

CyberArk to Present at AGC's Eighth Annual West Coast Information Security & Emerging Growth Conference

February 23, 2012 5:09 PM ET

President and CEO Udi Mokady to Discuss CyberArk's Leadership and Rapid Growth in the Privileged Identity Management Space While Highlighting Emerging Cyber Security Opportunities

NEWTON, Mass. - February 23, 2012 - CyberArk® Software, a leading global information security provider for protecting and managing privileged accounts and sessions, critical applications and sensitive information today announced details of its participation at the America's Growth Capital 8th Annual West Coast Information Security & Emerging Growth Conference. On Monday, February 27, President and CEO Udi Mokady will lead a company presentation that details CyberArk's impact on the Privileged Identity Management space, one of the fastest growing segments within the Identity and Access Management market. The presentation will coincide with CyberArk's presence at the RSA® Conference 2012, also held in San Francisco that week.

Who: Udi Mokady, founder, president and CEO, CyberArk Software

What: With a recent \$40 million investment round, CyberArk is aggressively positioned for rapid global growth and increased market share for its core solutions offerings, including the recently enhanced Privileged Identity Management and Privileged Session Management Suites. Mokady's presentation will highlight CyberArk's significant customer growth and global momentum, including the company's recent milestone of expanding to more than 1,000 enterprise customers worldwide. Mokady will discuss emerging cyber security threats and demonstrate how CyberArk's solutions enable customers to proactively protect their organizations against internal and external information security risks. In addition to consistently expanding its customer base, CyberArk presented strong sequential revenue growth throughout 2011, generating a healthy cash flow and continued profitability - with increasing contribution from its 100 global channel partners.

When: Monday, February 27, 2012 at 3:40 PM PST

Where: The event will take place at the Westin San Francisco Market Street

For the past eight years, AGC's Annual West Coast Conference has marked the unofficial start of the RSA® Conference by merging emerging growth companies in information security, cloud computing, enterprise software and other IT disciplines with leading technology buyers and investors. At the RSA Conference (booth #2153), CyberArk will demonstrate the benefits of its recently announced Privileged Session Management Suite (version 7), featuring real-time session monitoring capabilities that enable immediate termination of suspicious activity, in addition to enabling organizations to better isolate, control and monitor activity to protect databases, virtual environments, network devices and servers from insider threats and external cyber attacks.
