

Report: CyberArk Named the Privilege Management Leader by KuppingerCole

December 22, 2015 8:30 AM ET

CyberArk Maintains a “Clear Lead” in Overall Market; Recognized for Ongoing Product Innovation, Global Customer Base and Strong Partner Network

NEWTON, Mass.--(BUSINESS WIRE)--Dec. 22, 2015-- [CyberArk](#) (NASDAQ: [CYBR](#)), the company that protects organizations from [cyber attacks](#) that have made their way inside the network perimeter, has been named the Overall Leader by independent analyst firm KuppingerCole in its [Leadership Compass: Privilege Management 2015 report](#).

CyberArk surpassed the other vendors by being positioned as *the* Leader across all the report’s evaluation categories: Overall, Product, Market and Innovation. To help companies make intelligent vendor choices to protect against privileged account compromise, the firm analyzed 12 vendors and named CyberArk the “Gold Standard” and the “one to beat in Privilege Management.” The [CyberArk Privileged Account Security Solution](#) was the only one to receive the highest possible product rating across security, functionality, integration, interoperability and usability categories.

In the report, KuppingerCole examines the critical role of [privileged account security](#) in mitigating the risk of devastating cyber attacks, as well as managing emerging threats associated with enterprise mobile and [cloud](#) adoption. According to the report, “even the most sophisticated attacker would find it almost impossible to succeed without having access to privileged credentials.”

“In the increasingly complex cyber threat landscape, privileged account security has become a business imperative,” said Martin Kuppinger, founder and principal analyst, KuppingerCole. “With proven, innovative products and firm understanding of how to address customers’ most critical IT security challenges, we named CyberArk the Overall Leader in Privilege Management for the second year in a row. CyberArk should be included in every vendor evaluation and product selection process for Privilege Management.”

CyberArk was recognized for the strengths of its comprehensive CyberArk Privileged Account Security Solution including capabilities for [threat analytics](#) and alerts; [session management](#) and monitoring; account management; [least privilege](#) management; support for AWS and Microsoft Azure management consoles; and large partner ecosystem.

“As KuppingerCole outlines in the report, it’s increasingly clear that organizations must prioritize privileged account security. The risks posed by unprotected privileged accounts, including the possibility of shutting down entire businesses, are too immense to ignore. It’s time to take action,” said [John Worrall](#), chief marketing officer, CyberArk. “It’s rewarding to see leading global analyst firms put privileged account security on the top of the enterprise security priority list, and truly an honor to be recognized by KuppingerCole as the Leader in this critical security market sector.”
