and unrealized gains and losses. Interest expenses will generally increase as we utilize more of the Credit Facility and issue additional debt securities, and we generally expect expenses under the administration agreement and general and administrative expenses to increase over time to meet the additional requirements associated with servicing a larger portfolio.

For the year ended December 31, 2020, total operating expenses were \$43.3 million as compared to \$35.1 million for the year ended December 31, 2019.

Base management fees totaled \$12.4 million and \$8.6 million for the years ended December 31, 2020 and 2019, respectively. Base management fees for the year ended December 31, 2020, as compared to December 31, 2019, increased primarily due to an increase in the average size of our portfolio between periods.

Income incentive fees totaled \$8.7 million and \$8.1 million for the years ended December 31, 2020 and 2019, respectively. For the year ended December 31, 2020, our income incentive fee was reduced by \$2.6 million due to the total return requirement under the income component of our incentive fee structure, which resulted in a corresponding increase of \$2.6 million in net investment income. For the year ended December 31, 2019, our income incentive fee was reduced by \$1.2 million due to the total return requirement under the income component of our incentive fee structure, which resulted in a corresponding increase of approximately \$1.2 million in net investment income.

There was no capital gains incentive fee expense calculated for the years ended December 31, 2020 and 2019.

For the years ended December 31, 2020 and 2019, interest and fees on our borrowings totaled \$15.5 million and \$12.4 million, respectively. Interest and fee expenses for the year ended December 31, 2020, as compared to December 31, 2019, increased due to the issuance of the 2025 Notes, as well as a higher weighted-average outstanding principal balance on our Credit Facility, partially offset by a decrease in interest rates on borrowings under the Credit Facility.

Administration agreement and general and administrative expenses totaled \$6.7 million and \$6.0 million for the years ended December 31, 2020 and 2019, respectively. The increase for the year ended December 31, 2020, as compared to December 31, 2019, was primarily due to increased use of professional services and a higher overhead allocation between the periods, partially offset by lower third-party expenses as a result of internalization of third-party services by the Administrator.

Net Realized Gains and Losses and Net Unrealized Gains and Losses

Realized gains and losses are included in net realized gains (losses) on investments in the consolidated statements of operations.

During the year ended December 31, 2020, we recognized net realized gains of \$8.6 million from the sale of investments, consisting of \$28.8 million of realized gains from the sale of publicly traded shares held in CrowdStrike, Inc. and Medallia, Inc., and \$0.8 million of realized gains from the sale of warrants in Freshly Inc., offset by \$20.1 million of realized losses from the finalization of asset sales and removal from our investment portfolio of three obligors, Cambridge Broadband Network Limited, Harvest Power, Inc., and Munchery, Inc., which were rated Red (5) on our credit watch list, and \$0.9 million of other net realized losses.

During the year ended December 31, 2019, we recognized net realized losses from the sale of investments of \$0.6 million, primarily as a result of the write-off of investments in one portfolio company, partially offset by a realized gain from the sale of an equity investment.

Unrealized gains and losses are included in net change in unrealized gains (losses) on investments in the consolidated statements of operations.

Net change in unrealized losses during the year ended December 31, 2020 was \$21.1 million, resulting primarily from the reversal and recognition of \$14.3 million of previously recorded unrealized gains associated with the shares of CrowdStrike, Inc. and Medallia, Inc. that we sold during the year, as well as net unrealized losses on our investment portfolio during the year resulting from fair value adjustments, partially offset by the reversal and recognition of \$19.4 million of previously recorded unrealized losses associated with three obligors rated Red (5) on our credit watch list.

Net change in unrealized losses during the year ended December 31, 2019 was \$5.9 million, which primarily consisted of the reversal and recognition of previously recorded net unrealized gains of \$1.9 million into income or realized gains, and \$4.0 million of net unrealized losses on our investment portfolio related to mark to market activity.

Net change in realized and unrealized gains or losses in subsequent periods may be volatile as such results depend on changes in the market, changes in the underlying performance of our portfolio companies and their respective industries, and other market factors.

Portfolio Yield and Total Return

Investment income includes interest income on our debt investments utilizing the effective yield method including cash interest income as well as the amortization of any purchase premium, accretion of purchase discount, original issue discount, facilities fees, and the amortization and payment of the end-of-term ("EOT") payments. For the years ended December 31, 2020 and 2019, interest income totaled \$88.6 million and \$70.5 million, respectively, representing a weighted average annualized portfolio yield on total debt investments for the period held of 13.8% and 15.0%, respectively.

We calculate weighted average annualized portfolio yields for periods shown as the annualized rates of the interest income recognized during the period divided by the average amortized cost of debt investments in the portfolio during the period. The weighted average yields reported for these periods are annualized and reflect the weighted average yields to maturities. Should the portfolio companies choose to repay their loans earlier, our weighted average yields will increase for those debt investments affected but may reduce our weighted average yields on the remaining portfolio in future quarters.

The yield on our total debt portfolio, excluding the impact of prepayments, was 12.5% and 13.1% for the years ended December 31, 2020 and 2019, respectively.

The following table shows the weighted average annualized portfolio yield on our total debt portfolio comprising of cash interest income, accretion of the net purchase discount, facilities fees and the value of warrant investments received, accretion of EOT payments and the accelerated receipt of EOT payments on prepayments:

Ratios (Percentages, on an annualized basis) ⁽¹⁾	For the Year Ended December 31,	
	2020	2019
Weighted average annualized portfolio yield on total debt investments ⁽²⁾	13.8 %	15.0 %
Coupon income	9.8 %	10.1 %
Accretion of discount	1.0 %	1.1 %
Accretion of end-of-term payments	1.7 %	1.9 %
Impact of prepayments during the period	1.3 %	1.9 %
Prime Rate at end of period ⁽³⁾	3.25 %	4.75 %

(1) The yields for periods shown are the annualized rates of interest income or the components of interest income recognized during the period divided by the average amortized cost of debt investments in the portfolio during the period.

(2) The weighted average portfolio yields on total debt investments reflected above do not represent actual investment returns to our stockholders.

(3) Included as a reference point for coupon income and weighted average portfolio yield.

Our weighted average annualized portfolio yield on debt investments may be higher than an investor's yield on an investment in shares of our common stock. Our weighted average annualized portfolio yield on debt investments does not reflect operating expenses that may be incurred by us and, thus, by our stockholders. In addition, our weighted average annualized portfolio yield on debt investments and total return figures disclosed in this Annual Report on Form 10-K do not consider the effect of any sales commissions or charges that may be incurred in connection with the sale of shares of our common stock. Our weighted average annualized portfolio yield on debt investments and total return figures do not represent actual investment returns to stockholders. Our weighted average annualized portfolio yield on debt investments and total return figures are subject to change and, in the future, may be greater or less than the rates in this Annual Report on Form 10-K. Total return based on NAV is the change in ending NAV per share plus distributions per share paid during the period assuming participation in our dividend reinvestment plan divided by the beginning NAV per share for such period. Total return based on stock price is the change in the ending stock price of our common stock plus distributions paid during the period assuming participation in our dividend reinvestment plan divided by the beginning stock price of our common stock for such period. The total return is for the period shown and is not annualized.

For the year ended December 31, 2020, our total return during the period based on the change in NAV plus distributions reinvested as of the respective distribution dates was 14.2% and our total return during the period based on the change in stock price plus distributions reinvested as of the respective distribution dates was 7.7%. For the year ended December 31, 2019, our total return during the period based on the change in NAV plus distributions reinvested as of the respective distribution dates was 9.5% and our total return during the period based on the change in stock price plus distributions reinvested as of the respective distribution dates was 44.7%.

The table below shows our return on average total assets and return on average NAV for the years ended December 31, 2020 and 2019:

Returns on Net Asset Value and Total Assets (dollars in thousands)	For the Year Ended December 31,	
	2020	2019
Net investment income	\$ 47,854	\$ 38,253
Net increase (decrease) in net assets	\$ 35,307	\$ 31,758
Average net asset value ⁽¹⁾	\$ 408,182	\$ 343,919
Average total assets ⁽¹⁾	\$ 706,019	\$ 542,497
Net investment income to average net asset value	11.7 %	11.1 %
Net increase (decrease) in net assets to average net asset value	8.6 %	9.2 %
Net investment income to average total assets	6.8 %	7.1 %
Net increase (decrease) in net assets to average total assets	5.0 %	5.9 %

(1) The average net asset values and the average total assets are computed based on daily balances.

Critical Accounting Policies

The preparation of our financial statements in accordance with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Changes in the economic environment, financial markets and any other parameters used in determining such estimates could cause actual results to differ.

Understanding our accounting policies and the extent to which we use management judgment and estimates in applying these policies is integral to understanding our financial statements. We describe our most significant accounting policies in “Note 2. Significant Accounting Policies” in our consolidated financial statements. Critical accounting policies are those that require the application of management’s most difficult, subjective or complex judgments, often because of the need to make estimates about the effect of matters that are inherently uncertain and that may change in subsequent periods. Management has utilized available information, including our past history, industry standards and the current economic environment, among other factors, in forming the estimates and judgments, giving due consideration to materiality. We consider valuation of investments and unrealized gains or losses to be our critical accounting policies and estimates.

These critical accounting policies and estimates, and any changes thereto, are discussed under “Note 2. Significant Accounting Policies” and “Note 4. Investments” in the notes to consolidated financial statements included in this Annual Report on Form 10-K.

Liquidity and Capital Resources

Set forth below is a discussion of our liquidity and capital resources as of and for the years ended December 31, 2020 and 2019. A discussion of our liquidity and capital resources as of and for the year ended December 31, 2018 can be found within “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” included in Part II of our annual report on Form 10-K for the fiscal year ended December 31, 2019, which is incorporated herein by reference.

We believe that our current cash and cash equivalents on hand, our available borrowing capacity under the Credit Facility and our anticipated cash flows from operations, including from contractual monthly portfolio company payments and cash flows, prepayments, and the ability to liquidate publicly traded investments, will be adequate to meet our cash needs for our daily operations. This “Liquidity and Capital Resources” section should be read in conjunction with “COVID-19 Developments” above and “Risk Factors” in Part I, Item 1A of this Annual Report on Form 10-K.

Cash Flows

During the year ended December 31, 2020, net cash provided by operating activities, consisting primarily of purchases, sales and repayments of investments and the items described in “Results of Operations,” was \$60.6 million, and net cash used in financing activities was \$42.3 million due to net repayments under the Credit Facility of \$144.3 million, \$42.5 million in distributions paid, and \$2.8 million of deferred Credit Facility costs, partially offset by net proceeds received from our January 2020 public follow-on offering of common stock and the issuance of the 2025 Notes in March 2020. As of December 31, 2020, cash, including restricted cash, was \$44.7 million.

During the year ended December 31, 2019, net cash used by operating activities, consisting primarily of purchases, sales and repayments of investments and the items described in “Results of Operations,” was \$187.5 million and net cash provided by financing activities was \$204.0 million due to net borrowings under the Credit Facility of \$239.3 million, \$33.8 million in distributions paid, and \$1.5 million of deferred credit facility costs. As of December 31, 2019, cash, including restricted cash, was \$26.4 million.

Capital Resources and Borrowings

As a BDC, we generally have an ongoing need to raise additional capital for investment purposes. As a result, we expect, from time to time, to access the debt and equity markets when we believe it is necessary and appropriate to do so. In this regard, we continue to explore various options for obtaining additional debt or equity capital for investments. This may include expanding or extending the Credit Facility or the issuance of additional shares of our common stock or debt securities. If we are unable to obtain leverage or raise equity capital on terms that are acceptable to us, our ability to grow our portfolio could be substantially impacted.

Credit Facility

As of December 31, 2020, we had \$325 million in total commitments available under the Credit Facility (see “Recent Developments” below for information regarding the increase in commitments under the Credit Facility subsequent to year-end), subject to various covenants and borrowing base requirements. The Credit Facility also includes an accordion feature, which allows us to increase the size of the Credit Facility to up to \$400 million under certain circumstances. The revolving period under the Credit Facility expires on November 30, 2022, and the maturity date of the Credit Facility is May 31, 2024 (unless otherwise terminated earlier pursuant to its terms). Borrowings under the Credit Facility bear interest at the sum of (i) a floating rate based on certain indices, including LIBOR and commercial paper rates (subject to a floor of 0.50%), plus (ii) a margin of 2.80% if facility utilization is greater than or equal to 75%, 2.90% if utilization is greater than or equal to 50%, 3.00% if utilization is less than 50% and 4.5% during the amortization period. See “Note 6. Borrowings” in the notes to consolidated financial statements for more information regarding the terms of the Credit Facility.

As of December 31, 2020 and 2019, we had outstanding borrowings of \$118.0 million and \$262.3 million, respectively, under the Credit Facility, excluding deferred credit facility costs of \$3.2 million and \$1.6 million, respectively, which is included in the consolidated statements of assets and liabilities. We had \$207.0 million and \$37.7 million of remaining capacity on our Credit Facility as of December 31, 2020 and 2019, respectively.

2022 Notes

On July 14, 2017, we completed a public offering of \$65.0 million in aggregate principal amount of the 2022 Notes and received net proceeds of \$62.8 million, after the payment of fees and offering costs. On July 24, 2017, as a result of the underwriters' full exercise of their option to purchase additional 2022 Notes, we issued an additional \$9.75 million in aggregate principal amount of the 2022 Notes and received net proceeds of \$9.5 million, after the payment of fees and offering costs. The interest on the 2022 Notes, which accrues at an annual rate of 5.75%, is payable quarterly on January 15, April 15, July 15 and October 15. The maturity date of the 2022 Notes is July 15, 2022.

As of December 31, 2020 and 2019, we have recorded in the consolidated statements of assets and liabilities our liability for the 2022 Notes, net of deferred issuance costs, of \$74.0 million and \$73.5 million, respectively. See "Note 6. Borrowings" in the notes to consolidated financial statements for more information regarding the 2022 Notes.

2025 Notes

On March 19, 2020, we completed a private offering of \$70.0 million in aggregate principal amount of the 2025 Notes and received net proceeds of \$69.1 million, after the payment of fees and offering costs. The interest on the 2025 Notes, which accrues at an annual rate of 4.50%, is payable semiannually on March 19 and September 19 each year, beginning on September 19, 2020. The maturity date of the 2025 Notes is March 19, 2025.

As of December 31, 2020, we have recorded in the consolidated statements of assets and liabilities our liability for the 2025 Notes, net of deferred issuance costs, of \$69.1 million. See "Note 6. Borrowings" in the notes to consolidated financial statements for more information regarding the 2025 Notes.

Adviser Revolver

On May 6, 2020, we entered into an unsecured revolving loan agreement (the "Adviser Revolver") with the Adviser, which had a maximum credit limit of \$50.0 million. The Adviser Revolver expired on December 31, 2020 without us having drawn or otherwise borrowed any amounts thereunder.

Asset Coverage Requirements

On June 21, 2018, our stockholders voted at a special meeting of stockholders to approve a proposal to authorize us to be subject to a reduced asset coverage ratio of at least 150% under the 1940 Act. As a result of the stockholder approval at the special meeting, effective June 22, 2018, our applicable minimum asset coverage ratio under the 1940 Act has been decreased to 150% from 200%. Thus, we are permitted under the 1940 Act, under specified conditions, to issue multiple classes of debt and one class of stock senior to our common stock if our asset coverage, as defined in the 1940 Act, is at least equal to 150% immediately after each such issuance. As of December 31, 2020, our asset coverage for borrowed amounts was 252%.

