Black Knight Home Price Index Report: September 2016 Transactions -- U.S. Home Prices Up 0.1 Percent for the Month; Up 5.4 Percent Year-Over-Year

- September's home price movement was relatively flat at the national level, with home prices ticking up just 0.1 percent from August
- U.S. home prices are up 5.4 percent from last year and are now within just 0.6 percent of hitting a new national peak
- New York led home price gains among the states for the third consecutive month, with home prices there gaining 0.9 percent from August
- Florida and Washington dominated the best-performing metropolitan areas, collectively accounting for nine of the top 10
- Home prices in St. Louis, Mo., continue to underperform, falling another 0.7 percent for the month and pulling the metro even further from its 2007 peak; it remains alone among the top 40 metros in seeing negative year-over-year movement
- Home prices in seven of the nation's 20 largest states and seven of the 40 largest metros hit new peaks

JACKSONVILLE, Fla. – Nov. 28, 2016 – Today, the [Data & Analytics](#) division of [Black Knight Financial Services, Inc.](#) (NYSE: BKFS) released its latest Home Price Index (HPI) report, based on September 2016 residential real estate transactions. The Black Knight HPI utilizes repeat sales data from the nation's largest public records data set, as well as its market-leading, loan-level mortgage performance data, to produce one of the most complete and accurate measures of home prices available for both disclosure and non-disclosure states. Non-disclosure states do not include property sales price information as part of their publicly available county recorder data. Black Knight is able to obtain the sales price information for these states by combining and matching records across its unique data assets.

Each month the Black Knight HPI reports five price levels (quintiles), along with REO discount rates, for 18,000+ U.S. ZIP codes. Findings are available with or without seasonal adjustments, although all numbers that follow have not been seasonally adjusted.

For a more in-depth review of this month's home price trends, including detailed looks at average home prices in the 20 largest states and 40 largest metros, please download the full Black Knight HPI Report at <http://www.bkfs.com/CorporateInformation/NewsRoom/Pages/HPINow.aspx>

About the Black Knight Home Price Index

The Black Knight HPI is one of the most complete and accurate measures of home prices available, providing essential micro-level valuation data by covering nearly 90 percent of U.S. residential properties at the ZIP-code level. The Black Knight HPI provides the most timely updates possible, without the disruptive volatility of frequent historical revisions, for ZIP codes, cities, counties, states, the nation and statistical areas as defined by the White House Office of Management and Budget.

The Black Knight HPI utilizes repeat sales data from the nation's largest public records data set as well as its market-leading loan-level mortgage performance data to capture home price data from both disclosure and non-disclosure states. Each month the Black Knight HPI reports five price levels (quintiles), along with REO discount rates for each of 18,000+ U.S. ZIP codes. This level of detail is provided for three property groupings in every ZIP code: i) all residential properties, ii) condominiums, and iii) single-family housing. Black Knight's HPI is available with or without seasonal adjustments (numbers cited above are not seasonally adjusted).
