☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2013

or

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission File Number 1-9583

MBIA INC.

(Exact name of registrant as specified in its charter)

Connecticut
(State of incorporation)

06-1185706
(I.R.S. Employer
Identification No.)

113 King Street, Armonk, New York
(Address of principal executive offices)

10504
(Zip Code)

Registrant's telephone number, including area code: (914) 273-4545

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the Registrant is shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

As of August 1, 2013, 192,971,908 shares of Common Stock, par value \$1 per share, were outstanding.

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 1: Business Developments and Risks and Uncertainties

Summary

MBIA Inc., together with its consolidated subsidiaries, (collectively, “MBIA” or the “Company”) operates one of the largest financial guarantee insurance businesses in the industry and is a provider of asset management and advisory services. These activities are managed through three business segments: United States (“U.S.”) public finance insurance; structured finance and international insurance; and advisory services. The Company’s U.S. public finance insurance business is primarily operated through National Public Finance Guarantee Corporation and its subsidiaries (“National”), its structured finance and international insurance business is primarily operated through MBIA Insurance Corporation and its subsidiaries (“MBIA Corp.”), and its asset management and advisory services business is primarily operated through Cutwater Holdings, LLC and its subsidiaries (“Cutwater”). In addition, the Company’s asset management and advisory services business also consists of Trifinium Advisors (UK) Limited (“Trifinium”). The holding company, MBIA, and certain of its subsidiaries also manage certain other business activities, the results of which are reported in its corporate, asset/liability products, and conduit segments. The corporate segment includes revenues and expenses that arise from general corporate activities. While the asset/liability products and conduit businesses represent separate business segments, they may be referred to collectively as “wind-down operations” as the funding programs managed through those businesses are in wind-down. Refer to “Note 11: Business Segments” for further information about the Company’s reporting segments.

Business Developments

In May of 2013, MBIA Inc., together with its subsidiaries MBIA Corp. and National, entered into a comprehensive settlement agreement and related agreements (the “BofA Settlement Agreement”) with Bank of America Corporation and certain of its subsidiaries (collectively, “Bank of America”), discussed below under “Bank of America Settlement”. As a result of the BofA Settlement Agreement, the repayment of MBIA Insurance Corporation’s secured loan from National (the “National Secured Loan”) and recent credit ratings upgrades, certain barriers to re-enter the bond insurance market have been removed and the Company is currently evaluating strategies for such re-entry into the U.S. public finance market. As of June 30, 2013, National was rated A with a stable outlook by Standard & Poor’s Financial Services LLC (“S&P”) and Baa1 with a positive outlook by Moody’s Investors Service, Inc. (“Moody’s”). As of June 30, 2013, MBIA Insurance Corporation was rated B with a stable outlook by S&P and B3 with a positive outlook by Moody’s.

Bank of America Settlement

Under the terms of the BofA Settlement Agreement, MBIA Corp. received a payment of approximately \$1.7 billion, consisting of \$1.6 billion in cash and \$136 million principal amount of MBIA Inc.’s 5.70% Senior Notes due 2034. In exchange for such payment, MBIA Corp. agreed to dismiss the litigation commenced in September 2008 against Countrywide Home Loans, Inc. (“Countrywide”), among other parties, and later amended to include claims against Bank of America, relating to breaches of representations and warranties on certain MBIA-insured securitizations sponsored by Countrywide. Bank of America and MBIA have also agreed to the commutation of all of the MBIA Corp. policies held by Bank of America, which had a notional insured amount of approximately \$7.4 billion, of which \$6.1 billion were policies insuring credit default swaps (“CDS”) held by Bank of America referencing commercial real estate (“CRE”) exposures. MBIA Corp. has no further payment obligations under the commuted policies. The New York State Department of Financial Services (“NYSDFS”) advised MBIA Corp. that the NYSDFS did not object to the BofA Settlement Agreement. The \$1.6 billion of cash received in connection with the BofA Settlement Agreement is included in “Proceeds from recoveries and reinsurance” presented under the heading “Cash flows from operating activities” on the Company’s consolidated statements of cash flows.

Under the terms of the BofA Settlement Agreement, Bank of America received a five-year warrant to purchase 9.94 million shares of MBIA common stock at a price of \$9.59 per share. Bank of America has also agreed to dismiss the pending litigation between the parties concerning the restructuring transactions announced by MBIA on February 18, 2009 (the “Transformation”) and the pending litigation between the parties concerning the senior debt consent solicitation completed by MBIA in the fourth quarter of 2012. In addition, Bank of America agreed to withdraw the purported “notice of default” it sent in connection with such consent solicitation.

Under the terms of the BofA Settlement Agreement, the dismissals of the litigations referenced above are initially being filed on a “without prejudice” basis. The parties will refile such dismissals on a “with prejudice” basis provided that, within the one-year period following execution of the BofA Settlement Agreement, none of the claims released pursuant to the BofA Settlement Agreement are reinstated and neither party is required to make a payment on any such released claims. The Company views the likelihood of such an event as remote, and thus expects that the litigation dismissals will be filed on a “with prejudice” basis at the expiration of such one-year period.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 1: Business Developments and Risks and Uncertainties (continued)

MBIA Corp.'s policies insuring the residential mortgage-backed securities ("RMBS") securitizations originated by Countrywide will continue to be in full force and effect, and MBIA Corp. will continue to make timely payments of principal and interest if there are shortfalls when due under such policies. Bank of America will have no further representation and warranty liability with respect to the origination of the mortgage loans in the MBIA-insured Countrywide and certain other securitizations.

In addition, MBIA Insurance Corporation has entered into a \$500 million three-year secured revolving credit agreement with Blue Ridge Investments, L.L.C. ("Blue Ridge"), an affiliate of Bank of America (the "Blue Ridge Secured Loan"). Refer to "Note 9: Debt" for a discussion of the Blue Ridge Secured Loan.

The payment from Bank of America, including the MBIA Inc. notes, was used by MBIA Corp. to repay the remaining outstanding balance and accrued interest on the National Secured Loan. The National Secured Loan balance of \$1.7 billion as of March 31, 2013 was reduced to approximately \$1.6 billion prior to the Bank of America settlement as a result of the receipt of \$110 million in settlement of Flagstar Bank's put-back obligation.

The value of the settlement is consistent with amounts recorded on MBIA Corp.'s statutory balance sheet as of December 31, 2012. MBIA Corp.'s liquidity and capital risk profile has substantially improved as a result of the settlement.

Pursuant to the anti-dilution provisions of warrants that were issued by MBIA to Warburg Pincus Private Equity X, L.P. and certain of its affiliates ("Warburg Pincus") pursuant to an Investment Agreement, dated as of December 10, 2007, as amended and restated as of February 6, 2008, by and between MBIA and Warburg Pincus, the exercise price under such warrants was decreased and the aggregate number of shares of MBIA common stock to be issued upon exercise of such warrants was increased, in each case as a result of the issuance of the warrant to Bank of America. The adjustments to the exercise price and number of such underlying shares are not expected to have a material dilutive effect on the MBIA common stock.

Societe Generale Settlement

In May of 2013, the Company entered into an agreement with Societe Generale pursuant to which the Company commuted \$4.2 billion of gross insured exposure comprising asset-backed securities ("ABS") collateralized debt obligations ("CDOs"), structured commercial mortgage-backed securities ("CMBS") pools and CRE CDOs. The amount MBIA paid to Societe Generale in consideration of commuting its insured exposure is consistent with MBIA Corp.'s December 31, 2012 aggregate statutory loss reserves for the exposures commuted. Also, pursuant to the agreement, Societe Generale agreed to dismiss the pending litigation between the parties concerning the Transformation, which includes any appeals of the decision denying the Article 78 petition and the plenary case.

Residential Capital LLC Agreement

In May of 2013, the Company and the other Consenting Claimants, Residential Capital LLC ("ResCap") and Ally Financial Inc. ("Ally"), agreed to the terms of a comprehensive plan agreement to support ResCap's Chapter 11 plan. The confirmation of ResCap's Chapter 11 plan would resolve MBIA Corp.'s claims against the Residential Funding Company, LLC ("RFC"), GMAC Mortgage LLC ("GMAC") and ResCap estates, and Ally. In June of 2013, the bankruptcy court issued a Memorandum Opinion approving the Plan Support Agreement (the "Plan"). The Plan is now subject to voting by creditors as well as a confirmation hearing by the bankruptcy court. There can be no assurance that the Plan will be confirmed. Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" for a discussion of the ResCap agreement.

Transformation Litigation

Subsequent to the BofA Settlement Agreement and the Societe Generale settlement, all litigation brought originally by the group of eighteen domestic and international financial institutions relating to the establishment of National has been resolved.

Other

As of June 30, 2013, the liquidity position of MBIA Inc., which consists of the liquidity positions of the Company's corporate segment and asset/liability products segment, was \$327 million compared with \$239 million as of December 31, 2012. During the six months ended June 30, 2013, \$115 million was released from an escrow account under the MBIA group's tax sharing agreement (the "Tax Escrow Account"), which resulted in an increase to MBIA's liquidity position. Management believes that MBIA can support its operating needs for the foreseeable future primarily from its existing liquidity position, expected subsidiary dividends and additional anticipated releases of assets from the Tax Escrow Account, which releases are subject to the risks of National incurring net tax losses in the future and/or declines in the value of the assets held in the Tax Escrow Account. As of June 30, 2013 and December 31, 2012, MBIA Corp.'s cash and liquid assets were \$92 million and \$345 million, respectively. The Company believes MBIA Corp.'s current liquidity position, together with future cash inflows and amounts available under the Blue Ridge Secured Loan, is adequate to make expected future claim payments.

MBIA Inc. and Subsidiaries**Notes to Consolidated Financial Statements (Unaudited)****Note 1: Business Developments and Risks and Uncertainties (continued)**

The combination of commutation payments to reduce liabilities and claim payments have placed liquidity pressure on MBIA Corp. MBIA Corp. continues to seek to reduce both the absolute amount and the volatility of its obligations and potential future claim payments through the execution of commutations of insurance policies. During the six months ended June 30, 2013, MBIA Corp. commuted \$19.9 billion of gross insured exposure, primarily comprising structured CMBS pools, investment grade CDOs, ABS CDOs, first-lien subprime RMBS, high yield corporate CDOs, CRE CDOs, structured insurance securities, and first-lien alternative A-paper RMBS.

Risks and Uncertainties

The Company's financial statements include estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. The outcome of certain significant risks and uncertainties could cause the Company to revise its estimates and assumptions or could cause actual results to differ from the Company's estimates. While the Company believes it continues to have sufficient capital and liquidity to meet all of its expected obligations, if one or more possible adverse outcomes were to be realized, its statutory capital, financial position, results of operations and cash flows could be materially and adversely affected. Significant risks and uncertainties that could affect amounts reported in the Company's financial statements in future periods include, but are not limited to, the following:

- The amount and timing of potential claims from the Company's second-lien RMBS and remaining insured CMBS pools are potentially volatile, as are the projected collections of excess spread and the remaining put-back recoverables. However, management's expected liquidity and capital forecasts for MBIA Corp. for 2013, which include expected availability of draws under the Blue Ridge Secured Loan and expected recoveries from the ResCap agreement, reflect adequate resources to pay expected claims. Further, the remaining insured portfolio, aside from these exposures, could deteriorate and result in loss reserves and claim payments. While management believes MBIA Corp. will have adequate resources to pay expected claims, if MBIA Corp. experiences higher than expected claim payments or is unable to commute the remaining exposures that represent substantial risk to the Company, MBIA Corp. may ultimately have insufficient resources to continue to pay claims, which could cause the NYSDFS to put MBIA Insurance Corporation into a rehabilitation or liquidation proceeding. Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" for information about MBIA Corp.'s reserves and recoveries.
- MBIA Inc. continues to have liquidity risk. If invested asset performance deteriorates, or the flow of dividends from subsidiaries was interrupted, its liquidity position would be eroded over time. However, management believes that MBIA Inc. has sufficient liquidity resources to meet all of its obligations for the foreseeable future. In order to meet its liquidity requirements, MBIA Inc. may use free cash or other assets or use its ability to finance through intercompany or third-party facilities, although there can be no assurance that these strategies will be available or adequate. A failure by MBIA Inc. to settle liabilities that are also insured by MBIA Corp. could result in claims on MBIA Corp.
- The Company's ability to commute insured transactions is limited by available liquidity, including the availability of the Blue Ridge Secured Loan, recoveries from the ResCap agreement and the use of other available financing structures and liquidity, some of which could be subject to regulatory approval by the NYSDFS and/or the United Kingdom's Prudential Regulation Authority. The Company's primary strategy for managing its CMBS pool and ABS CDO exposures has been commutations. There can be no assurance that the Company will be able to fund further commutations through borrowings or otherwise. Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" for information about the Company's estimate of losses on its exposures.
- As of June 30, 2013, MBIA Insurance Corporation was not in compliance with a requirement under the New York Insurance Law ("NYIL") to hold qualifying assets in an amount necessary to satisfy its contingency reserves. MBIA Insurance Corporation has reported the deficit and has requested approval from the NYSDFS, to release a portion of its contingency reserves as of September 30, 2012, December 31, 2012, March 31, 2013, and June 30, 2013. All of these requests were disapproved by the NYSDFS. In addition, as of June 30, 2013, MBIA Insurance Corporation reported an overage related to its single risk limits under NYIL. MBIA Insurance Corporation previously filed a formal notification with the NYSDFS regarding this overage and submitted a plan to achieve compliance with its limits. While the NYSDFS has not taken action against MBIA Insurance Corporation, the NYSDFS may restrict MBIA Insurance Corporation from making commutation or other payments or may impose other remedial actions for failing to meet these requirements.
- Changes in fair value of insured credit derivatives can be caused by general market conditions and the volatility in the relationship between MBIA's credit spreads and those underlying collateral assets on insured credit derivatives may cause significant unrealized gains and losses in the Company's reported results of operations. Refer to "Note 6: Fair Value of Financial Instruments" for information about the Company's valuation of insured credit derivatives.

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 2: Significant Accounting Policies

The Company has disclosed its significant accounting policies in “Note 2: Significant Accounting Policies” in the Notes to Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012. The following significant accounting policies provide an update to those included in the Company’s Annual Report on Form 10-K.

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and, accordingly, do not include all of the information and disclosures required by accounting principles generally accepted in the United States of America (“GAAP”) for annual periods. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Annual Report on Form 10-K for the year ended December 31, 2012. The accompanying consolidated financial statements have not been audited by an independent registered public accounting firm in accordance with the standards of the Public Company Accounting Oversight Board (U.S.), but in the opinion of management such financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for the fair statement of the Company’s consolidated financial position and results of operations. All material intercompany balances and transactions have been eliminated.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. As additional information becomes available or actual amounts become determinable, the recorded estimates are revised and reflected in operating results.

The results of operations for the three and six months ended June 30, 2013 may not be indicative of the results that may be expected for the year ending December 31, 2013. The December 31, 2012 consolidated balance sheet was derived from audited financial statements, but does not include all disclosures required by GAAP for annual periods. Certain amounts have been reclassified in comparison to prior years’ financial statements to conform to the current presentation. Such reclassifications had no impact on total revenues, expenses, assets, liabilities, shareholders’ equity, operating cash flows, investing cash flows, or financing cash flows for all periods presented.

Note 3: Recent Accounting Pronouncements

Recently Adopted Accounting Standards

Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (ASU 2013-02)

In February 2013, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2013-02, “Comprehensive Income (Topic 220)—Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income” that requires an entity to present information about the amounts reclassified out of accumulated other comprehensive income (“AOCI”) by component and to present significant amounts reclassified out of AOCI by the respective line items of net income. The amendment only affects the Company’s disclosures and does not affect the Company’s consolidated balance sheets, results of operations, or cash flows. The Company adopted this standard in the first quarter of 2013.

Disclosures about Offsetting Assets and Liabilities (ASU 2011-11)

In December 2011, the FASB issued ASU 2011-11, “Balance Sheet (Topic 210)—Disclosures about Offsetting Assets and Liabilities.” ASU 2011-11 creates new disclosure requirements about the nature of the Company’s rights of setoff and related arrangements associated with its financial instruments and derivative instruments. This amendment does not change the existing offsetting eligibility criteria or the permitted balance sheet presentation for those instruments that meet the eligibility criteria. The disclosure requirements are effective for the Company beginning in the first quarter of 2013. In January 2013, the FASB issued ASU 2013-01, “Balance Sheet (Topic 210)—Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities.” ASU 2013-01 clarifies that ASU 2011-11 applies only to derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with specific criteria contained in the FASB Accounting Standards Codification or subject to a master netting arrangement or similar agreement. These standards only affect the Company’s disclosures and do not affect the Company’s consolidated balance sheets, results of operations, or cash flows. The Company adopted this standard in the first quarter of 2013.

MBIA Inc. and Subsidiaries**Notes to Consolidated Financial Statements (Unaudited)****Note 3: Recent Accounting Pronouncements (continued)*****Recent Accounting Developments******Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (ASU 2013-11)***

In July 2013, the FASB issued ASU 2013-11, "Income Taxes (Topic 740)—Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists". ASU 2013-11 requires presentation of an unrecognized tax benefit ("UTB") as a reduction to a deferred tax asset when a net operating loss ("NOL") carryforward, a similar tax loss, or a tax credit carryforward exists in the same tax year and jurisdiction as the UTB. The ASU does not affect the recognition or measurement of uncertain tax positions under Accounting Standards Codification 740 and does not affect any related tax disclosures. This ASU is effective for the Company for all financial statements beginning on or after January 1, 2014 with early adoption permitted. The Company currently presents any UTBs as a reduction to a deferred tax asset in accordance with this ASU as all of its UTBs relate to the same tax years and jurisdictions in which NOLs exist, therefore, the ASU will not affect the Company's consolidated balance sheets, results of operations or cash flows.

Note 4: Variable Interest Entities***Structured Finance and International Insurance***

Through MBIA's structured finance and international insurance segment, the Company provides credit protection to issuers of obligations that may involve issuer-sponsored special purpose entities ("SPEs"). An SPE may be considered a variable interest entity ("VIE") to the extent the SPE's total equity at risk is not sufficient to permit the SPE to finance its activities without additional subordinated financial support or its equity investors lack any one of the following characteristics: (i) the power to direct the activities of the SPE that most significantly impact the entity's economic performance or (ii) the obligation to absorb the expected losses of the entity or the right to receive the expected residual returns of the entity. A holder of a variable interest or interests in a VIE is required to assess whether it has a controlling financial interest, and thus is required to consolidate the entity as primary beneficiary. An assessment of a controlling financial interest identifies the primary beneficiary as the variable interest holder that has both of the following characteristics: (i) the power to direct the activities of the VIE that most significantly impact the entity's economic performance and (ii) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE. The primary beneficiary is required to consolidate the VIE. An ongoing reassessment of controlling financial interest is required to be performed based on any substantive changes in facts and circumstances involving the VIE and its variable interests.

The Company evaluates issuer-sponsored SPEs initially to determine if an entity is a VIE, and is required to reconsider its initial determination if certain events occur. For all entities determined to be VIEs, MBIA performs an ongoing reassessment to determine whether its guarantee to provide credit protection on obligations issued by VIEs provides the Company with a controlling financial interest. Based on its ongoing reassessment of controlling financial interest, the Company determines whether a VIE is required to be consolidated or deconsolidated.

The Company makes its determination for consolidation based on a qualitative assessment of the purpose and design of a VIE, the terms and characteristics of variable interests of an entity, and the risks a VIE is designed to create and pass through to holders of variable interests. The Company generally provides credit protection on obligations issued by VIEs, and holds certain contractual rights according to the purpose and design of a VIE. The Company may have the ability to direct certain activities of a VIE depending on facts and circumstances, including the occurrence of certain contingent events, and these activities may be considered the activities of a VIE that most significantly impact the entity's economic performance. The Company generally considers its guarantee of principal and interest payments of insured obligations, given nonperformance by a VIE, to be an obligation to absorb losses of the entity that could potentially be significant to the VIE. At the time the Company determines it has the ability to direct the activities of a VIE that most significantly impact the economic performance of the entity based on facts and circumstances, MBIA is deemed to have a controlling financial interest in the VIE and is required to consolidate the entity as primary beneficiary. The Company performs an ongoing reassessment of controlling financial interest that may result in consolidation or deconsolidation of any VIE.

Wind-down Operations

In its asset/liability products segment, the Company invests in obligations issued by issuer-sponsored SPEs which are included in fixed-maturity securities held as available-for-sale ("AFS"). The Company evaluates issuer-sponsored SPEs to determine if the entity is a VIE. For all entities determined to be VIEs, the Company evaluates whether its investment is determined to have both of the characteristics of a controlling financial interest in the VIE. The Company performs an ongoing reassessment of controlling financial interests in issuer-sponsored VIEs based on investments held. MBIA's wind-down operations do not have a controlling financial interest in any issuer-sponsored VIEs and are not the primary beneficiary of any issuer-sponsored VIEs.

Note 4: Variable Interest Entities (continued)

In the conduit segment, the Company has managed and administered two conduits that invested primarily in debt securities and were funded through the issuance of VIE notes and long-term debt. MBIA Corp. insures the debt obligations of the conduits, and provides credit protection on certain assets held by the conduits. The conduits are VIEs and are consolidated by the Company as primary beneficiary. In 2012, all debt securities held by one of the conduits were entirely repaid, and the proceeds were used to repay all outstanding long-term debt of this conduit. The Company subsequently dissolved this conduit, and no longer provides any related credit protection.

Nonconsolidated VIEs

Insurance

The following tables present the total assets of nonconsolidated VIEs in which the Company holds a variable interest as of June 30, 2013 and December 31, 2012, through its insurance operations. The following tables also present the Company's maximum exposure to loss for nonconsolidated VIEs and carrying values of the assets and liabilities for its interests in these VIEs as of June 30, 2013 and December 31, 2012. The Company has aggregated nonconsolidated VIEs based on the underlying credit exposure of the insured obligation. The nature of the Company's variable interests in nonconsolidated VIEs is related to financial guarantees, insured CDS contracts and any investments in obligations issued by nonconsolidated VIEs.

The maximum exposure to loss as a result of MBIA's variable interests in VIEs is represented by insurance in force. Insurance in force is the maximum future payments of principal and interest, net of cessions to reinsurers, which may be required under commitments to make payments on insured obligations issued by nonconsolidated VIEs.

Other

During the first quarter of 2013, Trifinium began managing a VIE that issues notes for the purpose of funding loans to the United Kingdom ("U.K.") social housing sector. Assets of the VIE totaled approximately \$135 million as of June 30, 2013. Trifinium holds de minimis variable interests in the VIE, has no obligation or commitment to provide the financial support or liquidity to the VIE, and is not the primary beneficiary.

Consolidated VIEs

The carrying amounts of assets and liabilities of consolidated VIEs were \$6.8 billion and \$5.7 billion, respectively, as of June 30, 2013, and \$8.3 billion and \$7.3 billion, respectively, as of December 31, 2012. The carrying amounts of assets and liabilities are presented separately in "Assets of consolidated variable interest entities" and "Liabilities of consolidated variable interest entities" on the Company's consolidated balance sheets. Additional VIEs are consolidated or deconsolidated based on an ongoing reassessment of controlling financial interest, when events occur or circumstances arise, and whether the ability to exercise rights that constitute power to direct activities of any VIEs are present according to the design and characteristics of these entities. No additional VIEs were consolidated during the six months ended June 30, 2013 and 2012. Net realized gains related to the deconsolidation of VIEs were \$1 million for the three and six months ended June 30, 2013, and no net realized gains or losses were recognized related to the deconsolidation of VIEs for the same periods in 2012.

Holders of insured obligations of issuer-sponsored VIEs related to the Company's structured finance and international insurance segment do not have recourse to the general assets of MBIA. In the event of nonpayment of an insured obligation issued by a consolidated VIE, the Company is obligated to pay principal and interest, when due, on the respective insured obligation only. The Company's exposure to consolidated VIEs is limited to the credit protection provided on insured obligations and any additional variable interests held by MBIA. Creditors of the conduits do not have recourse to the general assets of MBIA apart from the financial guarantee insurance policies provided by MBIA Corp. on insured obligations issued by the conduits.

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves

Loss and Loss Adjustment Expense Process

As of June 30, 2013, the majority of the Company's case basis reserves and insurance loss recoveries recorded in accordance with GAAP were related to insured second-lien and first-lien RMBS transactions. These reserves and recoveries do not include estimates for policies insuring credit derivatives. Policies insuring credit derivative contracts are accounted for as derivatives and carried at fair value under GAAP. The fair values of insured derivative contracts are influenced by a variety of market and transaction-specific factors that may be unrelated to potential future claim payments under the Company's insurance policies. In the absence of credit impairments on insured derivative contracts or the early termination of such contracts at a loss, the cumulative unrealized losses recorded from fair valuing these contracts should reverse before or at the maturity of the contracts.

Notwithstanding the difference in accounting under GAAP for financial guarantee policies and the Company's insured derivatives, insured derivatives have similar terms, conditions, risks, and economic profiles to financial guarantee insurance policies, and, therefore, are evaluated by the Company for loss (referred to as credit impairment herein) and loss adjustment expense ("LAE") periodically in a manner similar to the way that loss and LAE reserves are estimated for financial guarantee insurance policies. Credit impairments represent actual payments and collections plus the present value of estimated expected future claim payments, net of recoveries. MBIA Insurance Corporation's expected future claim payments for insured derivatives were discounted using a rate of 5.72%, the same rate it used to calculate its statutory loss reserves as of June 30, 2013. These credit impairments, calculated in accordance with statutory accounting principles ("U.S. STAT"), differ from the fair values recorded in the Company's consolidated financial statements. The Company considers its credit impairment estimates as critical information for investors as it provides information about loss payments the Company expects to make on insured derivative contracts. As a result, the following loss and LAE process discussion includes information about loss and LAE activity recorded in accordance with GAAP for financial guarantee insurance policies and credit impairments estimated in accordance with U.S. STAT for insured derivative contracts. Refer to "Note 6: Fair Value of Financial Instruments" included herein for additional information about the Company's insured credit derivative contracts.

To date, the Company has resolved substantially all of its contract claims (referred to as "put-back" claims) related to those mortgage loans whose inclusion in insured securitizations failed to comply with representations and warranties ("ineligible loans"), with the exception of those ineligible loans securitized by Credit Suisse 2007-2 in the home equity mortgage trust ("HEMT") securitization. Credit Suisse has challenged the Company's assessment of the ineligibility of individual mortgage loans and the dispute is the subject of litigation for which there is no assurance that the Company will prevail.

RMBS Case Basis Reserves and Recoveries (Financial Guarantees)

The Company's RMBS reserves and recoveries relate to financial guarantee insurance policies. The Company calculated RMBS case basis reserves as of June 30, 2013 for both second-lien and first-lien RMBS transactions using a process called the "Roll Rate Methodology." The Roll Rate Methodology is a multi-step process using a database of loan level information, a proprietary internal cash flow model, and a commercially available model to estimate expected ultimate cumulative losses on insured bonds. "Roll Rate" is defined as the probability that current loans become delinquent and that loans in the delinquent pipeline are charged-off or liquidated. Generally, Roll Rates are calculated for the previous three months and averaged. The loss reserve estimates are based on a probability-weighted average of three scenarios of loan losses (base case, stress case, and an additional stress case).

In calculating ultimate cumulative losses for RMBS, the Company estimates the amount of loans that are expected to be charged-off (deemed uncollectible by servicers of the transactions) or liquidated in the future. The Company assumes that charged-off loans have zero recovery values.

Second-lien RMBS Reserves

The Company's second-lien RMBS case basis reserves as of June 30, 2013 relate to RMBS backed by home equity lines of credit ("HELOC") and closed-end second mortgages ("CES").

The Roll Rates for 30-59 day delinquent loans and 60-89 day delinquent loans are calculated on a transaction-specific basis. The Company assumes that the Roll Rate for 90+ day delinquent loans, excluding foreclosures and Real Estate Owned ("REO") is 95%. The Roll Rates are applied to the amounts in the respective delinquency buckets based on delinquencies as of May 31, 2013 to estimate future losses from loans that are delinquent as of the current reporting period.

MBIA Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)**Note 5: Loss and Loss Adjustment Expense Reserves (continued)**

Roll Rates for loans that are current as of May 31, 2013 ("Current Roll to Loss") are also calculated on a transaction-specific basis. A proportion of loans reported current as of May 31, 2013 is assumed to become delinquent every month, at a Current Roll to Loss rate that persists at a high level for a time and subsequently starts to decline. A key assumption in the model is the period of time in which the Company projects high levels of Current Roll to Loss to persist. The Company runs multiple scenarios, each with varying periods of time, for which the high levels of Current Roll to Loss rates persist. Loss reserves are calculated by using a weighted average of these scenarios, with the majority of the probability assigned to stressful scenarios (stress case and additional stress case), where the high levels of Current Roll to Loss rates persist for six or twenty four months before reverting to historic levels. In the base case scenario, the Company assumes that the Current Roll to Loss begins to decline immediately and continues to decline over the next six months to 25% of their levels as of May 31, 2013. For example, in the base case, as of May 31, 2013, if the amount of current loans which become 30-59 days delinquent is 10%, and recent performance suggests that 30% of those loans will be charged-off, the Current Roll to Loss for the transaction is 3%. In the base case, it is then assumed that the Current Roll to Loss will reduce linearly to 25% of its original value over the next six months (i.e., 3% will linearly reduce to 0.75% over the six months from June 2013 to November 2013). After that six-month period, the Company further reduces the Current Roll to Loss to 0% by early 2014 with the expectation that the performing seasoned loans will eventually result in loan performance reverting to lower levels of default consistent with history.

In addition, in the Company's loss reserve models for transactions secured by HELOCs, the Company considers borrower draw and prepayment rates and factors that could affect the excess spread generated by current loans, which offsets losses and reduces payments. For HELOCs, the current three-month average draw rate is generally used to project future draws on the line. For HELOCs and transactions secured by fixed-rate CES, the three-month average conditional prepayment rate is generally used to start the projection for trends in voluntary principal prepayments. Due to the current volatility in mortgage prepayment rates, which influence mortgage refinancing and voluntary principal prepayment rates, the Company used historical average mortgage rates to model its loss reserves in the second quarter of 2013. Projected cash flows are also based on an assumed constant basis spread between floating rate assets and floating rate insured debt obligations (the difference between Prime and London Interbank Offered Rate ("LIBOR") interest rates, minus any applicable fees). For all transactions, cash flow models consider allocations and other structural aspects of the transactions, including managed amortization periods, rapid amortization periods and claims against MBIA Corp.'s insurance policy consistent with such policy's terms and conditions. In developing multiple loss scenarios, stress is applied by elongating the Current Roll to Loss rate for various periods, simulating a slower improvement in the transaction performance. The estimated net claims from the procedure above are then discounted using a risk-free rate to a net present value reflecting MBIA's general obligation to pay claims over time and not on an accelerated basis. The above assumptions represent MBIA's best estimates of how transactions will perform over time.

The Company monitors portfolio performance on a monthly basis against projected performance, reviewing delinquencies, Roll Rates, and prepayment rates (including voluntary and involuntary). However, loan performance remains difficult to predict and losses may exceed expectations. In the event of a material deviation in actual performance from projected performance, the Company would increase or decrease the case basis reserves accordingly. When actual performance remains at peak levels, the Company's includes an additional six month period when calculating the probability-weighted outcome. The addition to the Company's second-lien RMBS case basis reserves, before considering potential recoveries, would be approximately \$90 million.

Second-lien RMBS Recoveries

As of June 30, 2013, the Company recorded estimated recoveries of \$1.1 billion, gross of income taxes, related to second-lien RMBS put-back claims on ineligible mortgage loans, consisting of \$18 million included in "Insurance loss recoverable" and \$1.1 billion included in "Loan repurchase commitments" presented under the heading "Assets of consolidated variable interest entities" on the Company's consolidated balance sheets. As of June 30, 2013 and December 31, 2012, the Company's estimated recoveries after income taxes calculated at the federal statutory rate of 35%, were \$736 million and \$2.3 billion, respectively, which was 24% and 73% of the consolidated total shareholders' equity of MBIA, excluding preferred stock of subsidiaries and noncontrolling interests, respectively. As of June 30, 2013, the remaining estimated recoveries relate to the Company's claims based on ineligible mortgage loans asserted against Credit Suisse and the bankruptcy estates of RFC, GMAC and ResCap.

On May 14, 2012, ResCap and its wholly-owned subsidiary companies, RFC and GMAC, each filed for bankruptcy protection under Chapter 11 of the United States Bankruptcy Code. MBIA asserted claims based on the inclusion of ineligible loans against RFC, GMAC and ResCap, based upon the direct contractual relationship between the Company, RFC and GMAC.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

As of May 23, 2013, Ally, ResCap, RFC, GMAC and the Consenting Claimants (which includes MBIA), among other parties, executed a term sheet and supplemental term sheet agreeing to, among other things, a settlement amount of \$796 million (based upon an estimate of estate values at the time of the agreement, which are subject to change) to be paid to MBIA as part of a proposed plan to resolve claims against Ally and RFC, GMAC and ResCap. The settlement and anticipated recoveries are consistent with the put-back recoveries recorded by the Company. The agreement will be implemented through a plan of reorganization in ResCap's Chapter 11 cases, subject to anticipated bankruptcy court approval in the fall of 2013. In June of 2013, the bankruptcy court issued a Memorandum Opinion approving the Plan. MBIA anticipates an initial distribution of funds to the Company and other claimants in late 2013. This anticipated timeline may change in the course of events in the bankruptcy court plan confirmation process.

The Company continues to refine the indicative scenarios used to calculate put-back recoveries for ResCap based upon information received during the bankruptcy process. The Company has made additional adjustments to its recovery calculations related to ResCap in consideration of the agreed upon recovery amount as described in the executed term sheet, supplemental term sheet and plan support agreement submitted in motions filed in May of 2013.

In addition, the Company believes that it will prevail in enforcing its contractual put-back rights against Credit Suisse. Based on the Company's assessment of the strength of these claims, the Company believes it is entitled to collect the full amount of its incurred losses, and interest on amounts paid. However, uncertainty remains with respect to the ultimate outcome of the litigation with Credit Suisse, which is contemplated in the scenario based-modeling the Company utilizes. The Credit Suisse recovery scenarios are based on the amount of incurred losses measured against certain probabilities of ultimate resolution of the dispute with Credit Suisse over the inclusion of ineligible mortgage loans in the HEMT securitization. Most of the probability weight is assigned to partial recovery scenarios.

Expected cash inflows from recoveries are discounted using the current risk-free discount rates associated with the underlying transaction's cash flows which ranged from 1.5% to 2.5%, depending upon the transaction's expected average life, which ranged from 5.2 years to 9.6 years.

The Company's recoveries have been, and remain based on either salvage rights, the rights conferred to MBIA through the transactional documents (inclusive of the insurance agreement), or subrogation rights embedded within financial guarantee insurance policies. Expected salvage and subrogation recoveries, as well as recoveries from other remediation efforts, reduce the Company's claim liability. Once a claim payment has been made, the claim liability has been satisfied and MBIA's right to recovery is no longer considered an offset to future expected claim payments, and it is recorded as a salvage asset. The amount of recoveries recorded by the Company is limited to paid claims plus the present value of projected future claim payments. As claim payments are made, the recorded amount of potential recoveries may exceed the remaining amount of the claim liability for a given policy.

The Company consistently reviews the approach and assumptions it applies to calculate put-back recoveries. The same transactional documents that provide the Company with its put-back rights against Credit Suisse also provide that the Company is entitled to reimbursement of interest on paid claims at a prescribed interest rate. Following Judge Jed Rakoff's decision on February 7, 2013 in the Assured Guaranty v. Flagstar case (Assured Guaranty Municipal Corp. v. Flagstar Bank, 11-cv-02375, U.S. District Court, Southern District of New York (Manhattan)), in which he confirmed Assured Guaranty's analogous right to recover contractual interest in addition to claims paid, the Company has refined its put-back recovery assumptions against Credit Suisse to increase the probability that it will be reimbursed for contractual interest owed on paid claims. Consistent with the Company's probability based put-back recovery calculations, it has determined the interest owed contemplating litigation risk and repayment risk, as well as the potential value in the context of a settlement. The Company continues to maintain that in the context of its put-back litigation, the Company is entitled to receive interest at the New York State statutory rate. However, the Company currently calculates its put-back recoveries using the contractual interest rate, which is lower than the New York State statutory rate.

To date, MBIA has either settled or agreed to settle the majority of the Company's put-back claims, with only Credit Suisse remaining as an outstanding dispute. The settlement amounts have been consistent with the put-back recoveries previously included in the Company's financial statements. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the BofA Settlement Agreement. Additional information on the status of the litigation against Credit Suisse can be found in the "Recovery Litigation" discussion within "Note 14: Commitments and Contingencies".

The Company's assessment of the remaining unsettled recoveries related to insured Credit Suisse second-lien RMBS is principally based on the following factors:

1. the settlement of the majority of the Company's put-back claims with sellers/servicers, including those with Bank of America and Flagstar Bank in May of 2013;

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

2. Assured Guaranty's favorable court ruling in its put-back litigation against Flagstar Bank, awarding it the vast majority of the claims paid on the relevant transactions plus interest, fees and expenses, as well as their subsequent settlement with Flagstar Bank, which resolved Assured Guaranty's put-back claims; and
3. the court rulings in MBIA's put-back litigations.

The Company continues to consider all relevant facts and circumstances, including the factors described above, in developing its assumptions on expected cash inflows, probability of potential recoveries (including the outcome of litigation) and recovery period. The estimated amount and likelihood of potential recoveries are expected to be revised and supplemented to the extent there are developments in the pending litigation and/or changes to the financial condition of Credit Suisse. While the Company believes it will be successful in realizing recoveries from contractual claims, the ultimate amounts recovered may be materially different from those recorded by the Company given the inherent uncertainty of the manner of resolving the claims (e.g., litigation) and the assumptions used in the required estimation process for accounting purposes which are based, in part, on judgments and other information that are not easily corroborated by historical data or other relevant benchmarks.

All of the Company's policies insuring second-lien RMBS for which litigation has been initiated against sellers/servicers are in the form of financial guarantee insurance contracts. In accordance with GAAP, the Company has not recorded a gain contingency with respect to pending litigation.

First-lien RMBS Reserves

The Company's first-lien RMBS case basis reserves as of June 30, 2013, which primarily relate to RMBS backed by alternative A-paper and subprime mortgage loans, were determined using the Roll Rate Methodology. The Company assumes that the Roll Rate for loans in foreclosure, REO and bankruptcy are 90%, 90% and 75%, respectively. Roll Rates for current, 30-59 day delinquent loans, 60-89 day delinquent loans and 90+ day delinquent loans are calculated on a transaction-specific basis. The Current Roll to Loss rates stay at the May 31, 2013 level for one month before declining to 25% of this level over a 24-month period.

The Company estimates future losses by probability-weight averaging three different scenarios: base; stress; and additional stress. The three scenarios differ in the roll rates to loss of 90+ day delinquent loans. In the base scenario, the Company uses deal-specific roll rates obtained from historic loan level roll rate data. In the stress scenario, the Company assumes a 90% roll rate for all 90+ day delinquent loans. In the additional stress scenario, the roll rates for each deal are an average of the deal-specific roll rate used in the base scenario and the 90% rate. The Roll Rates are applied to the amounts in each deal's respective 90+ delinquency bucket based on delinquencies as of May 31, 2013 in order to estimate future losses from loans that are delinquent as of June 30, 2013.

In calculating ultimate cumulative losses for first-lien RMBS, the Company estimates the amount of loans that are expected to be liquidated through foreclosure or short sale. The time to liquidation for a defaulted loan is specific to the loan's delinquency bucket with the latest three-month average loss severities generally used to start the projection for trends in loss severities at loan liquidation. The loss severities are reduced over time to account for reduction in the amount of foreclosure inventory, anticipated future increases in home prices, principal amortization of the loan and government foreclosure moratoriums.

ABS CDOs (Financial Guarantees and Insured Derivatives)

MBIA's insured ABS CDOs are transactions that include a variety of collateral ranging from corporate bonds to structured finance assets (which includes but are not limited to RMBS related collateral, ABS CDOs, corporate CDOs and collateralized loan obligations). These transactions were insured as either financial guarantee insurance policies or credit derivatives with the majority currently insured in the form of financial guarantees. Since the fourth quarter of 2007, MBIA's insured par exposure within the ABS CDO portfolio has been substantially reduced through a combination of terminations and commutations. Accordingly, as of June 30, 2013, the insured par exposure of the ABS CDO financial guarantee insurance policies and credit derivatives portfolio has declined by approximately 96% of the insured amount as of December 31, 2007.

The Company's ABS CDOs originally benefited from two sources of credit enhancement. First, the subordination in the underlying securities collateralizing the transaction must be fully eroded and second, the subordination below the insured tranche in the CDO transaction must be fully eroded before the insured tranche is subject to a claim. The Company's payment obligations after a default are timely interest and ultimate principal.

MBIA Inc. and Subsidiaries**Notes to Consolidated Financial Statements (Unaudited)****Note 5: Loss and Loss Adjustment Expense Reserves (continued)**

The primary factor in estimating reserves on insured ABS CDO policies written as financial guarantee insurance policies and in estimating impairments on insured ABS CDO credit derivatives is the losses associated with the underlying collateral in the transactions. MBIA's approach to establishing reserves or impairments in this portfolio employs a methodology which is similar to other structured finance asset classes insured by MBIA. The Company utilizes up to a total of four probability-weighted scenarios in order to estimate its reserves or impairments for ABS CDOs.

As of June 30, 2013, the Company established loss and LAE reserves totaling \$86 million related to ABS CDO financial guarantee insurance policies after the elimination of \$210 million as a result of consolidating VIEs. For the six months ended June 30, 2013, the Company had a benefit of \$48 million of losses and LAE recorded in earnings related to ABS CDO financial guarantee insurance policies after the elimination of a \$26 million benefit as a result of consolidating VIEs. In the event of further deteriorating performance of the collateral referenced or held in ABS CDO transactions, the amount of losses estimated by the Company could increase substantially.

Credit Impairments Related to Structured CMBS Pools, CRE CDOs and CRE Loan Pools (Financial Guarantees and Insured Derivatives)

Most of the structured CMBS pools, CRE CDOs and CRE loan pools insured by MBIA are accounted for as insured credit derivatives and are carried at fair value in the Company's consolidated financial statements. Since the Company's insured credit derivatives have similar terms, conditions, risks, and economic profiles to its financial guarantee insurance policies, the Company evaluates them for impairment in the same way that it estimates loss and LAE for its financial guarantee policies. The following discussion provides information about the Company's process for estimating credit impairments on these contracts using its statutory loss reserve methodology, determined as the present value of the probability-weighted potential future losses, net of estimated recoveries, across multiple scenarios, plus actual payments and collections.

The Company has developed multiple scenarios to consider the range of potential outcomes in the CRE market and their impact on MBIA. The approaches require substantial judgments about the future performance of the underlying loans, and include the following:

- The first approach considers the range of commutation agreements achieved since 2010 through June 30, 2013, which included 84 structured CMBS pools, CRE CDOs and CRE loan pool policies totaling \$41.6 billion of gross insured exposure. The Company considers the range of commutations achieved over the past several years with multiple counterparties. This approach results in an estimated price to commute the remaining policies with price estimates, based on this experience. It is customized by counterparty and is dependent on the level of dialogue with the counterparty and the credit quality and payment profile of the underlying exposure.
- The second approach considers current delinquency rates and uses current and projected net operating income ("NOI") and capitalization rates ("Cap Rates") to project losses under two scenarios. Loans are stratified by size with larger loans being valued utilizing lower Cap Rates than for smaller loans. These scenarios also assume that Cap Rates and NOIs remain flat for the near term and then begin to improve gradually. Additionally, in these scenarios, any loan with a balance greater than \$75 million with a debt service coverage ratio ("DSCR") less than 1.0x, or that was reported as being in any stage of delinquency, was reviewed individually so that performance and loss severity could be more accurately determined. Specific loan level assumptions for this large loan subset were then incorporated into these scenarios, as well as specific assumptions regarding certain smaller loans when there appeared to be a material change in the asset's financial or delinquency performance over the preceding six months. As the Company continues to increase the level of granularity in its individual loan assessments, it analyzes and adjusts assumptions for loans with certain mitigating attributes, such as no lifetime delinquency, recent appraisals indicating sufficient value and large capital reserve levels. These scenarios project different levels of additional defaults with respect to loans that are current. This approach makes use of the most recent financial statements available at the property level.
- The last approach is based on a proprietary model developed by reviewing performance data on over 80,000 securitized CRE loans originated between 1992 and 2011. The time period covered during the performance review includes the years 2006 through 2011. The Company believes that these five years represent an appropriate time period in which to conduct a performance review because they encompass a period of extreme stress in the economy and the CRE market.

Based on a review of the data, the Company found property type and the DSCR to be the most significant determinants of a loan's default probability, with other credit characteristics less influential. As a result, the Company developed a model in which the loans were divided into 168 representative cohorts based on their DSCR and property type. For each of these cohorts, the Company calculated the average annual probability of default, and then ran Monte Carlo simulations to estimate the timing of defaults. In addition, the model incorporated the following logic:

- NOI and Cap Rates were assumed to remain at current levels for loans in the Company's classified portfolio, resulting in no modifications or extensions under the model, other than as described in the next bullet point, to reflect the possibility that the U.S. economy and CRE market could experience no growth for the foreseeable future.
- Any valuation estimates obtained by special servicers since a loan's origination as well as the Company's individual large loan level analysis for loans with balances greater than \$75 million were incorporated as described in the second approach. However, in the last approach no adjustments were made for loans lower than \$75 million regardless of any mitigating factors.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

The loss severities projected by these scenarios vary widely, from moderate to substantial losses. Actual losses will be a function of the proportion of loans in the pools that are foreclosed and liquidated and the loss severities associated with those liquidations. If the deductibles in the Company's insured transactions and underlying referenced CMBS transactions are fully eroded, additional property level losses upon foreclosures and liquidations could result in substantial losses for MBIA. Since foreclosures and liquidations have only begun to take place during this economic cycle, particularly for larger properties, ultimate loss rates remain uncertain. Whether CMBS collateral is included in a structured pool or in a CRE CDO, the Company believes the modeling related to the underlying bond should be the same. However, adjustments may be needed for structural or legal reasons. The Company assigns a wide range of probabilities to these scenarios, with lower severity scenarios being weighted more heavily than higher severity scenarios. This reflects the view that liquidations will continue to be mitigated by loan extensions and modifications, and that property values and NOIs have bottomed for many sectors and markets in the U.S. The weightings are customized to each counterparty. If macroeconomic stress were to increase or the U.S. goes into a recession, higher delinquencies, liquidations and/or higher severities of loss upon liquidation may result and the Company may incur substantial additional losses. The foreclosure and REO pipelines are still relatively robust, with several restructurings and liquidations yet to occur, so the range of possible outcomes is wider than those for the Company's exposures to ABS CDOs and second-lien RMBS. Prior to June 30, 2013, the Company incorporated an additional approach based on recent Roll Rates experienced within each of the commercial mortgage-backed index series. This actuarial approach was eliminated as a result of more emphasis being placed on loan-specific scenarios.

In the CRE CDO portfolio, transaction-specific structures require managers to report reduced enhancement according to certain guidelines which often include downgrades even when the bond is still performing. As a result, in addition to collateral defaults, reported enhancement has been reduced significantly in some CRE CDOs. Moreover, many of the CRE CDO positions are amortizing more quickly than originally expected as most or all interest proceeds that would have been allocated to more junior classes within the CDO have been diverted and redirected to pay down the senior most classes insured by MBIA.

For the six months ended June 30, 2013, the Company had a benefit of \$38 million of losses and LAE recorded in earnings related to CRE CDO financial guarantee insurance policies. For the six months ended June 30, 2013, additional credit impairments and LAE on structured CMBS pools, CRE CDOs and CRE loan pools were estimated to be \$399 million as a result of additional delinquencies and loan level liquidations, as well as continued refinements of MBIA's assessment of various commutation possibilities. The cumulative credit impairments and LAE on structured CMBS pools, CRE CDOs and CRE loan pools were estimated to be \$4.0 billion through June 30, 2013. The pace of increases in the delinquency rate has slowed, many loans are being modified and liquidations continue to take place. Some loans were liquidated with minimal losses of 1% to 2%, others experienced near complete losses, and in some cases severities exceeded 100%. These liquidations have led to losses in the CMBS market, and in many cases, have resulted in reductions of enhancement to the individual CMBS bonds referenced by the insured structured CMBS pools. In certain insured transactions, these losses have resulted in deductible erosion. Bond level enhancement and pool level deductibles are structural features intended to mitigate losses to the Company. However, some of the transactions reference similar rated subordinate tranches of CMBS bonds. When there are broad-based declines in property performance, this leverage can result in rapid deterioration in pool performance. During the second quarter of 2013, the Company paid claims on a CMBS pool transaction that experienced deterioration such that all remaining deductible was eliminated.

Loss and LAE Activity

Financial Guarantee Insurance Losses (Non-Derivative)

The Company's financial guarantee insurance losses and LAE for the six months ended June 30, 2013 are presented in the following table:

Losses and LAE	Six Months Ended June 30, 2013			
	Second-lien	First-lien		
	RMBS	RMBS	Other ⁽¹⁾	Total
In millions				
Losses and LAE related to actual and expected payments	\$ 99	\$ (2)	\$ 114	\$ 211
Recoveries of actual and expected payments	(219)	(5)	9	(215)
Gross losses incurred	(120)	(7)	123	(4)
Reinsurance	-	-	(2)	(2)
Losses and LAE	<u>\$ (120)</u>	<u>\$ (7)</u>	<u>\$ 121</u>	<u>\$ (6)</u>

(1) - Includes ABS CDOs, CMBS, U.S. public finance and other issues.

The second-lien RMBS recoveries of actual and expected payments included in the preceding table primarily include \$308 million in recoveries resulting from ineligible mortgage loans included in insured exposures that are subject to contractual obligations by sellers/servicers to repurchase or replace such mortgages, partially offset by a \$97 million reduction in excess spread. The losses and LAE related to actual and expected payments of \$114 million in other, include \$110 million of losses related to U.S. public finance transactions primarily related to certain general obligation issues. The second-lien RMBS losses and LAE related to actual and expected payments comprise net increases of previously established reserves.

The following table provides information about the financial guarantees and related claim liability included in each of MBIA's surveillance categories as of June 30, 2013:

\$ in millions	Surveillance Categories				
	Caution List Low	Caution List Medium	Caution List High	Classified List	Total
Number of policies	53	23	7	207	290
Number of issues ⁽¹⁾	28	16	6	139	189
Remaining weighted average contract period (in years)	8.0	4.9	10.3	9.3	8.5
Gross insured contractual payments outstanding: ⁽²⁾					
Principal	\$3,812	\$1,263	\$ 80	\$ 8,653	\$13,808
Interest	2,580	322	44	4,807	7,753
Total	<u>\$6,392</u>	<u>\$1,585</u>	<u>\$ 124</u>	<u>\$13,460</u>	<u>\$21,561</u>
Gross claim liability	\$ -	\$ -	\$ -	\$ 1,600	\$ 1,600
Less:					
Gross potential recoveries	-	-	-	1,496	1,496
Discount, net	-	-	-	241	241
Net claim liability (recoverable)	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ (137)</u>	<u>\$ (137)</u>
Unearned premium revenue	\$ 124	\$ 20	\$ 1	\$ 105	\$ 250

(1) - An "issue" represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments.