Contractual Obligations

The following table shows a summary of our payment obligations for repayment of debt as of December 31, 2020:

Payments Due By Period (in thousands)	December 31, 2020				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Credit Facility	\$ 118,000	\$ —	\$ —	\$ 118,000	\$ —
2022 Notes	74,750	—	74,750	—	—
2025 Notes	70,000	—	—	70,000	—
Total	<u>\$ 262,750</u>	<u>\$ —</u>	<u>\$ 74,750</u>	<u>\$ 188,000</u>	<u>\$ —</u>

Information about our senior securities is shown in the following table as of each of the years ended December 31, 2020, 2019, 2018, 2017, 2016, 2015 and 2014. The report of Deloitte & Touche, LLP, an independent registered public accounting firm, on the Senior Securities table as of December 31, 2020, is attached as an exhibit to this Annual Report on Form 10-K.

Class and Year	Total Amount Outstanding Exclusive of Treasury Securities ⁽¹⁾	Asset Coverage per Unit ⁽²⁾	Involuntary Liquidating Preference per Unit ⁽³⁾	Average Market Value per Unit ⁽⁴⁾
Credit Facility				
As of December 31, 2020	\$ 118,000	\$ 5.62	—	N/A

- (1) Total amount of senior securities outstanding at the end of the period presented (in thousands).
- (2) Asset coverage per unit is the ratio of the carrying value of our total assets, less all liabilities and indebtedness not represented by senior securities, in relation to the aggregate amount of senior securities representing indebtedness. Asset coverage per unit is expressed in terms of dollar amounts per \$1,000 of indebtedness.
- (3) The amount to which such class of senior security would be entitled upon the involuntary liquidation of the issuer in preference to any security junior to it. The “—” indicates information which the SEC expressly does not require to be disclosed for certain types of senior securities.
- (4) Not applicable for the Credit Facility and 2025 Notes as they are not registered for public trading. For the 6.75% Notes due 2020 (the “2020 Notes”), the amounts represent the average of the daily closing prices on the NYSE for the year ended December 31, 2016 and for the period from August 4, 2015 (date of issuance) through December 31, 2015. For the 2022 Notes, the amount represents the average of the daily closing prices on the NYSE for the years ended December 31, 2020, 2019, and 2018, and the period from July 14, 2017 (date of issuance) through December 31, 2017.
- (5) The 2020 Notes, 2022 Notes and 2025 Notes are disclosed at the aggregate principal amount outstanding.

Off-Balance Sheet Arrangements

Commitments

We are a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financial needs of our portfolio companies. As of December 31, 2020 and 2019, our unfunded commitments totaled \$132.3 million and \$226.1 million, respectively, of which \$17.5 million and \$59.3 million, respectively, was dependent upon the portfolio companies reaching certain milestones before the debt commitment becomes available to them. Our credit agreements contain customary lending provisions that allow us relief from funding obligations for previously made commitments in instances where the underlying portfolio company experiences material adverse events that affect the financial condition or business outlook for the portfolio company.

The following table shows our unfunded commitments by portfolio company as of December 31, 2020 and 2019:

Unfunded Commitments⁽¹⁾ (in thousands)	December 31, 2020	December 31, 2019
Farmer's Business Network, Inc.	\$ 20,000	\$ —
Capsule Corp.	15,000	10,000

Total	\$ 132,250	\$ 226,083

(1) Does not include backlog of potential future commitments. Refer to "Investment Activity" above.

Distributions

We have elected to be treated, and intend to qualify annually, as a RIC under the Code. To obtain and maintain RIC tax treatment, we must distribute at least 90% of our net ordinary income and net realized short-term capital gains in excess of our net realized long-term capital losses, if any, to our stockholders. In order to avoid a non-deductible 4% U.S. federal excise tax on certain of our undistributed income, we would need to distribute during each calendar year an amount at least equal to the sum of: (a) 98% of our ordinary income (not taking into account any capital gains or losses) for such calendar year; (b) 98.2% of the amount by which our capital gains exceed our capital losses (adjusted for certain ordinary losses) for a one-year period ending on October 31 of the calendar year (unless an election is made by us to use our taxable year); and (c) certain undistributed amounts from previous years on which we paid no U.S. federal income tax. For the tax years ended December 31, 2020, 2019 and 2018, we were subject to a 4% U.S. federal excise tax and we may be subject to this tax in future years. In such cases, we will be liable for the tax only on the amount by which we do not meet the foregoing distribution requirement.

To the extent our taxable earnings fall below the total amount of our distributions for the year, a portion of those distributions may be deemed a return of capital to our stockholders. Our Adviser monitors available taxable earnings, including net investment income and realized capital gains, to determine if a return of capital may occur for the year. We estimate the source of our distributions as required by Section 19(a) of the 1940 Act to determine whether payment of dividends are expected to be paid from any other source other than net investment income accrued for current period or certain cumulative periods, but we will not be able to determine whether any specific distribution will be treated as made out of our taxable earnings or as a return of capital until after the end of our taxable year. Any amount treated as a return of capital will reduce a stockholder's adjusted tax basis in his or her common stock, thereby increasing his or her potential gain or reducing his or her potential loss on the subsequent sale or other disposition of his or her common stock. On a quarterly basis, for any payment of dividends estimated to be paid from any other source other than net investment income accrued for current period or certain cumulative periods based on the Section 19(a) requirement, we post a Section 19(a) notice through the Depository Trust Company's Legal Notice System and our website, as well as send our registered stockholders a printed copy of such notice along with the dividend payment. The estimates of the source of the distribution are interim estimates based on GAAP that are subject to revision, and the exact character of the distributions for tax purposes cannot be determined until the final books and records are finalized for the calendar year. Therefore, these estimates are made solely in order to comply with the requirements of Section 19(a) of the 1940 Act and should not be relied upon for tax reporting or any other purposes and could differ significantly from the actual character of distributions for tax purposes.

The following table shows our cash distributions per share that have been authorized by our Board since our initial public offering to December 31, 2020. From March 5, 2014 (commencement of operations) to December 31, 2015, and during the years ended December 31, 2017 and December 31, 2018, distributions represent ordinary income as our earnings exceeded distributions. Approximately \$0.24 per share of the distributions during the year ended December 31, 2016 represented a return of capital. During the years ended December 31, 2019 and 2020, distributions represent ordinary income and long term capital gains. Depending on the duration of the COVID-19 pandemic and the extent of its impact on our portfolio companies' operations and our net investment income, any future distributions to our stockholders may be for amounts less than our historical distributions, may be made less frequently than historical practices, and may be made in part cash and part stock (as per each stockholder's election), subject to a limitation that the aggregate amount of cash to be distributed to all stockholders must be at least 20% of the aggregate declared distribution.

Period Ended	Date Announced	Record Date	Payment Date	Per Share Amount
March 31, 2014	April 3, 2014	April 15, 2014	April 30, 2014	\$ 0.09 (1)

Total cash distributions				<u>\$ 10.06</u>

(1) The amount of this initial distribution reflected a quarterly distribution rate of \$0.30 per share, prorated for the 27 days for the period from the pricing of our initial public offering on March 5, 2014 (commencement of operations), through March 31, 2014.

- (2) Represents a special distribution.

For the years ended December 31, 2020 and 2019, distributions paid were comprised of interest-sourced distributions (qualified interest income) in amounts equal to 93.5% and 98.8% of total distributions paid, respectively. As of December 31, 2020, we estimated that we had undistributed taxable earnings from net investment income and realized gains (or “Spillover Income”) of \$16.2 million, or \$0.53 per share.

Recent Accounting Pronouncements

In August 2018, the FASB issued ASU 2018-13, “Fair Value Measurement (Topic 820): Disclosure Framework - Changes to Disclosure Requirements for Fair Value Measurement”, which is intended to improve the effectiveness of fair value measurement disclosures. The amendment, among other things, affects certain disclosure requirements related to transfers between Level 1 and Level 2 of the fair value hierarchy, and Level 3 fair value measurements as they relate to valuation process, unrealized gains and losses, measurement uncertainty, and significant unobservable inputs. The new guidance is effective for interim and annual periods beginning after December 15, 2019. The adoption of these rules did not have a material impact on the consolidated financial statements and disclosures.

In March 2020, the FASB issued ASU 2020-04, “Reference rate reform (Topic 848)—Facilitation of the effects of reference rate reform on financial reporting.” The amendments in this update provide optional expedients and exceptions for applying U.S. GAAP to certain contracts and hedging relationships that reference LIBOR or another reference rate expected to be discontinued due to reference rate reform and became effective upon issuance for all entities. The standard is effective as of March 12, 2020 through December 31, 2022. The adoption of these rules did not have a material impact on the consolidated financial statements.

Recent Developments

Distribution

On February 24, 2021, the Board declared a \$0.36 per share regular quarterly distribution, payable on March 31, 2021 to stockholders of record on March 15, 2021.

Recent Portfolio Activity

From January 1, 2021 through March 2, 2021, we closed \$48.4 million of additional debt commitments and funded \$42.9 million in new investments. TPC’s direct originations platform entered into \$58.1 million of additional non-binding signed term sheets with venture growth stage companies. These investment opportunities for us are subject to due diligence, definitive documentation and investment committee approval, as well as compliance with TPC’s allocation policy. From January 1, 2021 through March 2, 2021, we received \$17.4 million of principal prepayments generating approximately \$0.5 million of accelerated income.

On January 11, 2021, we sold our investments in portfolio company Knotel, Inc. (“Knotel”) to a third party for gross proceeds of approximately \$15.0 million plus potential equity in its post-bankruptcy entity. On January 31, 2021, Knotel filed for Chapter 11 bankruptcy protection. The fair value of our investments in Knotel as of December 31, 2020 was \$15.0 million, reflecting cash proceeds received in January 2021.

Amendment to the Credit Facility

On January 29, 2021, we amended the Credit Facility to increase the capacity of the Credit Facility to \$350 million from \$325 million and add a new lender. The \$25 million increase in the capacity of the Credit Facility was made under the accordion feature in the Credit Facility.

Issuance of 4.50% Series 2021A Senior Notes Due 2026

On March 1, 2021, we issued \$200,000,000 in aggregate principal amount of our 4.50% Series 2021A Senior Notes due 2026 (the “2026 Notes”). The 2026 Notes were issued in a private placement to certain qualified institutional investors, pursuant to the terms of the First Supplement, dated as of March 1, 2021 (the “First Supplement”), to the Note Purchase Agreement. The 2026 Notes bear a fixed interest rate of 4.50% per year and will mature on March 1, 2026, unless redeemed, purchased or prepaid by us prior to such date in accordance with their terms. In the event that a Below Investment Grade Event (as defined in the Note Purchase Agreement) occurs, the 2026 Notes will bear interest at a fixed rate of 5.50% per year from the date of the occurrence of the Below Investment Grade Event to and until the date on which the Below Investment Grade Event is no longer continuing.

Interest on the 2026 Notes will be due semiannually on March 19 and September 19 each year, beginning on September 19, 2021. The 2026 Notes may be redeemed in whole or in part at any time or from time to time at our option at par plus accrued interest to the prepayment date and, if applicable, a make-whole premium. In addition, we are obligated to offer to prepay the 2026 Notes at par plus accrued and unpaid interest up to, but excluding, the date of prepayment, if certain change in control events occur. The 2026 Notes are our general unsecured obligations that rank pari passu with all outstanding and future unsecured unsubordinated indebtedness issued by us; provided, however, in the event that we create, incur, assume or permit to exist liens on or with respect to any of our property or assets in connection with future secured indebtedness of more than an aggregate principal amount of \$25 million, the 2026 Notes and the 2025 Notes will generally become secured concurrently therewith, equally and ratably with such indebtedness. The other terms and conditions applicable to the 2026 Notes under the Note

Purchase Agreement, as modified by the First Supplement, including events of default and affirmative and negative covenants, are substantially similar to the terms and conditions applicable to the 2025 Notes.

The 2026 Notes were offered in reliance on Section 4(a)(2) of Securities Act. The 2026 Notes have not and will not be registered under the Securities Act or any state securities laws and, unless so registered, may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act, as applicable.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We are subject to financial market risks, including changes in interest rates. We are also subject to risks relating to the capital markets; conditions affecting the general economy; legislative reform; and local, regional, national or global political, social or economic instability. U.S. and global capital markets and credit markets have experienced a higher level of stress due to the global COVID-19 pandemic, which has resulted in an increase in the level of volatility across such markets and in values of publicly-traded securities. Any continuation of the stresses on capital markets and credit markets, or a further increase in volatility could result in a contraction of available credit for us and/or an inability by us to access the equity or debt capital markets or could otherwise cause an inability or unwillingness of our lenders to fund their commitments to us, any of which may have a material adverse effect on our results of operations and financial condition.

Interest Rate Risk

Interest rate sensitivity refers to the change in our earnings and in the relative values of our portfolio that may result from changes in the level of interest rates. Because we fund a portion of our investments with borrowings, our net investment income is affected by the difference between the rate at which we invest and the rate at which we borrow. As a result, there can be no assurance that a change in market interest rates will not have a material adverse effect on our net investment income.

Changes in interest rates may affect both our cost of funding and our interest income from portfolio investments. Our risk management systems and procedures are designed to identify and analyze our risk, to set appropriate policies and limits and to continually monitor these risks. Our investment income will be affected by changes in various interest rates, including LIBOR and the Prime Rate, to the extent that any debt investments include floating interest rates. Debt investments are made with either floating rates that are subject to contractual minimum interest rates for the term of the investment or fixed interest rates.

In connection with the COVID-19 pandemic, the U.S. Federal Reserve and other central banks have reduced certain interest rates and LIBOR has decreased. A prolonged reduction in interest rates could reduce our gross investment income and could result in a decrease in our net investment income if such decreases in interest rates are not offset by a corresponding increase in the spread over the Prime Rate that we earn on any portfolio investments, a decrease in our operating expenses or a decrease in the interest rate of our floating interest rate liabilities tied to LIBOR. For example, the weighted-average annualized portfolio yield on our total debt investments decreased for the year ended December 31, 2020 as compared to the year ended December 31, 2019 in part due to a decrease in the Prime Rate between periods.

As of December 31, 2020, a majority of the debt investments (approximately 58.6% or \$357.6 million in principal balance) in our portfolio bore interest at floating rates, which generally are Prime-based, all of which have interest rate floors. Substantially all of our unfunded commitments float with changes in the Prime Rate from the date we enter into the commitment to the date of the actual draw. In addition, our interest expense will be affected by changes in the published LIBOR rate in connection with our Credit Facility; however, our 2022 Notes bear interest at a fixed rate. In addition, our 2025 Notes bear interest at a fixed rate (subject to a 1.00% increase in the fixed rate in the event that a Below Investment Grade Event (as defined in the Note Purchase Agreement) occurs).

