### **Black Knight Home Price Index Report: October Transactions U.S. Home Prices Up 0.2 Percent for the Month; Up 5.5 Percent Year-Over-Year**

- At \$254K, U.S. HPI is 5.3 percent off June 2006 peak of \$268K and up 26.9 percent from the market's bottom
- New York's 1.1 percent gain led all states for the fourth consecutive month, while New York City metro-area home prices saw a 1.2 percent increase
- New York, Tennessee and Texas hit new peaks again in October, as did seven of the nation's 40 largest metro areas
- All five California metro areas ranked among the nation's 40 largest saw home prices decline in October, as did the state as a whole
- Connecticut again saw the most negative monthly movement, and accounted for three of the 10 worst-performing metro areas

JACKSONVILLE, Fla. – Jan. 4, 2016 – Today, the [Data & Analytics division](#) of [Black Knight Financial Services](#), Inc. (NYSE: BKFS) released its latest Home Price Index (HPI) report, based on October 2015 residential real estate transactions. The Black Knight HPI utilizes repeat sales data from the nation's largest public records data set, as well as its market-leading, loan-level mortgage performance data, to produce one of the most complete and accurate measures of home prices available for both disclosure and non-disclosure states. Non-disclosure states do not include property sales price information as part of their publicly available county recorder data. Black Knight is able to obtain the sales price information for these states by combining and matching records across its unique data assets.

Each month the Black Knight HPI reports five price levels (quintiles), along with REO discount rates, for 18,000+ U.S. ZIP codes. Findings are available with or without seasonal adjustments, although all numbers that follow have not been seasonally adjusted.

For a more in-depth review of this month's home price trends, including detailed looks at average home prices in the 20 largest states and 40 largest metros, please download the full Black Knight HPI Report at <http://www.bkfs.com/CorporateInformation/NewsRoom/Pages/HPINow.aspx>

### **About the Black Knight Home Price Index**

The Black Knight HPI is one of the most complete and accurate measures of home prices available, providing essential micro-level valuation data by covering nearly 90 percent of U.S. residential properties at the ZIP-code level. The Black Knight HPI provides the most timely updates possible, without the disruptive volatility of frequent historical revisions, for ZIP codes, cities, counties, states, the nation and statistical areas as defined by the White House Office of Management and Budget.

The Black Knight HPI utilizes repeat sales data from the nation's largest public records data set as well as its market-leading loan-level mortgage performance data to capture home price data from both disclosure and non-disclosure states. Each month the Black Knight HPI reports five price levels (quintiles), along with REO discount rates for each of 18,000+ U.S. ZIP codes. This level of detail is provided for three property groupings in every ZIP code: i) all residential properties, ii) condominiums, and iii) single-family housing. Black Knight's HPI is available with or without seasonal adjustments (numbers cited above are not seasonally-adjusted).