(2) - Represents contractual principal and interest payments due by the issuer of the obligations insured by MBIA.

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

The following table provides information about the financial guarantees and related claim liability included in each of MBIA's surveillance categories as of December 31, 2012:

\$ in millions	Surveillance Categories				
	Caution List Low	Caution List Medium	Caution List High	Classified List	Total
Number of policies	54	25	10	206	295
Number of issues ⁽¹⁾	29	15	10	136	190
Remaining weighted average contract period (in years)	8.1	4.0	7.6	9.5	8.7
Gross insured contractual payments outstanding: ⁽²⁾					
Principal	\$4,250	\$1,176	\$ 373	\$ 9,458	\$15,257
Interest	2,721	256	120	5,264	8,361
Total	<u>\$6,971</u>	<u>\$1,432</u>	<u>\$ 493</u>	<u>\$14,722</u>	<u>\$23,618</u>
Gross claim liability	\$ -	\$ -	\$ -	\$ 1,589	\$ 1,589
Less:					
Gross potential recoveries	-	-	-	4,109	4,109
Discount, net	-	-	-	229	229
Net claim liability (recoverable)	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ (2,749)</u>	<u>\$ (2,749)</u>
Unearned premium revenue	\$ 142	\$ 11	\$ 3	\$ 122	\$ 278

(1) - An "issue" represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments.

(2) - Represents contractual principal and interest payments due by the issuer of the obligations insured by MBIA.

The gross claim liability as of June 30, 2013 and December 31, 2012 in the preceding tables represents the Company's estimate of undiscounted probability-weighted future claim payments, which principally relate to insured first-lien and second-lien RMBS transactions and U.S. public finance transactions. The gross potential recoveries represent the Company's estimate of undiscounted probability-weighted recoveries of actual claim payments and recoveries of estimated future claim payments, and principally relate to insured second-lien RMBS transactions and U.S. public finance transactions. Both amounts reflect the elimination of claim liabilities and potential recoveries related to VIEs consolidated by the Company.

The following table presents the components of the Company's loss and LAE reserves and insurance loss recoverable as reported on the Company's consolidated balance sheets as of June 30, 2013 and December 31, 2012 for insured obligations within MBIA's "Classified List." The loss reserves (claim liability) and insurance claim loss recoverable included in the following table represent the present value of the probability-weighted future claim payments and recoveries reported in the preceding tables.

In millions	As of June 30, 2013	As of December 31, 2012
Loss reserves (claim liability)	\$ 711	\$ 790
LAE reserves	63	63
Loss and LAE reserves	<u>\$ 774</u>	<u>\$ 853</u>
Insurance claim loss recoverable	\$ (902)	\$ (3,610)
LAE insurance loss recoverable	(5)	(38)
Insurance loss recoverable	<u>\$ (907)</u>	<u>\$ (3,648)</u>
Reinsurance recoverable on unpaid losses	\$ 13	\$ 14
Reinsurance recoverable on LAE reserves	1	-
Reinsurance recoverable on paid losses	-	1
Reinsurance recoverable on paid and unpaid losses	<u>\$ 14</u>	<u>\$ 15</u>

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

As of June 30, 2013, loss and LAE reserves include \$1.2 billion of reserves for expected future payments offset by expected recoveries of such future payments of \$397 million. As of December 31, 2012, loss and LAE reserves included \$1.2 billion of reserves for expected future payments offset by expected recoveries of such future payments of \$332 million. As of June 30, 2013, the insurance loss recoverable principally related to expected future recoveries on second-lien RMBS transactions resulting from expected excess spread generated by performing loans in such transactions. As of December 31, 2012, the insurance loss recoverable principally related to estimated recoveries of payments made by the Company resulting from ineligible mortgage loans in certain insured second-lien residential mortgage loan securitizations that are subject to a contractual obligation by the sellers/servicers to repurchase or replace the ineligible mortgage loans and expected future recoveries on second-lien RMBS transactions resulting from expected excess spread generated by performing loans in such transactions.

To date, as a result of the Bank of America and Flagstar Bank settlements, as well as the agreement between Consenting Claimants, ResCap and Ally, in the ResCap bankruptcy proceeding discussed above, the Company expects to be reimbursed for the majority of its potential recoveries related to ineligible mortgage loans by the end of 2013, which are primarily included in "Loan repurchase commitments" presented under the heading "Assets of consolidated variable interest entities" on the Company's consolidated balance sheets.

For the six months ended June 30, 2013 the Company collected approximately \$2.9 billion, net of reinsurance, of which \$2.8 billion, net of reinsurance related to insured second-lien RMBS transactions. The Company made payments of \$223 million, of which \$152 million related to insured second-lien RMBS transactions. For the six months ended June 30, 2013, the decrease in insurance loss recoverable related to paid losses totaled \$2.7 billion, and primarily resulted from the collections of previously established recoveries related to the settlement with Bank of America on the ineligible mortgage loans related to insured second-lien RMBS transactions.

The following table presents the amounts of the Company's second-lien RMBS exposure, gross undiscounted claim liability and potential recoveries related to non-consolidated VIEs and consolidated VIEs, included in the Company's "Classified List," as of June 30, 2013.

Second-lien RMBS Exposure

\$ in billions	Issues	Outstanding		Gross Undiscounted	
		Gross Principal	Gross Interest	Claim Liability	Potential Recoveries
Non-consolidated VIEs	23	\$ 3.7	\$ 1.3	\$ 0.2	\$ 0.9
Consolidated VIEs	11	\$ 1.9	\$ 0.7	\$ 0.1	\$ 1.4

The following table presents changes in the Company's loss and LAE reserves for the six months ended June 30, 2013. Changes in the loss and LAE reserves attributable to the accretion of the claim liability discount, changes in discount rates, changes in the timing and amounts of estimated payments and recoveries, changes in assumptions and changes in LAE reserves are recorded in "Losses and loss adjustment" expenses in the Company's consolidated statements of operations. As of June 30, 2013, the weighted average risk-free rate used to discount the Company's loss reserves (claim liability) was 1.98%. LAE reserves are expected to be settled within a one-year period and are not discounted.

In millions	Changes in Loss and LAE Reserves for the Six Months Ended June 30, 2013								Gross Loss and LAE Reserves as of June 30, 2013
	Loss Payments for Cases with Reserves	Accretion of Claim Liability Discount	Changes in Discount Rates	Changes in Timing of Payments	Changes in Amount of Net Payments	Changes in Assumptions	Changes in Unearned Premium Revenue	Changes in LAE Reserves	
\$ 853	\$ (152)	\$ 6	\$ (62)	\$ 47	\$ 52	\$ 13	\$ 17	\$ -	\$ 774

The decrease in the Company's gross loss and LAE reserves reflected in the preceding table was primarily due to a decrease in reserves related to loss payments on insured first-lien and second-lien RMBS issues and changes in discount rates, partially offset by changes in amount and timing of net payments.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

Current period changes in the Company's estimate of potential recoveries may be recorded as an insurance loss recoverable asset, netted against the gross loss and LAE reserve liability, or both. The following table presents changes in the Company's insurance loss recoverable and changes in recoveries on unpaid losses reported within the Company's claim liability for the six months ended June 30, 2013. Changes in insurance loss recoverable attributable to the accretion of the discount on the recoverable, changes in discount rates, changes in the timing and amounts of estimated collections, changes in assumptions and changes in LAE recoveries are recorded in "Losses and loss adjustment" expenses in the Company's consolidated statements of operations.

	Changes in Insurance Loss Recoverable and Recoveries on Unpaid Losses for the Six Months Ended June 30, 2013								Gross Reserve as of June 30, 2013
	Gross Reserve as of December 31, 2012	Collections for Cases with Recoveries	Accretion of Recoveries	Changes in Discount Rates	Changes in Timing of Collections	Changes in Amount of Collections	Changes in Assumptions	Changes in LAE Recoveries	
In millions									
Insurance loss recoverable	\$ 3,648	\$ (2,852)	\$ 13	\$ (22)	\$ -	\$ (1)	\$ 154	\$ (33)	\$ 907
Recoveries on unpaid losses	332	-	2	(22)	-	-	83	2	397
Total	\$ 3,980	\$ (2,852)	\$ 15	\$ (44)	\$ -	\$ (1)	\$ 237	\$ (31)	\$ 1,304

The Company's insurance loss recoverable decreased during 2013 primarily due to recoveries associated with issues outstanding as of December 31, 2012, which related to the settlement with Bank of America on the ineligible mortgage loans included in insured second-lien residential mortgage securitization exposures that are subject to contractual obligations by sellers/servicers to repurchase or replace such mortgages. Recoveries on unpaid losses increased primarily due to changes in assumptions on certain general obligation exposures and a toll road transaction, partially offset by changes in discount rates.

The following table presents the Company's total estimated recoveries from ineligible mortgage loans included in certain insured second-lien mortgage loan securitizations as of June 30, 2013. The total estimated recoveries from ineligible mortgage loans of \$1.1 billion include \$18 million recorded as "Insurance loss recoverable" and \$1.1 billion recorded as "Loan repurchase commitments" presented under the heading "Assets of consolidated variable interest entities" on the Company's consolidated balance sheets.

In millions						Total Estimated Recoveries from Ineligible Mortgage Loans as of June 30, 2013
Total Estimated Recoveries from Ineligible Mortgage Loans as of December 31, 2012	Accretion of Future Collections	Changes in Discount Rates	Recoveries (Collections)	Changes in Amount of Collections	Changes in Assumptions	
\$ 3,583	\$ 15	\$ (3)	\$ (2,897)	\$ 1	\$ 434	\$ 1,133

The decrease in the Company's total estimated recoveries from ineligible mortgage loans in the preceding table primarily resulted from the collections of previously established recoveries related to the settlement with Bank of America and Flagstar Bank on the ineligible mortgage loans related to insured second-lien RMBS securitizations.

Remediation actions may involve, among other things, waivers or renegotiations of financial covenants or triggers, waivers of contractual provisions, the granting of consents, transfer of servicing, consideration of restructuring plans, acceleration, security or collateral enforcement, actions in bankruptcy or receivership, litigation and similar actions. The types of remedial actions pursued are based on the insured obligation's risk type and the nature and scope of the event giving rise to the remediation. As part of any such remedial actions, MBIA seeks to improve its security position and to obtain concessions from the issuer of the insured obligation. From time to time, the issuer of an MBIA-insured obligation may, with the consent of MBIA, restructure the insured obligation by extending the term, increasing or decreasing the par amount or decreasing the related interest rate, with MBIA insuring the restructured obligation.

Costs associated with remediating insured obligations assigned to the Company's "Caution List—Low," "Caution List—Medium," "Caution List—High" and "Classified List" are recorded as LAE. LAE is primarily recorded as part of the Company's provision for its loss reserves and included in "Losses and loss adjustment" expenses on the Company's consolidated statements of operations. The following table presents the gross expenses related to remedial actions for insured obligations:

In millions	Six Months Ended June 30,	
	2013	2012
Loss adjustment expense incurred, gross	\$ 33	\$ 81

MBIA Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments

Fair Value Measurement

Fair value is a market-based measure considered from the perspective of a market participant. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those which it believes market participants would use in pricing an asset or liability at the measurement date. The fair value measurements of financial instruments held or issued by the Company are determined through the use of observable market data when available. Market data is obtained from a variety of third-party sources, including dealer quotes. If dealer quotes are not available for an instrument that is infrequently traded, the Company uses alternate valuation methods, including either dealer quotes for similar instruments or modeling using market data inputs. The use of alternate valuation methods generally requires considerable judgment in the application of estimates and assumptions and changes to such estimates and assumptions may produce materially different fair values.

The accounting guidance for fair value measurement establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available and reliable. Observable inputs are those the Company believes that market participants would use in pricing an asset or liability based on available market data. Unobservable inputs are those that reflect the Company's beliefs about the assumptions market participants would use in pricing an asset or liability based on the best information available. The fair value hierarchy is broken down into three levels based on the observability and reliability of inputs, as follows:

- Level 1—Valuations based on quoted prices in active markets for identical assets or liabilities that the Company can access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail any degree of judgment.
- Level 2—Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly. Level 2 assets include debt securities with quoted prices that are traded less frequently than exchange-traded instruments, securities which are priced using observable inputs and derivative contracts whose values are determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.
- Level 3—Valuations based on inputs that are unobservable and supported by little or no market activity and that are significant to the overall fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques where significant inputs are unobservable, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The availability of observable inputs can vary from product to product and period to period and is affected by a wide variety of factors, including, for example, the type of product, whether the product is new and not yet established in the marketplace, and other characteristics particular to the product. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the Company assigns the level in the fair value hierarchy for which the fair value measurement in its entirety falls, based on the least observable input that is significant to the fair value measurement.

1. Financial Assets (excluding derivative assets)

Financial assets, excluding derivative assets, held by the Company primarily consist of investments in debt securities. Substantially all of the Company's investments are priced by independent third parties, including pricing services and brokers. Typically the Company receives one pricing service value or broker quote for each instrument, which represents a non-binding indication of value. The Company reviews the assumptions, inputs and methodologies used by pricing services to obtain reasonable assurance that the prices used in its valuations reflect fair value. When the Company believes a third-party quotation differs significantly from its internally developed expectation of fair value, whether higher or lower, the Company reviews its data or assumptions with the provider. This review includes comparing significant assumptions such as prepayment speeds, default ratios, forward yield curves, credit spreads and other significant quantitative inputs to internal assumptions, and working with the price provider to reconcile the differences. The price provider may subsequently provide an updated price. In the event that the price provider does not update their price, and the Company still does not agree with the price provided, the Company will try to obtain a price from another third-party provider, such as a broker, or use an internally developed price which it believes represents the fair value of the investment. The fair values of investments for which internal prices were used were not significant to the aggregate fair value of the Company's investment portfolio as of June 30, 2013 or December 31, 2012. All challenges to third-party prices are reviewed by staff of the Company with relevant expertise to ensure reasonableness of assumptions.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

In addition to challenging pricing assumptions, the Company obtains reports from the independent accountants for significant third-party pricing services attesting to the effectiveness of the controls over data provided to the Company. These reports are obtained annually and are reviewed by the Company to ensure key controls are applied by the pricing services, and that appropriate user controls are in place at the third-party pricing services organization to ensure proper measurement of the fair values of its investments. In the event that any controls in these reports are deemed as ineffective by independent accountants, the Company will take the necessary actions to ensure that internal user controls are in place to mitigate the control risks. No deficiencies were noted for significant third-party pricing services used.

2. Financial Liabilities (excluding derivative liabilities)

Financial liabilities, excluding derivative liabilities, issued by the Company primarily consist of investment agreements and medium-term notes ("MTNs") within its wind-down operations, debt issued for general corporate purposes and debt in VIEs. Investment agreements, MTNs, and corporate debt are typically recorded at face value adjusted for premiums or discounts. Financial liabilities that the Company has elected to fair value or that require fair value reporting or disclosures are valued based on the estimated value of the underlying collateral, the Company's or a third-party's estimate of discounted cash flow model estimates, or quoted market values for similar products. These valuations include adjustments for expected nonperformance risk of the Company.

3. Derivative Liabilities

The Company's derivative liabilities are primarily insured credit derivatives that reference structured pools of cash securities and CDSs. The Company generally insured the most senior liabilities of such transactions, and at the inception of transactions its exposure generally had more subordination than needed to achieve triple-A ratings from credit rating agencies. The types of collateral underlying its insured derivatives consist of cash securities and CDSs referencing primarily corporate, asset-backed, residential mortgage-backed, commercial mortgage-backed, CRE loans, and CDO securities.

The Company's insured credit derivative contracts are non-traded structured credit derivative transactions. Since insured derivatives are highly customized and there is generally no observable market for these derivatives, the Company estimates their fair values in a hypothetical market based on internal and third-party models simulating what a similar company would charge to assume the Company's position in the transaction at the measurement date. This pricing would be based on the expected loss of the exposure. The Company reviews its valuation model results on a quarterly basis to assess the appropriateness of the assumptions and results in light of current market activity and conditions. This review is performed by internal staff with relevant expertise. If live market spreads or securities prices are observable for similar transactions, those spreads are an integral part of the analysis. New insured transactions that resemble existing (previously insured) transactions, if any, would be considered, as well as negotiated settlements of existing transactions.

The Company may from time to time make changes in its valuation techniques if the change results in a measurement that it believes is equally or more representative of fair value under current circumstances.

4. Internal Review Process

All significant financial assets and liabilities, including derivative assets and liabilities, are reviewed by committees created by the Company to ensure compliance with the Company's policies and risk procedures in the development of fair values of financial assets and liabilities. These valuation committees review, among other things, key assumptions used for internally developed prices, significant changes in sources and uses of inputs, including changes in model approaches, and any adjustments from third-party inputs or prices to internally developed inputs or prices. The committees also review any significant impairment or improvements in fair values of the financial instruments from prior periods. From time to time, these committees will reach out to the Company's valuation experts to better understand key methods and assumptions used for the determination of fair value, including understanding significant changes in fair values. These committees are comprised of senior finance team members with the relevant experience in the financial instruments their committee is responsible for. For each quarter, these committees document their agreement with the fair values developed by management of the Company as reported in the quarterly and annual financial statements.

Valuation Techniques

Valuation techniques for financial instruments measured at fair value and included in the tables that follow are described below.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

Fixed-Maturity Securities (including short-term investments) Held as Available-For-Sale, Fixed-Maturity Securities at Fair Value, Investments Pledged as Collateral, Investments Held-to-Maturity, and Other Investments

Fixed-maturity securities (including short-term investments) held as AFS, fixed-maturity securities at fair value, investments pledged as collateral, and other investments include investments in U.S. Treasury and government agencies, foreign governments, corporate obligations, mortgage-backed securities ("MBS") and ABS (including CMBS and CDOs), state and municipal bonds and perpetual debt and equity securities (including money market mutual funds).

These investments are generally valued based on recently executed transaction prices or quoted market prices. When quoted market prices are not available, fair value is generally determined using quoted prices of similar investments or a valuation model based on observable and unobservable inputs. Inputs vary depending on the type of investment. Observable inputs include contractual cash flows, interest rate yield curves, CDS spreads, prepayment and volatility scores, diversity scores, cross-currency basis index spreads, and credit spreads for structures similar to the financial instrument in terms of issuer, maturity and seniority. Unobservable inputs include cash flow projections and the value of any credit enhancement.

The fair value of the held-to-maturity ("HTM") investments is determined using discounted cash flow models. Key inputs include unobservable cash flows projected over the expected term of the investment discounted using observable interest rate yield curves of similar securities.

Investments based on quoted market prices of identical investments in active markets are classified as Level 1 of the fair value hierarchy. Level 1 investments generally consist of U.S. Treasury and foreign government and agency investments. Quoted market prices of investments in less active markets, as well as investments which are valued based on other than quoted prices for which the inputs are observable, such as interest rate yield curves, are categorized in Level 2 of the fair value hierarchy. Investments that contain significant inputs that are not observable are categorized as Level 3.

Cash and Cash Equivalents, Receivable for Investments Sold, Net Cash Collateral Pledged to Swap Counterparties, Payable for Investments Purchased and Accrued Investment Income

The carrying amounts of cash and cash equivalents, receivable for investments sold, net cash collateral pledged to swap counterparties, payable for investments purchased and accrued investment income approximate fair values due to the short-term nature and credit worthiness of these instruments.

Loans Receivable at Fair Value

Loans receivable at fair value are comprised of loans held by consolidated VIEs consisting of residential mortgage loans, commercial mortgage loans and other whole business loans. Fair values of residential mortgage loans are determined using quoted prices for MBS issued by the respective VIE and adjustments for the fair values of the financial guarantees provided by MBIA Corp. on the related MBS. Fair values of commercial mortgage loans and other whole business loans are valued based on quoted prices of similar collateralized MBS. Loans receivable at fair value are categorized in Level 3 of the fair value hierarchy.

Loan Repurchase Commitments

Loan repurchase commitments are obligations owed by the sellers/servicers of mortgage loans to either MBIA as reimbursement of paid claims or to the RMBS trusts as defined in the transaction documents. Loan repurchase commitments are assets of the consolidated VIEs. This asset represents the rights of MBIA against the sellers/servicers for breaches of representations and warranties that the securitized residential mortgage loans sold to the trust to comply with stated underwriting guidelines and for the sellers/servicers to cure, replace, or repurchase mortgage loans. Fair value measurements of loan repurchase commitments represent the amounts owed by the sellers/servicers to MBIA as reimbursement of paid claims. Loan repurchase commitments are not securities and no quoted prices or comparable market transaction information are observable or available. Loan repurchase commitments at fair value are categorized in Level 3 of the fair value hierarchy. Fair values of loan repurchase commitments are determined using discounted cash flow techniques based on inputs including:

- breach rates representing the rate at which the sellers/servicers failed to comply with stated representations and warranties;
- recovery rates representing the estimates of future cash flows for the asset, including estimates about possible variations in the amount of cash flows expected to be collected;
- expectations about possible variations in the timing of collections of the cash flows; and
- time value of money, represented by the rate on risk-free monetary assets.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

Investment Agreements

The fair values of investment agreements are determined using discounted cash flow techniques based on contractual cash flows and observable interest rates currently being offered for similar agreements with comparable maturity dates. Investment agreements contain collateralization and termination agreements that substantially mitigate the nonperformance risk of the Company. As the terms of the notes are private, and the contract cash flows are not observable, these investment agreements are categorized as Level 3 of the fair value hierarchy.

Medium-Term Notes

The fair values of certain MTNs are based on quoted market prices provided by third-party sources, where available. When quoted market prices are not available, the Company applies a matrix pricing grid based on the quoted market prices received and the MTNs' stated maturity and interest rate to determine fair value. Nonperformance risk is included in the quoted market prices and the matrix pricing grid.

The Company has elected to record these MTNs at fair value as they contain embedded derivatives which cannot accurately be separated from the host debt instrument and fair valued separately, therefore, these MTNs are carried at fair value with changes in fair value reflected in earnings. The remaining MTNs, which are not carried at fair value, do not contain embedded derivatives.

As these MTNs are illiquid and the prices reflect significant unobservable inputs, they are categorized as Level 3 of the fair value hierarchy.

Variable Interest Entity Notes

The fair values of VIE notes are determined based on recently executed transaction prices or quoted prices where observable. When position-specific quoted prices are not observable, fair values are based on quoted prices of similar securities. Fair values based on quoted prices of similar securities may be adjusted for factors unique to the securities, including any credit enhancement. When observable quoted prices are not available, fair value is determined based on discounted cash flow techniques of the underlying collateral using observable and unobservable inputs. Observable inputs include interest rate yield curves and bond spreads of similar securities. Unobservable inputs include the value of any credit enhancement. VIE notes are categorized in Level 2 or Level 3 of the fair value hierarchy based on the lowest level input that is significant to the fair value measurement in its entirety.

Long-term Debt

Long-term debt consists of notes, debentures and surplus notes. The fair value of long-term notes, debentures and surplus notes are estimated based on quoted prices for the identical or similar securities. Long-term debt is categorized as Level 2 of the fair value hierarchy.

Derivatives—Asset/Liability Products

The asset/liability products business has entered into derivative transactions primarily consisting of interest rate swaps, cross currency swaps, and CDS contracts. Fair values of over-the-counter derivatives are determined using valuation models based on observable inputs, nonperformance risk of the Company's own credit and nonperformance risk of the counterparties. Observable and market-based inputs include interest rate yields, credit spreads and volatilities. These derivatives are categorized in Level 2 or Level 3 of the fair value hierarchy based on the input that is significant to the fair value measurement in its entirety.

The Company has policies and procedures in place regarding counterparties, including review and approval of the counterparty and the Company's exposure limit, collateral posting requirements, collateral monitoring and margin calls on collateral. The Company manages counterparty credit risk on an individual counterparty basis through master netting arrangements covering derivative transactions in the asset/liability products and corporate segments. These agreements allow the Company to contractually net amounts due from a counterparty with those amounts due to such counterparty when certain triggering events occur. The Company only executes swaps under master netting agreements, which typically contain mutual credit downgrade provisions that generally provide the ability to require assignment or termination in the event either the Company or the counterparty is downgraded below a specified credit rating. The netting agreements minimize the potential for losses related to credit exposure and thus serve to mitigate the Company's nonperformance risk under these derivatives.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

In certain cases, the Company also manages credit risk through collateral agreements that give the Company the right to hold or the obligation to provide collateral when the current market value of derivative contracts exceeds an exposure threshold. Under these arrangements, the Company may provide U.S. Treasury and other highly rated securities or cash to secure the derivative. The delivery of high-quality collateral can minimize credit exposure and mitigate the potential for nonperformance risk impacting the fair values of the derivatives.

Derivatives—Insurance

The derivative contracts insured by the Company cannot be legally traded and generally do not have observable market prices. The Company determines the fair values of insured credit derivatives using valuation models. The fair valuation models are consistently applied from period to period, with refinements to the fair value estimation approach being applied as and when the information becomes available. Negotiated settlements are also considered when determining fair value to provide the best estimate of how another market participant would evaluate fair value.

Approximately 99% of the balance sheet fair value of insured credit derivatives as of June 30, 2013 was valued based on the Binomial Expansion Technique (“BET”) Model. Approximately 1% of the balance sheet fair value of insured credit derivatives as of June 30, 2013 was valued based on the internally developed Direct Price Model and the dual-default model. The valuation of insured derivatives includes the impact of its credit standing. All of these derivatives are categorized as Level 3 of the fair value hierarchy as their fair value is derived using significant unobservable inputs.

A. Description of the BET Model

1. Valuation Model Overview

The BET Model estimates what a bond insurer would charge to guarantee a transaction at the measurement date, based on the market-implied default risk of the underlying collateral and the remaining structural protection in a deductible or subordination.

Inputs to the process of determining fair value for structured transactions using the BET Model include estimates of collateral loss, allocation of loss to separate tranches of the capital structure, and calculation of the change in value.

- Estimates of aggregated collateral losses are calculated by reference to the following (described in further detail under “BET Model Inputs” below):
 - credit spreads of underlying collateral based on actual spreads or spreads on similar collateral with similar ratings, or in some cases, are benchmarked; for collateral pools where the spread distribution is characterized by extremes, each segment of the pool is modeled separately instead of using an overall pool average;
 - diversity score of the collateral pool as an indication of correlation of collateral defaults; and
 - recovery rate for all defaulted collateral.
- Allocation of losses to separate tranches of the capital structure according to priority of payments in a transaction.
- The inception-to-date unrealized gain or loss on a transaction is the difference between the original price of the risk (the original market-implied expected loss) and the current price of the risk based on the assumed market-implied expected losses derived from the model.

Additional structural assumptions of the BET Model are:

- Default probabilities are determined by three factors: credit spread, recovery rate after default, and the time period under risk;
- Frequencies of defaults are modeled evenly over time;
- Collateral assets are generally considered on an average basis rather than being modeled on an individual basis; and
- Collateral asset correlation is modeled using a diversity score which is calculated based on industry or sector concentrations. Recovery rates are based on historical averages and updated based on market evidence.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

2. BET Model Inputs

a. Credit spreads

The average spread of collateral is a key input as the Company assumes credit spreads reflect the market's assessment of default probability for each piece of collateral. Spreads are obtained from market data sources published by third parties (e.g., dealer spread tables for assets most closely resembling collateral within the Company's transactions) as well as collateral-specific spreads on the underlying reference obligations provided by trustees or market sources. Also, when these sources are not available, the Company benchmarks spreads for collateral against market spreads or prices. This data is reviewed on an ongoing basis for reasonableness and applicability to the Company's derivative portfolio. The Company also calculates spreads based on quoted prices and on internal assumptions about expected life, when pricing information is available and spread information is not.

The Company uses the spread hierarchy listed below in determining which source of spread information to use, with the rule being to use CDS spreads where available and cash security spreads as the next alternative.

Spread Hierarchy:

- Collateral-specific credit spreads when observable;
- Sector-specific spread tables by asset class and rating;
- Corporate spreads, including Bloomberg spread tables based on rating; and
- Benchmark from most relevant market source when corporate spreads are not directly relevant.

There were some transactions where the Company incorporated multiple levels within the hierarchy, including using actual collateral-specific credit spreads in combination with a calculated spread based on an assumed relationship. In those cases, MBIA classified the transaction as being benchmarked from the most relevant spread source even though the majority of the average spread was from actual collateral-specific spreads. As of June 30, 2013, sector-specific spreads were used in 11% of the transactions valued using the BET Model. Corporate spreads were used in 48% of the transactions and spreads benchmarked from the most relevant spread source were used for 41% of the transactions. The spread source can also be identified by whether or not it is based on collateral weighted average rating factor ("WARF"). No collateral-specific spreads are based on WARF. Sector-specific spreads, corporate spreads and some benchmarked spreads are based on WARF. WARF-sourced and/or ratings-sourced credit spreads were used for 69% of the transactions.

Over time, the data inputs change as new sources become available, existing sources are discontinued or are no longer considered to be reliable or the most appropriate. It is always the Company's objective to use more observable spread hierarchies defined above. However, the Company may on occasion move to less observable spread inputs due to the discontinuation of data sources or due to the Company considering certain spread inputs no longer representative of market spreads.

b. Diversity Scores

Diversity scores are a means of estimating the diversification in a portfolio. The diversity score estimates the number of uncorrelated assets that are assumed to have the same loss distribution as the actual portfolio of correlated assets. While diversity score is a required input into the BET model, due to current high levels of default within the collateral of the structures, diversity score does not have a significant impact on valuation.

c. Recovery Rate

The recovery rate represents the percentage of par expected to be recovered after an asset defaults, indicating the severity of a potential loss. MBIA generally uses rating agency recovery assumptions which may be adjusted to account for differences between the characteristics and performance of the collateral used by the rating agencies and the actual collateral in MBIA-insured transactions. The Company may also adjust rating agency assumptions based on the performance of the collateral manager and on empirical market data.

d. Nonperformance Risk

The Company's valuation methodology for insured credit derivative liabilities incorporates the Company's own nonperformance risk. The Company calculates the fair value by discounting the market value loss estimated through the BET Model at discount rates which include MBIA CDS spreads as of June 30, 2013. The CDS spreads assigned to each deal are based on the weighted average life of the deal. The Company limits the nonperformance impact so that the derivative liability could not be lower than the Company's recovery derivative price multiplied by the unadjusted derivative liability.

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

Overall Model Results

As of June 30, 2013 and December 31, 2012, the Company's net insured derivative liability was \$1.6 billion and \$2.9 billion, respectively, and was primarily related to the fair values of insured credit derivatives, based on the results of the aforementioned pricing models. In the current environment, the most significant driver of changes in fair value is nonperformance risk. In aggregate, the nonperformance calculation resulted in a pre-tax net insured derivative liability that was \$485 million and \$4.4 billion lower than the net liability that would have been estimated if the Company excluded nonperformance risk in its valuation as of June 30, 2013 and December 31, 2012, respectively. Nonperformance risk is a fair value concept and does not contradict the Company's internal view, based on fundamental credit analysis of the Company's economic condition, that the Company will be able to pay all claims when due.

Warrants

Stock warrants issued by the Company are recorded at fair value based on a modified Black-Scholes model. Inputs into the warrant valuation include interest rates, stock volatilities and dividend data. As all significant inputs are market-based and observable, warrants are categorized in Level 2 of the fair value hierarchy.

Accrued Interest Expense

The fair value of the accrued interest expense on the surplus notes due 2033 is determined based on the scheduled interest payments discounted by the market's perception of the credit risk related to the repayment of the surplus notes. The credit risk related to the repayment of the surplus notes is based on recent trades of the surplus notes. The deferred interest payment will be due on the first business day on or after which the Company obtains approval to make such payment.

The carrying amounts of accrued interest expense on all other long-term debt approximate fair value due to the short-term nature of these instruments.

Financial Guarantees

Gross Financial Guarantees—The fair value of gross financial guarantees is determined using discounted cash flow techniques based on inputs that include (i) assumptions of expected losses on financial guarantee policies where loss reserves have not been recognized, (ii) amount of losses expected on financial guarantee policies where loss reserves have been established, net of expected recoveries, (iii) the cost of capital reserves required to support the financial guarantee liability, (iv) operating expenses, and (v) discount rates. The MBIA Corp. CDS spread and recovery rate are used as the discount rate for MBIA Corp., while the CDS spread and recovery rate of a similar municipal insurance company are used as the discount rate for National, as National does not have a published CDS spread and recovery rate.

The carrying value of the Company's gross financial guarantees consists of unearned premium revenue and loss and LAE reserves, net of the insurance loss recoverable as reported on MBIA's consolidated balance sheets.

Ceded Financial Guarantees—The fair value of ceded financial guarantees is determined by applying the percentage ceded to reinsurers to the related fair value of the gross financial guarantees. The carrying value of ceded financial guarantees consists of prepaid reinsurance premiums and reinsurance recoverable on paid and unpaid losses as reported within "Other assets" on the Company's consolidated balance sheets.

Significant Unobservable Inputs

The following tables provide quantitative information regarding the significant unobservable inputs used by the Company for assets and liabilities measured at fair value on a recurring basis as of June 30, 2013 and December 31, 2012. These tables exclude inputs used to measure fair value that are not developed by the Company, such as broker prices and other third-party pricing service valuations.

In millions	Fair Value as of June 30, 2013	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Assets of consolidated VIEs:				
Loans receivable at fair value	\$ 1,790	Quoted market prices adjusted for financial guarantees provided to VIE obligations	Impact of financial guarantee	0% - 18% (4%)
Loan repurchase commitments	1,115	Discounted cash flow	Recovery rates	10% - 66% (34%)
			Breach rates	67% - 92% (77%)
Liabilities of consolidated VIEs:				
Variable interest entity notes	824	Quoted market prices of VIE assets adjusted for financial guarantees provided	Impact of financial guarantee	0% - 29% (10%)
Credit derivative liabilities, net:				
CMBS	1,024	BET Model	Recovery rates	25% - 90% (60%)
			Nonperformance risk	9% - 53% (23%)
			Weighted average life (in years)	1.6 - 28.5 (3.8)
			CMBS spreads	1.2% - 25.3% (12%)
Multi-sector CDO	15	Direct Price Model	Nonperformance risk	53% - 53% (53%)
Other	609	BET Model	Recovery rates	42% - 70% (47%)
			Nonperformance risk	13% - 23% (21%)
			Weighted average life (in years)	0.2 - 3.8 (2.3)

In millions	Fair Value as of December 31, 2012	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Assets of consolidated VIEs:				
Loans receivable at fair value	\$ 1,881	Quoted market prices adjusted for financial guarantees provided to VIE obligations	Impact of financial guarantee	0% - 14% (3%)
Loan repurchase commitments	1,086	Discounted cash flow	Recovery rates	10% - 75% (47%)
			Breach rates	66% - 94% (78%)
Liabilities of consolidated VIEs:				
Variable interest entity notes	1,932	Quoted market prices of VIE assets adjusted for financial guarantees provided	Impact of financial guarantee	0% - 23% (6%)
Credit derivative liabilities, net:				
CMBS	1,590	BET Model	Recovery rates	21% - 90% (51%)
			Nonperformance risk	19% - 59% (58%)
			Weighted average life (in years)	0.1 - 5.6 (4.4)
			CMBS spreads	1% - 23% (13%)
Multi-sector CDO	525	Direct Price Model	Nonperformance risk	59% - 59% (59%)
Other	806	BET Model	Recovery rates	42% - 75% (47%)
			Nonperformance risk	42% - 59% (58%)
			Weighted average life (in years)	0.1 - 19.6 (3.0)

Sensitivity of Significant Unobservable Inputs

The significant unobservable input used in the fair value measurement of the Company's loans receivable at fair value of consolidated VIEs is the impact of the financial guarantee. The fair value of loans receivable is calculated by subtracting the value of the financial guarantee from the market value of VIE liabilities. The value of a financial guarantee is estimated by the Company as the present value of expected cash payments under the policy. As expected cash payments provided by the Company under the insurance policy increase, there is a lower expected cash flow on the underlying loans receivable of the VIE. This results in a lower fair value of the loans receivable in relation to the obligations of the VIE.

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

The significant unobservable inputs used in the fair value measurement of the Company's loan repurchase commitments of consolidated VIEs are the recovery rates and the breach rates. Recovery rates reflect the estimates of future cash flows reduced for litigation delays and risks and/or potential financial distress of the sellers/servicers. The estimated recoveries of the loan repurchase commitments may differ from the actual recoveries that may be received in the future. Breach rates represent the rate at which the mortgages fail to comply with stated representations and warranties of the sellers/servicers. Significant increases or decreases in the recovery rates and the breach rates would result in significantly higher or lower fair values of the loan repurchase commitments, respectively. Additionally, changes in the legal environment and the ability of the counterparties to pay would impact the recovery rate assumptions, which could significantly impact the fair value measurement. Any significant challenges by the counterparties to the Company's determination of breaches of representations and warranties could significantly adversely impact the fair value measurement. Recovery rates and breach rates are determined independently. Changes in one input will not necessarily have any impact on the other input.

The significant unobservable input used in the fair value measurement of the Company's VIE notes of consolidated VIEs is the impact of the financial guarantee. The fair value of VIE notes is calculated by adding the value of the financial guarantee to the market value of VIE assets. The value of a financial guarantee is estimated by the Company as the present value of expected cash payments under the policy. As the value of the guarantee provided by the Company to the obligations issued by the VIE increases, the credit support adds value to the liabilities of the VIE. This results in an increase in the fair value of the liabilities of the VIE.

The significant unobservable inputs used in the fair value measurement of the Company's CMBS credit derivatives, which are valued using the BET Model, are CMBS spreads, recovery rates, nonperformance risk and weighted average life. The CMBS spread is an indicator of credit risk of the collateral securities. The recovery rate represents the percentage of notional expected to be recovered after an asset defaults, indicating the severity of a potential loss. The nonperformance risk is an assumption of the Company's own ability to pay and whether the Company will have the necessary resources to pay the obligations as they come due. Weighted average life is based on the Company's estimate of when the principal of the underlying collateral of the CMBS structure will be repaid. A significant increase in weighted average life can result in an increase or decrease in the fair value of the derivative liability, depending on the discount rate and the timing of significant losses. Any significant increase or decrease in recovery rates or the Company's nonperformance risk would result in a decrease or increase in the fair value of the derivative liabilities, respectively. CMBS spreads, recovery rates, nonperformance risk and weighted average lives are determined independently. Changes in one input will not necessarily have any impact on the other inputs.

The significant unobservable input used in the fair value measurement of the Company's multi-sector CDO credit derivatives, which are valued using the Direct Price Model, is nonperformance risk. The nonperformance risk is an assumption of the Company's own ability to pay and whether the Company will have the necessary resources to pay the obligations as they come due. Any significant increase or decrease in the Company's nonperformance risk would result in a decrease or increase in the fair value of the derivative liabilities, respectively.

The significant unobservable inputs used in the fair value measurement of the Company's other credit derivatives, which are valued using the BET Model, are recovery rates, nonperformance risk and weighted average life. The recovery rate represents the percentage of notional expected to be recovered after an asset defaults, indicating the severity of a potential loss. The nonperformance risk is an assumption of the Company's own ability to pay and whether the Company will have the necessary resources to pay the obligations as they come due. Weighted average life is based on the Company's estimate of when the principal of the underlying collateral will be repaid. A significant increase in weighted average life can result in an increase or decrease in the fair value of the derivative liability, depending on the discount rate and the timing of significant losses. Any significant increase or decrease in recovery rates or the Company's nonperformance risk would result in a decrease or increase in the fair value of the derivative liabilities, respectively. Recovery rates, nonperformance risk and weighted average lives are determined independently. Changes in one input will not necessarily have any impact on the other inputs.

Table of Contents

MBIA Inc. and Subsidiaries Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

Transfers into and out of Level 3 were \$73 million and \$19 million, respectively, for the three months ended June 30, 2013. Transfers into and out of Level 2 were \$19 million and \$73 million, respectively, for the three months ended June 30, 2013. Transfers into Level 3 were principally related to state and municipal bonds, CDOs, and other ABS, where inputs, which are significant to their valuation, became unobservable during the quarter. CDOs, other ABS and RMBS non-agency, comprised the majority of the transferred instruments out of Level 3 where inputs, which are significant to their valuation, became observable during the quarter. These inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs. There were no transfers into or out of Level 1.

Transfers into and out of Level 3 were \$72 million and \$15 million, respectively, for the three months ended June 30, 2012. Transfers into and out of Level 2 were \$15 million and \$72 million, respectively, for the three months ended June 30, 2012. Transfers into Level 3 were principally related to RMBS non-agency and corporate obligations where inputs, which are significant to their valuation, became unobservable during the quarter. RMBS agency and other ABS comprised the majority of the transferred instruments out of Level 3 where inputs, which are significant to their valuation, became observable during the quarter. These inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs. There were no transfers into or out of Level 1.

All Level 1, 2 and 3 designations are made at the end of each accounting period.

The following tables present information about changes in Level 3 assets (including short-term investments) and liabilities measured at fair value on a recurring basis for the six months ended June 30, 2013 and 2012:

(1) - Transferred in and out at the end of the period.

Transfers into and out of Level 3 were \$159 million and \$97 million, respectively, for the six months ended June 30, 2013. Transfers into and out of Level 2 were \$97 million and \$159 million, respectively, for the six months ended June 30, 2013. Transfers into Level 3 were principally related to other ABS, state and municipal bonds, CDOs and CMBS where inputs, which are significant to their valuation, became unobservable during the quarter. State and municipal bonds and CDOs comprised the majority of the transferred instruments out of Level 3 where inputs, which are significant to their valuation, became observable during the quarter. These inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs. There were no transfers into or out of Level 1.

Transfers into and out of Level 3 were \$103 million and \$55 million, respectively, for the six months ended June 30, 2012. Transfers into and out of Level 2 were \$55 million and \$103 million, respectively, for the six months ended June 30, 2012. Transfers into Level 3 were principally related to RMBS non-agency and corporate obligations, CDOs and other ABS where inputs, which are significant to their valuation, became unobservable during the year. CDOs and RMBS agency comprised the majority of the transferred instruments out of Level 3 where inputs, which are significant to their valuation, became observable during the year. These inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs. There were no transfers into or out of Level 1.

All Level 1, 2 and 3 designations are made at the end of each accounting period.

Total	\$ (57)	\$ 71	\$ 705	\$ 374

Fair Value Option

The Company elected to record at fair value certain financial instruments of VIEs that have been consolidated in connection with the adoption of the accounting guidance for consolidation of VIEs, among others.

The following table presents the changes in fair value included in the Company's consolidated statements of operations for the three and six months ended June 30, 2013 and 2012 for all financial instruments for which the fair value option was elected:

In millions	Net Gains (Losses) on Financial Instruments at Fair Value and Foreign Exchange			
	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Fixed-maturity securities held at fair value	\$ (16)	\$ (56)	\$ 2	\$ (57)
Loans receivable at fair value:				
Residential mortgage loans	145	(117)	71	(99)
Other loans	-	(2)	13	(41)
Loan repurchase commitments	50	44	139	43
Long-term debt	(160)	135	(79)	128

Substantially all gains and losses included in earnings during the three and six months ended June 30, 2013 on loans receivable and VIE notes reported in the preceding table are attributable to credit risk. This is primarily due to the high rate of defaults on loans and the collateral supporting the VIE notes, resulting in depressed pricing of the financial instruments.

Table of Contents

MBIA Inc. and Subsidiaries Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

The following table reflects the difference between the aggregate fair value and the aggregate remaining contractual principal balance outstanding as of June 30, 2013 and December 31, 2012 for loans and VIE notes for which the fair value option was elected:

In millions	As of June 30, 2013			As of December 31, 2012		
	Contractual Outstanding Principal	Fair Value	Difference	Contractual Outstanding Principal	Fair Value	Difference
Loans receivable at fair value:						
Residential mortgage loans	\$ 2,025	\$1,704	\$ 321	\$ 2,307	\$1,735	\$ 572

Other loans	-	-	-	22	22	-
Other loans (90 days or more past due)	-	-	-	197	70	127
Total loans receivable at fair value	\$ 2,253	\$1,790	\$ 463	\$ 2,770	\$1,881	\$ 889
Variable interest entity notes	\$ 4,013	\$2,590	\$ 1,423	\$ 9,021	\$3,659	\$ 5,362

Note 7: Investments

Investments, excluding those elected under the fair value option, include debt and equity securities classified as either AFS or HTM. Other invested assets designated as AFS are primarily comprised of money market funds.

The following tables present the amortized cost, fair value, corresponding gross unrealized gains and losses and other-than-temporary impairments ("OTTI") for AFS and HTM investments in the Company's consolidated investment portfolio as of June 30, 2013 and December 31, 2012:

In millions	June 30, 2013				
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Other-Than- Temporary Impairments ⁽¹⁾
AFS Investments

Total fixed-maturity investments	<u>\$ 5,256</u>	<u>\$ 5,180</u>	<u>\$ 2,818</u>	<u>\$ 2,690</u>

Deposited and Pledged Securities

The fair value of securities on deposit with various regulatory authorities was \$11 million and \$10 million as of June 30, 2013 and December 31, 2012, respectively. These deposits are required to comply with state insurance laws.

The Company enters into securities borrowing and lending contracts in connection with MBIA's collateralized investment agreement activities. Such contracts are only transacted with high-quality dealer firms. It is the Company's policy to take possession of securities borrowed under these contracts. The Company minimizes credit risk from counterparties that might be unable to fulfill their contractual obligations by monitoring customer credit exposure and collateral values and requiring additional collateral to be deposited with the Company when deemed necessary.

Substantially all of the obligations under investment agreements require the Company to pledge securities as collateral. Securities pledged in connection with investment agreement activities may not be repledged by the investment agreement counterparty. As of June 30, 2013 and December 31, 2012, the fair value of securities pledged as collateral for these investment agreements approximated \$762 million and \$820 million, respectively. The Company's collateral as of June 30, 2013 consisted principally of RMBS, U.S. Treasury and government agency bonds and state and municipal bonds, and was primarily held with major U.S. banks. Additionally, the Company pledged cash and money market securities as collateral under investment agreements in the amount of \$33 million and \$144 million as of June 30, 2013 and December 31, 2012, respectively.

Asset-backed securities:						
Collateralized debt obligations	-	-	85	(8)	85	(8)
Total AFS investments	\$ 702	\$ (4)	\$ 582	\$ (148)	\$ 1,284	\$ (152)
HTM Investments						
Assets of consolidated VIEs:						
Corporate obligations	\$ 297	\$ (19)	\$ 1,287	\$ (138)	\$ 1,584	\$ (157)
Total HTM investments	\$ 297	\$ (19)	\$ 1,287	\$ (138)	\$ 1,584	\$ (157)

Gross unrealized losses on AFS securities increased as of June 30, 2013 compared with December 31, 2012 primarily due to market price depreciation caused by rising interest rates. Gross unrealized losses on HTM securities decreased as of June 30, 2013 compared with December 31, 2012 primarily due to market price appreciation driven by a decline in credit spreads.

With the weighting applied on the fair value of each security relative to the total fair value, the weighted average contractual maturity of securities in an unrealized loss position as of June 30, 2013 and December 31, 2012 was 20 and 23 years, respectively. As of June 30, 2013 and December 31, 2012, there were 70 and 153 securities, respectively, that were in an unrealized loss position for a continuous twelve-month period or longer, of which the fair values of 40 and 89 securities, respectively, were below book value by more than 5%.

The following table presents the distribution of securities in an unrealized loss position for a continuous twelve-month period or longer by percentage of fair value below book value by more than 5%:

Percentage of Fair Value Below Book Value	AFS Securities			HTM Securities		
	Number of Securities	Book Value (in millions)	Fair Value (in millions)	Number of Securities	Book Value (in millions)	Fair Value (in millions)

MBIA Inc. and Subsidiaries Notes to Consolidated Financial Statements (Unaudited)

Note 7: Investments (continued)

The following table presents the fair values and gross unrealized losses by credit rating category of ABS, MBS and corporate obligations included in the Company's consolidated AFS investment portfolio as of June 30, 2013 for which fair value was less than amortized cost. The credit ratings are based on ratings from Moody's as of June 30, 2013 or an alternate ratings source, such as S&P, when a security is not rated by Moody's. For investments that are insured by various third-party guarantee insurers, the credit rating reflects the higher of the insurer's rating or the underlying bond's rating.

In millions	Aaa		Aa		A		Baa		Below Investment Grade		Not Rated		Total	
	Unrealized		Unrealized		Unrealized		Unrealized		Unrealized		Unrealized		Unrealized	
Asset Type	Fair Value	Loss	Fair Value	Loss	Fair Value	Loss	Fair Value	Loss	Fair Value	Loss	Fair Value	Loss	Fair Value	Loss
ABS	\$ 14	\$ -	\$ 62	\$ (5)	\$ 3	\$ -	\$ 4	\$ -	\$ 140	\$ (73)	\$ -	\$ -	\$ 223	\$ (78)
MBS	589	(21)	6	-	7	-	17	(1)	5	(1)	15	(5)	639	(28)
Corporate obligations	47	(1)	164	(7)	238	(13)	99	(16)	18	(1)	-	-	566	(38)
Total	\$ 650	\$ (22)	\$ 232	\$ (12)	\$ 248	\$ (13)	\$ 120	\$ (17)	\$ 163	\$ (75)	\$ 15	\$ (5)	\$ 1,428	\$ (144)

The total ABS, MBS and corporate obligations reported in the preceding table include those which are guaranteed by financial guarantors. In addition, the following table presents information on ABS, MBS and corporate obligations guaranteed by the Company and third-party financial guarantors.

Asset Type	Average Credit Rating with the Effect of Guarantee	Average Credit Rating without the Effect of Guarantee	Insured Securities Rated Below Investment Grade without the Effect of Guarantee	
			(in millions) Fair Value	Percentage
ABS	Below investment grade	Below investment grade	\$ 105	65 %
MBS	Baa	Below investment grade	15	87 %
Corporate obligations	Baa	Baa	-	- %

Refer to the table in the "Determination of Credit Loss Guaranteed by the Company and Other Third-Party Guarantors" section within the OTTI section of this note for information on the insured securities included in the table above.

The Company concluded that it does not have the intent to sell securities in an unrealized loss position and it is more likely than not, that it would not have to sell these securities before recovery of their cost basis. In making this conclusion, the Company examined the cash flow projections for its investment portfolios, the potential sources and uses of cash in its businesses, and the cash resources available to its business other than sales of securities. It also considered the existence of any risk management or other plans as of June 30, 2013 that would require the sale of impaired securities. Impaired securities that the Company intends to sell before the expected recovery of such securities' fair values have been written down to fair value.