As of December 31, 2020, our floating rate borrowings totaled \$118.0 million which comprised of 44.9% of our outstanding debt. Due to the fact that the majority of our floating rate debt investment portfolio is subject to interest-rate floors above the current Prime Rate, small interest rate increases would generally decrease our net investment income because our interest expense would increase without a corresponding increase the spread over LIBOR or the Prime Rate that we earn on any portfolio investments; however, a decrease in interest rates would generally increase our net investment income because our interest expense attributable to borrowings under the Credit Facility would decrease. This is illustrated in the following table which shows the annual impact on net investment income of base rate changes in interest rates (considering interest rate floors for variable rate instruments) assuming no changes in our investment and borrowing structure from the December 31, 2020 consolidated statement of assets and liabilities:

Change in Interest Rates (in thousands)	Increase (decrease) in interest income	(Increase) decrease in interest expense	Net increase (decrease) in net investment income
Up 300 basis points	\$ 4,774	\$ (3,231)	\$ 1,543
Up 200 basis points	\$ 1,473	\$ (2,051)	\$ (578)
Up 100 basis points	\$ 624	\$ (871)	\$ (247)
Up 50 basis points	\$ 312	\$ (281)	\$ 31
Down 50 basis points	\$ —	\$ —	\$ —
Down 100 basis points	\$ —	\$ —	\$ —
Down 200 basis points	\$ —	\$ —	\$ —
Down 300 basis points	\$ —	\$ —	\$ —

This analysis is indicative of the potential impact on our investment income as of December 31, 2020, assuming an immediate and sustained change in interest rates as noted. It should be noted that we anticipate growth in our portfolio funded in part with additional borrowings and such additional borrowings, all else being equal, will increase our investment income sensitivity to interest rates, and such changes could be material. In addition, this analysis does not adjust for potential changes in our portfolio or our borrowing facilities nor does it take into account any changes in the credit performance of our loans that might occur should interest rates change.

Because it is our intention to hold loans to maturity, the fluctuating relative value of these loans that may occur due to changes in interest rate may have an impact on unrealized gains and losses during quarterly reporting periods. Based on our assessment of the interest rate risk, as of December 31, 2020, we had no hedging transactions in place as we deemed the risk acceptable, and we did not believe it was necessary to mitigate this risk at that time.

While hedging activities may mitigate our exposure to adverse fluctuations in interest rates, certain hedging transactions that we may enter into in the future, such as interest rate swap agreements, may also limit our ability to participate in the benefits of lower interest rates with respect to our portfolio investments. In addition, there can be no assurance that we will be able to effectively hedge our interest rate risk.

Substantially all of our assets and liabilities are financial in nature. As a result, changes in interest rates and other factors drive our performance more directly than does inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
TriplePoint Venture Growth BDC Corp.
Menlo Park, California

Opinion on the Financial Statements and Financial Highlights

We have audited the accompanying consolidated statements of assets and liabilities of TriplePoint Venture Growth BDC Corp. and subsidiaries (the "Company"), including the consolidated schedules of investments, as of December 31, 2020 and 2019, the related consolidated statements of operations, changes in net assets, and cash flows for each of the three years in the period ended December 31, 2020, the consolidated financial highlights for each of the five years in the period then ended, and the related notes. In our opinion, the consolidated financial statements and consolidated financial highlights present fairly, in all material respects, the financial position of the Company as of December 31, 2020 and 2019, and the results of its operations, changes in net assets, and cash flows for each of the three years in the period ended December 31, 2020, and the financial highlights for each of the five years in the period then ended in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements and financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and financial highlights. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and financial highlights. Our procedures included confirmation of investments owned as of December 31, 2020 and 2019, by correspondence with the custodian, loan agents, and borrowers; when replies were not received, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to an account or disclosure that is material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Fair Value — Level 3 Investments Valuation — Refer to Note 2 and Note 4 to the financial statements

Critical Audit Matter Description

The Company held investments classified as Level 3 investments under Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosure, or "ASC Topic 820." These investments include growth capital loans, revolving loans, and not publicly traded investments in venture growth stage companies. The valuation techniques which are used by management and approved by the valuation committee in estimating the fair value of these investments vary and certain significant inputs used were unobservable. Unobservable inputs are those for which market data are not available and that are developed using the most relevant information about the assumptions market participants would use when pricing an investment. The fair value of the Company's Level 3 investments was \$633,559 thousand as of December 31, 2020.

We identified the valuation of Level 3 investments as a critical audit matter because of the judgments necessary for management and the valuation committee to select valuation techniques and to use significant unobservable inputs to estimate the fair value. This required a high degree of auditor judgment and extensive audit effort, including the need to involve fair value specialists who possess significant valuation experience, to evaluate the appropriateness of the valuation techniques and the significant unobservable inputs, when performing audit procedures to audit management's estimate of fair value of Level 3 investments.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to valuation techniques and unobservable inputs used by management to estimate the fair value of Level 3 investments included the following, among others:

- We evaluated the appropriateness of the valuation techniques used by management to estimate fair value and tested the related significant unobservable inputs by comparing these inputs to external sources. For a sample of Level 3 investments, we performed these procedures with the assistance of our fair value specialists.
- In instances where the selection of valuation techniques or significant unobservable inputs involves more subjective judgments and estimates, with the assistance of our fair value specialists, we developed an independent estimate of the fair value and compared our estimates to management's estimates.
- We evaluated management's ability to reasonably estimate fair value by comparing management's historical estimates to subsequent transactions, taking into account changes in market or investment specific conditions, where applicable.

/s/ Deloitte & Touche LLP

San Francisco, California

March 3, 2021

We have served as the Company's auditor since 2013.

- (1) Investment is a non-qualifying asset under Section 55(a) of the Investment Company Act of 1940, as amended (the “1940 Act”). As of December 31, 2020 non-qualifying assets represented 21.5% of the Company’s total assets, at fair value.
- (2) As of December 31, 2020, this investment was not pledged as collateral as part of the Company’s revolving credit facility.
- (3) Entity is not domiciled in the United States and does not have its principal place of business in the United States.
- (4) Investment is owned by TPVG Investment LLC, a wholly owned taxable subsidiary of the Company.
- (5) Investment is a cash success fee or a cash exit fee payable on the consummation of certain trigger events.
- (6) Gross unrealized gains, gross unrealized losses, and net unrealized losses for federal income tax purposes totaled \$13.8 million, \$42.4 million and \$28.6 million, respectively, for the December 31, 2020 investment portfolio. The tax cost of investments is \$662.4 million.
- (7) Debt is on non-accrual status at December 31, 2020 and is therefore considered non-income producing. Non-accrual investments at December 31, 2020 had a total cost and fair value of \$61.8 million and \$36.4 million, respectively.
- (8) Non-income producing investments.
- (9) Except for equity in one public company, all investments were valued at fair value using Level 3 significant unobservable inputs as determined in good faith by the Company’s board of directors (the “Board”).
- (10) Investment is publicly traded and listed on New York Stock Exchange.
- (11) The Company generally acquires its investments in private transactions exempt from registration under the Securities Act of 1933, as amended (the “Securities Act”). These investments are generally subject to certain limitations on resale, and may be deemed to be “restricted securities” under the Securities Act.
- (12) Acquisition date represents the date of the investment in the portfolio investment.
- * Value as a percentage of net assets.

- (1) Investment is a non-qualifying asset under Section 55(a) of the 1940 Act. As of December 31, 2019 non-qualifying assets represented 21.9% of the Company's total assets, at fair value.
- (2) As of December 31, 2019, this investment was not pledged as collateral as part of the Company's revolving credit facility.
- (3) Entity is not domiciled in the United States and does not have its principal place of business in the United States.
- (4) Investment is owned by TPVG Investment LLC, a wholly owned taxable subsidiary of the Company.
- (5) Investment is a cash success fee or a cash exit fee payable on the consummation of certain trigger events.
- (6) Gross unrealized gains, gross unrealized losses, and net unrealized losses for federal income tax purposes totaled \$24.0 million, \$31.5 million, and \$7.5 million, respectively, for the December 31, 2019 investment portfolio. The tax cost of investments is \$660.7 million.
- (7) Debt is on non-accrual status at December 31, 2019 and is therefore considered non-income producing. Non-accrual investments at December 31, 2019 had a total cost and fair value of \$49.5 million and \$26.5 million, respectively.
- (8) Non-income producing investments.
- (9) Except for equity in two public companies, all investments were valued at fair value using Level 3 significant unobservable inputs as determined in good faith by the Board.
- (10) Entity is publicly traded and listed on New York Stock Exchange or NASDAQ.
- (11) The Company generally acquires its investments in private transactions exempt from registration under the Securities Act. These investments are generally subject to certain limitations on resale, and may be deemed to be "restricted securities" under the Securities Act.
- (12) Acquisition date represents the date of the investment in the portfolio investment.
- * Value as a percentage of net assets.

Notes applicable to the investments presented in the foregoing tables:

- No investment represents a 5% or greater interest in any outstanding class of voting security of the portfolio company.

Notes applicable to the debt investments presented in the foregoing tables:

- Interest rate is the annual interest rate on the debt investment and does not include any original issue discount ("OID"), end-of-term ("EOT") payment, or any additional fees related to the investments, such as deferred interest, commitment fees or prepayment fees.
- For each debt investment tied to the U.S. Prime rate ("Prime Rate") as of December 31, 2020, Prime was 3.25%. As of December 31, 2020, a majority of the debt investments (approximately 58.6% or \$357.6 million in principal balance) in the Company's portfolio bore interest at floating rates, which generally are Prime-based and all of which have interest rate floors of 3.25% or higher.
- The EOT payments are contractual and fixed interest payments due in cash at the maturity date of the loan, including upon prepayment, and are a fixed percentage of the original principal balance of the loan unless otherwise noted. The EOT payment is amortized and recognized as non-cash income over the loan or lease prior to its payment.
- Some of the terms noted in the foregoing tables are subject to change based on certain events such as prepayments.

TRIPLEPOINT VENTURE GROWTH BDC CORP. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Organization

TriplePoint Venture Growth BDC Corp. (the “Company”), a Maryland corporation, was formed on June 28, 2013 and commenced investment operations on March 5, 2014. The Company is structured as an externally-managed non-diversified, closed-end investment company that has elected to be treated as a business development company (“BDC”) under the Investment Company Act of 1940, as amended (the “1940 Act”). The Company has elected to be treated, and intends to qualify annually, as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”).

The Company was formed to expand the venture growth stage business segment of TriplePoint Capital LLC’s (“TPC”) investment platform. TPC is widely recognized as a leading global financing provider devoted to serving venture capital-backed companies with creative, flexible and customized debt financing, equity capital and complementary services throughout their lifespan. The Company’s investment objective is to maximize its total return to stockholders primarily in the form of current income and, to a lesser extent, capital appreciation by lending primarily with warrants to venture growth stage companies focused in technology, life sciences and other high growth industries backed by TPC’s select group of leading venture capital investors. The Company is externally managed by TriplePoint Advisers LLC (the “Adviser”), which is registered as an investment adviser under the Investment Advisers Act of 1940, as amended, and is a wholly owned subsidiary of TPC. The Adviser is responsible for sourcing, reviewing and structuring investment opportunities, underwriting and performing due diligence on investments and monitoring the investment portfolio on an ongoing basis. The Adviser was organized in August 2013 and, pursuant to an investment advisory agreement entered into between the Company and the Adviser, the Company pays the Adviser a base management fee and an incentive fee for its services. The Company has also entered into an administration agreement with TriplePoint Administrator LLC (the “Administrator”), a wholly owned subsidiary of the Adviser, and pays separately for services provided.

The Company has two wholly owned subsidiaries: TPVG Variable Funding Company LLC (the “Financing Subsidiary”), a bankruptcy remote special purpose entity established for utilizing the Company’s revolving credit facility, and TPVG Investment LLC, an entity established for holding certain of the Company’s investments in order to benefit from the tax treatment of these investments and create a tax structure that is more advantageous with respect to the Company’s RIC tax treatment. These subsidiaries are consolidated in the financial statements of the Company.

Note 2. Significant Accounting Policies

Basis of Presentation and Principles of Consolidation

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”) and include the accounts of the Company and its consolidated subsidiaries. All adjustments and reclassifications that are necessary for the fair representation of financial results as of and for the periods presented have been included and all intercompany account balances and transactions have been eliminated. Certain items in the prior year’s consolidated financial statements have been conformed to the current year’s presentation. These presentation changes, if any, did not impact any prior amounts of reported total assets, total liabilities, and net assets or results of operations. As an investment company, the Company follows accounting and reporting guidance as set forth in Topic 946 (“Financial Services - Investment Companies”) of the Financial Accounting Standards Board’s (“FASB”) Accounting Standards Codification, as amended (“ASC”).

Use of Estimates

The preparation of the accompanying consolidated financial statements in conformity with GAAP requires estimates and assumptions to be made that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of income and expenses during the reporting period. Changes in the economic environment, financial markets, creditworthiness of portfolio companies and any other parameters used in determining these estimates could cause actual results to differ from those estimates.

Investments

Investment transactions are recorded on a trade-date basis. The Company’s investments are carried at fair value in accordance with the 1940 Act and ASC Topic 946 and measured in accordance with ASC Topic 820 (“Fair Value Measurements”). Fair value is a market-based measure considered from the perspective of the market’s participant who holds the financial instrument rather than an entity specific measure. When market assumptions are not readily available, the Company’s own assumptions are set to reflect those that the Adviser believes market participants would use in pricing the financial instruments on the measurement date.

The availability of observable inputs can vary depending on the financial instrument and is affected by a variety of factors. To the extent the valuation is based on models or inputs that are less observable the determination of fair value requires more judgment. The Company’s valuation methodology is approved by the Board, and the Board is responsible for the fair values determined. As markets change, new types of investments are made, or pricing for certain investments becomes more or less observable, the Board may refine its valuation methodologies to best reflect the fair value of its investments appropriately.

Cash and Cash Equivalents

The Company places its cash with financial institutions and at times, cash held in such accounts may exceed the Federal Deposit Insurance Corporation insured limit. The Company may invest a portion of its cash in money market funds, within the limitations of the 1940 Act.

Restricted Cash

Restricted cash consists of collections of interest and principal payments on investments maintained in segregated trust accounts for the benefit of the lenders and administrative agent of the Company's revolving credit facility.

Deferred Credit Facility Costs

Deferred credit facility costs represent fees and other expenses incurred in connection with the Company's revolving credit facility. These amounts are amortized and included in interest expense in the consolidated statements of operations over the estimated term of the facility.

Other Accrued Expenses and Liabilities

Other accrued expenses and liabilities include interest payable, accounts payable and the fair value of unfunded commitment liabilities. Unfunded commitment liabilities reflect the fact that the Company is a party to certain delay draw credit agreements with its portfolio companies, which generally requires the Company to make future advances at the borrowers' discretion during a defined loan availability period. The Company's credit agreements contain customary lending provisions that allow the Company relief from funding previously made commitments in instances where the underlying portfolio company experiences material adverse events that affect the financial condition or business outlook for the portfolio company. In certain instances, the borrower may be required to achieve certain milestones before they may request a future advance. The unfunded obligation associated with these credit agreements is equal to the amount by which the contractual funding commitment exceeds the sum of the amount of debt required to be funded under the delay draw credit agreements unless the availability period has expired. The fair value at the inception of the agreement of the delay draw credit agreements approximates the fair value of the warrant investments received to enter into these agreements, taking into account the remaining terms of the agreements and the counterparties' credit profile. The unfunded commitment liability included in the Company's consolidated statements of assets and liabilities reflects the fair value of these future funding commitments.

