#### NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

## Note 1. The Company and Basis of Presentation

NETGEAR, Inc. ("NETGEAR" or the "Company") is a global company, incorporated in Delaware in January 1996. The Company turns ideas into innovative, high-performance and premium networking products that connect people, power businesses and service providers. The Company's products are designed to simplify and improve people's lives. The Company's goal is to enable people to collaborate and connect to a world of information and entertainment at or outside of the home. The Company is dedicated to delivering innovative and advanced connected solutions ranging from easy-to-use premium WiFi solutions, performance gaming routers to enhance console and online-game play, security and support services to protect and enhance home networks, to switching and wireless solutions to augment business networks and audio and video over Ethernet for Pro AV applications. The Company's products and services are built on a variety of technologies such as wireless (WiFi and 4G/5G mobile), Ethernet and powerline, with a focus on reliability and ease-of-use. Additionally, the Company continually invests in research and development to create new technologies and services and to capitalize on technological inflection points and trends, such as WiFi 7, 5G, and audio and video over Ethernet. NETGEAR's product line consists of devices that create and extend wired and wireless networks, devices that attach to the network, such as smart digital canvasses as well as services that complement and enhance the Company's product line offerings. These products are available in multiple configurations to address the changing needs of the Company's customers in each geographic region.

The Company sells networking products through multiple sales channels worldwide, including traditional retailers, online retailers, wholesale distributors, direct market resellers ("DMRs"), value-added resellers ("VARs"), broadband service providers and its direct online store at <a href="https://www.netgear.com">www.netgear.com</a>.

They have been prepared in accordance with established guidelines for interim financial reporting and the instructions of Form 10-Q and Article 10 of Regulation S-X. All significant intercompany balances and transactions have been eliminated in consolidation. The balance sheet dated December 31, 2021, has been derived from audited financial statements at such date. These unaudited condensed consolidated financial statements do not include all of the information and footnotes typically found in the audited consolidated financial statements and footnotes thereto included in the Annual Report on Form 10-K. In the opinion of management, the unaudited condensed consolidated financial statements reflect all normal recurring adjustments considered necessary to fairly state the Company's financial position, results of operations, comprehensive income (loss), stockholder's equity and cash flows for the periods indicated. These unaudited condensed consolidated financial statements should be read in conjunction with the notes to the audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2021 (the "Annual Report").

The Company's fiscal year begins on January 1 of the year stated and ends on December 31 of the same year. The Company reports its results on a fiscal quarter basis rather than on a calendar quarter basis. Under the fiscal quarter basis, each of the first three fiscal quarters ends on the Sunday closest to the calendar quarter end, with the fourth quarter ending on December 31.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect (i) the reported amounts of assets and liabilities, (ii) the disclosure of contingent assets and liabilities at the date of the financial statements, and (iii) the reported amounts of net revenue and expenses during the reported period. The Company bases these estimates on historical and anticipated results, trends and various other assumptions that it believes are reasonable under the circumstances. As of the date of issuance of these condensed consolidated financial statements, the Company is not aware of any specific event or circumstance that would require it to update its estimates, judgments or revise the carrying value of its assets or liabilities. These estimates may change, as new events occur and additional information is obtained, and are recognized in the condensed consolidated financial statements as soon as they become known. Actual results could differ materially from those estimates and operating results for the three and nine months ended October 2, 2022 are not necessarily indicative of the results that may be expected for the year ending December 31, 2022, or any future period.

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

## COVID-19 Pandemic

The COVID-19 pandemic has had widespread and unpredictable impacts on global economies, including inflation, and supply chain disruption, while significantly increasing volatility and disruption in financial markets. The pandemic continues to impact the Company's supply chain in its ability to timely procure finished goods due to disruptions in production, materials and components, factory uptime, and transportation, and has led to meaningfully increased costs of freight transportation and increased material and component costs for its products. Continued and extended periods of global supply chain, and economic disruption could continue to significantly affect the Company's business and statement of financial condition. The duration of the disruption from the pandemic remains uncertain due to the dynamic nature of the virus and makes it difficult to reasonably estimate the impact of the COVID-19 pandemic on the Company's business operations.

## Note 2. Summary of Significant Accounting Policies

No material changes have been made to the Company's significant accounting policies disclosed in Note 1, *The Company and Summary of Significant Accounting Policies*, in its Annual Report.

## Recent Accounting Pronouncements

The Company has considered all recent accounting pronouncements issued, but not yet effective, and does not expect any to have a material effect on the Company's unaudited condensed consolidated financial statements.

## Note 3. Revenue

Revenue from contracts with customers is recognized when control of the promised goods or services is transferred to the customers, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those goods or services.

## Transaction Price Allocated to the Remaining Performance Obligations

Remaining performance obligations represent the transaction price allocated to performance obligations that are unsatisfied or partially unsatisfied, which are primarily from hardware and, to a lesser extent, subscription and support services, as of the end of the reporting period. Unsatisfied and partially unsatisfied performance obligations consist of contract liabilities, in-transit orders with destination terms, and non-cancellable backlog. Non-cancellable backlog includes goods for which customer purchase orders have been accepted that are scheduled or in the process of being scheduled for shipment, and that are not yet invoiced.

The following table summarizes estimated revenue expected to be recognized in the future related to performance obligations that were unsatisfied (or partially unsatisfied) as of October 2, 2022:

	ess than		Beyond	
(In thousands)	1 year	1 to 2 years	2 years	Total
Performance obligations	\$ 158,447	\$ 2,166	\$ 1,685	\$ 162,298

### Contract Balances

The Company records accounts receivable when it has an unconditional right to consideration. Contract liabilities are recorded when cash payments are received or due in advance of performance. Contract liabilities consist of advance payments and deferred revenue, where the Company has unsatisfied performance obligations. Contract liabilities are mainly classified as Deferred revenue on the unaudited condensed consolidated balance sheets.

Payment terms vary by customer. The time between invoicing and when payment is due is not significant. For certain products or services and customer types, payment is required before the products or services are delivered to the customer.

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

The following table reflects the contract balances:

(In thousands)	<b>Balance Sheet Location</b>	Oct	ober 2, 2022	 December 31, 2021		
Accounts receivable, net	Accounts receivable, net	\$	259,908	\$ 261,158		
Contract liabilities - current	Deferred revenue	\$	19,293	\$ 16,500		
Contract liabilities - non-current	Other non-current liabilities	\$	3,575	\$ 3,100		

The difference in the balances of the Company's contract assets and liabilities as of October 2, 2022 and December 31, 2021, primarily results from the timing difference between the Company's performance and the customer's payment.

During the nine months ended October 2, 2022, \$27.6 million of revenue was deferred primarily due to remaining performance obligations for service contracts, \$24.4 million of revenue was recognized for the satisfaction of performance obligations and \$14.8 million of this recognized revenue was included in the contract liability balance at the beginning of the period.

There were no significant changes in estimates during the period that would affect the contract balances.

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

## Disaggregation of Revenue

In the following tables, net revenue is disaggregated by geographic region and sales channel. The Company conducts business across three geographic regions: Americas; Europe, Middle East and Africa ("EMEA"); and Asia Pacific ("APAC"). The tables also include reconciliations of the disaggregated revenue by reportable segment. The Company operates and reports in two segments: Connected Home, and Small and Medium Business ("SMB"). Sales and usage-based taxes are excluded from net revenue.

Certificates of deposit		6		_		_		6					
Total	\$	94,380	\$		\$	(459)	\$	93,921					

#### NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

		December 31, 2021										
(In thousands)	Amor	tized Cost		Unrealized Gains		ealized osses		Estimated Fair Value				
Corporate equity securities	\$	751	\$	_	\$		\$	751				
Convertible debt (1)		518		_		_		518				
Certificates of deposit		6		_		_		6				
Total	\$	1,275	\$	_	\$		\$	1,275				

On the Company's unaudited condensed consolidated balance sheets, \$173,000 and \$172,000 included in Short-term investments as of October 2, 2022, and December 31, 2021, respectively, and \$173,000 and \$346,000 included in Other non-current assets as of October 2, 2022, and December 31, 2021, respectively.

The contractual maturities on the U.S. treasury securities as of October 2, 2022, are all due within one year. Accrued interest receivable as of October 2, 2022, was \$0.2 million and was recorded within Prepaid expenses and other current assets on the unaudited condensed consolidated balance sheet.

The Company had no investments classified as available-for-sale in a continuous unrealized loss position for which an allowance for credit losses was not recorded as of December 31, 2021. The following table summarizes investments classified as available-for-sale in a continuous unrealized loss position for which an allowance for credit losses was not recorded as of October 2, 2022:

		Less Than 12 Months				12 Months of	or Lon	ger	Total				
(In thousands)	Estimated Fair Market Value Gross Unrealized Losses			Estimated Fair Market Value	Gr	oss Unrealized Losses	Estimated Fair Market Value			ross Unrealized Losses			
U.S. treasury securities	\$	93,569	\$	(459)	\$	_	\$	_	\$	93,569	\$	(459)	
Total	\$	93,569	\$	(459)	\$		\$		\$	93,569	\$	(459)	

In the three and nine months ended October 2, 2022, and October 3, 2021, no unrealized losses on available-for-sale securities were recognized in income. The Company does not intend to sell, and it is unlikely that it will be required to sell the investments in an unrealized loss position prior to their anticipated recovery. The investments are high quality U.S. treasury securities and the decline in fair value is largely due to changes in interest rates and other market conditions with the fair value expected to recover as they reach maturity. There were no other-than-temporary impairments for these securities during the three and nine months ended October 2, 2022, and October 3, 2021. Refer to Note 12, Fair Value Measurements, for detailed disclosures regarding fair value measurements.

## Inventories

(In thousands)	 October 2, 2022	Dece	ember 31, 2021
Raw materials	\$ 7,806	\$	12,269
Finished goods	290,284		303,398
Total	\$ 298,090	\$	315,667

The Company records provisions for excess and obsolete inventory based on assumptions about future demand and market conditions and the amounts incurred were \$0.4 million and \$3.0 million for the three and nine months ended October 2, 2022, respectively, and \$0.7 million and \$3.0 million for the three and nine months ended October 3, 2021, respectively. While management believes the estimates and assumptions underlying its current forecasts are reasonable, there is risk that additional charges may be necessary if current forecasts are greater than actual demand.

Amortization of purchased intangibles was \$0.1 million and \$0.4 million for the three and nine months ended October 2, 2022, respectively, and \$0.2 million and \$1.9 million for the three and nine months ended October 3, 2021, respectively. During the three months ended April 3, 2022, the Company identified a triggering event for assessing impairment of the intangibles (Refer to below "Goodwill" for details of the triggering event). The Company performed a recoverability test of its intangibles and determined that the carrying amount of such assets was recoverable. No impairment of the intangibles was recognized in the three and nine months ended October 2, 2022 and October 3, 2021.

#### Goodwill

(In thousands)	 Conn	ected Home	SMB		Total
As of December 31, 2021	\$	44,442	\$ 36,279	\$	80,721
Goodwill impairment charge		(44,442)	_		(44,442)
As of October 2, 2022	\$		\$ 36,279	\$	36,279

Each year on the first day of fourth fiscal quarter, the Company assesses its goodwill for potential impairment. This impairment testing is applied more frequently than once a year if the Company is aware of changed conditions or circumstances since the last impairment testing that might call into question whether the current balances are fairly recorded. During the first quarter of 2022, the market price of the Company's common stock and its market capitalization declined significantly. In addition, with a decline in the size of the U.S. WiFi market, sales of the Company's Connected Home products in the first fiscal quarter of 2022 were significantly lower than anticipated. Due to these factors, the Company determined that a triggering event had occurred, and an interim goodwill impairment assessment was performed for both of its reporting units. The Company elected to bypass the qualitative goodwill impairment assessment and proceeded directly to the quantitative test, measured as of April 3, 2022.

The fair value of the reporting units, namely Connected Home and SMB, was determined using an income and market approach. Under the income approach, the Company calculated the fair value of its reporting units based on the present value of estimated future cash flows. Cash flow projections were based on management's estimates of revenue growth rates and net operating income margins, taking into consideration market and industry conditions. The discount rate used was based on the weighted-average cost of capital adjusted for the risk, size premium, and business-specific characteristics related to the business's ability to execute on the projected cash flows. Under the market approach, the Company evaluated the fair value based on forward-looking earnings multiples derived from comparable publicly-traded companies with similar market position and size as the reporting unit. The underlying unobservable inputs used to measure the fair value included projected

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

revenue growth rates, the weighted average cost of capital, the normalized working capital level, capital expenditures assumptions, profitability projections, control premium, the determination of appropriate market comparison companies and terminal growth rates. The two approaches generated similar results and indicated that the fair value of the Connected Home reporting unit was less than its carrying amount, including goodwill, and the difference between the carrying amount and the fair value was greater than the carrying amount of the goodwill allocated to the reporting unit. Therefore, in the first fiscal quarter of 2022, the Company recognized an impairment charge of \$44.4 million for its Connected Home reporting unit. The results of the quantitative test indicated that the fair value of the SMB reporting unit substantially exceeded its carrying amount, including goodwill, thus no goodwill impairment was recognized.

## Other non-current assets

(In thousands)	Oc	ctober 2, 2022	Dec	ember 31, 2021
Non-current deferred income taxes	\$	77,685	63,795	
Long-term investments		7,749		7,575
Other		4,401		4,980
Total	\$	89,835	\$	76,350

## Long-term equity investments

The Company's long-term investments are comprised of equity investments without readily determinable fair values, investments in convertible debt securities and investments in limited partnership funds. The changes in the carrying value of equity investments without readily determinable fair values were as follows:

	Nine Months En							
(In thousands)	0	ctober 2, 2022	0	ctober 3, 2021				
Carrying value as of the beginning of the period (1)	\$	6,303	\$	7,758				
Additions from purchase of investments		_		340				
Disposal		_		(778)				
Impairment		(250)		(549)				
Carrying value as of the end of the period (1)	\$	6,053	\$	6,771				

<sup>(1)</sup> The balances excluded an investment in limited partnership funds of \$1.5 million as of October 2, 2022, \$0.8 million as of October 3, 2021, \$0.9 million as of December 31, 2021, and \$0.6 million as of December 31, 2020. Additionally, the balance excluded an investment in convertible debt securities of \$0.2 million as of October 2, 2022, \$0.3 million as of October 3, 2021, and \$0.3 million as of December 31, 2021.

For equity investments without readily determinable fair values as of October 2, 2022, the cumulative downward adjustments for price changes and impairment was \$8.7 million and cumulative upward adjustments for price changes was \$0.4 million.

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

## Other accrued liabilities

(In thousands)	 October 2, 2022 December 31, 2			
Current operating lease liabilities	\$ 9,857	\$	9,220	
Sales and marketing	94,234		104,549	
Warranty obligations	6,144		6,861	
Sales returns(1)	40,241		42,869	
Freight and duty	9,301		22,126	
Other	42,431		38,959	
Total	\$ 202,208	\$	224,584	

<sup>(1)</sup> Inventory expected to be received from future sales returns amounted to \$19.8 million and \$21.8 million as of October 2, 2022 and December 31, 2021, respectively. Provisions to write down expected returned inventory to net realizable value amounted to \$9.7 million and \$13.2 million as of October 2, 2022, and December 31, 2021, respectively.

## **Note 5. Derivative Financial Instruments**

The Company's subsidiaries have material future cash flows related to revenue and expenses denominated in currencies other than the U.S. dollar, the Company's functional currency worldwide. The Company executes currency forward contracts that typically mature in less than 6 months to mitigate its currency risk, in currencies including Australian dollars, British pounds, euros, Canadian dollars, and Japanese yen. The Company does not enter into derivatives transactions for trading or speculative purposes. The Company's foreign currency forward contracts do not contain any credit-risk-related contingent features. The Company enters into derivative contracts with high-quality financial institutions and limits the amount of credit exposure to any individual counterparty.

The Company typically executes ten cash flow hedges per quarter with maturities under six months and with an average USD notional amount of approximately \$6.0 million that are designated as cash flow hedges.

The Company enters into non-designated hedges that are generally expected to offset the changes in value of its net non-functional currency asset and liability position resulting from foreign exchange rate fluctuations. The Company adjusts its non-designated hedges monthly and typically executes about ten non-designated forwards per quarter with maturities less than three months and an average USD notional amount of approximately \$2.0 million.

## **Fair Value of Derivative Instruments**

The fair values of the Company's derivative instruments and the line items on the unaudited condensed consolidated balance sheets to which they were recorded were summarized as follows:

	<b>Balance Sheet</b>					<b>Balance Sheet</b>			
(In thousands)	Location	О	ctober 2, 2022	D	ecember 31, 2021	Location	(	October 2, 2022	December 31, 2021
Derivatives not designated as	Prepaid expenses and					Other accrued

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

#### Note 6. Net Income (Loss) Per Share

Basic net income (loss) per share is computed by dividing the net income (loss) for the period by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share is computed by dividing the net income (loss) for the period by the weighted average number of shares of common stock and potentially dilutive common stock outstanding during the period. Potentially dilutive common shares include common shares issuable upon exercise of stock options, vesting of Restricted Stock Units ("RSUs") and performance shares, and issuances of shares under the Employee Stock Purchase Plan (the "ESPP"), which are reflected in diluted net income (loss) per share by application of the treasury stock method. Potentially dilutive common shares are excluded from the computation of diluted net income (loss) per share when their effect is anti-dilutive.

Net income (loss) per share consisted of the following:

	Three Months Ended					Nine Mont	ns Ended		
(In thousands, except per share data)	Octo	per 2, 2022	October 3, 2021		October 2, 2022		Octo	ber 3, 2021	
Numerator:									
Net income (loss)	\$	2,801	\$	9,584	\$	(62,943)	\$	50,378	
Denominator:

			-		-		-		
Anti-dilutive employee stock-based awards, excluded		1,539		1,036		1,582		389	

## Note 7. Income Taxes

The income tax benefit for the three and nine months ended October 2, 2022 was \$4.3 million, or an effective tax rate of 285.1%, and \$9.0 million, or an effective tax rate of 12.5%, respectively. The income tax provision for the three and nine months ended October 3, 2021 was \$3.2 million, or an effective tax rate of 25.0%, and \$15.4 million, or an effective tax rate of 23.4%, respectively. The change in taxes for the three months ended October 2, 2022, compared to the prior year period, was primarily due to the pre-tax loss of \$1.5 million during the period coupled with the impact of changes in estimate for the effective tax rate resulting in a true-up in tax benefit for the prior periods. Additionally, the Company recorded a tax benefit for favorable changes in estimates recorded during the quarter upon completion of the 2021 US federal tax return. For the nine months ended October 2, 2022, the tax benefit recorded for favorable changes in estimates recorded during the quarter upon completion of the 2021 US federal tax return was offset by the tax impact of a goodwill impairment that is not deductible for tax purposes. For the three and nine months ended October 3, 2021, tax expenses were partially offset by tax benefits related to stock-based compensation and non-taxable income related to adjustments to acquisition-related contingent accruals. Additionally, the Company recorded a tax benefit for favorable changes in estimates recorded during the fiscal quarter upon completion of the 2020 US federal tax return.

The Company is subject to income taxes in the U.S. and numerous foreign jurisdictions. The future foreign tax rate could be affected by changes in the composition in earnings in countries with tax rates differing from the U.S. federal rate. The Company is under examination in various U.S. and foreign jurisdictions.

The Company files income tax returns in the U.S. federal jurisdiction as well as various state, local, and foreign jurisdictions. Due to the uncertain nature of ongoing tax audits, the Company has recorded its liability for uncertain tax positions as part of its long-term liability as payments cannot be anticipated over the next twelve months. The existing tax positions of the Company continue to generate an increase in the liability for uncertain tax positions. The liability for uncertain tax positions may be reduced for liabilities that are settled with taxing authorities or on which the statute of limitations could expire without assessment from tax authorities. The possible reduction in liabilities for uncertain tax

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

positions in multiple jurisdictions in the next twelve months is approximately \$0.4 million, excluding the interest, penalties and the effect of any related deferred tax assets or liabilities. The Company is currently under examination by the U.S. Internal Revenue Service for its fiscal year ended December 31, 2018 as well as other state, local and foreign jurisdictions for different years.

On March 11, 2021, the American Rescue Plan Act of 2021, also known as the COVID-19 Stimulus Package, was signed into law. The provisions of the American Rescue Plan do not have a material impact on income taxes or liquidity in the current year.

On August 16, 2022, the "Inflation Reduction Act" ("IRA") was signed into law. IRA includes a new corporate minimum tax on certain large corporations, a 1% exercise tax on stock repurchases, numerous green energy credits, other tax provisions, and significantly increased enforcement resources. The Company does not expect the IRA will have a material impact to the Company's financial statements when it becomes effective for the tax years after December 31, 2022.

## Note 8. Commitments and Contingencies

## **Purchase Obligations**

The Company has entered into various inventory-related purchase agreements with suppliers. Generally, under these agreements, 50% of orders are cancelable by giving notice 46 to 60 days prior to the expected shipment date and 25% of orders are cancelable by giving notice 31 to 45 days prior to the expected shipment date. As of October 2, 2022, the Company had approximately \$120.7 million, as compared to \$94.8 million as of December 31, 2021, in short-term non-cancelable purchase commitments with suppliers or where the suppliers had procured unique materials and components upon receipts of the Company's purchase orders. The Company continues to experience an elongation of the time from order placement to production primarily due to component shortages and supply chain disruption brought about by the COVID-19 pandemic. In response, as of October 2, 2022, a further \$664.7 million of purchase orders beyond contractual termination periods have been issued to supply chain partners in anticipation of demand requirements. Consequently, the Company may incur expenses for materials and components, such as chipsets purchased by the supplier to fulfill the purchase order if the purchase order is cancelled. Expenses incurred in respect of cancelled purchase orders has historically not been significant relative to the original order value. For those orders not governed by master purchase agreements, the commitments are governed by the commercial terms on the Company's purchase orders subject to acknowledgment from its suppliers. The Company establishes a loss liability for all products it does not expect to sell or orders it anticipates cancelling for which it has committed purchases from suppliers. Such loss liability is included in Other accrued liabilities on the Company's unaudited condensed consolidated balance sheets. Losses incurred in relation to purchase commitments, including unique materials and components, amounted to \$1.6 million and \$4.6 million for the three and nine months ended October 2, 2022, respectively.

## **Non-Trade Commitments**

As of October 2, 2022, the Company had non-cancellable purchase commitments of \$14.8 million pertaining to non-trade activities.

## **Warranty Obligations**

Changes in the Company's warranty obligations, which is included in Other accrued liabilities on the unaudited condensed consolidated balance sheets, were as follows:

	Three Months Ended				Nine Months Ended				
(In thousands)	October 2, 2022		October 3, 2021		October 2, 2022		Octob	er 3, 2021

Balance as of the end of the period	\$	6,144	\$	6,863	\$	6,144	\$	6,863	

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

## Litigation and Other Legal Matters

The Company is involved in disputes, litigation, and other legal actions, including, but not limited to, the matters described below. In all cases, at each reporting period, the Company evaluates whether or not a potential loss amount or a potential range of loss is probable and reasonably estimable under the provisions of the authoritative guidance that addresses accounting for contingencies. In such cases, the Company accrues for the amount, or if a range, the Company accrues the low end of the range, only if there is not a better estimate than any other amount within the range, as a component of legal expense within litigation reserves, net. The Company monitors developments in these legal matters that could affect the estimate the Company had previously accrued. In relation to such matters, the Company currently believes that there are no existing claims or proceedings that are likely to have a material adverse effect on its financial position within the next twelve months, or the outcome of these matters is currently not determinable. There are many uncertainties associated with any litigation, and these actions or other third-party claims against the Company may cause the Company to incur costly litigation and/or substantial settlement charges. In addition, the resolution of any intellectual property litigation may require the Company to make royalty payments, which could have an adverse effect in future periods. If any of those events were to occur, the Company's business, financial condition, results of operations, and cash flows could be adversely affected. The actual liability in any such matters may be materially different from the Company's estimates, which could result in the need to adjust the liability and record additional expenses.

