INET Deploys Largest Zimbra Synacor Email Project in Southeast Asia

BANGKOK, Thailand and BUFFALO, N.Y., Nov. 24, 2015 (GLOBE NEWSWIRE) -- Internet Thailand Public Company Limited (INET), a leading provider of ICT infrastructure services in Thailand, is pleased to announce the success of the largest hosted Email-as-a-Service (EaaS) deployment in Southeast Asia using Zimbra, a product of Synacor (NASDAQ:SYNC).

Zimbra, powers collaboration for the mobile era, connecting people and information with an extensible solution that combines both traditional and modern communication technologies. Zimbra's open platform implements deep security features as well as integrations with popular 3rd-party security applications. In addition, Zimbra has scalable deployment options ensuring complete privacy for organizations from Small and Medium Enterprises (SMEs) to Large and Highly-Regulated Enterprises in the Financial Services Industry (FSI).

With the efficiencies of their own world-class data centers, INET is able to provide a fully hosted Zimbra collaboration solution that delivers enterprise level performance as well as supports all data sovereignty and security requirements.

Mrs. Morragot Kulatumyotin, Managing Director of Internet Thailand Public Company Limited said, "*INET is pleased with the opportunities working in partnership with Synacor. This deployment, which proves Zimbra as the leader for Managed Service Providers globally, is integrated with secure cloud infrastructure from INET at the highest quality for EaaS, benefiting customers. INET has provided services for over 50,000 users, making INET the largest provider for Email as a Service using the Zimbra platform in Southeast Asia.*"

"*We are thrilled to be partnering with INET to extend our footprint in Thailand*," said Marcus Teo, Regional Vice President and General Manager, Synacor. "*By partnering with INET, we will provide greater access to Zimbra - a product of Synacor, particularly to organizations that appreciate the benefits of a collaboration solution built on an extensible platform and open standards.*"