Paid-in Capital

The Company records the proceeds from the sale of its common stock on a net basis to capital stock and paid-in capital in excess of par value, excluding all offering costs.

Income Recognition

Interest income, adjusted for amortization of market premium and accretion of market discount, is recorded on an accrual basis to the extent that the Company expects to collect such amounts. Original issue discount, principally representing the estimated fair value of detachable equity or warrant investments obtained in conjunction with the Company's debt investments, and market discount or premium are capitalized and accreted or amortized into interest income over the life of the respective security using the effective interest method. Loan origination fees received in connection with the closing of investments are reported as unearned income which is included as amortized cost of the investment; the unearned income from such fees is accreted over the contractual life of the loan based on the effective interest method as interest income. Upon prepayment of a loan or debt security, unamortized loan origination fees and unamortized market discounts are recorded as interest income. End-of-term (EOT) payments are contractual and fixed interest payments due in cash at the maturity date of the loan, including upon prepayment, and are generally a fixed percentage of the original principal balance of the loan. Interest is accrued during the life of the loan on the EOT payment using the effective interest method as non-cash income. The EOT payment generally ceases accruing to the extent the borrower is unable to pay the remaining principal and interest due. The EOT payment may also include a cash success fee due upon the earlier of the maturity date of the loans or in the event of a certain milestone reached by the portfolio company.

For debt investments with contractual payment-in-kind ("PIK") interest, which represents contractual interest accrued and added to the principal balance that generally becomes due at maturity, the Company does not accrue PIK interest if it is deemed uncollectible.

Other income includes certain fees paid by portfolio companies (for example, extension fees, revolver loan facility fees, prepayment fees) and the recognition of the value of unfunded commitments that expired during the reporting period.

Non-accrual loans

A loan may be left on accrual status during the period the Company is pursuing repayment of the loan. The Company reviews all loans that become 90 days or more past due on principal and interest, or when there is reasonable doubt that principal or interest will be collected, for possible placement on non-accrual status. When a loan is placed on non-accrual status, unpaid interest credited to income is reversed. Additionally, any original issue discount and market discount are no longer accreted to interest income as of the date the loan is placed on non-accrual status. Interest payments received on non-accrual loans may be recognized as income or applied to principal depending upon the Company's judgment. Non-accrual loans are restored to accrual status when past due principal and interest is paid and, in the Company's judgment, payments are probable to remain current.

Realized/Unrealized Gains or Losses

The Company measures realized gains or losses from the repayment or sale of investments using the specific identification method. The amortized cost basis of investments represents the original cost adjusted for the accretion/amortization of discounts and premiums and upfront loan origination fees. The Company reports changes in fair value of investments that are measured at fair value as a component of net change in unrealized gain (loss) on investments in the consolidated statements of operations.

Management Fees

The Company accrues for the base management fee and incentive fee. The accrual for incentive fee includes the recognition of incentive fees on unrealized gains, even though such incentive fees are neither earned nor payable to the Adviser until the gains are both realized and in excess of unrealized losses on investments.

U.S. Federal Income Taxes

The Company has elected to be treated, and intends to qualify annually, as a RIC under Subchapter M the Code, for U.S. federal income tax purposes. Generally, a RIC is not subject to U.S. federal income taxes on the income and gains it distributes to stockholders if it distributes at least 90% of its net ordinary income and net short-term capital gains in excess of its net long-term capital losses, if any. Additionally, a RIC must distribute at least 98% of its ordinary income and 98.2% of its capital gain net income on an annual basis and any net ordinary income and net capital gains for preceding years that were not distributed during such years and on which the RIC previously paid no U.S. federal income tax to avoid a U.S. federal excise tax. The Company intends to distribute sufficient dividends to maintain the Company's RIC status each year and does not anticipate paying any material U.S. federal income taxes in the future.

Dividends and Distributions

Dividends to common stockholders are recorded on the ex-dividend date. The Board determines the amount of dividends to be paid each quarter based on a variety of factors including estimates of future earnings. Net realized capital gains, if any, are intended to be distributed at least annually. The Company will calculate both its current and accumulated earnings and profits on a tax basis in order to determine the amount of any distribution that constituted a return of capital to the Company's stockholders and that while such distributions are not taxable, they may result in higher capital gains taxes when the shares are eventually sold.

Debt Issuance Costs

Debt issuance costs are fees and other direct incremental costs incurred by the Company in obtaining debt financing. Debt issuance costs are amortized and included in interest expense over the life of the related debt instrument using the effective yield method. The respective debt payable is presented net of the unamortized debt issuance costs in the consolidated statements of assets and liabilities.

Per Share Information

Basic and diluted earnings per common share are calculated using the weighted average number of common shares outstanding for the periods presented. For the periods presented, basic and diluted earnings per share are the same since there are no potentially dilutive securities outstanding.

Foreign Currency Translation

The Company's books and records are maintained in U.S. dollars. Any foreign currency amounts are translated into U.S. dollars on the following basis:

- Fair value of investment securities, other assets and liabilities—at the exchange rates prevailing at the end of the period; and
- Purchases and sales of investment securities, income and expenses—at the exchange rates prevailing on the respective dates of such transactions, income or expenses.

Net assets and fair values are presented based on the applicable foreign exchange rates described above and the Company does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in fair values of investments held; therefore, fluctuations related to foreign exchange rate conversions are included with the net realized gains (losses) and unrealized gains (losses) on investments.

Recent Accounting Pronouncements

In August 2018, the FASB issued ASU 2018-13, "Fair Value Measurement (Topic 820): Disclosure Framework - Changes to Disclosure Requirements for Fair Value Measurement", which is intended to improve the effectiveness of fair value measurement disclosures. The amendment, among other things, affects certain disclosure requirements related to transfers between Level 1 and Level 2 of the fair value hierarchy, and Level 3 fair value measurements as they relate to valuation process, unrealized gains and losses, measurement uncertainty, and significant unobservable inputs. The new guidance is effective for interim and annual periods beginning after December 15, 2019. The adoption of these rules did not have a material impact on the consolidated financial statements and disclosures.

In March 2020, the FASB issued ASU 2020-04, “Reference rate reform (Topic 848)—Facilitation of the effects of reference rate reform on financial reporting.” The amendments in this update provide optional expedients and exceptions for applying U.S. GAAP to certain contracts and hedging relationships that reference LIBOR or another reference rate expected to be discontinued due to reference rate reform and became effective upon issuance. The standard is effective as of March 12, 2020 through December 31, 2022. The adoption of these rules did not have a material impact on the consolidated financial statements.

Note 3. Related Party Agreements and Transactions

Investment Advisory Agreement

In accordance with the Board approved investment advisory agreement (the “Advisory Agreement”), subject to the overall supervision of the Board and in accordance with the 1940 Act, the Adviser manages the day-to-day operations and provides investment advisory services to the Company. Under the terms of the Advisory Agreement, the Adviser:

- determines the composition of the Company’s portfolio, the nature and timing of changes to the Company’s portfolio and the manner of implementing such changes;
- identifies, evaluates and negotiates the structure of investments;
- executes, closes, services and monitors investments;
- determines the securities and other assets purchased, retained or sold;
- performs due diligence on prospective investments; and
- provides the Company with such other investment advisory, research and related services as the Company may, from time to time, reasonably require for the investment of its funds.

As consideration for the investment advisory and management services provided, and pursuant to the Advisory Agreement, the Company has agreed to pay the Adviser a fee consisting of two components—a base management fee and an incentive fee. The cost of both the base management fee and incentive fee is ultimately borne by the Company’s stockholders.

The base management fee is calculated at an annual rate of 1.75% of the Company’s average adjusted gross assets, including assets purchased with borrowed funds. For services rendered under the Advisory Agreement, the base management fee is payable quarterly in arrears. The base management fee is calculated based on the average value of the Company’s gross assets at the end of its two most recently completed calendar quarters. Such amount is appropriately adjusted (based on the actual number of days elapsed relative to the total number of days in such calendar quarter) for any share issuances or repurchases during a calendar quarter. Base management fees for any partial month or quarter are appropriately pro-rated.

The incentive fee, which provides the Adviser with a share of the income it generates for the Company, consists of two components—net investment income and net capital gains—which are largely independent of each other, and may result in one component being payable in a given period even if the other is not payable.

Under the investment income component, the Company pays the Adviser each quarter 20.0% of the amount by which the Company’s pre-incentive fee net investment income for the quarter exceeds a hurdle rate of 2.0% (8.0% annualized) of the Company’s net assets at the end of the immediately preceding calendar quarter, subject to a “catch-up” provision pursuant to which the Adviser receives all of such income in excess of 2.0% but less than 2.5%, subject to a total return requirement. The effect of the “catch-up” provision is that, subject to the total return provision discussed below, if pre-incentive fee net investment income exceeds 2.5% in any calendar quarter, the Adviser receives 20.0% of the Company’s pre-incentive fee net investment income as if the 2.0% hurdle rate did not apply. The foregoing incentive fee is subject to a total return requirement, which provides that no incentive fee in respect of the Company’s pre-incentive fee net investment income is payable except to the extent that 20.0% of the cumulative net increase in net assets resulting from operations since the effective date of the Company’s election to be regulated as a BDC exceeds the cumulative incentive fees accrued and/or paid since the effective date of the Company’s election to be regulated as a BDC. In other words, any investment income incentive fee that is payable in a calendar quarter is limited to the lesser of (i) 20.0% of the amount by which the Company’s pre-incentive fee net investment income for such calendar quarter exceeds the 2.0% hurdle, subject to the “catch-up” provision and (ii) (x) 20.0% of the cumulative net increase in net assets resulting from operations since the effective date of the Company’s election to be regulated as a BDC minus (y) the cumulative incentive fees accrued and/or paid since the effective date of the Company’s election to be regulated as a BDC. For the foregoing purpose, the “cumulative net increase in net assets resulting from operations” is the sum of the Company’s pre-incentive fee net investment income, realized gains and losses and unrealized appreciation and depreciation since the effective date of the Company’s election to be regulated as a BDC. The Company elected to be regulated as a BDC under the 1940 Act on March 5, 2014.

Pre-incentive fee net investment income, expressed as a rate of return on the value of the Company's net assets at the end of the immediately preceding calendar quarter, does not include any realized capital gains, realized capital losses or unrealized capital gains or losses. Because of the structure of the incentive fee, it is possible that the Company may pay an incentive fee in a quarter where it incurs a loss, subject to the total return requirement described in the preceding paragraph. For example, if the Company receives pre-incentive fee net investment income in excess of the quarterly minimum hurdle rate, the Company may pay the applicable income incentive fee even if it has incurred a loss in that quarter due to realized and unrealized losses. The Company's net investment income used to calculate this component of the incentive fee is also included in the amount of the Company's assets used to calculate the 1.75% base management fee. These calculations are appropriately adjusted for any share issuance or repurchase during the relevant quarter.

Under the capital gains component of the incentive fee, the Company pays the Adviser at the end of each calendar year (or upon termination of the Advisory Agreement) 20.0% of the Company's aggregate cumulative realized capital gains from inception through the end of that year (or upon termination of the Advisory Agreement), computed net of aggregate cumulative realized capital losses and aggregate cumulative unrealized losses through the end of such year, less the aggregate amount of any previously paid capital gain incentive fees. For the foregoing purpose, the Company's "aggregate cumulative realized capital gains" does not include any unrealized gains. It should be noted that the Company accrues an incentive fee for accounting purposes taking into account any unrealized gains in accordance with GAAP. The capital gains component of the incentive fee is not subject to any minimum return to stockholders. If such amount is negative, then no capital gains incentive fee is payable for such year. Additionally, if the Advisory Agreement is terminated as of a date that is not a calendar year end, the termination date will be treated as though it were a calendar year end for purposes of calculating and paying the capital gains incentive fee.

The base management fee, income incentive fee and capital gains incentive fee earned by the Adviser are included in the Company's consolidated financial statements and summarized in the table below. Base management and incentive fees are paid in the quarter following that in which they are earned. The Adviser has agreed to exclude the U.S. Treasury bills acquired at the end of each applicable quarter in the calculation of gross assets for purposes of determining its base management fee. The Company had cumulative realized and unrealized losses as of December 31, 2020, 2019 and 2018, and, as a result, no capital gains incentive fees were recorded for the years ended December 31, 2020, 2019 and 2018.

Management and Incentive Fees (in thousands)	For the Year Ended December 31,		
	2020	2019	2018
Base management fee	\$ 12,424	\$ 8,569	\$ 6,868
Income incentive fee	\$ 8,717	\$ 8,117	\$ 8,747
Capital gains incentive fee	\$ —	\$ —	\$ —

Administration Agreement

The Board-approved administration agreement (the "Administration Agreement") provides that the Administrator is responsible for furnishing the Company with office facilities and equipment and providing the Company with clerical, bookkeeping, recordkeeping services and other administrative services at such facilities. Under the Administration Agreement, the Administrator performs, or oversees, or arranges for, the performance of the Company's required administrative services, which includes being responsible for the financial and other records which the Company is required to maintain and preparing reports to the Company's stockholders and reports and other materials filed with the SEC and any other regulatory authority. In addition, the Administrator assists the Company in determining and publishing net asset value ("NAV"), overseeing the preparation and filing of the Company's tax returns and printing and disseminating reports and other materials to the Company's stockholders, and generally oversees the payment of the Company's expenses and the performance of administrative and professional services rendered to the Company by others. Under the Administration Agreement, the Administrator also provides significant managerial assistance on the Company's behalf to those companies that have accepted the Company's offer to provide such assistance.

In full consideration of the provision of the services of the Administrator, the Company reimburses the Administrator for the costs and expenses incurred by the Administrator in performing its obligations and providing personnel and facilities under the Administration Agreement. Payments under the Administration Agreement are equal to the Company's allocable portion (subject to the review of the Board) of the Administrator's overhead resulting from its obligations under the Administration Agreement, including rent and the allocable portion of the cost of the chief compliance officer and chief financial officer and their respective staffs. In addition, if requested to provide significant managerial assistance to the Company's portfolio companies, the Administrator is paid an additional amount based on the services provided, which shall not exceed the amount the Company receives from such companies for providing this assistance.

For the years ended December 31, 2020, 2019 and 2018, expenses paid or payable by the Company to the Administrator under the Administration Agreement were \$2.1 million, \$1.8 million and \$1.7 million.

