## Black Knight's Julian Grey Named by HousingWire
## to the Publication's Prestigious 2017 "Women of Influence" List
*Awards Program Honors High-Achieving Women Across the U.S. Housing Economy*

JACKSONVILLE, Fla. – Aug. 3, 2017 – Julian Grey, Mortgage Market Leader for the Data & Analytics division of Black Knight Financial Services, Inc. (NYSE: BKFS), was one of 50 women named to HousingWire's 2017 "Women of Influence" list.  Now in its seventh year, the publication's awards program honors high-achieving women across the U.S. housing economy, including areas such as residential mortgage lending, servicing, investments and residential real estate. Women who have made notable contributions to both their business and the industry-at-large are recognized for their energy, ideas, achievements, commitment to excellence and progress, which give others a view of the future of the housing industry.

"Julian is highly regarded for her insightful ideas, her capable leadership of complex projects and her wealth of experience managing the full life cycle of complex predictive analytics, data, and SaaS/web-based solutions for financial services," said Kevin Coop, president and group executive of Black Knight's Data & Analytics division. "We appreciate HousingWire for recognizing Julian's many accomplishments and her proven track record of innovation."

Julian has found new ways to build business and improve client experiences by integrating Black Knight's powerful and extensive data sets with Black Knight technologies and supporting the development of new capabilities. Examples include:

- Directing the development of what is believed to be the first risk analytics solution suite within a servicing system. Black Knight's seamless integration of its industry-leading MSP servicing system with Black Knight's Servicing Analytics Suite leverages three powerful Black Knight analytics products – Lien Alert, Dialer Optimizer and Prepayment and Default Scores – to help servicers more easily identify portfolio risk and create effective loss mitigation strategies.
- Leadership of the team that develops Black Knight's analytics solutions, including automated valuation models, Black Knight's home price index (HPI), prepayment and default models and the

new Black Knight Index Suite, a series of three indices that expand on the company's HPI. Based upon Black Knight's vast property and mortgage datasets, and using modeling and analytics techniques perfected over 20 years, the Black Knight Index Suite is designed to provide insights into the housing and mortgage markets with unmatched depth, coverage and currency.

- Delivery of a new reverse mortgage and HELOC analytics model, as well as development of valuation scores and indices measuring origination, market performance and listing prices.

"I'm honored to be recognized by HousingWire along with such talented women professionals," said Grey. "I feel fortunate to have the support of an amazing team that is as passionate as I am about providing our clients with premier data and technology to help our clients reduce risk, identify growth opportunities and perform stronger in today's competitive marketplace."
