

CyberArk Named a Finalist in the Prestigious SC Magazine Awards Europe 2011

February 24, 2011 3:24 PM ET

Privileged Identity Management Suite in the running for "Information Security Product of the Year"

Newton, Mass. - February 24th, 2011 - CyberArk® Software, the leading global information security provider for protecting and managing critical applications, identities and sensitive information, today announced that CyberArk's Privileged Identity Management Suite has been named a finalist in the "Information Security Product of the Year" category of the SC Magazine Europe Awards Europe 2011. The winners will be revealed at the SC Magazine Europe Awards on April 19th 2011.

The SC Awards Europe are amongst the most coveted and prestigious awards for the European information security industry. Judged by a panel of industry experts, the awards recognise the vendor and channel communities that deliver innovative security solutions in today's business world.

CyberArk's Privileged Identity Management Suite has been shortlisted alongside vendors SunFive, Qualys, Actiance, Varonis Systems and Veracode in the "Information Security Product of the Year" category. The Privileged Identity Management Suite is an enterprise-class, unified policy-based solution, that secures, manages and monitors privileged accounts and activities across the data centre, whether on-premise or in the cloud - satisfying compliance requirements, as well as proactively averting internal and external threats.

"We are delighted that our product has been recognised as one of the leading solutions in the Information Security sector today," said Udi Mokady, President and CEO at CyberArk.

"It goes along with the great market recognition that we have been seeing with top enterprises around the world standardizing on CyberArk for Privileged Identity Management."

About CyberArk

CyberArk® Software is a global information security company that specializes in protecting and managing privileged users, applications and sensitive information to improve compliance, productivity and protect organizations against insider threats and advanced external threats. With its award-winning Privileged Identity Management, Sensitive Information Management and Privileged Session Management Suites, organizations can more effectively manage and govern data center access and activities, whether on-premise, off-premise or in the cloud, while demonstrating returns on security investments. CyberArk works with more than 850 global customers, including more than 35 percent of the Fortune 100. Headquartered in Newton, Mass., CyberArk has offices and authorized partners in North America, Europe and Asia Pacific.