Huawei v. NETGEAR Inc., NETGEAR Deutschland GmbH, and Exertis-Connect GmbH

On or around March of 2022, Huawei filed two patent infringement lawsuits at the District Court of Dusseldorf, Germany, against NETGEAR Inc., NETGEAR Deutschland GmbH, and Exertis-Connect GmbH, a third-party webstore selling NETGEAR products in Germany. Huawei asserts one EU patent in each suit, EP 3 337 077 B1 (the '077 Patent) in case no. 08/22 and EP 3 143 741 B1 (the '741 Patent) in case no. 09/22. In its Complaints, Huawei alleges that the Company's WiFi 6 products infringe the two patents, which Huawei further claims are standard-essential patents.

On or around May 10, 2022, the Company was served with two suits that Huawei filed before the Jinan Intermediate People's Court of China asserting Patent Nos. ZL 201811536087.9 (case no 407) and ZL 201810757332.2 (case no. 408) against the Company's WiFi 6 products. The Company is appealing the Jinan Court's denial of the Company's jurisdictional challenges in both cases.

In the German cases, the Company filed its Statements of Defense relating to FRAND (Fair, Reasonable and Non-Discriminatory) licensing issues on July 4, 2022. The Company further filed its technical Statements of Defense on August 15, 2022. Huawei filed its technical reply briefs on October 21, 2022.

The Company at this time is not able to reasonably estimate any financial impact to the Company resulting from these litigation matters.

The Company does not believe that it is reasonably possible that a material loss has been incurred for any of the matters disclosed above, and consequently has not established any loss provisions.

## Note 9. Stockholders' Equity

## Stock Repurchases

From time to time, the Company's Board of Directors has authorized programs under which the Company may repurchase shares of its common stock, depending on market conditions, in the open market or through privately negotiated transactions. Under the authorizations, the timing and actual number of shares subject to repurchase are at the discretion of management and are contingent on a number of factors, such as levels of cash generation from operations, cash requirements for acquisitions and the price of the Company's common stock. During the nine months ended October 2, 2022, and October 3, 2021, the Company repurchased, reported based on trade date, approximately 1.0 million and 1.6 million shares of common stock, respectively, at a cost of approximately \$24.4 million and \$57.5 million, respectively, under the repurchase authorizations. As of October 2, 2022, 2.5 million shares remained authorized for repurchase under the repurchase program.

The Company repurchased, reported based on trade date, approximately 198,000 and 197,000 shares of common stock, at a cost of approximately \$4.7 million and \$7.5 million, during the nine months ended October 2, 2022, and October 3, 2021,

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

respectively, to administratively facilitate the withholding and subsequent remittance of personal income and payroll taxes for individuals receiving RSUs.

These shares were retired upon repurchase. The Company's policy related to repurchases of its common stock is to charge the excess of cost over par value to retained earnings. All repurchases were made in compliance with Rule 10b-18 under the Securities Exchange Act of 1934, as amended.

## Accumulated Other Comprehensive Income

Net current period other comprehensive income (loss)

Balance as of October 3, 2021

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

#### Note 10. Employee Benefit Plans

The Company grants options, RSUs and performance shares under the 2016 Incentive Plan (the "2016 Plan"), under which awards may be granted to all employees. Vesting periods under this plan are generally four years for options and RSUs and three years for performance shares. As of October 2, 2022, approximately 0.9 million shares were reserved for future grants under the 2016 Plan.

Additionally, the Company sponsors an Employee Stock Purchase Plan (the "ESPP"), pursuant to which eligible employees may contribute up to 10% of compensation, subject to certain income limits, to purchase shares of the Company's common stock. The terms of the plan include a look-back feature that enables employees to purchase stock semi-annually at a price equal to 85% of the lesser of the fair market value at the beginning of the offering period or the purchase date. The duration of each offering period is generally six-months. In April 2022, the Company approved an amendment to the 2003 Employee Stock Purchase Plan to increase the number of shares of common stock authorized for sale under the Purchase Plan by 1,000,000 shares to a total of 3,000,000 shares. As of October 2, 2022, approximately 1.0 million shares were available for issuance under the ESPP.

## **Option Activity**

Stock option activity was as follows:

(In thousands, except per share amounts)	Number of Shares	ted Average Exercise Price Per Share
Outstanding as of December 31, 2021	912	\$ 30.19
Exercised	(37)	\$ 20.16
Expired	(3)	\$ 20.30
Outstanding as of October 2, 2022	872	\$ 30.64

## RSU Activity

RSU activity was as follows:

(In thousands, except per share amounts)	Number of Shares	hted Average Grant Date Fair Value Per Share
Outstanding as of December 31, 2021	1,555	\$ 33.86
Granted	804	\$ 22.21
Vested	(611)	\$ 34.60
Cancelled	(145)	\$ 30.92
Outstanding as of October 2, 2022	1,603	\$ 28.00

## Performance Shares Activity

In July 2020, July 2021 and April 2022, the Company's executive officers were granted performance shares with vesting occurring at the end of a three-year period if performance conditions are met. The number of performance shares earned and eligible to vest are determined based on achievement of the predetermined performance conditions and the recipients' continued service with the Company. The number of performance shares to vest could range from 0% to 150% of the target shares granted. At the end of each reporting period, the Company evaluates the probability of achieving the performance conditions and records the related stock-based compensation expense based on performance to date over the service period.

#### NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Performance shares activity was as follows:

(In thousands, except per share amounts)	Number of Shares	Weighted Average Grant Date Fair Value Per Share		
Outstanding as of December 31, 2021	293	\$ 33.	07	
Granted	145	22.:	37	
Vested	<del>-</del>	-	_	
Cancelled	(8)	27.	17	
Outstanding as of October 2, 2022	430	\$ 29.	38	

## Valuation and Expense Information

The following table sets forth the stock-based compensation expense resulting from stock options, RSUs, performance shares and the ESPP included in the Company's unaudited condensed consolidated statements of operations:

	<b>Three Months Ended</b>				Nine Months Ended			
(In thousands)	October 2, 2022		October 3, 2021		October 2, 2022		Octob	er 3, 2021
Cost of revenue	\$	283	\$	430	\$	1,027	\$	1,626
Research and development		968		1,414		3,150		3,832
Sales and marketing		1,249		2,008		4,275		5,741
General and administrative		940		2,358		4,814		8,873
Total	\$	3,440	\$	6,210	\$	13,266	\$	20,072

As of October 2, 2022, \$0.4 million of unrecognized compensation cost related to stock options was expected to be recognized over a weighted-average period of 0.8 years and \$38.4 million of unrecognized compensation cost related to unvested RSUs and performance shares was expected to be recognized over a weighted-average period of 2.5 years.

## **Note 11. Segment Information**

Operating segments are components of an enterprise about which separate financial information is available and is evaluated quarterly by management, namely the Chief Operating Decision Maker ("CODM") of an organization, in order to determine operating and resource allocation decisions. By this definition, the Company has identified its CEO as the CODM. The Company operates and reports in two segments: Connected Home and SMB:

- Connected Home: Focuses on consumers and provides high-performance, dependable, and easy-to-use premium WiFi internet networking solutions such as WiFi 6, WiFi 6E Tri-band and Quad-band mesh systems, routers, 4G/5G mobile products, smart devices such as Meural digital canvasses, and subscription services that provide consumers with a range of value-added services focused on performance, security, privacy and premium support; and
- SMB: focuses on small and medium sized businesses and provides solutions for business networking, wireless local area network ("LAN"), audio and video over Ethernet for Pro AV applications, security and remote management providing enterprise-class functionality at an affordable price.

The Company believes that this structure reflects its current operational and financial management, and that it provides the best structure for the Company to focus on growth opportunities while maintaining financial discipline. The leadership team of each segment is focused on product and service development efforts, both from a product marketing and engineering standpoint, to service the unique needs of their customers.

The results of the reportable segments are derived directly from the Company's management reporting system. The results are based on the Company's method of internal reporting and are not necessarily in conformity with accounting principles generally accepted in the United States. Management measures the performance of each segment based on several metrics, including contribution income (loss). Segment contribution income (loss) includes all product line segment revenues less the related cost of sales, research and development and sales and marketing costs. Contribution income (loss) is used, in

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

part, to evaluate the performance of, and allocate resources to, each of the segments. Certain operating expenses are not allocated to segments because they are separately managed at the corporate level. These unallocated indirect costs include corporate costs, such as corporate research and development, corporate marketing expense and general and administrative costs, amortization of intangibles, stock-based compensation expense, change in fair value of contingent consideration, goodwill impairment charge, restructuring and other charges, litigation reserves, net, and other income (expenses), net.

Financial information for each reportable segment and a reconciliation of segment contribution income (loss) to income (loss) before income taxes is as follows:

		Three Mo	ded	Nine Months Ended				
(In thousands)	Oct	October 2, 2022 October 3, 2021		October 2, 2022		Oct	tober 3, 2021	
Net Revenue:								
Connected Home	\$	150,581	\$	208,539	\$	409,787	\$	679,320
SMB		99,006		81,611		273,582		237,566

Restructuring and other charges		(361)		(222)		(911)		(3,378)
Litigation reserves, net		_		_		(20)		(315)
Other income (expenses), net (2)		638		(132)		(1,164)		15
Income (loss) before income taxes	\$	(1,513)	\$	12,783	\$	(71,910)	\$	65,761

Amounts exclude amortization expense related to patents within purchased intangibles in cost of revenue.

The CODM does not evaluate operating segments using discrete asset information.

## Operations by Geographic Region

For reporting purposes, revenue is generally attributed to each geographic region based on the location of the customer.

Amounts included gain/(loss), net from derivatives not designated as hedging instruments of \$3.4 million and \$6.9 million, for the three and nine months ended October 2, 2022, respectively, and \$1.8 million and \$2.9 million for the three and nine months ended October 3, 2021, respectively.

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

The following table shows net revenue by geography:

	Three Months Ended				Nine Months Ended				
(In thousands)	October 2, 2022		October 3, 2021		October 2, 2022		Octo	ber 3, 2021	
United States (U.S.)	\$	164,890	\$	188,009	\$	445,170	\$	606,735	
Americas (excluding U.S.)		4,470		7,114		12,866		20,172	
EMEA (1)		44,827		56,940		126,643		179,802	
APAC (1)		35,400		38,087		98,690		110,177	
Total net revenue	\$	249,587	\$	290,150	\$	683,369	\$	916,886	

<sup>(1)</sup> No individual foreign country represented more than 10% of the Company's total net revenue in the periods presented.

## Long-lived assets by Geographic Region

The following table presents the Company's long-lived assets located in geographic areas, which consist of property and equipment, net, and operating lease right-of-use assets:

(In thousands)	 October 2, 2022	December 31, 2021		
United States (U.S.)	\$ 30,640	\$	14,564	
Americas (excluding U.S.)	2,540		3,283	
EMEA	1,246		2,465	
Singapore	3,936		4,767	
APAC (excluding Singapore) (1)	9,239		11,432	
Total	\$ 47,601	\$	36,511	

<sup>(1)</sup> No individual country, other than disclosed above, represented more than 10% of the Company's total long-lived assets in the periods presented.

## **Note 12. Fair Value Measurements**

The following tables summarize assets and liabilities measured at fair value on a recurring basis:

	 October 2, 2022							
(In thousands)	 Total		uoted market rices in active markets (Level 1)		Significant other observable inputs (Level 2)			
Assets:								
Cash equivalents: money-market funds	\$ 14,961	\$	14,961	\$	_

Trading securities: mutual funds(1)	6,521		6,521					
Available-for-sale investments: certificates of deposit(1)	6		_		6			
Available-for-sale investments: convertible debt securities(2)	346		_		346			
Foreign currency forward contracts(3)	2,828		_		2,828			
Total assets measured at fair value	\$ 118,231	\$	21,482	\$	96,749			
Liabilities:								
Foreign currency forward contracts <sup>(4)</sup>	\$ 459	\$	_	\$	459			
Total liabilities measured at fair value	\$ 459	\$		\$	459			
				_				

## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

	December 31, 2021						
(In thousands)		Total		uoted market rices in active markets (Level 1)		Significant other observable inputs (Level 2)	
Assets:							
Cash equivalents: money-market funds	\$	108,441	\$	108,441	\$	_	
Trading securities: mutual funds(1)		6,814		6,814		_	
Available-for-sale investments: corporate equity securities(1)		751		751		_	
Available-for-sale investments: certificates of deposit(1)		6		_		6	
Available-for-sale investments: convertible debt securities(2)		518		_		518	
Foreign currency forward contracts(3)		1,372		_		1,372	
Total assets measured at fair value	\$	117,902	\$	116,006	\$	1,896	
Liabilities:							
Foreign currency forward contracts(4)	\$	344	\$	_	\$	344	
Total liabilities measured at fair value	\$	344	\$	_	\$	344	

<sup>(1)</sup> Included in Short-term investments on the Company's unaudited condensed consolidated balance sheets.

The Company's investments in money-market funds, corporate equity securities and mutual funds are classified within Level 1 of the fair value hierarchy because they are valued based on quoted market prices in active markets. The Company's investments in U.S. treasury securities are classified within Level 2 of the fair value hierarchy because they are valued based on readily available pricing sources for comparable or identical instruments in less active markets. The Company's investments in convertible debt securities issued by a publicly held company and certificates of deposits are classified within Level 2 of the fair value hierarchy as the fair value hierarchy as the fair value for the instrument approximates its cost based on the contractual terms of the arrangement. The Company's foreign currency forward contracts are classified within Level 2 of the fair value hierarchy as they are valued using pricing models that consider the contract terms as well as currency rates and counterparty credit rates. The Company verifies the reasonableness of these pricing models using observable market data for related inputs into such models. The Company enters into foreign currency forward contracts with only those counterparties that have long-term credit ratings of A-/A3 or higher. The carrying value of non-financial assets and liabilities measured at fair value in the financial statements on a recurring basis, including accounts receivable and accounts payable, approximate fair value due to their short maturities.

On the Company's unaudited condensed consolidated balance sheets, \$173,000 and \$172,000 included in Short-term investments as of October 2, 2022 and December 31, 2021, respectively, and \$173,000 and \$346,000 included in Other non-current assets as of October 2, 2022 and December 31, 2021, respectively.

<sup>(3)</sup> Included in Prepaid expenses and other current assets on the Company's unaudited condensed consolidated balance sheets.

<sup>(4)</sup> Included in Other accrued liabilities on the Company's unaudited condensed consolidated balance sheets.

#### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

## Forward-looking Statements

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended and the Private Securities Litigation Reform Act of 1995. Such statements are based upon current expectations that involve risks and uncertainties. Any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. For example, the words "believes," "anticipates," "plans," "expects," "intends," "could," "may," "will," and similar expressions are intended to identify forward-looking statements. The forward-looking statements represent NETGEAR, Inc.'s expectations or beliefs concerning future events based on information available at the time such statements were made and include statements regarding: NETGEAR's future operating performance and financial condition, including expectations regarding continued profitability and cash generation; expectations regarding the timing, distribution, sales momentum and market acceptance of recent and anticipated new product introductions that position the Company for growth and market share gain; and expectations regarding NETGEAR's paid subscriber base growth, registered users and registered app users. These statements are based on management's current expectations and are subject to certain risks and uncertainties, including the following: uncertainty surrounding the duration and impact of the global COVID-19 pandemic; uncertainty surrounding inventory and supply chain management; inflation; geopolitical instability; changes in government and tax policies and regulations; future demand for the Company's products may be lower than anticipated; consumers may choose not to adopt the Company's new product offerings or adopt competing products; product performance may be adversely affected by real world operating conditions; the Company may be unsuccessful or experience delays in manufacturing and distributing its new and existing products; telecommunications service providers may choose to slow their deployment of the Company's products or utilize competing products; the Company may be unable to grow its number of registered users and/or registered app users; the Company may be unable to grow its paid subscriber base; the Company may be unable to collect receivables as they become due; the Company may fail to manage costs, including the cost of material and component and freight, and cost of developing new products and manufacturing and distribution of its existing offerings; changes in the level of NETGEAR's cash resources and the Company's planned usage of such resources, including potential repurchases of the Company's common stock; changes in the Company's stock price and developments in the business that could increase the Company's cash needs; fluctuations in foreign exchange rates; and the actions and financial health of the Company's customers. Further, certain forward-looking statements are based on assumptions as to future events that may not prove to be accurate. Therefore, our actual results and the timing of certain events may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such a discrepancy include, but are not limited to, those discussed in "Part II— Item 1A—Risk Factors" and "Liquidity and Capital Resources" below. All forward-looking statements in this document are based on information available to us as of the date hereof and we assume no obligation to update any such forward-looking statements except as required by law. The following discussion should be read in conjunction with our unaudited condensed consolidated financial statements and the accompanying notes contained in this quarterly report. Unless expressly stated or the context otherwise requires, the terms "we," "our," "us" and "NETGEAR" refer to NETGEAR, Inc. and its subsidiaries.

## **Business and Executive Overview**

We are a global company that turns ideas into innovative, high-performance, and premium networking products that connect people, power businesses and service providers. Our products are designed to simplify and improve people's lives. Our strategy focuses on being the leader of the premium WiFi consumer market, and to serve the market with high-performance, secure, and dependable products and services. We believe our targeted customers value speed, connectivity, and the security of their network. Our strategy is to create and grow the higher price points of the consumer networking market, where we believe competition is less intense and consumers are less price sensitive, offering the possibility to upsell our subscription services and higher margin products. Our goal is to enable people to collaborate and connect to a world of information and entertainment in or outside of the home. We are dedicated to delivering innovative and advanced connected solutions ranging from easy-to-use premium WiFi solutions, performance gaming routers that enhance console and onlinegame play, security and support services to protect and enhance home networks, to switching and wireless solutions to augment business networks and audio and video over Ethernet for Pro AV applications. We keep people

connected through product and service offerings, including ultra-premium Orbi Mesh WiFi systems, high-performance Nighthawk routers, high-speed cable modems, 5G mobile wireless products, cloud-based subscription services for network management and security, smart networking products and Video over Ethernet for Pro AV applications. Our products and services are built on a variety of technologies such as wireless (WiFi and 4G/5G mobile), Ethernet and powerline, with a focus on reliability and ease-of-use. Additionally, we continually invest in research and development to create new technologies and services and to capitalize on technological inflection points and trends, such as WiFi 7, audio and video over Ethernet, non-fungible token ("NFT") artwork, and future technologies. Our product line consists of devices that create and extend wired and wireless networks, devices that attach to the network, such as smart digital canvasses as well as services that complement and enhance our product line offerings. These products are available in multiple configurations to address the changing needs of our customers in each geographic region.

We operate and report in two segments: Connected Home, and Small and Medium Business ("SMB"). We believe that this structure reflects our current operational and financial management, and that it provides the best structure for us to focus on growth opportunities while maintaining financial discipline. The leadership team of each segment is focused on serving customer needs through product and service development efforts, both from a product marketing and engineering standpoint. The Connected Home segment focuses on consumers and provides high-performance, dependable and easy-to-use premium WiFi internet networking solutions such as WiFi 6 and WiFi 6E Tri-band and Quad-band mesh systems, routers, 4G/5G mobile products, smart devices such as Meural digital canvasses, and subscription services that provide consumers a range of value-added services focused on performance, security, privacy and premium support. The SMB segment focuses on small and medium sized businesses and provides solutions for business networking, wireless local area network ("LAN"), audio and video over Ethernet for Pro AV applications, security and remote management providing enterprise-class functionality at an affordable price. We conduct business across three geographic regions: Americas; Europe, Middle East, and Africa ("EMEA"); and Asia Pacific ("APAC").

## **Business Overview**

The markets in which our segments operate are intensely competitive and subject to rapid technological evolution. We believe that the principal competitive factors in the consumer and small and medium-sized business markets for networking products include product breadth, price points, size and scope of the sales channel, brand recognition, timeliness of new product introductions, product availability, performance, features, functionality, reliability, ease-of-installation, maintenance and use, security, as well as customer service and support. To remain competitive, we believe we must continue to aggressively invest resources to develop new products and subscription services, enhance our current products, and expand our channels and direct-to-consumer capabilities, while increasing engagement and maintaining satisfaction with our customers. Our investments reflect our steadfast focus on cybersecurity of our products and systems, as the rising threat of cyber-attacks and exploitation of security vulnerabilities in our industry is a significant consumer concern.

We sell our products through multiple sales channels worldwide, including traditional and online retailers, wholesale distributors, direct market resellers ("DMRs"), value-added resellers ("VARs"), broadband service providers, and through our direct online store at <a href="https://www.netgear.com">www.netgear.com</a>. Our retail channel includes traditional retail locations domestically and internationally, such as Best Buy, Wal-Mart, Costco, Staples, Office Depot, Target, Fnac Darty (Europe), MediaMarkt (Europe), JB HiFi (Australia), Elkjop (Norway) and Sunning and Guomei (China). Online retailers include Amazon.com (worldwide), Newegg.com (U.S.), JD.com, Alibaba (China) and Coolblue.com (Netherlands). Our DMRs include CDW Corporation, Insight Corporation, and PC Connection in domestic markets. Our main wholesale distributors include Ingram Micro, TD Synnex, and D&H Distribution Company. In addition, we also sell our products through broadband service providers, such as multiple system operators, xDSL, mobile, and other broadband technology operators domestically and internationally. Some of these retailers and broadband service providers purchase directly from us, while others are fulfilled through wholesale distributors around the world. A substantial portion of our net revenue is derived from a limited number of wholesale distributors, service providers and retailers. While we expect these channels to continue to be a significant part of our sales strategy, increasingly, customers are choosing to purchase products and services directly from us. We expect revenue through our direct online store or in-app offerings to continue to increase as a percentage of overall revenue for the foreseeable future.

## Financial Overview

During the three months ended October 2, 2022, our net revenue decreased by \$40.6 million compared to the prior year period. The decrease was driven by the retail portion of our Connected Home segment, which saw net revenue decline by \$56.7 million, mainly due to a contraction of the U.S. consumer WiFi market in the current year and elevated pandemic-induced demand in the prior year. The decline was partially offset by higher revenue of \$17.4 million in our SMB segment

mainly attributable to the growth in our Pro AV product line of managed switches. Loss from operations was \$2.2 million during the three months ended October 2, 2022, as compared to income from operations of \$12.9 million in the prior year period. The decline in net revenue and, to a lesser extent, the lower gross margin, primarily due to increased product acquisition and transportation costs, resulted in a \$18.3 million reduction in gross profit in the three months ended October 2, 2022, as compared to the prior year period. In addition, the strengthening of the US dollar over the past year had a meaningful negative impact on our international revenue and our profitability.

Geographically, net revenue from Connected Home decreased across all three regions during the three months ended October 2, 2022, partially offset by increased net revenue from SMB across all three regions, compared to the prior year period.

## **COVID-19 Pandemic Update**

The COVID-19 pandemic has widespread, rapidly evolving, and unpredictable impacts on global economies, inflation, and supply chains, and has created significant volatility and disruption in financial markets. Our focus remains on promoting employee health and safety, serving our customers and ensuring business continuity. Since the onset of the pandemic, we have taken actions by directing most of our worldwide workforce to work from home, allowing only critical business travel, and replacing in-person events with digital events. As COVID-19 restrictions have eased, some of our offices, including our San Jose headquarters, have transitioned to hybrid work. We continue to actively monitor the situation and will continue to adapt our business operations as necessary.

Over the last two and half years, the COVID-19 pandemic has brought about a considerable shift in our business while increasing uncertainty. As a result, our supply chain partners have experienced disruptions in production, materials and components, factory uptime, and transportation. The pandemic resulted in longer lead times for some of our key components, impacting our ability to accurately forecast and capitalize fully on end-market demand. We experienced certain improvements in supply chain constraints in the third fiscal quarter of 2022, but we expect supply chain constraints to continue to persist into the first half of 2023. This may impact our ability to fulfill SMB product demand and limit the availability of certain Connected Home products. Transportation disruptions have brought about a meaningful increase in the cost of sea freight, and we have increased our reliance on airfreight to secure supply to offset lengthening sea transit times. However, starting in the second quarter of 2022, we began to see a positive downward trend on the cost per container to move goods via sea. Moreover, we have seen favorable downward movement in the cost of airfreight as we move into the second half of 2022. Additionally, shortages for materials and components have resulted in increased acquisition costs for our products. We expect material acquisition costs to remain high in the fourth quarter of 2022.