Other-Than-Temporary Impairments

Evaluating AFS Securities for OTTI

The Company has an ongoing review process for all securities in its investment portfolio, including a quarterly assessment of OTTI. This evaluation includes both qualitative and quantitative considerations. In assessing whether a decline in value is related to a credit loss, the Company considers several factors, including but not limited to (i) the magnitude and duration of declines in fair value; (ii) the reasons for the declines in fair value, such as general credit spread movements in each asset-backed sector, transaction-specific changes in credit spreads, credit rating downgrades, modeled defaults, and principal and interest payment priorities within each investment structure; and (iii) any guarantees associated with a security such as those provided by financial guarantee insurance companies, including MBIA Corp. and National.

In calculating credit-related losses, the Company utilizes cash flow modeling based on the type of security. The Company's cash flow analysis considers all sources of cash, including credit enhancement, that support the payment of amounts owed by an issuer of a security. This includes the consideration of cash expected to be provided by financial guarantors, including MBIA Corp., resulting from an actual or potential insurance policy claim. In general, any change in the amount and/or timing of cash flows received or expected to be received, whether or not such cash flows are contractually defined, is reflected in the Company's cash flow analysis for purposes of assessing an OTTI loss on an impaired security.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 7: Investments (continued)

Each quarter, an internal committee, comprising staff that is independent of the Company's evaluation process for determining OTTI of securities, reviews and approves the valuation of investments. Among other responsibilities, this committee ensures that the Company's process for identifying and calculating OTTI, including the use of models and assumptions, is reasonable and complies with the Company's internal policy.

Determination of Credit Loss on ABS, MBS and Corporate Obligations

Investments with unrealized losses that met the above criteria were tested for OTTI and principally related to ABS, MBS and corporate obligations.

ABS investments are evaluated for OTTI using historical collateral performance, deal waterfall and structural protections, credit ratings, and forward looking projections of collateral performance based on business and economic conditions specific to each collateral type and risk. The underlying collateral is evaluated to identify any specific performance concerns, and stress scenarios are considered in forecasting ultimate returns of principal. Based on this evaluation, if a principal default is projected for a security, estimated future cash flows are discounted at the security's interest rate used to recognize interest income on the security. For CDO investments, the Company utilizes the same tools as for RMBS investments discussed below, aggregating the bond level cash flows to the CDO investment level. If the present value of cash flows is less than the Company's amortized cost for the security, the difference is recorded as an OTTI loss.

RMBS investments are evaluated for OTTI using several quantitative tools. Loan level data are obtained and analyzed in a model that produces prepayment, default, and severity vectors. The model utilizes macro inputs, including housing price assumptions and interest rates. The vector outputs are used as inputs to a third-party cash flow model, which considers deal waterfall dynamics and structural features, to generate cash flows for an RMBS investment. The expected cash flows of the security are then discounted at the interest rate used to recognize interest income of the security to arrive at a present value amount. If the present value of the cash flows is less than the Company's amortized cost for the investment, the difference is recorded as an OTTI loss.

Corporate obligation investments are evaluated for OTTI using credit analysis techniques. The Company's analysis includes a detailed review of a number of quantitative and qualitative factors impacting the value of an individual security. These factors include the interest rate of the security (fixed or floating), the security's current market spread, any collateral supporting the security, the security's position in the issuer's capital structure, and credit rating upgrades or downgrades. Additionally, these factors include an assessment of various issuer-related credit metrics including market capitalization, earnings, cash flow, capitalization, interest coverage, leverage, liquidity, management and a third-party quantitative default probability model. The Company's analysis is augmented by comparing market prices for similar securities of other issuers in the same sector, as well as any recent corporate or government actions that may impact the ultimate return of principal. If the Company determines that, after considering these factors, a principal default is projected, a recovery analysis is performed using the above data. If the Company's estimated recovery value for the security is less than its amortized cost, the difference is recorded as an OTTI loss.

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 7: Investments (continued)

For the six months ended June 30, 2012, the credit losses recognized in earnings were related to RMBS and CDOs. There were no impairments in 2013. The following table presents a summary of the significant inputs considered in determining the measurement of the credit losses on securities in which a portion of the impairment is included in AOCI:

Asset-backed Securities	Six Months Ended June 30, 2012
Expected size of losses ⁽¹⁾ :	
Range ⁽²⁾	9.73% to 100.00%
Weighted average ⁽³⁾	92.10%
Current subordination levels ⁽⁴⁾ :	
Range ⁽²⁾	0.00% to 0.00%
Weighted average ⁽³⁾	0.00%
Prepayment speed (annual constant prepayment rate) ⁽⁵⁾ :	
Range ⁽²⁾	0.00% to 49.60%
Weighted average ⁽³⁾	11.59%

(1) - Represents future expected credit losses on impaired assets expressed as a percentage of total outstanding balance.

(2) - Represents the range of inputs/assumptions based upon the individual securities within each category.

(3) - Calculated by weighting the relevant input/assumption for each individual security by the outstanding notional of the security.

(4) - Represents current level of credit protection (subordination) for the securities, expressed as a percentage of the balance of the collateral group backing the bond.

(5) - Values represent high and low points of lifetime vectors of constant prepayment rates.

Determination of Credit Loss Guaranteed by the Company and Other Third-Party Guarantors

The Company does not record OTTI related to credit concerns about issuers of securities insured by MBIA Corp. and National since investors in these securities, including MBIA, are guaranteed payment of principal and interest when due by MBIA. Securities insured by the Company, whether or not owned by the Company, are evaluated for impairment as part of its insurance surveillance process and, therefore, losses on securities insured by the Company are recorded in accordance with its loss reserving policy. Refer to "Note 2: Significant Accounting Policies" in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012 for information about the Company's loss reserving policy and "Note 5: Loss and Loss Adjustment Expense Reserves" for information about loss reserves.

In considering cash expected to be provided from other third-party financial guarantors, the Company assesses the financial guarantor's ability to make claim payments under a variety of scenarios that test the guarantor's ultimate claims paying ability. The weighted average outcome of these scenarios, combined with the cash flows provided by the insured security, are used to determine the recoverability of the Company's amortized cost.

Table of Contents

MBIA Inc. and Subsidiaries Notes to Consolidated Financial Statements (Unaudited)

Note 7: Investments (continued)

The following table provides information about securities held by the Company as of June 30, 2013 that were in an unrealized loss position and insured by a financial guarantor, along with the amount of insurance loss reserves corresponding to the par amount owned by the Company:

In millions	Fair Value	Unrealized Loss	Insurance Loss Reserve ⁽²⁾
Asset-backed:			
MBIA ⁽¹⁾	\$ 151	\$ (56)	\$ 15
Other	11	(4)	-
Total asset-backed	162	(60)	15
Mortgage-backed:			
MBIA ⁽¹⁾	2	-	-
Other	15	(1)	-
Total mortgage-backed	17	(1)	-
Corporate obligations:			
Other	11	(9)	-
Total corporate obligations	11	(9)	-
Other:			
MBIA ⁽¹⁾	97	(4)	-
Other	12	-	-
Total other	109	(4)	-
Total	\$ 299	\$ (74)	\$ 15

(1) - Includes investments insured by MBIA Corp. and National.

(2) - Insurance loss reserve estimates are based on the proportion of par value owned to the total amount of par value insured.

Credit Loss Rollforward

The portion of certain OTTI losses on fixed-maturity securities that does not represent credit losses is recognized in AOCI. For these impairments, the net amount recognized in earnings represents the difference between the amortized cost of the security and the net present value of its projected future discounted cash flows prior to impairment. Any remaining difference between the fair value and amortized cost is recognized in AOCI. The following table presents the amount of credit loss impairments recognized in earnings on fixed-maturity securities held by MBIA as of the dates indicated, for which a portion of the OTTI losses was recognized in AOCI, and the corresponding changes in such amounts.

In millions	Three Months Ended June 30,		Six Months Ended June 30,	
Credit Losses Recognized in Earnings Related to Other-Than-Temporary Impairments	2013	2012	2013	2012
Beginning balance	\$ 195	\$ 277	\$ 197	\$ 341
Additions for credit loss impairments recognized in the current period on securities previously impaired	-	1	-	3
Reductions for credit loss impairments previously recognized on securities sold during the period	(8)	(9)	(10)	(16)
Reductions for credit loss impairments previously recognized on securities impaired to fair value during the period ⁽¹⁾	-	-	-	(59)
Reductions for increases in cash flows expected to be collected over the remaining life of the security	(1)	-	(1)	-
Ending balance	<u>\$ 186</u>	<u>\$ 269</u>	<u>\$ 186</u>	<u>\$ 269</u>

(1) - Represents circumstances where the Company determined in the current period that it intends to sell the security or it is more likely than not that it will be required to sell the security before recovery of the security's amortized cost.

MBIA Inc. and Subsidiaries Notes to Consolidated Financial Statements (Unaudited)

Note 7: Investments (continued)

Sales of Available-For-Sale Investments

Gross realized gains and losses are recorded in "Net gains (losses) on financial instruments at fair value and foreign exchange" in the Company's consolidated statements of operations. The proceeds and gross realized gains and losses from sales of AFS investments for the six months ended June 30, 2013 and 2012 are as follows:

In millions	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Proceeds from sales	\$ 1,436	\$ 2,482	\$ 2,314	\$ 4,534
Gross realized gains	\$ 11	\$ 27	\$ 47	\$ 58
Gross realized losses	\$ (7)	\$ (16)	\$ (10)	\$ (96)

Note 8: Derivative Instruments

Overview

MBIA has entered into derivative instruments through its financial guarantee of CDS and for purposes of hedging risks associated with existing assets and liabilities and forecasted transactions. The Company accounts for derivative instruments in accordance with the accounting principles for derivative and hedging activities, which requires that all such instruments be recorded on the balance sheet at fair value. Refer to "Note 6: Fair Value of Financial Instruments" for the method of determining the fair value of derivative instruments.

U.S. Public Finance Insurance

The Company's derivative exposure within its U.S. public finance insurance operations primarily consists of insured interest rate and inflation-linked swaps related to insured U.S. public finance debt issues. These derivatives do not qualify for the financial guarantee scope exception. The Company has also purchased certain investments containing embedded derivatives. All derivatives are recorded at fair value on the Company's consolidated balance sheets with the changes in fair value recorded on the Company's consolidated statements of operations within "Unrealized gains (losses) on insured derivatives," for the insured derivatives, or "Net gains (losses) on financial instruments at fair value and foreign exchange" for the embedded derivatives.

Structured Finance and International Insurance

The Company entered into derivative instruments that it viewed as an extension of its core financial guarantee business but which do not qualify for the financial guarantee scope exception and, therefore, must be recorded at fair value on the balance sheet. These insured CDS contracts, primarily referencing corporate, asset-backed, residential mortgage-backed, commercial mortgage-backed, CRE loans and CDO securities, are intended to be held for the entire term of the contract absent a negotiated settlement with the counterparty.

Changes in the fair value of derivatives, excluding insured derivatives, are recorded each period in current earnings within "Net gains (losses) on financial instruments at fair value and foreign exchange." Changes in the fair value of insured derivatives are recorded each period in current earnings within "Net change in fair value of insured derivatives." The net change in the fair value of the Company's insured derivatives has two primary components: (i) realized gains (losses) and other settlements on insured derivatives and (ii) unrealized gains (losses) on insured derivatives. "Realized gains (losses) and other settlements on insured derivatives" include (i) premiums received and receivable on sold CDS contracts, (ii) premiums paid and payable to reinsurers in respect to CDS contracts, (iii) net amounts received or paid on reinsurance commutations, (iv) losses paid and payable to CDS contract counterparties due to the occurrence of a credit event or settlement agreement, (v) losses recovered and recoverable on purchased CDS contracts due to the occurrence of a credit event or settlement agreement and (vi) fees relating to CDS contracts. The "Unrealized gains (losses) on insured derivatives" include all other changes in fair value of the insured derivative contracts.

In certain instances, the Company's structured finance and international insurance business purchased or issued securities that contain embedded derivatives. In accordance with the accounting guidance for derivative instruments and hedging activities, the balance sheet location of the Company's embedded derivative instruments is determined by the location of the related security.

Variable Interest Entities

VEs consolidated by the Company have entered into derivative instruments primarily consisting of interest rate swaps. Interest rate swaps are entered into to mitigate the risks associated with fluctuations in interest rates or fair values of certain contracts.

Table of Contents

MBIA Inc. and Subsidiaries Notes to Consolidated Financial Statements (Unaudited)

Note 8: Derivative Instruments (continued)

Asset/Liability Products

The Company's asset/liability products business has entered into derivative instruments primarily consisting of interest rate swaps, cross currency swaps, and CDS contracts. Interest rate swaps are entered into to hedge the risks associated with fluctuations in interest rates or fair values of certain contracts. Cross currency swaps are entered into to hedge the variability in cash flows resulting from fluctuations in foreign currency rates. CDS contracts are entered into to hedge credit risk or to replicate investments in cash assets consistent with the Company's risk objectives and credit guidelines for its asset management business.

In certain instances, the Company's asset/liability products business purchased or issued securities that contain embedded derivatives. In accordance with the accounting guidance for derivative instruments and hedging activities, the balance sheet location of the Company's embedded derivative instruments is determined by the location of the related security.

Changes in the fair value of the Company's asset/liability products business derivatives are recorded on the Company's consolidated statements of operations within "Net gains (losses) on financial instruments at fair value and foreign exchange".

Credit Derivatives Sold

The following tables present information about credit derivatives sold by the Company's insurance operations that were outstanding as of June 30, 2013 and December 31, 2012. Credit ratings represent the lower of underlying ratings assigned to the collateral by Moody's, S&P or MBIA.

\$ in millions	As of June 30, 2013

Internal credit ratings assigned by MBIA on the underlying collateral are derived by the Company's surveillance group. In assigning an internal rating, current status reports from issuers and trustees, as well as publicly available transaction-specific information, are reviewed. Also, where appropriate, cash flow analyses and collateral valuations are considered. The maximum potential amount of future payments (undiscounted) on CDS contracts are estimated as the notional value plus any additional debt service costs, such as interest or other amounts owing on CDS contracts. The maximum amount of future payments that MBIA may be required to make under these guarantees as of June 30, 2013 is \$27.5 billion. This amount is net of \$72 million of insured derivatives ceded under reinsurance agreements in which MBIA economically hedges a portion of the credit and market risk associated with its insured derivatives and offsetting agreements with a counterparty. The maximum potential amount of future payments (undiscounted) on insured swaps are estimated as the notional value of such contracts.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 8: Derivative Instruments (continued)

MBIA may hold recourse provisions with third parties in derivative instruments through both reinsurance and subrogation rights. MBIA's reinsurance arrangements provide that in the event MBIA pays a claim under a guarantee of a derivative contract, MBIA has the right to collect amounts from any reinsurers that have reinsured the guarantee on either a proportional or non-proportional basis, depending upon the underlying reinsurance agreement. MBIA may also have recourse through subrogation rights whereby if MBIA makes a claim payment, it is entitled to any rights of the insured counterparty, including the right to any assets held as collateral.

Counterparty Credit Risk

The Company manages counterparty credit risk on an individual counterparty basis through master netting agreements covering derivative instruments in the asset/liability products segment. There are no master netting agreements in the structured finance and international insurance or the U.S. public finance insurance segments. The master netting agreements in the asset/liability products segment allow the Company to contractually net amounts due from a counterparty with those amounts due to such counterparty when certain triggering events occur. The Company only executes swaps under master netting agreements, which typically contain mutual credit downgrade provisions that generally provide the ability to require assignment or termination in the event either MBIA or the counterparty is downgraded below a specified credit rating.

Under these arrangements, the Company may receive or provide U.S. Treasury and other highly rated securities or cash to secure counterparties' exposure to the Company or its exposure to counterparties, respectively. Such collateral is available to the holder to pay for replacing the counterparty in the event that the counterparty defaults. As of June 30, 2013, the Company did not hold cash collateral to derivative counterparties but posted cash collateral to derivative counterparties of \$223 million. Of this amount, \$151 million is netted within "Derivative liabilities", \$16 million is included within "Other liabilities" as cash collateral netted against accrued interest on derivative liabilities and an additional \$56 million is included in "Other assets" on the Company's consolidated balance sheets. As of December 31, 2012, the Company did not hold cash collateral to derivative counterparties but posted cash collateral to derivative counterparties of \$285 million. Of this amount, \$203 million is netted within "Derivative liabilities", \$16 million is included within "Other liabilities" as cash collateral netted against accrued interest on derivative liabilities and an additional \$66 million is included in "Other assets" on the Company's consolidated balance sheets. As of June 30, 2013 and December 31, 2012, the Company did not post securities to derivative counterparties.

As of June 30, 2013 and December 31, 2012, the fair value on one positive Credit Support Annex ("CSA") was \$3 million and \$4 million, respectively. This CSA governs collateral posting requirements between MBIA and its derivative counterparties. The Company did not receive collateral due to the Company's credit rating, which was below the CSA minimum credit ratings level for holding counterparty collateral. As of June 30, 2013 and December 31, 2012, the counterparty was rated A2 by Moody's and A by S&P.

Financial Statement Presentation

The fair value of amounts recognized for eligible derivative contracts executed with the same counterparty under a master netting agreement, including any cash collateral that may have been received or posted by the Company, is presented on a net basis in accordance with accounting guidance for the offsetting of fair value amounts related to derivative instruments. Insured CDSs and insured swaps are not subject to master netting agreements. VIE derivative assets and liabilities are not presented net of any master netting agreements.

As of June 30, 2013, the total fair value of the Company's derivative assets, after counterparty netting of \$59 million, was \$12 million, of which \$4 million was reported within "Other assets" and "Other assets" presented under "Assets of consolidated variable interest entities" on the Company's consolidated balance sheets. Embedded derivatives of \$8 million were reported within "Medium-term notes" on the Company's consolidated balance sheets.

As of June 30, 2013, the total fair value of the Company's derivative liabilities, after counterparty netting of \$59 million and cash collateral posted by the Company of \$151 million was \$1.7 billion, which was reported within "Derivative liabilities" and "Derivative liabilities" presented under "Liabilities of consolidated variable interest entities" on the Company's consolidated balance sheets. Embedded derivatives of \$30 million were reported within "Medium-term notes" on the Company's consolidated balance sheets.

Counterparty netting of derivative assets and liabilities offsets balances in "Interest rate" and "Currency swaps" in the table below.

Table of Contents

MBIA Inc. and Subsidiaries Notes to Consolidated Financial Statements (Unaudited)

Note 8: Derivative Instruments (continued)

The following table presents the total fair value of the Company's derivative assets and liabilities by instrument and balance sheet location, before counterparty netting and posting of cash collateral, as of June 30, 2013:

In millions		Derivative Assets ⁽¹⁾		Derivative Liabilities ⁽¹⁾	
	Notional Amount Outstanding	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivative Instruments					
Not designated as hedging instruments:					
Insured credit default swaps	\$ 26,826	Other assets	\$ -	Derivative liabilities	\$(1,641)
Insured swaps	5,539	Other assets	-	Derivative liabilities	(7)
Non-insured credit default swaps	5	Other assets	-	Derivative liabilities	-
Interest rate swaps	1,601	Other assets	62	Derivative liabilities	(209)
Interest rate swaps-VIE	127	Other assets-VIE	-	Derivative liabilities-VIE	(2)
Interest rate swaps-embedded	472	Medium-term notes	8	Medium-term notes	(30)
Currency swaps	19	Other assets	-	Derivative liabilities	(1)
Currency swaps-VIE	104	Other assets-VIE	-	Derivative liabilities-VIE	(16)
All other	36	Other assets	-	Derivative liabilities	(7)
All other-VIE	280	Other assets-VIE	1	Derivative liabilities-VIE	-
All other-embedded	13	Other investments	-	Other investments	-
Total non-designated derivatives	\$ 35,022		\$ 71		\$(1,913)

(1) - In accordance with the accounting guidance for derivative instruments and hedging activities, the balance sheet location of the Company's embedded derivative instruments is determined by the location of the related host contract.

As of December 31, 2012, the total fair value of the Company's derivative assets, after counterparty netting of \$90 million, was \$12 million, of which \$4 million was reported within "Other assets" and "Other assets" presented under "Assets of consolidated variable interest entities" on the Company's consolidated balance sheets. Embedded derivatives of \$8 million were reported within "Medium-term notes" on the Company's consolidated balance sheets.

As of December 31, 2012, the total fair value of the Company's derivative liabilities, after counterparty netting of \$90 million and cash collateral posted by the Company of \$203 million, was \$3.1 billion which was reported within "Derivative liabilities" and "Derivative liabilities" presented under "Liabilities of consolidated variable interest entities" on the Company's consolidated balance sheets. Embedded derivatives of \$36 million were reported within "Medium-term notes" and "Other investments" on the Company's consolidated balance sheets.

Counterparty netting of derivative assets and liabilities offsets balances in "Interest rate swaps" and "Currency swaps" in the table below.

Note 9: Debt

The Company has disclosed its debt in "Note 10: Debt" in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012. The following debt discussion provides an update to the Company's Annual Report on Form 10-K.

Long-Term Debt

In connection with the BofA Settlement Agreement, MBIA Corp. received \$136 million principal amount of the 5.70% Senior Notes due 2034 as consideration for the settlement. These notes were subsequently transferred to National. On a consolidated basis, receipt of these notes by the Company reduced its outstanding debt.

Interest and principal payments on the 14% Fixed to Floating Rate Surplus Notes due 2033 are subject to prior approval by the Superintendent of the NYSDFS. MBIA Insurance Corporation's request for approval of the January 15, 2013, April 15, 2013, and July 15, 2013 note interest payments were denied by the NYSDFS. MBIA Insurance Corporation provided notice to the Fiscal Agent that it has not made a scheduled interest payment. The deferred interest payment will become due on the first business day on or after which MBIA Insurance Corporation obtains approval to make such payment. No interest will accrue on the deferred interest. As of June 30, 2013, the Company had accrued interest related to these surplus notes of \$117 million, which was included in "Other liabilities" on the Company's consolidated balance sheets.

Medium-Term Note Obligations

During the six months ended June 30, 2013, the Company redeemed \$336 million par value outstanding of MTNs issued by the Company's conduit segment at a cost of 100% of par value. The Company also repurchased approximately \$38 million par value outstanding of MBIA Global Funding, LLC ("GFL") MTNs issued by the Company's asset/liability segment at a weighted average cost of approximately 97% of par value.

Other Borrowing Arrangements

Blue Ridge Secured Loan

In connection with the BofA Settlement Agreement in May of 2013, MBIA Insurance Corporation and Blue Ridge entered into the Blue Ridge Secured Loan, pursuant to which Blue Ridge agreed to make revolving loans to MBIA Insurance Corporation in an aggregate of up to \$500 million. The following is a summary of the material terms of the Loan Agreement, as amended by Amendment No. 1 entered into in June of 2013. This summary is not complete and is subject to the full text of the document described below.

Use of Proceeds

The proceeds of the Blue Ridge Secured Loan can be used for general corporate purposes. Once the Blue Ridge Secured Loan amount outstanding exceeds \$50 million, the proceeds must be used for the purpose of meeting ordinary course liquidity requirements expected to arise during the 30 days following such borrowing.

Table of Contents

MBIA Inc. and Subsidiaries Notes to Consolidated Financial Statements

Note 9: Debt (continued)

Conditions to Borrowings

Blue Ridge's obligation to make loans is subject to usual and customary conditions precedent, including that on the date of the borrowing (i) no default is continuing or would occur as a result of that borrowing and (ii) the representations and warranties specified in the Blue Ridge Secured Loan agreement are true and accurate in all material respects.

Security

The Loans are secured by a pledge of collateral consisting of the following: (i) MBIA Insurance Corporation's right to receive put-back recoveries related to ineligible mortgage loans included in its insured RMBS transactions; (ii) MBIA Insurance Corporation's future recoveries on defaulted insured RMBS transactions resulting from expected excess spread generated by performing loans in such transactions; (iii) MBIA Insurance Corporation's future installment premiums; and (iv) 65% of the voting capital stock of MBIA Corp.'s equity interest in MBIA UK (Holdings) Limited (the collateral described in clauses (ii) and (iii) above, the "Other Prepayment Collateral"). Under the Blue Ridge Secured Loan, the value of the collateral described in clauses (i) through (iii) above, must at all times be greater than \$1.0 billion. As of June 30, 2013, the value of the collateral was approximately \$2.5 billion.

Interest Rate and Fees

Borrowings under the Blue Ridge Secured Loan have a variable interest rate, at MBIA Insurance Corporation's option based on either: (i) the adjusted LIBOR plus an applicable margin ("LIBOR Loans"), or (ii) the highest between (a) Bank of America's prime rate and (b) the sum of the federal funds effective rate plus 0.5% and (c) the adjusted LIBOR plus 1.00%, plus an applicable margin ("Base Rate Loans"). The applicable margin for the LIBOR Loans and the Base Rate Loans is 7.50% and 6.50%, respectively. With respect to any available but undrawn amounts under the Blue Ridge Secured Loan, MBIA Insurance Corporation is obligated to pay a commitment fee on such undrawn amounts of 2.00% per annum. The amount of the commitment fee expense for the six months ended June 30, 2013 was \$1 million.

Scheduled Repayment

The maturity date of the Blue Ridge Secured Loan is three years from the closing date, at which time any then outstanding loans will be due and payable.

Mandatory Prepayments

Loans are required to be prepaid (and Blue Ridge's commitments reduced) in an amount equal to the following: (i) 100% of the proceeds of any put-back recoveries and (ii) on and after the first anniversary of the closing date, from the proceeds of any Other Prepayment Collateral in an amount equal to (x) from the first anniversary of the closing date to the second anniversary of the closing date, 50% of such proceeds and (y) from the second anniversary of the closing date to the maturity date, 100% of such proceeds. In addition, loans must be prepaid (and Blue Ridge's commitments reduced) in an amount equal to 100% of the proceeds of certain disposals of assets to the extent exceeding \$1 million in aggregate for all such disposals. Finally, loans must be prepaid (but without any commitment reduction) to the extent the proceeds of any borrowing that is a liquidity borrowing are not in fact used for such purposes and have not otherwise been used to repay loans within the required 30-day period.

Representations and Warranties

The Blue Ridge Secured Loan contains certain customary representations and warranties for loan facilities of this type, which are given on the closing date and at each borrowing under the Blue Ridge Secured Loan agreement, including with respect to organization of MBIA Insurance Corporation, power of authority, enforceability of the loan documents, receipt of any necessary governmental approvals, financial condition and solvency, and compliance with laws.

Covenants

The Blue Ridge Secured Loan contains certain affirmative, negative and financial covenants, which are customary for loan facilities of this type in relation to, among other matters, delivery of financial statements, notice of material events, existence and conduct of business, payment of taxes and other obligations, maintenance of books and records, compliance with all material laws, and maintenance of insurance, and includes a requirement that MBIA Insurance Corporation maintain at least \$750 million of statutory capital (defined as policyholders' surplus plus contingency reserves).

Table of Contents

MBIA Inc. and Subsidiaries Notes to Consolidated Financial Statements

Note 9: Debt (continued)

In addition, MBIA Insurance Corporation may not, without Blue Ridge's consent, consummate any amendments, compromises or commutations with respect to insurance obligations and settlements of litigation to the extent (x) that payments made in respect of such remediation efforts subsequent to June 28, 2013 exceed \$260 million in the aggregate, (y) after giving effect thereto and to any borrowings of loans in connection therewith, the aggregate principal amount of loans outstanding would exceed \$200 million or (z) after giving effect thereto, all remediation efforts taken as a whole since the closing date, would, cumulatively, have reduced MBIA Insurance Corporation's statutory capital by \$100 million or more.

In addition, MBIA Insurance Corporation may not prepay, redeem, purchase, defease or otherwise satisfy prior to the scheduled maturity thereof in any manner, or make any payment of principal, interest or fees or any other payment on, any of its indebtedness (including the Surplus Notes), except for payments of the loans under the Blue Ridge Secured Loan agreement and except for certain refinancings and refundings of its indebtedness.

Change of Control

MBIA Insurance Corporation may be required to prepay all amounts outstanding under the Blue Ridge Secured Loan agreement upon the occurrence of a change of control.

Events of Default

The Blue Ridge Secured Loan agreement contains certain events of default which are customary for loan facilities of this type (and with customary cure periods), including failure to pay principal, interest or fees on the loans, misrepresentation, failure to observe covenants or conditions, failure to pay other material indebtedness, insolvency and bankruptcy matters, and unlawfulness or invalidity of the loan documents.

Note 10: Income Taxes

The Company's income taxes and the related effective tax rates for the three and six months ended June 30, 2013 and 2012 are as follows:

In millions	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Income (loss) before income taxes	\$ (264)	\$ 795	\$ (49)	\$ 816
Provision (benefit) for income taxes	\$ (86)	\$ 214	\$ (35)	\$ 225
Effective tax rate	32.6%	26.9%	71.4%	27.6%

For the six months ended June 30, 2013, the Company's effective tax rate applied to its pre-tax loss was higher than the U.S. statutory tax rate primarily as a result of the decrease in the valuation allowance against its deferred tax asset, net of certain nondeductible expenses.

For the six months ended June 30, 2012, the Company's effective tax rate applied to its income before income taxes was lower than the U.S. statutory tax rate as a result of the decrease in the valuation allowance, the release of a portion of the reserve for uncertain tax benefits and the benefit of tax-exempt interest income from investments.

For interim reporting purposes, the Company has calculated its effective tax rate for the full year of 2013 by adjusting annual forecasted pre-tax income for mark-to-market income, fair value adjustments, capital gains/losses, and other adjustments, when projecting its full year effective tax rate. The Company has accounted for these items at the federal applicable tax rate after applying the projected full year effective tax rate to actual six-month results before discrete items.

Deferred Tax Asset, Net of Valuation Allowance

The Company establishes a valuation allowance against its deferred tax asset when it is more likely than not that all or a portion of the deferred tax asset will not be realized. All evidence, both positive and negative, needs to be identified and considered in making the determination. Future realization of the existing deferred tax asset ultimately depends, in part, on the existence of sufficient taxable income of appropriate character (for example, ordinary income versus capital gains) within the carryforward period available under the tax law.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 10: Income Taxes (continued)

As of June 30, 2013, the Company reported a net deferred tax asset of \$1.3 billion. The \$1.3 billion net deferred tax asset is net of a \$93 million valuation allowance. As of June 30, 2013, the Company had a valuation allowance against a portion of the deferred tax asset related to losses from asset impairments as these losses are considered capital losses, have a five-year carryforward period, once recognized, and can only offset capital gain income. The June 30, 2013 valuation allowance reflects a decrease of \$53 million from the December 31, 2012 valuation allowance of \$146 million. The decrease in the valuation allowance for the six months ended June 30, 2013 was primarily due to the generation of capital gain income from the termination of certain contracts.

The Company has concluded that it is more likely than not that its net deferred tax asset will be realized. In its conclusion, the Company considered the following evidence (both positive and negative):

- Due to the long-tail nature of the financial guarantee business, MBIA Inc.'s insurance subsidiaries, without regard to any new business, will have a steady stream of scheduled premium earnings with respect to the existing insured portfolio. Additionally, MBIA Corp.'s announcement in February 2008 of a suspension in writing new structured finance transactions and a permanent cessation with respect to insuring new CDS contracts, except in transactions related to the reduction of existing derivative exposure, would not have an impact on the expected earnings related to the existing insured portfolio.
- The Company performed taxable income projections over a twenty-year period to determine whether it will have sufficient income to offset its deferred tax asset that will generate future ordinary deductions. In this analysis, the Company concluded that premium earnings, including projected new business at National, combined with investment income, less deductible expenses, will be sufficient to recover its net deferred tax asset. The Company's taxable income projections used to assess the recoverability of its deferred tax asset include an estimate of future loss and LAE equal to the present value discount of loss reserves already recognized on the balance sheet and an estimate of LAE which is generally insignificant. The Company does not assume additional losses, with the exception of the accretion of its existing present value loss reserves, because the Company establishes case basis reserves on a present value basis based on an estimate of probable losses on specifically identified credits that have defaulted or are expected to default.
- While the lack of strong credit ratings assigned by the rating agencies have significantly adversely impacted the Company's ability to write new insurance business, these ratings did not have a material impact on earnings from the existing insured portfolio, which the Company believes will be sufficient to absorb losses in the event that the cumulative unrealized losses become fully impaired.
- With respect to installment policies, the Company generally does not have an automatic cancellation provision solely in connection with ratings downgrades. With regard to upfront policies, to the extent that the issuer chooses to terminate a policy, any unearned premium reserve with respect to that policy will be accelerated into earnings (i.e. refundings).

After reviewing all of the evidence available, both positive and negative, the Company believes that it has appropriately valued the recoverability of its deferred tax assets, net of the valuation allowance, as of June 30, 2013. The Company continues to assess the adequacy of its valuation allowance as additional evidence becomes available. The Company's recent financial results have been volatile which has impacted management's ability to accurately project future taxable income. Continued volatility or losses beyond those projected may cause the Company to conclude that certain of the deferred tax assets within the total deferred tax assets of \$1.3 billion as of June 30, 2013 may not be realizable. The Company performs an analysis every quarter to review its conclusion as to the ability to realize the deferred tax asset.

Accounting for Uncertainty in Income Taxes

The Company's policy is to record and disclose any change in UTB and related interest and/or penalties to income tax in the consolidated statements of operations.

In millions	
Unrecognized tax benefit as of December 31, 2012	\$ 47
The gross amount of the increase/(decrease) in the UTB as a result of tax positions taken:	
During a prior year	-
During the current year	11
The amounts of decreases in the UTB related to settlements with taxing authorities	-
The reduction in the UTB as a result of the applicable statute of limitations	-
Unrecognized tax benefit as of June 30, 2013	\$ 58

MBIA's major tax jurisdictions include the U.S. and the U.K. MBIA and its U.S. subsidiaries file a U.S. consolidated federal income tax return.

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 10: Income Taxes (continued)

The U.K. tax authorities are currently auditing tax years 2005 through 2010. On June 5, 2013, the Company met with the HM Revenue & Customs and discussions are ongoing.

In June of 2013, the New York State Department of Taxation contacted the Company to request a meeting to discuss their position regarding certain issues related to the 2008 tax year. The Company will be meeting with the New York State Department of Taxation in the third quarter of 2013.

As of December 31, 2012, the Company's consolidated NOL carryforward was \$1.4 billion which will expire between tax years 2029 through 2032. As of December 31, 2012, the Company also had a capital loss carryforward of \$162 million which will expire between tax years 2013 through 2017.

Note 11: Business Segments

MBIA manages its activities through three principal business operations: U.S. public finance insurance, structured finance and international insurance, and advisory services. The Company's U.S. public finance insurance business is operated through National, its structured finance and international insurance business is operated through MBIA Corp., and its advisory services business is primarily operated through Cutwater. MBIA Inc. and certain of its subsidiaries also manage certain other business activities, the results of which are reported in its corporate, asset/liability products, and conduit segments. The corporate segment includes revenues and expenses that arise from general corporate activities. While the asset/liability products and conduit businesses represent separate business segments, they may be referred to collectively as "wind-down operations" as the funding programs managed through those businesses are in wind-down.

As defined by segment reporting, an operating segment is a component of a company (i) that engages in business activities from which it earns revenue and incurs expenses, (ii) whose operating results are regularly reviewed by the Chief Operating Decision Maker to assess the performance of the segment and to make decisions about the allocation of resources to the segment and, (iii) for which discrete financial information is available. The following sections provide a description of each of the Company's reportable operating segments.

U.S. Public Finance Insurance

The Company's U.S. public finance insurance segment is principally conducted through National. The financial guarantees issued by National provide unconditional and irrevocable guarantees of the payment of principal of, and interest or other amounts owing on, U.S. public finance insured obligations when due. The obligations are generally not subject to acceleration, except that National may have the right, at its discretion, to accelerate insured obligations upon default or otherwise. National issues financial guarantees for municipal bonds, including tax-exempt and taxable indebtedness of U.S. political subdivisions, as well as utility districts, airports, health care institutions, higher educational facilities, student loan issuers, housing authorities and other similar agencies and obligations issued by private entities that finance projects that serve a substantial public purpose. Municipal bonds and privately issued bonds used for the financing of public purpose projects are generally supported by taxes, assessments, fees or tariffs related to the use of these projects, lease payments or other similar types of revenue streams. National has not written any meaningful amount of business since its formation in 2009.

Structured Finance and International Insurance

The Company's structured finance and international insurance segment is principally conducted through MBIA Corp. The financial guarantees issued by MBIA Corp. generally provide unconditional and irrevocable guarantees of the payment of principal of, and interest or other amounts owing on, global structured finance and non-U.S. public finance insured obligations when due, or in the event MBIA Corp. has the right, at its discretion, to accelerate insured obligations upon default or otherwise, upon MBIA Corp.'s acceleration. Certain guaranteed investment contracts written by MBIA Inc. are insured by MBIA Corp., and if MBIA Inc. were to have insufficient assets to pay amounts due upon maturity or termination, MBIA Corp. would make such payments. MBIA Corp. also insures debt obligations of the following affiliates:

- MBIA Inc.;
- GFL;
- Meridian Funding Company, LLC;
- LaCrosse Financial Products, LLC, a wholly-owned affiliate, in which MBIA Corp. has written insurance policies guaranteeing the obligations under CDS, including termination payments that may become due upon certain events including the insolvency or payment default of the financial guarantor or the CDS issuer.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 11: Business Segments (continued)

MBIA Corp.'s guarantees insure structured finance and asset-backed obligations, privately issued bonds used for the financing of public purpose projects, which are primarily located outside of the U.S. and that include toll roads, bridges, airports, public transportation facilities, utilities and other types of infrastructure projects serving a substantial public purpose, and obligations of sovereign-related and sub-sovereign issuers. Structured finance and ABS typically are securities repayable from expected cash flows generated by a specified pool of assets, such as residential and commercial mortgages, insurance policies, consumer loans, corporate loans and bonds, trade and export receivables, and leases for equipment, aircraft and real estate property. The Company is no longer insuring new credit derivative contracts except for transactions related to the reduction of existing derivative exposure. MBIA Corp. has not written any meaningful amount of business since 2008.

Advisory Services

The advisory services segment primarily consists of the operations of Cutwater Investor Services Corp. ("Cutwater-ISC"), Cutwater Asset Management Corp. ("Cutwater-AMC"), and Trifinium. Cutwater-ISC and Cutwater-AMC provide advisory services, including cash management, discretionary asset management and structured products on a fee-for-service basis. Cutwater offers these services to public, not-for-profit, corporate and financial services clients, including MBIA Inc. and its subsidiaries, as well as portfolio accounting and reporting services. Cutwater-ISC and Cutwater-AMC are Securities and Exchange Commission registered investment advisers. Cutwater-AMC is also a Financial Industry Regulatory Authority member firm. Trifinium provides fee-based asset management and advisory services to the Company's foreign insurance affiliate and to third-party clients and investment structures. Trifinium is regulated by the Financial Conduct Authority in the U.K.

Corporate

The Company's corporate segment is principally conducted through Optinuity Alliance Resources Corporation ("Optinuity"), which provides general support services to the corporate segment and other operating businesses. Optinuity is a reportable segment that includes revenues and expenses that arise from general corporate activities, such as fees, net investment income, net gains and losses, interest expense on MBIA Inc. debt and general corporate expenses. Employees of the service company provide various support services including management, legal, accounting, treasury, information technology, and insurance portfolio surveillance, among others, on a fee-for-service basis. The service company's revenues and expenses are included in the results of the corporate segment.

Wind-down Operations

The Company's wind-down operations consist of the asset/liability products and conduit segments. The asset/liability products segment principally consists of the activities of MBIA Inc., MBIA Investment Management Corp. ("IMC") and GFL. IMC, along with MBIA Inc., provided customized investment agreements, guaranteed by MBIA Corp., for bond proceeds and other public funds for such purposes as construction, loan origination, escrow and debt service or other reserve fund requirements. It also provided customized products for funds that are invested as part of asset-backed or structured product transactions. GFL raised funds through the issuance of MTNs with varying maturities, which were, in turn, guaranteed by MBIA Corp. GFL lent the proceeds of these MTN issuances to MBIA Inc. ("GFL Loans"). MBIA Inc. invested the proceeds of investment agreements and GFL Loans in eligible investments, which consisted of investment grade securities rated investment grade at the time of purchase and maintained a minimum average double-A credit quality rating at the time of purchase. MBIA Inc. primarily purchases domestic securities, which are pledged to MBIA Corp. as security for its guarantees on investment agreements and MTNs.

The Company's conduit segment administers one conduit through MBIA Asset Finance, LLC. Assets financed by this conduit are currently funded by MTNs.

The ratings downgrades of MBIA Corp. have resulted in a substantial reduction of funding activities and the termination and collateralization of certain investment agreements, as well as winding down of existing asset/liability products and conduit obligations.

(2) - Represents intercompany asset management fees and expenses plus intercompany interest income and expense pertaining to intercompany debt.

Table of Contents

MBIA Inc. and Subsidiaries Notes to Consolidated Financial Statements (Unaudited)

Note 12: Earnings Per Share

Basic earnings per share excludes dilution and is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects the dilutive effect of all stock options, warrants and other items outstanding during the period that could potentially result in the issuance of common stock. For the three months ended June 30, 2013 and 2012, there were 26,762,203 and 28,737,819, respectively, of stock options and warrants outstanding that were not included in the diluted earnings per share calculation because they were antidilutive. For the six months ended June 30, 2013 and 2012, there were 27,563,460 and 28,812,255, respectively, of stock options and warrants outstanding that were not included in the diluted earnings per share calculation because they were antidilutive.

The following table presents the computation of basic and diluted earnings per share for the three and six months ended June 30, 2013 and 2012:

\$ in millions except share and per share amounts	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Net income (loss)	\$ (178)	\$ 581	\$ (14)	\$ 591
Basic weighted average shares ⁽¹⁾	193,104,610	193,926,953	193,810,351	193,700,328
Effect of common stock equivalents:				
Stock options and warrants	-	1,014,280	-	1,063,289
Diluted weighted average shares	193,104,610	194,941,233	193,810,351	194,763,617
Net income (loss) per common share:				
Basic	\$ (0.92)	\$ 2.99	\$ (0.07)	\$ 3.05
Diluted	\$ (0.92)	\$ 2.98	\$ (0.07)	\$ 3.03

(1) - Includes 4,490,348 and 5,597,797 of unvested restricted stock and units that receive nonforfeitable dividends or dividend equivalents for the three months ended June 30, 2013 and 2012, respectively. Includes 5,303,456 and 5,400,564 of unvested restricted stock and units that receive nonforfeitable dividends or dividend equivalents for the six months ended June 30, 2013 and 2012, respectively.

Note 13: Accumulated Other Comprehensive Income

	8	Provision (benefit) for income taxes
Total reclassifications for the period	\$ 15	Net income (loss)

Note 14: Commitments and Contingencies

The following commitments and contingencies provide an update of those discussed in “Note 20: Commitments and Contingencies” in the Notes to Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012, and should be read in conjunction with the complete descriptions provided in the aforementioned Form 10-K.

Recovery Litigation

MBIA Insurance Corp. v. Countrywide Home Loans, Inc., et al.; Index No. 602825/08 (N.Y. Sup. Ct., N.Y. County)

In May of 2013, the parties reached an agreement to resolve MBIA’s claims in this action. Refer to “Note 1: Business Developments and Risks and Uncertainties” included herein for a description of the comprehensive settlement agreement.

MBIA Insurance Corp. v. Bank of America Corp.; Countrywide Home Loans, Inc., Countrywide Securities Corp., and Countrywide Financial Corp. et al.; Case No. BC417572 (Ca. Super. Ct., County of Los Angeles)

In May of 2013, the parties reached an agreement to resolve MBIA’s claims in this action. Refer to “Note 1: Business Developments and Risks and Uncertainties” included herein for a description of the comprehensive settlement agreement.

MBIA Insurance Corp. v. Federal Deposit Insurance Corporation (in its corporate capacity and as conservator and receiver for IndyMac Federal Bank, F.S.B.); Civil Action No. 09-01011 (ABJ) (D.D.C.)

On March 8, 2013, the United States Court of Appeals for the D.C. Circuit affirmed the district court’s ruling dismissing MBIA Corp.’s amended complaint.

MBIA Insurance Corp. v. Credit Suisse Securities (USA) LLC, et al. ; Index No. 603751/2009 (N.Y. Sup. Ct., N.Y. County)

On March 8, 2013, the defendants filed their answer to the amended complaint. On April 19, 2013, the court issued an order scheduling fact discovery to close by June 30, 2014.

MBIA Insurance Corp. v. J.P. Morgan Securities LLC (f/k/a Bear, Stearns & Co. Inc) ; Index No. 64676/2012 (N.Y. Sup. Ct., County of Westchester)

On November 7, 2012, J.P. Morgan Securities LLC withdrew its motion to dismiss and filed its answer on March 26, 2013.

MBIA Insurance Corp. v. Ally Financial Inc. (f/k/a GMAC, LLC) et al. ; 12-cv-02563 SRN/TNL (D. Minn.)

This case is currently stayed.

Note 14: Commitments and Contingencies (continued)

MBIA Insurance Corp. v. Flagstar ABS, LLC, et al.; 13-cv-0262 (JSR) (S.D.N.Y.)

The parties filed a Stipulation of Discontinuance and Order of Dismissal with Prejudice of this action on May 2, 2013. Under the terms of the settlement, MBIA Corp. dismissed the lawsuit against Flagstar Bank in exchange for \$110 million in cash and other consideration.

Transformation Litigation

ABN AMRO Bank N.V. et al. v. Eric Dinallo et al.; Index no. 601846/09 (N.Y. Sup. Ct., N.Y. County)

On March 4, 2013, the court issued a decision dismissing the Article 78 proceeding. On April 2, 2013, the remaining plaintiffs filed a Notice of Appeal to the Appellate Division, First Department. In May of 2013, following the Bank of America and Societe Generale settlements, all plaintiffs in this matter dismissed their claims. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the settlement agreements.

ABN AMRO Bank N.V. et al. v. MBIA Inc. et al.; Index No. 601475/2009 (N.Y. Sup. Ct., N.Y. County)

In May of 2013, following the Bank of America and Societe Generale settlements, all plaintiffs in this matter dismissed their claims. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the settlement agreements.

Barclays Bank PLC., et al. v. Wrynn et al.; Index No. 651811/2010 (N.Y. Sup. Ct., N.Y. County)

In May of 2013, following the Bank of America and Societe Generale settlements, all plaintiffs in this matter dismissed their claims. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the settlement agreements.

CQS ABS Master Fund Ltd., CQS Select ABS Master Fund Ltd., and CQS ABS Alpha Master Fund Ltd. v. MBIA Inc. et al.; Civil Action No. 12-cv-6840 (R.S.) (S.D.N.Y.)

On June 24, 2013, the court granted MBIA's motion to disqualify the plaintiffs' counsel, White & Case LLP.

Broadbill Partners LP, et al. v. MBIA Inc., et al.; Index No. 653865/2012 (N.Y. Sup. Ct., N.Y. County)

On June 6, 2013, the plaintiffs voluntarily dismissed the litigation without prejudice. A Stipulation of Discontinuance was filed on June 7, 2013.

Corporate Litigation

Bank of America v. MBIA Inc. and The Bank of New York Mellon, as Indenture Trustee; Index No. 70444/2012 (N.Y. Sup. Ct., Westchester County)

In May of 2013, the parties reached an agreement to resolve their respective claims in this action. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the comprehensive settlement agreement.

MBIA Inc. v. Bank of America Corp. and Blue Ridge Investments, L.L.C.; Index No. 51664/2013 (N.Y. Sup. Ct., Westchester County)

In May of 2013, the parties reached an agreement to resolve their respective claims in this action. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the comprehensive settlement agreement.

Mary Crescente v. Joseph Brown, et al.; Index No. 17595/2008 (N.Y. Sup. Ct., Westchester County)

On March 25, 2013, a Stipulation of Discontinuance was filed with the court resolving the litigation.

Ambac Bond Insurance Coverage Cases, Coordinated Proceeding Case No. JCCP 4555 (Super. Ct. of Cal., County of San Francisco)

On March 22, 2013, the court granted the Bond Insurer defendants' motion to strike pursuant to California's Anti-SLAPP statute dismissing the plaintiffs' claims under California's Cartwright Act.

City of Phoenix v. AMBAC et al., Case No. 2:10-cv-00555-TMB (D. Ariz.)

On June 4, 2013, the parties reached an agreement to resolve the City of Phoenix's claims in this matter.

Notes to Consolidated Financial Statements (Unaudited)

Note 14: Commitments and Contingencies (continued)

The Company is defending against the aforementioned actions in which it is a defendant and expects ultimately to prevail on the merits. There is no assurance, however, that the Company will prevail in these actions. Adverse rulings in these actions could have a material adverse effect on the Company's ability to implement its strategy and on its business, results of operations, cash flows and financial condition. At this stage of the litigation, there has not been a determination as to the amount, if any, of damages. Accordingly, the Company is not able to estimate any amount of loss or range of loss.

There are no other material lawsuits pending or, to the knowledge of the Company, threatened, to which the Company or any of its subsidiaries is a party.

Note 15: Subsequent Events

Refer to "Note 14: Commitments and Contingencies" for information about legal proceedings that occurred after June 30, 2013.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

FORWARD-LOOKING AND CAUTIONARY STATEMENTS

This quarterly report of MBIA Inc. ("MBIA", the "Company", "we", "us" or "our") includes statements that are not historical or current facts and are "forward-looking statements" made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The words "believe", "anticipate", "project", "plan", "expect", "estimate", "intend", "will likely result", "looking forward", or "will continue" and similar expressions identify forward-looking statements. These statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those presently anticipated or projected. MBIA cautions readers not to place undue reliance on any such forward-looking statements, which speak only to their respective dates. We undertake no obligation to publicly correct or update any forward-looking statement if the Company later becomes aware that such result is not likely to be achieved.

The following are some of the factors that could affect financial performance or could cause actual results to differ materially from estimates contained in or underlying the Company's forward-looking statements:

- the possibility that the Company will experience severe losses or liquidity needs due to increased deterioration in its insurance portfolios and in particular, due to the performance of insured credit default swaps that are backed by or reference commercial mortgage-backed securities ("CMBS") pools and commercial real estate ("CRE") collateralized debt obligations ("CDOs"), insured residential mortgage-backed securities ("RMBS") transactions, and insured asset-backed security ("ABS") CDOs;
- uncertainty regarding whether the Company will realize, or will be delayed in realizing, insurance loss recoveries expected in disputes with sellers/servicers of RMBS transactions and excess spread at the levels recorded in its consolidated financial statements;
- failure to implement our risk reduction and liquidity strategies because of an inability to draw on expected liquidity sources or obtain regulatory approvals;
- the possibility that loss reserve estimates are not adequate to cover potential claims;
- our ability to access capital and our exposure to significant fluctuations in liquidity and asset values within the global credit markets, in particular within our asset/liability products segment;
- our ability to fully implement our strategic plan, including our ability to achieve high stable ratings for National Public Finance Guarantee Corporation (together with its subsidiaries, "National") or any of our other insurance companies and our ability to commute certain of our insured exposures, including as a result of limited available liquidity;
- the possibility of deterioration in the economic environment and financial markets in the United States ("U.S.") or abroad, and adverse developments in European sovereign credit performance, real estate market performance, credit spreads, interest rates and foreign currency levels;
- the possibility that severe fiscal stress will result in credit losses or impairments on obligations of state and local governments that we insure;
- some municipalities are experiencing severe financial stress and, as a consequence, some issuers are considering filing for protection under Chapter 9 of the United States Bankruptcy Code. The outcome of a bankruptcy proceeding is unpredictable and could result in impairments of general obligation bonds;
- changes in the Company's credit ratings;
- competitive conditions for bond insurance, including potential entry into the public finance market of additional insurers of municipal bonds, and changes in the demand for financial guarantee insurance;
- the effects of governmental regulation, including insurance laws, securities laws, tax laws, legal precedents and accounting rules; and
- uncertainties that have not been identified at this time.

