nVent Offers Express Modification for Standard Enclosures

11/20/2019

LONDON--(BUSINESS WIRE)-- nVent Electric plc (NYSE:NVT) (“nVent”), a global leader in electrical connection and protection solutions, today announced a program that helps ensure customers in the United States get the solutions they need when their businesses demand it. Available through authorized nVent HOFFMAN distributors, nVent’s new Express Modification program offers customers modified enclosures that are shipped within 10 days.

“At nVent, we are laser-focused on our customers. Express Modification allows our distributors to better serve their customers with the right product and modifications in a shorter amount of time,” says Aaron Craig, nVent Global Marketing Leader.

The Express Modification program offers two options:

Local Express, which is available through a network of distributor-operated nVent HOFFMAN Modification Centers. Customers choose an off-the-shelf enclosure, add 2D holes and cutouts, and receive their enclosure in a few days. Benefits include:

- The fastest option for quick-turn, low-volume projects
- A local distributor can modify the enclosure from off-the-shelf inventory
- Precision equipment delivers expertly made 2D holes and cutouts
- Delivered within days

Factory Express allows customers to choose from a broad selection of the most common nVent HOFFMAN enclosures, add 2D holes and cutouts and select a paint color. The finished product is shipped within 10 days.

Benefits include:

- Over 1,500 commonly ordered panels, wall-mount, free-stand and floor-mount enclosures are eligible
- Precision cutting ensures 2D holes and cutouts are placed where they are needed
- 28 vibrant colors are available in smooth, rough gloss and semi-gloss textures

Like all nVent HOFFMAN products, Factory Express-eligible panels and enclosures are designed to meet global safety standards and perform under the most challenging conditions. These panels and enclosures are available in mild or stainless steel. Customers gain peace of mind knowing they are protecting their investments with the industry's best enclosures.