Looking forward to the fourth quarter of 2022, we anticipate the net revenue from the service provider channel to increase to approximately \$50 million and the overall net revenue to approximate our third fiscal quarter of 2022 levels, powered by our super-premium mesh systems and 5G mobile hotspots in the Connected Home segment, Pro AV products in the SMB segment, and our suite of subscription services in both Connected Home and SMB segments, all of which are the key to delivering revenue growth and expanding profitability in both short-term and long-term. Due to broad-based inflationary pressures and the uncertain macroeconomic environment, we expect our retail partners to continue to reduce their inventory levels in the fourth quarter of 2022, which will impact our sales into these channels. We aim to execute on our strategy of capitalizing on the technological inflection points of WiFi 6E, WiFi 6, 5G and audio and video over Ethernet, to develop and expand the premium WiFi market through new product introductions and to develop and roll out service offerings that build recurring service revenue streams. While we have been able to manage through most of the COVID-19 related supply chain challenges to date, any further disruption brought about by the COVID-19 pandemic to supply chain partners, production schedules, material availability or freight carriers or any increases to costs associated with supply chain operations could have a significant negative impact on our net revenue, gross and operating margin performance.

The extent of the impact of the COVID-19 pandemic on our ongoing operational and financial performance, including our ability to execute our business strategies and initiatives in the expected time frame, will depend on future developments. The duration of the pandemic and the broader implications of the macro-economic recovery, any related disruptions to channel partners and restrictions on travel and transport are uncertain and unpredictable. Refer to Item 1A. Risk Factors of Part II of this Quarterly Report on Form 10-Q for various risks and uncertainties associated with the COVID-19 pandemic.

## **Critical Accounting Estimates**

In preparing our condensed consolidated financial statements, we make assumptions, judgments and estimates that

can have a significant impact on our revenue, operating income, and net income, as well as on the value of certain assets and liabilities on our condensed consolidated balance sheets. We base these estimates on historical and anticipated results, trends and various other assumptions that we believe are reasonable under the circumstances. As of the date of issuance of these condensed consolidated financial statements, we are not aware of any specific event or circumstance that would require us to update our estimates, judgments or revise the carrying value of our assets or liabilities. These estimates may change, as new events occur and additional information is obtained, and are recognized in the condensed consolidated financial statements as soon as they become known. Actual results could differ materially from those estimates under different assumptions and conditions.

For a complete description of what we believe to be the critical accounting estimates used in the preparation of our Unaudited Condensed Consolidated Financial Statements, refer to our Annual Report. Refer to *Note 1. The Company and Basis of Presentation*, in the Notes to Unaudited Condensed Consolidated Financial Statements in Item 1 of Part I of this Quarterly Report on Form 10-Q, for the risks and uncertainties related to the COVID-19 pandemic.

## **Results of Operations**

The following table sets forth the unaudited condensed consolidated statements of operations for the periods presented.

		Three Mon	ths Ended		Nine Months Ended						
(In thousands, except percentage data)	October	2, 2022	October :	3, 2021		October	2, 2022	October	3, 2021

## Net Revenue by Geographic Region

Our net revenue consists of gross product shipments and service revenue, less allowances for estimated sales returns, price protection, end-user customer rebates and other channel sales incentives deemed to be a reduction of revenue per the authoritative guidance for revenue recognition, and net changes in deferred revenue.

For reporting purposes, revenue is generally attributed to each geographic region based upon the location of the customer.

			Three Months Ended		Nine Months Ended						
(In thousands, except percentage data)		ober 2, 2022	% Change		October 3, 2021		tober 2, 2022	% Change		tober 3, 2021

						_					

#### **Americas**

Net revenue in Americas decreased in the three and nine months ended October 2, 2022, primarily due to the performance of our Connected Home segment, which experienced declines in net revenue of 24.4% and 37.4%, respectively, compared to the prior year periods. While the pandemic-induced demand resulting from work and schooling from home mandates remained elevated in 2021, in 2022 the market demand subsided, receding to below prepandemic levels of 2019. The decline in Connected Home performance was partially offset by strong demand for our SMB products. Despite certain supply chain challenges, SMB net revenue in the three and nine months ended October 2, 2022, increased 35.8% and 25.8%, respectively, compared to the prior year periods.

## **EMEA**

Net revenue in EMEA decreased in the three and nine months ended October 2, 2022, compared to the prior year periods, as pandemic driven demand across the Connected Home segment receded, noting declines of 55.6% and 62.8%, respectively, which were partially offset by increases of 12.5% and 5.2%, respectively, in SMB net revenue.

## APAC

Net revenue in APAC decreased in the three and nine months ended October 2, 2022, compared to the prior year periods, as pandemic driven demand across the Connected Home segment receded, noting declines of 16.5% and 25.1%, respectively, which were partially offset by increases of 5.1% and 10.2%, respectively, in SMB net revenue.

For further discussions specific to our Connected Home and SMB business, refer to the "Segment Information" section below.

## Cost of Revenue and Gross Margin

Cost of revenue consists primarily of the following: the cost of finished products from our third party manufacturers; overhead costs, including purchasing, product planning, inventory control, warehousing and distribution logistics; third-party software licensing fees; inbound freight; import duties/tariffs; warranty costs associated with returned goods; write-

downs for excess and obsolete inventory; amortization of certain acquired intangibles and software development costs; and costs attributable to the provision of service offerings.

We outsource our manufacturing, warehousing and distribution logistics. We believe this outsourcing strategy allows us to better manage our product costs and gross margin. Our gross margin can be affected by a number of factors, including fluctuation in foreign exchange rates, sales returns, changes in average selling prices, end-user customer rebates and other channel sales incentives, changes in our cost of goods sold due to fluctuations and increases in prices paid for components, net of vendor rebates, royalty and licensing fees, warranty and overhead costs, inbound freight and duty/tariffs, conversion costs, charges for excess or obsolete inventory, amortization of acquired intangibles and capitalized software development costs. The following table presents costs of revenue and gross margin, for the periods indicated:

		Th	ree Months Ended			Nine Months Ended				
(In thousands, except percentage data)	Octo	ber 2, 2022	% Change	Oct	ober 3, 2021	(	October 2, 2022	% Change	0	ctober 3, 2021
Cost of revenue	\$	181,058	(10.9)%	\$	203,309	\$	494,516	(21.0)%	\$	625,748
Gross margin percentage		27.5%			29.9%		27.6%			31.8%

Our overall gross margin decreased for the three and nine months ended October 2, 2022, compared to the prior year periods, primarily due to increased product acquisition and transportation costs, higher provision for sales returns and the strengthened U.S. dollar, partially offset by improved product mix, with SMB net revenue representing a higher proportion of net revenue as compared to the prior year periods.

We expect gross margin percentage for the fourth quarter of 2022 to decline slightly from the third quarter of 2022 levels as a result of further strengthening of the U.S. dollars. Over the past year and a half, we experienced meaningful increases in the cost of materials and components for our products. After twelve months of continuous increase in the market rates of sea freight transportation, in the second quarter of 2022, we began to see a positive downward trend which continued in the third quarter of 2022. However, we will not realize the gross margin benefits from the downward trend in sea freight rates until early 2023 as we carried approximately five months of inventory as of October 2, 2022, for which most was obtained when freight costs were elevated. In the first quarter of 2022, we selectively increased the price on certain products, and then again in the second quarter for certain SMB products, to offset increased costs. For the remainder of the year, we expect that our reliance on air transportation for SMB products will continue. We believe that a combination of improved product mix with increased sales of premium and super-premium Connected Home products and SMB products, higher subscription services and selective price increases will help to deliver improvement to margin performance as the year progresses.

We continue to experience disruptions caused by the pandemic, with partners affected by factory uptime, scarcity of materials and components and transportation disruptions. In 2022, pandemic-induced lockdowns in China disrupted supply of components to our manufacturers, limiting our ability to capitalize further on strong demand for our SMB products. If such disruptions become more widespread, they could significantly hamper our ability to fulfill the demand for our products. Forecasting gross margin percentages is difficult, and there are a number of risks related to our ability to maintain or improve our current gross margin levels. Our cost of revenue as a percentage of net revenue can vary significantly based upon factors such as: uncertainties surrounding revenue levels, including future pricing and/or potential discounts as a result of the economy or in response to the strengthening of the U.S. dollar in our international markets, competition, the timing of sales, and related production level variances; import customs duties and imposed tariffs; changes in technology; changes in product mix; expenses associated with writing off excessive or obsolete inventory; variability of stock-based compensation costs; royalties to third parties; fluctuations in freight costs; manufacturing and purchase price variances; changes in prices on commodity components; and warranty costs. We expect that revenue derived from paid subscription service plans will continue to increase in the future, which may have a positive impact on our gross margin. However, we may experience fluctuations in our gross margin due to the factors discussed above.

## **Operating Expenses**

## Research and Development

Research and development expenses consist primarily of personnel expenses, payments to suppliers for design services, safety and regulatory testing, product certification expenditures to qualify our products for sale into specific markets, prototypes, IT and facility allocations, and other consulting fees. Research and development expenses are recognized as they are incurred. Our research and development organization is focused on enhancing our ability to introduce innovative and easy-to-use products and services. The following table presents research and development expenses, for the periods indicated:

			Three Months Ended			Nine Months Ended					
(In thousands, except percentage data)	Octo	ber 2, 2022	% Change	Octo	ber 3, 2021	Oct	ober 2, 2022	% Change	Octob	per 3, 2021	
Research and development	\$	22,167	(5.6)%	\$	23,472	\$	68,193	(2.4)%	\$	69,887	

Research and development expenses decreased for the three and nine months ended October 2, 2022, compared to the prior year periods. Decreases in personnel-related expenditures of \$1.5 million and \$3.8 million, respectively, were partially offset by increased costs for engineering projects and outside professional services of \$0.3 million and \$2.0 million in support of our product development efforts. The declines in the personnel-related expenditures were mainly due to lower stock-based compensation and lower headcount for the three and nine months ended October 2, 2022. The personnel-related expenditures for the nine months ended October 2, 2022 were also reduced by lower performance-based compensation expenses.

We believe that innovation and technological leadership is critical to our future success, and we are committed to continuing a significant level of research and development to develop new technologies, products and services. We continue to invest in research and development to grow our cloud platform capabilities, our services and mobile applications and to create and expand our hardware product offerings focused on WiFi 7, premium WiFi 6E, WiFi 6, Advanced 4G/5G mobile and 5G coverage solutions, audio and video over Ethernet, web-managed, 10Gig and PoE switch and SMB wireless products. We expect research and development expenses as a percentage of net revenue in the fourth quarter of 2022 to be in line with or slightly higher than the third quarter of 2022 levels. Research and development expenses may fluctuate depending on the timing and number of development activities and could vary significantly as a percentage of net revenue, depending on actual revenues achieved in any given quarter.

#### Sales and Marketing

Sales and marketing expenses consist primarily of advertising, trade shows, corporate communications and other marketing expenses, product marketing expenses, outbound freight costs, amortization of certain intangibles, personnel expenses for sales and marketing staff, technical support expenses, and IT and facility allocations. The following table presents sales and marketing expenses, for the periods indicated:

			Three Months Ended			Nine Months Ended						
(In thousands, except percentage data)	Octo	ber 2, 2022	% Change	Oct	ober 3, 2021	Oct	tober 2, 2022	% Change	Octo	ber 3, 2021		
Sales and marketing	\$	34,203	(5.5)%	\$	36,176	\$	104,335	(4.9)%	\$	109,731		

The decline in sales and marketing expenses for the three months ended October 2, 2022, compared to the prior year period, was primarily attributable to a decrease of \$1.3 million in personnel-related expenditures, mainly due to lower stock-based compensation and lower headcount. The decline in sales and marketing expenses for the nine months ended October 2, 2022, compared to the prior year period, was mainly attributable to decreases in personnel-related expenditures of \$4.1 million, outside service expenditures of \$2.0 million, and amortization of intangibles of \$1.3 million, partially offset by increased marketing expenses of \$1.1 million. The decline in personnel related expenses for the nine months ended October 2, 2022 was mainly due to lower performance-based compensation expense and lower stock based compensation.

We expect our sales and marketing expenses as a percentage of net revenue in the fourth quarter of 2022 to decline from the third quarter of 2022 levels. Expenses may fluctuate depending on revenue levels achieved as certain expenses, such as commissions, are determined based upon the revenues achieved. Forecasting sales and marketing expenses is highly dependent on expected revenue levels and could vary significantly depending on actual revenue achieved in any given quarter. Marketing expenses may also fluctuate depending upon the timing, extent and nature of marketing programs. Marketing expenditure committed with a customer is generally recorded as a reduction of revenue per authoritative guidance.

## General and Administrative

General and administrative expenses consist of salaries and related expenses for executives, finance and accounting, human resources, information technology, professional fees, including legal costs associated with defending claims against us, allowance for doubtful accounts, IT and facility allocations, and other general corporate expenses. The following table presents general and administrative expenses, for the periods indicated:

			Three Months Ended			Nine Months Ended						
(In thousands, except percentage data)	Oct	ober 2, 2022	% Change	O	ctober 3, 2021	Oc	tober 2, 2022	% Change	Octob	er 3, 2021		
General and administrative	\$	13,949	(0.8)%	\$	14,056	\$	41,698	(7.5)%	\$	45,084		

The decreases in general and administrative expenses for the three and nine months ended October 2, 2022, compared to the prior year periods, were primarily driven by lower personnel-related expenditure of \$1.0 million and \$5.8 million, respectively, partially offset by increases in legal and professional services fees of \$0.9 million and \$2.2 million, respectively, mainly associated with patent litigation claims. The declines in the personnel-related expenditures were mainly due to lower stock-based compensation for the three and nine months ended October 2, 2022, and lower performance-based compensation expenses for the nine months ended October 2, 2022.

We expect our general and administrative expenses as a percentage of net revenue in the fourth quarter of 2022 to be consistent with the third quarter of 2022 levels. General and administrative expenses could fluctuate depending on a number of factors, including the level and timing of expenditures associated with litigation defense costs in connection with the litigation matters described in *Note 8*, *Commitments and Contingencies*, in Notes to Unaudited Condensed Consolidated Financial Statements in Item 1 of Part I of this Quarterly Report on Form 10-Q. Future general and administrative expense increases or decreases in absolute dollars are difficult to predict due to the lack of visibility of certain costs, including legal costs associated with defending claims against us, as well as legal costs associated with asserting and enforcing our intellectual property portfolio and other factors.

## Goodwill impairment charge

The following table presents goodwill impairment charge for the periods indicated:

		Three Months Ended		Nine Months Ended						
(In thousands, except percentage data)	October 2, 2022	% Change	October 3, 2021	October 2, 2022	% Change	October 3, 2021				
Goodwill impairment charge	\$ —	**	\$ —	\$ 44,442	**	\$ —				

\*\* Percentage change not meaningful.

The increase in goodwill impairment charge for the nine months ended October 2, 2022, compared to the prior year period, was due to an impairment charge recognized for the Connected Home segment resulting from an interim goodwill impairment assessment performed in the first fiscal quarter of 2022. For a detailed discussion of goodwill impairment charge, refer to *Note 4*, *Balance Sheet Components*, in Notes to Unaudited Condensed Consolidated Financial Statements in Item 1 of Part I of this Quarterly Report on Form 10-Q.

#### Other operating expenses (income), net

Other operating expenses (income), net consists of restructuring and other charges, litigation reserves, net, and change in fair value of contingent consideration. The following table presents Other operating expenses (income), net for the periods indicated:

		Three Months Ended			Nine Months Ended					
(In thousands, except percentage data)	October 2, 2022	% Change	October 3, 2021	Oct	tober 2, 2022	% Change	October	3, 2021		
Other operating expenses (income), net	\$ 361	62.6%	\$ 222	\$	931	34.9%	\$	690		

The net changes in other operating expenses (income), net for the three and nine months ended October 2, 2022, compared to the prior year periods, were not significant. We incurred restructuring and other charges of \$0.9 million associated with the reorganization of our Connected Home segment in the nine months ended October 2, 2022 to better align the cost structure of the business with projected revenue levels. In the nine months ended October 2, 2021, we incurred \$0.7 million of other operating expenses, comprising of \$3.7 million for restructuring and other charges associated with the consolidation of offices in the APAC region and the reorganization of our supply chain function, partially offset by a \$3.0 million release of contingent consideration associated with a prior acquisition.

## Other Income (Expenses), Net

Other income (expenses), net consists of interest income, which represents amounts earned and incurred on our cash, cash equivalents and short-term investments, and other income and expenses, which primarily represents gains and losses on transactions denominated in foreign currencies, gains and losses on investments, and other non-operating income and expenses. The following table presents other income (expenses), net for the periods indicated:

		Th	ree Months Ende		Nine Months Ended					
(In thousands, except percentage data)	October 2	, 2022	% Change	Oc	ctober 3, 2021	Octob	er 2, 2022	% Change	(	October 3, 2021
Other income (expenses), net	\$	638	**	\$	(132)	\$	(1,164)	**	\$	15

<sup>\*\*</sup> Percentage change not meaningful.

The change in other income (expenses), net for the three months ended October 2, 2022, compared to the prior year period was mainly attributable to higher interest earned on our short-term investments and lower net loss on our long-term investments. The change in other income (expenses), net for the nine months ended October 2, 2022 was primarily due to increased net losses on our short-term investments.

## Provision for (Benefit from) Income Taxes

		Thi	ree Months Ended			Nine Months Ended					
(In thousands, except percentage data)	Octo	ber 2, 2022	% Change	Oct	ober 3, 2021	Oct	ober 2, 2022	% Change	Octo	ber 3, 2021	
Provision for (benefit from) income taxes	\$	(4,314)	**	\$	3,199	\$	(8,967)	**	\$	15,383	
Effective tax rate		285.1%			25.0%		12.5%			23.4%	

<sup>\*\*</sup> Percentage change not meaningful.

The change in taxes for the three months ended October 2, 2022, compared to the prior year period, was primarily due to the pre-tax loss of \$1.5 million during the period coupled with the impact of changes in estimate for the effective tax rate resulting in a true-up in tax benefits recorded for the prior periods. Additionally, we recorded a tax benefit for favorable changes in estimates recorded during the quarter upon completion of the 2021 US federal tax return. For the nine months ended October 2, 2022, the tax benefit for favorable changes in estimates recorded during the quarter upon completion of the 2021 US federal tax return was offset by the tax impact of a goodwill impairment that is not deductible for tax purposes. For the three and nine months ended October 3, 2021, tax expenses were partially offset by tax benefits

related to stock-based compensation and non-taxable income related to adjustments to acquisition-related contingent accruals. Additionally, we recorded a tax benefit for favorable changes in estimates recorded during the fiscal quarter upon completion of the 2020 US federal tax return.

We are subject to income taxes in the U.S. and numerous foreign jurisdictions. Our future foreign tax rate could be affected by changes in the composition in earnings in countries with tax rates differing from the U.S. federal rate. We are currently under examination by the U.S. Internal Revenue Service ("IRS") for our fiscal years ended December 31, 2018 and December 31, 2019. We are also under examination in various other state, local and foreign jurisdictions.

## **Segment Information**

A description of our products and services, as well as segment financial data, for each segment and a reconciliation of segment contribution income (loss) to income (loss) before income taxes can be found in *Note 11. Segment Information*, and information on net revenue by sales channels can be found in *Disaggregation of Revenue in Note 3. Revenue*, in the Notes to Unaudited Condensed Consolidated Financial Statements in Item 1 of Part I of this Quarterly Report on Form 10-O.

## **Connected Home Segment**

		Th	ree Months Ended		Nine Months Ended					
(In thousands, except percentage data)	Oct	ober 2, 2022	% Change	O	ctober 3, 2021	C	October 2, 2022	% Change	Oc	tober 3, 2021
Net revenue	\$	150,581	(27.8)%	\$	208,539	\$	409,787	(39.7)%	\$	679,320
Percentage of net revenue		60.3%			71.9%		60.0%			74.1%
Contribution income (loss)	\$	(512)	**	\$	22,558	\$	(3,033)	**	\$	101,189
Contribution margin		(0.3)%			10.8%		(0.7)%			14.9%

\*\* Percentage change not meaningful.

Connected Home net revenue decreased in the three and nine months ended October 2, 2022, compared to the prior year periods, mainly due to a contraction of the U.S. consumer WiFi market. The size of the U.S. consumer WiFi market declined as compared to 2021 when consumers were continuing to purchase WiFi networking products at elevated levels due to continued pandemic driven work and schooling from home mandates. The decline in demand was experienced across all product categories in the three and nine months ended October 2, 2022. While we saw a decline in demand for home wireless products, compared to the prior year period, in the nine months ended October 2, 2022, we continued to experience growth in our super-premium WiFi 6 mesh systems, and 5G mobile hotspots in both the retail and service provider channels, as well as revenue growth from our services. Geographically, we experienced decreases across all three regions in the three and nine months ended October 2, 2022, compared to the prior year periods.

Connected Home experienced contribution losses in the three and nine months ended October 2, 2022, mainly attributable to lower net revenue and gross margin achievement, contributing to a lack of operating expense leverage. The lower gross margins compared to the prior year periods were primarily driven by increased component and transportation costs. In the second and third quarters of 2022, we took action to adjust the cost structure of the Connected Home business to align with projected revenue levels. However, we expect the Connected Home contribution margin to remain challenged in the fourth quarter of 2022, as we sell through inventory brought in when freight rates were higher.

#### SMB Segment

		Th	ree Months Ended		Nine Months Ended					
(In thousands, except percentage data)	Oct	ober 2, 2022	% Change	 October 3, 2021		October 2, 2022	% Change		October 3, 2021	
Net revenue	\$	99,006	21.3%	\$ 81,611	\$	273,582	15.2%	\$	237,566	
Percentage of net revenue		39.7%		28.1%		40.0%			25.9%	
Contribution income	\$	23,683	38.2%	\$ 17,137	\$	53,844	8.1%	\$	49,831	
Contribution margin		23.9%		21.0%		19.7%			21.0%	

SMB net revenue increased for the three and nine months ended October 2, 2022, compared to the prior year periods, primarily due to record demand for the Pro AV product line of managed switches. Geographically, despite supply chain challenges and negative foreign exchange impact, SMB net revenue increased across all three regions in the three and nine months ended October 2, 2022, compared to the prior year periods.

SMB contribution income increased in the three and nine months ended October 2, 2022, compared to the prior year periods. The increases were primarily attributable to net revenue growth and operating expense leverage. Contribution income increase in the nine months ended October 2, 2022 was partially offset by lower gross margin achievement primarily driven by increased air freight expenditures as a percentage of net revenue.

## Liquidity and Capital Resources

Our principal sources of liquidity are cash, cash equivalents, short-term investments and cash generated from operations. As of October 2, 2022, we had cash, cash equivalents and short-term investment of \$233.2 million, a decrease of \$38.3 million from December 31, 2021.

As of October 2, 2022, approximately 36% of our cash and cash equivalents and short-term investments were outside of the U.S., which are subject to fluctuation based on the settlement of intercompany balances. As we repatriate these funds in accordance with our designation of funds not permanently reinvested outside of the U.S., we will be required to pay income taxes in certain U.S. states and applicable foreign withholding taxes during the period when such repatriation occurs. We have recorded deferred taxes for the tax effect of repatriating the funds to the U.S.

## **Cash Flows**

The following table presents our cash flows for the periods presented.

		Nine Months Ended		
(In thousands)	Oct	October 2, 2022		October 3, 2021
Cash used in operating activities	\$	(8,799)	\$	(8,498)
Cash used in investing activities		(98,098)		(7,433)
Cash used in financing activities		(23,947)		(47,262)
Net cash decrease	\$	(130,844)	\$	(63,193)

## Operating activities

The change in net cash used in operating activities for the nine months ended October 2, 2022, compared to the prior year period, primarily due to lower net revenue.