The above factors provide a summary of and are qualified in their entirety by the risk factors discussed under "Risk Factors" in Part II, Item 1A of this Form 10-Q. In addition, refer to "Note 1: Business Developments and Risks and Uncertainties" in the Notes to Consolidated Financial Statements for a discussion of certain risks and uncertainties related to our financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**EXECUTIVE OVERVIEW**

MBIA operates one of the largest financial guarantee insurance businesses in the industry and is a provider of asset management and advisory services. These activities are managed through three business segments: U.S. public finance insurance; structured finance and international insurance; and advisory services. Our U.S. public finance insurance business is primarily operated through National, our structured finance and international insurance business is primarily operated through MBIA Insurance Corporation and its subsidiaries ("MBIA Corp."), and our asset management and advisory services business is primarily operated through Cutwater Holdings, LLC and its subsidiaries ("Cutwater"). Our asset management and advisory services business also consists of Trifinium Advisors (UK) Limited ("Trifinium"). We also manage certain business activities through our corporate, asset/liability products, and conduit segments. Our corporate segment includes revenues and expenses that arise from general corporate activities. Funding programs managed through our asset/liability products and conduit segments are in wind-down.

Recent Developments*Bank of America Settlement Agreement*

In May of 2013, MBIA Inc., together with its subsidiaries MBIA Corp. and National, entered into a comprehensive settlement agreement and related agreements (the "BofA Settlement Agreement") with Bank of America Corporation and certain of its subsidiaries (collectively, "Bank of America"). Refer to "Note 1: Business Developments and Risks and Uncertainties" in the Notes to Consolidated Financial Statements for a discussion of the BofA Settlement Agreement. As a result of the BofA Settlement Agreement, the repayment of the remaining balance and accrued interest on MBIA Corp.'s secured loan from National (the "National Secured Loan") and recent credit ratings upgrades, certain barriers to re-enter the bond insurance market have been removed and the Company is currently evaluating strategies for such re-entry into the U.S. public finance market.

Societe Generale Settlement

In May of 2013, the Company entered into an agreement with Societe Generale pursuant to which MBIA commuted \$4.2 billion of gross insured exposure comprising ABS CDOs, structured CMBS pools and CRE CDOs. Refer to "Note 1: Business Developments and Risks and Uncertainties" in the Notes to Consolidated Financial Statements for a description of the settlement.

Residential Capital LLC Agreement

In May of 2013, the Company, the Consenting Claimants, Residential Capital LLC ("ResCap") and Ally Financial Inc. ("Ally"), agreed to the terms of a comprehensive plan agreement to support ResCap's Chapter 11 plan. The confirmation of ResCap's Chapter 11 plan would resolve MBIA Corp.'s claims against the Residential Funding Company, LLC, GMAC Mortgage LLC and ResCap estates, and Ally. In June of 2013, the bankruptcy court issued a Memorandum Opinion approving the Plan Support Agreement (the "Plan"). The Plan is now subject to voting by creditors as well as a confirmation hearing by the bankruptcy court. There can be no assurance that the Plan will be confirmed. Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" in the Notes to Consolidated Financial Statements for a description of the agreement.

Transformation Litigation

Subsequent to the BofA Settlement Agreement and the Societe Generale settlement, all litigation brought originally by the group of eighteen domestic and international financial institutions, relating to the establishment of National, has been resolved. Refer to "Note 14: Commitments and Contingencies" in the Notes to Consolidated Financial Statements for a description of this litigation.

Operating Cost Reductions

In order to better position the Company for future business opportunities, in July of 2013, we initiated cost reduction measures focused on our legal and consulting, staffing and head office occupancy costs. As a result, during July of 2013, we reduced our worldwide headcount as of June 30, 2013 by approximately 15%. Severance and other costs related to staff reductions will primarily be recorded in our results for the three months ending September 30, 2013.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**EXECUTIVE OVERVIEW (continued)*****National***

The Company intends to seek additional rating upgrades from the rating agencies and believes the current ratings of National do not fully represent the financial strength of National when compared with other similar companies in its industry, although the timing of any rating upgrades are uncertain. We expect National will gain market acceptance and become a competitive financial guarantor. National expects that the majority of its new business will be in the general obligation, tax-backed and other revenue bond sectors. The Company believes there is a significant amount of insurable bonds that have been issued unwrapped which the Company believes meet our underwriting criteria thus presenting attractive secondary market opportunities. In addition, the recent increase in interest rates and the continued issuance of new municipal debt will present attractive risk-adjusted business opportunities for National as it re-launches its business platform. National maintains underwriting criteria for most municipal risk types and expects opportunities for new business across the spectrum of municipal sectors. National's business plan does not limit it to a particular sector or sectors.

As of June 30, 2013, National was rated A with a stable outlook by Standard & Poor's Financial Services LLC ("S&P") and Baa1 with a positive outlook by Moody's Investors Service, Inc. ("Moody's"). We expect to achieve high stable ratings for National that would be necessary to support writing new business, but there is no assurance that we will be able to achieve such ratings. The absence of S&P and Moody's highest ratings has adversely impacted our ability to write new insurance business and the premiums we can charge.

While there are currently two bond insurers actively engaged in the market, one of which was recently established, we have observed other new competitors indicating an interest in entering the bond insurance market and continue to consider strategies for launch. We will continue to monitor the impact that new and existing market participants may have on our ability to compete in the U.S. public finance insurance market in the future.

Our U.S. public finance insured portfolio in National, continues to perform as expected. We did experience increased stress in this portfolio in the six months ended June 30, 2013 as a portion of the obligations that we insure were issued by some of the state and local governments that remain under extreme financial and budgetary stress. In addition, several of these local governments, including Jefferson County, Alabama, San Bernardino, California, Stockton, California, and Detroit, Michigan, have entered into Chapter 9 bankruptcy proceedings under the United States Bankruptcy Code. The financial stress on and bankruptcy proceeding actions taken by states and municipalities could lead to an increase in defaults on the payment of their obligations and losses or impairments on a greater number of our insured transactions.

MBIA Corp.

MBIA Corp.'s strategy for managing its CMBS pool and ABS CDO exposures has been commutations. MBIA Corp. believes that it continues to have sufficient capital and liquidity to meet all of its expected obligations. MBIA Corp.'s ability to commute insured transactions is limited by available liquidity. MBIA Corp.'s business and financial results have been significantly influenced by a number of factors including, but not limited to, the following. Refer to "Note 1: Business Developments and Risks and Uncertainties" in the Notes to Consolidated Financial Statements for a discussion of significant risks and uncertainties that could affect amounts reported in the Company's financial statements in future periods.

- Our expected liquidity and capital forecasts for MBIA Corp. for 2013, which include expected availability of draws under a \$500 million three-year secured revolving credit agreement with Blue Ridge Investments, L.L.C. ("Blue Ridge"), an affiliate of Bank of America (the "Blue Ridge Secured Loan") and expected recoveries from the ResCap agreement, reflect adequate resources to pay expected claims. However, there are risks to these forecasts, as the amount and timing of potential claims from our second-lien RMBS and remaining insured CMBS pools are potentially volatile, as are the projected collections of excess spread and the remaining put-back recoverables. Further, the remaining insured portfolio, aside from these exposures, could deteriorate and result in loss reserves and claim payments. While we believe MBIA Corp. will have adequate resources to pay expected claims, if MBIA Corp. experiences higher than expected claim payments or is unable to commute the remaining exposures that represent substantial risk to the Company, MBIA Corp. may ultimately have insufficient resources to continue to pay claims, which could cause the New York State Department of Financial Services ("NYDFS") to put MBIA Insurance Corporation into a rehabilitation or liquidation proceeding.
- For the six months ended June 30, 2013, we estimated an additional \$361 million of credit losses and loss adjustment expense ("LAE") related to our insured CMBS exposure. This additional amount reflects the deterioration within some transactions. We have recorded additional impairments on our insured CMBS portfolio every quarter since the beginning of 2010 as actual deterioration has been more than expected during that time period. It is possible that we will experience severe losses or near-term liquidity needs due to increased deterioration in our insured CMBS portfolio.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**EXECUTIVE OVERVIEW (continued)**

- During the six months ended June 30, 2013, MBIA Corp. commuted \$19.9 billion of gross insured exposure, primarily comprising structured CMBS pools, investment grade CDOs, ABS CDOs, first-lien subprime RMBS, high yield corporate CDOs, CRE CDOs, structured insurance securities and first-lien alternative A-paper RMBS. In consideration for the commutation of insured transactions, the Company has made and may in the future make payments to the counterparties, the amounts of which, if any, may be less than or greater than any statutory loss reserves established for the respective transactions. The Company enters into commutations in the ordinary course of its business and generally does not intend to make contemporaneous disclosures regarding any such transactions regardless of the amounts paid to effect such commutations in relation to the statutory loss reserves established for the respective transactions. The Company's ability to commute insured transactions is limited by available liquidity, including the availability of the Blue Ridge Secured Loan, other available financing structures and expected put-back recoveries, and commutations may be subject to regulatory approval by the NYSDFS and/or the United Kingdom's Prudential Regulation Authority. There can be no assurance that the Company will be able to fund further commutations by borrowing or otherwise or that it will be able to obtain required regulatory approvals.

Economic and Financial Market Trends

We believe the first half of 2013 continued to show modest improvements in the U.S. economy. Despite the automatic spending cuts from sequestration, the increase in gasoline prices and higher payroll taxes, consumer confidence remained relatively strong particularly in the housing and automobile sectors. Although there was a slight uptick in the unemployment rate in the second quarter of 2013, it still remains close to its lowest levels in over four years. The improving labor market should help to increase personal incomes. The strong consumer confidence and recent speculation that the Federal Reserve may rein in their quantitative easing programs have led to a rise in interest rates. Information concerning our interest rate sensitivity appears in Part I, Item 3, "Quantitative and Qualitative Disclosures about Market Risk". Europe remains in a recession with continued high unemployment rates. Prolonged debt and budget issues and related austerity programs suggest that it may be some time before Europe returns to financial stability. While we believe confidence in the U.S. economy should continue to grow throughout the rest of 2013, sustained job growth and resolution of fiscal policies in Washington are paramount to a complete recovery. MBIA's business outlook should be viewed against this backdrop since these are some of the key economic conditions which, together with realized losses on insured credit derivatives and the volatility of unrealized gains and losses on our insured credit derivatives, significantly impact our financial results.

Financial Highlights

Our financial results, prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"), have been extremely volatile since the fourth quarter of 2007 primarily as a result of unrealized gains and losses from fair valuing our insured credit derivatives. We do not believe that the volatility caused by these unrealized gains and losses on our insured derivatives reflects the underlying economics of our business, and we fully expect that our reported financial results will remain volatile and uncertain during 2013 as a result of actual and perceived future performance of our insured credit derivatives and the perception of MBIA's credit risk. Our economic performance may also be volatile depending on changes in our loss estimates based on changes in macroeconomic conditions in the U.S. and abroad and deviations in collateral performance from our expectations.

For the three months ended June 30, 2013, we recorded a consolidated net loss of \$178 million or \$0.92 per diluted share compared with consolidated net income of \$581 million, or \$2.98 per diluted share for the same period of 2012.

For the six months ended June 30, 2013, we recorded a consolidated net loss of \$14 million or \$0.07 per diluted share compared with consolidated net income of \$591 million or \$3.03 per diluted share, for the same period of 2012.

We also use adjusted pre-tax income (loss), a non-GAAP measure, to supplement our analysis of our periodic results. We consider adjusted pre-tax income (loss) a fundamental measure of periodic financial performance, which we believe is useful for an understanding of our results. Adjusted pre-tax income (loss) adjusts GAAP pre-tax income (loss) to remove the effects of consolidating insured variable interest entities ("VIEs") and gains and losses related to insured credit derivatives, which we believe will reverse over time, as well as to add in changes in the present value of insurance claims we expect to pay on insured credit derivatives based on our ongoing insurance loss monitoring. Adjusted pre-tax income (loss) is not a substitute for and should not be viewed in isolation of GAAP pre-tax income (loss), and our definition of adjusted pre-tax income (loss) may differ from that used by other companies. Refer to the following "Results of Operations" section for a reconciliation of adjusted pre-tax income (loss) to GAAP pre-tax income (loss).

For the three months ended June 30, 2013, consolidated adjusted pre-tax loss was \$160 million compared with an adjusted pre-tax loss of \$152 million for the same period of 2012.

For the six months ended June 30, 2013, consolidated adjusted pre-tax loss was \$180 million compared with an adjusted pre-tax loss of \$700 million for the same period of 2012.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

EXECUTIVE OVERVIEW (continued)

Our consolidated shareholders' equity was \$3.0 billion as of June 30, 2013 compared with \$3.2 billion as of December 31, 2012. The decrease was primarily the result of unrealized losses on available-for-sale securities that are recorded in "Accumulated other comprehensive loss" on the Company's consolidated balance sheets. Our consolidated book value per share as of June 30, 2013 was \$15.63 compared with \$16.22 as of December 31, 2012.

In addition to book value per share, we also analyze adjusted book value ("ABV") per share, a non-GAAP measure. We consider ABV a measure of fundamental value of the Company and the change in ABV an important measure of financial performance. ABV adjusts GAAP book value to remove the impact of certain items which the Company believes will reverse from GAAP book value over time through the GAAP statements of operations and GAAP statements of comprehensive income, as well as to add in the impact of certain items which the Company believes will be realized in GAAP book value in future periods. The Company has limited such adjustments to those items that it deems to be important to fundamental value and performance and which the likelihood and amount can be reasonably estimated. ABV assumes no new business activity. We have presented ABV to allow investors and analysts to evaluate the Company using the same measure that MBIA's management regularly uses to measure financial performance and value. ABV is not a substitute for and should not be viewed in isolation of GAAP book value, and our definition of ABV may differ from that used by other companies. Refer to the following "Results of Operations" section for a further discussion of ABV and a reconciliation of GAAP book value per share to ABV per share.

As of June 30, 2013, ABV per share was \$29.42, down from \$30.68 as of December 31, 2012.

A detailed discussion of our financial results is presented within the "Results of Operations" section included herein. Refer to the "Capital Resources—Insurance Statutory Capital" section for a discussion of National's and MBIA Corp.'s capital positions under statutory accounting principles ("U.S. STAT").

CRITICAL ACCOUNTING ESTIMATES

We prepare our financial statements in accordance with GAAP, which requires the use of estimates and assumptions. Management has discussed and reviewed the development, selection, and disclosure of critical accounting estimates with the Company's Audit Committee. Management believes that the most critical accounting estimates, since these estimates require significant judgment, are loss and LAE reserves, valuation of financial instruments, and deferred income taxes. Financial results could be materially different if other methodologies were used or if management modified its assumptions.

For a discussion of the Company's critical accounting estimates, see "Critical Accounting Estimates" in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012. In addition, refer to "Note 5: Loss and Loss Adjustment Expense Reserves" in the Notes to Consolidated Financial Statements for a current description of estimates used in our insurance loss reserving process.

RECENT ACCOUNTING PRONOUNCEMENTS

Refer to "Note 3: Recent Accounting Pronouncements" in the Notes to Consolidated Financial Statements for a discussion of accounting guidance recently adopted by the Company.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS

Summary of Consolidated Results

The following table presents a summary of our consolidated financial results for the three and six months ended June 30, 2013 and 2012:

In millions except for per share amounts	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Total revenues	\$ 112	\$1,039	\$ 331	\$1,422
Total expenses	376	244	380	606
Pre-tax income (loss)	(264)	795	(49)	816
Provision (benefit) for income taxes	(86)	214	(35)	225
Net income (loss)	<u>\$ (178)</u>	<u>\$ 581</u>	<u>\$ (14)</u>	<u>\$ 591</u>
Net income (loss) per common share:				
Basic	\$ (0.92)	\$ 2.99	\$ (0.07)	\$ 3.05
Diluted	\$ (0.92)	\$ 2.98	\$ (0.07)	\$ 3.03

For the three months ended June 30, 2013, we recorded a consolidated net loss of \$178 million, or \$0.92 per diluted common share, compared with consolidated net income of \$581 million, or \$2.98 per diluted common share, for the same period of 2012. Weighted average diluted common shares outstanding totaled 193 million and 195 million for the three months ended June 30, 2013 and 2012, respectively. Consolidated total revenues for the three months ended June 30, 2013 included \$182 million of net losses on insured derivatives compared with \$775 million of net gains for the same period of 2012. The net losses on insured derivatives in 2013 were principally the result of favorable changes in the market perception of MBIA Corp.'s credit risk, partially offset by commuting derivatives at prices below fair value. The net gains on insured derivatives in 2012 were principally due to the effects of MBIA's nonperformance risk on its derivative liabilities which resulted from a widening of its own credit spreads, a reduction in the Company's recovery rates and the result of commuting derivatives at prices below fair value. Consolidated total expenses for the three months ended June 30, 2013 included \$188 million of net insurance loss and LAE compared with \$62 million for the same period of 2012. The increase in net insurance loss and LAE in 2013 when compared to 2012 was principally related to increases in losses from general obligation issues and a decrease in recoveries of actual and expected payments related to insured CMBS transactions.

For the six months ended June 30, 2013, we recorded a consolidated net loss of \$14 million, or \$0.07 per diluted common share, compared with consolidated net income of \$591 million, or \$3.03 per diluted common share, for the same period of 2012. Weighted average diluted common shares outstanding totaled 194 million and 195 million for the six months ended June 30, 2013 and 2012, respectively. Consolidated total revenues for the six months ended June 30, 2013 included \$243 million of net losses on insured derivatives compared with \$1.1 billion of net gains for the same period of 2012. The net losses on insured derivatives in 2013 were principally the result of favorable changes in the market perception of MBIA Corp.'s credit risk, partially offset by commuting derivatives at prices below fair value and a decline in the weighted average life on transactions. The net gains on insured derivatives in 2012 were principally the result of commuting derivatives at prices below fair value, the effects of MBIA's nonperformance risk on its derivative liabilities which resulted from a widening of its own credit spreads and a reduction in the Company's recovery rate, and favorable movements in spreads and pricing on collateral within transactions. Consolidated total expenses for the six months ended June 30, 2013 included a benefit of \$6 million of net insurance loss and LAE compared with an expense of \$159 million for the same period of 2012. The decrease in net insurance loss and LAE in 2013 when compared to 2012 was principally related to increases in recoveries of actual and expected payments related to insured second-lien RMBS transactions. In addition, consolidated total expenses for the six months ended June 30, 2013 included an increase in operating expenses of approximately \$87 million related to settlement, consulting and legal expenses associated with the resolution of litigation matters with Bank of America, Societe Generale and Flagstar Bank.

Included in our consolidated net income for the three months ended June 30, 2013 was \$79 million of income before income taxes related to consolidated VIEs, after the elimination of intercompany revenues and expenses, compared with \$2 million of losses before income taxes for the same period of 2012. Included in our consolidated net income for the six months ended June 30, 2013 was \$112 million of income before income taxes related to consolidated VIEs, after the elimination of intercompany revenues and expenses, compared with \$33 million of losses before income taxes for the same period of 2012. The net effect of consolidated VIEs on our financial results will vary over time as VIEs are consolidated or deconsolidated by the Company, and as the values of consolidated VIE assets and liabilities change.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

European Sovereign Debt Exposure

Uncertainties regarding the European sovereign debt crisis have affected the global economy. Outside the U.S., financial guarantee insurance has been used by issuers of sovereign-related and sub-sovereign bonds, structured finance securities, utility debt and financing for public purpose projects, among others. MBIA does not insure any direct European sovereign debt. However, we do insure both structured finance and public finance obligations in select international markets. MBIA's indirect European sovereign insured debt exposure totaled \$7.7 billion as of June 30, 2013 and included obligations of sovereign-related and sub-sovereign issuers, such as regions, departments, and sovereign-owned entities that are supported by a sovereign state, region or department. Of the \$7.7 billion of insured gross par outstanding, \$785 million, \$601 million, and \$249 million related to Spain, Portugal, and Ireland, respectively. The remaining \$6.1 billion was related to the United Kingdom. We closely monitor our existing insured European portfolios on an ongoing basis. We consider country risk, including economic and political factors, the type and quality of local regulatory oversight, the strength of the legal framework in each country and the stability of the local institutional framework. We also monitor local accounting, regulatory and legal requirements, local financial market developments, the impact of exchange rates and local demand dynamics. The Company has an immaterial amount of direct and indirect European sovereign debt holdings included in its investment portfolios. A default by one or more sovereign issuers could have an adverse effect on our insured debt exposures.

Adjusted Pre-Tax Income

The following table presents our consolidated adjusted pre-tax income (loss) (a non-GAAP measure) and provides a reconciliation of adjusted pre-tax income (loss) to GAAP pre-tax income (loss) for the three and six months ended June 30, 2013 and 2012:

In millions	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Adjusted pre-tax income (loss)	\$ (160)	\$ (152)	\$ (180)	\$ (700)
Additions to adjusted pre-tax income (loss):				
Impact of consolidating certain VIEs	(20)	29	(2)	33
Mark-to-market gains (losses) on insured credit derivatives	1,350	1,203	1,277	1,506
Subtractions from adjusted pre-tax income (loss):				
Impairments on insured credit derivatives	1,434	285	1,144	23
Pre-tax income (loss)	<u>\$ (264)</u>	<u>\$ 795</u>	<u>\$ (49)</u>	<u>\$ 816</u>

For the three months ended June 30, 2013, our consolidated adjusted pre-tax loss increased slightly when compared with the same period of 2012 primarily as a result of decreases in premiums earned and revenues from consolidated VIEs as a result of deconsolidating VIEs during the three months ended June 30, 2013. This increase was partially offset by decreases in impairments on insured credit derivatives and insurance losses and LAE.

For the six months ended June 30, 2013, our consolidated adjusted pre-tax loss decreased compared with the same period of 2012 primarily as a result of a decrease in insurance losses and LAE, net gains from the sale of investments, the absence of net investment losses related to other-than-temporary impairments and a decrease in impairments on credit derivatives. These changes were partially offset by lower premiums earned and lower net investment income. In addition, our consolidated adjusted pre-tax loss for the six months ended June 30, 2013 included an increase in operating expenses of approximately \$87 million related to settlement, consulting and legal expenses associated with the resolution of litigation matters with Bank of America, Societe Generale and Flagstar Bank.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

Adjusted Book Value

As of June 30, 2013, ABV per share (a non-GAAP measure) was \$29.28, down from \$30.68 as of December 31, 2012. The decrease in ABV per share was primarily driven by insurance losses and credit impairments, a decline in future installment premiums related to insured credit derivatives that were commuted during the period and an increase in operating expenses.

The following table provides a reconciliation of consolidated book value per share to consolidated ABV per share:

In millions except share and per share amounts	As of June 30, 2013	As of December 31, 2012
Total shareholders' equity of MBIA Inc.	\$ 3,016	\$ 3,173
Common shares outstanding	192,967,369	195,671,509
Book value per share	\$ 15.63	\$ 16.22
Adjustments for items included in book value per share (after-tax):		
Cumulative net loss from consolidating certain VIEs ⁽¹⁾	0.83	0.59
Cumulative unrealized loss on insured credit derivatives	5.54	9.70
Net unrealized (gains) losses included in other comprehensive income	(0.03)	(0.47)
Adjustments for items not included in book value per share (after-tax):		
Net unearned premium revenue ⁽²⁾⁽³⁾	9.04	9.92
Present value of insured derivative installment revenue ⁽⁴⁾	0.27	0.60
Cumulative impairments on insured credit derivatives ⁽⁴⁾	(1.04)	(4.85)
Deferred acquisition costs	(0.96)	(1.03)
Total adjustments per share	13.65	14.46
Adjusted book value per share	\$ 29.28	\$ 30.68

(1) - Represents the impact on book value per share of consolidated VIEs that are not considered a business enterprise of the Company.

(2) - Consists of financial guarantee premiums and fees.

(3) - The discount rate on financial guarantee installment premiums was the risk-free rate as defined by the accounting principles for financial guarantee insurance contracts.

(4) - The discount rate on insured derivative installment revenue and impairments was 5% as of June 30, 2013 and December 31, 2012.

Our "Net unearned premium revenue" adjustment to book value per share consists of unearned premium revenue net of prepaid reinsurance premiums related to financial guarantee insurance contracts, the unamortized portion of installment premiums collected on insured derivative contracts, and the unamortized portion of insurance-related deferred fee revenue. Our "Present value of insured derivative installment revenue" adjustment to book value per share consists of the present value of premiums not yet collected from insured derivative contracts, which are not recorded on our balance sheet in accordance with accounting principles for financial guarantee insurance contracts but which are contractually due to the Company.

U.S. Public Finance Insurance

Our U.S. public finance insurance business is primarily conducted through National. The financial guarantees issued by National provide unconditional and irrevocable guarantees of the payment of the principal of, and interest or other amounts owing on, insured obligations when due or, in the event National has exercised, at its discretion, the right to accelerate insured obligations upon default or otherwise. National's guarantees insure municipal bonds, including tax-exempt and taxable indebtedness of U.S. political subdivisions, as well as utility districts, airports, healthcare institutions, higher educational facilities, student loan issuers, housing authorities and other similar agencies and obligations issued by private entities that finance projects that serve a substantial public purpose. Municipal bonds and privately issued bonds used for the financing of public purpose projects are generally supported by taxes, assessments, user fees or tariffs related to the use of these projects, lease payments or other similar types of revenue streams.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

The following table presents our U.S. public finance insurance segment results for the three and six months ended June 30, 2013 and 2012:

In millions	Three Months Ended June 30,		Percent Change	Six Months Ended June 30,		Percent Change
	2013	2012		2013	2012	
Net premiums earned	\$ 102	\$ 130	-22%	\$ 205	\$ 236	-13%
Net investment income	35	56	-38%	84	110	-24%
Fees and reimbursements	1	2	-50%	3	3	-%
Net gains (losses) on financial instruments at fair value and foreign exchange	(2)	11	-118%	30	21	43%
Total revenues	136	199	-32%	322	370	-13%
Losses and loss adjustment	66	(3)	n/m	70	11	n/m
Amortization of deferred acquisition costs	21	26	-19%	43	49	-12%
Operating	35	28	25%	53	108	-51%
Total expenses	122	51	139%	166	168	-1%
Pre-tax income	\$ 14	\$ 148	-91%	\$ 156	\$ 202	-23%

n/m - Percent change not meaningful.

For the three and six months ended June 30, 2013 and 2012, we did not write a meaningful amount of U.S. public finance insurance. The lack of insurance writings in our U.S. public finance segment reflects the insurance financial strength credit ratings assigned to National by major ratings agencies and the impact of litigation over the formation of National in 2009. Subsequent to the BofA Settlement Agreement and the Societe Generale settlement, all litigation brought originally by the group of eighteen domestic and international financial institutions relating to the establishment of National has been resolved. In addition, during the second quarter of 2013, the National Secured Loan was repaid in full and S&P upgraded National's rating twice. On May 8, 2013, S&P upgraded National's rating to BBB from BB with a credit watch positive outlook. On May 10, 2013, S&P upgraded National's rating to A from BBB with a stable outlook. On May 21, 2013, Moody's upgraded National's rating to Baa1 from Baa2 with a positive outlook. The timing of any future upgrades is uncertain and will depend on a variety of quantitative and qualitative factors used by the rating agencies in their evaluation. We do not expect to write a material amount of new business prior to an upgrade of our insurance financial strength ratings, but certain barriers to re-enter the bond insurance market have been removed and the Company is currently evaluating strategies for such re-entry into the U.S. public finance market.

NET PREMIUMS EARNED Net premiums earned on non-derivative financial guarantees represent gross premiums earned net of premiums ceded to reinsurers, and include scheduled premium earnings and premium earnings from refunded issues. For the three months ended June 30, 2013, U.S. public finance net premiums earned were \$102 million compared with \$130 million for the same period of 2012. The decrease in 2013 resulted from a decrease in refunded premiums earned of \$24 million and a decrease of \$4 million in scheduled premiums earned. For the six months ended June 30, 2013, U.S. public finance net premiums earned were \$205 million compared with \$236 million for the same period of 2012. The decrease in 2013 resulted from a decrease in refunded premiums earned of \$24 million and a decrease in scheduled premiums earned of \$7 million. Scheduled premium earnings declined due to the maturity of insured issues within our U.S. public finance portfolio with no material new insurance writings. Additionally, refunding activity over the past several years has accelerated premium earnings in prior periods and reduced the amount of premiums that would have been earned in the current period.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

NET INVESTMENT INCOME The decrease in net investment income for the three and six months ended June 30, 2013 compared with the same periods of 2012 was primarily due to a higher balance in lower yielding short-term assets generated from the repayment of the National Secured Loan in May of 2013, and a decrease in the notional value of our simultaneous repurchase and reverse repurchase agreements ("Asset Swap") with our asset/liability products segment. The interest income on the National Secured Loan for the three months ended June 30, 2013 totaled \$12 million compared with \$26 million for the same period of 2012. For the six months ended June 30, 2013 the interest income totaled \$41 million compared with \$46 million for the same period of 2012. In connection with the BofA Settlement Agreement, MBIA Corp. repaid the remaining outstanding balance and accrued interest on the National Secured Loan in May of 2013. Refer to the "Liquidity" section included herein for additional information about the National Secured Loan and the Asset Swap agreements.

Investment asset balances at amortized cost as of June 30, 2013 and December 31, 2012 are presented in the following table:

In millions	June 30, 2013		December 31, 2012	
	Investments at Amortized Cost	Pre-tax Yield ⁽¹⁾	Investments at Amortized Cost	Pre-tax Yield ⁽¹⁾

Other	15		16	
Total	\$ 4,647		\$ 4,667	

(1) - Estimated yield-to-maturity.

NET GAINS (LOSSES) ON FINANCIAL INSTRUMENTS AT FAIR VALUE AND FOREIGN EXCHANGE The decrease in net gains (losses) on financial instruments at fair value and foreign exchange for the three months ended June 30, 2013 compared with the same period of 2012 was primarily due to a decline in net realized gains from the sales of securities from the ongoing management of our U.S. public finance insurance investment portfolio and losses from fair valuing financial instruments. The increase in net gains (losses) on financial instruments at fair value and foreign exchange for the six months ended June 30, 2013 compared with the same period of 2012 was principally due to an increase in net realized gains from the sales of securities from the ongoing management of our U.S. public finance insurance investment portfolio.

LOSS AND LOSS ADJUSTMENT EXPENSES National's portfolio surveillance group is responsible for monitoring our U.S. public finance segment's insured obligations. The level and frequency of monitoring of any insured obligation depends on the type, size, rating and performance of the insured issue. Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" in the Notes to Consolidated Financial Statements for a description of the Company's loss reserving policy and additional information related to its loss reserves.

The following table presents information about our U.S. public finance insurance loss and LAE expenses for the three and six months ended June 30, 2013 and 2012:

In millions	Three Months Ended June 30,		Percent Change	Six Months Ended June 30,		Percent Change
	2013	2012		2013	2012	
Loss and LAE related to actual and expected payments	\$ 105	\$ 45	133%	\$ 110	\$ 67	64%

n/m - Percent change not meaningful.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

For the three and six months ended June 30, 2013 and 2012, losses and LAE primarily related to certain general obligation bonds. Certain local governments remain under extreme financial and budgetary stress and several have filed for protection under the United States Bankruptcy Code, or have entered into state statutory proceedings established to assist municipalities in managing through periods of severe fiscal stress. This could lead to an increase in defaults by such entities on the payment of their obligations and losses or impairments on a greater number of our insured transactions. We continue to monitor and analyze these situations very closely, however the overall extent and duration of these events is uncertain.

The following tables present information about our U.S. public finance insurance loss and LAE reserves and recoverables as of June 30, 2013 and December 31, 2012:

In millions	June 30, 2013	December 31, 2012	Percent Change
Gross loss and LAE reserves	\$ 363	\$ 267	36%
Expected recoveries on unpaid losses	(138)	(108)	28%
Loss and LAE reserves	\$ 225	\$ 159	42%
Insurance loss recoverable	\$ 178	\$ 256	-30%
Insurance loss recoverable-ceded ⁽¹⁾	\$ 5	\$ 7	-29%
Reinsurance recoverable on paid and unpaid losses	\$ 7	\$ 8	-13%

(1) - Reported within "Other liabilities" on our consolidated balance sheets.

Included in our U.S. public finance loss and LAE reserves are both reserves for insured obligations for which a payment default has occurred and National has already paid a claim and also for which a payment default has not yet occurred but a claim is expected in the future. As of June 30, 2013 and 2012, loss and LAE reserves comprised the following:

\$ in millions	Number of Issues ⁽¹⁾		Loss and LAE Reserve		Par Outstanding	
	June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012
Gross of reinsurance:						
Issues with defaults	7	9	\$ 137	\$ 141	\$ 728	\$ 749
Issues without defaults	11	9	88	18	244	113
Total gross of reinsurance	18	18	\$ 225	\$ 159	\$ 972	\$ 862

(1) - An "issue" represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments.

On July 9, 2013, the Company and the Pennsylvania Higher Educational Facilities Authority gave direction to the trustee under each of the indentures for the three Allegheny Health, Education and Research Foundation Bond series to exercise the right of optional redemption at par plus accrued interest. These bonds are expected to be redeemed during the third quarter of 2013, at which time the insurance policies will be returned to National and \$118 million of gross insured par will be eliminated.

POLICY ACQUISITION COSTS AND OPERATING EXPENSES U.S. public finance insurance segment expenses for the three and six months ended June 30, 2013 and 2012 are presented in the following table:

In millions	Three Months Ended June 30,		Percent Change	Six Months Ended June 30,		Percent Change
	2013	2012		2013	2012	
Gross expenses	\$ 35	\$ 28	25%	\$ 53	\$ 109	-51%
Amortization of deferred acquisition costs	\$ 21	\$ 26	-19%	\$ 43	\$ 49	-12%
Operating	35	28	25%	53	108	-51%
Total insurance operating expenses	\$ 56	\$ 54	4%	\$ 96	\$ 157	-39%

Gross expenses represent total insurance expenses before the deferral of any policy acquisition costs. Gross expenses increased for the three months ended June 30, 2013 compared with the same period of 2012 primarily due to an increase in consulting fees partially offset by decreases in legal and litigation related costs. Gross expenses decreased for the six months ended June 30, 2013 compared with the same period of 2012 as a result of decreases in legal and litigation related costs partially offset by an increase in consulting fees.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

Operating expenses increased for the three months ended June 30, 2013 compared with the same period of 2012 and decreased for the six months ended June 30, 2013 compared with the same period of 2012 as a result of changes in gross expenses. We did not defer a material amount of policy acquisition costs during 2013 or 2012.

INSURED PORTFOLIO EXPOSURE Financial guarantee insurance companies use a variety of approaches to assess the underlying credit risk profile of their insured portfolios. MBIA uses both an internally developed credit rating system as well as third-party rating sources in the analysis of credit quality measures of its insured portfolio. In evaluating credit risk, we obtain, when available, the underlying rating of the insured obligation before the benefit of its insurance policy from nationally recognized rating agencies, Moody's and S&P. Other companies within the financial guarantee industry may report credit quality information based upon internal ratings that would not be comparable to our presentation.

The following table presents the credit quality distribution of MBIA's U.S. public finance outstanding gross par insured as of June 30, 2013 and December 31, 2012. All ratings are as of the period presented and represent S&P ratings. If transactions are not rated by S&P, a Moody's equivalent rating is used. If transactions are not rated by either S&P or Moody's, an internal equivalent rating is used.

In millions Rating	Gross Par Outstanding			
	June 30, 2013		December 31, 2012	
	Amount	%	Amount	%
AAA	\$ 16,794	5.4%	\$ 18,518	5.5%
AA	148,921	48.2%	162,504	48.2%
A	113,999	36.9%	122,743	36.4%
BBB	26,402	8.6%	30,496	9.0%
Below investment grade	2,612	0.9%	2,853	0.9%
Total	<u>\$308,728</u>	<u>100.0%</u>	<u>\$337,114</u>	<u>100.0%</u>

The credit quality distribution of our U.S. public finance insurance exposure as of June 30, 2013 remained relatively consistent with December 31, 2012. Total U.S. public finance insurance gross par outstanding rated A or above, before giving effect to National's guarantee, was approximately 90% and gross par outstanding rated below investment grade, before giving effect to National's guarantee, was less than 1% as of June 30, 2013 and December 31, 2012.

Structured Finance and International Insurance

Our structured finance and international insurance business is principally conducted through MBIA Corp. The financial guarantees issued by MBIA Corp. generally provide unconditional and irrevocable guarantees of the payment of the principal of, and interest or other amounts owing on, insured obligations when due or, in the event MBIA Corp. has the right, at its discretion, to accelerate insured obligations upon default or otherwise, upon MBIA Corp.'s acceleration. Certain guaranteed investment contracts written by MBIA Inc. or its subsidiaries are insured by MBIA Corp. If MBIA Inc. or such subsidiaries were to have insufficient assets to pay amounts due upon maturity or termination, MBIA Corp. would make such payments under its insurance policies. MBIA Corp. also insured debt obligations of other affiliates, including MBIA Global Funding, LLC ("GFL") and Meridian Funding Company, LLC ("Meridian"), and provides reinsurance to its insurance subsidiaries. MBIA Corp. has also written insurance policies guaranteeing the obligations under credit default swap ("CDS") contracts of an affiliate, LaCrosse Financial Products, LLC, including termination payments that may become due upon certain events including the insolvency or payment default of the financial guarantor or the CDS issuer.

MBIA Corp.'s guarantees insure structured finance and asset-backed obligations, privately issued bonds used for the financing of public purpose projects that are primarily located outside of the U.S. which include toll roads, bridges, airports, public transportation facilities, utilities and other types of infrastructure projects serving a substantial public purpose, and obligations of sovereign-related and sub-sovereign issuers. Structured finance and ABS typically are securities repayable from expected cash flows generated by a specified pool of assets, such as residential and commercial mortgage loans, insurance policies, consumer loans, corporate loans and bonds, trade and export receivables, and leases and loans for equipment, aircraft and real property.

In certain cases, we may be required to consolidate entities established by issuers of insured obligations as part of securitizations when we insure the assets or liabilities of those entities and in connection with remediations under our insurance policies. These entities typically meet the definition of a VIE under accounting principles for the consolidation of VIEs. We do not believe there is any difference in the risks and profitability of financial guarantees provided to VIEs compared with other financial guarantees written by us.

Pre-tax income (loss)	\$ (256)	\$ 645	-140%	\$ (120)	\$ 746	-116%

n/m - Percent change not meaningful.

For the three and six months ended June 30, 2013 and 2012, we did not write a meaningful amount of structured finance and international insurance. As of June 30, 2013, MBIA Corp.'s total insured gross par outstanding was \$85.7 billion. Since December 31 2007, our total gross par outstanding has decreased approximately 74% from \$331.2 billion. The lack of insurance writings in our structured finance and international insurance segment reflects the insurance financial strength credit ratings assigned to MBIA Corp. by the major ratings agencies. The Company does not expect to write a material amount of new business prior to an upgrade of the insurance financial strength ratings of MBIA Corp. and market acceptance that such ratings will be stable in the future. In May of 2013, S&P upgraded MBIA Insurance Corporation's rating to B with a stable outlook from CCC with a negative outlook. Also in May of 2013, Moody's upgraded MBIA Insurance Corporation's rating to B3 with a positive outlook from Caa2 with a review for downgrade. The timing of any future upgrades is uncertain and will depend on a variety of quantitative and qualitative factors used by the rating agencies in their evaluation. Pre-tax income (loss) in each of the periods included in the preceding table was primarily driven by changes in the fair value of our insured credit derivatives, which reflects changes in the market perception of MBIA Corp.'s credit risk.

ADJUSTED PRE-TAX INCOME (LOSS) In addition to the above results, we also analyze the operating performance of our structured finance and international insurance segment using adjusted pre-tax income (loss), a non-GAAP measure. We believe adjusted pre-tax income (loss), as used by management, is useful for an understanding of the results of operations of our structured finance and international insurance segment. Adjusted pre-tax income (loss) is not a substitute for pre-tax income (loss) determined in accordance with GAAP, and our definition of adjusted pre-tax income (loss) may differ from that used by other companies.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

The following table presents the adjusted pre-tax income (loss) of our structured finance and international insurance segment, and a reconciliation of adjusted pre-tax income (loss) to GAAP pre-tax income (loss) for the three and six months ended June 30, 2013 and 2012:

In millions	Three Months Ended June 30,		Percent Change	Six Months Ended June 30,		Percent Change
	2013	2012		2013	2012	
Adjusted pre-tax income (loss)	\$ (93)	\$ (300)	-69%	\$ (190)	\$ (746)	-75%
Additions to adjusted pre-tax income (loss):						
Impact of consolidating certain VIEs	(79)	27	n/m	(63)	9	n/m
Mark-to-market gain (loss) on insured credit derivatives	1,350	1,203	12%	1,277	1,506	-15%
Subtractions from adjusted pre-tax income (loss):						
Impairments on insured credit derivatives	1,434	285	n/m	1,144	23	n/m
Pre-tax income (loss)	<u>\$ (256)</u>	<u>\$ 645</u>	<u>-140%</u>	<u>\$ (120)</u>	<u>\$ 746</u>	<u>-116%</u>

n/m - Percent change not meaningful.

Adjusted pre-tax loss for the three months ended June 30, 2013 decreased when compared with the same period of 2012 principally due to decreases in financial guarantee insurance losses and LAE, impairments on insured credit derivatives, and interest expense from the National Secured Loan, which was repaid in full in May of 2013.

Adjusted pre-tax loss for the six months ended June 30, 2013 decreased compared with the same period of 2012 principally due to a decrease in financial guarantee insurance losses, increase in gains on sales of investments, a decrease on impairments on insured credit derivatives, and the absence of net investment losses related to other-than-temporary impairments.

NET PREMIUMS EARNED Our structured finance and international insurance segment generates net premiums from insurance policies accounted for as financial guarantee contracts and insured derivative contracts, and certain of those premiums may be eliminated in our consolidated financial statements as a result of the Company consolidating VIEs. The following table provides net premiums earned by type of insurance contract for the three and six months ended June 30, 2013 and 2012:

In millions	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Net premiums earned:				
Financial guarantee contracts	\$ 35	\$ 59	\$ 71	\$ 105
Insured derivative contracts ⁽¹⁾	10	14	22	30
VIEs (eliminated in consolidation)	4	2	7	8
Total net premiums earned	<u>\$ 49</u>	<u>\$ 75</u>	<u>\$ 100</u>	<u>\$ 143</u>

(1) - Premiums related to insured derivatives are included in "Realized gains (losses) and other settlements on insured derivatives" on our consolidated statements of operations.

Net premiums earned on non-derivative financial guarantee contracts for the three and six months ended June 30, 2013 and 2012 are presented in the following table. Net premiums earned represent gross premiums earned net of premiums ceded to reinsurers, and include scheduled premium earnings and premium earnings from refunded issues.

In millions	<u>Three Months Ended June 30,</u>		<u>Percent</u>	<u>Six Months Ended June 30,</u>		<u>Percent</u>
	2013	2012	Change	2013	2012	Change
Net premiums earned:						
U.S.	\$ 13	\$ 18	-28%	\$ 26	\$ 36	-28%
Non-U.S.	22	41	-46%	45	69	-35%
Total net premiums earned	<u>\$ 35</u>	<u>\$ 59</u>	<u>-41%</u>	<u>\$ 71</u>	<u>\$ 105</u>	<u>-32%</u>

Structured finance and international net premiums earned decreased for the three and six months ended June 30, 2013 compared with the same periods of 2012 due to the maturity and early settlement of insured transactions with no material writings of new insurance policies.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

NET INVESTMENT INCOME The decrease in net investment income for the three and six months ended June 30, 2013 compared with the same periods of 2012 was primarily due to declining average asset balances in 2013 due to sales of investments to fund claim and commutation payments.

Investment asset balances at amortized cost as of June 30, 2013 and December 31, 2012 are presented in the following table:

In millions	June 30, 2013		December 31, 2012	
	Investments at Amortized Cost	Pre-tax Yield ⁽¹⁾	Investments at Amortized Cost	Pre-tax Yield ⁽¹⁾
Fixed-income securities:				
Taxable	\$ 312	2.06%	\$ 725	1.60%
Short-term	220	1.21%	160	1.38%
Total fixed-income	532	1.71%	885	1.56%
Other	2		1	
Total	<u>\$ 534</u>		<u>\$ 886</u>	

(1) - Estimated yield-to-maturity.

FEES AND REIMBURSEMENTS The decrease in fees and reimbursements for the three and six months ended June 30, 2013 compared with the same periods of 2012 was primarily due to a decrease in waiver and consent fees related to the ongoing management of our structured finance and international insurance business.

NET CHANGE IN FAIR VALUE OF INSURED DERIVATIVES The following table presents the net premiums and fees earned related to derivatives and the components of the net change in fair value of insured derivatives for the three and six months ended June 30, 2013 and 2012:

In millions	Three Months Ended June 30,		Percent Change	Six Months Ended June 30,		Percent Change
	2013	2012		2013	2012	
Net premiums and fees earned on insured derivatives	\$ 10	\$ 15	-33%	\$ 23	\$ 31	-26%
Realized gains (losses) on insured derivatives	(1,542)	(443)	n/m	(1,543)	(463)	n/m
Realized gains (losses) and other settlements on insured derivatives	(1,532)	(428)	n/m	(1,520)	(432)	n/m
Unrealized gains (losses) on insured derivatives	1,350	1,203	12%	1,277	1,506	-15%
Net change in fair value of insured derivatives	<u>\$ (182)</u>	<u>\$ 775</u>	<u>-123%</u>	<u>\$ (243)</u>	<u>\$1,074</u>	<u>-123%</u>

n/m - Percent change not meaningful.

The Company no longer insures new credit derivative contracts except in transactions related to the restructuring or reduction of existing derivative exposure. Premiums earned related to insured credit derivatives will decrease over time as a result of settlements prior to maturity and scheduled amortizations. For the three and six months ended June 30, 2013 and 2012, realized losses on insured derivatives resulted primarily from settlements and claim payments on CMBS and ABS transactions.

For the three months ended June 30, 2013, unrealized gains on insured derivatives were principally associated with the reversal of unrealized losses from commutations partially offset by the effects of MBIA's nonperformance risk on its derivative liabilities. For the three months ended June 30, 2012, unrealized gains on insured derivatives were principally associated with the reversal of unrealized losses from commutations and the effects of MBIA's nonperformance risk on its derivative liabilities.

For the six months ended June 30, 2013, unrealized gains on insured derivatives were principally associated with the reversal of unrealized losses from commutations and the changes in weighted average lives on transactions partially offset by the effects of MBIA's nonperformance risk on its derivative liabilities. For the six months ended June 30, 2012, unrealized gains on insured derivatives were principally associated with the reversal of unrealized losses from commutations, the effects of MBIA's nonperformance risk on its derivative liabilities and the result of favorable movements in spreads and pricing on collateral within transactions.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**RESULTS OF OPERATIONS (continued)**

As of June 30, 2013, MBIA Corp.'s five year CDS cost was 8.38% upfront plus 5% per annum compared with 35.06% upfront plus 5% per annum as of June 30, 2012. Our mark-to-market on insured credit derivatives uses the most appropriate of the one to ten year CDS cost for each transaction, and those costs ranged from -0.06% upfront plus 5% per annum to 13.50% upfront plus 5% per annum as of June 30, 2013. As of June 30, 2012, those costs ranged from 15.25% upfront plus 5% per annum to 37.38% upfront plus 5% per annum.

As of June 30, 2013, we had \$26.9 billion of gross par outstanding on insured credit derivatives compared with \$45.0 billion and \$47.5 billion as of March 31, 2013 and December 31, 2012, respectively. The decrease in gross par outstanding was primarily due to contractual terminations, amortizations and maturities. During the three months ended June 30, 2013, 28 insured issues, representing \$18.0 billion in gross par outstanding, either matured, contractually settled or were agreed to be contractually settled prior to maturity. During the six months ended June 30, 2013, 33 insured issues, representing \$20.3 billion in gross par outstanding, either matured, contractually settled or were agreed to be contractually settled prior to maturity.

Since our insured credit derivatives have similar terms, conditions, risks, and economic profiles as our financial guarantee insurance policies, we evaluate them for impairment periodically in the same way that we estimate loss and LAE for our financial guarantee policies. Credit impairments on insured derivatives represent actual payments plus the present values of our estimates of expected future claim payments, net of expected future recoveries. MBIA Insurance Corporation's expected future claim payments were discounted using a rate of 5.72%, the same rate used to calculate its statutory loss reserves as of June 30, 2013. We estimated that additional credit impairments on insured derivatives (excluding LAE) for the six months ended June 30, 2013 were \$395 million across 11 CDO insured issues. Beginning with the fourth quarter of 2007 through June 30, 2013, total credit impairments on insured derivatives were estimated at \$6.0 billion across 73 insured CDO issues, inclusive of 70 insured issues for which we made settlement and claim payments of \$5.7 billion, net of reinsurance and collections. Accordingly, we expect to realize additional net losses of \$283 million. Refer to the following "Loss and Loss Adjustment Expenses" section for additional information about credit impairments on insured derivatives.

Our estimate of credit impairments, a non-GAAP measure, may differ from the fair values recorded in our consolidated financial statements. The Company believes its disclosure of credit impairments on insured derivatives provides additional meaningful information about potential realized losses on these contracts. The fair value of an insured derivative contract will be influenced by a variety of market and transaction-specific factors that may be unrelated to potential future claim payments. In the absence of credit impairments or the termination of derivatives at losses, the cumulative unrealized losses recorded from fair valuing insured derivatives should reverse before or at the maturity of the contracts. Contracts also may be settled prior to maturity at amounts that may be more or less than their recorded fair values. Those settlements can result in realized gains or losses, and will result in the reversal of unrealized gains or losses. The Company is not required to post collateral to counterparties of these contracts. Refer to "Risk Factors" in Part II, Item 1A of this Quarterly Report on Form 10-Q for the quarterly period year ended June 30, 2013 for information on legislative changes that could require collateral posting by MBIA Corp. notwithstanding the contract terms.

NET GAINS (LOSSES) ON FINANCIAL INSTRUMENTS AT FAIR VALUE AND FOREIGN EXCHANGE The increase in net gains (losses) on financial instruments at fair value and foreign exchange for the three and six months ended June 30, 2013 when compared with the same periods of 2012 was primarily due to net realized gains from the sales of securities and a decline in losses from foreign exchange.

