

**FOR IMMEDIATE RELEASE**

## **Consensus Cloud Solutions to Showcase AI-Powered Solutions for Advanced Data Transformation at ViVE 2024**

*Leading provider of secure data exchange solutions to demonstrate the modernization of fax with artificial intelligence for faster care delivery*

**LOS ANGELES – Feb. 13, 2024** – [Consensus Cloud Solutions, Inc.](https://www.consensus.com) (NASDAQ: CCSI), a leading provider of digital cloud fax, intelligent data extraction, and interoperability solutions, is gearing up for the ViVE 2024 conference in Los Angeles from February 25-28.

Attendees can visit the InteropNow! booth #2332 during the event to meet with Consensus executives, thought leaders, and technology experts to learn how the company's deployment of artificial intelligence (AI) is helping to shape the future of digital health. Staff will be on hand for several in-booth demonstrations highlighting the application of extractive AI to fax and other unstructured document workflows to increase productivity, accuracy, and cost savings.

"The potential of AI to revolutionize healthcare and bridge workforce shortages lies not just in its transformative capabilities, but also in its ability to integrate with existing technology and balance innovation with practicality," says Scott Turicchi, CEO at Consensus Cloud Solutions. "ViVE provides an exceptional opportunity to share insights, collaborate, and strategize with industry peers as we navigate the ever-evolving health tech landscape to drive positive change."

In addition to the booth demonstrations, Bevey Miner, EVP of Healthcare Strategy and Policy at Consensus Cloud Solutions, will moderate an educational panel, "Move from unstructured workflows to a modern approach that speeds patient care" on Feb. 27 at 2:20 p.m. PT in the InteropNow! Pavilion. Miner will be joined by Mike Mosquito, SVP Digital Strategy and Innovation at a large health system, Kim Boyd, Senior Consultant at Point of Care Partners, and Matt Baker, Associate Director, Product at Consensus Cloud Solutions.

Consensus' participation in the InteropNow! Pavilion also includes a live case study presentation, "Cutting through the AI hype: A practical use case for deploying AI to speed patient care delivery", Feb. 27 at 3:20 p.m. PT.

**About Consensus Cloud Solutions**

Consensus Cloud Solutions, Inc. (NASDAQ: CCSI) is one of the world's largest digital fax providers and a trusted global source for the transformation, enhancement and secure exchange of digital information. We leverage our 25-year history of success by providing advanced data transformation solutions for regulated industries such as healthcare, finance, insurance, real estate, and manufacturing, as well as technology for the state and federal government. Our solutions consist of cloud faxing; digital signature; intelligent data extraction using natural language processing and artificial intelligence; robotic process automation; interoperability; workflow enhancement; and a powerful connectivity and integration platform for healthcare providers. Our solutions can be combined with managed services for optimal outcomes.