Note 4. Investments

The Company measures the fair value of its investments in accordance with *Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosure*, or "ASC Topic 820," issued by the FASB. ASC Topic 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Valuation Committee of the Board is responsible for assisting the Board in valuing investments that are not publicly traded or for which current market values are not readily available. Investments for which market quotations are readily available are valued using market quotations, which are generally obtained from independent pricing services, broker-dealers or market makers. With respect to portfolio investments for which market quotations are not readily available, the Board, with the assistance of the Adviser and its senior investment team and independent valuation agents, is responsible for determining, in good faith, the fair value in accordance with the valuation policy approved by the Board. If more than one valuation method is used to measure fair value, the results are evaluated and weighted, as appropriate, considering the reasonableness of the range indicated by those results. The Adviser considers a range of fair values based upon the valuation techniques utilized and selects a value within that range that most accurately represents fair value based on current market conditions as well as other factors the Adviser's senior investment team considers relevant. The Board determines fair value of its investments on at least a quarterly basis or at such other times when the Board feels it would be appropriate to do so given the circumstances. A determination of fair value involves subjective judgments and estimates and depends on the facts and circumstances present at each valuation date. Due to the inherent uncertainty of determining fair value of portfolio investments that do not have a readily available market value, fair value of investments may differ significantly from the values that would have been used had a readily available market value existed for such investments, and the differences could be material.

ASC Topic 820 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. ASC Topic 820 also provides guidance regarding a fair value hierarchy, which prioritizes information used to measure fair value and the effect of fair value measurements on earnings and provides for enhanced disclosures determined by the level of information used in the valuation. In accordance with ASC Topic 820, these inputs are summarized in the three levels listed below.

Level 1—Valuations are based on quoted prices in active markets for identical assets or liabilities that are accessible at the measurement date.

Level 2—Valuations are based on quoted prices (in non-active markets or in active markets for similar assets or liabilities), observable inputs other than quoted prices and inputs that are not directly observable but are corroborated by observable market data.

Level 3—Valuations are based on inputs that are unobservable and significant to the overall fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models incorporating significant unobservable inputs, such as discounted cash flow models and other similar valuations techniques. The valuation of Level 3 assets and liabilities generally requires significant management judgment due to the inability to observe inputs to valuation.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of observable input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and consideration of factors specific to the investment.

Under ASC Topic 820, the fair value measurement also assumes that the transaction to sell an asset occurs in the principal market for the asset or, in the absence of a principal market, the most advantageous market for the asset, which may be a hypothetical market, excluding transaction costs. The principal market for any asset is the market with the greatest volume and level of activity for such asset in which the reporting entity would or could sell or transfer the asset. In determining the principal market for an asset or liability, it is assumed that the reporting entity has access to such market as of the measurement date. Market participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable and willing and able to transact.

With respect to investments for which market quotations are not readily available, the Board undertakes a multi-step valuation process each quarter, as described below:

- The quarterly valuation process begins with each portfolio company or investment being initially valued by the Adviser's professionals that are responsible for the portfolio investment;
- Preliminary valuation conclusions are then documented and discussed with the Adviser's senior investment team and approved by the Adviser's executive management team;
- Each quarter, certain of the Company's portfolio companies or investments are reviewed by an independent third-party valuation firm. At least once annually, the valuation for each portfolio investment is reviewed by such an independent third-party valuation firm. However, the Board does not have de minimis investments of less than 1.0% of the Company's gross assets (up to an aggregate of 10% of the Company's gross assets) independently reviewed, given the expenses involved in connection therewith;
- The Valuation Committee of the Board then reviews these preliminary valuations and makes fair value recommendations to the Board; and
- The Board then discusses valuations and determines the fair value of each investment in the Company's portfolio in good faith, based on the input of the Adviser, the respective independent third-party valuation firms and the Valuation Committee.

Debt Investments

The debt investments identified on the consolidated schedules of investments are loans and equipment leases made to venture growth stage companies focused in technology, life sciences and other high growth industries which are backed by a select group of leading venture capital investors. These investments are considered Level 3 assets under ASC Topic 820 as there is no known or accessible market or market indices for these types of debt instruments and thus the Adviser's senior management team must estimate the fair value of these investment securities based on models utilizing unobservable inputs.

To estimate the fair value of debt investments, the Company compares the cost basis of each debt investment, including any OID, to the resulting fair value determined using a discounted cash flow model, unless another model is more appropriate based on the circumstances at the measurement date. The discounted cash flow approach entails analyzing the interest rate spreads for recently completed financing transactions which are similar in nature to these debt investments, in order to determine a comparable range of effective market interest rates. The range of interest rate spreads utilized is based on borrowers with similar credit profiles. All remaining expected cash flows of the investment are discounted using this range of interest rates to determine a range of fair values for the debt investment.

The valuation process includes, among other things, evaluating the underlying investment performance of the portfolio company's current financial condition and ability to raise additional capital, as well as macro-economic events that may impact valuations. These events include, but are not limited to, current market yields and interest rate spreads of similar securities as of the measurement date. Changes in these unobservable inputs could result in significantly different fair value measurements.

Under certain circumstances, an alternative technique may be used to value certain debt investments that better reflect the fair value of the investment, such as the price paid or realized in a recently completed transaction or a binding offer received in an arm's length transaction, the use of multiple probability weighted cash flow models when the expected future cash flows contain elements of variability or estimates of proceeds that would be received in a liquidation scenario.

Warrant Investments

Warrant fair values are primarily determined using a Black Scholes option pricing model. Privately held warrants and equity-related securities are valued based on an analysis of various factors, including, but not limited to, those listed below. Increases or decreases in any of the unobservable inputs described below could result in a material change in fair value:

- Underlying enterprise value of the issuer based on available information, including any information regarding the most recent financing round of borrower. Valuation techniques to determine enterprise value include market multiple approaches, income approaches or the use of recent rounds of financing and the portfolio company's capital structure. Valuation techniques are also utilized to allocate the enterprise fair value of a portfolio company to the specific class of common or preferred stock exercisable in the warrant. Such techniques take into account the rights and preferences of the portfolio company's securities, expected exit scenarios, and volatility associated with such outcomes to allocate the fair value to the specific class of stock held in the portfolio. Such techniques include option pricing models, including back solve techniques, probability weighted expected return models and other techniques determined to be appropriate.
- Volatility, or the amount of uncertainty or risk about the size of the changes in the warrant investment price, is based on comparable publicly traded companies within indices similar in nature to the underlying company issuing the warrant.
- The risk-free interest rates are derived from the U.S. Treasury yield curve. The risk-free interest rates are calculated based on a weighted average of the risk-free interest rates that correspond closest to the expected remaining life of the warrant investment.
- Other adjustments, including a marketability discount on private company warrant investments, are estimated based on the Adviser's judgment about the general industry environment.
- Historical portfolio experience on cancellations and exercises of warrant investments are utilized as the basis for determining the estimated life of the warrant investment in each financial reporting period. Warrant investments may be exercised in the event of acquisitions, mergers or initial public offerings, and cancelled due to events such as bankruptcies, restructuring activities or additional financings. These events cause the expected remaining life assumption to be shorter than the contractual term of the warrant investment.

Under certain circumstances alternative techniques may be used to value certain warrants that more accurately reflect the warrants' fair values, such as an expected settlement of a warrant in the near term, a model that incorporates a put feature associated with the warrant, or the price paid or realized in a recently completed transaction or binding offer received in an arm's-length transaction. The fair value may be determined based on the expected proceeds to be received from such settlement or based on the net present value of the expected proceeds from the put option.

These valuation methodologies involve a significant degree of judgment. There is no single standard for determining the estimated fair value of investments that do not have an active observable market. Valuations of privately held investments are inherently uncertain, as they are based on estimates, and their values may fluctuate over time. The determination of fair value may differ materially from the values that would have been used if an active market for these investments existed. In some cases, the fair value of such investments is best expressed as a range of values derived utilizing different methodologies from which a single estimate may then be determined.

Equity Investments

The fair value of an equity investment in a privately held company is initially the amount invested. The Company adjusts the fair value of equity investments in private companies upon the completion of a new third party round of equity financing subsequent to its investment. The Company may adjust the fair value of an equity investment absent a new equity financing event based upon positive or negative changes in a portfolio company's financial or operational performance. The Company may also reference comparable transactions and/or secondary market transactions of comparable companies to estimate fair value. These valuation methodologies involve a significant degree of judgment.

The fair value of an equity investment in a publicly traded company is based upon the closing public share price on the date of measurement. These assets are recorded at fair value on a recurring basis. There is no single standard for determining the estimated fair value of investments which do not have an active public market. Valuations of privately held investments are inherently uncertain, as they are based on estimates, and their values may fluctuate over time. The determination of fair value may differ materially from the values that would have been used if an active market for these investments existed. In some cases, the fair value of such investments is best expressed as a range of values derived utilizing different methodologies from which a single estimate may then be determined.

Investment Valuation

Investments measured at fair value on a recurring basis are categorized in the table below based upon the lowest level of significant input to the valuations as of December 31, 2020 and 2019. The Company transfers investments in and out of Levels 1, 2 and 3 as of the beginning balance sheet date, based on changes in the use of observable and unobservable inputs utilized to perform the valuation for the period.

Investment Type (in thousands)	December 31, 2020				December 31, 2019			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Debt investments	\$ —	\$ —	\$ 583,335	\$ 583,335	\$ —	\$ —	\$ 604,518	\$ 604,518
Warrant investments	—	—	24,231	24,231	—	—	22,090	22,090
Equity investments	220	—	25,993	26,213	13,901	1,452	11,168	26,521
Total investments	<u>\$ 220</u>	<u>\$ —</u>	<u>\$ 633,559</u>	<u>\$ 633,779</u>	<u>\$ 13,901</u>	<u>\$ 1,452</u>	<u>\$ 637,776</u>	<u>\$ 653,129</u>

The following tables show information about Level 3 investments measured at fair value for the years ended December 31, 2020 and 2019. Both observable and unobservable inputs were used to determine the fair value of positions that the Company has classified within the Level 3 category. As a result, the net unrealized gains and losses for assets within the Level 3 category may include changes in fair value that were attributable to both observable (e.g., changes in market interest rates) and unobservable (e.g., changes in unobservable long-dated volatilities) inputs.

Level 3 Investment Activity (in thousands)	For the Year Ended December 31, 2020			
	Debt Investments	Warrant Investments	Equity Investments	Total Investments
Fair value as of January 1, 2020	\$ 604,518	\$ 22,090	\$ 11,168	\$ 637,776
Funding and purchases of investments, at cost	200,068	3,757	2,315	206,140
Principal payments and sale proceeds received from investments	(204,880)	(1,512)	—	(206,392)
Amortization and accretion of premiums and discounts, net and end-of term payments	14,795	—	—	14,795
Realized gains (losses) on investments	(19,981)	130	—	(19,851)
Net change in unrealized gains (losses) included in earnings	(3,804)	(234)	(2,418)	(6,456)
Payment-in-kind coupon	8,139	—	—	8,139
Transfers between investment types	(15,520)	—	15,520	—
Gross transfers out of Level 3 ⁽¹⁾	—	—	(592)	(592)
Fair value as of December 31, 2020	<u>\$ 583,335</u>	<u>\$ 24,231</u>	<u>\$ 25,993</u>	<u>\$ 633,559</u>
Net change in unrealized gains (losses) on Level 3 investments held as of December 31, 2020	\$ (22,833)	\$ (376)	\$ (2,417)	\$ (25,626)

- (1) Transfers out of Level 3 are measured as of the date of the transfer. During the year ended December 31, 2020 the only transfer relates to an equity investment in a publicly traded company.

Level 3 Investment Activity (in thousands)	For the Year Ended December 31, 2019			
	Debt Investments	Warrant Investments	Equity Investments	Total Investments
Fair value as of January 1, 2019	\$ 405,347	\$ 15,518	\$ 10,556	\$ 431,421
Funding and purchases of investments, at cost	407,582	6,009	3,592	417,183
Principal payments and sale proceeds received from investments	(201,608)	—	—	(201,608)
Amortization and accretion of premiums and discounts, net and end-of term payments	9,502	—	—	9,502
Realized gains (losses) on investments	(1,483)	(147)	(161)	(1,791)
Net change in unrealized gains (losses) included in earnings	(17,299)	710	21,096	4,507
Payment-in-kind coupon	2,477	—	—	2,477
Gross transfers out of Level 3 ⁽¹⁾	—	—	(23,915)	(23,915)
Fair value as of December 31, 2019	<u>\$ 604,518</u>	<u>\$ 22,090</u>	<u>\$ 11,168</u>	<u>\$ 637,776</u>
Net change in unrealized gains (losses) on Level 3 investments held as of December 31, 2019	\$ (12,419)	\$ (1,315)	\$ 1,326	\$ (12,408)

(1) Transfers out of Level 3 are measured as of the date of the transfer. During the year ended December 31, 2019, these transfers relate to equity investments in publicly traded companies.

Realized gains and losses are included in net realized gains (losses) on investments in the consolidated statements of operations.

During the year ended December 31, 2020, the Company recognized net realized gains of \$8.6 million from the sale of investments, consisting of \$28.8 million of realized gains from the sale of publicly traded shares held in CrowdStrike, Inc. and Medallia, Inc., and \$0.8 million of realized gains from the sale of warrants in Freshly Inc., offset by \$20.1 million of realized losses from the finalization of asset sales and removal from the Company's investment portfolio of three obligors, Cambridge Broadband Network Limited, Harvest Power, Inc., and Munchery, Inc., which were rated Red (5) on the Company's credit watch list, and \$0.9 million of other net realized losses.

During the year ended December 31, 2019, the Company recognized net realized losses of \$0.6 million from the sale of investments, primarily as a result of the write-off of investments in one portfolio company, partially offset by a realized gain from the sale of an equity investment.

Unrealized gains and losses are included in net change in unrealized gains (losses) on investments in the consolidated statements of operations.

Net change in unrealized losses during the year ended December 31, 2020 was \$21.1 million, resulting primarily from the reversal and recognition of \$14.3 million of previously recorded unrealized gains associated with the shares of CrowdStrike, Inc. and Medallia, Inc. that the Company sold during the year, as well as net unrealized losses on the Company's investment portfolio during the year resulting from fair value adjustments, partially offset by the reversal and recognition of \$19.4 million of previously recorded unrealized losses associated with three obligors rated Red (5) on the Company's credit watch list.

Net change in unrealized losses during the year ended December 31, 2019 was \$5.9 million, which primarily consisted of the reversal and recognition of previously recorded net unrealized gains of \$1.9 million into income or realized gains, and \$4.0 million of net unrealized losses on the investment portfolio related to mark to market activity.

For the year ended December 31, 2020, the Company recognized \$2.6 million in other income consisting of \$1.4 million due to the termination or expiration of unfunded commitments and \$1.2 million from the realization of certain fees paid by portfolio companies and other income related to prepayment activity. For the year ended December 31, 2019, the Company recognized \$2.9 million in other income consisting of \$1.7 million due to the termination or expiration of unfunded commitments and \$1.2 million from the realization of certain fees paid by portfolio companies and other income related to prepayment activity.

The following tables show a summary of quantitative information about the Level 3 fair value measurements of investments as of December 31, 2020 and 2019. In addition to the techniques and inputs noted in the tables below, the Company may also use other valuation techniques and methodologies when determining fair value measurements.

December 31, 2020					
Level 3 Investments (dollars in thousands)	Fair Value	Valuation Technique	Unobservable Inputs	Range	Weighted Average
Debt investments	\$ 546,958	Discounted Cash Flows	Discount Rate	6.61% - 35.63%	15.24%
	36,377	Probability-Weighted Expected Return Method	Probability Weighting of Alternative Outcomes	50.00% - 50.00%

Total investments	<u>\$ 637,776</u>				

Increases or decreases in any of the above unobservable inputs in isolation would result in a lower or higher fair value measurement for such assets.

