### **Recent Developments and Highlights**

- In late July 2023, NETSCOUT announced its next-generation **Omnis Cyber Intelligence (OCI)** solution, an advanced network detection and response (NDR) solution. OCI uses highly scalable deep packet inspection (DPI) and multiple threat detection methods at the source of packet capture to detect threats in real time and via historical investigation of high-fidelity network metadata and packets. OCI helps identify threats earlier in the attack life cycle and quickens investigations by gathering network-based forensic evidence to reduce the Mean Time to Response (MTTR). OCI is also a valuable tool for verifying the effectiveness and improving the existing cybersecurity ecosystem, ensuring compliance, and lowering the risk of successful cyberattacks.
- In mid-July 2023, NETSCOUT released its latest version of Arbor Edge Defense (AED) which includes new ML-based **Adaptive DDoS Protection**. This solution combines leading global threat intelligence with machine learning to protect enterprises from rapidly spreading dynamic DDoS attacks.
- In June 2023, NETSCOUT introduced its **Visibility Without Borders® (VWB) platform** to help essential organizations keep goods and services flowing by uniting performance, security, and availability under one common data framework. By proactively identifying areas of complexity, fragility, and risk, the platform unlocks insights at unparalleled scale to deliver the intelligence needed to increase visibility, improve agility, and keep data and applications secure.
- In May 2023, NETSCOUT introduced **Mobile Security** using Arbor® Sightline Mobile and MobileStream to answer mobile network operators' (MNO) need for scalable, real-time visibility, detection, and mitigation of threats that can impact the performance and availability of 4G/5G mobile consumer services and network infrastructure.

### **Use of Non-GAAP Financial Information:**

To supplement the financial measures presented in NETSCOUT's press release in accordance with accounting principles generally accepted in the United States (GAAP), NETSCOUT also reports the following non-GAAP measures: non-GAAP gross profit, non-GAAP income from operations, non-GAAP net income, non-GAAP diluted net income per share and non-GAAP earnings before interest and other expense, income taxes, depreciation, and amortization (EBITDA) from operations. Non-GAAP gross profit removes expenses related to the amortization of acquired intangible assets, share based compensation, and acquisition-related depreciation. Non-GAAP income from operations includes the aforementioned adjustments and also removes restructuring charges and legal expenses related to civil judgements. Non-GAAP net income includes the foregoing adjustments related to non-GAAP income from operations, and also removes change in fair value of derivative instrument, net of related income tax effects. Non-GAAP diluted net income per share includes the foregoing adjustments related to non-GAAP net income. Non-GAAP EBITDA from operations includes the aforementioned items related to non-GAAP income from operations and also removes non-acquisition related depreciation expense. Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures included in the attached tables within this press release.

These non-GAAP measures are not in accordance with GAAP, should not be considered an alternative for measures prepared in accordance with GAAP (gross profit, operating margin, net income, and diluted net income per share), and may have limitations because they do not reflect all of NETSCOUT's results of operations as determined in accordance with GAAP. These non-GAAP measures should only be used to evaluate NETSCOUT's results of operations in conjunction with the corresponding GAAP measures. The presentation of non-GAAP information is not meant to be considered superior to, in isolation from, or as a substitute for results prepared in accordance with GAAP. NETSCOUT believes these non-GAAP financial measures will enhance the reader's overall understanding of NETSCOUT's current financial performance and NETSCOUT's prospects for the future by providing a higher degree of transparency for certain financial measures and providing a level of disclosure that helps investors understand how the Company plans and measures its own business. NETSCOUT believes that providing these non-GAAP measures affords investors a view of NETSCOUT's operating results that may be more easily compared to peer companies and also enables investors to consider NETSCOUT's operating results on both a GAAP and non-GAAP basis during and following the integration period of NETSCOUT's acquisitions. Presenting the GAAP measures on their own, without the supplemental non-GAAP disclosures, might not be indicative of NETSCOUT's core operating results. Furthermore, NETSCOUT believes that the presentation of non-GAAP measures when shown in conjunction with the corresponding GAAP measures provides useful information to management and investors regarding present and future business trends relating to its financial condition and results of operations.

NETSCOUT management regularly uses supplemental non-GAAP financial measures internally to understand, manage and evaluate its business and to make operating decisions. These non-GAAP measures are among the primary factors that management uses in planning and forecasting.
