

CyberArk Expands Into Irish Market through Zinopy Partnership

September 21, 2011 4:15 PM ET

Growing compliance and security demands drive regional expansion

LONDON - September 21, 2011 - CyberArk® Software, the leading global information security provider for protecting and managing critical applications, identities and sensitive information, today announced that Zinopy Security Ltd., a leading provider of end-to-end IT security solutions, professional services, consultancy and training, has been named a CyberArk Premier Partner in Ireland.

"We're very pleased to be working with Zinopy as we build on our successes in the UK and look to expand our reach into the Irish market," said Nick Lowe, vice president sales, EMEA at CyberArk. "Zinopy's track record of maintaining excellent customer relationships and solid technical ability are, and will continue to be, critical in the further development of our partnership."

With so many organisations around the world facing increasingly advanced internal and external threats, as well as stricter and greater compliance regulations, the need for enterprise-class security solutions has never been greater. Building on this growing requirement, this significant partnership will enable CyberArk's award-winning range of solutions to reach new customers via Zinopy, helping meet the demands of the Irish market.

"We're very proud to become a Premier CyberArk Partner," said John Ryan, CEO, Zinopy. "CyberArk's industry-leading solutions for file transfer and privileged identity management are a welcome addition to our security portfolio and give us a competitive edge. We anticipate a great deal of interest in our updated security offering and look forward to our partnership with CyberArk going from strength to strength."

About CyberArk

CyberArk® Software is a global information security company that specializes in protecting and managing privileged users, applications and sensitive information to improve compliance, productivity and protect organizations against insider threats and advanced external threats. With its award-winning Privileged Identity Management, Sensitive Information Management and Privileged Session Management Suites, organizations can more effectively manage and govern data center access and activities, whether on-premise, off-premise or in the cloud, while demonstrating returns on security investments. CyberArk works with more than 900 global customers, including more than 35 percent of the Fortune 100. Headquartered in Newton, Mass., CyberArk has offices and authorized partners in North America, Europe and Asia Pacific.