NET INVESTMENT LOSSES RELATED TO OTHER-THAN-TEMPORARY IMPAIRMENTS Net investment losses related to other-than-temporary impairments for the three and six months ended June 30, 2012 were primarily related to one impaired security that was written down to its fair value as it was our intent to sell the security before an expected recovery of fair value to its amortized cost. Refer to the "Liquidity" section included herein for additional information about impaired investments.

REVENUES OF CONSOLIDATED VIES For the three months ended June 30, 2013, total revenues of consolidated VIEs were \$86 million compared with losses of \$22 million for the same period of 2012. The increase in revenues of consolidated VIEs for the three months ended June 30, 2013 when compared to the same period of 2012 was primarily related to an increase in net gains as a result of an increase in second-lien RMBS put-back claims for ineligible mortgage loans. For the six months ended June 30, 2013, total revenues of consolidated VIEs were \$130 million compared with a loss of \$40 million for the same period of 2012. The increase in revenues of consolidated VIEs for the six months ended June 30, 2013 when compared to the same period of 2012 was primarily related to an increase in net gains as a result of an increase of second-lien RMBS put-back claims in ineligible mortgage loans.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

LOSS AND LOSS ADJUSTMENT EXPENSES MBIA's insured portfolio management group within its structured finance and international insurance business is responsible for monitoring structured finance and international insured obligations. The level and frequency of monitoring of any insured issue depends on the type, size, rating and performance of the insured issue. If we identify concerns with respect to the performance of an insured issue we may designate such insured issue as "Caution List-Low," "Caution List-Medium," "Caution List-High," or "Classified" depending on the likelihood of a loss. We establish case basis reserves in connection with insured issues designated as Classified credits.

The Company faces significant risks and uncertainties related to potential or actual losses from its CMBS and CRE CDO insured exposure, its second-lien RMBS insured exposure (due to the unpredictable performance of ineligible mortgage loans included in the transactions we insured) backed by home equity lines of credit ("HELOC") or closed-end second mortgages ("CES"), its first-lien RMBS insured exposure and its ABS CDO insured exposure. Continued significant adverse developments and higher than expected payments on these exposures and/or lower than expected recoveries on the RMBS exposures, could result in a decline in the Company's liquidity and statutory capital position.

The impact of insured exposures on the Company's liquidity position is best understood by assessing the ultimate amount of payments that the Company will be required to make with respect to these exposures. In this regard, the Company discloses the discounted expected future net cash flows to be made under all insurance contracts, irrespective of the legal form of the guarantee (i.e., financial guarantee insurance policy or insured derivative contract) or the GAAP accounting basis.

All amounts presented in the following aggregate losses and LAE tables are calculated in accordance with GAAP, with the exception of those related to insured credit derivative impairments. The amounts reported for insured credit derivative impairments are calculated in accordance with U.S. STAT because GAAP does not contain a comparable measurement basis for these contracts. All losses and recoverables reported in the following tables are measured using discounted probability-weighted cash flows. Losses and recoverables on VIEs that are eliminated in consolidation are included because the consolidation of these VIEs does not impact whether or not we will be required to make payments under our insurance contracts. As a result of the different accounting bases of amounts included in the following tables, the total provided in each table represents a non-GAAP measure.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

The following tables present the aggregate loss and LAE reserves and insurance loss recoverables as of June 30, 2013 and December 31, 2012, and the aggregate change in the discounted values of net payments expected to be made on all insurance contracts for the three and six months ended June 30, 2013 and 2012:

Aggregate Losses and LAE Roll Forward

Total reserves (recoverable) as of June 30, 2013	\$ (180)	\$ (1,073)	\$ 284	\$ (1)	\$ (970)

(1) - Included in "Losses and loss adjustment," "Loss and loss adjustment expense reserves" and "Insurance loss recoverable" on the Company's consolidated financial statements.

(2) - Represents loss expense, reserves and insurance loss recoverable eliminated upon the consolidation of insured VIEs.

(3) - Represents statutory losses and LAE and recoveries for insurance contracts accounted for as derivatives. Realized and unrealized gains and losses on these contracts under GAAP are recorded in "Net change in fair value of insured derivatives" on the Company's consolidated statements of operations and the fair value of these contracts are recorded in "Derivative Liabilities" on the Company's consolidated balance sheets.

(4) - Represents "Losses and loss adjustment," "Loss and loss adjustment expense reserves" and "Insurance loss recoverable" on the Company's consolidated financial statements and are ceded to third-party reinsurers under insurance contracts. As of June 30, 2013 and December 31, 2012, there was a \$1 million receivable related to insured credit derivative impairments and LAE reinsurance.

(5) - Represents totals after ceding to third-party reinsurers under insurance contracts.

RESULTS OF OPERATIONS (continued)

Aggregate Losses and LAE (change in discounted values of net payments)

In millions	For the Six Months Ended June 30, 2013					
	Second-lien RMBS ⁽¹⁾	First-lien RMBS	ABS CDO	CMBS	Other ⁽²⁾	Total
Change in actual and expected payments	\$ 134	\$ (2)	\$ (80)	\$ 381	\$ 92	\$ 525
Change in actual and expected salvage	(323)	(5)	2	(20)	45	(301)
Total aggregate losses and LAE	<u>\$ (189)</u>	<u>\$ (7)</u>	<u>\$ (78)</u>	<u>\$ 361</u>	<u>\$ 137</u>	<u>\$ 224</u>

(1) - Includes HELOC loans and CES.

(2) - Primarily represents a toll road transaction and high-yield corporate CDOs.

In millions	For the Six Months Ended June 30, 2012					
	Second-lien RMBS ⁽¹⁾	First-lien RMBS	ABS CDO	CMBS	Other	Total
Change in actual and expected payments	\$ 206	\$ 56	\$ (43)	\$ 470	\$ 7	\$ 696
Change in actual and expected salvage	(5)	2	13	(4)	6	12
Total aggregate losses and LAE	<u>\$ 201</u>	<u>\$ 58</u>	<u>\$ (30)</u>	<u>\$ 466</u>	<u>\$ 13</u>	<u>\$ 708</u>

(1) - Includes HELOC loans and CES.

The decrease in total aggregate losses and LAE for the three months ended June 30, 2013 compared with the same period of 2012 was primarily due to lower expected future payments on CMBS, first-lien RMBS and ABS CDOs exposures. The decrease in total aggregate losses and LAE related to second-lien RMBS for the three months ended June 30, 2013 compared with the same period of 2012 was primarily related to the Company's adjustment of its future expected recoveries due to the resolution of the Company's claims as agreed to in the ResCap Plan Support Agreement (the agreement is subject to confirmation by the bankruptcy court) and an increase in the amount of recoveries subject to contractual obligations by Credit Suisse to repurchase such ineligible mortgage loans. Furthermore, the Company also recorded an increase in excess spread (the difference between interest inflows on mortgage loan collateral and interest outflows on insured beneficial interests) within the RMBS securitizations. Partially offsetting these decreases were increases in other activity due to deterioration in a toll road transaction and a reversal of recoveries related to high yield corporate CDOs.

The decrease in total aggregate losses and LAE for the six months ended June 30, 2013 compared with the same period of 2012 was primarily related to recoveries resulting from ineligible mortgage loans included in insured second-lien RMBS exposures that are subject to contractual obligations by sellers/servicers to repurchase or replace such mortgage loans.

In addition to the information presented above, the following tables present aggregate losses and LAE for the three and six months ended June 30, 2013 and 2012 by insurance type:

Aggregate Losses and LAE by Insurance Type (change in discounted values of net payments)

In millions	For the Three Months Ended June 30, 2013					
	Second-lien RMBS ⁽¹⁾	First-lien RMBS	ABS CDO	CMBS	Other ⁽²⁾	Total

n/m - Percent change not meaningful.

Losses and LAE incurred in our structured finance and international insurance segment totaled \$122 million for the three months ended June 30, 2013. Included in the \$122 million were gross losses related to actual and expected future payments of \$102 million and a decrease in recoveries of actual and expected payments of \$21 million. The \$102 million of actual and expected payments includes \$100 million of other loss activity, primarily related to a toll road transaction, and \$32 million related to insured second-lien RMBS transactions. Partially offsetting these losses was a \$29 million decrease in actual and expected payments related to insured CMBS transactions. The \$21 million decrease in recoveries primarily related to a reversal of recoveries related to high yield corporate CDOs, partially offset by an increase in recoveries related to a toll road transaction.

Losses and LAE incurred in our structured finance and international insurance segment totaled \$65 million for the three months ended June 30, 2012. Included in the \$65 million were gross losses related to actual and expected future payments of \$86 million, of which \$82 million primarily related to insured first-lien RMBS transactions and CMBS transactions, and \$4 million related to insured second-lien RMBS transactions. Partially offsetting these losses were recoveries of actual and expected payments of \$21 million, including \$18 million related to insured second-lien RMBS transactions. The \$18 million of recoveries related to second-lien RMBS transactions included \$60 million of recoveries resulting from ineligible mortgage loans included in insured exposures that are subject to contractual obligations by sellers/servicers to repurchase or replace such mortgage loans, partially offset by a \$42 million reduction in excess spread within the securitizations.

Losses and LAE incurred in our structured finance and international insurance segment was a benefit of \$76 million for the six months ended June 30, 2013. Included in the \$76 million benefit were increases in recoveries of actual and expected payments of \$176 million, of which \$219 million related to insured second-lien RMBS transactions, partially offset by \$43 million of other activity. The \$219 million of recoveries related to insured second-lien RMBS transactions included \$308 million of recoveries resulting from ineligible mortgage loans included in insured exposures that are subject to contractual obligations by sellers/servicers to repurchase or replace such mortgage loans, partially offset by a \$97 million reduction in excess spread within the securitizations. The \$43 million of other activity was primarily the result of a reversal of recoveries related to high yield corporate CDOs, partially offset by an increase in recoveries related to a toll road transaction. These recoveries were partially offset by gross losses related to actual and expected future payments of \$101 million, of which \$99 million related to insured second-lien RMBS transactions.

Losses and LAE incurred in our structured finance and international insurance segment totaled \$148 million for the six months ended June 30, 2012. Included in the \$148 million were gross losses related to actual and expected future payments of \$211 million, including \$134 million related to insured second-lien RMBS transactions and \$77 million of other loss activity, primarily related to insured first-lien RMBS transactions. Partially offsetting these losses were recoveries of actual and expected payments of \$63 million, including \$67 million related to insured second-lien RMBS transactions. The \$67 million of recoveries related to second-lien RMBS transactions included \$110 million of recoveries resulting from ineligible mortgage loans included in insured exposures that are subject to contractual obligations by sellers/servicers to repurchase or replace such mortgage loans, partially offset by a \$43 million reduction in excess spread within the securitizations.

For the three and six months ended June 30, 2013, losses and LAE incurred included the elimination of \$100 million and \$95 million benefits, respectively, as a result of the consolidation of VIEs. The \$100 million elimination included recoveries of actual and expected payments of \$71 million and gross losses related to actual and expected future payments of \$29 million. The \$95 million elimination included gross recoveries of actual and expected payments of \$104 million, partially offset by gross losses related to actual and expected future payments of \$9 million.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

For the three and six months ended June 30, 2012, losses and LAE incurred included the elimination of \$81 million and \$117 million of expense, respectively, as a result of the consolidation of VIEs. The \$81 million elimination included a decrease in gross recoveries of actual and expected payments of \$43 million and gross losses related to actual and expected future payments of \$38 million. The \$117 million elimination included a decrease in gross recoveries of actual and expected future payments of \$61 million and gross losses related to actual and expected future payments of \$56 million.

The following table presents information about our insurance reserves and recoverable as of June 30, 2013 and December 31, 2012. The Company's insurance loss recoverable represents expected potential recoveries of paid claims based on probability-weighted net cash inflows discounted at applicable risk-free rates as of the measurement date. Our insurance loss recoverable includes expected recoveries related to put-backs of ineligible mortgage loans within second-lien RMBS transactions and other amounts due to MBIA under the terms and conditions of the respective transactional documents (inclusive of subrogation rights).

	June 30,	December 31,	
In millions	2013	2012	Percent Change
Gross loss and LAE reserves	\$ 808	\$ 918	-12%
Expected recoveries on unpaid losses	(259)	(224)	16%
Loss and LAE reserves	\$ 549	\$ 694	-21%
Insurance loss recoverable	\$ 729	\$ 3,392	-79%
Insurance loss recoverable—ceded ⁽¹⁾	\$ 5	\$ 6	-17%
Reinsurance recoverable on paid and unpaid losses	\$ 7	\$ 7	-%

(1) - Reported within "Other liabilities" on our consolidated balance sheets.

Included in the Company's loss and LAE reserves are both reserves for insured obligations for which a payment default has occurred and MBIA Corp. has already paid a claim and also for which a payment default has not yet occurred but a claim is expected in the future. The following table includes LAE reserves as of June 30, 2013 and December 31, 2012 for four issues that had no expected future claim payments or par outstanding, but for which the Company is obligated to pay LAE incurred in prior periods. As of June 30, 2013 and December 31, 2012, loss and LAE reserves comprised the following:

	Number of Issues ⁽¹⁾		Loss and LAE Reserve		Par Outstanding	
	June 30,	December 31,	June 30,	December 31,	June 30,	December 31,
\$ in millions	2013	2012	2013	2012	2013	2012
Gross of reinsurance:						
Issues with defaults	104	97	\$ 373	\$ 448	\$6,655	\$ 7,194
Issues without defaults	21	25	176	246	1,026	1,402
Total gross of reinsurance	125	122	\$ 549	\$ 694	\$7,681	\$ 8,596

(1) - An "issue" represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments.

MBIA reports expected potential recoveries of certain paid claims within "Insurance loss recoverable" and the corresponding estimated recovery amounts due to reinsurers within "Other liabilities" on the Company's consolidated balance sheets. As of June 30, 2013 and December 31, 2012, our insurance loss recoverable in our structured finance and international insurance segment was \$729 million and \$3.4 billion, respectively. The decrease in our insurance loss recoverable primarily resulted from the collections of previously established recoveries related to the BofA Settlement Agreement related to insured second-lien RMBS securitizations. As of June 30, 2013 and December 31, 2012, our insurance loss recoverable also included estimated recoveries of approximately \$681 million and \$780 million, respectively, primarily from excess spread within insured second-lien RMBS securitizations. Insurance loss recoverables due to reinsurers totaled \$5 million and \$6 million as of June 30, 2013 and December 31, 2012, respectively. Insurance loss recoverables are only paid to reinsurers upon receipt of such amounts by MBIA.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

Residential Mortgage Exposure

MBIA Corp. insures mortgage-backed securities ("MBS") backed by residential mortgage loans, including second-lien residential mortgage securitizations (revolving HELOC loans and CES). For the three months ended June 30, 2013, we recorded losses and LAE of \$33 million related to insured second-lien RMBS transactions. The \$33 million consolidated losses and LAE was due to gross losses and LAE related to actual and expected payments of \$32 million and a decrease in recoveries of actual and expected payments of \$1 million. For the six months ended June 30, 2013, we recorded a \$120 million benefit related to insured second-lien RMBS transactions. The \$120 million benefit was due to gross recoveries of actual and expected payments of \$219 million, partially offset by gross losses and LAE related to actual and expected payments of \$99 million.

MBIA Corp. also insures MBS backed by first-lien subprime mortgage loans directly through RMBS securitizations. There has been considerable stress and continued deterioration in the subprime mortgage market since 2008 reflected by increased delinquencies and losses, particularly related to subprime mortgage loans originated during 2005, 2006 and 2007. As of June 30, 2013 and December 31, 2012, the Company had \$1.2 billion and \$2.2 billion, respectively, of gross par outstanding from direct exposure to subprime mortgage loans. While subprime transactions directly guaranteed by MBIA Corp. include collateral comprising mortgage loans that originated during 2005, 2006, and 2007, we currently do not expect ultimate material losses on these transactions given the amount of subordination below MBIA Corp.'s insured portion of such transactions available to absorb losses from collateral defaults. As of June 30, 2013, the Company had \$59 million of gross par outstanding in two insured direct subprime mortgage transactions with 2005 or 2006 subprime mortgage collateral appearing on the Company's Classified or Caution Lists.

The following table presents the gross par outstanding by vintage year of MBIA Corp.'s total direct RMBS insured exposure as of June 30, 2013. Amounts include the gross par outstanding related to transactions that the Company consolidates under accounting guidance for VIEs.

In millions	Gross Par Outstanding					
	Prime First-lien	Alternative A-paper First-lien	Subprime First-lien	HELOC Second-lien	CES Second-lien	Total
2005—2007	\$ 15	\$ 1,783	\$ 365	\$2,357	\$2,819	\$7,339
2004 and prior	183	861	789	561	56	2,450
Total gross par	\$ 198	\$ 2,644⁽¹⁾	\$ 1,154⁽²⁾	\$2,918	\$2,875	\$9,789

(1) - Includes international exposure of \$722 million.

(2) - Includes international exposure of \$9 million.

During the six months ended June 30, 2013, we collected approximately \$2.7 billion, net of reinsurance and \$208 million in payments, on insured second-lien RMBS transactions, or \$2.6 billion after eliminating \$123 million of collections and \$56 million of payments made on behalf of consolidated VIEs. Through June 30, 2013, we paid a cumulative total of \$3.8 billion, net of reinsurance and collections, or \$1.6 billion after eliminating \$2.2 billion of net payments on insured second-lien RMBS transactions that are currently consolidated as VIEs. As of June 30, 2013, we had loss and LAE reserves related to our remaining insured second-lien RMBS exposure of \$110 million before eliminating \$39 million of loss and LAE reserves related to our consolidated VIEs. The loss and LAE reserves represent the present value of the difference between cash payments we expect to make on the insured transactions and the cash receipts we expect from the performing mortgage loans in the securitizations. As payments are made, a portion of those expected future receipts is recorded within "Insurance loss recoverable" in our consolidated balance sheets. The payments that we make virtually all go to reduce the principal balances of the securitizations.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

The following table provides information about insured second-lien RMBS transactions included in MBIA Corp.'s insured portfolio "Classified List" as of June 30, 2013. The consolidated VIEs total payments are not reflected as insurance losses in our consolidated financial statements.

Second-Lien RMBS Transactions with Claim Payments

	Number of	Original Par		Claim Payments and LAE Net of Collections Since
\$ in millions	Issues	Insured	Gross Par Outstanding	Inception
Non-Consolidated VIEs:				
HELOC	14	\$ 16,253	\$ 1,902	\$ 763
CES	9	8,198	1,846	954
Total	23	\$ 24,451	\$ 3,748	\$ 1,717
Total net of reinsurance				\$ 1,607
Consolidated VIEs:				
HELOC	6	\$ 3,657	\$ 883	\$ 695
CES	6	4,683	1,006	1,578
Total	12	\$ 8,340	\$ 1,889	\$ 2,273
Total net of reinsurance				\$ 2,202

The preceding table excludes gross and net claim and LAE payments of \$35 million for one issue that has been removed from our "Classified List" and has no outstanding exposure.

Non-Consolidated VIEs

The gross par outstanding on insured second-lien RMBS transactions decreased from \$4.0 billion as of December 31, 2012 to \$3.7 billion as of June 30, 2013. As of June 30, 2013, we expect to pay an additional \$195 million (on a present value basis) on these transactions and expect to receive a total of \$806 million (on a present value basis) in reimbursement of past and future expected claims through excess spread in these transactions. Of our expected reimbursement from excess spread, \$682 million is included in "Insurance loss recoverable" and \$124 million is included in "Loss and loss adjustment expense reserves." In addition, we expect to receive \$18 million (on a present value basis) with respect to amounts contemplated in the ResCap term sheet and supplemental term sheet executed on May 23, 2013, which is included in "Insurance loss recoverable".

Consolidated VIEs

The gross par outstanding on insured second-lien RMBS transactions decreased from \$2.2 billion as of December 31, 2012 to \$1.9 billion as of June 30, 2013. The total payments before reinsurance, includes \$874 million that was eliminated subsequent to consolidation. As of June 30, 2013, we expect to pay an additional \$74 million (on a present value basis) on these transactions and expect to receive a total of \$242 million (on a present value basis) in reimbursement of past and future expected claims through excess spread in these transactions. In addition, we expect to receive \$1.1 billion (on a present value basis) as of June 30, 2013 with respect to amounts contemplated in the ResCap term sheet and supplemental term sheet executed on May 23, 2013 as well as Credit Suisse's obligation to repurchase ineligible mortgage loans, which is reported in "Loan repurchase commitments" under "Assets of consolidated variable interest entities" on the consolidated balance sheets.

Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" in the Notes to Consolidated Financial Statements for additional information about assumptions used to estimate recoveries on our RMBS exposure.

Other

We may seek to purchase, from time to time, directly or indirectly, obligations guaranteed by MBIA or seek to commute policies. The amount of insurance exposure reduced, if any, and the nature of any such actions will depend on market conditions, pricing levels from time to time, and other considerations. In some cases, these activities may result in a reduction of expected loss reserves, but in all cases they are intended to limit our ultimate losses and reduce the future volatility in loss development on the related policies. Our ability to purchase guaranteed obligations and to commute policies will depend on management's assessment of available liquidity.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

POLICY ACQUISITION COSTS AND OPERATING EXPENSES Structured finance and international insurance segment expenses for the three and six months ended June 30, 2013 and 2012 are presented in the following table:

	Three Months Ended June 30,		Percent	Six Months Ended June 30,		Percent
In millions	2013	2012	Change	2013	2012	Change
Gross expenses	\$ 37	\$ 30	23%	\$ 66	\$ 88	-25%
Amortization of deferred acquisition costs	\$ 24	\$ 31	-23%	\$ 57	\$ 57	-%
Operating	35	28	25%	61	85	-28%
Total insurance operating expenses	\$ 59	\$ 59	-%	\$ 118	\$ 142	-17%

Gross expenses represent total insurance expenses before the deferral of any policy acquisition costs. Gross expenses increased for the three months ended June 30, 2013 compared with the same period of 2012 due to increases in consulting fees and legal and litigation related costs. The decrease in the amortization of deferred acquisition costs for the three months ended June 30, 2013 compared with the same period of 2012 principally reflects the acceleration of deferred costs into earnings in prior periods as policies were terminated. Gross expenses decreased for the six months ended June 30, 2013 compared with the same period of 2012 as a result of decreases in legal and litigation related costs and compensation expenses partially offset by an increase in consulting fees.

Operating expenses increased for the three months ended June 30, 2013 compared with the same period of 2012 due to an increase in gross expenses. Operating expenses decreased for the six months ended June 30, 2013 compared with the same period of 2012 as a result of a decrease in gross expenses. We did not defer a material amount of policy acquisition costs during 2013 or 2012. Policy acquisition costs in these periods were primarily related to ceding commission income and premium taxes on installment policies written in prior periods.

INTEREST EXPENSE Interest expense incurred by our structured finance and international insurance segment primarily consisted of interest related to MBIA Corp.'s surplus notes and the National Secured Loan. Interest expense decreased for the three and six months ended June 30, 2013 when compared to the same periods of 2012 primarily due to a decrease in the interest rate on MBIA Corp.'s surplus notes and the repayment of the National Secured Loan in May of 2013.

INSURED PORTFOLIO EXPOSURE The credit quality of our structured finance and international insured portfolio is assessed in the same manner as our U.S. public finance insured portfolio. As of June 30, 2013 and December 31, 2012, 23% and 26%, respectively, of our structured finance and international insured portfolio, was rated below investment grade, before giving effect to MBIA's guarantees, based on MBIA's internal ratings, which are more current than the underlying ratings provided by S&P and Moody's for this subset of our insured portfolio.

Structured Finance and International Insurance Selected Portfolio Exposures

The following is a summary of selected significant exposures within the insured portfolio of our structured finance and international insurance segment. The Company has large exposures to many of these sectors. Moreover, many of these sectors are and have been considered volatile over the past several years. As described below, considerable incurred losses and future expected payments are attributable to many of these sectors.

Collateralized Debt Obligations and Related Instruments

As part of our structured finance and international insurance activities, MBIA Corp. typically provided guarantees on senior and, in a limited number of cases, mezzanine tranches of CDOs, as well as protection on structured CMBS pools and corporate securities, and CDS referencing such securities. The following discussion, including reported amounts and percentages, includes insured CDO transactions consolidated by the Company as VIEs.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

As of June 30, 2013, MBIA Corp.'s \$31.3 billion CDO portfolio represented 37% of its total insured gross par outstanding of \$85.7 billion. As of December 31, 2012, MBIA Corp.'s \$51.8 billion CDO portfolio represented 46% of its total insured gross par outstanding of \$112.4 billion. The distribution of the Company's insured CDO and related instruments portfolio by collateral type is presented in the following table:

In billions	Gross Par Outstanding as of		Percent
Collateral Type	June 30, 2013	December 31, 2012	Change
Multi-sector CDOs	\$ 1.6	\$ 4.3	-63%
Investment grade CDOs and structured corporate credit pools	16.3	24.1	-32%
High yield corporate CDOs	4.8	5.7	-16%
Commercial real estate pools and CRE CDOs	8.6	17.7	-51%
Total	\$ 31.3	\$ 51.8	-40%

Multi-Sector CDOs

Multi-sector CDOs are transactions that include a variety of structured finance asset classes in their collateral pools. The remaining multi-sector CDO portfolio is comprised of 13 transactions insured in the primary market between 2002 and 2006 and 24 transactions insured in the secondary market between 2000 and 2004. The underlying collateral in MBIA Corp.'s insured multi-sector CDO transactions is comprised of RMBS, CDOs of ABS (multi-sector CDOs), corporate CDOs, collateralized loan obligations, ABS (e.g., securitizations of auto receivables, credit cards, etc.), CRE CDOs, CMBS and corporate credits. Our remaining insured multi-sector CDO transactions primarily rely on underlying collateral originally rated triple-B.

Generally, we are subject to a claim on a multi-sector CDO when the insured tranche incurs an interest or principal shortfall. Such shortfalls result once the underlying collateral supporting the transaction no longer generates enough cash flow to support the insured notes. MBIA Corp.'s payment obligation after a default insures current interest and ultimate principal. Original subordination levels for transactions insured in the primary market ranged from 10% to 31%. Current subordinations range from 0% to 82%.

The significant erosion of subordination in our multi-sector CDO transactions principally resulted from the underperformance of RMBS and CDO collateral. As discussed above, the erosion of subordination in these transactions increases the likelihood that MBIA Corp. will pay claims. As of June 30, 2013, there were credit impairment estimates for 22 classified multi-sector CDO transactions for which MBIA Corp. expects to incur actual net claims in the future (15 of which are insured in the secondary market), representing 59% of all MBIA Corp.-insured multi-sector CDO transactions (including both CDS and non-CDS contracts). Of the remaining transactions, 14% are on our "Caution List" and 27% continue to perform at or close to our original expectations. In the event of further performance deterioration of the collateral referenced or held in our multi-sector CDO transactions, the amount of credit impairments could increase materially.

Total gross par exposure in our multi-sector CDO portfolio was \$37.3 billion as of December 31, 2007. Since the end of 2007 through June 30, 2013, our multi-sector CDO gross par exposure has decreased by approximately \$35.7 billion primarily from negotiated commutations of \$23.6 billion and contractual terminations without any payment from MBIA Corp. of \$5.4 billion. The remaining reduction in gross par was due to the amortization and maturity of transactions. As of June 30, 2013, our gross par exposure to multi-sector CDOs of \$1.6 billion represented 5% of MBIA Corp.'s CDO exposure and 2% of MBIA Corp.'s total gross par insured.

Investment Grade Corporate CDOs

Our 12 investment grade corporate CDO exposures insured in 2006 and 2007 reference pools of predominantly investment grade corporate credits. Three of these pools include limited exposure to other asset classes, including structured finance securities (such as RMBS and CDOs). Our investment grade corporate CDO policies guarantee coverage of losses on collateral assets once a deductible has been eroded, and are highly customized structures. Our gross par exposure to investment grade corporate CDOs of \$16.3 billion represents 52% of MBIA Corp.'s CDO exposure and 19% of MBIA Corp.'s total gross par insured. The Company's insured investment grade corporate CDOs have experienced erosion of subordination due to the default of underlying referenced corporate and structured finance securities, but we currently do not expect losses on MBIA Corp.'s insured tranches. As of June 30, 2013, the collateral amount in the portfolio exceeds the gross par outstanding as a result of credit enhancement. Original subordination levels for nine investment grade corporate CDO policies ranged from 15% to 30%. Current subordination levels are between 11% and 28%.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**RESULTS OF OPERATIONS (continued)**

Our gross par of insured investment grade corporate CDOs includes \$6.9 billion across three transactions that were structured to include buckets (typically 30% to 35% of the overall CDO) of references to specific tranches of other investment grade corporate CDOs (monotranches). In such transactions, MBIA Corp.'s insured investment grade corporate CDOs include, among direct corporate or structured credit reference risks, and monotranche or single layer credit risk referencing a diverse pool of corporate assets or obligors with a specific attachment and a specific detachment point. The referenced monotranches in such CDOs were typically rated double-A and sized to approximately 3% of the overall reference risk pool. The inner referenced monotranches are not subject to acceleration and do not give control rights to a senior investor. The inner referenced monotranches have also experienced erosion of subordination due to defaults in their referenced corporate assets. These transactions had original subordination of 25% and current subordination ranges from 16% to 19%.

High Yield Corporate CDOs

Our high yield corporate CDO portfolio, totaling \$4.8 billion of gross par exposure, largely comprises middle-market/special- opportunity corporate loan transactions. Our gross par exposure to high yield corporate CDOs represents 15% of MBIA Corp.'s CDO exposure and 6% of MBIA Corp.'s total gross par insured as of June 30, 2013. Original subordination for our high yield corporate portfolio ranged from 22% to 33%. Current subordination is between 10% and 69%. Declines in subordination levels result from defaults in underlying collateral, as well as sales of underlying collateral at discounted prices. Subordination within CDOs may decline further over time as a result of additional collateral deterioration. There are no losses on MBIA Corp.'s insured high yield corporate CDO tranches at this time. However, there can be no assurance that the Company will not incur significant losses as a result of further deterioration in subordination.

Commercial Real Estate Pools and CRE CDOs

As of June 30, 2013, we had \$8.6 billion of gross par exposure to the CRE sector through insured structured transactions primarily comprising CRE collateral. In addition, MBIA Corp. insures approximately \$2.6 billion in CRE loan pools, primarily comprising European assets. These CRE loans are not included in the following "Structured CMBS Pools" and "CRE CDOs" sections. During the six months ended June 30, 2013, the Company commuted \$8.9 billion of gross par exposure related to CRE exposure. Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" in the Notes to Consolidated Financial Statements for a discussion of credit impairments on our CRE pools and CDO exposure, including the methodology used to calculate these impairments.

Structured CMBS Pools

As of June 30, 2013, our gross par exposure to structured CMBS pools totaled \$7.3 billion and represented approximately 9% of MBIA Corp.'s total gross par insured. Since the end of 2007 through June 30, 2013, our structured CMBS pools gross par exposure has decreased by approximately \$33.4 billion, primarily from negotiated commutations and early settlements. Our structured CMBS pool insured transactions are pools of CMBS bonds, Real Estate Investment Trust ("REIT") debt and other CRE CDOs structured with first loss deductibles such that MBIA Corp.'s obligation attached at a minimum of a triple-A level when the policies were issued. The deductible sizing was a function of the underlying collateral ratings and certain structural attributes. MBIA Corp.'s guarantees for most structured CMBS pool transactions cover losses on collateral assets once the deductibles have been eroded. These deductibles provide credit enhancement and subordination to MBIA's insured position.

The collateral in the pools are generally CMBS bonds or CDSs referencing CMBS bonds (collectively, "CMBS bonds"). MBIA Corp.'s guarantee generally is in the form of a CDS referencing the static pooled transactions. MBIA Corp. would have a payment obligation if the volume of CMBS bond defaults exceeds the deductible level in the transaction. Each pool comprising CMBS bonds is ultimately backed by the commercial mortgage loans securitized within each CMBS trust. The same CMBS bonds may be referenced in multiple pools. The Company's structured CMBS pools are static, meaning that the collateral pool of securitizations cannot be and has not been changed since the origination of the policy. Most transactions comprised similarly rated underlying tranches at inception. The deductible for each transaction varies according to the ratings of the underlying collateral. For example, a transaction which comprised originally BBB rated underlying CMBS bonds would typically include a 30-35% deductible to MBIA Corp.'s position whereas a transaction comprising all originally AAA rated underlying CMBS bonds would typically have required a 5-10% deductible.

Original deductibles for our structured CMBS pools ranged from 5.0% to 82.3%. As of June 30, 2013, the deductibles for these transactions ranged from 0% to 93.2%. Deductibles are eroded as bonds experience realized losses which are ultimately due to liquidations of underlying loan collateral. During the second quarter of 2013, we paid claims on a CMBS pool transaction which experienced deterioration such that all of the remaining deductible was eliminated. We expect to experience additional claims on this transaction.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**RESULTS OF OPERATIONS (continued)**

As of June 30, 2013, we have significantly reduced our exposure to pools comprised of 2006 and 2007 vintage CMBS collateral originally rated BBB. As of June 30, 2013, we had exposure to four static CMBS pools, having \$837 million of gross par outstanding, that were originally insured in 2006 and 2007, and in which substantially all of the underlying collateral comprised CMBS tranches originally rated BBB and lower. Additionally, we insure two static CMBS pools, totaling \$3.0 billion of gross par outstanding as of June 30, 2013, that were originally insured in 2007, and are comprised of CMBS collateral which was originally rated A. Although deductible erosion at the policy level has been minimal to date, we do expect additional erosion. Ultimate loss rates remain uncertain. If the economy does not continue to improve, it is possible that we will experience severe losses, particularly if the underlying loans are unable to pay off at their expected maturity dates. The remaining insured CMBS portfolio primarily consists of transactions backed by collateral originally rated AAA and originated in 2004, 2005, 2006 or 2007. During the first six months of 2013, a material claim was presented on a CMBS pool transaction by a counterparty, and we expect further claims on this exposure. Although we believe MBIA Corp. will have adequate resources to pay expected claims, there can be no assurance that this will be the case.

Delinquencies increased markedly in the CRE market during and immediately after the economic crisis, however they have stabilized over the last twelve months. As of June 30, 2013, 30-day and over delinquencies decreased in the fixed-rate conduit CMBS market to 8.2% and decreased in MBIA Corp.'s insured static pooled CMBS portfolio to 11.1%. The higher delinquency rate in MBIA Corp.'s portfolio was primarily due to a concentration in the 2006 and early 2007 vintages. Additionally, the market includes newer vintage transactions from 2010 to 2012, which have virtually no material delinquencies. Although we have also seen stabilization in the delinquency rate over the past several months, some of the moderation is attributable to the loan modifications and extensions granted by the special servicers for these CMBS loans and increased liquidations. The special servicers are responsible for managing loans that have defaulted and for conducting the remediation and foreclosure process with the objective of maximizing proceeds for all bondholders by avoiding or minimizing loan level losses.

Actual losses will be a function of the proportion of loans in the pools that are foreclosed and liquidated and the loss severities associated with those liquidations. If the deductibles in the Company's insured transactions and underlying referenced CMBS transactions are fully eroded, additional property level losses upon foreclosures and liquidations could result in substantial losses for MBIA. Ultimate loss rates remain uncertain and it is possible that we will experience severe losses or liquidity needs due to increased deterioration in our insured CMBS portfolio or our failure to commute the policies, in particular if macroeconomic stress escalates, there is a new recession, increased delinquencies, higher levels of liquidations of delinquent loans, and/or higher severities of loss upon liquidation. Although we still believe the likelihood of a new recession is low, we do consider the possibility in our estimates for future claims.

CRE CDOs

As of June 30, 2013, our gross par exposure to CRE CDOs totaled \$1.3 billion and represented approximately 2% of MBIA Corp.'s total gross par insured. CRE CDOs are managed pools of CMBS, CRE whole loans, B-Notes, mezzanine loans, REIT debt, and other securities (including, in some instances, buckets for RMBS and CRE CDOs) that allow for reinvestment during a defined time period. Most of these transactions benefit from typical CDO structural features such as cash diversion triggers, collateral quality tests, and manager replacement provisions. Typically, MBIA Corp. guarantees timely interest and ultimate principal of these CDOs. As with our other insured CDOs, these transactions were generally structured with credit protection originally rated triple-A, or a multiple of triple-A, below our guarantee. As of June 30, 2013, our CRE CDO insured portfolio did not contain any CDOs of ABS exposures. Some of the CRE CDO transactions do contain some RMBS collateral, but overall this comprises 1% of the collateral in the CRE CDO portfolio. To the extent losses do occur on these transactions, the payments are due at the maturity date, which range from the years 2036 through 2056. Current subordination levels are between 0% and 38%.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

U.S. Public Finance and Structured Finance and International Reinsurance

Reinsurance enables the Company to cede exposure for purposes of syndicating risk and increasing its capacity to write new business while complying with its single risk and credit guidelines. When a reinsurer is downgraded by one or more of the rating agencies, less capital credit is given to MBIA under rating agency models and the overall value of the reinsurance to MBIA is reduced. The Company generally retains the right to reassume the business ceded to reinsurers under certain circumstances, including a reinsurer's rating downgrade below specified thresholds. The following table presents information about our reinsurance agreements as of June 30, 2013 for our U.S. public finance and structured finance and international insurance operations:

In millions	Standard & Poor's Rating (Status)	Moody's Rating (Status)	Ceded Par Outstanding	Letters of Credit/Trust Accounts	Reinsurance Recoverable ⁽¹⁾
Reinsurers					
Assured Guaranty Corp.	AA- (Stable Outlook)	A3 (Stable Outlook)	\$ 2,263	\$ -	\$ 14
Assured Guaranty Re Ltd.	AA- (Stable Outlook)	Baa1 (Stable Outlook)	480	5	-
Overseas Private Investment Corporation	AA+ (Stable Outlook)	Aaa (Negative Outlook)	333	-	-
Export Development Canada	AAA (Stable Outlook)	Aaa (Stable Outlook)	51	1	-
Others	A+ or above	A2 or above	59	1	-
Total			<u>\$ 3,186</u>	<u>\$ 7</u>	<u>\$ 14</u>

(1) - Amount comprises recoverables on unpaid losses.

MBIA requires certain unauthorized reinsurers to maintain bank letters of credit or establish trust accounts to cover liabilities ceded to such reinsurers under reinsurance contracts. As of June 30, 2013, the total amount available under these letters of credit and trust accounts was \$7 million. The Company remains liable on a primary basis for all reinsured risk, and although MBIA believes that its reinsurers remain capable of meeting their obligations, there can be no assurance of such in the future.

As of June 30, 2013, the aggregate amount of insured par outstanding ceded by MBIA to reinsurers under reinsurance agreements was \$3.2 billion compared with \$3.4 billion as of December 31, 2012. Of the \$3.2 billion of ceded par outstanding as of June 30, 2013, \$1.8 billion was ceded from our U.S. public finance insurance segment and \$1.4 billion was ceded from our structured finance and international insurance segment. Under National's reinsurance agreement with MBIA Corp., if a reinsurer of MBIA Corp. is unable to pay claims ceded by MBIA Corp. on U.S. public finance exposure, National will assume liability for such ceded claim payments. As of June 30, 2013, the total amount for which National would be liable in the event that the reinsurers of MBIA Corp. were unable to meet their obligations is \$1.8 billion. For Financial Guaranty Insurance Company ("FGIC") policies assigned to National from MBIA Insurance Corporation, National maintains the right to receive third-party reinsurance totaling \$4.3 billion.

Advisory Services

Our asset management and advisory business is primarily conducted through Cutwater and Trifinium. Cutwater provides advisory services, including cash management, discretionary asset management and structured products on a fee-for-service basis. Cutwater offers these services to public, not-for-profit, corporate and financial services clients, including MBIA Inc. and its other subsidiaries. Trifinium provides fee-based asset management and advisory services to the Company's foreign insurance affiliate and to third-party clients and investment structures. During the first half of 2013, Trifinium began managing a financing program that provides loans to the United Kingdom social housing sector for which Trifinium earns fees for management and other services provided to the program. In addition, Trifinium commenced providing monitoring adviser services on behalf of creditors in infrastructure financings.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

The following table summarizes the results and assets under management of our advisory services segment for the three and six months ended June 30, 2013 and 2012. These results include revenues and expenses from transactions with the Company's insurance, corporate, and wind-down operations.

In millions	Three Months Ended June 30,		Percent Change	Six Months Ended June 30,		Percent Change
	2013	2012		2013	2012	
Fees	\$ 11	\$ 16	-31%	\$ 22	\$ 29	-24%
Operating expenses	17	16	6%	29	33	-12%
Pre-tax income (loss)	\$ (6)	\$ -	n/m	\$ (7)	\$ (4)	75%
Ending assets under management:						
Third-party	\$ 16,943	\$ 18,628	-9%	\$ 16,943	\$ 18,628	-9%
Insurance and corporate	6,749	7,450	-9%	6,749	7,450	-9%
Asset/liability products and conduits	4,230	6,311	-33%	4,230	6,311	-33%
Total ending assets under management	\$ 27,922	\$ 32,389	-14%	\$ 27,922	\$ 32,389	-14%

n/m - Percent change not meaningful.

For the three and six months ended June 30, 2013, the unfavorable changes in pre-tax income (loss) compared with the same periods of 2012 were primarily driven by decreases in fees due to declines in asset balances managed for our other segments and for third parties. The decrease in fees for the six months ended June 30, 2013 compared with the same period of 2012 was partially offset by a decrease in compensation costs.

Average third-party assets under management for the six months ended June 30, 2013 and 2012 were \$17.4 billion and \$20.5 billion, respectively. This decrease was principally due to declines in our pool products and CDO management business.

Corporate

General corporate activities are conducted through our corporate segment. Our corporate operations primarily consist of holding company activities, including our service company, Optinuity Alliance Resources Corporation ("Optinuity"). Revenues and expenses for Optinuity are included in the results of our corporate segment. Optinuity provides support services such as management, legal, accounting, treasury, information technology, and insurance portfolio surveillance, among others, to our corporate segment and other operating businesses on a fee-for-service basis.

The following table summarizes the consolidated results of our corporate segment for the three and six months ended June 30, 2013 and 2012. The results include revenues and expenses that arise from general corporate activities and from providing support to our other segments.

In millions	Three Months Ended June 30,		Percent Change	Six Months Ended June 30,		Percent Change
	2013	2012		2013	2012	
Net investment income	\$ 8	\$ 6	33%	\$ 9	\$ 7	29%
Fees	17	56	-70%	44	79	-44%

n/m - Percent change not meaningful.

FEES Fees are generated from support services provided to business units within the Company on a fee-for-service basis. Fees for the three and six months ended June 30, 2013 decreased compared with the same periods of 2012 primarily due to a decrease in fees paid by our conduit segment for administrative and other services. Such fees may vary significantly from period to period.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

NET GAINS (LOSSES) ON FINANCIAL INSTRUMENTS AT FAIR VALUE AND FOREIGN EXCHANGE The decrease in net gains (losses) on financial instruments at fair value and foreign exchange for the three and six months ended June 30, 2013 compared with the same periods of 2012 was primarily due to the changes in the fair value of outstanding warrants issued on MBIA Inc. common stock. These changes were attributable to fluctuations in MBIA Inc.'s stock price and volatility, which are used in the valuation of the warrants. Under the terms of the BofA Settlement Agreement, Bank of America received a five-year warrant to purchase 9.94 million shares of MBIA common stock in May of 2013.

OTHER NET REALIZED GAINS (LOSSES) Other net realized gains and losses for the three and six months ended June 30, 2012, consisted of insurance recoveries received from our directors' and officers' insurance policy. These insurance recoveries reimbursed the Company for a portion of the expenses incurred by the Company related to private securities litigation.

REVENUES OF CONSOLIDATED VIEs For the three and six months ended June 30, 2013, total revenues of consolidated VIEs related to net losses as a result of the deconsolidation of VIEs.

OPERATING EXPENSES Operating expenses for the three and six months ended June 30, 2013 increased compared with the same periods of 2012 due to expenses related to the BofA Settlement Agreement.

Wind-down Operations

We operate an asset/liability products business in which we historically issued debt and investment agreements insured by MBIA Corp. to capital markets and municipal investors. The proceeds of the debt and investment agreements were used initially to purchase assets that largely matched the duration of those liabilities. We also operate a conduit business in which we historically funded transactions by issuing debt insured by MBIA Corp. The rating downgrades of MBIA Corp. resulted in the termination and collateralization of certain derivatives and investment agreements and, together with the rising cost and declining availability of funding and liquidity within many of the asset classes in which proceeds were invested, caused the Company to begin winding down its asset/liability products and conduit businesses in 2008. Since the downgrades of MBIA Corp., we have not issued debt in connection with either business and, as a result, the outstanding liability balances and corresponding asset balances will continue to decline over time as liabilities mature, terminate or are redeemed or repurchased by us.

Asset/Liability Products

The following table presents the results of our asset/liability products segment for the three and six months ended June 30, 2013 and 2012. These results include revenues and expenses from transactions with the Company's insurance and corporate operations.

In millions	Three Months Ended June 30,		Percent Change	Six Months Ended June 30,		Percent Change
	2013	2012		2013	2012	
Net investment income	\$ 6	\$ 13	-54%	\$ 13	\$ 30	-57%

Total expenses	23	32	-28%	45	65	-31%
Pre-tax income (loss)	<u>\$ (29)</u>	<u>\$ (76)</u>	<u>-62%</u>	<u>\$ (37)</u>	<u>\$ (221)</u>	<u>-83%</u>

n/m - Percent change not meaningful.

NET INVESTMENT INCOME The decrease in net investment income for the three and six months ended June 30, 2013 compared with the same periods of 2012 was primarily due to lower average asset balances as investments were sold to generate liquidity and repay liabilities.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

NET GAINS (LOSSES) ON FINANCIAL INSTRUMENTS AT FAIR VALUE AND FOREIGN EXCHANGE The favorable change in net gains (losses) on financial instruments at fair value and foreign exchange for the three months ended June 30, 2013 compared with the same period of 2012 was primarily the result of derivative gains in 2013 compared with losses in 2012 and a decline in losses related to the sale of investments, partially offset by less favorable movements in foreign exchange rates on medium-term notes ("MTNs") liabilities and unrealized losses on MTNs carried at fair value in 2013 compared with gains in 2012. The favorable change in net gains (losses) on financial instruments at fair value and foreign exchange for the six months ended June 30, 2013 compared to the same period of 2012 was primarily the result of derivative gains in 2013 compared with losses in 2012 and a decline in losses related to the sale of investments, partially offset by losses on MTNs carried at fair value in 2013 compared with gains in 2012.

NET INVESTMENT LOSSES RELATED TO OTHER-THAN-TEMPORARY IMPAIRMENTS The Company has an ongoing review process for all securities to assess whether a decline in value is related to a credit loss. The Company utilizes cash flow modeling for purposes of assessing other-than-temporary impairments. Net investment losses related to other-than-temporary impairments for the six months ended June 30, 2012 related to impairing certain securities to their fair values, as it was our intent to sell these securities before a recovery of their fair values to amortized cost. Refer to the "Liquidity" section included herein for additional information about impaired investments.

NET GAINS (LOSSES) ON EXTINGUISHMENT OF DEBT For the six months ended June 30, 2013, net gains (losses) on extinguishment of debt was primarily due to gains from terminations of investment agreements issued by the Company.

INTEREST EXPENSE The decrease in interest expense for the three and six months ended June 30, 2013 compared with the same periods of 2012 was primarily due to the continued maturity and repurchases of liabilities by the Company.

Conduits

The following table presents the results of our conduit segment for the three and six months ended June 30, 2013 and 2012. These results include revenues and expenses from transactions with the Company's other segments.

In millions	Three Months Ended June 30,		Percent Change	Six Months Ended June 30,		Percent Change
	2013	2012		2013	2012	
Revenues of consolidated VIEs:						
Net investment income	\$ 1	\$ 2	-50%	\$ 3	\$ 5	-40%
Net gains (losses) on financial instruments at fair value and foreign exchange	(3)	-	n/m	(3)	-	n/m
Net gains (losses) on extinguishment of debt	-	33	-100%	-	33	-100%
Total revenues	(2)	35	-106%	-	38	-100%
Expenses of consolidated VIEs:						
Operating	-	35	-100%	11	35	-69%
Interest	2	3	-33%	4	8	-50%
Total expenses	2	38	-95%	15	43	-65%
Pre-tax income (loss)	\$ (4)	\$ (3)	33%	\$ (15)	\$ (5)	n/m

n/m - Percent change not meaningful.

Our conduit segment is operated through Meridian. Certain of MBIA's consolidated subsidiaries have received compensation for services provided to Meridian.

For the three and six months ended June 30, 2013, total revenues decreased compared with the same periods of 2012 primarily due to the absence of net gains from the repurchases of debt issued by Meridian. Total expenses decreased compared with the same periods of 2012, primarily due to a decline in fees paid to our corporate segment for administrative and other services.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

Taxes

Provision for Income Taxes

The Company's income taxes and the related effective tax rates for the three and six months ended June 30, 2013 and 2012 are presented in the following table:

In millions	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Pre-tax income (loss)	\$ (264)	\$ 795	\$ (49)	\$ 816
Provision (benefit) for income taxes	\$ (86)	\$ 214	\$ (35)	\$ 225
Effective tax rate	32.6%	26.9%	71.4%	27.6%

For the six months ended June 30, 2013, our effective tax rate applied to our pre-tax loss was higher than the U.S. statutory tax rate of 35% primarily due to a reduction in our valuation allowance against our deferred tax asset, net of certain nondeductible expenses.

For the six months ended June 30, 2012, our effective tax rate applied to our pre-tax income was lower than the U.S. statutory tax rate of 35% as a result of the decrease in the Company's valuation allowance, the release of a portion of the reserve for uncertain tax benefits and the benefit of tax-exempt interest income from investments.

As of December 31, 2012, the Company's consolidated net operating loss ("NOL") carryforward was \$1.4 billion which will expire between tax years 2029 through 2032. As a result of commutation activity in the second quarter of 2013, the Company's NOL has significantly increased from the December 31, 2012 balance. As of June 30, 2013, the Company's NOL is approximately \$2.8 billion.

Refer to "Note 10: Income Taxes" in the Notes to Consolidated Financial Statements for a further discussion of income taxes, including the Company's valuation allowance against deferred tax assets and its accounting for tax uncertainties.

CAPITAL RESOURCES

The Company manages its capital resources to minimize its cost of capital while maintaining appropriate claims-paying resources ("CPR") for National and MBIA Corp. The Company's capital resources consist of total shareholders' equity, total debt issued by MBIA Inc. for general corporate purposes, and surplus notes issued by MBIA Insurance Corporation. Total capital resources were \$4.5 billion and \$4.8 billion as of June 30, 2013 and December 31, 2012, respectively. MBIA Inc. utilizes its capital resources to support the business activities of its subsidiaries. As of June 30, 2013, MBIA Inc.'s investments in subsidiaries totaled \$4.0 billion.

