nCircle Announces Integration with Cyber-Ark's Privileged Identity Management Suite, Expanded Functionality in Suite360â„¢

February 15, 2011 3:22 PM ET

New features simplify credentials management, deliver a configurable dashboard and expand scan coverage

SAN FRANCISCO â€" February 15, 2011 â€" nCircle, the leader in automated security and compliance auditing solutions, today announced new functionality in its flagship product line, Suite360, including an interactive, configurable dashboard, new configuration auditing scan modules and policies, and integration with Cyber-Ark's Privileged Identity Management (PIM) Suite.

Cyber-Ark Integration
nCircle's integration with Cyber-Ark enables customers to store and manage their IT systems' credentials â€" as required by authenticated nCircle scans â€" directly in the Cyber-Ark Enterprise Password Vault (EPV), improving security and simplifying credentials management. nCircle embedded the Cyber-Ark secure API for Application Identity Management, and the integration provides a single place to manage credentials while safely and securely expanding the scope of scans to provide a comprehensive view of customers' security and compliance posture.

"Managing credentials is a significant challenge in large enterprises and can be an obstacle to complete network scanning coverage," said Ric Weeks, vice president of business development at Cyber-Ark Software. "The integration of Cyber-Ark's PIM Suite with nCircle Suite360 ensures the protection of credentials while reducing management overhead."

"Comprehensive network scanning requires a combination of credentialed and un-credentialed scans," noted Tim Keanini, CTO of nCircle. "nCircle's integration with Cyber-Ark streamlines our customers' credentials management process and makes it easier to properly audit the entire network for security and compliance."

Additional New Features in Suite360 include:

Configurable Dashboard with Interactive Widgets
New in IP360, nCircle's market-leading vulnerability and risk management system, is an interactive dashboard that users can customize with various widgets that provide multiple tools on a single screen to deliver instant access to often-used features and at-a-glance information about the system. A wide range of new interactive, drag-and-drop widgets are available, including:

- Instant nCircle Focusâ„¢ query
- nCircle Twitter feed
- Configurable welcome message
- Scan on demand
- Scans in progress
- System memory usage meter
- System disk usage meter

New Configuration Auditing Scan Modules and Policies
Configuration Compliance Manager, nCircle's award winning agentless configuration auditing solution, has been expanded with additional scan modules and policies, including:

- Oracle 11g Scan Module
- Apple OS X Scan Module
- CIS-certified Windows 2008 policy

- CIS-certified Check Point Firewall policy
- CIS-certified Oracle 11g policy

nCircle will demonstrate the new features in Suite360 at RSA 2011 on February 15 and February 16, 2011. For more information, please visit http://www.ncircle.com/rsa.

About nCircle Suite360
nCircle provides the world's most comprehensive suite of solutions for agentless security and configuration auditing for physical and virtual IT environments. nCircle's solutions combine the broadest discovery of networked systems and their operating systems, applications, vulnerabilities and configurations with advanced analytics to help enterprises reduce security risk and achieve compliance. nCircle's solutions include IP360â"¢ for vulnerability management, WebApp360â"¢ for web application vulnerability auditing, Configuration Compliance Manager (CCM)â"¢ for configuration auditing and file integrity monitoring, Certified PCI Scan Serviceâ"¢ for on-demand self-service PCI scanning, and Suite360 Intelligence Hubâ"¢ for IT governance, risk and compliance (ITGRC) reporting and analytics.

About Cyber-Ark

Cyber-ArkÂ® Software is a global information security company that specializes in protecting and managing privileged users, applications and sensitive information to improve compliance, productivity and protect organizations against insider threats and advanced external threats. With its award-winning Privileged Identity Management, Sensitive Information Management and Privileged Session Management Suites, organizations can more effectively manage and govern data center access and activities, whether on-premise, off-premise or in the cloud, while demonstrating returns on security investments. Cyber-Ark works with more than 850 global customers, including more than 35 percent of the Fortune 100. Headquartered in Newton, Mass., Cyber-Ark has offices and authorized partners in North America, Europe and Asia Pacific. For more information, visit www.cyberark.com.