Our accounts payable (excluding payables related to property and equipment) increased from \$73.2 million as of December 31, 2021 to \$86.7 million as of October 2, 2022, primarily due to timing of inventory receipts and supplier payments. Inventory decreased from \$315.7 million as of December 31, 2021, to \$298.1 million as of October 2, 2022, as we work to realign inventory carrying levels with projected demands.

Investing activities

Net cash used in investing activities increased by \$90.7 million in the nine months ended October 2, 2022, compared to the prior year period, mainly driven by net purchases of short-term investments.

Financing activities

Net cash used in financing activities decreased by \$23.3 million in the nine months ended October 2, 2022, compared to the prior year period, primarily due to lower purchases of our common stock and lower proceeds from exercise of stock options.

Based on our current plans and market conditions, we believe that our existing cash, cash equivalents and short-term investments, together with cash generated from operations, will be sufficient to satisfy our anticipated cash requirements in the short-term and long-term. However, we may require or desire additional funds to support our operating expenses and capital requirements or for other purposes, such as acquisitions, and may seek to raise such additional funds through public or private equity financing or from other sources. We cannot assure you that additional financing will be available at all or that, if available, such financing would be obtainable on terms favorable to us and would not be dilutive. Our future liquidity and cash requirements will depend on numerous factors, including the introduction of new products and potential acquisitions of related businesses or technology.

### Stock Repurchase Program

From time to time, our Board of Directors has authorized programs under which we may repurchase shares of our common stock. Under the authorizations, the timing and actual number of shares subject to repurchase are at the discretion of management and are contingent on a number of factors, such as levels of cash generation from operations, cash requirements for acquisitions and the price of our common stock. During the nine months ended October 2, 2022 and October 3, 2021, we repurchased and retired, reported based on trade date, approximately 1.0 million and 1.6 million shares of common stock, respectively, at a cost of approximately \$24.4 million and \$57.5 million, respectively, under the repurchase authorizations. As of October 2, 2022, approximately 2.5 million shares remained authorized for repurchase under the repurchase program.

We also repurchased and retired, reported based on trade date, approximately 198,000 and 197,000 shares of common stock, respectively, at a cost of approximately \$4.7 million and \$7.5 million during the nine months ended October 2, 2022, and October 3, 2021, respectively, to administratively facilitate the withholding and subsequent remittance of personal income and payroll taxes for individuals receiving Restricted Stock Units. For a detailed discussion of our common stock repurchases, refer to *Note 9. Stockholders' Equity*, in Notes to Unaudited Condensed Consolidated Financial Statements in Item 1 of Part I of this Quarterly Report on Form 10-Q. Preserving strong liquidity and generating cash remain paramount as the pandemic and its related supply chain challenges continue to persist. We expect to continue to opportunistically repurchase shares in future periods. On August 16, 2022, the "Inflation Reduction Act" ("IRA") was signed into law, which includes a 1% exercise tax on stock repurchases. We do not expect the 1% exercise tax on stock repurchases under IRA will have a material impact to our financial statements for the tax years after December 31, 2022.

### **Contractual and Other Obligations**

Except as follows, there were no material changes outside of the ordinary course of business in our contractual obligations as of October 2, 2022, from those as of December 31, 2021, disclosed in Part II, Item 7, of our Annual Report.

As of October 2, 2022, we had \$120.7 million of purchase obligations which represented non-cancellable inventory-related purchase agreements with suppliers, up from \$94.8 million as of December 31, 2021, as we align our procurement with anticipated demand for our products. A further \$664.7 million of purchase orders beyond contractual termination periods have been issued to supply chain partners in anticipation of demand requirements. These purchase orders may be cancelled by either party, however we may incur expenses for materials and components, such as chipsets purchased by the supplier to fulfill the purchase order, in the event of cancellation. Expenses incurred in respect of cancelled purchase orders has historically not been significant relative to the original order value. For a detailed discussion, refer to Note 8, *Commitments and Contingencies*, in Notes to Unaudited Condensed Consolidated Financial Statements in Item 1 of Part I of this Quarterly Report on Form 10-Q.

We lease office space, cars, distribution centers and equipment under non-cancelable operating leases with various expiration dates through November 2027. As of October 2, 2022, we had approximately \$45.0 million in non-cancelable operating lease commitments included on the condensed consolidated balance sheet. The amounts presented are consistent with contractual terms and are not expected to differ significantly unless a substantial change in our headcount needs requires us to exit an office facility early or expand our occupied space.

### **Recent Accounting Pronouncements**

Information with respect to this item many be found in *Note 2. Summary of Significant Accounting* Policies, in Notes to Unaudited Condensed Consolidated Financial Statements in Item 1 of Part I of this Report on Form 10-Q, which are hereby incorporated by reference.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

During the nine months ended October 2, 2022, there were no material changes to our market risk disclosures as set forth in Part II Item 7A "Quantitative and Qualitative Disclosures About Market Risk" in our Annual Report.

### Item 4. Controls and Procedures

### **Evaluation of Disclosure Controls and Procedures**

Based on an evaluation under the supervision and with the participation of our management (including our Chief Executive Officer and Chief Financial Officer), our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act") were effective as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms and (ii) accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosures.

### **Changes in Internal Control over Financial Reporting**

There have been no changes in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially effect, our internal control over financial reporting. It should be noted that any system of controls, however well designed and operated, can provide only reasonable assurance, and not absolute assurance, that the objectives of the system are met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of these and other inherent limitations of control systems, there can be no assurance that any design will succeed in achieving its stated goals in all future circumstances.

### PART II: OTHER INFORMATION

### Item 1. Legal Proceedings

The information set forth under *Note 8. Commitments and Contingencies*, in the Notes to Unaudited Condensed Consolidated Financial Statements in Item 1 of Part I of this Quarterly Report on Form 10-Q, is incorporated herein by reference. For an additional discussion of certain risks associated with legal proceedings, see the section entitled "Risk Factors" in Part II, Item 1A of this Quarterly Report on Form 10-Q.

### Item 1A. Risk Factors

### **Risk Factors Summary**

The following is a summary of some of the risks and uncertainties as of the date of the filing of this Quarterly Report on Form 10-Q, some of which either have occurred or may occur in the future, that could materially adversely affect our business, financial condition and results of operations. You should read this summary together with the more detailed description of each risk factor contained below.

### Risks Related to our Business, Industry and Operations

- If disruptions in our transportation network occur or our shipping costs substantially increase, we may be unable to sell or timely deliver our products, and our net revenue and gross margin could decrease.
- The COVID-19 pandemic could materially adversely affect our financial condition and results of operations.
- We obtain several key components from limited or sole sources.
- If we do not effectively manage our sales channel inventory and product mix, we may incur costs associated with excess inventory, or lose sales from having too few products.
- We rely on a limited number of traditional and online retailers, wholesale distributors and service provider customers for a substantial portion of our sales, and our net revenue could decline if they refuse to pay our requested prices or reduce their level of purchases, if there are unforeseen disruptions in their businesses, or if there is significant consolidation in our customer base that results in fewer customers for our products.
- Our sales and operations in international markets expose us to operational, financial and regulatory risks.
- Some of our competitors have substantially greater resources than we do, and to be competitive we may be required to lower our prices or increase our sales and marketing expenses.
- If we fail to continue to introduce or acquire new products and services that achieve broad market acceptance on a timely basis, we will not be able to compete effectively.
- We depend on a limited number of third-party manufacturers for substantially all of our manufacturing needs.
- Changes in trade policy in the United States and other countries, including the imposition of tariffs and the resulting consequences, may adversely impact our business, results of operations and financial condition.
- We expect our operating results to fluctuate on a quarterly and annual basis, which could cause our stock price to fluctuate or decline.
- We depend substantially on our sales channels, and our failure to maintain and expand our sales channels would result in lower sales and reduced net revenue.
- We depend on large, recurring purchases from certain significant customers, and a loss, cancellation or delay in purchases by these customers could negatively affect our revenue.
- If we fail to overcome the challenges associated with managing our broadband service provider sales channel, our net revenue and gross profit will be negatively impacted.
- The average selling prices of our products typically decrease rapidly over the sales cycle of the product, which may negatively affect our net revenue and gross margins.
- As part of growing our business, we have made and expect to continue to make acquisitions. If we fail to successfully select, execute or integrate
  our acquisitions, then our business and operating results could be harmed and our stock price could decline.
- We invest in companies for both strategic and financial reasons but may not realize a return on our investments.
- Expansion of our operations and infrastructure may strain our operations and increase our operating expenses.

### Risks Related to Our Products, Technology and Intellectual Property

- Product security vulnerabilities, system security risks, data protection breaches and cyber-attacks could disrupt our products, services, internal
  operations or information technology systems, and any such disruption could increase our expenses, damage our reputation, harm our business and
  adversely affect our stock price.
- We rely upon third parties for technology that is critical to our products, and if we are unable to continue to use this technology and future technology, our ability to develop, sell, maintain and support technologically innovative products would be limited.
- We have been investing in additional in-house resources on software research and development, which could disrupt our ongoing business and present distinct risks from our historically hardware-centric business.
- If our products contain defects or errors, we could incur significant unexpected expenses, experience product returns and lost sales, experience product recalls, suffer damage to our brand and reputation, and be subject to product liability or other claims.
- Our user growth, engagement, and monetization of our subscription services on mobile devices depend upon effective operation with mobile operating systems, networks, technologies, products, and standards that we do not control.
- If we are unable to secure and protect our intellectual property rights, our ability to compete could be harmed.

### Financial, Legal, Regulatory and Tax Compliance Risks

- We are currently involved in numerous litigation matters and may in the future become involved in additional litigation.
- We are exposed to adverse currency exchange rate fluctuations in jurisdictions where we transact in local currency, which could harm our financial results and cash flows.
- Changes in tax laws or exposure to additional income tax liabilities could affect our future profitability.
- We are subject to, and must remain in compliance with, numerous laws and governmental regulations.
- We could incur significant liability if the distribution of Arlo shares to our stockholders is determined to be a taxable transaction.
- We may be exposed to claims and liabilities as a result of the distribution of Arlo shares to our stockholders.
- We must comply with indirect tax laws in multiple jurisdictions, as well as complex customs duty regimes worldwide. Audits of our compliance
  with these rules may result in additional liabilities for taxes, duties, interest and penalties related to our international operations which would reduce
  our profitability.
- We are exposed to the credit risk of some of our customers and to credit exposures in weakened markets.
- If our goodwill and intangible assets become impaired, we may be required to record a significant charge to earnings.
- Governmental regulations of imports or exports affecting Internet security could affect our net revenue.
- We are exposed to credit risk and fluctuations in the market values of our investment portfolio.

### General Risk Factors

- Global economic conditions could materially adversely affect our revenue and results of operations.
- If we lose the services of our Chairman and Chief Executive Officer, Patrick C.S. Lo, or our other key personnel, we may not be able to execute our business strategy effectively.
- Political events, war, terrorism, public health issues, natural disasters, sudden changes in trade and immigration policies, and other circumstances could materially adversely affect us.
- We are required to evaluate our internal controls under Section 404 of the Sarbanes-Oxley Act of 2002 and any adverse results from such
  evaluation, including restatements of our issued financial statements, could impact investor confidence in the reliability of our internal controls over
  financial reporting.
- Our stock price may be volatile and your investment in our common stock could suffer a decline in value.

Additional factors that could affect our businesses, results of operations and financial condition are discussed below. However, other factors not discussed below or elsewhere in this Quarterly Report on Form 10-Q could also adversely affect our businesses, results of operations and financial condition. Therefore, the risk factors below should not be considered a complete list of potential risks that we may face.

Any risk factor described in this Quarterly Report on Form 10-Q or in any of our other SEC filings could by itself, or together with other factors, materially adversely affect our liquidity, competitive position, business, reputation, results of operations, capital position or financial condition, including by materially increasing our expenses or decreasing our revenues, which could result in material losses.

Investing in our common stock involves a high degree of risk. The risks described below are not exhaustive of the risks that might affect our business. Other risks, including those we currently deem immaterial, may also impact our business. Any of the following risks could materially adversely affect our business operations, results of operations and financial condition and could result in a significant decline in our stock price. Before deciding to purchase, hold or sell our common stock, you should carefully consider the risks described in this section. This section should be read in conjunction with the unaudited condensed consolidated financial statements and accompanying notes thereto, and Management's Discussion and Analysis of Financial Condition and Results of Operations included in this Quarterly Report on Form 10-O.

We have marked with an asterisk (\*) those risks described below that reflect substantive changes from the risks described under Part I, Item 1A "Risk Factors" included in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on February 18, 2022.

### Risks Related to our Business, Industry and Operations

\* If disruptions in our transportation network occur or our shipping costs substantially increase, we may be unable to sell or timely deliver our products, and our net revenue and gross margin could decrease.

We are highly dependent upon the transportation systems we use to ship our products, including surface and air freight. Our attempts to closely match our inventory levels to our product demand intensify the need for our transportation systems to function effectively and without delay. On a quarterly basis, our shipping volume also tends to steadily increase as the quarter progresses, which means that any disruption in our transportation network in the latter half of a quarter will likely have a more material effect on our business than at the beginning of a quarter. The outbreak of the COVID-19 pandemic has led to significant limitations on the availability of key transportation resources and a significant increase in the cost of air and ocean freight. These developments negatively impact our profitability as we seek to transport an increased number of products from manufacturing locations in Asia to other markets around the world as quickly as possible. For example, the COVID-19 outbreak and subsequent lockdown in Shenzhen, China in the first quarter of 2022 had a disruptive impact on material flow from Southern China to our manufacturers in Vietnam and Thailand. The disruption to the transportation network, including schedule changes and shipping delays, led to a material shortfall in our revenue and profitability in the first quarter of 2022. We believe that continued COVID-19 related lockdowns in China constitutes our biggest risk for the remainder of 2022, as a number of electrical and mechanical components that go into our products are manufactured there. Moreover, feeder vessels that move containers to key trans-Pacific terminal locations can be subject to similar impacts due to the timing of container transfers and vessel departure dates. The transportation network is subject to disruption or congestion from a variety of causes, including labor disputes or port strikes, acts of war or terrorism like in Russia/Ukraine, natural disasters, pandemics like COVID-19 and congestion resulting from higher shipping volumes. The global effects of climate change can result in increased frequency and intensity of these natural disasters that could also disrupt our transportation network. For example, in late November 2020, a giant wave damaged a cargo vessel carrying eight containers of our products, causing a 4-month delay to our shipment which ultimately arrived in Southern California in late March 2021. Labor disputes among freight carriers and at ports of entry are common, and we expect labor unrest and its effects on shipping our products to be a continuing challenge for us. A port worker strike, work slow-down or other transportation disruption in the ports of Los Angeles or Long Beach, California, where we have a significant distribution center, could significantly disrupt our business. We have experienced such disruption at both ports, due to multiple factors brought about by the COVID-19 pandemic, such as supply and demand imbalance, a shortage of warehouse workers, truck drivers, and transport equipment (tractors and trailers), and other causes, and have suffered from heightened congestion, bottleneck and gridlock, leading to abnormally high transportation delays. This could materially and adversely affect our business and financial results, and, if significant disruptions along these lines continue, especially

if they were to take place within the last few weeks of any quarter, this could lead to further significant disruptions in our business, delays in shipments, and revenue and profitability shortfalls, which would materially adversely affect our business and financial results.

Our international freight is regularly subjected to inspection by governmental entities. If our delivery times increase unexpectedly for these or any other reasons, our ability to deliver products on time would be materially adversely affected and would result in delayed or lost revenue as well as customer-imposed penalties. While transportation costs are beginning to decrease, if fuel prices continue to increase, our transportation costs may increase again. Similarly, supply chain disruptions such as those described in the preceding paragraph, may also lead to an increase in transportation costs. For example, the cost of shipping our products by ocean freight had previously increased to at least eight times historical levels and had a corresponding impact upon our profitability. Moreover, the cost of shipping our products by air freight is greater than other methods. From time to time in the past, we have shipped products using extensive air freight to meet unexpected spikes in demand, shifts in demand between product categories, to bring new product introductions to market quickly and to timely ship products previously ordered. If we rely more heavily upon air freight to deliver our products, our overall shipping costs will increase. Just as ocean freight costs had previously increased due to the aforementioned supply chain disruptions, the cost of air freight had previously increased, as well, up to five times historical levels. Significant increases in the cost of both ocean and air freight would severely disrupt our business and harm our operating results, and in particular, our profitability.

### \* The COVID-19 pandemic could materially adversely affect our financial condition and results of operations.

The novel strain of the coronavirus (COVID-19) has spread as a global pandemic throughout the world and has resulted in authorities imposing, and businesses and individuals implementing, numerous unprecedented measures to try to contain the virus. These efforts include travel bans and restrictions, quarantines, shelter-in-place/stay-at-home and social distancing orders, and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our vendors, suppliers and manufacturing partners. The extent to which the COVID-19 pandemic will continue to affect our business, results of operation and financial condition is difficult to predict and depends on numerous evolving factors, including: the duration and scope of the pandemic and its impact on overall global uncertainty; the level of vaccination rates; new and potentially more contagious or more dangerous variants of COVID-19, such as the Omicron, the Omicron subvariant BA.5 and other variants and subvariants; government, social, business and other actions that have been and will be taken in response to the pandemic; and the effect of the pandemic on short- and long-term general economic conditions.

For example, the COVID-19 outbreak and subsequent lockdowns in Shenzhen, China in the first quarter of 2022 had a disruptive impact on material flow from Southern China to our manufacturers in Vietnam and Thailand. The disruption to the transportation network, including schedule changes and shipping delays, led to a material shortfall in our revenue and profitability in the first quarter of 2022. Further, as the COVID-19 virus continues to spread and evolve to other variants and the availability of vaccines against the COVID-19 virus varies greatly around the world the potential for future lockdowns which may adversely affect our ability to supply products remains a significant risk going forward. Similarly, current and future restrictions or disruptions of transportation, such as reduced availability of air and ground transport labor and vehicles, port closures or congestion, and increased border controls or closures, have impacted and may continue to impact our ability to meet demand and could materially adversely affect us. For example, as mentioned above in the risk factor "If disruptions in our transportation network occur or our shipping costs substantially increase, we may be unable to sell or timely deliver our products, and our net revenue and gross margin could decrease", we had previously experienced significant increases in the cost of ocean freight and air freight as a result of the pandemic, and we believe that continued pandemic related lockdowns in China constitutes our biggest risk for the remainder of 2022, due to the large concentration of electrical and mechanical components that go into our products that are manufactured there, which would also negatively affects our profitability as we seek to transport an increased number of products from manufacturing locations in Asia to other markets around the world as quickly as possible. We have also experienced shortages in freight capacity. This can negatively impact our ability to ship volume predictably and on a lower cost basis.

In addition, rapidly shifting consumer demand during the pandemic can lead to unexpected results of operations. Although we had previously seen a significant increase in demand for our Connected Home products due to consumers responding to work-from-home and shelter-in-place measures, we have also seen this increase in demand taper as vaccines have become widely available and consumers return to work or school and the impact of the COVID-19 pandemic subsides, particularly in North America where we derive a substantial portion of our revenue. If this tapering of demand

occurs at a more rapid pace than we are forecasting, as happened during the first half of 2022, our revenue, profitability and other financial results could be adversely affected. Unanticipated increase in demand has also put strain on our manufacturing partners, suppliers and logistics partners to produce and deliver a sufficient number of products to meet this demand. In particular, the limited and delayed availability of certain key components for our products, such as specialized WiFi 6 chipsets, microcontrollers, power over ethernet chipsets and power integrated circuits, significantly constrains our ability to meet the increased demand and over the course of the past year, we have seen lead times for some of these key components increase dramatically from as low as 8 weeks to up to 52 weeks currently. This in turn puts pressure on our ability to accurately forecast and increases the likelihood that the accuracy of such forecasts will be lower, which could materially adversely affect our financial results. During the second and third fiscal quarters of 2020, we experienced a weakening in demand for our SMB products as businesses reacted to the uncertainty caused by the pandemic and placed projects on hold, and during the second fiscal quarter of 2021 and first three fiscal quarters of 2022, we experienced a softening in demand for our Connected Home products which was below our previous forecasts. If we continue to experience weakened demand in either our Connected Home or SMB business segments that is not in line with our forecasts, our revenue, profitability and other financial results would be materially adversely impacted.

The pandemic has significantly increased economic and demand uncertainty and also has led to increased disruption and volatility in capital markets and credit markets. The current severe economic slowdown resulting from the pandemic, together with other macroeconomic and geopolitical factors, may lead to a global recession. There is a significant degree of uncertainty and lack of visibility as to the extent and duration of any such slowdown or recession. Risks related to a slowdown or recession include the risk that demand for our products will be significantly harmed over time, if consumers choose to delay product upgrades or various projects in order to conserve funds. Given the significant economic uncertainty and volatility created by the pandemic, it is difficult to predict the nature and extent of impacts on demand for our products. These expectations are subject to change without warning.

The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, cancellation of physical participation in meetings, events and conferences, and social distancing measures), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, vendors, and suppliers. Work-from-home and other measures introduce additional operational risks, including cybersecurity risks, and have affected the way we conduct our product development, testing, customer support, and other activities, which could have an adverse effect on our operations. For example, we have a significant research and development center in Bangalore, India, and significant vendor relationships with third party information technology and software development providers who are also based in India, which experienced a tremendous surge in COVID-19 cases during the first fiscal quarter of 2021. Furthermore, we rely on third-party laboratories to test and certify our products. If these service providers close or reduce staffing, it could delay our product development efforts. There is no certainty that such measures will be sufficient to mitigate the risks posed by the virus, and illness and workforce disruptions could lead to unavailability of key personnel and harm our ability to perform critical functions. In addition, work-from-home and related business practice modifications present significant challenges to maintaining our corporate culture, including employee engagement and productivity, both during the immediate pandemic crisis and as we make additional adjustments in the eventual transition from it.

The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including how quickly and to what extent normal economic and operating conditions can resume. We are similarly unable to predict the degree to which the pandemic impacts our customers, suppliers, vendors, and other partners, and their financial conditions, but a material effect on these parties could also adversely affect us. As mentioned above, factory lockdowns in China materially and adversely affected our manufacturing partners and component suppliers in that area, which in turn materially and adversely affected our supply chain and our operating results. Our main distribution partner in Southern California has had several incidents of workers at its facility testing positive for COVID-19, forcing the facility to close temporarily. Along the same lines, Amazon, one of our largest retail customers, shut down six warehouses in France in April 2021 due to a labor dispute with workers who alleged that Amazon was not doing enough to protect them from the ongoing COVID-19 pandemic. The impact of COVID-19 can also exacerbate other risks discussed above and below, which could in turn have a material adverse effect on us. Developments related to COVID-19 have been rapidly changing, as exemplified by the recent and rapid spread of the Omicron variant and subvariant, and additional impacts and risks may arise that we are not aware of or able to appropriately respond to currently. Should the COVID-19 situation or global economic slowdown not improve or worsen, or if our attempts to mitigate its impact on our

operations and costs are not successful, our business, results of operations, financial condition and prospects may be adversely affected.

\* We obtain several key components from limited or sole sources, and if these sources fail to satisfy our supply requirements or we are unable to properly manage our supply requirements with our third-party manufacturers, we may lose sales and experience increased component costs.