Note 5. Credit Risk

Debt investments may be affected by business, financial market or legal uncertainties. Prices of investments may be volatile, and a variety of factors that are inherently difficult to predict, such as domestic, economic and political developments, may significantly affect the value of these investments. In addition, the value of these investments may fluctuate as the general level of interest rates fluctuate.

In many instances, the portfolio company's ability to repay the debt investments is dependent on additional funding by its venture capital investors, a future sale or an initial public offering. The value of these investments may be detrimentally affected to the extent a borrower defaults on its obligations, there is insufficient collateral and/or there are extensive legal and other costs incurred in collecting on a defaulted loan.

Note 6. Borrowings

The following table shows the Company's outstanding debt as of December 31, 2020 and 2019:

Liability (in thousands)	December 31, 2020			December 31, 2019		
	Total Commitment	Balance Outstanding	Unused Commitment	Total Commitment	Balance Outstanding	Unused Commitment
Revolving Credit Facility	\$ 325,000	\$ 118,000	\$ 207,000	\$ 300,000	\$ 262,300	\$ 37,700
2022 Notes	74,750	74,750	—	74,750	74,750	—
2025 Notes	70,000	70,000	—	—	—	—
Total before deferred financing and issuance costs	469,750	262,750	207,000	374,750	337,050	37,700
Unamortized deferred financing and issuance costs	—	(4,790)	—	—	(2,899)	—
Total borrowings outstanding, net of deferred financing and issuance costs	<u>\$ 469,750</u>	<u>\$ 257,960</u>	<u>\$ 207,000</u>	<u>\$ 374,750</u>	<u>\$ 334,151</u>	<u>\$ 37,700</u>

Interest expense on these borrowings includes the interest cost charged on borrowings, the unused fee on the Credit Facility (as defined below), paying and administrative agent fees, and the amortization of deferred Credit Facility fees and expenses and costs and fees relating to the Company's unsecured notes outstanding. These expenses are shown in the table below:

Interest Expense and Amortization of Fees (in thousands)	For the Year Ended December 31,		
	2020	2019	2018
Revolving Credit Facility			
Interest cost	\$ 5,952	\$ 5,707	\$ 2,234
Unused fee	722	729	851
Amortization of costs and other fees	1,364	1,140	1,160
Revolving Credit Facility Total	\$ 8,038	\$ 7,576	\$ 4,245
2022 Notes			
Interest cost	\$ 4,298	\$ 4,298	\$ 4,300
Amortization of costs and other fees	531	531	535

2025 Notes Total	\$ 2,627	\$ —	\$ —
Total interest expense and amortization of fees	\$ 15,494	\$ 12,405	\$ 9,080

Credit Facility

In February 2014, the Company, along with its Financing Subsidiary as borrower, entered into a credit agreement with Deutsche Bank AG, New York Branch acting as administrative agent and the other lenders party thereto, which provided the Company with a \$150.0 million commitment, subject to borrowing base requirements (as amended and restated from time to time, the “Credit Facility”). As of December 31, 2020, the Company had \$325 million in total commitments available under the Credit Facility, which includes an accordion feature that allows the Company to increase the size of the Credit Facility to up to \$400 million under certain circumstances. As discussed under “Note 14. Subsequent Events,” the Company utilized the accordion feature in the Credit Facility to increase the capacity of the Credit Facility to \$350 million on January 29, 2021. The revolving period under the Credit Facility expires on November 30, 2022, and the maturity date of the Credit Facility is May 31, 2024 (unless otherwise terminated earlier pursuant to its terms).

Borrowings under the Credit Facility bear interest at the sum of (i) a floating rate based on certain indices, including LIBOR and commercial paper rates (subject to a floor of 0.50%), plus (ii) a margin of 2.80% if facility utilization is greater than or equal to 75%, 2.90% if utilization is greater than or equal to 50%, 3.00% if utilization is less than 50% and 4.5% during the amortization period. Borrowings under the Credit Facility are secured only by the assets of the Financing Subsidiary. The Company agreed to pay Deutsche Bank AG a syndication fee and to pay to Deutsche Bank AG a fee to act as administrative agent under the Credit Facility as well as to pay each lender (i) a commitment fee based on each lender’s commitment and (ii) a fee of 0.50% per annum for any unused borrowings under the Credit Facility on a monthly basis. The Credit Facility contains affirmative and restrictive covenants including, but not limited to, an advance rate limitation of 50.0% of the applicable balance of net assets held by the Financing Subsidiary, maintenance of minimum net worth, a ratio of total assets to total indebtedness of not less than the greater of 3:2 and the amount so required under the 1940 Act, a key man clause relating to the Company’s Chief Executive Officer, James P. Labe, and the Company’s President and Chief Investment Officer, Sajal K. Srivastava, and eligibility requirements, including but not limited to geographic and industry concentration limitations and certain loan grade classifications. Furthermore, events of default under the Credit Facility include, among other things, (i) a payment default; (ii) a change of control; (iii) bankruptcy; (iv) a covenant default; and (v) failure by the Company to maintain its qualification as a BDC under the 1940 Act. As of December 31, 2020 and 2019, the Company was in compliance with all covenants under the Credit Facility.

During the year ended December 31, 2020, gross borrowings and gross repayments under the Credit Facility were \$201.0 million and \$345.3 million, respectively. During the year ended December 31, 2019, gross borrowings and gross repayments under the Credit Facility were \$414.5 million and \$175.2 million, respectively. At December 31, 2020 and 2019, the Company had outstanding borrowings under the Credit Facility of \$118.0 million and \$262.3 million, respectively, excluding deferred credit facility costs of \$3.2 million and \$1.6 million, respectively, which is included in the Company’s consolidated statements of assets and liabilities. The book value of the Credit Facility approximates fair value due to the relatively short maturity, cash repayments and market interest rates of the instrument. The fair value of the Credit Facility would be categorized as Level 3 of the fair value hierarchy if determined as of the reporting date.

During the years ended December 31, 2020 and 2019, the Company had average outstanding borrowings under the Credit Facility of \$159.6 million and \$111.0 million, respectively, at a weighted average interest rate of 4.18% and 5.80%, respectively. As of December 31, 2020 and 2019, \$484.5 million and \$587.4 million, respectively, of the Company’s assets, including restricted cash, were pledged for borrowings under the Credit Facility, leaving \$199.0 million and \$96.7 million of assets unencumbered, respectively.

2022 Notes

On July 14, 2017, the Company completed a public offering of \$65.0 million in aggregate principal amount of its 5.75% notes due 2022 (the “2022 Notes”) and received net proceeds of \$62.8 million after the payment of fees and offering costs. On July 24, 2017, as a result of the underwriters’ full exercise of their option to purchase additional 2022 Notes, the Company issued an additional \$9.75 million in aggregate principal amount of the 2022 Notes and received net proceeds of \$9.5 million after the payment of fees and offering costs. The interest on the 2022 Notes is payable quarterly on January 15, April 15, July 15 and October 15. The 2022 Notes are listed on the NYSE under the symbol “TPVY”. The 2022 Notes were issued in units of \$25.

The 2022 Notes mature on July 15, 2022. The 2022 Notes may be redeemed in whole or in part at any time or from time to time at the Company’s option at a redemption price of 100% of the outstanding principal amount of the 2022 Notes plus all accrued and unpaid interest. The 2022 Notes are unsecured obligations and rank *pari passu*, or equal in right of payment, with any of the Company’s outstanding and future unsecured indebtedness; senior to any of the Company’s future indebtedness that expressly provides it is subordinated to the 2022 Notes; effectively subordinated to all of the Company’s future secured indebtedness (including indebtedness that is initially unsecured to which the Company subsequently grants security), to the extent of the value of the assets securing such indebtedness; and structurally subordinated to all of the Company’s existing and future indebtedness and other obligations of any subsidiaries, financing vehicles, or similar facilities the Company may form in the future, with respect to claims on the assets of any such subsidiaries, financing vehicles, or similar facilities, including, without limitation, borrowings under the Credit Facility.

The indenture governing the 2022 Notes contains certain covenants, including covenants (i) requiring the Company’s compliance with the asset coverage requirements set forth in Section 18(a)(1)(A) as modified by Section 61(a) of the 1940 Act, whether or not the Company is subject to such provisions of the 1940 Act, but giving effect, in either case, to any exemptive relief granted to the Company by the SEC; (ii) if the Company’s asset coverage has been below the 1940 Act minimum asset coverage requirements (after giving effect to any exemptive relief granted to the Company by the SEC) for more than six consecutive months, prohibiting the declaration of any cash dividend or distribution on the Company’s common stock (except to the extent necessary for the Company to maintain its treatment as a RIC under Subchapter M of the Code), or purchasing any of the Company’s common stock, unless, at the time of the declaration of the dividend or distribution or the purchase, and after deducting the amount of such dividend, distribution, or purchase, the Company is in compliance with the 1940 Act asset coverage requirements (after giving effect to any exemptive relief granted to the Company by the SEC); and (iii) requiring the Company to provide financial information to the trustee, if the Company ceases to be subject to the reporting requirements of the Securities Exchange Act of 1934, as amended. These covenants are subject to limitations and exceptions that are described in the indenture. As of December 31, 2020, the Company was in compliance with these covenants.

At December 31, 2020, the 2022 Notes had a market price of \$25.21 per unit, resulting in an aggregate fair value of \$75.4 million. The 2022 Notes are recorded at amortized cost in the consolidated statements of assets and liabilities. Amortized cost includes \$0.8 million of deferred issuance cost at December 31, 2020, which is amortized and expensed over the five-year term of the 2022 Notes based on an effective yield method.

2025 Notes

On March 19, 2020, the Company completed a private debt offering of \$70.0 million in aggregate principal amount of its 4.50% unsecured notes due March 19, 2025 (the “2025 Notes”) in reliance on Section 4(a)(2) of the Securities Act. The interest on the 2025 Notes is payable semiannually on March 19 and September 19 each year, beginning on September 19, 2020.

The 2025 Notes may be redeemed in whole or in part at any time or from time to time at the Company’s option at par plus accrued interest to the prepayment date and, if applicable, a make-whole premium. In addition, the Company is obligated to offer to prepay the 2025 Notes at par plus accrued and unpaid interest up to, but excluding, the date of prepayment, if certain change in control events occur. The 2025 Notes are general unsecured obligations of the Company that rank *pari passu* with all outstanding and future unsecured unsubordinated indebtedness issued by the Company; provided, however, in the event that the Company creates, incurs, assumes or permits to exist liens on or with respect to any of its property or assets in connection with future secured indebtedness of more than an aggregate principal amount of \$25 million, the 2025 Notes will generally become secured concurrently therewith, equally and ratably with such indebtedness.

The Master Note Purchase Agreement (the “Note Purchase Agreement”) under which the 2025 Notes were issued contains customary terms and conditions for unsecured notes issued in a private placement, including, without limitation, affirmative and negative covenants such as information reporting, maintenance of the Company’s status as a BDC within the meaning of the 1940 Act, a minimum asset coverage ratio of 1.50 to 1.00, a minimum interest coverage ratio of 1.25 to 1.00, and minimum stockholders’ equity of \$216,129,000, as adjusted upward by an amount equal to 65% of the net proceeds from the issuance of shares of the Company’s common stock subsequent to December 31, 2019. In addition, in the event that a Below Investment Grade Event (as defined in the Note Purchase Agreement) occurs, the 2025 Notes will bear interest at a fixed rate of 5.50% per year from the date of the occurrence of the Below Investment Grade Event to and until the date on which the Below Investment Grade Event is no longer continuing.

The Note Purchase Agreement also contains customary events of default with customary cure and notice periods, including, without limitation, nonpayment, incorrect representation in any material respect, breach of covenant, cross-default under other indebtedness of the Company or subsidiary guarantors, certain judgments and orders, certain events of bankruptcy, and breach of a key man clause relating to the Company’s Chief Executive Officer, James P. Labe, and the Company’s President and Chief Investment Officer, Sajal K. Srivastava.

The 2025 Notes are recorded at amortized cost in the consolidated statements of assets and liabilities. Amortized cost includes \$0.9 million of deferred issuance cost at December 31, 2020, which is amortized and expensed over the five-year term of the 2025 Notes based on an effective yield method. The book value of the 2025 Notes approximates fair value and would be categorized as Level 3 of the fair value hierarchy if determined as of the reporting date.

The following table shows additional information about the level in the fair value hierarchy of the Company's liabilities as of December 31, 2020 and 2019:

Liability (in thousands)	December 31, 2020				December 31, 2019			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Revolving Credit Facility	\$ —	\$ —	\$ 118,000	\$ 118,000	\$ —	\$ —	\$ 262,300	\$ 262,300
2022 Notes, net ⁽¹⁾	—	74,592	—	74,592	—	73,454	—	73,454
2025 Notes, net ⁽²⁾	—	—	69,148	69,148	—	—	—	—
Total	<u>\$ —</u>	<u>\$ 74,592</u>	<u>\$ 187,148</u>	<u>\$ 261,740</u>	<u>\$ —</u>	<u>\$ 73,454</u>	<u>\$ 262,300</u>	<u>\$ 335,754</u>

(1) Net of debt issuance costs as of December 31, 2020 and 2019 of \$0.8 million and \$1.3 million, respectively.

(2) Net of debt issuance costs as of December 31, 2020 of \$0.9 million.

Note 7. Commitments and Contingencies

Commitments

As of December 31, 2020 and 2019, the Company's unfunded commitments totaled \$132.3 million to 16 portfolio companies and \$226.1 million to 15 portfolio companies, respectively, of which \$17.5 million and \$59.3 million, respectively, was dependent upon the portfolio companies reaching certain milestones before the debt commitment becomes available to them. As of December 31, 2020, of the \$132.3 million of unfunded commitments, \$122.3 million will expire during 2021, \$7.0 million will expire during 2022 and \$3.0 million will expire during 2024.

The Company's credit agreements contain customary lending provisions that allow it relief from funding obligations for previously made commitments in instances where the underlying company experiences material adverse events that affect the financial condition or business outlook for the company. Since these commitments may expire without being drawn upon, unfunded commitments do not necessarily represent future cash requirements or future earning assets for the Company.

The table below shows the Company's unfunded commitments by portfolio company as of December 31, 2020 and 2019:

Unfunded Commitments ⁽¹⁾ (in thousands)	December 31, 2020		December 31, 2019

Total	\$ 132,250	\$ 1,656	\$ 226,083	\$ 2,177

(1) Does not include \$20.8 million and \$15.5 million backlog of potential future commitments as of December 31, 2020 and 2019, respectively. Refer to the "Backlog of Potential Future Commitments" below.

The table above also shows the fair value of the Company's unfunded commitment liability totaling \$1.7 million and \$2.2 million as of December 31, 2020 and 2019, respectively. The fair value at the inception of the delay draw credit agreements is equal to the fees and warrants received to enter into these agreements, taking into account the remaining terms of the agreements and the counterparties' credit profile. The unfunded commitment liability reflects the fair value of these future funding commitments and is included in "Other accrued expenses and liabilities" in the Company's consolidated statements of assets and liabilities.