In addition to managing the capital resources of MBIA Inc.'s subsidiaries, we also manage the capital resources of MBIA Inc. supporting our corporate and asset/liability products segments. This includes our corporate unsecured debt issued for general corporate purposes and debt and investment agreements for operating leverage purposes in support of our asset/liability products business. MBIA Inc. seeks to maintain sufficient liquidity and capital resources to meet its general corporate needs as well as the needs of the asset/liability products business. As of June 30, 2013 and December 31, 2012, the combined net debt of MBIA Inc.'s corporate segment and asset/liability products segment, which primarily comprised long-term debt, MTNs, investment agreements and derivative liabilities net of cash and investments at amortized cost and a tax receivable from subsidiaries, totaled \$1.3 billion and \$1.2 billion, respectively. The Company expects that MBIA Inc. will generate sufficient cash to satisfy its net debt and its general corporate needs over time from distributions from its operating subsidiaries and by raising third-party capital, although there can be no assurance that such factors will generate sufficient cash to satisfy its net debt. Refer to the following "Liquidity—MBIA Inc. Liquidity" section for additional information about MBIA Inc.'s liquidity.

Securities Repurchases

Repurchases of debt and/or common stock may be made from time to time in the open market or in private transactions as permitted by securities laws and other legal requirements. We may also choose to redeem debt obligations where permitted by the relevant agreements. We believe that debt and/or share repurchases and redemptions can be an appropriate deployment of capital in excess of amounts needed to support our liquidity while maintaining the CPR of MBIA Corp. and National as well as other business needs.

Debt securities

MBIA Inc. or its subsidiaries may repurchase or redeem their outstanding debt at prices that we deem to be economically advantageous. During the six months ended June 30, 2013, the Company redeemed \$336 million par value outstanding of MTNs issued by the Company's conduit segment at a cost of 100% of par value. During July of 2013, the Company redeemed an additional \$150 million par value outstanding of the conduit segment's MTNs at a cost of 100% of par value. The Company also repurchased approximately \$38 million par value outstanding of GFL MTNs issued by the Company's asset/liability segment at a weighted average cost of approximately 97% of par value.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**CAPITAL RESOURCES (continued)*****Insurance Statutory Capital***

National and MBIA Insurance Corporation are incorporated and licensed in, and are subject to primary insurance regulation and supervision by, the State of New York. National and MBIA Insurance Corporation each are required to file detailed annual financial statements, as well as interim financial statements, with the NYSDFS and similar supervisory agencies in each of the other jurisdictions in which it is licensed. These financial statements are prepared in accordance with New York State and the National Association of Insurance Commissioners' statements of U.S. STAT and assist our regulators in evaluating minimum standards of solvency, including minimum capital requirements, and business conduct. U.S. STAT differs from GAAP in a number of ways. Refer to the statutory accounting practices note to consolidated financial statements of National and MBIA Corp. within exhibits 99.1 and 99.2, respectively, of MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012 for an explanation of the differences between U.S. STAT and GAAP.

National**Capital and Surplus**

National reported total statutory capital of \$3.4 billion as of June 30, 2013 compared with \$3.2 billion as of December 31, 2012. As of June 30, 2013, statutory capital comprised \$1.2 billion of contingency reserves and \$2.2 billion of policyholders' surplus. The increase in National's statutory capital is primarily due to statutory net income of \$117 million for the six months ended June 30, 2013. Consistent with our plan to transform our insurance business, the Company received approval from the NYSDFS to reset National's unassigned surplus to zero, which was effective January 1, 2010. As of June 30, 2013, National's unassigned surplus was \$1.5 billion. In October 2010, the plaintiffs in the litigation challenging the establishment of National initiated a court proceeding challenging the approval of the surplus reset. Subsequent to the BofA Settlement Agreement and the Societe Generale settlement, all litigation brought originally by the group of eighteen domestic and international financial institutions, related to the establishment of National, has been resolved. Refer to "Note 14: Commitments and Contingencies" in the Notes to Consolidated Financial Statements for a discussion of this action.

In order to maintain its New York State financial guarantee insurance license, National is required to maintain a minimum of \$65 million of policyholders' surplus. National is also required to maintain contingency reserves to provide protection to policyholders in the event of extreme losses in adverse economic events. Refer to the following "MBIA Insurance Corporation—Capital and Surplus" section for additional information about contingency reserves under the New York Insurance Law ("NYIL"). National's policyholders' surplus will grow over time from the recognition of unearned premiums and investment income and the expected release of the contingency reserves. Conversely, incurred losses would reduce policyholders' surplus. As of June 30, 2013 and December 31, 2012, National was not in compliance with its single risk limits requirements but was in compliance with its aggregate risk limits.

NYIL regulates the payment of dividends by financial guarantee insurance companies and provides that such companies may not declare or distribute dividends except out of statutory earned surplus. Under NYIL, the sum of (i) the amount of dividends declared or distributed during the preceding 12-month period and (ii) the dividend to be declared may not exceed the lesser of (a) 10% of policyholders' surplus, as reported in the latest statutory financial statements or (b) 100% of adjusted net investment income for such 12-month period (the net investment income for such 12-month period plus the excess, if any, of net investment income over dividends declared or distributed during the two-year period preceding such 12-month period), unless the Superintendent of the NYSDFS approves a greater dividend distribution based upon a finding that the insurer will retain sufficient surplus to support its obligations.

National is subject to NYIL with respect to the payment of dividends as described above. National had a positive earned surplus as of June 30, 2013, which provides National with dividend capacity. National did not declare or pay any dividends during the second quarter of 2013. In connection with the court proceeding challenging the approval of the National surplus reset described above, we agreed that National would not pay dividends while the proceeding was adjourned. This agreement terminated in connection with the resolution of the proceeding. In addition, in connection with the approval of a release of excessive contingency reserves during 2011 for MBIA Insurance Corporation, the Company agreed that National would not pay dividends without the prior regulatory approval of the NYSDFS prior to July 19, 2013. Finally, as a condition to the NYSDFS' approval of the Asset Swap between MBIA Inc. and National, the NYSDFS requested that, until the notional amount of the Asset Swap has been reduced to 5% or less of National's admitted assets, each of MBIA Inc., MBIA Insurance Corporation and National provide the NYSDFS with three months prior notice, or such shorter period as the NYSDFS may permit, of its intent to initiate cash dividends on shares of its common stock. National has provided the NYSDFS with such notice, and intends to pay a dividend during the fourth quarter of 2013 following the expiration of the three month notice period, or at such earlier time as the NYSDFS may permit.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

CAPITAL RESOURCES (continued)

National's statutory policyholders' surplus was lower than its GAAP shareholder's equity by \$1.7 billion as of June 30, 2013. U.S. STAT differs from GAAP in certain respects. Refer to "Note 11: Statutory Accounting Practices" in the Notes to Consolidated Financial Statements of National within exhibit 99.1 of MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012 for an explanation of the differences between U.S. STAT and GAAP.

Claims-Paying Resources (Statutory Basis)

CPR is a key measure of the resources available to National to pay claims under its insurance policies. CPR consists of total financial resources and reserves calculated on a statutory basis. CPR has been a common measure used by financial guarantee insurance companies to report and compare resources and continues to be used by MBIA's management to evaluate changes in such resources. We have provided CPR to allow investors and analysts to evaluate National using the same measure that MBIA's management uses to evaluate National's resources to pay claims under its insurance policies. There is no directly comparable GAAP measure. Our calculation of CPR may differ from the calculation of CPR reported by other companies.

National's CPR and components thereto, as of June 30, 2013 and December 31, 2012 are presented in the following table:

In millions	As of June 30, 2013	As of December 31, 2012
Policyholders' surplus	\$ 2,138	\$ 1,999
Contingency reserves	1,226	1,249
Statutory capital	3,364	3,248
Unearned premium reserve	1,862	2,041
Present value of installment premiums ⁽¹⁾	210	217
Premium resources ⁽²⁾	2,072	2,258
Net loss and LAE reserves ⁽¹⁾	46	(109)
Salvage reserves	182	262
Gross loss and LAE reserve	228	153
Total claims-paying resources	\$ 5,664	\$ 5,659

(1) - Calculated using a discount rate 4.54% as of June 30, 2013 and December 31, 2012.

(2) - Includes financial guarantee and insured credit derivative related premiums.

MBIA Insurance Corporation

Capital and Surplus

MBIA Insurance Corporation reported total statutory capital of \$1.2 billion as of June 30, 2013 compared with \$1.5 billion as of December 31, 2012. As of June 30, 2013, statutory capital comprised \$425 million of contingency reserves and \$750 million of policyholders' surplus. For the six months ended June 30, 2013, MBIA Insurance Corporation had a statutory net loss of \$245 million, primarily due to losses and LAE incurred partially offset by net premiums earned. MBIA Insurance Corporation's policyholders' surplus as of June 30, 2013 included a negative unassigned surplus of \$1.3 billion.

As of June 30, 2013, MBIA Insurance Corporation recognized estimated recoveries of \$703 million, net of reinsurance and income taxes at a rate of 35%, on a statutory basis related to put-backs of ineligible mortgage loans in its insured transactions. These expected insurance recoveries represented 60% of MBIA Insurance Corporation's statutory capital as of June 30, 2013. There can be no assurance that we will be successful or that we will not be delayed in realizing these recoveries. Refer to "Executive Overview—MBIA Corp." included herein for factors that may influence MBIA Corp.'s ability to realize these recoveries.

In order to maintain its New York State financial guarantee insurance license, MBIA Insurance Corporation is required to maintain a minimum of \$65 million of policyholders' surplus. MBIA Insurance Corporation's policyholders' surplus is expected to grow over time from the recognition of unearned premiums and investment income and the expected release of the contingency reserves. In addition, MBIA Insurance Corporation's policyholders' surplus could be enhanced by the settlement, commutation or repurchase of insured transactions at prices less than its statutory loss reserves for such transactions. Conversely, incurred losses or an inability to collect on our ineligible mortgage loan put-back claims would reduce policyholders' surplus.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

CAPITAL RESOURCES (continued)

Under NYIL, MBIA Insurance Corporation is also required to establish a contingency reserve to provide protection to policyholders in the event of extreme losses in adverse economic events. The amount of the reserve is based on the percentage of principal insured or premiums earned, depending on the type of obligation (net of collateral, reinsurance, refunding, refinancings and certain insured securities). Under NYIL, MBIA Insurance Corporation is required to invest its minimum surplus and contingency reserves, and 50% of its loss reserves and unearned premium reserves, in certain qualifying assets. Reductions in the contingency reserve may be recognized based on excessive reserves and under certain stipulated conditions, subject to the approval of the Superintendent of the NYSDFS. As of June 30, 2013, MBIA Insurance Corporation had a deficit of \$322 million of qualifying assets required to support its contingency reserves. The deficit was caused by the failure of certain mortgage originators to honor contractual obligations to repurchase ineligible mortgage loans from securitizations we insured thus requiring MBIA Insurance Corporation to sell liquid assets in order to make claim payments. The deficit may grow due to additional commutation and claim payments until such time as MBIA Corp. collects additional put-back recoveries. MBIA Insurance Corporation reported the deficit and requested approval from the NYSDFS to release an aggregate of \$322 million of excess contingency reserves, which was disapproved by the NYSDFS. For risks associated with MBIA Insurance Corporation's failure to meet its contingency reserve requirement, see Part II, Item 1A "Risk Factors—Capital, Liquidity and Market Related Risk Factors—If our insurance companies fail to meet regulatory capital requirements they may become subject to regulatory action" of this Quarterly Report on Form 10-Q.

As of June 30, 2013, MBIA Insurance Corporation was in compliance with its aggregate risk limits under the NYIL. In 2013 and 2012, MBIA Insurance Corporation reported additional overages to the NYSDFS with respect to its single risk limits due to changes in its statutory capital.

In connection with MBIA Insurance Corporation obtaining approval from the NYSDFS to release excessive contingency reserves as discussed above, MBIA Insurance Corporation agreed that it would not pay any dividends without prior approval from the NYSDFS. Due to its significant negative earned surplus, MBIA Insurance Corporation has not had the statutory capacity to pay dividends since December 31, 2009 and is not expected to have any statutory capacity to pay any dividends in the near term.

MBIA Insurance Corporation's statutory policyholders' surplus is higher than its GAAP shareholders' equity by \$280 million as of June 30, 2013. U.S. STAT differs from GAAP in certain respects. Refer to "Note 14: Statutory Accounting Practices" in the Notes to Consolidated Financial Statements of MBIA Corp. within exhibit 99.2 of MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012 for an explanation of the differences between U.S. STAT and GAAP.

Claims-Paying Resources (Statutory Basis)

CPR is a key measure of the resources available to MBIA Insurance Corporation to pay claims under its insurance policies. CPR consists of total financial resources and reserves calculated on a statutory basis. CPR has been a common measure used by financial guarantee insurance companies to report and compare resources, and continues to be used by MBIA's management to evaluate changes in such resources. We have provided CPR to allow investors and analysts to evaluate MBIA Insurance Corporation, using the same measure that MBIA's management uses to evaluate MBIA Insurance Corporation's resources to pay claims under its insurance policies. There is no directly comparable GAAP measure. Our calculation of CPR may differ from the calculation of CPR reported by other companies.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

CAPITAL RESOURCES (continued)

MBIA Insurance Corporation's CPR and components thereto, as of June 30, 2013 and December 31, 2012 are presented in the following table:

In millions	As of June 30, 2013	As of December 31, 2012
Policyholders' surplus	\$ 750	\$ 965
Contingency reserves	425	493
Statutory capital	1,175	1,458
Unearned premium reserve	561	600
Present value of installment premiums ⁽¹⁾	856	1,035
Premium resources ⁽²⁾	1,417	1,635
Net loss and LAE reserves ⁽¹⁾	(932)	(2,448)
Salvage reserves ⁽³⁾	1,924	4,628
Gross loss and LAE reserve	992	2,180
Total claims-paying resources	\$ 3,584	\$ 5,273

(1) - Calculated using a discount rate of 5.72% as of June 30, 2013 and December 31, 2012.

(2) - Includes financial guarantee and insured credit derivative related premiums.

(3) - This amount primarily consists of expected recoveries related to the Company's put-back claims.

LIQUIDITY

As a financial services company, MBIA has been materially adversely affected by conditions in global financial markets. Current conditions and events in these markets, in addition to delays in obtaining recoveries related to ineligible mortgage loans in securitizations that we had insured, have put substantial stress on our liquidity resources.

We have utilized a liquidity risk management framework, the primary objectives of which are to monitor liquidity positions and projections in our legal entities and guide the matching of liquidity resources to needs. We monitor our cash and liquid asset resources using stress-scenario testing. Members of MBIA's senior management meet regularly to review liquidity metrics, discuss contingency plans and establish target liquidity cushions on an enterprise-wide basis. As part of our liquidity risk management framework, we evaluate and manage liquidity on a legal-entity basis to take into account the legal, regulatory and other limitations on available liquidity resources within the enterprise.

The majority of our liquidity management efforts focus on:

- The liquidity resources of MBIA Inc., which are subject to: uncertainty in the timing and amount of cash inflows from dividends paid by National and MBIA Insurance Corporation; the necessity of having to meet the scheduled principal and interest on its corporate debt and investment agreements issued by the asset/liability products business; payments on derivative contracts related to the asset/liability products business; and ongoing operating expense needs. MBIA Inc. has a net debt, which comprised long-term debt, MTN's, investment agreements and derivative liabilities net of cash and investments at amortized cost and a tax receivable from subsidiaries, of \$1.3 billion as of June 30, 2013. In addition, the liquidity resources of MBIA Inc. are subject to collateralization requirements in connection with the liabilities it has issued to third parties and affiliates and in connection with third-party derivative contracts.
- The liquidity resources of MBIA Corp., which are subject to: ongoing payments related to second-lien RMBS exposures; payments on its remaining CMBS exposures, due to the deterioration in such exposures; payments to counterparties in consideration for the commutation of insured transactions; and payments on insured exposures that in some cases may be large bullet payments. MBIA Corp. is currently subject to negative cash flow as a result of these payments and delays in collecting recoveries.

We also monitor the liquidity resources of National, for which we have not observed material liquidity risk to date, in order to ensure it maintains sufficient liquidity to pay claims and satisfy its other obligations. National's liquidity resources are subject to loss payments on its insured transactions and negative cash flow, primarily due to tax payments resulting from embedded earnings and investment income.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**LIQUIDITY (continued)**

In order to efficiently manage liquidity across the entire enterprise, certain of our subsidiaries, which are less liquidity constrained have entered into intercompany agreements that provide resources to subsidiaries that are more liquidity constrained. These resources include intercompany agreements described further below between our primary insurance subsidiaries and between these insurance subsidiaries and MBIA Inc., which in each case were approved by the NYSDFS and are subject to ongoing monitoring by the NYSDFS. MBIA Corp. may also draw on liquidity through the Blue Ridge Secured Loan described below.

Key Lending Agreements**Blue Ridge Secured Loan**

In connection with the BofA Settlement Agreement in May of 2013, MBIA Insurance Corporation and Blue Ridge entered into the Blue Ridge Secured Loan, pursuant to which Blue Ridge agreed to make revolving loans to MBIA Insurance Corporation in an aggregate amount of up to \$500 million, none of which was utilized as of June 30, 2013. Refer to "Note 9: Debt" in the Notes to Consolidated Financial Statements for a description of the Blue Ridge Secured Loan.

National Secured Loan

In 2011, National provided a \$1.1 billion National Secured Loan to MBIA Insurance Corporation in order to enable MBIA Insurance Corporation to fund settlements and commutations of its insurance policies. This loan was approved by the NYSDFS as well as by the boards of directors of MBIA Inc., MBIA Insurance Corporation and National. During 2012, MBIA Insurance Corporation borrowed an additional \$443 million under the National Secured Loan with the approval of the NYSDFS at the same terms as the original loan to fund additional commutations of its insurance policies. In connection with the BofA Settlement Agreement, in May of 2013, MBIA Insurance Corporation repaid this loan in full and it was extinguished.

Asset Swap

National maintains the Asset Swap (simultaneous repurchase and reverse repurchase agreements) with MBIA Inc. for up to \$2.0 billion based on the fair value of securities borrowed. The Asset Swap provides MBIA Inc. with eligible assets to pledge under investment agreements and derivative contracts in the asset/liability products business. As of June 30, 2013, the notional amount utilized under each of these agreements was \$455 million and the fair value of collateral pledged by National and MBIA Inc. under these agreements was \$474 million and \$495 million, respectively. The net average interest rate on these transactions was 0.34% and 0.39% for the six months ended June 30, 2013 and 2012, respectively. The NYSDFS approved the Asset Swap in connection with the re-domestication of National to New York. National has committed to the NYSDFS to use commercially reasonable efforts to reduce the amount of the Asset Swap over time.

MBIA Insurance Corporation Secured Loan

MBIA Insurance Corporation, as lender, maintained a master repurchase agreement, the MBIA Insurance Corporation Secured Loan, with MBIA Inc. for the benefit of MBIA Inc.'s asset/liability products business, which totaled \$2.0 billion at inception and was scheduled to mature in May 2012, as amended. This loan was repaid in May of 2012 and there were no further draws. The average interest rate on the MBIA Insurance Corporation Secured Loan was 2.51% for the six months ended June 30, 2012. Also in May 2012, the NYSDFS approved the maturity extension of the MBIA Insurance Corporation Secured Loan facility to May 2013 with a maximum outstanding amount of \$450 million. This loan facility expired on May 3, 2013.

Conduit Repurchase Agreement

MBIA Inc. maintains a repurchase agreement with Meridian ("Conduit Repurchase Agreement"), with a maximum funded amount of \$1.0 billion, subject to a pledge of collateral. The Conduit Repurchase Agreement had an average interest rate during the six months ended June 30, 2013 and 2012 of 2.30% and 2.50%, respectively. As of June 30, 2013, there was no balance outstanding under the Conduit Repurchase Agreement.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**LIQUIDITY (continued)*****MBIA Inc. Liquidity***

MBIA Inc.'s liquidity resources support our corporate and asset/liability products segments. The activities of MBIA Inc. consist of holding and managing investments, servicing outstanding corporate debt instruments, investment agreements and MTNs issued by the asset/liability products and conduit segments, posting collateral under financing and hedging arrangements and investment agreements, making payments and collateral postings related to interest rate and foreign exchange swaps, and paying operating expenses. The primary sources of cash within MBIA Inc. used to meet its liquidity needs include available cash and liquid assets not subject to collateral posting requirements, scheduled principal and interest on assets held in its investment portfolio, dividends from subsidiaries, payments under tax sharing agreements with these subsidiaries (once the payments become unrestricted) and the ability to issue debt and equity. There can be no assurance as to the amount and timing of any such dividends or payments under the tax sharing agreements. MBIA Inc.'s corporate debt, investment agreements, derivatives and the GFL MTNs may be accelerated by the holders of such instruments upon the occurrence of certain events, such as a breach of covenant or representation, a bankruptcy of MBIA Inc., in the case of the corporate debt, investment agreements and derivatives, the filing of an insolvency proceeding with respect to National, in the case of the corporate debt, a bankruptcy of GFL, in the case of the GFL MTNs, or the filing of an insolvency proceeding with respect to MBIA Insurance Corporation, in the cases of the investment agreements and GFL MTNs. MBIA Inc.'s obligations under its loans from GFL may be accelerated only upon the occurrence of a bankruptcy or liquidation of MBIA Inc. Refer to "Note 11: Business Segments" in the Notes to Consolidated Financial Statements for a description of the GFL loans and MTNs. In the event of any acceleration of all of our obligations, including under our corporate debt, investment agreements, GFL MTNs, or derivatives, we likely would not have sufficient liquid resources to pay amounts due. We have provided the NYSDFS with notice of our intention to have National pay a dividend in the fourth quarter of 2013. Refer to the "Capital Resources—Insurance Statutory Capital" section for additional information on this dividend.

During the six months ended June 30, 2013, pursuant to the tax sharing agreement, National settled its taxes related to the 2012 tax year of \$16 million with MBIA Inc. In addition, National paid to MBIA Inc. estimated 2013 taxes of \$63 million. Consistent with the tax sharing agreement, this amount was placed in an escrow account until the expiration of National's two-year NOL carry-back period under U.S. tax rules. At the expiration of National's carry-back period, any funds remaining after any reimbursement to National in respect of any NOL carry-backs would be available for general corporate purposes, including to satisfy any other obligations under the tax sharing agreement. During the first half of 2013, MBIA Inc. received \$115 million that was previously held in escrow under the MBIA group tax sharing agreement. The amount represents National's liability under the tax sharing agreement for the 2010 tax year, and was released pursuant to the terms of the agreement following the expiration of National's two-year NOL carry-back period under U.S. tax rules. As of June 30, 2013, \$409 million remained in escrow for the 2011 through the 2013 tax years.

MBIA Inc. is subject to material liquidity risks and uncertainty. To mitigate these risks, we seek to maintain cash and liquidity resources that we believe will be sufficient to make all payments due on our obligations and to meet other financial requirements, such as posting collateral, at least through the next twelve months.

Liquidity risk within MBIA Inc. is primarily a result of the following factors:

- Currently, the majority of the cash and securities of MBIA Inc. is pledged against investment agreement liabilities, intercompany financing arrangements and derivatives, which limit its ability to raise liquidity through asset sales. A significant portion of MBIA Inc.'s assets that are pledged against intercompany financing arrangement liabilities are structured finance securities which have been particularly susceptible to price fluctuations during periods of market volatility. In addition, if the market value or rating eligibility of the assets which are pledged against MBIA Inc.'s obligations were to decline, we would be required to pledge additional eligible assets in order to meet minimum required collateral amounts against these liabilities. In such event, we may sell additional assets, potentially with substantial losses, finance unencumbered assets through intercompany facilities, or use free cash or other assets, in some cases with NYSDFS approval, although there can be no assurance that these strategies will be available or adequate to meet liquidity requirements.
- Uncertainty of the timing and amount of cash inflows from dividends paid by MBIA's principal operating subsidiaries. Refer to the "Capital Resources-Insurance Statutory Capital" section for a discussion on our insurance subsidiaries' dividend restrictions.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

LIQUIDITY (continued)

Because most of MBIA Inc.'s assets are pledged against the obligations described above, the widening of credit spreads would have an adverse impact on the market value of these assets and increase collateralization requirements for the portfolio. The following table presents the estimated pre-tax change in the aggregate fair value of the asset/liability products business' assets as of June 30, 2013 from instantaneous shifts in credit spread curves. This table assumes that all credit spreads move by the same amount; however, it is more likely that the actual changes in credit spreads will vary by investment sector and individual security. The table presents hypothetical increases and decreases in credit spreads of 50 and 200 basis points. Because downward movements of these amounts in some cases would result in negative spreads, a floor was assumed for minimum spreads.

In millions	Change in Credit Spreads (Asset/Liability Products Business)			
	200 Basis Point	50 Basis Point	50 Basis Point	200 Basis Point
	Decrease	Decrease	Increase	Increase
Estimated change in fair value	\$ 97	\$ 32	\$ (30)	\$ (109)

During the second quarter of 2013, MBIA Inc. maintained three intercompany financing facilities to provide it with additional resources to meet its liquidity requirements within the asset/liability products business: the Asset Swap, the MBIA Insurance Corporation Secured Loan and the Conduit Repurchase Agreement. The MBIA Insurance Corporation Secured Loan expired in May of 2013. Refer to the preceding "Key Lending Agreements" section for a description of these facilities.

We believe that asset sales undertaken to date have reduced volatility in MBIA Inc.'s portfolio in the event of stressed market conditions. However, stressed credit market conditions could cause MBIA Inc. to have insufficient resources to cover collateral and/or other liquidity requirements. Management has identified certain actions to mitigate this risk. These contingent actions include: (1) accessing the capital markets; (2) additional sales of invested assets exposed to credit spread stress risk, which may occur at losses and increase MBIA Inc.'s net debt; (3) termination and settlement of interest rate swap agreements; and (4) other available advances from subsidiaries. These actions, if taken, are expected to result in either additional liquidity or reduced exposure to adverse credit spread movements. There can be no assurance that these actions will be sufficient to fully mitigate this risk. In the event that we cannot implement the contingent actions identified above to raise liquidity, we may have insufficient assets to make all payments on our obligations as they come due, which could result in a default by MBIA Inc. on its obligations and the potential for MBIA Corp., as guarantor of the investment agreements and GFL MTNs, to be called upon to satisfy obligations on those instruments as they come due. In addition, the Company expects that MBIA Inc. will generate sufficient cash to satisfy its net debt and its general corporate needs over time from distributions from its operating subsidiaries and by raising third-party capital, although there can be no assurance that such factors will generate sufficient cash to satisfy its net debt.

As of June 30, 2013, the liquidity position of MBIA Inc., which consists of the liquidity positions of its corporate and asset/liability products activities, was \$327 million and comprised cash and liquid assets of \$278 million available for general corporate liquidity purposes, excluding the amounts held in escrow under its tax sharing agreement, and \$49 million not pledged directly as collateral for its asset/liability products activities. As of December 31, 2012, MBIA Inc. had \$239 million of cash and liquid assets comprising \$170 million available for general corporate liquidity purposes, excluding the amounts held in escrow under its tax sharing agreement, and \$69 million not pledged directly as collateral for its asset/liability products activities. We believe this liquidity position provides MBIA Inc. with sufficient funds to cover expected obligations at least through the next twelve months.

MBIA Corp. Liquidity

Liquidity available in the structured finance and international insurance segment is affected by our ability to collect on recoveries associated with loss payments, the payment of claims on insured exposures, payments made to commute insured exposures, the repayment of outstanding borrowings, a reduction in investment income, any unanticipated expenses, or the impairment or a significant decline in the fair value of invested assets. We may also experience liquidity constraints as a result of NYIL requirements that we maintain specified, high quality assets to back our reserves and surplus.

We believe the current liquidity position of MBIA Corp. is adequate to make expected future claim payments. MBIA Corp.'s liquidity position has been substantially strengthened as a result of the BofA Settlement Agreement, including the elimination of potential claims on the Bank of America/Merrill Lynch CMBS exposures and the execution of the Blue Ridge Secured Loan entered into in May of 2013. The liquidity position of MBIA Corp. has been stressed due to ongoing payments on second-lien RMBS exposures, payments on its remaining CMBS exposures and the payments to counterparties in consideration for the commutation of insured transactions, which have resulted in a substantial reduction of exposure and potential loss volatility. While MBIA Corp. has made and may in the future make payments to counterparties in consideration for the commutation of insured transactions, MBIA Corp.'s ability to commute insured transactions will depend on management's assessment of available liquidity or ability to secure other sources of financing. Depending on the amounts of claims on policies issued by MBIA Corp., MBIA Corp. may not have sufficient liquid assets to pay such claims when due.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**LIQUIDITY (continued)**

Payment requirements for the structured finance and international financial guarantee contracts fall into three categories: (i) timely interest and ultimate principal; (ii) ultimate principal only at final maturity; and (iii) payments upon settlement of individual collateral losses as they occur after any deductible or subordination has been exhausted, which payments are unscheduled and therefore more difficult to predict, and which category applies to most of the transactions on which we have recorded loss reserves. Insured transactions that require payment in full of the principal insured at maturity could present liquidity risks for MBIA Corp. since payment of the principal is due at maturity but any salvage could be recovered over time after payment of the principal amount. MBIA Corp. has insured transactions with substantial principal amounts due at maturity that are scheduled to mature in the near term. MBIA Corp. expects the transactions to be repaid on or prior to the maturity date. MBIA Corp. is generally required to satisfy claims within one to three business days, and as a result seeks to identify potential claims in advance through our monitoring process. While our financial guarantee policies generally cannot be accelerated, thereby helping to mitigate liquidity risk, the insurance of CDS contracts may, in certain circumstances, including the occurrence of certain insolvency or payment defaults under the CDS contracts, be subject to termination by the counterparty, triggering a claim for the fair value of the contract. In order to monitor liquidity risk and maintain appropriate liquidity resources, we use the same methodology as we use to monitor credit quality and losses within our insured portfolio, including stress scenarios. Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" in the Notes to Consolidated Financial Statements for a discussion of our loss process.

Our structured finance and international insurance segment also requires cash for the payment of operating expenses, as well as principal and interest related to its surplus notes. Pursuant to Section 1307 of the NYIL and the Fiscal Agency Agreement governing MBIA Corp.'s surplus notes, any payment on the notes may be made only with the prior approval of the Superintendent of the NYSDFS "whenever, in his judgment, the financial condition of [MBIA Corp.] warrants" and payment may be made only out of MBIA Corp.'s "free and divisible surplus". If these conditions are not met, MBIA Corp. is not be permitted to make any applicable interest payment and no default or event of default would occur under the Fiscal Agency Agreement or any of the Company's other agreements. From the January 15, 2013 interest payment to the present, MBIA Corp.'s requests for approval of the note interest payments have been denied by the NYSDFS. In accordance with the terms of the Fiscal Agency Agreement, MBIA Corp. is required to provide, and has provided, notice to the Fiscal Agent that it has not made these scheduled interest payments. The deferred interest payments will become due on the first business day on or after which MBIA Corp. obtains approval to make such payments. No interest will accrue on the deferred interest. There can be no assurance that the NYSDFS will approve these or any subsequent interest payments, or that it will approve any principal payments at maturity or any optional redemption payment that MBIA Corp. may seek to make.

Since the fourth quarter of 2007 through June 30, 2013, MBIA Corp. has made \$13.5 billion of cash payments, before reinsurance and collections and excluding LAE (including payments made to debt holders of consolidated VIEs), associated with second-lien RMBS securitizations and with commutations and claim payments primarily relating to CDS contracts. These cash payments include loss payments of \$987 million made on behalf of MBIA Corp.'s consolidated VIEs. Of the \$13.5 billion, MBIA Corp. has paid \$6.9 billion of gross claims (before reinsurance and collections and excluding LAE) on policies insuring second-lien RMBS securitizations, driven primarily by an extensive number of ineligible mortgage loans being placed in the securitizations in breach of the representations and warranties of the sellers/servicers. In addition, MBIA Corp. has paid \$6.6 billion of gross settlement and claim payments (before reinsurance and collections and excluding LAE) on insured credit derivatives. Also, since the fourth quarter of 2007 through June 30, 2013, MBIA Corp. has collected \$209 million of excess spread before reinsurance.

MBIA Corp. is seeking to enforce its rights to have mortgage sellers/servicers cure, replace or repurchase ineligible mortgage loans from securitizations and has recorded a total of \$1.1 billion of related expected recoveries on our consolidated balance sheets as of June 30, 2013, including expected recoveries recorded in our consolidated VIEs. To date, the Company has resolved or agreed to resolve substantially all of its claims related to ineligible loans, with the exception to those loans securitized by Credit Suisse Securities (USA) LLC, as discussed more fully in "Note 14: Commitments and Contingencies" in the Notes to Consolidated Financial Statements. However, there can be no assurance that we will be successful or that we will not be delayed in realizing these recoveries. Such risks are contemplated in the scenarios we utilize to calculate these recoveries, which are recognized on our consolidated balance sheets. We collected our put-back claim against Bank of America in May of 2013, which substantially reduced our remaining consolidated expected recoveries. In May of 2013, MBIA Insurance Corporation also consented to a plan to resolve its claims against ResCap and certain of its affiliates. We anticipate that we will receive an initial distribution of funds from ResCap in late 2013, which will further substantially reduce our remaining consolidated expected recoveries. The plan is subject to bankruptcy court approval. This anticipated timeline may change in the course of events in the bankruptcy court plan confirmation process. Furthermore, there can be no assurance that the plan will ultimately be approved in its current form, or that MBIA will receive its expected recoveries. Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" in the Notes to Consolidated Financial Statements for a discussion of the ResCap agreement.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)**LIQUIDITY (continued)**

A portion of the commutation payments made since the fourth quarter of 2011 were financed through the National Secured Loan, which was paid in full and extinguished in May of 2013 in connection with the BofA Settlement Agreement and the settlement of Flagstar Bank's put-back obligation. Future commutation payments may be financed through draws on the Blue Ridge Secured Loan. MBIA Insurance Corporation's ability to repay the Blue Ridge Secured Loan and any accrued interest will be largely dependent on MBIA Corp.'s ability to collect on its future receivables, including its ability to successfully enforce its rights to have the mortgage sellers/servicers cure, replace or repurchase ineligible mortgage loans from insured securitizations.

MBIA Corp. also insures third-party holders of our asset/liability products segment's obligations. If we were unable to meet payment or collateral requirements associated with these obligations, the holders thereof could make claims under the MBIA Corp. insurance policies. In 2008, to provide additional liquidity to the asset/liability products business, MBIA Corp. lent \$2.0 billion to the segment on a secured basis under the MBIA Insurance Corporation Secured Loan. In May 2012, the NYSDFS approved the maturity extension of the MBIA Insurance Corporation Secured Loan facility to May 2013 with a maximum outstanding amount of \$450 million. This loan facility expired on May 3, 2013.

As of June 30, 2013, MBIA Corp. held cash and available-for-sale investments of \$854 million, of which \$92 million comprised cash and highly liquid assets. In connection with the BofA Settlement Agreement, MBIA Corp., entered into the Blue Ridge Secured Loan, which provides MBIA Corp. with an additional maximum amount of \$500 million in liquidity. The Blue Ridge Secured Loan remained undrawn as of June 30, 2013. As of December 31, 2012, MBIA Corp. held cash and available-for-sale investments of \$1.3 billion, of which \$345 million comprised cash and highly liquid assets. We believe that MBIA Corp.'s liquidity resources, including expected cash inflows, will adequately provide for anticipated cash outflows. Depending on the amount of actual claims on the policies issued by MBIA Corp., including claims on insured exposures that in some cases may require large bullet payments, MBIA Corp. may not have sufficient liquid assets to pay such claims. In the event of unexpected liquidity requirements, we may have insufficient resources to meet our obligations or insufficient qualifying assets to support our surplus and reserves, and may seek to increase our cash holdings position by drawing on the Blue Ridge Secured Loan or raising external capital, and there can be no assurance that we will be able to draw on these additional sources of liquidity.

National Liquidity

Despite continued adverse macroeconomic conditions in the U.S., the incidence of default among U.S. public finance issuers remains extremely low and we believe that the liquidity position of our U.S. public finance insurance segment is sufficient to meet cash requirements in the ordinary course of business.

Liquidity risk arises in our U.S. public finance insurance segment primarily from the following:

- The insurance policies issued or reinsured by National, the entity from which we conduct our U.S. public finance insurance business, provide unconditional and irrevocable guarantees of payments of the principal of, and interest or other amounts owing on, insured obligations when due or, in the event that the insurance company has the right, at its discretion, to accelerate insured obligations upon default or otherwise, upon the insurance company's election to accelerate. In the event of a default in payment of principal, interest or other insured amounts by an issuer, National generally promises to make funds available in the insured amount within one to three business days following notification. In some cases, the amount due can be substantial, particularly if the default occurs on a transaction to which National has a large notional exposure or on a transaction structured with large, bullet-type principal maturities. The fact that the U.S. public finance insurance segment's financial guarantee contracts generally cannot be accelerated by a party other than the insurer helps to mitigate liquidity risk in this segment.
- National has entered into certain intercompany transactions to support the liquidity needs of its affiliates. One of these transactions includes the Asset Swap through which National exchanges liquid assets with MBIA Inc. As a result of this transaction, National is subject to repayment risk, which may adversely affect its liquidity. In addition, changes in the market value of securities sold to National under its Asset Swap with the asset/liability products business may adversely affect its liquidity position if MBIA Inc. were unable to pledge additional eligible assets in order to meet minimum required collateral amounts.

National held cash and short-term investments of \$1.9 billion as of June 30, 2013, which was highly liquid and consisted predominantly of highly rated municipal, U.S. agency and corporate bonds. As of December 31, 2012, National held cash and short-term investments of \$470 million, of which \$419 million was highly liquid and consisted predominantly of highly rated municipal, U.S. agency and corporate bonds.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

LIQUIDITY (continued)

Consolidated Cash Flows

Information about our consolidated cash flows by category is presented on our consolidated statements of cash flows. The following table presents a summary of our consolidated cash flows for the six months ended June 30, 2013 and 2012:

In millions	Six Months Ended June 30,		Percent Change
	2013	2012	
Net cash provided (used) by:			
Operating activities	\$ 1,171	\$ (790)	n/m
Investing activities	(253)	2,445	-110%
Financing activities	(902)	(1,874)	-52%

n/m - Percent change not meaningful.

Operating activities

Net cash provided by operating activities increased for the six months ended June 30, 2013 when compared with the same period of 2012 primarily due to an increase in financial guarantee recoveries received and a decrease in interest paid, partially offset by an increase in loss and commutation payments for insured derivative contracts.

Investing activities

Net cash used by investing activities increased for the six months ended June 30, 2013 when compared with the same period of 2012 primarily due to an increase in the purchase of short-term investments and declines in the sale and redemption of fixed-maturity securities and redemptions of held-to-maturity investments.

Financing activities

Net cash used by financing activities decreased for the six months ended June 30, 2013 when compared with the same period of 2012 primarily due to decreases in payments for the retirement of debt related to our conduit segment, payments for securities sold under agreements to repurchase and payments for drawdowns of investment agreements.

Investments

The following discussion of investments, including references to consolidated investments, excludes cash and investments reported under "Assets of consolidated variable interest entities" on our consolidated balance sheets. Cash and investments of VIEs support the repayment of VIE obligations and are not available to settle obligations of MBIA.

Total other investments at amortized cost	9	9	-%
Consolidated investments at carrying value	\$ 6,526	\$ 5,862	11%

n/m - Percent change not meaningful.

The fair value of the Company's investments is based on prices which include quoted prices in active markets and prices based on market-based inputs that are either directly or indirectly observable, as well as prices from dealers in relevant markets. Differences between fair value and amortized cost arise primarily as a result of changes in interest rates and general market credit spreads occurring after a fixed-income security is purchased, although other factors may also influence fair value, including specific credit-related changes, supply and demand forces and other market factors. When the Company holds an available-for-sale investment to maturity, any unrealized gain or loss currently recorded in accumulated other comprehensive income (loss) in the shareholders' equity section of the balance sheet is reversed. As a result, the Company would realize a value substantially equal to amortized cost. However, when investments are sold prior to maturity, the Company will realize any difference between amortized cost and the sale price of an investment as a realized gain or loss within its consolidated statements of operations.

Consolidated investments at carrying value	<u>\$ 4,671</u>		<u>\$ 574</u>		<u>\$ 10</u>		<u>\$ 411</u>		<u>\$ 860</u>		<u>\$ 6,526</u>	

As of June 30, 2013, the weighted average credit quality of the Company's available-for-sale investment portfolios, excluding short-term and other investments, as presented in the preceding table are as follows:

	Structured Finance and				
	U.S. Public	International	Advisory	Wind-down	
	Finance	Insurance	Services	Corporate	Operations
Weighted average credit quality ratings	Aa	Aa	Aa	Below investment grade	A

Insured Investments

MBIA's consolidated investment portfolio includes investments that are insured by various financial guarantee insurers ("Insured Investments"), including investments insured by MBIA Corp. and National ("Company-Insured Investments"). As of June 30, 2013, Insured Investments at fair value represented \$648 million or 10% of consolidated investments, of which \$405 million or 6% of consolidated investments were Company-Insured Investments.

As of June 30, 2013, based on the actual or estimated underlying ratings of our consolidated investment portfolio, without giving effect to financial guarantees, the weighted average rating of the consolidated investment portfolio would be in the Aa range, the weighted average rating of only the Insured Investments in the investment portfolio would be in the Baa range, and 3% of the total investment portfolio would be rated below investment grade in the Insured Investments.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

LIQUIDITY (continued)

The distribution of the Company's Insured Investments by financial guarantee insurer as of June 30, 2013 is presented in the following table:

In millions	U.S. Public Finance		Structured Finance and International		Corporate		Wind-Down Operations		Total	
	Fair Value	% of Total Investments	Fair Value	% of Total Investments	Fair Value	% of Total Investments	Fair Value	% of Total Investments	Fair Value	% of Total Investments
MBIA Corp.	\$ -	0%	\$ -	0%	\$ 110	2%	\$ 118	2%	\$ 228	4%
National	71	1%	-	0%	-	0%	106	2%	177	3%

Total	\$ 130	2%	\$ 2	0%	\$ 138	2%	\$ 378	6%	\$ 648	10%

In purchasing Insured Investments, the Company independently assesses the underlying credit quality, structure and liquidity of each investment, in addition to the creditworthiness of the insurer. Insured Investments are diverse by sector, issuer and size of holding. The Company assigns underlying ratings to its Insured Investments without giving effect to financial guarantees based on underlying ratings assigned by Moody's, or another external agency when a rating is not published by Moody's. When an external underlying rating is not available, the underlying rating is based on the Company's best estimate of the rating of such investment. A downgrade of a financial guarantee insurer will likely have an adverse effect on the fair value of investments insured by the downgraded financial guarantee insurer. If MBIA determines that declines in the fair values of Insured Investments are other-than-temporary, the Company will record a realized loss through earnings.

The underlying ratings of the Company-Insured Investments as of June 30, 2013 are reflected in the following table. Amounts represent the fair value of such investments including the benefit of the MBIA guarantee. The ratings in the following table are based on ratings from Moody's. Alternate ratings sources, such as S&P, have been used for a small percentage of securities that are not rated by Moody's.

In millions	U.S. Public Finance Insurance		Structured Finance and International Insurance		Wind-down Operations		Total
Underlying Ratings Scale							
National:							
Aa	\$ 30		\$ -		\$ 14		\$ 44
A	41		-		16		57
Baa	-		-		76		76
Total National	\$ 71		\$ -		\$ 106		\$ 177
MBIA Corp.:							
Aa	\$ -		\$ -		\$ 56		\$ 56
A	-		-		12		12
Baa	-		-		4		54
Below investment grade	-		-		106		106
Total MBIA Corp.	\$ -		\$ -		\$ 110		\$ 228
Total MBIA Insured Investments	\$ 71		\$ -		\$ 224		\$ 405

Without giving effect to the MBIA guarantee of the Company-Insured Investments in the consolidated investment portfolio, as of June 30, 2013, based on actual or estimated underlying ratings, the weighted average rating of the consolidated investment portfolio was in the Aa range, the weighted average rating of only the Company-Insured Investments was in the Baa range, and investments rated as below investment grade in the Company-Insured Investments were 3% of the total consolidated investment portfolio.

Impaired Investments

As of June 30, 2013 and December 31, 2012, we held impaired available-for-sale investments (investments for which fair value was less than amortized cost) with a fair value of \$2.9 billion and \$1.3 billion, respectively.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

LIQUIDITY (continued)

We analyze impaired investments within our investment portfolio for other-than-temporary impairments on a quarterly basis. Key factors considered when assessing other-than-temporary impairments include but are not limited to: (a) structural and economic factors among security types that represent our largest exposure to credit impairment losses; (b) the duration and severity of the unrealized losses (i.e., a decline in the market value of a security by 20% or more at the time of the review, or 5% impaired at the time of review with a fair value below amortized cost for a consecutive 12-month period); and (c) the results of various cash flow modeling techniques. Our cash flow analysis considers all sources of cash, including credit enhancement, that support the payment of amounts owed by an issuer of a security. This includes the consideration of cash expected to be provided by financial guarantors, including MBIA Corp., resulting from an actual or potential insurance policy claim. Refer to "Note 7: Investments" in the Notes to Consolidated Financial Statements for a detailed discussion about impaired investments.

Debt Obligations

Principal payments due under our debt obligations in the six months ending December 31, 2013 and each of the subsequent four years ending December 31 and thereafter are presented in the following table. The repayment of principal on our surplus notes is reflected in 2018, which is the next call date. Principal payments under investment agreements are based on expected withdrawal dates. All other principal payments are based on contractual maturity dates. During July of 2013, we redeemed \$150 million par value outstanding of MTNs issued by our conduit segment. Foreign currency denominated liabilities are presented in U.S. dollars using applicable exchange rates as of June 30, 2013, and liabilities issued at a discount reflect principal amounts due at maturity.

In millions	As of June 30, 2013

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

In general, MBIA's market risk relates to changes in the value of financial instruments that arise from adverse movements in factors such as interest rates, foreign exchange rates and credit spreads. MBIA is exposed to changes in interest rates, foreign exchange rates and credit spreads that affect the fair value of its financial instruments, namely investment securities, investment agreement liabilities, MTNs, debentures and certain derivative transactions. The Company's investment portfolio holdings are primarily U.S. dollar-denominated fixed-income securities including municipal bonds, U.S. government bonds, MBS, collateralized mortgage obligations, corporate bonds and ABS. In periods of rising and/or volatile interest rates, foreign exchange rates and credit spreads, profitability could be adversely affected should the Company have to liquidate these securities.

MBIA minimizes its exposure to interest rate risk, foreign exchange risk and credit spread movement through active portfolio management to ensure a proper mix of the types of securities held and to stagger the maturities of its fixed-income securities. In addition, the Company enters into various swap agreements that hedge the risk of loss due to interest rate and foreign currency volatility.

Interest Rate Sensitivity

Interest rate sensitivity can be estimated by projecting a hypothetical instantaneous increase or decrease in interest rates. The following table presents the estimated pre-tax change in fair value of the Company's financial instruments as of June 30, 2013 from instantaneous shifts in interest rates:

	Change in Interest Rates					
	300 Basis	200 Basis	100 Basis	100 Basis	200 Basis	300 Basis
In millions	Point Decrease	Point Decrease	Point Decrease	Point Increase	Point Increase	Point Increase
Estimated change in fair value	\$ (122)	\$ (58)	\$ (16)	\$ (7)	\$ (23)	\$ (44)

Foreign Exchange Sensitivity

Foreign exchange rate sensitivity can be estimated by projecting a hypothetical instantaneous increase or decrease in foreign exchange rates. The following table presents the estimated pre-tax change in fair value of the Company's financial instruments as of June 30, 2013 from instantaneous shifts in foreign exchange rates:

	Change in Foreign Exchange Rates			
	Dollar Weakens		Dollar Strengthens	
	20%	10%	10%	20%
In millions				
Estimated change in fair value	\$ (60)	\$ (30)	\$ 30	\$ 60

Credit Spread Sensitivity

Credit spread sensitivity can be estimated by projecting a hypothetical instantaneous increase or decrease in credit spreads. The following table presents the estimated pre-tax change in fair value of the Company's financial instruments as of June 30, 2013 from instantaneous shifts in credit spread curves. For this table it was assumed that all credit spreads move by the same amount. It is more likely that the actual changes in credit spreads will vary by security. National's investment portfolio would generally be expected to experience lower credit spread volatility than the investment portfolio of the asset/liability products segment because of higher credit quality and portfolio composition in sectors that have been less volatile historically. The table shows hypothetical increases and decreases in credit spreads of 50 and 200 basis points. Because downward movements of these amounts in some cases would result in negative spreads, a floor was assumed for minimum spreads. The changes in fair value reflect partially offsetting effects as the value of the investment portfolios generally changes in an opposite direction from the liability portfolio.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk (continued)

In millions	Change in Credit Spreads			
	200 Basis Point Decrease	50 Basis Point Decrease	50 Basis Point Increase	200 Basis Point Increase
Estimated change in fair value	\$ (61)	\$ 21	\$ (36)	\$ (140)

Credit Derivatives Sensitivity

MBIA issued insurance policies insuring payments due on structured credit derivative contracts and directly entered into credit derivative contracts, which are marked-to-market through earnings under the accounting principles for derivatives and hedging activities. All these transactions were insured by the Company's structured finance and international insurance operations. The majority of these structured CDSs related to structured finance transactions with underlying reference obligations of cash securities and CDSs referencing liabilities of corporations or of other structured finance securitizations. The asset classes of the underlying reference obligations included corporate, asset-backed, residential mortgage-backed and commercial mortgage-backed securities. These transactions were usually underwritten at or above a triple-A credit rating level. As of June 30, 2013, approximately 28% of the tranches insured by the Company were rated triple-A. Additionally, MBIA's wind-down operations entered into single-name CDSs as part of its asset management activities.

In the first six months of 2013, the Company has observed a tightening of its own credit spreads. As changes in fair value can be caused by factors unrelated to the performance of MBIA's business and credit portfolio, including general market conditions and perceptions of credit risk, as well as market use of credit derivatives for hedging purposes unrelated to the specific referenced credits in addition to events that affect particular credit derivative exposures, the application of fair value accounting will cause the Company's earnings to be more volatile than would be suggested by the underlying performance of MBIA's business operations and credit portfolio.

The following tables reflect sensitivities to changes in credit spreads, collateral prices, rating migrations, recovery rates and the Company's own credit spreads and recovery rates. Each table stands on its own and should be read independently of each other. Refer to "Note 6: Fair Value of Financial Instruments" in the Notes to Consolidated Financial Statements for further information about the Company's financial assets and liabilities that are accounted for at fair value, including valuation techniques and disclosures required by GAAP.

Sensitivity to changes in credit spreads can be estimated by projecting a hypothetical instantaneous shift in credit spread curves. The following table presents the estimated pre-tax change in fair value and the cumulative estimated net fair value of the Company's credit derivatives portfolio of instantaneous shifts in credit spreads as of June 30, 2013. In scenarios where credit spreads decreased, a floor of zero was used.