Any shortage or delay in the supply of key product components, or any sudden, unforeseen price increase for such components, would harm our ability to meet product deliveries as scheduled or as budgeted. Many of the semiconductors used in our products are obtained from sole source suppliers on a purchase order basis. In addition, some components that are used in all our products are obtained from limited sources. We also obtain switching fabric semiconductors, which are used in our Ethernet switches and Internet gateway products, and WiFi chipsets, which are used in all of our wireless products, from a limited number of suppliers. We also use Cable Modern chipsets and Mobile chipsets in our cable and mobile products. Semiconductor suppliers have experienced and continue to experience component shortages themselves, such as with lead-frames and substrates used in manufacturing chipsets, which in turn adversely impact our ability to procure semiconductors from them in sufficient quantities and in a timely manner. For example, we are currently experiencing chipset shortages for some of our switching products from two of our semiconductor suppliers who do not have enough wafer capacity to satisfy our demand, and this shortage may continue for the next several quarters. Our third-party manufacturers generally purchase these components on our behalf on a purchase order basis, and we do not have any guaranteed supply arrangements with our suppliers. If demand for a specific component increases, we may not be able to obtain an adequate number of that component in a timely manner, and prices to obtain such components may increase. In addition, if worldwide demand for the components increases significantly, the availability of these components could be limited and prices for such components may increase. For example, as the demand for automobiles has increased significantly over the last two years, our supplier of micro controller units, which are used in both automobile production and our power over ethernet switches, has been forced to prioritize supply to the automobile industry, leaving us short of supply on these key components and affecting our ability to produce enough power over ethernet switches to meet our forecasted demand in a timely manner. This has resulted in our ODM Partners redesigning our products to accept second source components which provide more flexibility but increases the overall cost. In the third quarter of 2021, Taiwan Semiconductor Manufacturing Company announced price increases of 10-20% on its chips, which has led to some of our chip suppliers correspondingly increasing the cost of their chips to us. Further, dependence on a sole source for certain key components of our products may allow such sole source suppliers to command increased leverage in negotiating prices and other terms of sale, which could adversely affect our profitability. As a result, we may be left with little choice but to accept such higher prices or other fees for key components in order to ensure continuity of supply. For example, we are currently experiencing price increases with certain suppliers and manufacturing partners and are negotiating price increases with certain other suppliers and manufacturing partners. This will affect our profitability or if we choose to push back against more onerous terms, could lead to inadequate supply, which could materially adversely affect our business. Our suppliers may also experience financial or other difficulties as a result of uncertain and weak worldwide economic and geopolitical conditions. Other factors which may affect our suppliers' ability or willingness to supply components to us include internal management product allocation decisions or reorganizational issues, such as roll-out of new equipment which may delay or disrupt supply of previously forecasted components, or industry consolidation and divestitures, which may result in changed business and product priorities among certain suppliers. Also, many standardized components used broadly in electronic devices are manufactured in significant quantities in concentrated geographic regions, particularly in Greater China. As a result, protracted crises, such as the COVID-19 pandemic, geopolitical unrest and uncertain economic conditions, could lead to eventual shortages of necessary components sourced from impacted regions or increased component costs. For example, as mentioned above in the risk factor "If disruptions in our transportation network occur or our shipping costs substantially increase, we may be unable to sell or timely deliver our products, and our net revenue and gross margin could decrease", we believe that continued COVID-19 related lockdowns in China constitutes our biggest risk for the remainder of 2022, due to the large concentration of electrical and mechanical components that go into our products that are manufactured there. Additionally, government intervention to curb the consumption of electricity in China could have a disruptive impact on component production and supply availability. It could be difficult, costly and time consuming to obtain alternative sources for these components, or to change product designs to make use of alternative components. In addition, difficulties in transitioning from an existing supplier to a new supplier could create delays in component availability that would have a significant impact on our ability to fulfill orders for our products.

We provide our third-party manufacturers with a rolling forecast of demand and purchase orders, which they use to determine our material and component requirements. Lead times for ordering materials and components vary significantly and depend on various factors, such as the specific supplier, contract terms and demand and supply for a component at a

given time. Some of our components have long lead times, such as WiFi chipsets, switching fabric chips, physical layer transceivers, and logic, power, analog and RF chipsets. If our forecasts are not timely provided or are less than our actual requirements, our third-party manufacturers may be unable to manufacture products in a timely manner. If our forecasts are too high, our third-party manufacturers will be unable to use the components they have purchased on our behalf. Historically, the cost of the components used in our products tends to drop rapidly as volumes increase and the technologies mature. Therefore, if our third-party manufacturers are unable to promptly use components purchased on our behalf, our cost of producing products may be higher than our competitors due to an oversupply of higher-priced components. Moreover, if they are unable to use components ordered at our direction, we will need to reimburse them for any losses they incur, which could be material. Beginning in fiscal year 2020, we experienced an elongation of the time from order placement to production primarily due to increased demand and the resulting component shortages and supply chain disruption brought about by the continued COVID-19 pandemic. We have responded by extending our ordering horizon to as long as 18 months. As a result, our exposure to the foregoing risks is greater and our potential liability for losses is greater relative to our more typical ordering horizon of up to 6 to 9 months.

If we are unable to obtain a sufficient supply of components, or if we experience any interruption in the supply of components, our product shipments could be reduced or delayed or our cost of obtaining these components may increase. Component shortages and delays affect our ability to meet scheduled product deliveries, damage our brand and reputation in the market, and cause us to lose sales and market share. For example, component shortages and disruptions in supply related to the COVID-19 induced lockdowns in Shenzhen, China and Shanghai, China have continued to limit our ability to supply all the worldwide demand for our SMB switch products, and our revenue and profitability has been and will continue to be affected. At times we have elected to purchase components on the spot market or to use more expensive transportation methods, such as air freight, to make up for manufacturing delays caused by component shortages, which reduces our margins.

# \* If we do not effectively manage our sales channel inventory and product mix, we may incur costs associated with excess inventory, or lose sales from having too few products.

If we are unable to properly monitor and manage our sales channel inventory and maintain an appropriate level and mix of products with our retail partners and wholesale distributors and within our sales channels, we may incur increased and unexpected costs associated with this inventory. We generally allow wholesale distributors and traditional retailers to return a limited amount of our products in exchange for other products. Under our price protection policy, if we reduce the list price of a product, we are often required to issue a credit in an amount equal to the reduction for each of the products held in inventory by our wholesale distributors and retailers. If our wholesale distributors and retailers are unable to sell their inventory in a timely manner, we might lower the price of the products, or these parties may exchange the products for newer products. Also, during the transition from an existing product to a new replacement product, we must accurately predict the demand for the existing and the new product. We determine production levels based on our forecasts of demand for our products. Actual demand for our products depends on many factors, which makes it difficult to forecast. We have experienced differences between our actual and our forecasted demand in the past and expect differences to arise in the future. If we improperly forecast demand for our products, we could end up with too many products and be unable to sell the excess inventory in a timely manner, if at all, or, alternatively we could end up with too few products and not be able to satisfy demand. This problem is exacerbated because we attempt to closely match inventory levels with product demand leaving limited margin for error. If we improperly forecast demand for our products, we could incur increased expenses associated with writing off excessive or obsolete inventory, lose sales, incur penalties for late delivery or have to ship products by air freight to meet immediate demand incurring incremental freight costs above the sea freight costs, a preferred method, and suffering a corresponding decline in gross margins. For example, demand for our Connected Home products for the first three quarters of 2022 turned out to be lower than we previously forecasted, and resulted in our revenue for our Connected Home products for the first three quarters of 2022 to come in lower than expected, as our channel partners in the U.S. are expected to replenish inventory slower than they sell it through to end users to right size their inventory carrying position based on the lower demand levels than were previously expected. More recently, many of our retail partners have announced further reductions in their target inventory levels beyond what they had previously communicated to us in 2022, which may lead to lower revenue and profitability for the Connected Home business than we expected for the fourth quarter of 2022 and into the 2023 fiscal year.

\* We rely on a limited number of traditional and online retailers, wholesale distributors and service provider customers for a substantial portion of our sales, and our net revenue could decline if they refuse to pay our requested prices or reduce their level of purchases, if there are unforeseen disruptions in their businesses, or if there is significant consolidation in our customer base that results in fewer customers for our products.

We sell a substantial portion of our products through traditional and online retailers, including Best Buy Co., Inc., Amazon.com, Inc. and their affiliates, wholesale distributors, including Ingram Micro, Inc. and TD Synnex, and service providers, such as AT&T. We expect that a significant portion of our net revenue will continue to come from sales to a small number of customers for the foreseeable future. In addition, because our accounts receivable are often concentrated with a small group of purchasers, the failure of any of them to pay on a timely basis, or at all, would reduce our cash flow. We are also exposed to increased credit risk if any one of these limited numbers of customers fails or becomes insolvent. We generally have no minimum purchase commitments or long-term contracts with any of these customers. These purchasers could decide at any time to discontinue, decrease or delay their purchases of our products. If our customers increase the size of their product orders without sufficient lead-time for us to process the order, our ability to fulfill product demands would be compromised. These customers have a variety of suppliers to choose from and therefore can make substantial demands on us, including demands on product pricing and on contractual terms, which often results in the allocation of risk to us as the supplier. Accordingly, the prices that they pay for our products are subject to negotiation and could change at any time. For example, as mentioned above in the risk factors "If disruptions in our transportation network occur or our shipping costs substantially increase, we may be unable to sell or timely deliver our products, and net revenue and our gross margin could decrease" and "We obtain several key components from limited or sole sources, and if these sources fail to satisfy our supply requirements or we are unable to properly manage our supply requirements with our third-party manufacturers, we may lose sales and experience increased component costs", we have experienced high freight costs and component costs. We provided notice of price increases to our customers that became effective during the first quarter of 2022, which may impact end user demand for our products and place us at a disadvantage to our competitors. Our ability to maintain strong relationships with our principal customers is essential to our future performance. If any of our major customers reduce their level of purchases or refuse to pay the prices that we set for our products, our net revenue and operating results could be harmed.

Furthermore, some of our customers are also our competitors in certain product categories, which could negatively influence their purchasing decisions. For example, Amazon owns Eero, one of our competitors in the mesh WiFi systems product category. Our traditional retail customers have faced increased and significant competition from online retailers, and some of these traditional retail customers have increasingly become a smaller portion of our business. If key retail customers continue to reduce their level of purchases, our business could be harmed. Similarly, we sell products and services directly to consumers from our own e-commerce platforms and expect these revenues to grow proportionate to overall revenue. Some of our customers, such as Amazon and Best Buy, may consider this to be competitive with their own businesses, which could negatively influence their purchasing decisions with respect to our products. Also, during the COVID-19 pandemic, some channel partners have prioritized the sale and delivery of other categories of products ahead of ours. Further, we believe the COVID-19 pandemic has led to an acceleration of the shift to a greater percentage of products being bought and sold online. If we are unable to adjust to this shift, this may lead to lower market share and lower revenues for us, and our net revenue and operating results could be harmed.

In addition, adverse changes in economic conditions or unforeseen disruptions in the businesses of any of our key customers could adversely impact the sale of our products to end users and the quantity of products our customers decide to purchase from us. For example, due to economic conditions, our customers have announced reductions in their target inventory. This shift may have a longer-term impact on the inventory levels these customers choose to carry.

Additionally, concentration and consolidation among our customer base may allow certain customers to command increased leverage in negotiating prices and other terms of sale, which could adversely affect our profitability. If, as a result of increased leverage, customer pressures require us to reduce our pricing such that our gross margins are diminished, we could decide not to sell our products to a particular customer, which could result in a decrease in our revenue. Consolidation among our customer base may also lead to reduced demand for our products, elimination of sales opportunities, replacement of our products with those of our competitors and cancellations of orders, each of which would harm our operating results. Consolidation among our service provider customers worldwide may also make it more difficult to grow our service provider business, given the fierce competition for the already limited number of service

providers worldwide and the long sales cycles to close deals. If consolidation among our customer base becomes more prevalent, our operating results may be harmed.

### \* Our sales and operations in international markets expose us to operational, financial and regulatory risks.

International sales comprise a significant amount of our overall net revenue. International sales were approximately 34% of overall net revenue in the third quarter of fiscal 2022 and approximately 35% of overall net revenue in fiscal 2021. We continue to be committed to growing our international sales, and while we have committed resources to expanding our international operations and sales channels, these efforts may not be successful. International operations are subject to a number of other risks, including:

- exchange rate fluctuations and inflation;
- political and economic instability, such as between Russia/Ukraine and China/Taiwan, international terrorism and anti-American sentiment, particularly in emerging markets;
- potential for violations of anti-corruption laws and regulations, such as those related to bribery and fraud;
- preference for locally branded products, and laws and business practices favoring local competition;
- changes in local tax and customs duty laws or changes in the enforcement, application or interpretation of such laws (including potential responses to the higher U.S. tariffs on certain imported products implemented by the U.S.);
- consequences of, and uncertainty related to, the "BREXIT" deal by the United Kingdom and the current transition, which could lead to additional expense and complexity in doing business there;
- increased difficulty in managing inventory and reduced inventory level targets;
- delayed revenue recognition;
- unpredictable judicial systems, which may unfairly favor domestic plaintiffs over foreign corporations, or which may more easily impose harsher penalties such as import injunctions;
- less effective protection of intellectual property;
- stringent consumer protection and product compliance regulations, including but not limited to the Restriction of Hazardous Substances directive, the Waste Electrical and Electronic Equipment directive and the European Ecodesign directive, or EuP, that are costly to comply with and may vary from country to country;
- difficulties and costs of staffing and managing foreign operations; and
- business difficulties, including potential bankruptcy or liquidation, of any of our worldwide third-party logistics providers.

While we believe we generally have good relations with our employees, employees in certain jurisdictions have rights which give them certain collective rights. If management must expend significant resources and effort to address and comply with these rights, our business may be harmed. We are also required to comply with local environmental legislation and our customers rely on this compliance in order to sell our products. If our customers do not agree with our interpretations and requirements of new legislation, they may cease to order our products and our revenue would be harmed.

\* Some of our competitors have substantially greater resources than we do, and to be competitive we may be required to lower our prices or increase our sales and marketing expenses, which could result in reduced margins or loss of market share and revenue.

We compete in a rapidly evolving and fiercely competitive market, and we expect competition to continue to be intense, including price competition. Our principal competitors in the consumer market include ARRIS, ASUS, AVM, Devolo, D-Link, Eero (owned by Amazon), Linksys (owned by Foxconn), Minim (owned by Motorola), Nest (owned by Google), Samsung, Synology and TP-Link. Our principal competitors in the business market include Allied Telesys, Barracuda, Buffalo, Cisco Systems, Dell, D-Link, Fortinet, Hewlett-Packard Enterprise, Palo Alto Networks, QNAP Systems, SonicWall, Synology, TP-Link, Ubiquiti and WatchGuard. Our principal competitors in the service provider market include Actiontec, Airties, Arcadyan, ARRIS, ASUS, AVM, Compal Broadband, D-Link, Eero (owned by Amazon), Franklin, Google, Hitron, Huawei, Inseego, Nokia, Plume, Sagem, Sercomm, SMC Networks, TechniColor, TP-Link, Ubee, ZTE and Zyxel. Other competitors include numerous local vendors such as Xiaomi in China, AVM in Germany and Buffalo in Japan. In addition, these local vendors may target markets outside of their local regions and may increasingly compete with us in other regions worldwide. Our potential competitors also include other consumer electronics vendors, including Apple, LG Electronics, Microsoft, Panasonic, Sony, Toshiba and Vizio, who could integrate networking and streaming capabilities into their line of products, such as televisions, set top boxes and gaming consoles, and our channel customers who may decide to offer self-branded networking products. We also face competition from service providers who may bundle a free networking device with their broadband service offering, which would reduce our sales if we were not the supplier of choice to those service providers. In the service provider space, we also face significant and increased competition from original design manufacturers, or ODMs, and contract manufacturers who sell and attempt to sell their products directly to service providers around the world.

Many of our existing and potential competitors have longer operating histories, greater name recognition and substantially greater financial, technical, sales, marketing and other resources. These competitors may, among other things, undertake more extensive marketing campaigns, adopt more aggressive pricing policies, obtain more favorable pricing from suppliers and manufacturers, and exert more influence on sales channels than we can. Certain of our significant competitors also serve as key sales and marketing channels for our products, potentially giving these competitors a marketplace advantage based on their knowledge of our business activities and/or their ability to negatively influence our sales opportunities. For example, Amazon provides an important sales channel for our products, but it also competes with us in the mesh WiFi systems product category through its subsidiary Eero. In addition, certain competitors may have different business models, such as integrated manufacturing capabilities, that may allow them to achieve cost savings and to compete on the basis of price. Other competitors may have fewer resources but may be more nimble in developing new or disruptive technology or in entering new markets. We anticipate that current and potential competitors will also intensify their efforts to penetrate our target markets. For example, in the past certain network security companies such as Symantec have introduced security routers for the home consumer market to compete with us and we believe that other network security companies may also seek to do the same. Price competition is intense in our industry in certain geographical regions and product categories. Many of our competitors in the service provider and retail spaces price their products significantly below our product costs in order to gain market share. Certain substantial competitors have business models that are more focused on customer acquisition and access to customer data rather than on financial return from product sales, and these competitors have the ability to provide sustained price competition to many of our products in the market. Average sales prices have declined in the past and may again decline in the future. These competitors may have more advanced technology, more extensive distribution channels, stronger brand names, greater access to shelf space in retail locations, bigger promotional budgets and larger customer bases than we do. In addition, many of these competitors leverage a broader product portfolio and offer lower pricing as part of a more comprehensive end-to-end solution which we may not have. These companies could devote more capital resources to develop, manufacture and market competing products than we could. Our competitors may acquire other companies in the market and leverage combined resources to gain market share. In some instances, our competitors may be acquired by larger companies with additional formidable resources, such as the purchase of ARRIS by CommScope, Eero by Amazon and Linksys by Foxconn. Additionally, in the case of Linksys, Foxconn is one of our main third-party manufacturing partners, which presents an additional risk if Foxconn decides to prioritize its interest in Linksys over its relationship with us. If any of these companies are successful in competing against us, our sales could decline, our margins could be negatively impacted and we could lose market share, any of which could seriously harm our business and results of operations

If we fail to continue to introduce or acquire new products and services that achieve broad market acceptance on a timely basis, we will not be able to compete effectively and we will be unable to increase or maintain net revenue and gross margins.

We operate in a highly competitive, quickly changing environment, and our future success depends on our ability to develop or acquire, and introduce new products and services that achieve broad market acceptance. Our future success will depend in large part upon our ability to identify demand trends in the consumer, business and service provider markets, and to quickly develop or acquire, and manufacture and sell products and services that satisfy these demands in a cost-effective manner. In order to differentiate our products from our competitors' products, we must continue to increase our focus and capital investment in research and development, including software development for our products and complementary services and applications. For example, we have committed a substantial amount of resources to the development, manufacture, marketing and sale of our Nighthawk mobile hotspot products and Orbi WiFi system, and to introducing additional and improved models in these lines. If these products do not continue to maintain or achieve widespread market acceptance, or if we are unsuccessful in capitalizing on other smart home market opportunities, our future growth may be slowed and our financial results could be harmed. Also, as the mix of our business increasingly includes new products and services that require additional investment, this shift may adversely impact our margins, at least in the near-term. For example, we are making significant investments in the development and introduction of our new WiFi 6 products and accompanying services, including marketing efforts to build awareness of the benefits of this next-generation WiFi standard and the importance of our services. Successfully predicting demand trends is difficult, and it is very difficult to predict the effect that introducing a new product will have on existing product sales. We will also need to respond effectively to new product announcements by our competitors by quickly introducing competitive products.

In addition, we have acquired companies and technologies in the past and as a result, have introduced new product lines in new markets. We may not be able to successfully manage integration of the new product lines with our existing products. Selling new product lines in new markets will require our management to learn different strategies in order to be successful. We may be unsuccessful in launching a newly acquired product line in new markets which requires management of new suppliers, potential new customers and new business models. Our management may not have the experience of selling in these new markets and we may not be able to grow our business as planned. For example, in August 2018, we acquired Meural Inc., a leader in digital platforms for visual art, to enhance our Connected Home product and service offerings. If we are unable to effectively and successfully further develop these new product lines, we may not be able to increase or maintain our sales and our gross margins may be adversely affected.

We have experienced delays and quality issues in releasing new products in the past, which resulted in lower quarterly net revenue than expected. In addition, we have experienced, and may in the future experience, product introductions that fall short of our projected rates of market adoption. Online Internet reviews of our products are increasingly becoming a significant factor in the success of our new product launches, especially in our Connected Home business segment. If we are unable to quickly respond to negative reviews, including end user reviews posted on various prominent online retailers, our ability to sell these products will be harmed. Any future delays in product development and introduction, or product introductions that do not meet broad market acceptance, or unsuccessful launches of new product lines could result in:

- loss of or delay in revenue and loss of market share;
- negative publicity and damage to our reputation and brand;
- a decline in the average selling price of our products;
- adverse reactions in our sales channels, such as reduced shelf space, reduced online product visibility, or loss of sales channels; and
- increased levels of product returns.

Throughout the past few years, we have significantly increased the rate of our new product introductions. If we cannot sustain that pace of product introductions, either through rapid innovation or acquisition of new products or product lines, we may not be able to maintain or increase the market share of our products. In addition, if we are unable to successfully introduce or acquire new products with higher gross margins, or if we are unable to improve the margins on our previously introduced and rapidly growing product lines, our net revenue and overall gross margin would likely decline.

\* We depend on a limited number of third-party manufacturers for substantially all of our manufacturing needs. If these third-party manufacturers experience any delay, disruption or quality control problems in their operations, we could lose revenue and our brand may suffer.

All of our products are manufactured, assembled, tested and generally packaged by a limited number of third-party manufacturers, including original design manufacturers, or ODMs, as well as their sub-contract manufacturers. In most cases, we rely on these manufacturers to procure components and, in some cases, subcontract engineering work. Some of our products are manufactured by a single manufacturer. We do not have any long-term contracts with any of our third-party manufacturers. Some of these third-party manufacturers or are themselves competitors in certain product categories. Due to changing economic conditions, the viability of some of these third-party manufacturers may be at risk. The loss of the services of any of our primary third-party manufacturers could cause a significant disruption in operations and delays in product shipments. Qualifying a new manufacturer and commencing volume production is expensive and time consuming. Ensuring that a manufacturer is qualified to manufacture our products to our standards is time consuming. In addition, there is no assurance that a manufacturer can scale its production of our products at the volumes and in the quality that we require. In addition, as we recently have transitioned a substantial portion of our manufacturing facilities to different regions, we are subject to additional significant challenges in ensuring that quality, processes and costs, among other issues, are consistent with our expectations. For example, while we expect our manufacturers to be responsible for penalties assessed on us because of excessive failures of the products, there is no assurance that we will be able to collect such reimbursements from these manufacturers, which causes us to take on additional risk for potential failures of our products.

Our reliance on third-party manufacturers also exposes us to the following risks over which we have limited control:

- unexpected increases in manufacturing and repair costs;
- inability to control the quality and reliability of finished products;
- inability to control delivery schedules;
- potential liability for expenses incurred by third-party manufacturers in reliance on our forecasts that later prove to be inaccurate, including the cost of components purchased by third-party manufacturers on our behalf, which may be material:
- · potential lack of adequate capacity to manufacture all or a part of the products we require; and
- potential labor unrest affecting the ability of the third-party manufacturers to produce our products.

All of our products must satisfy safety and regulatory standards and some of our products must also receive government certifications. Our third-party manufacturers are primarily responsible for conducting the tests that support our applications for most regulatory approvals for our products. If our third-party manufacturers fail to timely and accurately conduct these tests, we would be unable to obtain the necessary domestic or foreign regulatory approvals or certificates to sell our products in certain jurisdictions. As a result, we would be unable to sell our products and our sales and profitability could be reduced, our relationships with our sales channel could be harmed, and our reputation and brand would suffer.

