

Our Mission and Values

DETOUR GOLD

GETTING IT RIGHT

Our Mission and Values

At our core

Our Mission and Values are designed to unify our company's efforts around a common set of ideas and to help build a culture that is uniquely Detour Gold. They are fundamental to our business and influence everything we do. Whether we're answering a recruiting question, operating a truck or when we're testing the water, working safely by using our Mission and Values concepts is always top of mind.

Our mission is simple:

Getting It Right

Our Mission statement guides the choices we make on a daily basis. It reminds us to focus our efforts each day to achieve our goals. Getting It Right happens because of a commitment from every employee in all areas of our business asking themselves "what can I do to get this right?" Our Mission helps us make the right decisions every day.

Committed to zero harm

Safety is our goal every single day. The only way we can Get It Right is if safety is the first thing we think about. Being Committed to Zero harm is how we live and breathe our Mission and Values because when we work safely, we are automatically living the values.

Our values

Our five core Values reflect our best selves. They are the tools we use to work towards our Mission of Getting It Right.

At Detour Gold, we work together to create an environment where we are Respected, Engaged, Accountable, Committed and Honest.

By caring about and being considerate of others

By seeking to understand and do better

By owning our actions and celebrating our successes

By positively promoting Detour's goals and interests

By communicating upfront, timely and transparently