These liabilities are considered Level 3 liabilities under ASC Topic 820 as there is no known or accessible market or market indices for these types of financial instruments. Both observable and unobservable inputs were used to determine the fair value of positions that the Company has classified within the Level 3 category. The following table shows additional details regarding the Company's unfunded commitment activity during the years ended December 31, 2020 and 2019:

Commitments Activity (in thousands)	For the Year Ended December 31,	
	2020	2019
Unfunded commitments at beginning of period ⁽¹⁾	\$ 241,583	\$ 319,307
New commitments ⁽¹⁾	276,681	507,419
Fundings	(204,626)	(418,093)

2022		7,000		—
2024		3,000		—
Unfunded commitments	<u>\$</u>	<u>132,250</u>	<u>\$</u>	<u>226,083</u>

(1) Does not include backlog of potential future commitments. Refer to the “Backlog of Potential Future Commitments” below.

Backlog of Potential Future Commitments

The Company entered into commitments with certain portfolio companies that permit an increase in the commitment amount in the future in the event that certain conditions to make such increases are met. If such conditions to increase are met, these amounts may become unfunded commitments, if not drawn prior to expiration. As of December 31, 2020 and 2019, this backlog of potential future commitments totaled \$20.8 million and \$15.5 million, respectively.

Note 8. Financial Highlights

The financial highlights presented below are for the years ended December 31, 2020, 2019, 2018, 2017, and 2016.

Financial Highlights (in thousands, except per share data)	For the Year Ended December 31, or as of December 31,

Ratio of expenses to average net asset value	10.6 %	10.2 %	10.8 %	11.5 %	9.4 %
Operating expenses excluding incentive fees to average net asset value	8.5 %	7.9 %	7.6 %	8.9 %	8.1 %
Income incentive fees to average net asset value	2.1 %	2.4 %	3.2 %	2.6 %	1.3 %
Capital gains incentive fees to average net asset value	0.0 %	0.0 %	0.0 %	0.0 %	0.0 %

- (1) All per share activity is calculated based on the weighted average shares outstanding for the relevant period, except net increase (decrease) in net assets from capital share transactions, which is based on the common shares outstanding as of the relevant balance sheet date.
- (2) Total return based on NAV is the change in ending NAV per share plus distributions per share paid during the period assuming participation in the Company's dividend reinvestment plan divided by the beginning NAV per share. Total return does not reflect sales charges that may be incurred by stockholders.
- (3) Total return based on stock price is the change in the ending stock price of the Company's common stock plus distributions paid during the period assuming participation in the Company's dividend reinvestment plan divided by the beginning stock price of the Company's common stock. Total return does not reflect sales charges that may be incurred by stockholders.

The weighted average portfolio yield on total debt investments shown below is for the years ended December 31, 2020, 2019, 2018, 2017 and 2016:

Ratios (Percentages, on an annualized basis) ⁽¹⁾	For the Year Ended December 31, or as of December 31,				
	2020	2019	2018	2017	2016
Weighted average portfolio yield on total debt investments ⁽²⁾	13.8 %	15.0 %	17.1 %	16.4 %	14.4 %
Coupon income	9.8 %	10.1 %	10.7 %	10.4 %	10.4 %
Accretion of discount	1.0 %	1.1 %	1.0 %	0.8 %	0.8 %
Accretion of end-of-term payments	1.7 %	1.9 %	2.2 %	2.0 %	2.5 %
Impact of prepayments during the period	1.3 %	1.9 %	3.2 %	3.2 %	0.7 %
Prime Rate at end of period ⁽³⁾	3.25 %	4.75 %	5.50 %	4.50 %	3.75 %

- (1) Weighted average portfolio yields on total debt investments for periods shown are the annualized rates of interest income recognized during the period divided by the average amortized cost of debt investments in the portfolio during the period.
- (2) The weighted average portfolio yields on total debt investments reflected above do not represent actual investment returns to the Company's stockholders.
- (3) Included as a reference point for coupon income and weighted average portfolio yield.

Note 9. Net Increase in Net Assets per Share

The following table shows the computation of basic and diluted net increase in net assets per share for the years ended December 31, 2020, 2019 and 2018:

Basic and Diluted Share Information (in thousands, except per share data)	For the Year Ended December 31,		
	2020	2019	2018
Net investment income	\$ 47,854	\$ 38,253	\$ 34,989
Net increase in net assets resulting from operations	\$ 35,307	\$ 31,758	\$ 36,562
Basic and diluted weighted average shares of common stock outstanding	30,566	24,844	20,488
Basic and diluted net investment income per share of common stock	\$ 1.57	\$ 1.54	\$ 1.71
Basic and diluted net increase in net assets resulting from operations per share of common stock	\$ 1.16	\$ 1.28	\$ 1.78

Note 10. Equity

Since inception through December 31, 2020, the Company has issued 30,837,545 shares of common stock through an initial public offering and a concurrent private placement offering in 2014, a registered follow-on offering in 2015, a private placement offering in 2017, a registered follow-on offering and concurrent private placement offering in 2018, and a registered follow-on offering in 2020. The Company received net proceeds from these offerings of \$432.9 million, net of the portion of the underwriting sales load and offering costs paid by the Company.

The Company has adopted a dividend reinvestment plan for its stockholders, which is an "opt out" dividend reinvestment plan. Under this plan, if the Company declares a cash distribution to stockholders, the amount of such distribution is automatically reinvested in additional shares of common stock unless a stockholder specifically "opts out" of the dividend reinvestment plan. If a stockholder opts out, that stockholder receives cash distributions.

In October 2017, the Company entered into a securities purchase agreement (the "Securities Purchase Agreement") with certain accounts managed by Goldman Sachs Asset Management, L.P. (the "GSAM Purchasers"), pursuant to which the Company sold to the GSAM Purchasers an aggregate of 1,594,007 shares of the Company's common stock in October 2017 in a private offering exempt from registration under the Securities Act pursuant Section 4(a)(2) of the Securities Act and Regulation D thereunder (the "October 2017 GSAM Shares"). Subsequently, in August 2018, pursuant to the terms of the Securities Purchase Agreement, the GSAM Purchasers purchased an additional 200,000 shares of the Company's common stock in a private offering exempt from registration under the Securities Act pursuant Section 4(a)(2) of the Securities Act and Regulation D thereunder (the "August 2018 GSAM Shares" and, together with the October 2017 GSAM Shares, the "GSAM Shares").

Pursuant to the terms of the Securities Purchase Agreement, the Company has granted the GSAM Purchasers certain registration rights and the related right to participate in future equity offerings conducted by the Company. Specifically, the GSAM Purchasers have the right to sell a minimum of one-third of the total number of GSAM Shares in any underwritten offering initiated by the Company. Additionally the GSAM Purchasers have the right to cause the Company to file a shelf registration statement covering the GSAM Shares to be sold by them.

The following tables show information on the proceeds raised along with any related underwriting sales load and associated offering expenses, and the price at which common stock was issued by the Company, during the years ended December 31, 2020, 2019 and 2018:

Issuance of Common Stock for the Year Ended December 31, 2020 (in thousands, except per share data)		Number of Shares of Common Stock Issued	Gross Proceeds Raised	Underwriting Sales Load	Offering Expenses	Gross Offering Price
	Date

(1) In connection with the offering, the Company's investment adviser agreed to bear all of the sales load and to pay to the underwriters an additional supplemental payment of approximately \$0.04 per share.

There was no repurchase of the Company's common stock during the years ended December 31, 2020, 2019 and 2018.

The Company had 30,870,815 and 24,922,762 shares of common stock outstanding as of December 31, 2020 and 2019, respectively.

Note 11. Distributions

The Company has elected to be treated, and intends to comply with the requirements to continue to qualify annually, as a RIC under the Code. In order to maintain its ability to be subject to tax as a RIC, among other things, the Company is required to distribute at least 90% of its net ordinary income and net realized short-term capital gains in excess of its net realized long-term capital losses, if any, to its stockholders. Additionally, to avoid a nondeductible 4% U.S. federal excise tax on certain of the Company's undistributed income, the Company must distribute during each calendar year an amount at least equal to the sum of: (a) 98% of the Company's ordinary income (not taking into account any capital gains or losses) for such calendar year; (b) 98.2% of the amount by which the Company's capital gains exceed the Company's capital losses (adjusted for certain ordinary losses) for a one-year period ending on October 31 of the calendar year (unless an election is made by the Company to use its taxable year); and (c) certain undistributed amounts from previous years on which the Company paid no U.S. federal income tax.

For the tax years ended December 31, 2020, 2019 and 2018, the Company was subject to a 4% U.S. federal excise tax and the Company may be subject to this tax in future years. In such cases, the Company is liable for the tax only on the amount by which the Company does not meet the foregoing distribution requirement. The character of income and gains that the Company distributes is determined in accordance with income tax regulations that may differ from GAAP. Book and tax basis differences relating to stockholder dividends and distributions and other permanent book and tax differences are reclassified to paid-in capital. The Company incurred a non-deductible U.S. federal excise tax of \$478,000, \$259,000 and \$155,000 for the years ended December 31, 2020, 2019 and 2018, respectively.

The following table shows the Company's cash distributions per share that have been authorized by the Board since the Company's initial public offering to December 31, 2020. From March 5, 2014 (commencement of operations) to December 31, 2015, and during the years ended December 31, 2017 and December 31, 2018, distributions represent ordinary income as the Company's earnings exceeded distributions. Approximately \$0.24 per share of the distributions during the year ended December 31, 2016 represented a return of capital. During the years ended December 31, 2020 and 2019, distributions represent ordinary income and long term capital gains.

Period Ended	Date Announced	Record Date	Payment Date	Per Share Amount

Total cash distributions				<u>\$ 10.06</u>

(1) The amount of this initial distribution reflected a quarterly distribution rate of \$0.30 per share, prorated for the 27 days for the period from the pricing of the Company's initial public offering on March 5, 2014 through March 31, 2014.

(2) Represents a special distribution.

It is the Company's intention to distribute all or substantially all of its taxable income earned over the course of the year; thus, no provision for income tax has been recorded in the Company's consolidated statements of operations through December 31, 2020, 2019 and 2018, respectively. However, the Company may choose not to distribute all of its taxable income for a number of reasons, including retaining excess taxable income for investment purposes and/or defer the payment of distributions associated with the excess taxable income for future calendar years. For the year ended December 31, 2020, total distributions of \$1.54 per share were declared and paid, which includes a \$0.10 per share special distribution paid on January 13, 2021, and represented a distribution of ordinary income and long term capital gains as a result of the Company's earnings and profits exceeding its distributions. For the year ended December 31, 2019, total distributions of \$1.44 per share were declared and paid and represented a distribution of ordinary income and long term capital gains as a result of the Company's earnings and profits exceeding its distributions. For the year ended December 31, 2018, total distributions of \$1.54 per share were declared and paid and represented a distribution of ordinary income as the Company's earnings and profits for these years exceeded its distributions. As of December 31, 2020, the Company estimated it had undistributed 2020 taxable earnings of \$16.2 million, or \$0.53 per share. The Company expects to pay this "spillover" income as part of the 2021 dividends. Since March 5, 2014 (commencement of operations) to December 31, 2020, total distributions of \$10.06 per share have been declared, and \$9.96 per share have been paid as of December 31, 2020.

Note 12. Taxable Income

The Company has elected to be treated and intends to qualify each year as a RIC under Subchapter M of the Code. As a RIC, the Company generally does not pay corporate-level U.S. federal income taxes on any ordinary income or capital gains that the Company timely distributes to its stockholders as dividends. Taxable income includes the Company's taxable interest and other income, reduced by certain deductions, as well as taxable net realized capital gains. Taxable income generally differs from net income for financial reporting purposes due to temporary and permanent differences in the recognition of income and expenses, and generally excludes net unrealized gains or losses, as such gains or losses are not included in taxable income until they are realized.

To qualify and be subject to tax as a RIC, the Company is required to meet certain income and asset diversification tests in addition to distributing dividends of an amount generally at least equal to 90% of its investment company taxable income, as defined by the Code and determined without regard to any deduction for distributions paid, to its stockholders. The amount to be paid out as a distribution is determined by the Board of Directors each quarter and is based upon the annual earnings estimated by the management of the Company. To the extent that the Company's earnings fall below the amount of dividend distributions declared, however, a portion of the total amount of the Company's distributions for the fiscal year may be deemed a return of capital for tax purposes to the Company's stockholders.

Because federal income tax regulations differ from accounting principles generally accepted in the United States, distributions in accordance with tax regulations may differ from net investment income and realized gains recognized for financial reporting purposes. Differences may be permanent or temporary in nature. Permanent differences are reclassified among capital accounts in the financial statements to reflect their appropriate tax character. Permanent differences may also result from the change in the classification of short-term gains as ordinary income for tax purposes. Temporary differences arise when certain items of income, expense, gain or loss are recognized at some time in the future. Also, recent tax legislation requires that certain income be recognized for tax purposes no later than when recognized for financial reporting purposes.

It is the Company's intention to distribute 100% of its annual taxable income to its stockholders and thus, no provision for income tax has been recorded in the Company's consolidated statements of operations for the years ended December 31, 2020, 2019 and 2018.

In addition, during the year ended December 31, 2020, the Company adjusted net assets for permanent differences between financial reporting and tax reporting. These differences relate to non-deductible excise taxes that were reclassified between the following components of net assets:

(in thousands)	For the Year Ended December 31,	
	2020	2019
Paid-in capital in excess of par value	\$ (478)	\$ (259)
Undistributed net investment income	411	259
Realized gains (losses)	67	—

For income tax purposes, distributions paid to shareholders are reported as ordinary income, return of capital, long term capital gains, or a combination thereof. During the year ended December 31, 2020, the Company distributed \$47.4 million through four regular quarterly distributions and one special dividend. During the years ended December 31, 2019 and 2018, the Company distributed \$35.8 million and \$33.0 million, respectively, through four regular quarterly distributions. The tax character of distributions paid for the year ended December 31, 2020 and 2019, was \$44.3 million and \$35.4 million from ordinary income with \$3.1 million and \$0.4 million in distributions made from long term capital gains, respectively. The Company expects to distribute \$16.2 million of undistributed taxable income in 2021 to meet its intention of distributing all of its taxable income earned in the calendar year 2020. The amount of undistributed taxable income in the calendar year 2020 arises from \$11.2 million of excess ordinary income. The Company distributed \$7.3 million of undistributed taxable income in 2020 to meet its intention of distributing all of its taxable income earned in the calendar year 2019. There are no differences between book and tax cost as of December 31, 2020. As of December 31, 2020 the Company has no capital loss carryforwards available to offset future realized capital gains.

As of December 31, 2020 and 2019, the components of distributable earnings on a tax basis are as follows:

(in thousands)	For the Year Ended December 31,	
	2020	2019
Undistributed ordinary income	\$ 11,244	\$ 7,249
Undistributed-long term capital gains/(loss) carryforward	5,001	(507)
Unrealized gains (losses)	(28,633)	(7,537)
Total	\$ (12,388)	\$ (795)

For the year ended December 31, 2020, the Company paid \$259,000 of U.S. federal excise tax and had \$478,000 accrued but unpaid U.S. federal excise tax as of the balance sheet date. For the year ended December 31, 2019, the Company paid \$155,000 of U.S. federal excise tax and had \$259,000 accrued but unpaid U.S. federal excise tax as of the balance sheet date.