Specifically, substantially all of our manufacturing and assembly occurs in the Asia Pacific region, and any disruptions due to natural disasters, climate change, health epidemics and political, social and economic instability in the region would affect the ability of our third-party manufacturers to manufacture our products. For example, in late August

2021, heavy rains caused our manufacturer in Thailand to become flooded and created a one-month delay in manufacturing and required us to move some non-U.S. manufacturing back to China. Moreover, the COVID-19 pandemic has led to the temporary closure of many factories, businesses, schools and public spaces, as well as travel restrictions impacting the movement of people and goods, most recently in Southeast Asia and in particular northern Vietnam and Thailand, where a significant portion of our products are manufactured. In December 2021, one of our manufacturers had to shut down its factory in Haiphong, Vietnam due to a COVID-19 outbreak and when it reopened one week later, had to operate with less than a quarter of its staff. This led to a material loss of revenue in the fourth quarter of 2021. If these closures and restrictions continue for a substantial period of time, they may disrupt important elements of our supply chain, including the operation of our third-party manufacturing facilities and other key service providers, the availability of labor, and the supply of necessary components. If the cost of production charged by our third-party manufacturers increases, it may affect our margins and ability to lower prices for our products to stay competitive. For example, we are currently experiencing price increases with certain of our manufacturing partners and are negotiating price increases with certain other of our manufacturing partners. Labor unrest in Southeast Asia, China or other locations where components and our products are manufactured may also affect our third-party manufacturers as workers may strike and cause production delays. If our third-party manufacturers fail to maintain good relations with their employees or contractors, and production and manufacturing of our products is affected, then we may be subject to shortages of products and quality of products delivered may be affected. Further, if our manufacturers or warehousing facilities are disrupted or destroyed, we would have no other re

In our typical ODM arrangement, our ODMs are generally responsible for sourcing the components of the products and warranting that the products will work against a product's specification, including any software specifications. If we needed to move to a contract manufacturing arrangement, we would take on much more, if not all, of the responsibility around these areas. If we are unable to properly manage these risks, our products may be more susceptible to defects and our business would be harmed.

# \* Changes in trade policy in the United States and other countries, including the imposition of tariffs and the resulting consequences, may adversely impact our business, results of operations and financial condition.

The prior U.S. administration altered the approach to international trade policy through the renegotiation, and potential termination, of certain existing bilateral or multi-lateral trade agreements and treaties with, and the imposition of tariffs on a wide range of products and other goods from, a number of countries. In particular, the U.S. government engaged in extended trade negotiations with China, which resulted in the implementation of tariffs on a significant number of products manufactured in China and imported into the United States. We worked closely with our manufacturing partners to implement ways to mitigate the impact of these tariffs on our supply chain as promptly and reasonably as practicable, including shifting production outside of China. Recently, there has been some discussion by the current administration to amend or reverse the tariff policies enacted by the prior administration; however, this process is ongoing and there is no certainty that they will do so. Actions to mitigate the effect of these tariffs are disruptive on our operations, may not be completely successful and may result in higher long-term manufacturing costs. Moreover, there is no certainty that countries to which we have shifted our manufacturing operations will not be subject to similar tariffs in the future. As a result, we may be required to raise our prices on certain products, which could result in the loss of customers and harm to our revenue, market share, competitive position and operating performance.

Additionally, the imposition of tariffs is dependent upon the classification of items under the Harmonized Tariff System ("HTS") and the country of origin of the item. Determination of the HTS and the origin of the item is a technical matter that can be subjective in nature. Accordingly, although we believe our classifications of both HTS and origin are appropriate, there is no certainty that the U.S. government will agree with us. If the U.S. government does not agree with our determinations, we could be required to pay additional amounts, including potential penalties, and our profitability would be adversely impacted.

### \* We expect our operating results to fluctuate on a quarterly and annual basis, which could cause our stock price to fluctuate or decline.

Our operating results are difficult to predict and may fluctuate substantially from quarter-to-quarter or year-to-year for a variety of reasons, many of which are beyond our control. If our actual results were to fall below our estimates or the

expectations of public market analysts or investors, our quarterly and annual results would be negatively impacted and the price of our stock could decline. Other factors that could affect our quarterly and annual operating results include those listed in the risk factors section of this report and others such as:

- operational disruptions, such as transportation delays or failure of our order processing system, particularly if they occur at the end of a fiscal quarter;
- component supply constraints, including specialized WiFi 6 chipsets, or sudden, unforeseen price increases from our manufacturers, suppliers and vendors;
- unanticipated increases in costs, including air and ocean freight, associated with shipping and delivery of our products;
- the inability to maintain stable operations by our suppliers, distribution centers and other parties with which we have commercial relationships;
- the duration and impact of the COVID-19 pandemic and macroeconomic conditions, particularly on our supply chain, our channel partners and our end market sales;
- · seasonal shifts in end market demand for our products, particularly in our Connected Home business segment;
- our inability to accurately forecast product demand or optimal product mix such as the proportion of lower-priced products versus super premium products resulting in increased inventory exposure and/or lost sales;
- unfavorable level of inventory and turns;
- changes in or consolidation of our sales channels and wholesale distributor relationships or failure to manage our sales channel inventory and warehousing requirements;
- unanticipated decreases or delays in purchases of our products by our significant traditional and online retail customers;
- shift in overall product mix sales from higher to lower gross margin products, from lower-priced products to super premium products, or from one business segment to another, that would adversely impact our revenue and gross margins;
- an increase in price protection claims, redemptions of marketing rebates, product warranty and stock rotation returns or allowance for doubtful accounts;
- delay or failure to fulfill orders for our products on a timely basis;
- changes in the pricing policies of or the introduction of new products by us or our competitors;
- unexpected challenges or delays in our ability to further develop services and applications that complement our products and result in meaningful subscriber growth and future recurring revenue;
- discovery or exploitation of security vulnerabilities in our products, services or systems, leading to negative publicity, decreased demand or
  potential liability, including potential breach of our customers' data privacy or disruption of the continuous operation of our cloud infrastructure
  and our products;
- introductions of new technologies and changes in consumer preferences that result in either unanticipated or unexpectedly rapid product category shifts;

- slow or negative growth in the networking product, personal computer, Internet infrastructure, smart home, home electronics and related technology markets;
- delays in the introduction of new products by us or market acceptance of these products;
- delays in regulatory approvals or consumer adoption of WiFi 6E technology in various regions;
- increases in expenses related to the development, introduction and marketing of new products that adversely impact our margins;
- increases in expenses related to the development and marketing related to the Company's direct online sales channels that adversely impact our margins;
- changes in tax rates or adverse changes in tax laws that expose us to additional income tax liabilities;
- changes in U.S. and international trade policy that adversely affect customs, tax or duty rates;
- foreign currency exchange rate fluctuations in the jurisdictions where we transact sales and expenditures in local currency;
- unanticipated increases in expenses related to periodic restructuring measures undertaken to achieve profitability and other business goals, including the reallocation or relocation of resources;
- delay or failure of our service provider customers to purchase at their historic volumes or at the volumes that they or we forecast;
- litigation involving alleged patent infringement, consumer class actions, securities class actions or other claims that could negatively impact our reputation, brand, business and financial condition;
- disruptions or delays related to our financial and enterprise resource planning systems;
- allowance for doubtful accounts exposure with our existing retailers, distributors and other channel partners and new retailers, distributors and other channel partners, particularly as we expand into new international markets;
- geopolitical disruption, including sudden changes in immigration policies and economic sanctions, leading to disruption in our workforce or delay or even stoppage of our operations in manufacturing, transportation, technical support and research and development;
- terms of our contracts with customers or suppliers that cause us to incur additional expenses or assume additional liabilities;
- epidemic or widespread product failure, performance problems or unanticipated safety issues in one or more of our products that could negatively
  impact our reputation, brand and business;
- · any changes in accounting rules;
- · challenges associated with integrating acquisitions that we make, or with realizing value from our strategic investments in other companies;

- failure to effectively manage our third-party customer support partners, which may result in customer complaints and/or harm to our brand;
- our inability to monitor and ensure compliance with our code of ethics, our anti-corruption compliance program and domestic and international anti-corruption laws and regulations, whether in relation to our employees or with our suppliers or customers;
- labor unrest at facilities managed by our third-party manufacturers;
- workplace or human rights violations in certain countries in which our third-party manufacturers or suppliers operate, which may affect our brand and negatively affect our products' acceptance by consumers;
- · unanticipated shifts or declines in profit by geographical region that would adversely impact our tax rate; and
- our failure to implement and maintain the appropriate internal controls over financial reporting which may result in restatements of our financial statements.

As a result, period-to-period comparisons of our operating results may not be meaningful, and you should not rely on them as an indication of our future performance.

We depend substantially on our sales channels, and our failure to maintain and expand our sales channels would result in lower sales and reduced net revenue.

To maintain and grow our market share, net revenue and brand, we must maintain and expand our sales channels. Our sales channels consist of traditional retailers, online retailers, DMRs, VARs, and broadband service providers. Some of these entities purchase our products through our wholesale distributor customers. We generally have no minimum purchase commitments or long-term contracts with any of these third parties.

Traditional retailers have limited shelf space and promotional budgets, and competition is intense for these resources. If the networking sector does not experience sufficient growth, retailers may choose to allocate more shelf space to other consumer product sectors and may choose to reduce their inventory levels. A competitor with more extensive product lines and stronger brand identity may have greater bargaining power with these retailers. Any reduction in available shelf space or inventory levels or increased competition for such shelf space would require us to increase our marketing expenditures simply to maintain current levels of retail shelf space and inventory levels, which would harm our operating margin. Our traditional retail customers have faced increased and significant competition from online retailers. Further, the COVID-19 pandemic has accelerated the shift to a greater percentage of purchases taking place online versus traditional retail customers. If we cannot effectively manage our business amongst our online customers and traditional retail customers, our business would be harmed. The recent trend in the consolidation of online retailers and DMR channels has resulted in intensified competition for preferred product placement, such as product placement on an online retailer's Internet home page. Expanding our presence in the VAR channel may be difficult and expensive. We compete with established companies that have longer operating histories and longstanding relationships with VARs that we would find highly desirable as sales channel partners. In addition, our efforts to realign or consolidate our sales channels may cause temporary disruptions in our product sales and revenue, and these changes may not result in the expected longer-term benefits. Recently, we have begun to sell products and services directly to consumers from our own e-commerce platforms. This has required a material investment in capital, time and resources and carries the risk that it may not achieve the expected return o

We also sell products to broadband service providers. Competition for selling to broadband service providers is fierce and intense. Penetrating service provider accounts typically involves a long sales cycle and the challenge of displacing incumbent suppliers with established relationships and field-deployed products. If we are unable to maintain and expand our sales channels, our growth would be limited and our business would be harmed.

We must also continuously monitor and evaluate emerging sales channels. If we fail to establish a presence in an important developing sales channel, such as sales directly to consumers from our own e-commerce platforms, our business could be harmed.

We depend on large, recurring purchases from certain significant customers, and a loss, cancellation or delay in purchases by these customers could negatively affect our revenue.

The loss of recurring orders from any of our more significant customers could cause our revenue and profitability to suffer. Our ability to attract new customers will depend on a variety of factors, including the cost-effectiveness, reliability, scalability, breadth and depth of our products. In addition, a change in the mix of our customers, or a change in the mix of direct and indirect sales, could adversely affect our revenue and gross margins.

Although our financial performance may depend on large, recurring orders from certain customers and resellers, we do not generally have binding commitments from them. For example:

- our reseller agreements generally do not require substantial minimum purchases;
- our customers can stop purchasing and our resellers can stop marketing our products at any time; and
- our reseller agreements generally are not exclusive.

Further, our revenue may be impacted by significant one-time purchases which are not contemplated to be repeatable. While such purchases are reflected in our financial statements, we do not rely on and do not forecast for continued significant one-time purchases. As a result, lack of repeatable one-time purchases will adversely affect our revenue.

Because our expenses are based on our revenue forecasts, a substantial reduction or delay in sales of our products to, or unexpected returns from, customers and resellers, or the loss of any significant customer or reseller, could harm or otherwise have a negative impact to our operating results. Although our largest customers may vary from period to period, we anticipate that our operating results for any given period will continue to depend on large orders from a small number of customers.

# \* If we fail to overcome the challenges associated with managing our broadband service provider sales channel, our net revenue and gross profit will be negatively impacted.

We sell a significant number of products through broadband service providers worldwide. However, the service provider sales channel is challenging and exceptionally competitive. Difficulties and challenges in selling to service providers include a longer sales cycle, more stringent product testing and validation requirements, a higher level of customization demands, requirements that suppliers take on a larger share of the risk with respect to contractual business terms, competition from established suppliers, pricing pressure resulting in lower gross margins, and irregular and unpredictable ordering habits. For example, rigorous service provider certification processes may delay our sale of new products, or our products ultimately may fail these tests. In either event, we may lose some or all of the amounts we expended in trying to obtain business from the service provider, as well as lose the business opportunity altogether. In addition, even if we have a product which a service provider customer may wish to purchase, we may choose not to supply products to the potential service provider customer if the contract requirements, such as service level requirements, penalties, and liability provisions, are too onerous. Accordingly, our business may be harmed and our revenues may be reduced. We have, in exceptional limited circumstances, while still in contract negotiations, shipped products in advance of and subject to agreement on a definitive contract. We do not record revenue from these shipments until a definitive contract exists. There is risk that we do not ultimately close and sign a definitive contract. If this occurs, the timing of revenue recognition is uncertain and our business would be harmed. In addition, we often commence building custom-made products prior to execution of a contract in order to meet the customer's contemplated launch dates and requirements. Service provider products are generally custom-made for a specific customer and may not be scalable to other custom-made products or rework the

Further, successful engagements with service provider customers requires a constant analysis of technology trends. If we are unable to anticipate technology trends and service provider customer product needs, and to allocate research and development resources to the right projects, we may not be successful in continuing to sell products to service provider customers. In addition, because our service provider customers command significant resources, including for software support, and demand extremely competitive pricing, certain ODMs have declined to develop service provider products on an ODM basis. Accordingly, as our ODMs increasingly limit development of our service provider products, our service provider business will be harmed if we cannot replace this capability with alternative ODMs or in-house development.

Orders from service providers generally tend to be large but sporadic, which causes our revenues from them to fluctuate and challenges our ability to accurately forecast demand from them. In particular, managing inventory and production of our products for our service provider customers is a challenge and may be further exacerbated by current macroeconomic uncertainties and geopolitical instability. Many of our service provider customers have irregular purchasing requirements. These customers may decide to cancel orders for customized products specific to that customer, and we may not be able to reconfigure and sell those products in other channels. These cancellations could lead to substantial write-offs. In addition, these customers may issue unforecasted orders for products which we may not be able to produce in a timely manner and as such, we may not be able to accept and deliver on such unforecasted orders. In certain cases, we may commit to fixed-price, long term purchase orders, with such orders priced in foreign currencies which could lose value over time in the event of adverse changes in foreign exchange rates. Even if we are selected as a supplier, typically a service provider will also designate a second source supplier, which over time will reduce the aggregate orders that we receive from that service provider. Further, as the technology underlying our products deployed by broadband service providers matures and more competitors offer alternative products with similar technology, we anticipate competing in an extremely price sensitive market and our margins may be affected. If we are unable to introduce new products with sufficiently advanced technology to attract service provider interest in a timely manner, our service provider customers may then require us to lower our prices, or they may choose to purchase products from our competitors. If this occurs, our business would be harmed and our revenues would be reduced.

If we were to lose a service provider customer for any reason, we may experience a material and immediate reduction in forecasted revenue that may cause us to be below our net revenue and operating margin expectations for a particular period of time and therefore adversely affect our stock price. For example, many of our competitors in the service provider space aggressively price their products in order to gain market share. We may not be able to match the lower prices offered by our competitors, and we may choose to forgo lower-margin business opportunities. Many of the service provider customers will seek to purchase from the lowest cost provider, notwithstanding that our products may be higher quality or that our products were previously validated for use on their proprietary network. Accordingly, we may lose customers who have lower, more aggressive pricing, and our revenues may be reduced. In addition, service providers may choose to prioritize the implementation of other technologies or the roll out of other services than home networking. Weakness in orders from this industry could have a material adverse effect on our business, operating results, and financial condition. We have seen slowdowns in capital expenditures by certain of our service provider customers in the past and believe there may be potential for similar slowdowns in the future. Any slowdown in the general economy, over supply, consolidation among service providers, regulatory developments and constraint on capital expenditures could result in reduced demand from service providers and therefore adversely affect our sales to them. If we do not successfully overcome these challenges, we will not be able to profitably manage our service provider sales channel and our financial results will be harmed.

The average selling prices of our products typically decrease rapidly over the sales cycle of the product, which may negatively affect our net revenue and gross margins.

Our products typically experience price erosion, a fairly rapid reduction in the average unit selling prices over their respective sales cycles. In order to sell products that have a falling average unit selling price and maintain margins at the same time, we need to continually reduce product and manufacturing costs. To manage manufacturing costs, we must collaborate with our third-party manufacturers to engineer the most cost-effective design for our products. In addition, we must carefully manage the price paid for components used in our products. We must also successfully manage our freight and inventory costs to reduce overall product costs. We also need to continually introduce new products with higher sales prices and gross margins in order to maintain our overall gross margins. If we are unable to manage the cost of older products or successfully introduce new products with higher gross margins, our net revenue and overall gross margin would likely decline.

As part of growing our business, we have made and expect to continue to make acquisitions. If we fail to successfully select, execute or integrate our acquisitions, then our business and operating results could be harmed and our stock price could decline.

From time to time, we will undertake acquisitions to add new product lines and technologies, gain new sales channels or enter into new sales territories. For example, in August 2018, we acquired Meural Inc., a leader in digital platforms for visual art, to enhance our Connected Home product and service offerings. Acquisitions involve numerous risks and challenges, including but not limited to the following:

- integrating the companies, assets, systems, products, sales channels and personnel that we acquire;
- higher than anticipated acquisition and integration costs and expenses;
- reliance on third parties to provide transition services for a period of time after closing to ensure an orderly transition of the business;
- growing or maintaining revenues to justify the purchase price and the increased expenses associated with acquisitions;
- entering into territories or markets with which we have limited or no prior experience;
- establishing or maintaining business relationships with customers, vendors and suppliers who may be new to us;
- overcoming the employee, customer, vendor and supplier turnover that may occur as a result of the acquisition;
- disruption of, and demands on, our ongoing business as a result of integration activities including diversion of management's time and attention from running the day-to-day operations of our business;
- inability to implement uniform standards, disclosure controls and procedures, internal controls over financial reporting and other procedures and policies in a timely manner;
- inability to realize the anticipated benefits of or successfully integrate with our existing business the businesses, products, technologies or personnel that we acquire; and
- potential post-closing disputes.

As part of undertaking an acquisition, we may also significantly revise our capital structure or operational budget, such as issuing common stock that would dilute the ownership percentage of our stockholders, assuming liabilities or debt, utilizing a substantial portion of our cash resources to pay for the acquisition or significantly increasing operating expenses. Our acquisitions have resulted and may in the future result in charges being taken in an individual quarter as well as future periods, which results in variability in our quarterly earnings. In addition, our effective tax rate in any particular quarter may also be impacted by acquisitions. Following the closing of an acquisition, we may also have disputes with the seller regarding contractual requirements and covenants. Any such disputes may be time consuming and distract management from other aspects of our business. In addition, if we increase the pace or size of acquisitions, we will have to expend significant management time and effort into the transactions and the integrations and we may not have the proper human resources bandwidth to ensure successful integrations and accordingly, our business could be harmed.

As part of the terms of acquisition, we may commit to pay additional contingent consideration if certain revenue or other performance milestones are met. We are required to evaluate the fair value of such commitments at each reporting date and adjust the amount recorded if there are changes to the fair value.

We cannot ensure that we will be successful in selecting, executing and integrating acquisitions. Failure to manage and successfully integrate acquisitions could materially harm our business and operating results. In addition, if stock market analysts or our stockholders do not support or believe in the value of the acquisitions that we choose to undertake, our stock price may decline.

### \* We invest in companies for both strategic and financial reasons, but may not realize a return on our investments.

We have made, and continue to seek to make, investments in companies around the world to further our strategic objectives and support our key business initiatives. These investments may include equity or debt instruments of public or private companies, and may be non-marketable at the time of our initial investment. We do not restrict the types of companies in which we seek to invest. These companies may range from early-stage companies that are often still defining their strategic direction to more mature companies with established revenue streams and business models. If any company in which we invest fails, we could lose all or part of our investment in that company. If we determine that an other-than-temporary decline in the fair value exists for an equity or debt investment in a public or private company in which we have invested, we will have to write down the investment to its fair value and recognize the related write-down as an investment loss. The performance of any of these investments could result in significant impairment charges and gains (losses) on investments. In the first half of 2022, we recognized a net investment loss of \$0.5 million on our privately held investments. We must also analyze accounting and legal issues when making these investments. If we do not structure these investments properly, we may be subject to certain adverse accounting issues, such as potential consolidation of financial results.

Furthermore, if the strategic objectives of an investment have been achieved, or if the investment or business diverges from our strategic objectives, we may seek to dispose of the investment. Our non-marketable equity investments in private companies are not liquid, and we may not be able to dispose of these investments on favorable terms or at all. The occurrence of any of these events could harm our results. Gains or losses from equity securities could vary from expectations depending on gains or losses realized on the sale or exchange of securities and impairment charges related to debt instruments as well as equity and other investments.

### Expansion of our operations and infrastructure may strain our operations and increase our operating expenses.

We have expanded our operations and are pursuing market opportunities both domestically and internationally in order to grow our sales. This expansion has required enhancements to our existing management information systems, and operational and financial controls. In addition, if we continue to grow, our expenditures would likely be significantly higher than our historical costs. We may not be able to install adequate controls in an efficient and timely manner as our business grows, and our current systems may not be adequate to support our future operations. The difficulties associated with installing and implementing new systems, procedures and controls may place a significant burden on our management, operational and financial resources. In addition, if we grow internationally, we will have to expand and enhance our communications infrastructure. If we fail to continue to improve our management information systems, procedures and financial controls or encounter unexpected difficulties during expansion and reorganization, our business could be harmed.

For example, we have invested, and will continue to invest, significant capital and human resources in the design and enhancement of our financial and enterprise resource planning systems, which may be disruptive to our underlying business. We depend on these systems in order to timely and accurately process and report key components of our results of operations, financial position and cash flows. If the systems fail to operate appropriately or we experience any disruptions or delays in enhancing their functionality to meet current business requirements, our ability to fulfill customer orders, bill and track our customers, fulfill contractual obligations, accurately report our financials and otherwise run our business could be adversely affected. Even if we do not encounter these adverse effects, the enhancement of systems may be much more costly than we anticipated. If we are unable to continue to enhance our information technology systems as planned, our financial position, results of operations and cash flows could be negatively impacted.

### Risks Related to Our Products, Technology and Intellectual Property

\* Product security vulnerabilities, system security risks, data protection breaches and cyber-attacks could disrupt our products, services, internal operations or information technology systems, and any such disruption could increase our expenses, damage our reputation, harm our business and adversely affect our stock price.

Our products and services may contain unknown security vulnerabilities. For example, the firmware, software and open source software that we or our manufacturing partners have installed on our products may be susceptible to hacking or misuse. We devote considerable time and resources to uncovering and remedying these vulnerabilities, using both internal and external resources, but the threats to network and data security are increasingly diverse and sophisticated. While we have not seen an increase in cyberattacks since Russia's invasion of Ukraine, we have implemented additional

protections and increased our monitoring and threat intelligence. Despite our efforts and processes to prevent breaches, our devices are potentially vulnerable to cybersecurity risks, including cyber-attacks such as viruses and worms, vulnerabilities such as command injection, cross site scripting, authentication and session management, and stack-based buffer overflow, and other sophisticated attacks or exploits. It is also possible that an attacker could compromise our internal code repository or those of our partners and insert a 'backdoor' that would give them easy access to any of our devices using this code. This particular kind of attack is very sophisticated, relatively new, and hard to defend against. We may not be able to discover these vulnerabilities, and we may not be able to remedy these vulnerabilities in a timely manner, or at all, which may impact our brand and reputation and harm our business. These attacks could lead to interruptions, delays, loss of critical data, unauthorized access to user data, and loss of consumer confidence. If successful, these attacks could adversely affect our business, operating results, and financial condition, be expensive to remedy, and damage our reputation. In addition, any such breaches may result in negative publicity, adversely affect our brand, decrease demand for our products and services, and adversely affect our operating results and financial condition. Further, under certain circumstances, we may need to prioritize fixing these vulnerabilities over new product development, which may impact our revenues and adversely affect our business.

