

NEWS RELEASE

nVent Expanding Operations to Support Data Centers Growth in Liquid Cooling

12/13/2023

New distribution center will allow for expanded liquid cooling manufacturing

LONDON--(BUSINESS WIRE)-- nVent Electric plc (NYSE:NVT) ("nVent"), a global leader in electrical connection and protection solutions, today announced it will open a new distribution center in Dayton, Minnesota. The current distribution center in Anoka will be used to expand the manufacturing of liquid cooling products for data centers. nVent plans to move into the new distribution center by the end of 2023.

nVent Enclosures President Joe Ruzynski said: "With the increasing demand for our liquid cooling solutions, we are excited to expand our manufacturing and distribution footprint to serve our customers. We also are proud to be part of the Minnesota business community and excited about the new jobs we are creating. This is a win for our customers, our employees and the community."

The acceleration of artificial intelligence (AI), greater data consumption, rising heat densities, and growth in edge computing are driving demand for nVent's data center solutions offerings, including liquid cooling. nVent provides a comprehensive portfolio of innovative liquid cooling solutions, power distribution, enclosures and cable management to help drive sustainability, resiliency and energy efficiency, while protecting mission critical systems for data centers.

This year, nVent was again recognized as a Top 10 Data Solutions Provider by CIO Applications.
