

Cyber-Ark to Participate on Federal Government Panel at the Cloud Security Alliance Congress 2010

November 15, 2010 1:45 AM ET

Cyber-Ark to Highlight Best Practices for Creating and Maintaining Secure Cloud Computing Environments through Effective Privileged Identity Management Processes

NEWTON, Mass. – **November 15, 2010** – [Cyber-Ark® Software](#), a leading global software provider for protecting critical applications, identities and information, today announced details of its participation at the Cloud Security Alliance Congress 2010. In a panel presentation entitled "Securely Implementing Cloud-Based Applications and Services for the Federal Sector," Cyber-Ark's Shlomi Dinoor will explain how government agencies that deploy cloud-based technologies can apply privileged identity management best practices to more effectively address risk management and compliance priorities. Cyber-Ark is a Silver sponsor of the event and will be exhibiting at table #4.

Who: Shlomi Dinoor, vice president, emerging technologies, Cyber-Ark

What: The panel, "Securely Implementing Cloud-Based Applications and Services for the Federal Sector," will discuss the challenges of securing cloud-based technologies and the difficulties and accountabilities associated with federal cloud computing standards and regulations. Dinoor will offer specific insights into the critical role that privileged identity management technology plays in protecting cloud data and the importance of establishing enforceable controls over who can access sensitive systems and applications throughout the entirety of the IT environment. Through this holistic view of privilege, risk and control, government agencies will properly follow policies, processes and practices that are consistent with industry-specific regulations and requirements.

When: The event takes place November 16-17, 2010. The panel is scheduled for 10:15 AM EST on Tuesday November 16.

Where: Hilton Disney World Resort in Orlando, Florida. Cyber-Ark is exhibiting at Table #4.

The Cloud Security Alliance Congress 2010 is a two-day event that assembles top experts and industry stakeholders to discuss the state of cloud security and best practices for cloud computing.