In addition, we offer a comprehensive online cloud management service paired with a number of our products. If malicious actors compromise this cloud service, or if customer confidential information is accessed without authorization, our business would be harmed. Operating an online cloud service is a relatively new business for us and we may not have the expertise to properly manage risks related to data security and systems security. In addition, we make our products available for purchase directly by consumers through our website. We rely on third-party providers for a number of critical aspects of our cloud services, e-commerce site and customer support, including web hosting services, billing and payment processing, and consequently we do not maintain direct control over the security or stability of the associated systems.

Maintaining the security of our computer information systems and communication systems is a critical issue for us and our customers. Malicious actors may develop and deploy malware that is designed to manipulate our products and systems, including our internal network, or those of our vendors or customers. Additionally, outside parties may attempt to fraudulently induce our employees to disclose sensitive information in order to gain access to our information technology systems, our data or our customers' data. We have established a crisis management plan and business continuity program. While we regularly test the plan and the program, there can be no assurance that the plan and program can withstand an actual or serious disruption in our business, including a data protection breach or cyber-attack. While we have established infrastructure and geographic redundancy for our critical systems, our ability to utilize these redundant systems requires further testing and we cannot be assured that such systems are fully functional. For example, much of our order fulfillment process is automated and the order information is stored on our servers. A significant business interruption could result in losses or damages and harm our business. As a result of the COVID-19 pandemic, discussed further in the risk factor "The COVID-19 pandemic could materially adversely affect our financial condition and results of operations," above, most of our major offices worldwide have enacted shelter-in-place measures, with employees working from home or engaging in hybrid work. These working from home arrangements present additional cybersecurity risks, including potential increases in malware and phishing attacks, greater challenges to secure home office data, and potential service degradation or disruption to key internal business applications and third-party services. Although we have taken measures to address these risks, they present challenges that could impact business operations and could cause recovery times to increase. If our computer systems and servers become unavailable at the end of a fiscal quarter, our ability to recognize revenue may be delayed until we are able to utilize back-up systems and continue to process and ship our orders. This could cause our stock price to decline significantly.

We devote considerable internal and external resources to network security, data encryption and other security measures to protect our systems and customer data, but these security measures cannot provide absolute security. In addition, many countries and jurisdictions strictly regulate data privacy and protection and may impose significant penalties for failure to comply with these requirements. For example, the European Union's General Data Protection Regulation ("GDPR"), which became effective in May 2018, has required us to expend significant time and resources to maintain compliance. Data Protection Authorities in Europe have aggressively enforced the GDPR and have issued heavy fines for non-compliance against a broad range of companies. The State of California has enacted the California Consumer Privacy Act of 2018 ("CCPA"), which became effective in January 2020. On November 3, 2020, California passed the California Privacy Rights Act ("CPRA"), which will become effective on January 1, 2023. The CCPA establishes a privacy framework for covered businesses, including an expansive definition of personal information and data privacy rights for

California residents. The CCPA includes potentially severe statutory damages and private rights of action. The CCPA requires covered companies to provide new disclosures to California consumers (as broadly defined in the CCPA), provide such consumers new ways to opt-out of certain sales of personal information, and allow for a new cause of action for data breaches. The CPRA amends and augments the CCPA by expanding the rights of individuals and the obligations of businesses that handle personal data. California's privacy framework exemplifies the vulnerability of our business not only to cyber threats but also the evolving regulatory environment related to personal data. In the United States, in addition to California, other states have started passing similar privacy laws. In addition, the United States Congress is also considering passing a federal privacy law. This trend towards more privacy legislation in the United States and globally will likely increase our compliance costs and potential liability.

Compliance with these and any other applicable privacy and data security laws and regulations is a rigorous and time-intensive process, and we may be required to put in place additional mechanisms ensuring compliance with the new data protection rules. If we fail to comply with any such laws or regulations, we may face significant fines and penalties that could adversely affect our business, financial condition and results of operations. Furthermore, the laws are not consistent, and compliance in the event of a widespread data breach is costly.

Potential breaches of our security measures and the accidental loss, inadvertent disclosure or unapproved dissemination of proprietary information or sensitive or confidential data about us, our employees or our customers, including the potential loss or disclosure of such information or data as a result of employee error or other employee actions, hacking, fraud, social engineering or other forms of deception, could expose us, our customers or the individuals affected to a risk of loss or misuse of this information, result in litigation and potential liability for us, subject us to significant governmental fines, damage our brand and reputation, or otherwise harm our business. In addition, the cost and operational consequences of implementing further data protection measures could be significant. With new proposed laws, regulations and industry standards relating to privacy and data protection continuously being introduced, we cannot presently determine the impact such laws, regulations and standards will have on our business. In any event, it is possible that governmental authorities will conclude that our business practices do not comply with current or future statutes, regulations, agency guidance or case law involving applicable healthcare or privacy laws, including the GDPR, in light of the lack of applicable precedent and regulations.

Our management has spent increasing amounts of time, effort and expense in this area, and in the event of the discovery of a significant product or system security vulnerability, we would incur additional substantial expenses and our business would be harmed. If we or our third-party providers are unable to successfully prevent breaches of security relating to our products, services, systems or customer private information, including customer personal identification information, or if these third-party systems failed for other reasons, it could result in litigation and potential liability for us, damage our brand and reputation, or otherwise harm our business.

We rely upon third parties for technology that is critical to our products, and if we are unable to continue to use this technology and future technology, our ability to develop, sell, maintain and support technologically innovative products would be limited.

We rely on third parties to obtain non-exclusive patented hardware and software license rights in technologies that are incorporated into and necessary for the operation and functionality of most of our products. In these cases, because the intellectual property we license is available from third parties, barriers to entry into certain markets may be lower for potential or existing competitors than if we owned exclusive rights to the technology that we license and use. Moreover, if a competitor or potential competitor enters into an exclusive arrangement with any of our key third-party technology providers, or if any of these providers unilaterally decide not to do business with us for any reason, our ability to develop and sell products containing that technology would be severely limited. If we are shipping products that contain third-party technology that we subsequently lose the right to license, then we will not be able to continue to offer or support those products. In addition, these licenses often require royalty payments or other consideration to the third-party licensor. Our success will depend, in part, on our continued ability to access these technologies, and we do not know whether these third-party technologies will continue to be licensed to us on commercially acceptable terms, if at all. If we are unable to license the necessary technology, we may be forced to acquire or develop alternative technology of lower quality or performance standards, which would limit and delay our ability to offer new or competitive products and increase our costs of production. As a result, our revenue, margins, market share, and operating results could be significantly harmed.

We also utilize third-party software development companies to develop, customize, maintain and support software that is incorporated into our products. For example, we license software from Bitdefender for our NETGEAR Armor cybersecurity services offering and we license software from Circle Media Labs, Inc., a wholly owned subsidiary of Aura, for our parental controls service offering. If these companies fail to timely deliver or continuously maintain and support the software, as we require of them, we may experience delays in releasing new products or difficulties with supporting existing products and customers. In addition, if these third-party licensors fail or experience instability, then we may be unable to continue to sell products that incorporate the licensed technologies in addition to being unable to continue to maintain and support these products. We do require escrow arrangements with respect to certain third-party software which entitle us to certain limited rights to the source code, in the event of certain failures by the third party, in order to maintain and support such software. However, there is no guarantee that we would be able to fully understand and use the source code, as we may not have the expertise to do so. We are increasingly exposed to these risks as we continue to develop and market more products containing third-party software, such as our subscription service offerings related to network security and smart parental controls. If we are unable to license the necessary technology, we may be forced to acquire or develop alternative technology, which could be of lower quality or performance standards. The acquisition or development of alternative technology may limit and delay our ability to offer new or competitive products and services and increase our costs of production. As a result, our business, operating results and financial condition could be materially adversely affected.

# \* We have been investing in additional in-house resources on software research and development, which could disrupt our ongoing business and present distinct risks from our historically hardware-centric business.

We continue to evolve our historically hardware-centric business model towards a model that includes more sophisticated software offerings, including subscription services and applications that complement our products and are intended to drive subscriber growth and future recurring revenue. As such, we will further evolve the focus of our organization towards the delivery of more integrated hardware and software solutions for our customers, as well as related services. While we have invested in software development in the past, we may continue to expend additional resources in this area in the future, including key new hires. Such endeavors may involve significant risks and uncertainties, including distraction of management from current operations and insufficient revenue to offset expenses associated with this strategy. Software development is inherently risky for a company such as ours with a historically hardware-centric business model, and accordingly, our efforts in software development may not be successful. Any increased investment in software research and development may materially adversely affect our financial condition and operating results.

We may spend a proportionately greater amount on software research and development in the future. If we cannot proportionately decrease our cost structure in response to competitive price pressures, our gross margin and, therefore, our profitability could be adversely affected. In addition, if our software solutions, services, applications, pricing and other factors are not sufficiently competitive, or if there is an adverse reaction to our product decisions, we may lose market share in certain areas, which could adversely affect our revenue, profitability and prospects.

Software research and development is complex. We must make long-term investments, develop or obtain appropriate intellectual property and commit significant resources before knowing whether our output from these investments will successfully result in meaningful customer demand for our products and services. We must accurately forecast mixes of software solutions and configurations that meet customer requirements, and we may not succeed at doing so within a given product's life cycle or at all. Any delay in the development, production or marketing of a new software solution could result in us not being among the first to market, which could further harm our competitive position. In addition, our regular testing and quality control efforts may not be effective in controlling or detecting all quality issues and defects. We may be unable to determine the cause, find an appropriate solution or offer a temporary fix to address defects. Finding solutions to quality issues or defects can be expensive and may result in additional warranty, replacement and other costs, adversely affecting our profits. If new or existing customers have difficulty with our software solutions or are dissatisfied with our services, our operating margins could be adversely affected, and we could face possible claims if we fail to meet our customers' expectations. In addition, quality issues can impair our relationships with new or existing customers and adversely affect our brand and reputation, which could adversely affect our operating results.

\* If our products contain defects or errors, we could incur significant unexpected expenses, experience product returns and lost sales, experience product recalls, suffer damage to our brand and reputation, and be subject to product liability or other claims.

Our products are complex and may contain defects, errors or failures, particularly when first introduced or when new versions are released. The industry standards upon which many of our products are based are also complex, experience change over time and may be interpreted in different manners. Some errors and defects may be discovered only after a product has been installed and used by the end-user. As also noted in the risk factor "We have been and will be investing increased additional in-house resources on software research and development, which could disrupt our ongoing business and present distinct risks from our historically hardware-centric business" above, we devote considerable time and resources on testing and quality control efforts to detect quality issues and defects, and any reallocation of resources to fix such quality issues and defects could lead to delays in product introductions, which could further harm our competitive position.

In addition, epidemic failure clauses are found in certain of our customer contracts, especially contracts with service providers. If invoked, these clauses may entitle the customer to return for replacement or obtain credits for products and inventory, as well as assess liquidated damage penalties and terminate an existing contract and cancel future or then current purchase orders. In such instances, we may also be obligated to cover significant costs incurred by the customer associated with the consequences of such epidemic failure, including freight and transportation required for product replacement and out-of-pocket costs for truck rolls to end user sites to collect the defective products. Costs or payments we make in connection with an epidemic failure may materially adversely affect our results of operations and financial condition. If our products contain defects or errors, or are found to be noncompliant with industry standards, we could experience decreased sales and increased product returns, loss of customers and market share, and increased service, warranty and insurance costs. In addition, defects in, or misuse of, certain of our products could cause safety concerns, including the risk of property damage or personal injury. If any of these events occurred, our reputation and brand could be damaged, and we could face product liability or other claims regarding our products, resulting in unexpected expenses and adversely impacting our operating results. For instance, if a third party were able to successfully overcome the security measures in our products, such a person or entity could misappropriate customer data, third party data stored by our customers and other information, including intellectual property. In addition, the operations of our end-user customers may be interrupted. If that happens, affected end-users or others may file actions against us alleging product liability, tort, or breach of warranty claims.

Our user growth, engagement, and monetization of our subscription services on mobile devices depend upon effective operation with mobile operating systems, networks, technologies, products, and standards that we do not control.

The substantial majority of our revenue from our subscription services is generated from use of such services on mobile devices. We are dependent on the interoperability of Armor and our parental controls services and our other products with popular mobile operating systems, networks, technologies, products, and standards that we do not control, such as the Android and iOS operating systems and mobile browsers. Any changes, bugs, or technical issues in such systems, or changes in our relationships with mobile operating system partners, handset manufacturers, browser developers, or mobile carriers, or in their terms of service or policies that degrade our products' functionality, reduce or eliminate our ability to update or distribute our products, give preferential treatment to competitive products, or charge fees related to the distribution of our products could adversely affect the usage of our subscription services products or our other products on mobile devices. We may not be successful in maintaining or developing relationships with key participants in the mobile ecosystem or in developing products that operate effectively with these technologies, products, systems, networks, or standards. In the event that it is more difficult for our users to access and use our subscription services products or our other products on their mobile devices, or if our users choose not to access or use our subscription services products on their mobile devices, our user growth and user engagement and our business could be harmed.

### If we are unable to secure and protect our intellectual property rights, our ability to compete could be harmed.

We rely upon third parties for a substantial portion of the intellectual property that we use in our products. At the same time, we rely on a combination of copyright, trademark, patent and trade secret laws, nondisclosure agreements with

employees, consultants and suppliers and other contractual provisions to establish, maintain and protect our intellectual property rights and technology. Despite efforts to protect our intellectual property, unauthorized third parties may attempt to design around, copy aspects of our product design or obtain and use technology or other intellectual property associated with our products. For example, one of our primary intellectual property assets is the NETGEAR name, trademark and logo. We may be unable to stop third parties from adopting similar names, trademarks and logos, particularly in those international markets where our intellectual property rights may be less protected. Furthermore, our competitors may independently develop similar technology or design around our intellectual property. In addition, we manufacture and sell our products in many international jurisdictions that offer reduced levels of protection and recourse from intellectual property misuse or theft, as compared to the United States. Our inability to secure and protect our intellectual property rights could significantly harm our brand and business, operating results and financial condition.

### Financial, Legal, Regulatory and Tax Compliance Risks

\* We are currently involved in numerous litigation matters in the ordinary course and may in the future become involved in additional litigation, including litigation regarding intellectual property rights, consumer class actions and securities class actions, any of which could be costly and subject us to significant liability.

The networking industry is characterized by the existence of a large number of patents and frequent claims and related litigation regarding infringement of patents, trade secrets and other intellectual property rights. In particular, leading companies in the data communications markets, some of which are our competitors, have extensive patent portfolios with respect to networking technology. From time to time, third parties, including these leading companies, have asserted and may continue to assert exclusive patent, copyright, trademark and other intellectual property rights against us demanding license or royalty payments or seeking payment for damages, injunctive relief and other available legal remedies through litigation. These also include third-party non-practicing entities who claim to own patents or other intellectual property that cover industry standards that our products comply with. If we are unable to resolve these matters or obtain licenses on acceptable or commercially reasonable terms, we could be sued or we may be forced to initiate litigation to protect our rights. The cost of any necessary licenses could significantly harm our business, operating results and financial condition. We may also choose to join defensive patent aggregation services in order to prevent or settle litigation against such non-practicing entities and avoid the associated significant costs and uncertainties of litigation. These patent aggregation services may obtain, or have previously obtained, licenses for the alleged patent infringement claims against us and other patent assets that could be used offensively against us. The costs of such defensive patent aggregation services, while potentially lower than the costs of litigation, may be significant as well. At any time, any of these non-practicing entities, or any other third-party could initiate litigation against us, or we may be forced to initiate litigation against them, which could divert management attention, be costly to defend or prosecute, prevent us from using or selling the challenged technology, require us to design around the challenged technology and cause the price of our stock to decline. Recently, a third party initiated litigation against us in Germany, which carries with it the threat of an injunction on the importation of our products into Germany, as well as a significant increase in time and resources to defend against. In addition, several third party non practicing entities have initiated litigation against us in China, which also raises novel and unique challenges for us. For example, thus far we have experienced that patent litigation in China proceeds along a faster timeline, is more costly than we anticipated, carries a greater risk of injunction, and suffers from a relative lack of judicial development relative to patent litigation in the United States. In addition, third parties, some of whom are potential competitors, have initiated and may continue to initiate litigation against our manufacturers, suppliers, members of our sales channels or our service provider customers or even end user customers, alleging infringement of their proprietary rights with respect to existing or future products. In the event successful claims of infringement are brought by third parties, and we are unable to obtain licenses or independently develop alternative technology on a timely basis, we may be subject to indemnification obligations, be unable to offer competitive products, or be subject to increased expenses. Consumer class-action lawsuits related to the marketing and performance of our home networking products have been asserted and may in the future be asserted against us. Finally, along with Arlo Technologies and individuals and underwriters involved in Arlo's initial public offering, we have been sued in securities class action lawsuits, and may in the future be named in other similar lawsuits. For additional information regarding certain of the lawsuits in which we are involved, see the information set forth in Note 8. Commitments and Contingencies, in Notes to Consolidated Financial Statements in Item 8 of Part II of this Annual Report on Form 10-K. If we do not resolve these claims on a favorable basis, our business, operating results and financial condition could be significantly harmed.

\* We are exposed to adverse currency exchange rate fluctuations in jurisdictions where we transact in local currency, which could harm our financial results and cash flows.

Because a significant portion of our business is conducted outside the United States, we face exposure to adverse movements in foreign currency exchange rates. These exposures may change over time as business practices evolve, and they could have a material adverse impact on our results of operations, financial position and cash flows. Although a portion of our international sales are currently invoiced in United States dollars, we have implemented and continue to implement for certain countries and customers both invoicing and payment in foreign currencies. Our primary exposure to movements in foreign currency exchange rates relates to non-U.S. dollar denominated sales in Europe, Japan and Australia as well as our global operations, and non-U.S. dollar denominated operating expenses and certain assets and liabilities. In addition, weaknesses in foreign currencies for U.S. dollar denominated sales could adversely affect demand for our products. For example, the strengthening of the U.S. dollar this past year has had a meaningful negative impact on our international revenue and our profitability, particularly in our SMB business where approximately 50% of revenue is in foreign currency. Conversely, a strengthening in foreign currencies against the U.S. dollar could increase foreign currency denominated costs. As a result, we may attempt to renegotiate pricing of existing contracts or request payment to be made in U.S. dollars. We cannot be sure that our customers would agree to renegotiate along these lines. This could result in customers eventually terminating contracts with us or in our decision to terminate certain contracts, which would adversely affect our sales.

We hedge our exposure to fluctuations in foreign currency exchange rates as a response to the risk of changes in the value of foreign currency-denominated assets and liabilities. We may enter into foreign currency forward contracts or other instruments, the majority of which mature within approximately five months. Our foreign currency forward contracts reduce, but do not eliminate, the impact of currency exchange rate movements. For example, we do not execute forward contracts in all currencies in which we conduct business. In addition, we hedge to reduce the impact of volatile exchange rates on net revenue, gross profit and operating profit for limited periods of time. However, the use of these hedging activities may only offset a portion of the adverse financial effect resulting from unfavorable movements in foreign exchange rates.

### \* Changes in tax laws or exposure to additional income tax liabilities could affect our future profitability.

Factors that could materially affect our future effective tax rates include but are not limited to:

- changes in tax laws or the regulatory environment;
- changes in accounting and tax standards or practices;
- changes in the composition of operating income by tax jurisdiction; and
- our operating results before taxes.

We are subject to income taxes in the United States and numerous foreign jurisdictions. Our effective tax rate has fluctuated in the past and may fluctuate in the future. For example, the House of Representatives has introduced legislation proposing an increase to the U.S. corporate tax rate from 21% to 26.5% in addition to other changes in U.S. tax law that would increase our U.S. tax burden. Future effective tax rates could be affected by changes in the composition of earnings in countries with differing tax rates, changes in deferred tax assets and liabilities, or changes in tax laws. Foreign jurisdictions have increased the volume of tax audits of multinational corporations. Further, many countries continue to consider changes in their tax laws by implementing new taxes such as the digital service tax and initiatives such as the Organization for Economic Co-operation and Development's Pillar II global minimum tax proposals continue. These proposals could increase our total tax burden in the future. In addition, the acceleration of employee mobility as a result of the pandemic potentially increases the jurisdictional tax risk of our workforce. Changes in tax laws could affect the distribution of our earnings, result in double taxation and adversely affect our results.

The Tax Cuts and Jobs Act of 2017 included provisions effective for the 2022 tax year that eliminate the option to deduct research and development expenditures immediately in the year incurred and requires taxpayers to amortize such expenditures over five years for domestic payments and 15 years for payments to foreign parties. If these provisions are not

deferred, modified, or repealed by Congress with retroactive effect to January 1, 2022, they will materially decrease our cash from operations beginning in 2022. The actual impact on 2022 cash from operations will depend on if and when these provisions are deferred, modified, or repealed by Congress, including if retroactively, and the amount of research and development expenses paid or incurred in 2022 among other factors.

We have been audited by the Italian Tax Authority (ITA) for the 2004 through 2012 tax years. The ITA examination included an audit of income, gross receipts and value-added taxes. Currently, we are in litigation with the ITA for the 2004 through 2012 years. If we are unsuccessful in defending our tax positions, our profitability will be reduced.

The Company's U.S. federal tax return and payroll taxes for our fiscal years ended December 31, 2018 and December 31, 2019 are currently under examination by the IRS. We are also subject to examination by other tax authorities, including state revenue agencies and other foreign governments. While we regularly assess the likelihood of favorable or unfavorable outcomes resulting from examinations by the IRS and other tax authorities to determine the adequacy of our provision for income taxes, there can be no assurance that the actual outcome resulting from these examinations will not materially adversely affect our financial condition and operating results. Additionally, the IRS and several foreign tax authorities have increasingly focused attention on intercompany transfer pricing with respect to sales of products and services and the use of intangibles. Tax authorities could disagree with our intercompany charges, cross-jurisdictional transfer pricing or other matters and assess additional taxes. If we do not prevail in any such disagreements, our profitability may be affected.

We are subject to, and must remain in compliance with, numerous laws and governmental regulations concerning the manufacturing, use, distribution and sale of our products, as well as any such future laws and regulations. Some of our customers also require that we comply with their own unique requirements relating to these matters. Any failure to comply with such laws, regulations and requirements, and any associated unanticipated costs, may adversely affect our business, financial condition and results of operations.

We manufacture and sell products which contain electronic components, and such components may contain materials that are subject to government regulation in both the locations that we manufacture and assemble our products, as well as the locations where we sell our products. For example, certain regulations limit the use of lead in electronic components. To our knowledge, we maintain compliance with all applicable current government regulations concerning the materials utilized in our products, for all the locations in which we operate. Since we operate on a global basis, this is a complex process which requires continual monitoring of regulations and an ongoing compliance process to ensure that we and our suppliers are in compliance with all existing regulations. There are areas where new regulations have been enacted which could increase our cost of the components that we utilize or require us to expend additional resources to ensure compliance. For example, the SEC's "conflict minerals" rules apply to our business, and we are expending significant resources to ensure compliance. The implementation of these requirements by government regulators and our partners and/or customers could adversely affect the sourcing, availability, and pricing of minerals used in the manufacture of certain components used in our products. In addition, the supply-chain due diligence investigation required by the conflict minerals rules will require expenditures of resources and management attention regardless of the results of the investigation. If there is an unanticipated new regulation which significantly impacts our use of various components or requires more expensive components, that regulation would have a material adverse impact on our business, financial condition and results of operations.

One area which has a large number of regulations is environmental compliance. Management of environmental pollution and climate change has produced significant legislative and regulatory efforts on a global basis, and we believe this will continue both in scope and the number of countries participating, particularly with the election of a new presidential administration which has declared climate change a priority. These changes could directly increase the cost of energy which may have an impact on the way we manufacture products or utilize energy to produce our products. In addition, any new regulations or laws in the environmental area might increase the cost of raw materials we use in our products. Environmental regulations require us to reduce product energy usage, monitor and exclude an expanding list of restricted substances and to participate in required recover and recycling of our products. While future changes in regulations are certain, we are currently unable to predict how any such changes will impact us and if such impacts will be material to our business. If there is a new law or regulation that significantly increases our costs of manufacturing or causes us to significantly alter the way that we manufacture our products, this would have a material adverse effect on our business, financial condition and results of operations.