In millions	Change in Credit Spreads						
	600 Basis Point Decrease	200 Basis Point Decrease	50 Basis Point Decrease	0 Basis Point Change	50 Basis Point Increase	200 Basis Point Increase	600 Basis Point Increase
Estimated pre-tax net gains (losses)	\$ 859	\$ 331	\$ 83	\$ -	\$ (83)	\$ (333)	\$(1,032)
Estimated net fair value	\$ (789)	\$(1,317)	\$(1,565)	\$(1,648)	\$(1,731)	\$(1,981)	\$(2,680)

Actual shifts in credit spread curves will vary based on the credit quality of the underlying reference obligations. In general, within any asset class, higher credit rated reference obligations will exhibit less credit spread movement than lower credit rated reference obligations. Additionally, the degree of credit spread movement can vary significantly for different asset classes. The basis point change presented in the preceding table, however, represents a fixed basis point change in referenced obligation credit spreads across all credit quality rating categories and asset classes and, therefore, the actual impact of spread changes would vary from this presentation depending on the credit rating and distribution across asset classes, both of which will adjust over time depending on new business written and runoff of the existing portfolio.

The Company uses collateral prices as an input into the Direct Price Model for certain multi-sector insured CDOs, a sensitivity analysis below shows the estimated pre-tax change in fair value and the cumulative estimated net fair value of the Company's insured credit derivatives portfolio of a 10% and 20% change in collateral prices as of June 30, 2013.

In millions	Change in Collateral Prices (Structured Finance and International Insurance)				
	20% Increase	10% Increase	No Change	10% Decrease	20% Decrease
Estimated pre-tax net gains (losses)	\$ 6	\$ 3	\$ -	\$ (3)	\$ (6)
Estimated net fair value	\$ (1,642)	\$ (1,645)	\$ (1,648)	\$ (1,651)	\$ (1,654)

Item 3. Quantitative and Qualitative Disclosures About Market Risk (continued)

Sensitivity to changes in the collateral portfolio credit quality can be estimated by projecting a hypothetical change in rating migrations. The following table presents the estimated pre-tax change in fair value and the cumulative estimated net fair value of the Company's insured credit derivatives portfolio of a one and three notch rating change in the credit quality as of June 30, 2013. A notch represents a one step movement up or down in the credit rating.

In millions	Change in Credit Ratings (Structured Finance and International Insurance)				
	Three Notch	One Notch	No Change	One Notch	Three Notch
	Increase	Increase	No Change	Decrease	Decrease
Estimated pre-tax net gains (losses)	\$ 835	\$ 189	\$ -	\$ (208)	\$ (853)
Estimated net fair value	\$ (813)	\$ (1,459)	\$ (1,648)	\$ (1,856)	\$ (2,501)

Recovery rates on defaulted collateral are an input into the Company's valuation model. Sensitivity to changes in the recovery rate assumptions used by the Company can be estimated by projecting a hypothetical change in these assumptions. The following table presents the estimated pre-tax change in fair value and the cumulative estimated net fair value of the Company's insured credit derivatives portfolio of a 10% and 20% change in the recovery rate assumptions as of June 30, 2013.

In millions	Change in Recovery Rates (Structured Finance and International Insurance)				
	20% Increase	10% Increase	No Change	10% Decrease	20% Decrease
Estimated pre-tax net gains (losses)	\$ 174	\$ 84	\$ -	\$ (78)	\$ (151)
Estimated net fair value	\$ (1,474)	\$ (1,564)	\$ (1,648)	\$ (1,726)	\$ (1,799)

Accounting principles for fair value measurements require the Company to incorporate its own nonperformance risk in its valuation methodology. Sensitivity to changes in the Company's credit spreads can be estimated by projecting a hypothetical change in this assumption. The following table presents the estimated pre-tax change in fair value and the cumulative estimated net fair value of the Company's insured credit derivative portfolio using upfront credit spreads of 0%, an increase of 7 percentage points, and an increase of 15 percentage points. The actual upfront spread used in the valuation as of June 30, 2013 ranged from -0.06% to 13.50% based on the tenor of each transaction. The below amounts include an additional annual running credit spread of 5%.

In millions	MBIA's Upfront Credit Spread (Structured Finance and International Insurance)			
	Increase by 15			
	Percentage Points	Increase by 7 Percentage Points	No Change	Decrease to 0 Percentage Points
Estimated pre-tax net gains (losses)	\$ 312	\$ 146	\$ -	\$ (109)
Estimated net fair value	\$ (1,336)	\$ (1,502)	\$ (1,648)	\$ (1,757)

With the inclusion of the MBIA recovery rate in the calculation of nonperformance risk for the Company's insured credit derivatives portfolio, the following sensitivity table presents the estimated pre-tax change in fair value of insured credit derivatives due to changes in that recovery rate. The values shown below reflect an approximate trading range of the MBIA recovery rate.

In millions	MBIA's Recovery Rate (Structured Finance and International Insurance)		
	Decrease to 30 Percentage Points	No Change	Increase to 60 Percentage Points
Estimated pre-tax net gains (losses)	\$ 7	\$ -	\$ (6)
Estimated net fair value	\$ (1,641)	\$ (1,648)	\$ (1,654)

MBIA Corp.'s insurance of structured credit derivatives typically remain in place until the maturity of the derivative. With respect to MBIA Corp.'s insured structured credit derivatives, in the absence of credit impairments or the termination of derivatives at losses, the cumulative unrealized losses should reverse before or at maturity of the contracts. Additionally, in the event of the termination and settlement of a contract prior to maturity, any resulting gain or loss upon settlement will be recorded in our consolidated financial statements. In February 2008, the Company announced its intention not to insure credit derivatives in the future, except in transactions that are intended to reduce its overall exposure to insured derivatives.

Item 4. Controls and Procedures

As of the end of the period covered by this report, an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15(d)-15(e) under the Securities Exchange Act of 1934) was performed under the supervision and with the participation of the Company's senior management, including the Chief Executive Officer and the Chief Financial Officer. Based on that evaluation, the Company's management, including the Chief Executive Officer and the Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report. In addition, there have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter to which this report relates that have materially affected, or are likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

For a discussion of the Company's litigation and related matters, see "Note 14: Commitments and Contingencies" in the Notes to Consolidated Financial Statements of MBIA Inc. and Subsidiaries in Part I, Item 1. In the normal course of operating its businesses, MBIA Inc. may be involved in various legal proceedings. As a courtesy, the Company posts on its website under the section "Legal Proceedings," selected information and documents in reference to selected legal proceedings in which the Company is the plaintiff or the defendant. The Company will not necessarily post all documents for each proceeding and undertakes no obligation to revise or update them to reflect changes in events or expectations. The complete official court docket can be publicly accessed by contacting the clerk's office of the respective court where each litigation is pending.

Item 1A. Risk Factors

References in the risk factors to the "Company" are to MBIA Inc., together with its domestic and international subsidiaries. References to "we," "our" and "us" are to MBIA Inc. or the Company, as the context requires. Our risk factors are grouped into categories and are presented in the following order: "Insured Portfolio Loss Related Risk Factors", "Capital, Liquidity and Market Related Risk Factors", "Strategic Plan Related Risk Factors" and "General Risk Factors". Risk factors are listed in order of significance within each category. These risk factors and their order of significance supersede the risk factors discussed under "Risk Factors" in Part I, Item 1A of MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012.

Insured Portfolio Loss Related Risk Factors

Deteriorating performance of CMBS and CRE loans in our structured finance insured portfolio due to adverse developments in the CRE segment of the credit markets may materially and adversely affect our financial condition, results of operations and future business.

MBIA Corp. has insured a substantial amount of credit default swaps ("CDS") contracts that are backed by structured commercial mortgage-backed securities ("CMBS") pools and commercial real estate ("CRE") collateralized debt obligations ("CDOs"). Through June 30, 2013 we have recorded impairments and loss adjustment expense ("LAE") of \$4.0 billion (including \$399 million of impairments and LAE in the first six months of 2013) related to CMBS and CRE exposure. In addition, for the six months ended June 30, 2013, MBIA Corp. incurred \$38 million benefit of losses and LAE recorded in earnings related to CRE CDO financial guarantee insurance policies. MBIA Corp. has experienced ratings erosion in the total CMBS collateral underlying our insured static pools. Whereas approximately 18% of the total CMBS collateral underlying the pools outstanding as of June 30, 2013 was originally rated BBB and below and approximately 48% was originally rated AAA, approximately 69% of the total CMBS collateral underlying these pools as of June 30, 2013 was rated below investment grade.

Currently, we insure four static CMBS pools that were originally insured in 2006 and 2007, and in which substantially all of the underlying collateral comprised CMBS tranches originally rated BBB and lower. Total gross par outstanding on these pools was \$837 million as of June 30, 2013. Additionally, we insure two static CMBS pools, totaling \$3.0 billion of gross par outstanding as of June 30, 2013, that were originally insured in 2007, and are comprised of CMBS collateral which was originally rated A. If the economy does not continue to improve, it is possible that we will experience severe losses on these transactions, particularly if the underlying loans are unable to pay off at their expected maturity dates. During the first six months of 2013, material claims were presented on a CMBS pool transaction by a counterparty and we expect further claims on this exposure. Although we believe MBIA Corp. will have adequate resources to pay expected claims, there can be no assurance that this will be the case.

Ultimate loss rates remain uncertain, and we have recorded additional impairments on our insured CMBS portfolio every quarter since the beginning of 2010 as actual deterioration has been more than expected during that time period. It is possible that we will experience severe losses or near-term liquidity needs due to increased deterioration in our insured CMBS portfolio or our failure to commute the policies, primarily on the four static CMBS pools in which substantially all of the underlying collateral comprised CMBS tranches originally rated BBB and lower, in particular if macroeconomic stress escalates, there is a new recession, increased delinquencies, higher levels of liquidations of delinquent loans, and/or higher severities of loss upon liquidation. Furthermore, MBIA Corp.'s guarantees of structured CMBS pools generally are in the form of CDS referencing the CMBS bonds in static pooled transactions, and the same CMBS bonds may be referenced in multiple pools. Accordingly, a collateral failure on a small number of CMBS bonds may require MBIA Corp. to make payments on several insured CDS transactions. In the event MBIA Corp. fails to make these payments, MBIA Corp.'s CDS contract obligations could be accelerated, which could materially and adversely affect our financial condition and results of operations.

Table of Contents

Item 1A. Risk Factors (continued)

Continued poor performance of ineligible loans in the transactions that we insured in the residential mortgage sector and any delay or failure in collecting expected recoveries may materially and adversely affect our financial condition, results of operations and future business.

As of June 30, 2013, we recorded expected receipts of \$806 million (on a present value basis) from excess spread (the difference between interest inflows on assets and interest outflows on liabilities) in our second-lien RMBS transactions, in reimbursement of our past and future expected claims. Of this amount, \$682 million is included in "Insurance loss recoverable" and \$124 million is included in "Loss and loss adjustment expense reserves" on the Company's consolidated balance sheets. The amount of excess spread depends on future interest rates, borrower refinancing and defaults. There can be no assurance that the \$806 million will be received in its entirety or in the expected timeframe.

In addition, we continue to be exposed to risk of losses as a result of poor performance of ineligible loans included in our insured second-lien residential mortgage-backed securities ("RMBS") transactions, including transactions where we have reached settlements with the sellers/servicers but continue to insure the transaction. Furthermore, Credit Suisse continues to breach its obligations under the relevant contracts to repurchase, replace or cure ineligible mortgage loans. We believe that the inclusion of these ineligible mortgage loans has substantially contributed to the RMBS losses that the Company has incurred to date. Since the fourth quarter of 2007, MBIA Corp. has paid \$6.9 billion of claims before reinsurance and collections, excluding LAE and including \$987 million of claims made on behalf of consolidated variable interest entities ("VIEs"), on policies insuring second-lien RMBS securitizations. Losses in these transactions and in other transactions due to the inclusion of ineligible loans could continue. In sizing loss reserves relating to these transactions, we take into account expected recoveries from those sellers/servicers arising from our contractual rights of put-back of ineligible loans. As of June 30, 2013, we recorded estimated recoveries of \$1.1 billion related to insured transactions. The recovery amount is based upon a number of factors, including an assessment of the financial abilities of the sellers/servicers using external credit ratings. The impact of such factors on cash flows related to expected recoveries is incorporated into the Company's probability-weighted scenarios.

Finally, although we sought to underwrite RMBS and other structured finance transactions with levels of subordination and other credit enhancements designed to protect us from loss in the event of poor performance of the underlying assets collateralizing the securities, the misrepresentations concerning the quality of the collateral backing those transactions has rendered insufficient the original level of subordination and other credit enhancements to prevent losses. No assurance can be given that any remaining credit enhancements will prove to be adequate to protect us from incurring additional material losses.

There can be no assurance that we will be successful, or that we will not be delayed, in realizing our remaining estimated loan put-back recoveries of \$1.1 billion, or \$736 million net of reinsurance and income taxes, which is 24% of the consolidated total shareholders' equity of MBIA Inc., excluding preferred stock of subsidiary and noncontrolling interest.

As of June 30, 2013, we have recognized remaining estimated loan put-back recoveries of \$1.1 billion related to our insured transactions. As of June 30, 2013, the estimated loan put-back recoveries net of reinsurance and income taxes are \$736 million, which is 24% of the consolidated total shareholders' equity of MBIA Inc., excluding preferred stock of subsidiary and noncontrolling interest. If we fail to ultimately realize the expected recoveries, our current loss reserve estimates may not be adequate for MBIA Corp. to cover potential claims, and MBIA Corp. may have insufficient resources to meet its obligations.

To date, the Company has resolved substantially all of its claims related to ineligible loans with the exception to those loans securitized by Credit Suisse and included in the home equity mortgage trust securitization. The Company's assessment of the ineligibility of individual mortgage loans has been challenged by Credit Suisse in litigation and there is no assurance that the Company's determinations will prevail, or that the Company will be successful in collecting its estimated recoveries. Estimated recoveries may differ from realized recoveries due to the uncertainty of litigation, the cost of litigation, error in determining breach rates, counterparty credit risk, the potential for delay and other sources of uncertainty. In addition, the litigation may take several years to resolve, during which time we will be required to pay losses on the subject transaction.

We have also recorded substantial recoveries related to put-backs against two wholly-owned subsidiaries of Residential Capital, LLC ("ResCap"), GMAC Mortgage, LLC ("GMAC") and Residential Funding Company, LLC ("RFC"), whose ultimate parent company is Ally Financial Inc. ("Ally"). On May 14, 2012, ResCap, RFC and GMAC each filed for bankruptcy protection under Chapter 11 of the United States Bankruptcy Code. As of May 23, 2013, Ally, ResCap, RFC, GMAC and the Consenting Claimants (which includes the Company), among other parties, executed a term sheet and supplemental term sheet agreeing to, among other things, a settlement amount of \$796 million (based upon an estimate of estate values at the time of the agreement, which are subject to change) to be paid to the Company as part of a proposed plan to resolve claims against Ally and RFC, GMAC and ResCap. The settlement and anticipated recoveries are consistent with the put-back recoveries recorded by the Company. In June of 2013, the bankruptcy court issued a Memorandum Opinion approving the plan support agreement. The plan support agreement is now subject to voting by creditors as well as a confirmation hearing by the bankruptcy court, which is anticipated in the fall of 2013. MBIA expects an initial distribution of funds to the Company and other claimants in late 2013. This anticipated timeline may change in the course of events in the bankruptcy court plan confirmation process. Furthermore, there can be no assurance that the plan will ultimately be confirmed in its current form, or that MBIA will receive its expected recoveries.

Item 1A. Risk Factors (continued)

Continued poor performance of RMBS and ABS CDOs in our structured finance insured portfolio due to adverse developments in the residential mortgage sector and the broader economy may materially and adversely affect our financial condition, results of operations and future business.

The Company is exposed to credit risks in our portfolio that have arisen from the deterioration and continued poor performance of certain segments of the credit markets, particularly our RMBS and CDOs of asset-backed securities (“ABS”) portfolios, which has led to the deterioration in the quality of assets and the collection of cash flows from such assets within structured securities that we have guaranteed. Beginning in the second half of 2007, deterioration of the global credit markets coupled with the re-pricing of credit risk created extremely difficult market conditions and volatility in the credit markets. The concerns on the part of market participants were initially focused on the subprime segment of the United States (“U.S.”) mortgage-backed securities market and expanded to include a broad range of mortgage and asset-backed and other fixed-income securities, including those rated investment grade, the U.S. and international credit and interbank money markets generally, and a wide range of financial institutions and markets, asset classes and sectors. The deterioration in the credit markets was accompanied by a severe economic recession precipitated, in part, by the collapse of U.S. residential home prices. The U.S. economy continues to show sluggish growth in the employment, housing and financial sectors. While many segments of the global credit markets and the economy have since recovered, the performance of certain credits we insure, in particular RMBS and CDOs of ABS have deteriorated significantly since 2007 and those credits continue to perform poorly.

In the first six months of 2013, we recorded \$258 million of losses and LAE in our structured finance portfolio before the \$447 million benefit related to an increase in recoveries of ineligible mortgage loans and before the elimination of a \$69 million benefit as a result of consolidating VIEs. Furthermore, since the fourth quarter of 2007, we have recorded losses and LAE of \$1.9 billion, before the elimination of a \$98 million benefit as a result of consolidating VIEs, (including a benefit of \$189 million in the first six months of 2013 before the elimination of a \$69 million benefit as a result of consolidating VIEs) related to insured second-lien RMBS exposures. We have made \$6.9 billion of claims payments before reinsurance and collections, excluding LAE and including \$987 million of claims on behalf of consolidated VIEs. In addition, to date, we have recorded losses and LAE expense of \$392 million, before the elimination of a \$65 million expense as a result of consolidating VIEs (including a \$74 million benefit in the first six months of 2013 before the elimination of a \$26 million benefit as a result of consolidating VIEs), on the financial guarantee CDOs of ABS and could continue to experience poor performance in some of the structured finance securities we insure and losses on these portions of our insured portfolio.

Our ability to implement our risk reduction and liquidity strategies is dependent on our ability to draw on our credit facility, collect expected put-back recoveries, and obtain regulatory approvals.

In recent years key components of our strategy have included commuting volatile insured exposures, purchasing instruments issued or guaranteed by us in order to reduce future expected economic losses and managing the liquidity requirements and risk in our insured portfolios and asset/liability products segment. In order to implement this strategy, we put in place intercompany agreements that allocate liquidity resources among our entities in order to fund commutations and provide liquidity where needed. The intercompany agreements with our insurance subsidiaries have required the approval of the New York State Department of Financial Services (“NYSDFS”) and are described further under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity—Key Lending Agreements” in Part I, Item 2 of this Form 10-Q.

In addition, during the second quarter of 2013, MBIA Insurance Corporation entered into a \$500 million three-year secured revolving credit agreement with Blue Ridge Investments, L.L.C., an affiliate of Bank of America (the “Blue Ridge Secured Loan”), which is required to be prepaid with, among other things, proceeds from any put-back recoveries. MBIA Corp. expects to rely on available borrowings under the Blue Ridge Secured Loan and put-back recoveries to fund commutations and other expenses. If MBIA Corp.’s access to the Blue Ridge Secured Loan or other financing were unavailable, reduced or were to become significantly more expensive for any reason, including, without limitation, due to its inability to meet any condition in the facility, it may not have sufficient liquidity to commute volatile exposures or to meet its obligations generally. In addition, if it is unable to collect expected put-back recoveries prior to the termination of the facility and is not able to refinance the facility, it may not be able to repay its borrowings.

Our counterparties may also request as a condition to commuting their policies with us that the transaction receive approval from the NYSDFS or the United Kingdom Prudential Regulation Authority. There can be no assurance that we will be able to obtain such approvals. In the event that we do not obtain such regulatory approvals, we do not expect to be able to effect additional commutations of volatile exposures.

Item 1A. Risk Factors (continued)

Finally, if we do not obtain approvals to draw on intercompany financing, MBIA Inc. may not have sufficient assets to meet its collateral posting requirements and other liquidity needs, as described further under “Adverse developments in the credit markets may materially and adversely affect MBIA Inc.’s ability to meet liquidity needs.” Furthermore, in connection with obtaining required insurance regulatory approvals to enter into certain transactions, MBIA Inc. and its insurance subsidiaries have agreed, and may in the future agree, to comply with certain conditions, including providing notice to the NYSDFS prior to entering into transactions or taking other corporate actions (such as paying dividends when applicable statutory tests are satisfied), that would not otherwise require regulatory approval.

Loss reserve estimates and credit impairments are subject to additional uncertainties and loss reserves may not be adequate to cover potential claims.

The financial guarantees issued by our insurance companies insure the financial performance of the obligations guaranteed over an extended period of time, in some cases over 30 years, under policies that we have, in most circumstances, no right to cancel. We do not use traditional actuarial approaches to determine our loss reserves. The establishment of the appropriate level of loss reserves is an inherently uncertain process involving numerous estimates and subjective judgments by management, and therefore, there can be no assurance that actual paid claims in our insured portfolio will not exceed its loss reserves. Small changes in the assumptions underlying these estimates could significantly impact loss expectations. Additionally, we use both internal models as well as models generated by third-party consultants and customized by us to project future paid claims on our insured portfolio and establish loss reserves. Since our insured credit derivatives have similar terms, conditions, risks, and economic profiles to our financial guarantee insurance policies, we evaluate them for impairment periodically in the same way that we estimate loss and LAE for our financial guarantee policies. There can be no assurance that the future loss projections based on these models are accurate.

Losses on second-lien RMBS caused by the large number of ineligible mortgage loans included in second-lien RMBS securitizations that we insured as well as unprecedented volatility in the credit markets that began in the fourth quarter of 2007 have caused us to increase our loss projections substantially several times especially for second-lien RMBS transactions, where expected losses are significantly greater than originally projected and in many cases exceed the worst historical losses in this category. As a result, historical loss data may have limited value in predicting future second-lien RMBS losses. Moreover, in sizing loss reserves with respect to our insured transactions, we take into account expected recoveries from sellers/servicers of the transactions arising from our contractual rights of put-back of ineligible loans, and these estimated recoveries may differ from realized recoveries due to the outcome of litigation, the cost of litigation, error in determining breach rates, counterparty credit risk, the potential for delay and other sources of uncertainty. In addition, we recorded our first credit impairments related to CMBS and CRE exposure in 2010, and have increased our credit impairments on these exposures during each subsequent quarter as a result of the deterioration of our CMBS and CRE portfolio and the increased cost of commuting our exposures. While our credit impairments reflect our current estimate of ultimate losses, if the deterioration of the CRE market worsens, we could incur substantial additional losses on our CMBS and CRE portfolio in excess of these estimates.

Future deterioration in the performance of RMBS, CMBS, ABS CDOs or other obligations we insure or reinsure could lead to the establishment of additional loss reserves or impairments and further losses or reductions in income. There can be no assurance that the estimates of probable and estimable losses are accurate. Actual paid claims could exceed our estimate and could significantly exceed our loss reserves. If our loss reserves are not adequate to cover actual paid claims, our results of operations and financial condition could be materially adversely affected.

Economic conditions in the United States and the Eurozone may materially adversely affect our business and results of operations.

Our results of operations are materially affected by general economic conditions, both in the U.S. and elsewhere around the world. While the U.S. economy has consistently grown since the fourth quarter of 2009 and many segments of the global capital markets have recovered from the financial crisis that began in the second half of 2007, markets have continued to experience periods of extreme volatility, and economic activity in Europe remains weak. While we do not insure any direct European sovereign debt, our indirect European sovereign debt exposure totaled \$7.7 billion as of June 30, 2013 and included obligations of sovereign-related and sub-sovereign issuers, such as regions, departments, and sovereign-owned entities that are supported by a sovereign state, region or department. Of the \$7.7 billion of insured gross par outstanding, \$785 million, \$601 million, and \$249 million related to Spain, Portugal, and Ireland, respectively. The remaining \$6.1 billion related to the United Kingdom. A default by one or more sovereigns, or sovereign-related or sub-sovereign entities that rely on sovereign support, could have an adverse effect on our insured and investment portfolios. Moreover, budget deficits at all levels of government in the U.S., continued concerns over the availability and cost of credit for certain borrowers, austerity measures imposed by certain European governments and slowdowns in certain international economies have contributed to diminished expectations for certain parts of the global economy and certain markets going forward.

Item 1A. Risk Factors (continued)

Losses resulting from poor economic conditions and the related weak performance of RMBS (including due to the inclusion of ineligible loans in second-lien RMBS we insured), ABS CDOs and CMBS, have adversely impacted, and continue to impact our results and financial condition. In addition, recessions, increases in corporate, municipal, sovereign, sub-sovereign or consumer default rates and other general economic conditions may adversely impact the Company's prospects for future business, as well as the performance of our insured portfolios and the Company's investment portfolio. In addition, public finance obligations supported by specified revenue streams, such as revenue bonds issued by toll road authorities, municipal utilities or airport authorities, may be adversely affected by revenue declines resulting from economic recession, reduced demand, changing demographics or other factors.

Termination payments on insured credit derivatives could present a material liquidity risk.

The structured finance and international segment's financial guarantee contracts and CDS contracts generally cannot be accelerated, thereby mitigating liquidity risk. However, with respect to the insurance of CDS contracts, in certain circumstances, including the occurrence of certain insolvency or payment defaults under the CDS contracts, the CDS contracts may be subject to termination by the counterparty, triggering a claim for the fair value of the contract. In addition, credit derivative transactions are governed by International Swaps and Derivatives Association ("ISDA") documentation and operate differently from financial guarantee insurance policies. For example, the Company's control rights with respect to a reference obligation under a credit derivative may be more limited than when it issues a financial guarantee insurance policy on a direct primary basis. In addition, a credit derivative may be terminated for a breach of the ISDA documentation or other specific events, unlike financial guarantee insurance policies. If a credit derivative is terminated, the Company could be required to make a mark-to-market payment as determined under the ISDA documentation.

Servicer risk could adversely impact performance of structured finance transactions.

Structured finance obligations contain certain risks including servicer risk, which relates to problems with the transaction servicer (the entity which is responsible for collecting the cash flow from the asset pool) that could affect the servicing and performance of the underlying assets. Structural risks primarily involve bankruptcy risks, such as whether the servicer of the assets may be required to delay the remittance of any cash collections held by it or received by it after the time it becomes subject to bankruptcy or insolvency proceedings. Structured finance transactions are usually structured to reduce the risk to the investors from the bankruptcy or insolvency of the servicer. The ability of the servicer to properly service and collect on the underlying assets can contribute to the performance of a transaction. In addition, the lawsuit we have filed against Credit Suisse alleges that the servicer has failed to perform its duties as contractually required.

Some of the state and local governments and finance authorities that issue public finance obligations we insure are experiencing unprecedented fiscal stress that could result in increased credit losses or impairments on those obligations.

We have historically experienced low levels of defaults in our U.S. public finance insured portfolio, including during the financial crisis that began in mid-2007. However, many state and local governments that issue some of the obligations we insure have reported unprecedented fiscal stress that has required them to significantly raise taxes and/or cut spending in order to satisfy their obligations. While there has been some support provided by the U.S. federal government designed to provide aid to state and local governments, certain state and local governments remain under extreme financial stress. If the issuers of the obligations in our public finance portfolio are unable to raise taxes, cut spending, or receive federal assistance, we may experience losses or impairments on those obligations, which could materially and adversely affect our business, financial condition and results of operations. In particular, an increasing number of municipalities are experiencing severe financial stress and, as a consequence, more municipal issuers are considering filing for protection under Chapter 9 of the United States Bankruptcy Code. The outcome of a Chapter 9 proceeding is unpredictable and could result in impairments on a greater number of general obligation bonds and other insured transactions.

Item 1A. Risk Factors (continued)

Financial modeling contains uncertainty over ultimate outcomes, which makes it difficult to estimate liquidity, potential paid claims, loss reserves and mark-to-market.

The Company uses third-party and internal financial models to estimate liquidity, potential paid claims, loss reserves and mark-to-market. We use internal financial models to conduct liquidity stress-scenario testing to ensure that we maintain cash and liquid securities in an amount in excess of all stress scenario payment requirements. These measurements are performed on a legal entity and operating segment basis. We also rely on financial models, generated internally and supplemented by models generated by third parties, to estimate factors relating to the highly complex securities we insure, including future credit performance of the underlying assets, and to evaluate structures, rights and our potential obligations over time. We also use internal models for ongoing portfolio monitoring and to estimate case basis loss reserves and, where applicable, to mark our obligations under our contracts to market and may supplement such models with third-party models or use third-party experts to consult with our internal modeling specialists. Both internal and external models are subject to model risk and there can be no assurance that these models are accurate or comprehensive in estimating our liquidity, potential future paid claims and related loss reserves or that they are similar to methodologies employed by our competitors, counterparties or other market participants. Estimates of our future paid claims, in particular, may materially impact our liquidity position. In addition, changes to our paid claims, loss reserve or mark-to-market models have been made recently and may be warranted in the future. These changes could materially impact our financial results.

Our risk management policies and procedures may not detect or prevent future losses.

We assess our risk management policies and procedures on a periodic basis. As a result of such assessment, we may take steps to change our internal risk assessment capabilities and procedures, our portfolio management policies, systems and processes and our policies and procedures for monitoring and assessing the performance of our insured portfolio in changing market conditions. There can be no assurance, however, that these steps will be adequate to avoid future losses. In some cases, losses can be substantial, particularly if a loss occurs on a transaction in which we have a large notional exposure or on a transaction structured with large, bullet-type principal maturities.

Geopolitical conditions may adversely affect our business prospects and insured portfolio.

General global unrest, fraud, terrorism, catastrophic events, natural disasters, pandemics or similar events could disrupt the economy in the U.S. and the other countries where we have insured exposure or operate our businesses and could have a direct material adverse impact on certain industries and on general economic activity. Furthermore, in certain jurisdictions outside the U.S. we face higher risks of governmental intervention through nationalization or expropriation of assets, an inability to enforce our rights in court or otherwise and corruption, which may cause us to incur losses on the assets we insure or reputational harm. The Company has exposure in certain sectors that could suffer increased delinquencies and defaults as a direct result of these types of events. Moreover, we are exposed to correlation risk as a result of the possibility that multiple credits will experience losses as a result of any such event or series of events, in particular exposures that are backed by revenues from business and personal travel, such as aircraft securitizations and bonds backed by hotel taxes and car rental fleet securitizations. To the extent that certain corporate sectors may be vulnerable to credit deterioration and increased defaults in the event of future global unrest, CDOs backed by pools of corporate debt issuances in those stressed sectors could also be adversely impacted.

The Company's insurance operations underwrite exposures to the Company's reasonable expectation of future performance as well as at various stress levels estimating defaults and other conditions at levels higher than are reasonably expected to occur. There can be no assurance, however, that the Company will not incur material losses if the economic stress and increased defaults in certain sectors caused by global unrest, fraud, terrorism, catastrophic events, natural disasters, pandemics or similar events in the future is or will be more severe than the Company currently foresees and had assumed in underwriting its exposures and estimating loss reserves.

Capital, Liquidity and Market Related Risk Factors

Continuing elevated loss payments and ongoing delays in our ability to realize expected recoveries on insured RMBS transactions as well as certain other factors may materially and adversely affect MBIA Corp.'s ability to meet liquidity needs, which could in turn have an adverse impact on the Company.

As an insurance company MBIA Corp. is particularly sensitive to liquidity risk, which is the probability that an enterprise will not have sufficient resources to meet contractual payment obligations when due. Management of liquidity risk is of critical importance to financial services companies, and most failures of financial institutions have occurred in large part due to their inability to maintain sufficient liquidity resources under adverse circumstances. Generally, lack of sufficient resources results from an enterprise's inability to sell assets at values necessary to satisfy payment obligations, the inability to access new capital and/or an unexpected acceleration of payments required to settle liabilities.

Item 1A. Risk Factors (continued)

The effects of the credit crisis which began in the subprime segment of the U.S. mortgage-backed securities market and spread to a wide range of financial institutions and markets, asset classes, sectors and countries, have caused the Company to experience material increased liquidity risk pressures. In particular, since the fourth quarter of 2007, MBIA Corp. has paid \$6.9 billion of claims before reinsurance and collections, excluding LAE and including \$987 million of claims made on behalf of consolidated VIEs, on policies insuring second-lien RMBS securitizations, which we believe were driven by a substantial number of ineligible mortgage loans being placed in the securitizations in breach of the representations and warranties of the sellers/servicers. Furthermore, since the fourth quarter of 2007, total credit impairments on insured derivatives were estimated at \$6.0 billion across 73 CDO insured issues, inclusive of 70 insured issues for which we made settlement and claim payments of \$5.7 billion, net of reinsurance and collections. Accordingly, we expect to realize additional net losses of \$283 million. If current trends worsen and result in substantial defaults and losses on the underlying loans, we could incur substantial additional losses on our insured exposures in the future. In addition, portions of MBIA Corp.'s outstanding insured portfolio have exhibited high degrees of payment volatility and continue to pose material liquidity risk to MBIA Corp.

Management's expected liquidity and capital forecasts for MBIA Corp. for 2013 reflect adequate resources to pay expected claims. In addition, MBIA Corp. can borrow under the Blue Ridge Secured Loan and use its expected recoveries from the ResCap agreement to pay claims. However, there is risk to the liquidity forecast as the Company's second-lien RMBS and remaining insured CMBS pools are potentially volatile. There are risks to the capital forecast due to those potential liabilities, potential volatility in the collection of put-back recoverables and potential volatility associated with remaining ABS CDO exposures. Further, the remaining insured portfolio, aside from these exposures, could deteriorate and result in loss reserves and claim payments. While management believes MBIA Corp. will have adequate resources to pay expected claims, if it experiences higher than expected claims payments or is unable to commute exposures that represent substantial risk to the Company, it may ultimately have insufficient resources to continue paying claims, which could cause the NYSDFS to put MBIA Insurance Corporation into a rehabilitation or liquidation proceeding. An MBIA Insurance Corporation proceeding could accelerate certain of the Company's other obligations and have other adverse consequences.

Adverse developments in the credit markets may materially and adversely affect MBIA Inc.'s ability to meet liquidity needs.

MBIA Inc. is subject to material liquidity risks and uncertainty. To mitigate these risks, we seek to maintain cash and liquidity resources that we believe will be sufficient to make all payments due on our obligations and to meet other financial requirements, such as posting collateral, at least through the next twelve months.

Liquidity risk to MBIA Inc. is primarily a result of the following factors:

- Currently, the majority of the cash and securities of MBIA Inc. is pledged against investment agreement liabilities, intercompany financing arrangements and derivatives, which limit its ability to raise liquidity through asset sales. A significant portion of MBIA Inc.'s assets that are pledged against intercompany financing arrangement liabilities are structured finance securities which have been particularly susceptible to price fluctuations during periods of market volatility. In addition, if the market value or rating eligibility of the assets which are pledged against MBIA Inc.'s obligations were to decline, we would be required to pledge additional eligible assets in order to meet minimum required collateral amounts against these liabilities. In such event, we may sell additional assets, potentially with substantial losses, finance unencumbered assets through intercompany facilities, or use free cash or other assets, in some cases with NYSDFS approval, although there can be no assurance that these strategies will be available or adequate to meet liquidity requirements.
- The timing and amount of cash inflows from dividends paid by MBIA's principal operating subsidiaries is uncertain. See "Our holding company structure and certain regulatory and other constraints could affect our ability to pay dividends and make other payments" below.

Stressed credit market conditions could cause MBIA Inc. to have insufficient resources to cover collateral and/or other liquidity requirements. Management has identified certain actions to mitigate this risk. These contingent actions include: (1) accessing the capital markets, which may not be open to us on favorable terms, or at all; (2) additional sales of invested assets exposed to credit spread stress risk, which may occur at losses and increase the deficit of invested assets to liabilities; (3) termination and settlement of interest rate swap agreements; and (4) other available advances from subsidiaries. These actions, if taken, are expected to result in either additional liquidity or reduced exposure to adverse credit spread movements. There can be no assurance that these actions will be sufficient to fully mitigate this risk. In the event that we cannot implement the contingent actions identified above to raise liquidity, or eliminate the deficit, we may have insufficient assets to make all payments on our obligations as they come due, which could result in a default by MBIA Inc. on its obligations and the potential for MBIA Corp., as guarantor of the investment agreements and MBIA Global Funding, LLC medium-term notes ("MTNs"), to be called upon to satisfy obligations on those instruments as they come due.

Item 1A. Risk Factors (continued)***An inability to access capital could adversely affect our business, operating results and financial condition and ultimately adversely affect liquidity.***

The Company's access to external sources of financing, as well as the cost of such financing, is dependent on various factors, including (i) the long-term debt ratings of the Company, (ii) the insurance financial strength ratings and long-term business prospects of our insurance companies, (iii) the perceptions of the financial strength of our insurance companies and MBIA Inc. and (iv) the outcome of our undertakings to collect recoveries in connection with ineligible mortgage loans in our insured RMBS securitizations. Our debt ratings are influenced by numerous factors, either in absolute terms or relative to our peer group, such as financial leverage, balance sheet strength, capital structure and earnings trends. If we cannot obtain adequate capital on favorable terms or at all, our business, future growth, operating results and financial condition could be adversely affected. While MBIA Corp. currently maintains a credit facility, there can be no assurance that replacement facilities will be available in the future on favorable terms or at all. Refer to "Our ability to implement our risk reduction and liquidity strategies is dependent on our ability to draw on our credit facility, collect expected put-back recoveries, and obtain regulatory approvals" above. The inability to obtain adequate replacement capital on favorable terms or at all could have an adverse impact on the Company's business and financial condition.

To the extent that we are unable to access capital, our insurance companies may not have sufficient liquidity to meet their obligations, will have less capacity to write business and may not be able to pay dividends to us without experiencing adverse rating agency action. Accordingly, our inability to maintain access to capital on favorable terms could have an adverse impact on our ability to pay losses and debt obligations, to pay dividends on our capital stock, to pay principal and interest on our indebtedness, to pay our operating expenses and to make capital investments in our subsidiaries. See "Our holding company structure and certain regulatory and other constraints could affect our ability to pay dividends and make other payments" below.

Our holding company structure and certain regulatory and other constraints could affect our ability to pay dividends and make other payments.

We are a holding company and rely to a significant degree on the operations of our principal operating subsidiaries, National, MBIA Corp. and Cutwater, and certain other smaller subsidiaries. As such, we are largely dependent on dividends or advances in the form of intercompany loans from our insurance companies to pay dividends, to the extent payable, on our capital stock, to pay principal and interest on our indebtedness and to make capital investments in our subsidiaries, among other items. Our insurance companies are subject to various statutory and regulatory restrictions, applicable to insurance companies generally, that limit the amount of cash dividends, loans and advances that those subsidiaries may pay to us. Other regulations relating to capital requirements affecting some of our other subsidiaries may also restrict their ability to pay dividends and other distributions and make loans to us.

Under New York law, National and MBIA Corp. may generally pay stockholder dividends only out of statutory earned surplus and subject to additional limits, as described in "Business—Insurance Regulation" in Part I, Item 1 and "Note 14: Insurance Regulations and Dividends" in the Notes to Consolidated Financial Statements of MBIA Inc. and Subsidiaries in Part II, Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2012. In connection with MBIA Insurance Corporation obtaining approval from the NYSDFS to release excessive contingency reserves as of September 30, 2011, December 31, 2011 and March 31, 2012, MBIA Insurance Corporation agreed that it would not pay any dividends without prior approval from the NYSDFS. Due to its significant negative earned surplus, MBIA Insurance Corporation has not had the statutory capacity to pay dividends since December 31, 2009 and is not expected to have any statutory capacity to pay any dividends in the near term. While National had dividend capacity as of June 30, 2013, in connection with the approval of the December 31, 2011 MBIA Insurance Corporation contingency reserve release, the Company has agreed that National would not pay dividends without the prior approval of the NYSDFS prior to July 19, 2013. In addition, as a condition to the NYSDFS's approval of the asset swap between MBIA Inc. and National, the NYSDFS requested that, until the notional amount of the Asset Swap has been reduced to 5% or less of National's admitted assets, each of MBIA Inc., MBIA Insurance Corporation and National provide the NYSDFS with three months prior notice, or such shorter period as the NYSDFS may permit, of its intent to initiate cash dividends on shares of its common stock. National has provided the NYSDFS with such notice, and intends to pay a dividend during the fourth quarter of 2013 following the expiration of the three month notice period, or at such earlier time as the NYSDFS may permit, although there can be no assurance that National will ultimately make this payment.

Dividend payments by MBIA UK and MBIA Mexico to MBIA Insurance Corporation are also limited by laws and regulatory consideration in their respective jurisdictions. The inability of our insurance companies to pay dividends in an amount sufficient to enable us to meet our cash requirements at the holding company level could affect our ability to repay our debt and have a material adverse effect on our operations.

Item 1A. Risk Factors (continued)

MBIA Inc. has long-term debt, MTNs, investment agreements and derivative liabilities in excess of its cash, investments at amortized cost and tax receivables.

As of June 30, 2013 and December 31, 2012, the combined net debt of MBIA Inc.'s corporate segment and asset/liability products segment, which primarily comprised long-term debt, MTNs, investment agreements and derivative liabilities net of cash and investments at amortized cost and a tax receivable from subsidiaries, totaled \$1.3 billion and \$1.2 billion, respectively. The Company expects that MBIA Inc. will generate sufficient cash to satisfy its net debt over time from distributions from its operating subsidiaries and by raising third-party capital, although there can be no assurance that such factors will generate sufficient cash to satisfy its net debt.

We have substantial indebtedness and may incur substantial additional indebtedness, which could adversely affect our financial health and our ability to obtain financing in the future, react to changes in our business and satisfy our obligations.

As of June 30, 2013, we had \$1.5 billion of consolidated long-term debt, \$1.6 billion of consolidated medium-term note liabilities and \$775 million of consolidated investment agreement liabilities. Our substantial indebtedness and other liabilities could have material consequences, including:

- our ability to obtain additional financing for working capital, capital expenditures, acquisitions, debt service requirements or general corporate purposes and our ability to satisfy our obligations with respect to our debt may be impaired in the future;
- a large portion of MBIA Inc.'s financial resources must be dedicated to the payment of principal and interest on our debt, thereby reducing the funds available to us for other purposes;
- it may be more difficult for us to satisfy our obligations to our creditors, resulting in possible defaults on, and acceleration of, such debt;
- we may be more vulnerable to general adverse economic and industry conditions;
- our ability to refinance debt may be limited or the associated costs may increase;
- our flexibility to adjust to changing market conditions could be limited, or we may be prevented from carrying out capital spending that is necessary or important to our growth strategy and efforts to improve operating margins of our businesses; and
- we are exposed to the risk of fluctuations in interest rates and foreign currency exchange rates because a portion of our liabilities are at variable rates of interest or denominated in foreign currencies.

If our insurance companies fail to meet regulatory capital requirements they may become subject to regulatory action.

Our insurance companies are subject to various statutory and regulatory restrictions that require them to maintain qualifying investments to support their reserves and minimum surplus. Furthermore, our insurance companies may be restricted from making commutation or other payments if doing so would cause them to fail to meet such requirements, and the NYSDFS may impose other remedial actions on us as described further below to the extent the Company does not meet such requirements. While National currently satisfies its statutory capital requirements, as of June 30, 2013, MBIA Corp. had a deficit of \$322 million of qualifying assets required to support its contingency reserves. The deficit was caused by MBIA Corp.'s sale of liquid assets in order to make claim payments and the failure of certain RMBS sellers/servicers to honor their contractual obligations to repurchase ineligible mortgage loans from securitizations the Company insured. The deficit is expected to grow due to additional commutation and claim payments until such time as MBIA Corp. collects additional put-back recoveries. The Company has reported the deficit to the NYSDFS. MBIA Corp. has requested approval from the NYSDFS to release an aggregate of \$322 million of contingency reserves, which was disapproved by the NYSDFS. Prior to September 30, 2012, MBIA Corp. released to surplus an aggregate of \$1.1 billion of contingency reserves pursuant to approvals granted by the NYSDFS in accordance with the New York Insurance Law during 2011 and 2012. Absent these releases MBIA Corp. would have had deficits of qualifying assets to meet its contingency reserve requirements.

Additionally, under New York law, the Superintendent of the NYSDFS may apply for an order directing the rehabilitation or liquidation of a domestic insurance company under certain circumstances, including upon the insolvency of the company, if the company has willfully violated its charter or New York law or if the company is found, after examination, to be in such condition that further transaction of business would be hazardous to its policyholders, creditors or the public. The Superintendent of the NYSDFS may also suspend an insurer's license, restrict its license authority, or limit the amount of premiums written in New York if, after a hearing, the Superintendent of the NYSDFS determines that the insurer's surplus to policyholders is not adequate in relation to its outstanding liabilities or financial needs. If the Superintendent of the NYSDFS were to take any such action with respect to National or MBIA Insurance Corporation, it would likely result in the reduction or elimination of the payment of dividends to MBIA Inc.

Item 1A. Risk Factors (continued)***Changes in interest rates and foreign currency exchange rates could adversely affect our financial condition and future business.***

Increases in prevailing interest rate levels can adversely affect the value of MBIA's investment portfolio and, therefore, our financial condition. In the event that investments must be sold in order to make payments on insured exposures or other liabilities, including the liabilities of our asset/liability products segment, such investments would likely be sold at discounted prices. Lower interest rates can also result in lower net interest income since a substantial portion of assets are now held in cash and cash equivalents given the increased focus on liquidity. Additionally, in the insurance operations, increasing interest rates could lead to increased credit stress on transactions in our insured portfolio, while a decline in interest rates could result in larger loss reserves on a present value basis.

While we are not currently writing a meaningful amount of new financial guarantee insurance, we expect to do so in the future. Prevailing interest rate levels can affect demand for financial guarantee insurance. Lower interest rates are typically accompanied by narrower spreads between insured and uninsured obligations. The purchase of insurance during periods of relatively narrower interest rate spreads will generally provide lower cost savings to the issuer than during periods of relatively wider spreads. These lower cost savings could be accompanied by a corresponding decrease in demand for financial guarantee insurance. Increased interest rates may decrease attractiveness for issuers to enter into capital markets transactions, resulting in a corresponding decreasing demand for financial guarantee insurance in the future.

In addition, the Company is exposed to foreign currency exchange rate fluctuation risk in respect of assets and liabilities denominated in currencies other than U.S. dollars. In addition to insured liabilities denominated in foreign currencies, some of the remaining liabilities of our asset/liability management business are denominated in currencies other than U.S. dollars and the assets of our asset/liability management business are generally denominated in U.S. dollars. Accordingly, the weakening of the U.S. dollar versus foreign currencies could substantially increase our potential obligations and statutory capital exposure. Conversely, the Company regularly makes investments denominated in a foreign currency, in particular as part of a remediation strategy or as an economic hedge against potential future loss payments, and the weakening of the foreign currency versus the U.S. dollar will diminish the value of such non-U.S. dollar denominated asset. Exchange rates have fluctuated significantly in recent periods and may continue to do so in the future, which could adversely impact the Company's financial position, results of operations and cash flows.

Revenues and liquidity would be adversely impacted by a decline in realization of installment premiums.

Due to the installment nature of a significant percentage of its premium income, MBIA Corp. has an embedded future revenue stream. The amount of installment premiums actually realized by MBIA Corp. could be reduced in the future due to factors such as not insuring new transactions, early termination of insurance contracts, accelerated prepayments of underlying obligations, commutation of existing financial guarantee insurance policies or non-payment. Such a reduction would result in lower revenues and reduced liquidity.

We are required to report credit derivatives at fair value, which subjects our results of operations to volatility and losses and could lead to negative shareholders' equity for the Company or MBIA Corp. on a GAAP basis.

Any event causing credit spreads on an underlying security referenced in a credit derivative we insure, or on a credit derivative referencing an MBIA Inc. security, to either widen or tighten will affect the fair value of the credit derivative and may increase the volatility of our earnings.

Since changes in fair value can be caused by factors unrelated to the performance of our business and structured finance credit portfolio, including general market conditions and perceptions of credit risk, as well as market use of credit derivatives for hedging purposes unrelated to the specific referenced credits in addition to events that affect particular credit derivative exposure, the application of fair value accounting may cause our earnings to be more volatile than would be suggested by the underlying performance of our business operations and structured finance credit portfolio. Furthermore, volatility in our asset values, loss reserves, impairments or fair value of insured credit derivatives could cause our shareholders' equity, and/or that of MBIA Corp., to be negative under accounting principles generally accepted in the United States of America ("GAAP") basis in a future period, which may adversely impact investors' perceptions of the value of the Company.

The global re-pricing of credit risk that began in the fourth quarter of 2007 caused unprecedented volatility and markdowns in the valuation of these credit derivatives. In addition, due to the complexity of fair value accounting and the application of the accounting guidance for derivative instruments and the accounting guidance for fair value measurement, future amendments or interpretations of derivative and fair value accounting may cause us to modify our accounting methodology in a manner which may have an adverse impact on our financial results. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Estimates" in Part II, Item 7 of Form 10-K for the year ended December 31, 2012 for additional information on the valuation of derivatives.

Item 1A. Risk Factors (continued)

Current accounting standards mandate that we measure the fair value of our insurance policies of CDS. Market prices are generally available for traded securities and market standard CDS but are less available or accurate for highly customized CDS. Most of the derivative contracts the Company insures are the latter as they are non-traded structured credit derivative transactions. Moreover, at the present time, we do not have access to the fair value estimates of the insurance beneficiaries and there can be no assurance that those counterparties' (or any other market participants') estimates would be the same as our fair values.

The mark-to-market for the insured credit derivative portfolio has fluctuated significantly during the last five years, resulting in volatility in MBIA's earnings. Since the fourth quarter of 2007, MBIA's mark-to-market on insured credit derivatives fluctuated from a high quarterly loss of \$3.6 billion in the first quarter of 2008 to a high quarterly gain of \$3.3 billion in the second quarter of 2008, and the mark-to-market caused several quarter over quarter fluctuations in earnings of more than \$1 billion and frequent quarter over quarter shifts in earnings from a gain to a loss or a loss to a gain. The mark-to-market volatility was primarily a result of fluctuations in MBIA's credit spreads and recovery rates, changes in credit spreads on the underlying collateral, collateral erosion, rating migration and model and input enhancements.

Strategic Plan Related Risk Factors

An inability to achieve high stable insurer financial strength ratings for National or any of our other insurance companies from the major rating agencies or to generate investor demand for their financial guarantees may adversely affect our results of operations and business prospects.

National's and our other insurance companies' ability to write new business and to compete with other financial guarantors is currently largely dependent on the financial strength ratings assigned to them by the major rating agencies and the financial enhancement rating also assigned by Standard & Poor's Financial Services LLC ("S&P"), as well as the financial strength of our insurance companies and investors' perceptions of their financial strength. As a result of the loss of our insurance companies' triple-A financial strength ratings and limited business opportunities available to National at its current ratings levels, among other factors, we are currently not originating new financial guarantee business. Many requirements imposed by the rating agencies in order for our insurance companies to achieve and maintain high insurer financial strength ratings are outside of our control, and such requirements may necessitate that we raise additional capital or take other remedial actions in a relatively short time frame in order to achieve or maintain the ratings necessary to attract new business and compete with other financial guarantee insurers and could make the conduct of the business uneconomical. Our inability to raise capital on favorable terms could therefore materially adversely affect the business prospects of our insurance companies. Furthermore, no assurance can be given that we will successfully comply with rating agency requirements, that these requirements or the related models and methodologies will not change or that, even if we comply with these requirements, one or more rating agency will not lower or withdraw its financial strength ratings with respect to any of our insurance companies. The absence of S&P's and Moody's Investor Service, Inc. ("Moody's") highest ratings, which have typically been required to write financial guarantee insurance, could adversely impact the premiums our insurers can charge and could diminish the acceptance of our financial guarantee insurance products.