The Company evaluates tax positions taken in the course of preparing the Company's tax returns to determine whether the tax positions are "more-likely-than-not" to be sustained by the applicable tax authority. Tax benefits of positions not deemed to meet the more-likely-than-not threshold, or uncertain tax positions, would be recorded as a tax expense in the current year. It is the Company's policy to recognize accrued interest and penalties, if any, related to unrecognized tax benefits as a component of provision for income taxes.

Based on an analysis of the Company's tax position, there are no uncertain tax positions that met the recognition or measurement criteria. The Company is currently not undergoing any tax examinations. The Company does not anticipate any significant increase or decrease in unrecognized tax benefits for the next twelve months. The 2017-2020 federal tax years for the Company remain subject to examination by the Internal Revenue Service. The Company may remain subject to examination by the state taxing authorities for an additional year depending on the jurisdiction.

Note 13. Selected Quarterly Financial Results

The following tables set forth selected quarterly financial data for the three months ended March 31, 2020, June 30, 2020, September 30, 2020 and December 31, 2020, and for the three months ended March 31, 2019, June 30, 2019, September 30, 2019 and December 31, 2019.

Note 14. Subsequent Events

Distribution

On February 24, 2021, the Board declared a \$0.36 per share regular quarterly distribution, payable on March 31, 2021 to stockholders of record on March 15, 2021.

Recent Portfolio Activity

From January 1, 2021 through March 2, 2021, the Company closed \$48.4 million of additional debt commitments and funded \$42.9 million in new investments. TPC's direct originations platform entered into \$58.1 million of additional non-binding signed term sheets with venture growth stage companies. These investment opportunities for the Company are subject to due diligence, definitive documentation and investment committee approval, as well as compliance with TPC's allocation policy. From January 1, 2021 through March 2, 2021, the Company received \$17.4 million of principal prepayments generating approximately \$0.5 million of accelerated income.

On January 11, 2021, the Company sold its investments in portfolio company Knotel, Inc. ("Knotel") to a third party for gross proceeds of approximately \$15.0 million plus potential equity in the post-bankruptcy entity. On January 31, 2021, Knotel filed for Chapter 11 bankruptcy protection. The fair value of the Company's investments in Knotel as of December 31, 2020 was \$15.0 million, reflecting cash proceeds received in January 2021.

Amendment to the Credit Facility

On January 29, 2021, the Company amended the Credit Facility to increase the capacity of the Credit Facility to \$350 million from \$325 million and add a new lender. The \$25 million increase in the capacity of the Credit Facility was made under the accordion feature in the Credit Facility.

On March 1, 2021, the Company issued \$200,000,000 in aggregate principal amount of 4.50% Series 2021A Senior Notes due 2026 (the “2026 Notes”). The 2026 Notes were issued in a private placement to certain qualified institutional investors, pursuant to the terms of the First Supplement, dated as of March 1, 2021 (the “First Supplement”), to the Note Purchase Agreement. The 2026 Notes bear a fixed interest rate of 4.50% per year and will mature on March 1, 2026, unless redeemed, purchased or prepaid by the Company prior to such date in accordance with their terms. In the event that a Below Investment Grade Event (as defined in the Note Purchase Agreement) occurs, the 2026 Notes will bear interest at a fixed rate of 5.50% per year from the date of the occurrence of the Below Investment Grade Event to and until the date on which the Below Investment Grade Event is no longer continuing.

Interest on the 2026 Notes will be due semiannually on March 19 and September 19 each year, beginning on September 19, 2021. The 2026 Notes may be redeemed in whole or in part at any time or from time to time at the Company’s option at par plus accrued interest to the prepayment date and, if applicable, a make-whole premium. In addition, the Company is obligated to offer to prepay the 2026 Notes at par plus accrued and unpaid interest up to, but excluding, the date of prepayment, if certain change in control events occur. The 2026 Notes are general unsecured obligations of the Company that rank pari passu with all outstanding and future unsecured unsubordinated indebtedness issued by the Company; provided, however, in the event that the Company creates, incurs, assumes or permits to exist liens on or with respect to any of its property or assets in connection with future secured indebtedness of more than an aggregate principal amount of \$25 million, the 2026 Notes and the 2025 Notes will generally become secured concurrently therewith, equally and ratably with such indebtedness. The other terms and conditions applicable to the 2026 Notes under the Note Purchase Agreement, as modified by the First Supplement, including events of default and affirmative and negative covenants, are substantially similar to the terms and conditions applicable to the 2025 Notes.

The 2026 Notes were offered in reliance on Section 4(a)(2) of Securities Act. The 2026 Notes have not and will not be registered under the Securities Act or any state securities laws and, unless so registered, may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act, as applicable.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

1. Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on the evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective. It should be noted that any system of controls, however well-designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system are met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of these and other inherent limitations of control systems, there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote.

2. Report on Internal Control Over Financial Reporting

Management’s Report on Internal Control Over Financial Reporting

The Company’s management, including the Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting. As defined by the SEC, internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles (“GAAP”).

The Company’s internal control over financial reporting is supported by written policies and procedures, that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Company’s assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of the Company’s management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management of the Company (with participation of the Chief Executive Officer and Chief Financial Officer) conducted an assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2020 based on criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("the COSO Framework"). Based on this assessment, management has concluded that the Company's internal control over financial reporting was effective as of December 31, 2020.

Attestation Report of the Registered Public Accounting Firm

This annual report on Form 10-K does not include an attestation report of our independent registered public accounting firm regarding internal control over financial reporting. We were not required to have, nor have we, engaged our independent registered public accounting firm to perform an audit of the Company's internal control over financial reporting as of December 31, 2020 pursuant to the rules of the SEC that permit us to provide only management's report in this annual report on Form 10-K.

3. Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financing reporting that occurred during the fourth quarter of 2020 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

Fees and Expenses

The information in the following table is being provided to assist you in understanding the costs and expenses that an investor in our common stock will bear directly or indirectly. We caution you that some of the percentages indicated in the table below are estimates and may vary. Except where the context suggests otherwise, whenever this Annual Report on Form 10-K, or any filing under the Securities Act into which this Annual Report on Form 10-K is incorporated by reference, contains a reference to fees or expenses paid by "you," "us" or "the Company," or that "we" will pay fees or expenses, stockholders will indirectly bear such fees or expenses as investors in us.

Stockholder Transaction Expenses:	
Sales load payable by us (as a percentage of offering price)	— % (1)
Offering expenses (as a percentage of offering price)	— % (2)
Dividend reinvestment plan expenses	— % (3)
Total Stockholder Transaction Expenses (as a percentage of offering price)	— %
Annual Expenses (as percentage of net assets attributable to common stock):	
Base management fee payable under the Investment Advisory Agreement	3.10 % (4)
Incentive fee payable under the Investment Advisory Agreement (20% of net investment income and realized capital gains)	2.18 % (5)
Interest payments on borrowed funds	3.87 % (6)
Other expenses	1.67 % (7)
Total annual expenses	10.82 %

- (1) In the event that the securities under are sold to or through underwriters or agents, a corresponding prospectus or prospectus supplement will disclose the applicable sales load.
- (2) The prospectus supplement corresponding to each offering will disclose the applicable estimated amount of offering expenses, the offering price and the offering expenses borne by us as a percentage of the offering price.
- (3) The expenses associated with the administration of the dividend reinvestment plan are included in "Other expenses." The plan administrator's fees will be paid by us. We will not charge any brokerage charges or other charges to stockholders who participate in the plan. However, your own broker may impose brokerage charges in connection with your participation in the plan.
- (4) Our base management fee, payable quarterly in arrears, is calculated at an annual rate of 1.75% of our average adjusted gross assets, including assets purchased with borrowed amounts and other forms of leverage. See "Business-Management Agreements-Investment Advisory Agreement" in this Annual Report on Form 10-K for more information.
- (5) Assumes that annual incentive fees earned by our Adviser remain consistent with the incentive fees that would have been earned by our Adviser (if not for the cumulative "catch-up" provision explained below) for the year ended December 31, 2020 adjusted for any equity issuances. The incentive fee consists of two components, investment income and capital gains, which are largely independent of each other, with the result that one component may be payable even if the other is not payable.

Under the investment income component, we pay our Adviser each quarter 20.0% of the amount by which our pre-incentive fee net investment income for the quarter exceeds a hurdle rate of 2.0% (which is 8.0% annualized) of our net assets at the end of the immediately preceding calendar quarter, subject to a "catch-up" provision pursuant to which our Adviser receives all of such income in excess of the 2.0% level but less than 2.5% and subject to a total return requirement. The effect of the "catch-up" provision is that, subject to the total return provision discussed below, if pre-incentive fee net investment income exceeds 2.5% in any calendar quarter, our Adviser receives 20.0% of our pre-incentive fee net investment income as if the 2.0% hurdle rate did not apply. The foregoing incentive fee is subject to a total return requirement, which provides that no incentive fee in respect of our pre-incentive fee net investment income is payable except to the extent that 20.0% of the cumulative net increase in net assets resulting from operations since March 5, 2014 exceeds the cumulative incentive fees accrued and/or paid since March 5, 2014. In other words, any investment income incentive fee that is payable in a calendar quarter is limited to the lesser of (i) 20.0% of the amount by which our pre-incentive fee net investment income for such calendar quarter exceeds the 2.0% hurdle rate, subject to the "catch-up" provision and (ii) (x) 20.0% of the

cumulative net increase in net assets resulting from operations since March 5, 2014 minus (y) the cumulative incentive fees accrued and/or paid since March 5, 2014. For the foregoing purpose, the “cumulative net increase in net assets resulting from operations” is the sum of our pre-incentive fee net investment income, realized gains and losses and unrealized appreciation and depreciation since March 5, 2014.

Under the capital gains component of the incentive fee, we pay our Adviser at the end of each calendar year 20.0% of our aggregate cumulative realized capital gains from inception through the end of that year, computed net of our aggregate cumulative realized capital losses and our aggregate cumulative unrealized depreciation through the end of such year, less the aggregate amount of any previously paid capital gain incentive fees. For the foregoing purpose, our “aggregate cumulative realized capital gains” does not include any unrealized appreciation. It should be noted that we accrue an incentive fee for accounting purposes taking into account any unrealized appreciation in accordance with GAAP. The capital gains component of the incentive fee is not subject to any minimum return to stockholders.

- (6) “Interest payments on borrowed funds” represent our annual interest payment, fees and credit facility expenses based on results of operations for the year ended December 31, 2020, including with respect to the Credit Facility, the 2022 Notes and the 2025 Notes. The costs associated with any outstanding indebtedness are indirectly borne by our common stockholders. The amount of leverage we employ at any particular time will depend on, among other things, the Board’s and our Adviser’s assessment of the market and other factors at the time at any proposed borrowing. We may also issue preferred stock, subject to our compliance with applicable requirements under the 1940 Act.
- (7) “Other expenses” (approximately \$6.7 million) represent amounts which are based upon the results of our operations for the year ended December 31, 2020, including payments under the Administration Agreement based on our allocable portion of overhead and other expenses incurred by our Administrator.

Example

The following example demonstrates the projected dollar amount of total cumulative expenses over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed we would have no additional leverage and that our annual operating expenses would remain at the levels set forth in the table above.

	1 Year	3 Years	5 Years	10 Years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 121	\$ 278	\$ 425	\$ 747
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return entirely from realized gains	\$ 131	\$ 304	\$ 461	\$ 795

- (1) Assumes no return from net realized capital gains or net unrealized capital appreciation.

While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. As noted, the example includes the realized capital gains fee from the Investment Advisory Agreement but does not include the income incentive fee under the Investment Advisory Agreement, which, assuming a 5% annual return, would either not be payable or have an immaterial impact on the expense amounts shown above. If we achieve sufficient returns on our investments to trigger an incentive fee of a material amount, our expenses, and returns to our investors, would be higher.

Further, while the example assumes reinvestment of all distributions at net asset value, participants in our dividend reinvestment plan will receive a number of shares of our common stock determined by dividing the total dollar amount of the distribution payable to a participant by (a) 95% of the market price per share of our common stock at the close of trading on the payment date fixed by the Board in the event that newly issued shares of our common stock are used to implement the dividend reinvestment plan, or (b) the average purchase price of all shares of common stock purchased by the plan administrator in the event that shares are purchased in the open market to implement the requirements of the dividend reinvestment plan, which may be at, above or below net asset value.

This example and the expenses in the table above should not be considered a representation of our future expenses, and actual expenses (including the cost of debt, if any, and other expenses) may be greater or less than those shown.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by Item 10 is hereby incorporated by reference from our definitive Proxy Statement relating to our 2021 Annual Meeting of Stockholders, to be filed with the SEC within 120 days following the end of our fiscal year.

We have adopted a code of business conduct and ethics that applies to directors, officers and employees of the Company. This code of ethics is published under the “Governance Documents” tab on our website at www.tpv.com. We intend to disclose any substantive amendments to, or waivers from, this code of conduct within four business days of the waiver or amendment through a website posting.

Item 11. Executive Compensation

The information required by Item 11 is hereby incorporated by reference from our definitive Proxy Statement relating to our 2021 Annual Meeting of Stockholders, to be filed with the SEC within 120 days following the end of our fiscal year.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by Item 12 is hereby incorporated by reference from our definitive Proxy Statement relating to our 2021 Annual Meeting of Stockholders, to be filed with the SEC within 120 days following the end of our fiscal year.

Item 13. Certain Relationships and Related Transactions and Director Independence

The information required by Item 13 is hereby incorporated by reference from our definitive Proxy Statement relating to our 2021 Annual Meeting of Stockholders, to be filed with the SEC within 120 days following the end of our fiscal year.

Item 14. Principal Accounting Fees and Services

The information required by Item 14 is hereby incorporated by reference from our definitive Proxy Statement relating to our 2021 Annual Meeting of Stockholders, to be filed with the SEC within 120 days following the end of our fiscal year.

Item 15. Exhibits, Financial Statement Schedules**(a) Documents Filed as Part of this Report**

The following financial statements are set forth in Item 8:

Report of Independent Registered Public Accounting Firm	74
Consolidated Statements of Assets and Liabilities as of December 31, 2020 and December 31, 2019	76
Consolidated Statements of Operations for the Years Ended December 31, 2020, December 31, 2019 and December 31, 2018	77
Consolidated Statements of Changes in Net Assets for the Years Ended December 31, 2020, December 31, 2019 and December 31, 2018	78
Consolidated Statements of Cash Flows for the Years Ended December 31, 2020, December 31, 2019 and December 31, 2018	79
Consolidated Schedules of Investments as of December 31, 2020 and December 31, 2019	80
Notes to Consolidated Financial Statements	100

(b) Exhibits

The following exhibits are filed as part of this report or hereby incorporated by reference to exhibits previously filed with the United States Securities and Exchange Commission:

- 3.1 [Articles of Amendment and Restatement](#)⁽¹⁾