Our selling and distribution practices are also regulated in large part by U.S. federal and state as well as foreign antitrust and competition laws and regulations. In general, the objective of these laws is to promote and maintain free competition by prohibiting certain forms of conduct that tend to restrict production, raise prices, or otherwise control the market for goods or services to the detriment of consumers of those goods and services. Potentially prohibited activities under these laws may include unilateral conduct, or conduct undertaken as the result of an agreement with one or more of our suppliers, competitors, or customers. The potential for liability under these laws can be difficult to predict as it often depends on a finding that the challenged conduct resulted in harm to competition, such as higher prices, restricted supply, or a reduction in the quality or variety of products available to consumers. We utilize a number of different distribution channels to deliver our products to the end consumer, and regularly enter agreements with resellers of our products at various levels in the distribution chain that could be subject to scrutiny under these laws in the event of private litigation or an investigation by a governmental competition authority. In addition, many of our products are sold to consumers via the Internet. Many of the competition-related laws that govern these Internet sales were adopted prior to the advent of the Internet, and, as a result, do not contemplate or address the unique issues raised by online sales. New interpretations of existing laws and regulations, whether by courts or by the state, federal or foreign governmental authorities charged with the enforcement of those laws and regulations, may also impact our business in ways we are currently unable to predict. Any failure on our part or on the part of our employees, agents, distributors or other business partners to comply with the laws and regulations governing competition can result in negative publicity and divers

In addition to government regulations, many of our customers require us to comply with their own requirements regarding manufacturing, health and safety matters, corporate social responsibility, employee treatment, anti-corruption, use of materials and environmental concerns. Some customers may require us to periodically report on compliance with their unique requirements, and some customers reserve the right to audit our business for compliance. We are increasingly subject to requests for compliance with these customer requirements. For example, there has been significant focus from our customers as well as the press regarding corporate social responsibility policies. Recently, a number of jurisdictions have adopted public disclosure requirements on related topics, including labor practices and policies within companies' supply chains. We regularly audit our manufacturers; however, any deficiencies in compliance by our manufacturers may harm our business and our brand. In addition, we may not have the resources to maintain compliance with these customer requirements and failure to comply may result in decreased sales to these customers, which may have a material adverse effect on our business, financial condition and results of operations.

### We could incur significant liability if the distribution of Arlo shares to our stockholders is determined to be a taxable transaction.

On February 6, 2018, we announced that our Board of Directors had unanimously approved the pursuit of a separation of our smart camera business "Arlo" from NETGEAR (the "Separation"), to be effected by way of initial public offering ("IPO") and spin-off. On August 7, 2018, Arlo Technologies, Inc. ("Arlo") completed its IPO, after which we held 62,500,000 shares of Arlo common stock, representing approximately 84.2% of the outstanding shares of Arlo common stock. On December 31, 2018, we completed the distribution of these 62,500,000 shares to our stockholders (the "Distribution").

We have received an opinion from outside tax counsel to the effect that the Distribution qualifies as a transaction that is generally tax-free for U.S. federal income tax purposes. The opinion relies on certain facts, assumptions, representations and undertakings from Arlo and us regarding the past and future conduct of the companies' respective businesses and other matters. If any of these facts, assumptions, representations or undertakings are incorrect or not satisfied, our stockholders and we may not be able to rely on the opinion of tax counsel and could be subject to significant tax liabilities. Notwithstanding the opinion of tax counsel we have received, the IRS could determine on audit that the Distribution is taxable if it determines that any of these facts, assumptions, representations or undertakings are not correct or have been violated or if it disagrees with the conclusions in the opinion. Our U.S. federal income tax return for the calendar year 2018, the year of the Distribution, is currently under audit by the IRS. If the Distribution were determined to be taxable for U.S. federal income tax purposes, in general, we would recognize taxable gain as if we had sold Arlo common stock in a taxable sale for its fair market value, and our stockholders who received shares of Arlo common stock in the Distribution would be subject to tax as if they had received a taxable distribution equal to the fair market value of such shares.

### \* We may be exposed to claims and liabilities as a result of the distribution of Arlo shares to our stockholders.

We entered into a separation agreement and various other agreements with Arlo to govern the Distribution and the relationship of the two companies going forward. These agreements provide for specific indemnity and liability obligations and could lead to disputes between us and Arlo. The indemnity rights we have against Arlo under the agreements may not be sufficient to protect us, for example if our losses exceeded our indemnity rights or if Arlo did not have the financial resources to meet its indemnity obligations. In addition, our indemnity obligations to Arlo may be significant, and these risks could negatively affect our results of operations and financial condition.

We must comply with indirect tax laws in multiple jurisdictions, as well as complex customs duty regimes worldwide. Audits of our compliance with these rules may result in additional liabilities for taxes, duties, interest and penalties related to our international operations which would reduce our profitability.

Our operations are routinely subject to audit by tax authorities in various countries. Many countries have indirect tax systems where the sale and purchase of goods and services are subject to tax based on the transaction value. These taxes are commonly referred to as sales and/or use tax, value-added tax (VAT) or goods and services tax (GST). In addition, the distribution of our products subjects us to numerous complex customs regulations, which frequently change over time. Failure to comply with these systems and regulations can result in the assessment of additional taxes, duties, interest and penalties. While we believe we are in compliance with local laws, we cannot assure that tax and customs authorities would agree with our reporting positions and upon audit may assess us additional taxes, duties, interest and penalties.

Additionally, some of our products are subject to U.S. export controls, including the Export Administration Regulations and economic sanctions administered by the Office of Foreign Assets Control. We also incorporate encryption technology into certain of our solutions. These encryption solutions and underlying technology may be exported outside of the United States only with the required export authorizations or exceptions, including by license, a license exception, appropriate classification notification requirement and encryption authorization.

Furthermore, our activities are subject to U.S. economic sanctions laws and regulations that prohibit the shipment of certain products and services without the required export authorizations, including to countries, governments and persons targeted by U.S. embargoes or sanctions. Additionally, the current U.S. administration has been critical of existing trade agreements and may impose more stringent export and import controls. Obtaining the necessary export license or other authorization for a particular sale may be time consuming and may result in delay or loss of sales opportunities even if the export license ultimately is granted. While we take precautions to prevent our solutions from being exported in violation of these laws, including using authorizations or exceptions for our encryption products and implementing IP address blocking and screenings against U.S. government and international lists of restricted and prohibited persons and countries, we have not been able to guarantee, and cannot guarantee that the precautions we take will prevent all violations of export control and sanctions laws, including if purchasers of our products bring our products and services into sanctioned countries without our knowledge. Violations of U.S. sanctions or export control laws can result in significant fines or penalties and incarceration could be imposed on employees and managers for criminal violations of these laws.

Also, various countries, in addition to the United States, regulate the import and export of certain encryption and other technology, including import and export licensing requirements, and have enacted laws that could limit our ability to distribute our products and services or our end-users' ability to utilize our solutions in their countries. Changes in our products and services or changes in import and export regulations may create delays in the introduction of our products in international markets.

Adverse action by any government agencies related to indirect tax laws could materially adversely affect our business, operating results and financial condition.

### We are exposed to the credit risk of some of our customers and to credit exposures in weakened markets, which could result in material losses.

A substantial portion of our sales are on an open credit basis, with typical payment terms of 30 to 60 days in the United States and, because of local customs or conditions, longer in some markets outside the United States. We monitor

individual customer financial viability in granting such open credit arrangements, seek to limit such open credit to amounts we believe the customers can pay, and maintain reserves we believe are adequate to cover exposure for doubtful accounts.

In the past, there have been bankruptcies amongst our customer base, and certain of our customers' businesses face financial challenges that put them at risk of future bankruptcies. Although losses resulting from customer bankruptcies have not been material to date, any future bankruptcies could harm our business and have a material adverse effect on our operating results and financial condition. To the degree that turmoil in the credit markets makes it more difficult for some customers to obtain financing, our customers' ability to pay could be adversely impacted, which in turn could have a material adverse impact on our business, operating results, and financial condition.

### \* If our goodwill and intangible assets become impaired, we may be required to record a significant charge to earnings.

Goodwill is required to be tested for impairment at least annually. Factors that may be considered when determining if the carrying value of our goodwill or intangible assets may not be recoverable include a significant decline in our expected future cash flows or a sustained, significant decline in our stock price and market capitalization.

As a result of our acquisitions, we have significant goodwill and intangible assets recorded on our balance sheets. In addition, significant negative industry or economic trends, such as those that have occurred as a result of the recent economic downturn, including reduced estimates of future cash flows or disruptions to our business could indicate that goodwill and intangible assets might be impaired. If, in any period our stock price decreases to the point where our market capitalization is less than our book value, this too could indicate a potential impairment and we may be required to record an impairment charge in that period. Our valuation methodology for assessing impairment requires management to make judgments and assumptions based on projections of future operating performance. The estimates used to calculate the fair value of a reporting unit change from year to year based on operating results and market conditions. Changes in these estimates and assumptions could materially affect the determination of fair value and goodwill impairment for each reporting unit. For example, during the first quarter of 2022, the market price of our common stock and market capitalization declined and the U.S. WiFi market contracted, which had a significant negative impact on our Connected Home business. As a result, we recognized an impairment charge to our Connected Home reporting unit in the first quarter of 2022. We have not recognized any goodwill impairment charge on our SMB reporting unit. However, we operate in highly competitive environments and projections of future operating results and cash flows may vary significantly from actual results. As a result, we may incur substantial impairment charges to earnings in our financial statements should an impairment of our goodwill and intangible assets be determined on our SMB reporting unit, resulting in an adverse impact on our results of operations.

### Governmental regulations of imports or exports affecting Internet security could affect our net revenue.

Any additional governmental regulation of imports or exports or failure to obtain required export approval of our encryption technologies could adversely affect our international and domestic sales. The United States and various foreign governments have imposed controls, export license requirements, and restrictions on the import or export of some technologies, particularly encryption technology. In addition, from time to time, governmental agencies have proposed additional regulation of encryption technology, such as requiring the escrow and governmental recovery of private encryption keys. In response to terrorist activity, governments could enact additional regulation or restriction on the use, import, or export of encryption technology. This additional regulation of encryption technology could delay or prevent the acceptance and use of encryption products and public networks for secure communications, resulting in decreased demand for our products and services. In addition, some foreign competitors are subject to less stringent controls on exporting their encryption technologies. As a result, they may be able to compete more effectively than we can in the United States and the international Internet security market.

### We are exposed to credit risk and fluctuations in the market values of our investment portfolio.

Although we have not recognized any material losses on our cash equivalents and short-term investments, future declines in their market values could have a material adverse effect on our financial condition and operating results. Given the global nature of our business, we have investments with both domestic and international financial institutions. Accordingly, we face exposure to fluctuations in interest rates, which may limit our investment income. If these financial

institutions default on their obligations or their credit ratings are negatively impacted by liquidity issues, credit deterioration or losses, financial results, or other factors, the value of our cash equivalents and short-term investments could decline and result in a material impairment, which could have a material adverse effect on our financial condition and operating results.

### **General Risk Factors**

### \* Global economic conditions could materially adversely affect our revenue and results of operations.

Our business has been and may continue to be affected by a number of factors that are beyond our control, such as general geopolitical, economic and business conditions, conditions in the financial markets, and changes in the overall demand for networking and smart home products. A severe and/or prolonged economic downturn could adversely affect our customers' financial condition and the levels of business activity of our customers. Weakness in, and uncertainty about, global economic conditions may cause businesses to postpone spending in response to tighter credit, negative financial news and/or declines in income or asset values, which could have a material negative effect on the demand for networking products. As also noted in the risk factor "The COVID-19 pandemic could materially adversely affect our financial condition and results of operations," above, the COVID-19 pandemic continues to significantly increase economic and demand uncertainty. The current severe economic slowdown resulting from the pandemic, together with other macroeconomic and geopolitical factors, may lead to a global recession. Adverse changes in economic conditions, including as a result of the pandemic or high inflation, could adversely impact the demand and sale of our products to end users and the quantity of products our customers decide to purchase from us (or change the mix of products demanded) and make it more challenging to forecast our operating results and make business decisions.

In addition, availability of our products from third-party manufacturers and our ability to distribute our products into the United States and non-U.S. jurisdictions may be impacted by factors such as an increase in duties, tariffs or other restrictions on trade; raw material shortages or price increases, work stoppages, strikes and political unrest; economic crises and international disputes or conflicts; changes in leadership and the political climate in countries from which we import products; and failure of the United States to maintain normal trade relations with China and other countries. Any of these occurrences could materially adversely affect our business, operating results and financial condition.

Recently, various regions worldwide have experienced slow economic growth and high inflation. In addition, current geopolitical challenges in China, Ukraine and Russia, including any global economic ramifications of these challenges, may continue to put negative pressure on global economic conditions. If conditions in the global economy, including Europe, Asia, Australia and the United States, or other key vertical or geographic markets deteriorate, such conditions could have a material adverse impact on our business, operating results and financial condition. For example, during the second half of 2019, our APAC sales were dampened by a sudden economic downturn in the China/Hong Kong region due to the escalating trade war, Yuan depreciation and the unstable sociopolitical situation in Hong Kong. These same factors have also negatively impacted financial institutions on which we rely, which could further disrupt our business in the region or limit our ability to access certain assets. If we are unable to successfully anticipate changing economic and political conditions, we may be unable to effectively plan for and respond to those changes, which could materially adversely affect our business and results of operations.

In addition, the economic problems affecting the financial markets and the uncertainty in global economic conditions resulted in a number of adverse effects including a low level of liquidity in many financial markets, extreme volatility in credit, equity, currency and fixed income markets, instability in the stock market, high inflation and high unemployment. For example, the challenges faced by the European Union to stabilize some of its member economies, such as Greece, Portugal, Spain, Hungary and Italy, have had international implications affecting the stability of global financial markets and hindering economies worldwide. In the United States, the Federal Reserve continues to increase interest rates to counteract rising inflation. The European Central Bank has also increased its interest rates to counteract rising inflation. Should the European Union or United States monetary policy measures be insufficient to restore confidence and stability to the financial markets or should there be additional economic or political instability, the global economy, including the U.S., U.K. and European Union economies where we have a significant presence, could be hindered, which could have a material adverse effect on us.

Furthermore, economic conditions such as inflation, slower growth or recession, changes to fiscal and monetary policy, tighter credit, higher interest rates, high unemployment and currency fluctuations could adversely affect consumer sentiment and demand for our products and services. Consumer confidence and spending could be adversely affected by financial market volatility, negative financial news, conditions in the real estate and mortgage markets, declines in income or asset values, changes to fuel and other energy costs, labor and healthcare costs and other economic factors. This could also impact the quantity of products our customers decide to purchase from us and may have a longer-term impact on the inventory levels these customers choose to carry. Lower demands could also impact manufacturing capacity utilization and contribute to further increased component costs. These and other economic factors could materially and adversely affect our revenue and results of operations.

# If we lose the services of our Chairman and Chief Executive Officer, Patrick C.S. Lo, or our other key personnel, we may not be able to execute our business strategy effectively.

Our future success depends in large part upon the continued services of our key technical, engineering, sales, marketing, finance and senior management personnel. In particular, the services of Patrick C.S. Lo, our Chairman and Chief Executive Officer, who has led our company since its inception, are very important to our business. We do not maintain any key person life insurance policies. Our business model requires extremely skilled and experienced senior management who are able to withstand the rigorous requirements and expectations of our business. Our success depends on senior management being able to execute at a very high level. The loss of any of our senior management or other key engineering, research, development, sales or marketing personnel, particularly if lost to competitors, could harm our ability to implement our business strategy and respond to the rapidly changing needs of our business. The market for talent in the technology industry, especially in the areas of software and subscription services, has become increasingly competitive, and we may not have the resources to compete at the same level as larger companies who are able to offer more compelling compensation packages. Further, changes brought about by the COVID-19 pandemic, for example being able to work from anywhere on a full-time basis, has led to an increase in employee mobility and employees are changing jobs at an increasing rate. Therefore, our ability to recruit new talent and retain existing talent may be adversely affected, and as a result our business as a whole may suffer. While we have adopted an emergency succession plan for the short term, we have not formally adopted a long-term succession plan. As a result, if we suffer the loss of services of any key executive, our long-term business results may be harmed. While we believe that we have mitigated some of the business execution and business continuity risk with our organization into two business segments with separate leadership teams, the loss of any key personnel would still be disruptive and harm our business, especially given that our business is leanly staffed and relies on the expertise and high performance of our key personnel. In addition, because we do not have a formal long-term succession plan, we may not be able to have the proper personnel in place to effectively execute our long-term business strategy if Mr. Lo or other key personnel retire, resign or are otherwise terminated.

# \* Political events, war, terrorism, public health issues, natural disasters, sudden changes in trade and immigration policies, and other circumstances could materially adversely affect us.

Our corporate headquarters are located in Northern California and one of our warehouses is located in Southern California, both of which are regions known for seismic activity. Substantially all of our critical enterprise-wide information technology systems, including our main servers, are currently housed in colocation facilities in Arizona. While our critical information technology systems are located at colocation facilities in different geographic regions in the United States, our headquarters, warehouses, and the majority of our manufacturing, which occurs in Southeast Asia and mainland China, are susceptible to seismic activity and other natural disasters, such as drought, wildfires, storms, sea-level rise, and flooding, The global effects of climate change could result in increased frequency and intensity of these natural disasters that could also result in power outages or other disruptions to the business. If our manufacturers or warehousing facilities are disrupted or destroyed, we would be unable to distribute our products on a timely basis, which could harm our business.

In addition, health epidemics, war, terrorism, geopolitical uncertainties, social and economic instability, public health issues, sudden changes in trade and immigration policies (such as the higher tariffs on certain products imported from China enacted by the previous U.S. administration or U.S. sanctions against Russia as a result of the Russia-Ukraine dispute), and other business interruptions have caused and could cause damage or disruption to international commerce and the global economy, and thus could have a strong negative effect on us, our suppliers, logistics providers, manufacturing vendors and customers. Our business operations are subject to interruption by natural disasters, fire, power shortages, terrorist attacks and other hostile acts, labor disputes, public health issues, and other events beyond our control, including

the COVID-19 pandemic and related government lockdowns discussed further in the risk factor "The COVID-19 pandemic could materially adversely affect our financial condition and results of operations," above. In addition, in the past, labor disputes at third-party manufacturing facilities have led to workers going on strike, and labor unrest could materially affect our third-party manufacturers' abilities to manufacture our products.

Such events could decrease demand for our products, make it difficult, more expensive or impossible for us to make and deliver products to our customers or to receive components from our direct or indirect suppliers, and create delays and inefficiencies in our supply chain. Major public health issues, including pandemics such as COVID-19, could negatively affect us through more stringent employee travel restrictions, additional limitations in freight services, governmental actions limiting the movement of products between regions, delays in production ramps of new products, and disruptions in the operations of our manufacturing vendors and component suppliers.

We are required to evaluate our internal controls under Section 404 of the Sarbanes-Oxley Act of 2002 and any adverse results from such evaluation, including restatements of our issued financial statements, could impact investor confidence in the reliability of our internal controls over financial reporting.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we are required to furnish a report by our management on our internal control over financial reporting. Such report must contain among other matters, an assessment of the effectiveness of our internal control over financial reporting as of the end of our fiscal year, including a statement as to whether or not our internal control over financial reporting is effective. This assessment must include disclosure of any material weaknesses in our internal control over financial reporting identified by management. From time to time, we conduct internal investigations as a result of whistleblower complaints. In some instances, the whistleblower complaint may implicate potential areas of weakness in our internal controls. Although all known material weaknesses have been remediated, we cannot be certain that the measures we have taken ensure that restatements will not occur in the future. Execution of restatements create a significant strain on our internal resources and could cause delays in our filing of quarterly or annual financial results, increase our costs and cause management distraction. Restatements may also significantly affect our stock price in an adverse manner.

Continued performance of the system and process documentation and evaluation needed to comply with Section 404 is both costly and challenging. During this process, if our management identifies one or more material weaknesses in our internal control over financial reporting, we will be unable to assert such internal control is effective. If we are unable to assert that our internal control over financial reporting is effective as of the end of a fiscal year or if our independent registered public accounting firm is unable to express an opinion on the effectiveness of our internal control over financial reporting, we could lose investor confidence in the accuracy and completeness of our financial reports, which may have an adverse effect on our stock price.

### \* Our stock price may be volatile and your investment in our common stock could suffer a decline in value.

There has been significant volatility in the market price and trading volume of securities of technology and other companies, which may be unrelated to the financial performance of these companies. These broad market fluctuations may negatively affect the market price of our common stock.

Some specific factors that may have a significant effect on our common stock market price include:

- actual or anticipated fluctuations in our operating results or our competitors' operating results;
- actual or anticipated changes in the growth rate of the general networking sector, our growth rates or our competitors' growth rates;
- conditions in the financial markets in general or changes in general economic conditions, including government efforts to mitigate economic downturns or control inflation;

- novel and unforeseen market forces and trading strategies, such as the massive short squeeze rally caused by retail investors on companies such as Gamestop;
- actual or anticipated changes in governmental regulation, including taxation and tariff policies;
- interest rate or currency exchange rate fluctuations;
- our ability to forecast or report accurate financial results; and
- changes in stock market analyst recommendations regarding our common stock, other comparable companies or our industry generally.

# Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

# (c) Repurchase of Equity Securities by the Company

Period	Total Number of Shares Purchased	Average Price Paid per Share		Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (In millions)
July 4, 2022 - July 31, 2022	39,152	\$	25.78	_	2.5
August 1, 2022 - August 28, 2022	2,536	\$	25.85	_	2.5
August 29, 2022 - October 2, 2022	3,485	\$	21.79		2.5
Total	45,173	\$	25.48		

<sup>(1)</sup> From time to time, our Board of Directors has authorized programs under which we may repurchase shares of our common stock, depending on market conditions, in the open market or through privately negotiated transactions.

Date: November 4, 2022

### CHIEF EXECUTIVE OFFICER CERTIFICATION

### I, Patrick C.S. Lo, certify that:

- 1. I have reviewed this Quarterly Report on Form 10-Q of NETGEAR, Inc. (the "Registrant");
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;
- 4. The Registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:
  - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c. Evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. Disclosed in this report any change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter (the Registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting; and
- 5. The Registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and the audit committee of the Registrant's board of directors (or persons performing the equivalent functions):
  - All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant's ability to record, process, summarize and report financial information; and
  - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal control over financial reporting.

### CHIEF FINANCIAL OFFICER CERTIFICATION

### I, Bryan D. Murray, certify that:

- 1. I have reviewed this Quarterly Report on Form 10-Q of NETGEAR, Inc. (the "Registrant");
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;
- 4. The Registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:
  - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c. Evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d. Disclosed in this report any change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter (the Registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting; and
- 5. The Registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and the audit committee of the Registrant's board of directors (or persons performing the equivalent functions):
  - All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant's ability to record, process, summarize and report financial information; and
  - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal control over financial reporting.

# CERTIFICATION OF CHIEF EXECUTIVE OFFICER PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEYACT OF 2002

In connection with the Quarterly Report of NETGEAR, Inc. (the "Company") on Form 10-Q for the period ended October 2, 2022, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Patrick C.S. Lo, Chairman and Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Date: November 4, 2022

By: /s/ PATRICK C.S. LO

Patrick C.S. Lo

Chairman and Chief Executive Officer

NETGEAR, Inc.

This certification accompanies the Form 10-Q to which it relates, is not deemed filed with the Securities and Exchange Commission and is not to be incorporated by reference into any filing of the Company under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended (whether made before or after the date of this Form 10-Q), irrespective of any general incorporation language contained in such filing.

# CERTIFICATION OF CHIEF FINANCIAL OFFICER PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEYACT OF 2002

In connection with the Quarterly Report of NETGEAR, Inc. (the "Company") on Form 10-Q for the period ended October 2, 2022, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Bryan D. Murray, Chief Financial Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Date: November 4, 2022
