

Cyber-Ark Named Twice as a Finalist in 2010 SC Awards

February 23, 2010 8:32 PM ET

23rd February 2010 - Cyber-Ark has been announced as the finalist in two key categories in the SC Magazine Awards 2010 Europe for its market leading Privileged Identity Management Suite (PIM) in the Best IAM Solution and also in the Best Enterprise Security Solution category.

The SC Awards Europe are universally recognised as one of the most coveted and prestigious awards for the European information security industry.

As Paul Fisher editor of SC Magazine says "It's not easy to win and I congratulate Cyber-Ark for being the finalists in not one but two award categories which is a great accolade and achievement especially as the awards go up in-front of a panel of revered industry judges from the highest levels of the information security profession. These awards show that Cyber-Ark is clearly making great head-way in the area of managing privileges and protecting sensitive data."

Being named finalist in the SC Awards comes at a time when Cyber-Ark has achieved more than a 40 percent increase in sales in 2009, and continued profitability. Demonstrating the strength of its market-leading Privileged Identity Management and Governed File Transfer Suites, Cyber-Ark has recently added an impressive 130 new customers in 2009, bringing the company's user base to 630 global enterprises.

Mark Fullbrook UK Director at Cyber-Ark said "We are very excited about being announced as finalists in two categories - especially as you need to go through quite a selection process to be put up for the award in the first place. We get great feedback from our clients and partners who experience quick time to value impact from the Privileged Identity Management Suite and they go on to recommend it to their peers. So it's rewarding to actually be recognised within the industry for our product suite and the value of its features."

Cyber-Ark's Privileged Identity Management (PIM) Suite is an enterprise-class, full life-cycle solution for securing, managing, automatically changing and monitoring all activities associated with privileged accounts. The PIM Suite includes the following products:

- Enterprise Password Vault®
- Application Identity Manager®,[€]
- Privileged Session Manager®

Cyber-Ark's Privileged Identity Management Suite provides a centralised point-of-control and single user interface for consistent enforcement of common policies across all shared and superuser accounts and their associated activities. Additionally, its flexible privileged account access workflows easily adapt to organisations' current processes and help support integrated audit and reporting requirements. Cyber-Ark's single integrated solution provides natural support for combined shared-account/software-account password management (SAPM) and superuser privilege management (SUPM) benefits, including granular superuser access control and intelligent privileged account detection.

The Awards presentation will take place on Tuesday 27 April 2010 at Wyndham Grand London, Chelsea Harbour, London.
