CyberArkâ€™s 2013 North American Customer Event to Highlight Innovative Approaches to Securing Enterprises Against Privileged-Based Cyber Attacks

October 25, 2013 11:56 AM ET

Richard Bejtlich, Mandiantâ€™s Chief Security Officer, to Deliver Keynote Address at the Worldâ€™s Largest Gathering of Privileged Account Security Professionals

Boston, MA â€"October 25, 2013 â€"CyberArk, the company securing the heart of the enterprise, today announced details of the CyberArk 2013 North American Customer Event, taking place October 28-30, 2013 at the Westin Boston Waterfront. The three-day conference will detail how privileged accounts continue to be exploited in advanced cyber attacks and security breaches, while explaining how CyberArk delivers targeted security solutions that help customers proactively protect against these targeted attacks and insider threats. The event will also showcase the newly released version 8.0 of CyberArkâ€™s privileged account security solution, which includes Master Policy, a new policy engine enabling customers to set, manage and monitor privileged account security policies through a unified, simple and natural-language interface.

In addition to CyberArk customer case studies, panels, technical presentations and workshops, the event will feature a keynote address from Richard Bejtlich, the Chief Security Officer of Mandiant. Bejtlichâ€™s presentation will discuss how cyber attackers have stolen and abused privileged credentials to perpetrate some of the biggest breaches in recent memory, while addressing how defenders can counter these vulnerabilities. Udi Mokady, CyberArkâ€™s founder, president and CEO, will also present at the customer event, explaining how CyberArkâ€™s innovative technology solutions continue to meet the current and constantly evolving security and compliance needs of global customers.

â€œOver the past year, as our customers increasingly recognized the connection between privileged accounts and advanced attacks, they continued to deploy CyberArkâ€™s solutions to prevent perimeter breaches from escalating into full blown leaks of sensitive information,â€said Udi Mokady. â€œWe are extremely excited for the largest gathering of privileged account security professionals in our companyâ€™s historyâ€"and to continue sharing our innovative cyber security solutions and strategies with these valued customers.â€

Attendees can follow and track the event on Twitter by following @CyberArk and using the hashtag #CyberArkBoston.

About CyberArk

CyberArk is the only security company focused on eliminating the most advanced cyber threats; those that use insider privileges to attack the heart of the enterprise. Dedicated to stopping attacks before they stop business, CyberArk proactively secures against cyber threats before attacks can escalate and do irreparable damage. The company is trusted by the worldâ€™s leading companies â€" including 40 of the Fortune 100 â€" to protect their highest value information assets, infrastructure and applications. CyberArk is a vital security partner to more than 1,400 global businesses, including 17 of the worldâ€™s top 20 banks. Headquartered in Newton, MA, CyberArk also has offices throughout EMEA and Asia-Pacific.