In addition, no assurance can be given that investor demand for our guarantees will increase regardless of our ratings. Finally, our inability to come into compliance with the rating agency and regulatory single risk limits that National and MBIA Corp. exceeded may also prevent us from writing future new business in the categories of risks that were exceeded, in the case of the regulatory limits, or result in an inability to achieve or maintain our desired ratings, in the case of rating agency limits, and may adversely affect our business prospects, and our failure to come into compliance with these guidelines and rules increases the risk of experiencing a large single loss or series of losses.

Downgrades of the ratings of securities that we insure may materially adversely affect our business, results of operations and financial condition.

Individual credits in our insured portfolio (including potential new credits) are assessed a rating agency "capital charge" based on a variety of factors, including the nature of the credits' risk types, underlying ratings, tenor and expected and actual performance. In the event of an actual or perceived deterioration in creditworthiness, a reduction in the underlying rating or a change in the rating agency capital methodology, we may be required to hold more capital in reserve against credits in the insured portfolio, regardless of whether losses actually occur, or against potential new business. Significant reductions in underlying ratings of credits in an insured portfolio can produce significant increases in assessed "capital charges". There can be no assurance that each of our insurance company's capital position will be adequate to meet any increased rating agency reserve requirements or that each insurance company will be able to secure additional capital necessary to support increased reserve requirements, especially at a time of actual or perceived deterioration in creditworthiness of new or existing credits. Unless we were able to increase available capital, an increase in capital charges could reduce the amount of capital available to support our ratings and could have an adverse effect on our ability to write new business.

Item 1A. Risk Factors (continued)

Since 2008, Moody's and S&P announced the downgrade of, or other negative ratings actions with respect to, certain transactions that we insure, as well as a large number of structured finance transactions that serve as collateral in structured finance transactions that we insure. There can be no assurance that additional securities in our insured portfolio will not be reviewed and downgraded in the future. Moreover, we do not know if, and when, the rating agencies might review additional securities in our insured portfolio or review again securities that have already been reviewed and/or downgraded. Downgrades of credits that we insure will result in higher capital charges to that insurance company under the relevant rating agency model or models, which could adversely affect our results of operations and financial condition going forward.

Competition may have an adverse effect on our businesses.

Our financial guarantee insurers face competition from other financial guarantee insurance companies and other forms of credit enhancement, including senior-subordinated structures, credit derivatives, letters of credit and guarantees (for example, mortgage guarantees where pools of mortgage loans secure debt service payments) provided by banks and other financial institutions. In addition, alternative financing structures may be developed that do not employ third-party credit enhancement. Furthermore, while one financial guarantee insurance company has written the vast majority of U.S. public finance new business since 2009, an additional recently established bond insurer is actively engaged in the market, and we have observed other new competitors indicating an interest in entering the bond insurance market and continue to consider strategies for launch. Increased competition, either in terms of price, alternative structures, or the emergence of new providers of credit enhancement, could have an adverse effect on our insurance companies' business prospects. The uncertainty created by market conditions and the related unpredictable actions of the regulators in the U.S. and foreign markets we serve may create unforeseen competitive advantages for our competitors due to, among other things, explicit or implied support from the government.

Cutwater faces intense competition from banks, insurance companies and independent companies who provide investment advisory services, as well as with companies who manage their investments in-house. Competition varies by product and typically can range from very large asset management firms to very small operations. Cutwater's ability to compete for new advisory services business and to retain existing accounts is largely dependent on its investment performance for a specific client or in general (typically versus established benchmark indices), the consistency of performance through market cycles, fee levels charged and the level of client service provided. A decline in our competitive position as to one or more of these factors could adversely affect our profitability and assets under management. Furthermore, many of Cutwater's competitors are large and well established and some have greater market share and breadth of distribution and offer a broader range of products, services or features. In order to compete for business, Cutwater may be required to expend a significant portion of its earnings on attracting new business, which would diminish the amount of dividends it can pay to MBIA Inc. Such competition could have an adverse impact on its ability to attract and retain business, which could have an adverse effect on our financial position and results of operations.

In addition, Trifinium Advisors (UK) Limited ("Trifinium") provides financial advisory and asset management services to European clients and the Company has sought to grow this business. Trifinium is subject to competition, and expansion of this business may require expenditures of capital, and management's and employees' time and there can be no assurance that this business will ultimately be successful.

Future demand for financial guarantee insurance depends on market and other factors that we do not control.

The demand for financial guarantee insurance depends upon many factors, some of which are beyond the control of the Company. Our ability to attract and compete for financial guarantee business is largely dependent on the financial strength ratings assigned to our insurance companies by the major rating agencies. In addition, the perceived financial strength of all financial guarantee insurers also affects demand for financial guarantee insurance. Since 2008, all financial guarantee insurers' insurer financial strength ratings have been downgraded, placed on review for a possible downgrade or had their outlooks changed to "negative," and the industry-wide downgrades may have eroded investors' confidence in the benefits of bond insurance. We do not expect the demand for financial guarantee insurance to regain its former levels in the near term, if ever.

We believe that issuers and investors distinguish among financial guarantors on the basis of various factors, including rating agency assessment, capitalization, size, insured portfolio concentration and financial performance. These distinctions may result in differentials in trading levels for securities insured by particular financial guarantors which, in turn, may provide a competitive advantage to those financial guarantors with better trading characteristics. In addition, various investors may, due to regulatory or internal guidelines, lack additional capacity to purchase securities insured by certain financial guarantors, which may provide a competitive advantage to guarantors with fewer insured obligations outstanding. Differentials in trading values or investor capacity constraints that do not favor us would have an adverse effect on our ability to attract new business at appropriate pricing levels.

Item 1A. Risk Factors (continued)***Regulatory change could adversely affect our businesses, and regulations limit investors' ability to effect a takeover or business combination that shareholders might consider in their best interests.***

The financial guarantee insurance industry has historically been and will continue to be subject to the direct and indirect effects of governmental regulation, including insurance laws, securities laws, tax laws, legal precedents and accounting rules affecting asset-backed and municipal obligations, as well as changes in those laws. These laws limit investors' ability to affect a takeover or business combination without the approval of our insurance regulators, and the failure to comply with applicable laws and regulations could expose our insurance companies, their directors or shareholders to fines, the loss of their insurance licenses, and the inability to engage in certain business activity, as the case may be.

In addition, future legislative, regulatory or judicial changes could adversely affect our insurance companies' ability to pursue business, materially impacting our financial results. Since 2009, both the NYSDFS and the New York legislature have proposed enhanced regulation of financial guarantee insurers which would impose limits on the manner and amount of business written by the Company. On the U.S. federal level, we could become subject to federal oversight or enhanced capital requirements, including if we are deemed "systemically important" under the Dodd-Frank Reform and Consumer Protection Act (the "Dodd-Frank Act"). Internationally, MBIA UK could also become subject to enhanced capital requirements as a result of the Solvency II Directive.

While it is not possible to predict if new laws, regulations or interpretations will be enacted or the impact they would have, any changes to such laws and regulations or the NYSDFS's interpretation thereof could subject MBIA to further restrictions on the type of business that it is authorized to insure, especially in the structured finance area. Any such restrictions could have a material effect on the amount of premiums that MBIA earns in the future. Additionally, any changes to such laws and regulations could subject our insurance companies to increase reserving and capital requirements or more stringent regulation generally, which could materially adversely affect our financial condition, results of operations and future business. Finally, changes to accounting standards and regulations may require modifications to our accounting methodology, both prospectively and for prior periods; and such changes could have an adverse impact on our reported financial results and/or make it more difficult for investors to understand the economics of our business, and may thus influence the types or volume of business that we may choose to pursue.

Developments in the regulation of derivatives may create additional burdens on the Company.

In July 2010, the Dodd-Frank Act was signed into law for the purpose of enacting broad financial industry regulatory reform, including by enhancing regulation of the over-the-counter derivatives markets. Among other reforms, the Dodd-Frank Act requires "swap dealers" and "major swap participants" to register with either or both of the Commodity Futures Trading Commission ("CFTC") and the Securities and Exchange Commission ("SEC"), and to be subject to enhanced regulation, including capital requirements. The CFTC and SEC have promulgated rules to implement this enhanced regulatory framework, including final rules that require the Company to include its legacy insured derivatives in tests used to determine whether it is a major swap participant. MBIA Insurance Corporation registered with the CFTC as a major swap participant and on an ongoing basis is required to comply with the CFTC's business conduct rules as applied to portfolios in place prior to the enactment of the Dodd-Frank Act. As further rules are enacted, we expect to seek exemptions from certain of the rules that we do not believe we will be able to comply with, including capital requirements.

Because the CFTC has not yet issued final rules establishing capital requirements for major swap participants, the ultimate impact of such requirements on the Company is not yet clear. However, to the extent that the Company becomes subject to significant additional capital requirements, it is unlikely that the Company will be able to meet those standards.

General Risk Factors***Any impairment in the Company's future taxable income can materially affect the recoverability of our deferred tax assets.***

The basis for evaluating the recoverability of a deferred tax asset is the existence of future taxable income of appropriate character. To the extent that the Company's ability to recognize future taxable income from its existing insurance portfolio through scheduled premium earnings and net investment income becomes impaired, the recoverability of certain deferred tax assets may be materially affected by a corresponding increase to its valuation allowance.

A different view of the Internal Revenue Service from our current tax treatment of realized losses relating to insured CDS contracts can adversely affect our financial position.

As part of the Company's financial guarantee business, we have insured credit derivative contracts that were entered into by LaCrosse Financial Products, LLC with various financial institutions. We treat these insured derivative contracts as insurance contracts for statutory accounting purposes, which is the basis for computing U.S. federal taxable income. As such, the realized losses in connection with an insured event are considered loss reserve activities for tax purposes. Because the federal income tax treatment of CDS contracts is an unsettled area of tax law, in the event that the Internal Revenue Service has a different view with respect to the tax treatment, our results of operations and financial condition could be materially adversely affected.

Table of Contents

Item 1A. Risk Factors (continued)

Private litigation claims could materially adversely affect our reputation, business, results of operations and financial condition.

As further set forth in “Note 14: Commitments and Contingencies” in the Notes to Consolidated Financial Statements of MBIA Inc. and Subsidiaries in Part I, Item 1 of this Form 10-Q, the Company is named as a defendant in certain litigations. In the ordinary course of business, the Company and its subsidiaries may be defendants in or parties to pending and threatened legal actions and proceedings brought on behalf of various classes of claimants, including counterparties in various transactions. Although the Company intends to vigorously defend against the aforementioned actions and against other potential actions, an adverse ultimate outcome in these actions could result in a loss and have a material adverse effect on our reputation, business, results of operations or financial condition.

Ownership Change under Section 382 of the Internal Revenue Code can have adverse tax consequences.

In connection with transactions in our shares from time to time, we may in the future experience an “ownership change” within the meaning of Section 382 of the Internal Revenue Code. In general terms, an ownership change may result from transactions increasing the aggregate ownership of certain stockholders in our stock by more than 50 percentage points over a testing period (generally three years). If an ownership change were to occur, our ability to use certain tax attributes, including certain losses, credits, deductions or tax basis, may be limited. Calculating whether a Section 382 ownership change has occurred is subject to uncertainties, including the complexity and ambiguity of Section 382 and limitations on a publicly traded company’s knowledge as to the ownership of, and transactions in, its securities. The Company performs detailed calculations during each quarter to determine if an ownership change has occurred and, based on the Company’s current methodology of calculation, a Section 382 ownership change has not taken place.

Interruption in telecommunication, information technology and other operational systems, or a failure to maintain the security, confidentiality or privacy of sensitive data residing on such systems, could harm our business.

We depend heavily on our telecommunication, information technology and other operational systems and on the integrity and timeliness of data we use to run our businesses. These systems may fail to operate properly or become disabled as a result of events or circumstances wholly or partly beyond our control. Further, we face the risk of operational and technology failures by others, including various financial intermediaries and of vendors and parties to which we outsource the provision of services or business operations. If these parties do not perform as anticipated, we may experience operational difficulties, increased costs and other adverse effects on our business.

Despite our implementation of a variety of security measures, our information technology and other systems could be subject to physical or electronic break-ins, unauthorized tampering or other security breaches, resulting in a failure to maintain the security, confidentiality or privacy of sensitive data, including personal information relating to clients or transaction counterparties.

Interruption in telecommunication, information technology and other operational systems, or a failure to maintain the security, confidentiality or privacy of sensitive data residing on such systems, whether due to actions by us or others, could delay or disrupt our ability to do business, harm our reputation, subject us to regulatory sanctions and other claims, lead to a loss of clients and revenues and otherwise adversely affect our business.

The Company is dependent on key executives and the loss of any of these executives, or its inability to retain other key personnel, could adversely affect its business.

The Company’s success substantially depends upon its ability to attract and retain qualified employees and upon the ability of its senior management and other key employees to implement its business strategy. The Company believes there are only a limited number of available qualified executives in the business lines in which the Company competes. Although the Company is not aware of any planned departures, the Company relies substantially upon the services of Joseph W. Brown, Chief Executive Officer, and other senior executives. There is no assurance that the Company will be able to retain the services of key executives. The loss of the services of any of these individuals or other key members of the Company’s management team could adversely affect the implementation of its business strategy.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In connection with the Bank of America Settlement Agreement described in “Note 1: Business Developments and Risks and Uncertainties” in the Notes to Consolidated Financial Statements, on May 6, 2013, MBIA Inc. issued Blue Ridge Investments, L.L.C., a subsidiary of Bank of America, a warrant to purchase 9,942,458 million shares of MBIA Inc. common stock at an exercise price of \$9.59 per share. The warrants were issued in reliance on an exemption from registration under Section 4(a)(2) under the 1933 Act as transactions by an issuer not involving any public offering.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds (continued)

Pursuant to the anti-dilution provisions of warrants that were issued by MBIA Inc. to Warburg Pincus Private Equity X, L.P. and certain of its affiliates ("Warburg Pincus") under the Investment Agreement by and between MBIA Inc. and Warburg Pincus, dated as of December 10, 2007, as amended and restated as of February 6, 2008, (the "Investment Agreement"), as a result of the issuance of the warrant to Bank of America (a) Warburg Pincus's 21,327,646 warrants exercisable at \$30.25 per share were revised to 21,914,446 warrants exercisable at \$29.44 per share and (b) Warburg Pincus's 4,000,000 of warrants exercisable at \$16.20 per share were revised to 4,004,945 warrants exercisable at \$16.18 per share. In addition, under the Investment Agreement Warburg has certain gross up rights that are triggered in connection with the offering by the Company of any equity securities. As a settlement of any such gross-up rights Warburg Pincus may have had under the Investment Agreement due to the issuance of the warrant to Bank of America, on August 5, 2013 MBIA Inc. issued Warburg Pincus a warrant to purchase 1,910,417 shares of MBIA Inc. common stock at an exercise price of \$9.59 per share in exchange for Warburg Pincus delivering to the Company 536,375 shares of MBIA Inc. common stock having a value of \$7,262,518 based on the closing price of the Company's stock as of the close of business on July 23, 2013. The warrants issued pursuant to the anti-dilution adjustments and the gross-up rights were issued in reliance on an exemption from registration under Section 4(a)(2) under the 1933 Act as transactions by an issuer not involving any public offering.

The table below presents repurchases made by the Company in each month during the second quarter of 2013:

Month	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as	Maximum Amount That May Be Purchased
			Part of Publicly Announced Plan	Under the Plan (in millions) ⁽²⁾
April	339	\$ 10.55	-	\$ 23
May	12,369	15.73	-	23
June	328	13.62	-	23
	13,036	\$ 15.54	-	\$ 23

(1) - 13,036 shares were purchased in open market transactions as an investment in the Company's non-qualified deferred compensation plan.

(2) - On February 1, 2007, the Company's Board of Directors authorized the repurchase of common stock up to \$1 billion under a new share repurchase program, which superseded the previously authorized program.

Item 5. Other Information

The information contained in Part II, Item 2, "Unregistered Sales of Equity Securities and Use of Proceeds" in this Quarterly Report on Form 10-Q concerning the issuance of a five-year warrant to Warburg Pincus to purchase 1.9 million shares of MBIA common stock at a price of \$9.59 per share is hereby incorporated herein by reference.

Issue Date: August 5, 2013

1. Definitions. Unless the context otherwise requires, when used herein the following terms shall have the meanings indicated.

"*Affiliate*" means, with respect to any Person, any Person directly or indirectly controlling, controlled by or under common control with, such other person. For purposes of this definition, "control" (including, with correlative meanings, the terms "controlled by" and "under common control with") when used with respect to any Person, means the possession, directly or indirectly, of the power to cause the direction of management or policies of such person, whether through the ownership of voting securities by contract or otherwise.

"*Applicable Price*" means the greater of the Market Price per share of outstanding Common Stock on (i) the date on which the Company issues or sells any Common Stock other than Excluded Stock or (ii) the first date of the announcement of such issuance or sale.

"*Appraisal Procedure*" means a procedure whereby two independent appraisers, one chosen by the Company and one by the Warranholder (or if there is more than one Warranholder, a majority in interest of Warranholders), shall mutually agree upon the determinations then the subject of appraisal. Each party shall deliver a notice to the other appointing its appraiser within fifteen (15) days after the Appraisal Procedure is invoked. If within thirty (30) days after appointment of the two appraisers they are unable to agree upon the amount in question, a third independent appraiser shall be chosen within ten (10) days thereafter by the mutual consent of such first two appraisers or, if such first two appraisers fail to agree upon the appointment of a third appraiser, such appointment shall be made by the American Arbitration Association, or any organization successor thereto, from a panel of arbitrators having experience in the appraisal of the subject matter to be appraised. The decision of the third appraiser so appointed and chosen shall be given within thirty (30) days after the selection of such third appraiser. If three appraisers shall be appointed and the determination of one appraiser is disparate from the middle determination by more than twice the amount by which the other determination is disparate from the middle determination, then the determination of such appraiser shall be excluded, the remaining two determinations shall be averaged and such average shall be binding and conclusive on the Company and the Warranholder; otherwise, the average of all three determinations shall be binding and conclusive on the Company and the Warranholder. The costs of conducting any

Appraisal Procedure shall be borne by the Warrantholder requesting such Appraisal Procedure, except (A) the fees and expenses of the appraiser appointed by the Company and any other costs incurred by the Company shall be borne by the Company and (B) if such Appraisal Procedure shall result in a determination that is disparate by 5% or more from the Company's initial determination, all costs of conducting such Appraisal Procedure shall be borne by the Company.

" *Beneficially Own*," " *Beneficial Owner* " and " *Beneficial Ownership* " are defined in Rules 13d-3 and 13d-5 of the Exchange Act.

" *Board* " means the Board of Directors of the Company.

" *Business Combination* " means a merger, consolidation, statutory share exchange or similar transaction that requires adoption by the Company's stockholders.

" *Business Day* " means any day except Saturday, Sunday and any day that shall be a legal holiday or a day on which banking institutions in the State of New York generally are authorized or required by law or other governmental actions to close.

" *Capital Stock* " means (A) with respect to any Person that is a corporation or company, any and all shares, interests, participations or other equivalents (however designated) of capital or capital stock of such Person and (B) with respect to any Person that is not a corporation or company, any and all partnership or other equity interests of such Person.

" *Change of Control* " means, with respect to the Company, the occurrence of any one of the following events:

- (A) the Incumbent Directors cease for any reason to constitute at least a majority of the Board; *provided* , that any person becoming a director subsequent to the date of the Investment Agreement whose election or nomination for election was approved by a vote of at least two-thirds of the Incumbent Directors then on the Board (either by a specific vote or by approval of the proxy statement of the relevant party in which such person is named as a nominee for director, without written objection to such nomination) shall be an Incumbent Director (except that no individuals who were not directors at the time any agreement or understanding with respect to any Business Combination or contested election is reached shall be treated as Incumbent Directors for the purposes of clause (C) below with respect to such Business Combination or this paragraph in the case of a contested election);
- (B) any Person (other than the Investor and its Affiliates) is or becomes a Beneficial Owner, directly or indirectly, of 50% of the aggregate voting power of the Voting Securities; *provided* , *however* , that the event described in this clause (B) will not be deemed a Change of Control by virtue of any holdings or acquisitions: (i) by the Company or any of its Subsidiaries, (ii) by any employee benefit plan (or related trust) sponsored or maintained by the Company or any of its subsidiaries; *provided* , that such holdings or acquisitions by any such plan (other than any plan maintained under Section 401(k) of the Internal Revenue Code of 1986, as amended) do not exceed 50% of the then outstanding Voting Securities, (iii) by any underwriter temporarily holding securities pursuant to an offering of such securities or (iv) pursuant to a Non-Qualifying Transaction;

- (C) a Business Combination, to the extent it is not a Non-Qualifying Transaction;
- (D) the consummation of a Transfer;
- (C) a plan of liquidation or dissolution of the Company;
- (D) a De-Listing; or
- (E) a sale of all or substantially all of the Company's assets.

"*Common Stock*" means the Company's common stock, par value \$1.00 per share, and any Capital Stock for or into which such Common Stock hereafter is exchanged, converted, reclassified or recapitalized by the Company or pursuant to an agreement or Business Combination to which the Company is a party.

"*Company*" means MBIA Inc., a Connecticut corporation.

"*De-Listing*" means the voluntary de-listing of the Common Stock from the New York Stock Exchange or the NASDAQ Stock Market other than in connection with a listing of the Common Stock on a national securities exchange.

"*Exchange Act*" means the Securities Exchange Act of 1934, as amended, or any successor statute, and the rules and regulations promulgated thereunder.

"*Excluded Stock*" means (A) shares of Common Stock issued by the Company as a stock dividend payable in shares of Common Stock, or upon any subdivision or split-up of the outstanding shares of Capital Stock in each case which is subject to Section 13(B), or upon conversion of shares of Capital Stock (but not the issuance of such Capital Stock which will be subject to the provisions of Section 13(A)) and (B) shares of Common Stock to be issued to employees, consultants and advisors of the Company pursuant to options granted prior to the date of issuance of this Warrant and pursuant to options granted after the date of issuance of this Warrant if the exercise price per share of Common Stock on the date of such grant equals or exceeds the Market Price of a share of Common Stock on the date of such grant.

"*Exercise Price*" has the meaning given to it in Section 2.

"*Existing Warrants*" means (a) the warrants issued to Warburg Pincus Private Equity X, L.P. ("*Warburg*") and its affiliates pursuant to (i) that certain Warrant Agreement, dated as of January 30, 2008, between the Company and Warburg, (ii) that certain B Warrant Agreement, dated as of January 30, 2008, between the Company and Warburg, (iii) that certain B2 Warrant Agreement, dated as of January 30, 2008, between the Company and Warburg, and (iv) that certain B2 Warrant Agreement, dated as of January 30, 2008, between the Company and Warburg Pincus X Partners, L.P. and (b) the warrant issued to Blue Ridge Investments, L.L.C. pursuant to that certain Investment Agreement, dated as of May 6, 2013, between the Company and Blue Ridge Investments, L.L.C.

"*Expiration Time*" has the meaning given to it in Section 3.

"*Governmental Entities*" means any governmental or regulatory federal, state, local and foreign authorities, agencies, courts, commissions or other entities, including stock exchanges and other self-regulatory organizations.

"Group" means a group as contemplated by Section 13(d)(3) of the Exchange Act.

"Incumbent Directors" means individuals who on the date of the Investment Agreement constitute the Board and any other individuals deemed to be Incumbent Directors as set forth in clause (A) of the definition of "Change of Control" above.

"Investment Agreement" means the Investment and Settlement Agreement and Waiver and Release, of even date herewith, between the Company, the Investor and, solely for purposes of Section 1.3 thereof, Warburg Pincus X Partners, L.P., including all schedules and exhibits thereto.

"Investor" means Warburg Pincus Private Equity X, L.P.

"Market Price" means, with respect to a particular security, on any given day, the last reported sale price regular way or, in case no such reported sale takes place on such day, the average of the last closing bid and ask prices regular way, in either case on the principal national securities exchange on which the applicable securities are listed or admitted to trading, or if not listed or admitted to trading on any national securities exchange, (A) the closing sale price for such day reported by the Nasdaq Stock Market if such security is traded over-the-counter and quoted in the Nasdaq Stock Market, or (B) if such security is so traded, but not so quoted, the average of the closing reported bid and ask prices of such security as reported by the Nasdaq Stock Market or any comparable system, or (C) if such security is not listed on the Nasdaq Stock Market or any comparable system, the average of the closing bid and ask prices as furnished by two members of the National Association of Securities Dealers, Inc. selected from time to time by the Company for that purpose. If such security is not listed and traded in a manner that the quotations referred to above are available for the period required hereunder, the Market Price per share of Common Stock shall be deemed to be the fair value per share of such security as determined in good faith by the Board of Directors of the Company.

"National" means National Public Finance Guarantee Corporation.

"Non-Qualifying Transaction" means any Business Combination that satisfies all of the following criteria: (A) more than 50% of the total voting power of the surviving corporation resulting from a Business Combination, or, if applicable, the ultimate parent corporation that directly or indirectly has beneficial ownership of 100% of the voting securities eligible to elect directors of the surviving corporation, is represented by Voting Securities that were outstanding immediately before such Business Combination (or, if applicable, is represented by shares into which such Voting Securities were converted pursuant to such Business Combination) and (B) at least a majority of the members of the board of directors of the parent corporation (or, if there is no parent corporation, the surviving corporation) following the consummation of the Business Combination were Incumbent Directors at the time the Company's Board approved the execution of the initial agreement providing for such Business Combination.

"Person" has the meaning given to it in Section 3(a)(9) of the Exchange Act and as used in Sections 13(d)(3) and 14(d)(2) of the Exchange Act.

"Preliminary Control Event" means, with respect to the Company, the earlier of (i) the execution of definitive documentation for a transaction that, if consummated, would result in a Change of Control, (ii) the recommendation that stockholders tender in response to a tender or exchange offer, that, if consummated, would result in a Change of Control upon consummation, (iii) the filing of a registration statement with the Securities and Exchange Commission in respect of a Transfer, (iv) the making of a public disclosure of a decision by the Company to consummate a Transfer, (v) the public announcement by the Company that it intends to effect a De-Listing, and (v) the actual consummation of a Change of Control.

" *Securities* " means Common Stock, the Warrants and any other securities (including shares of Common Stock into which any of the foregoing are converted, exchanged or exercised in accordance with the terms hereof).

" *Securities Act* " means the Securities Act of 1933, as amended, or any successor statute, and the rules and regulations promulgated thereunder.

" *Shares* " is defined in Section 2.

"*Transfer*" means the transfer, distribution (by dividend, exchange or any other means) or disposition, in one transaction or a series of related transactions, to the Company's stockholders or to any Person or Group of 50% or more of the Capital Stock or consolidated assets of (i) National or (ii) a Subsidiary or Subsidiaries of the Company that own, directly or indirectly, 50% or more of the consolidated assets of the Company.

" *Subsidiary* " of a Person means those corporations, banks, savings banks, associations and other Persons of which such Person owns or controls 51% or more of the outstanding equity securities either directly or through an unbroken chain of entities, as to each of which 51% or more of the outstanding equity securities is owned directly or indirectly by its parent; *provided, however*, that there shall not be included any such entity to the extent that the equity securities of such entity were acquired in satisfaction of a debt previously contracted in good faith or are owned or controlled in a *bona fide* fiduciary capacity.

" *Voting Securities* " means the Company's then outstanding securities eligible to vote for the election of directors.

" *Warrantholder* " has the meaning given to it in Section 2.

" *Warrants* " means this Warrant, issued to the Investor pursuant to the Investment Agreement.

2. Number of Shares; Exercise Price. This certifies that, for value received, Investor, its affiliates or its registered assigns (the " *Warrantholder* ") is entitled, upon the terms and subject to the conditions hereinafter set forth, to acquire from the Company, in whole or in part, up to an aggregate of 1,910,417 fully paid and nonassessable shares of Common Stock, par value \$1.00 per share (the " *Shares* "), of the Company, at a purchase price of \$9.59 per Share (the " *Exercise Price* "). The number of Shares and the Exercise Price are subject to adjustment as provided herein, and all references to "Shares," "Common Stock" and "Exercise Price" herein shall be deemed to include any such adjustment or series of adjustments.
3. Exercise of Warrant; Term. To the extent permitted by applicable laws and regulations, including but not limited to the insurance laws of the State of New York, the right to purchase the Shares represented by this Warrant are exercisable, in whole or in part by the Warrantholder, at any time or from time to time after 9:00 a.m., New York City time, on the date hereof, but in no event later than 11:59 p.m., New York City time, on the fifth anniversary of the date of issuance of the Warrant (the " *Expiration Time* "), by (A) the surrender of this Warrant and delivery of the Notice of Exercise annexed hereto, duly completed and executed on behalf of the Warrantholder, to the Company via e-mail or to the office of the Company in Armonk, New York (or such other office or agency of the Company in the United States as it may designate by notice in writing (including

by e-mail) to the Warrantholder at the address of the Warrantholder appearing on the books of the Company), and (B) payment of the Exercise Price for the Shares thereby purchased by having the Company withhold shares of Common Stock issuable upon exercise of the Warrant equal in value to the aggregate Exercise Price as to which this Warrant is so exercised based on the Market Price of the Common Stock on the trading day prior to the date on which the last of this Warrant and the Notice of Exercise is delivered to the Company. If the Warrantholder does not exercise this Warrant in its entirety, the Warrantholder will be entitled to receive from the Company within a reasonable time, and in any event not exceeding three (3) Business Days, a new warrant in substantially identical form for the purchase of that number of Shares equal to the difference between the number of Shares subject to this Warrant and the number of Shares as to which this Warrant is so exercised.

4. Issuance of Shares; Authorization; Listing. Certificates for Shares (or book entry shares) issued upon exercise of this Warrant will be issued in such name or names as the Warrantholder may designate and will be delivered to such named Person or Persons within a reasonable time, not to exceed three (3) Business Days after the date on which this Warrant has been duly exercised in accordance with the terms of this Warrant, subject to prior or simultaneous surrender of this Warrant at the Company's office designated in accordance with Section 3. The Company hereby represents and warrants that any Shares issued upon the exercise of this Warrant in accordance with the provisions of Section 3 will, upon such exercise, be duly and validly authorized and issued, fully paid and nonassessable and free from all taxes, liens and charges (other than liens or charges created by the Warrantholder or taxes in respect of any transfer occurring contemporaneously therewith). The Company agrees that the Shares so issued will be deemed to have been issued to the Warrantholder as of the close of business on the date on which the last of this Warrant and payment of the Exercise Price is delivered to the Company in accordance with the terms of this Warrant, notwithstanding that the stock transfer books of the Company may then be closed or certificates representing such Shares may not be actually delivered on such date. The Company will at all times reserve and keep available, out of its authorized but unissued Common Stock, solely for the purpose of providing for the exercise of this Warrant, the aggregate number of shares of Common Stock issuable upon exercise of this Warrant; provided that nothing in this Section 4 shall preclude the Company from satisfying its obligations in respect of the exercise of this Warrant by delivery of shares of Common Stock that are held in the treasury of the Company. The Company will (i) procure, at its sole expense, the listing of the Shares and other securities issuable upon exercise of this Warrant, including but not limited to those Shares issuable pursuant to Section 13 of this Warrant, subject to issuance or notice of issuance on all stock exchanges on which the Common Stock are then listed or traded and (ii) maintain the listing of such Shares after issuance for so long as the Common Stock is listed on such stock exchanges. The Company will use commercially reasonable efforts to ensure that the Shares may be issued without violation of any applicable law or regulation or of any requirement of any securities exchange on which the Shares are listed or traded.
5. No Fractional Shares or Scrip. No fractional Shares or scrip representing fractional Shares shall be issued upon any exercise of this Warrant. In lieu of any fractional Share to which the Warrantholder would otherwise be entitled, the Warrantholder shall be entitled to receive a cash payment equal to the Market Price of the Common Stock less the Exercise Price for such fractional share.
6. No Rights as Shareholders; Transfer Books. This Warrant does not entitle the Warrantholder to any voting rights or other rights as a shareholder of the Company prior to the date of exercise hereof. The Company will at no time close its transfer books against transfer of this Warrant in any manner which interferes with the timely exercise of this Warrant.

-
7. Charges, Taxes and Expenses. Issuance of certificates for Shares to the Warrantholder upon the exercise of this Warrant shall be made without charge to the Warrantholder for any issue or transfer tax or other incidental expense in respect of the issuance of such certificates, all of which taxes and expenses shall be paid by the Company.
 8. Transfer/Assignment.
 - (A) Without obtaining the consent of the Company to assign or transfer this Warrant, from and after the earlier of (x) the six-month anniversary of the issuance of this Warrant and (y) the consummation by the Company of a registered public offering of equity or equity linked Securities of the Company (other than Excluded Stock), this Warrant and all rights hereunder shall be transferable, in whole or in part, upon the books of the Company by the registered holder hereof in person or by duly authorized attorney, and a new warrant shall be made and delivered by the Company, of the same tenor and date as this Warrant but registered in the name of the transferee, upon surrender of this Warrant, duly endorsed, to the office or agency of the Company described in Section 2. All expenses (other than stock transfer taxes, if any) and other charges payable in connection with the preparation, execution and delivery of the new warrants pursuant to this Section 8 shall be paid by the Company.
 - (B) Notwithstanding anything herein to the contrary, nothing shall prevent any hedging transactions by the Warrantholder or its transferees.
 9. Exchange and Registry of Warrant. This Warrant is exchangeable, upon the surrender hereof by the Warrantholder to the Company, for a new warrant or warrants of like tenor and representing the right to purchase the same aggregate number of Shares. The Company shall maintain a registry showing the name and address of the Warrantholder as the registered holder of this Warrant. This Warrant may be surrendered for exchange or exercise, in accordance with its terms, at the office of the Company, and the Company shall be entitled to rely in all respects, prior to written notice to the contrary, upon such registry.
 10. Loss, Theft, Destruction or Mutilation of Warrant. Upon receipt by the Company of evidence reasonably satisfactory to it of the loss, theft, destruction or mutilation of this Warrant, and in the case of any such loss, theft or destruction, upon receipt of an indemnity or security reasonably satisfactory to the Company, or, in the case of any such mutilation, upon surrender and cancellation of this Warrant, the Company shall make and deliver, in lieu of such lost, stolen, destroyed or mutilated Warrant, a new Warrant of like tenor and representing the right to purchase the same aggregate number of Shares as provided for in such lost, stolen, destroyed or mutilated Warrant.
 11. Saturdays, Sundays, Holidays, etc. If the last or appointed day for the taking of any action or the expiration of any right required or granted herein shall not be a Business Day, then such action may be taken or such right may be exercised on the next succeeding day that is a Business Day.
 12. Rule 144 Information. The Company covenants that it will use its commercially reasonable efforts to timely file all reports and other documents required to be filed by it under the Securities Act and the Exchange Act and the rules and regulations promulgated by the U.S. Securities and Exchange Commission thereunder (or, if the Company is not required to file such reports, it will, upon the request of any Warrantholder, make publicly available such information as necessary to permit sales pursuant to Rule 144), and it will use commercially reasonable efforts to take such further action as any Warrantholder may reasonably request, all to the extent required from time

to time to enable such holder to sell the Warrants without registration under the Securities Act within the limitation of the exemptions provided by (i) Rule 144 under the Securities Act, as such Rule may be amended from time to time, or (ii) any similar rule or regulation hereafter adopted by the Securities and Exchange Commission. Upon the written request of any Warrantholder, the Company will deliver to such Warrantholder a written statement that it has complied with such requirements.

13. Adjustments and Other Rights. The Exercise Price and the number of Shares issuable upon exercise of this Warrant shall be subject to adjustment from time to time as follows; *provided*, that no single event shall be subject to adjustment under more than one subsection of this Section 13 so as to result in duplication:
- (A) Common Stock Issued at Less than the Applicable Price. If the Company issues or sells any Common Stock other than Excluded Stock for consideration per share less than 85% of the Applicable Price, then the Exercise Price in effect immediately prior to each such issuance or sale will immediately (except as provided below) be reduced to the price determined by multiplying the Exercise Price in effect immediately prior to such issuance or sale by a fraction, (x) the numerator of which shall be (1) the number of shares of Common Stock outstanding immediately prior to such issuance or sale plus (2) the number of shares of Common Stock which the aggregate consideration received by the Company for the total number of such additional shares of Common Stock so issued or sold would purchase at the Applicable Price, and (y) the denominator of which shall be the number of shares of Common Stock outstanding immediately after such issuance or sale. In such event, the number of shares of Common Stock issuable upon the exercise of this Warrant shall be increased to the number obtained by dividing (x) the product of (1) the number of Shares issuable upon the exercise of this Warrant before such adjustment and (2) the Exercise Price in effect immediately prior to the issuance or sale giving rise to this adjustment, by (y) the new Exercise Price determined in accordance with the immediately preceding sentence. For the avoidance of doubt, no adjustment of the Exercise Price or the number of Shares issuable upon exercise of this Warrant shall be made pursuant to this Section 13(A) in connection with any change in the number of shares of Common Stock deliverable upon exercise of any Existing Warrant that results from the anti-dilution provisions of such Existing Warrant. For the purposes of any adjustment of the Exercise Price and the number of Shares issuable upon exercise of this Warrant pursuant to this Section 13(A), the following provisions shall be applicable, *provided*, *however*, no increase in the Exercise Price or reduction in the number of Shares issuable upon exercise of this Warrant shall be made pursuant to subclauses (i) or (ii) of this Section 13(A):
- (i) In the case of the issuance or sale of Common Stock for cash, the amount of the consideration received by the Company shall be deemed to be the amount of the gross cash proceeds received by the Company for such Common Stock before deducting therefrom any discounts or commissions allowed, paid or incurred by the Company for any underwriting or otherwise in connection with the issuance and sale thereof.
 - (ii) In the case of the issuance or sale of Common Stock (otherwise than upon the conversion of shares of Capital Stock or other securities of the Company) for a consideration in whole or in part other than cash, including securities acquired in exchange therefor (other than securities by their terms so exchangeable), the consideration other than cash shall be deemed to be the fair value thereof as

determined by the Board, before deducting therefrom any discounts or commissions allowed, paid or incurred by the Company for any underwriting or otherwise in connection with the issuance and sale thereof, *provided, however*, that such per share fair value as determined by the Board shall not exceed the Applicable Price.

(iii) In the case of the issuance of (1) options, warrants or other rights to purchase or acquire Common Stock (whether or not at the time exercisable) or (2) securities by their terms convertible into or exchangeable for Common Stock (whether or not at the time so convertible or exchangeable) or options, warrants or rights to purchase such convertible or exchangeable securities (whether or not at the time exercisable):

- (1) The aggregate maximum number of shares of Common Stock deliverable upon exercise of such options, warrants or other rights to purchase or acquire Common Stock shall be deemed to have been issued at the time such options, warrants or rights are issued and for a consideration equal to the consideration (determined in the manner provided in Section 13(A)(i) and (ii)), if any, received by the Company upon the issuance or sale of such options, warrants or rights plus the minimum purchase price provided in such options, warrants or rights for the Common Stock covered thereby.
- (2) The aggregate maximum number of shares of Common Stock deliverable upon conversion of or in exchange for any such convertible or exchangeable securities, or upon the exercise of options, warrants or other rights to purchase or acquire such convertible or exchangeable securities and the subsequent conversion or exchange thereof, shall be deemed to have been issued at the time such securities were issued or such options, warrants or rights were issued and for a consideration equal to the consideration, if any, received by the Company for any such securities and related options, warrants or rights (excluding any cash received on account of accrued interest or accrued dividends), plus the additional consideration (in each case, determined in the manner provided in Section 13(A)(i) and (ii)), if any, to be received by the Company upon the conversion or exchange of such securities, or upon the exercise of any related options, warrants or rights to purchase or acquire such convertible or exchangeable securities and the subsequent conversion or exchange thereof.
- (3) On any change in the number of shares of Common Stock deliverable upon exercise of any such options, warrants or rights or conversion or exchange of such convertible or exchangeable securities or any change in the consideration to be received by the Company upon such exercise, conversion or exchange, but excluding changes resulting from the anti-dilution provisions thereof (to the extent comparable to the anti-dilution provisions contained herein), the Exercise Price and the number of Shares issuable upon exercise of this Warrant as then in effect shall forthwith be readjusted to such Exercise Price and number of Shares as would have been obtained had an adjustment been made upon the issuance or sale of such options, warrants or rights not exercised prior to

such change, or of such convertible or exchangeable securities not converted or exchanged prior to such change, upon the basis of such change.

- (4) On the expiration or cancellation of any such options, warrants or rights (without exercise), or the termination of the right to convert or exchange such convertible or exchangeable securities (without exercise), if the Exercise Price and the number of Shares issuable upon exercise of this Warrant shall have been adjusted upon the issuance or sale thereof, the Exercise Price and the number of Shares issuable upon exercise of this Warrant shall forthwith be readjusted to such Exercise Price and number of Shares as would have been obtained had an adjustment been made upon the issuance or sale of such options, warrants, rights or such convertible or exchangeable securities on the basis of the issuance of only the number of shares of Common Stock actually issued upon the exercise of such options, warrants or rights, or upon the conversion or exchange of such convertible or exchangeable securities.
 - (5) If the Exercise Price and the number of Shares issuable upon exercise of this warrant shall have been adjusted upon the issuance or sale of any such options, warrants, rights or convertible or exchangeable securities, no further adjustment of the Exercise Price and the number of Shares issuable upon exercise of this Warrant shall be made for the actual issuance of Common Stock upon the exercise, conversion or exchange thereof; *provided, however*, that no increase in the Exercise Price or reduction in the number of Shares issuable upon exercise of this Warrant shall be made pursuant to subclauses (1) or (2) of this Section 13(A)(iii).
- (B) Stock Splits, Subdivisions, Reclassifications or Combinations. If the Company shall (i) declare a dividend or make a distribution on its Common Stock in shares of Common Stock, (ii) subdivide or reclassify the outstanding shares of Common Stock into a greater number of shares, or (iii) combine or reclassify the outstanding Common Stock into a smaller number of shares, the number of Shares issuable upon exercise of this Warrant at the time of the record date for such dividend or distribution or the effective date of such subdivision, combination or reclassification shall be proportionately adjusted so that the Warrantholder after such date shall be entitled to purchase the number of shares of Common Stock which such holder would have owned or been entitled to receive after such date had this Warrant been exercised immediately prior to such date. In such event, the Exercise Price in effect at the time of the record date for such dividend or distribution or the effective date of such subdivision, combination or reclassification shall be adjusted to the number obtained by dividing (x) the product of (1) the number of Shares issuable upon the exercise of this Warrant before such adjustment and (2) the Exercise Price in effect immediately prior to the issuance giving rise to this adjustment by (y) the new number of shares issuable upon exercise of the Warrant determined pursuant to the immediately preceding sentence.
- (C) Other Distributions. In case the Company shall fix a record date for the making of a distribution to all holders of shares of its Common Stock (i) of shares of any class other than its Common Stock, (ii) of evidence of indebtedness of the Company or any Subsidiary, (iii) of assets (including without limitation cash dividends, but excluding dividends or distributions referred to in Section 13(B), or (iv) of rights or warrants

(excluding those referred to in Section 13(B)), in each such case, the Exercise Price in effect prior thereto shall be reduced immediately thereafter to the price determined by dividing (x) an amount equal to the difference resulting from (1) the number of shares of Common Stock outstanding on such record date multiplied by the Exercise Price per Share on such record date, less (2) the fair market value (as reasonably determined by the Board) of said shares or evidences of indebtedness or assets or rights or warrants to be so distributed, by (y) the number of shares of Common Stock outstanding on such record date; such adjustment shall be made successively whenever such a record date is fixed. In such event, the number of shares of Common Stock issuable upon the exercise of this Warrant shall be increased to the number obtained by dividing (x) the product of (1) the number of Shares issuable upon the exercise of this Warrant before such adjustment, and (2) the Exercise Price in effect immediately prior to the issuance giving rise to this adjustment by (y) the new Exercise Price determined in accordance with the immediately preceding sentence. In the event that such distribution is not so made, the Exercise Price and the number of Shares issuable upon exercise of this Warrant then in effect shall be readjusted, effective as of the date when the Board determines not to distribute such shares, evidences of indebtedness, assets, rights or warrants, as the case may be, to the Exercise Price that would then be in effect and the number of Shares that would then be issuable upon exercise of this Warrant if such record date had not been fixed.

- (D) Business Combinations. Subject to Section 14 of this Warrant, in case of any Business Combination or reclassification of Common Stock (other than a reclassification of Common Stock referred to in Section 13(B)), any Shares issued or issuable upon exercise of this Warrant after the date of such Business Combination or reclassification, shall be exchangeable for the number of shares of stock or other securities or property (including cash) to which the Common Stock issuable (at the time of such Business Combination or reclassification) upon exercise of this Warrant immediately prior to such Business Combination or reclassification would have been entitled upon such Business Combination or reclassification; and in any such case, if necessary, the provisions set forth herein with respect to the rights and interests thereafter of the Warrantholder shall be appropriately adjusted so as to be applicable, as nearly as may reasonably be, to any shares of stock or other securities or property thereafter deliverable on the exercise of this Warrant. In determining the kind and amount of stock, securities or the property receivable upon consummation of such Business Combination, if the holders of Common Stock have the right to elect the kind or amount of consideration receivable upon consummation of such Business Combination, then the Warrantholder shall have the right to make a similar election upon exercise of this Warrant with respect to the number of shares of stock or other securities or property which the Warrantholder will receive upon exercise of this Warrant.
- (E) Rounding of Calculations; Minimum Adjustments. All calculations under this Section 13 shall be made to the nearest one-tenth (1/10th) of a cent or to the nearest one-hundredth (1/100th) of a share, as the case may be. Any provision of this Section 13 to the contrary notwithstanding, no adjustment in the Exercise Price or the number of Shares into which this Warrant is exercisable shall be made if the amount of such adjustment would be less than \$0.01 or one-tenth (1/10th) of a share of Common Stock, respectively, but any such amount shall be carried forward and an adjustment with respect thereto shall be made at the time of and together with any subsequent adjustment which, together with such amount and any other amount or amounts so carried forward, shall aggregate \$0.01 or 1/10th of a share of Common Stock, respectively, or more.

- (F) Timing of Issuance of Additional Common Stock Upon Certain Adjustments. In any case in which the provisions of this Section 13 shall require that an adjustment shall become effective immediately after a record date for an event, the Company may defer until the occurrence of such event (i) issuing to the Warrantholder of this Warrant exercised after such record date and before the occurrence of such event the additional shares of Common Stock issuable upon such exercise by reason of the adjustment required by such event over and above the shares of Common Stock issuable upon such exercise before giving effect to such adjustment and (ii) paying to such Warrantholder any amount of cash in lieu of a fractional share of Common Stock; *provided, however*, that the Company upon request shall deliver to such Warrantholder a due bill or other appropriate instrument evidencing such Warrantholder's right to receive such additional shares, and such cash, upon the occurrence of the event requiring such adjustment.
- (G) Adjustment for Unspecified Actions. If the Company takes any action affecting the Common Stock, other than actions described in this Section 13, which in the opinion of the Board would adversely affect the exercise rights of the Warrantholder, the Exercise Price for the Warrants and/or the number of Shares received upon exercise of the Warrant shall be adjusted for the Warrantholder's benefit, to the extent permitted by law, (i) if any of the Existing Warrants is then outstanding, in the same manner, and at the same time, as the Board determines to adjust the exercise price under such Existing Warrants and/or number of Shares received upon exercise of such Existing Warrants as a result of such action (and, if the Board determines not to make any adjustment under the Existing Warrants as a result of such action, no adjustment shall be made under this Warrant), or (ii) if none of the Existing Warrants is then outstanding, or if each holder of any Existing Warrant then outstanding has waived its right to any adjustment as a result of such action, in such manner, and at such time, as such Board after consultation with the Investor shall reasonably determine to be equitable in the circumstances. Failure of the Board to provide for any such adjustment will be evidence that the Board has determined that it is equitable to make no such adjustments in the circumstances.
- (H) Statement Regarding Adjustments. Whenever the Exercise Price or the number of Shares into which this Warrant is exercisable shall be adjusted as provided in Section 13, the Company shall forthwith file at the principal office of the Company a statement showing in reasonable detail the facts requiring such adjustment and the Exercise Price that shall be in effect and the number of Shares into which this Warrant shall be exercisable after such adjustment, and the Company shall also cause a copy of such statement to be sent by e-mail and by mail, first class postage prepaid, to each Warrantholder at the address appearing in the Company's records.
- (I) Notice of Adjustment Event. In the event that the Company shall propose to take any action of the type described in this Section 13 (but only if the action of the type described in this Section 13 would result in an adjustment in the Exercise Price or the number of Shares into which this Warrant is exercisable or a change in the type of securities or property to be delivered upon exercise of this Warrant), the Company shall give notice to the Warrantholder, in the manner set forth in Section 13(H), which notice shall specify the record date, if any, with respect to any such action and the approximate date on which such action is to take place. Such notice shall also set forth the facts with respect thereto as shall be reasonably necessary to indicate the effect on the Exercise Price and the number, kind or class of shares or other securities or property which shall be deliverable upon exercise of this Warrant. In the case of any action which would require the fixing of a record date, such notice shall be given at least 10 days prior to the date so fixed, and

in case of all other action, such notice shall be given at least 15 days prior to the taking of such proposed action. Failure to give such notice, or any defect therein, shall not affect the legality or validity of any such action.

- (J) No Impairment. The Company will not, by amendment of its Amended and Restated Articles of Incorporation or through any reorganization, transfer of assets, consolidation, merger, dissolution, issue or sale of securities or any other voluntary action, avoid or seek to avoid the observance or performance of any of the terms to be observed or performed hereunder by the Company, but will at all times in good faith assist in the carrying out of all the provisions of this Warrant and in taking of all such action as may be necessary or appropriate in order to protect the rights of the Warrantholder.
 - (K) Proceedings Prior to Any Action Requiring Adjustment. As a condition precedent to the taking of any action which would require an adjustment pursuant to this Section 13, the Company shall take any action which may be necessary, including obtaining regulatory, New York Stock Exchange or stockholder approvals or exemptions, in order that the Company may thereafter validly and legally issue as fully paid and nonassessable all shares of Common Stock that the Warrantholder is entitled to receive upon exercise of this Warrant pursuant to this Section 13.
 - (L) Adjustment Rules. Any adjustments pursuant to this Section 13 shall be made successively whenever an event referred to herein shall occur. If an adjustment in Exercise Price made hereunder would reduce the Exercise Price to an amount below par value of the Common Stock, then such adjustment in Exercise Price made hereunder shall reduce the Exercise Price to the par value of the Common Stock.
14. Change of Control. Within 30 calendar days following the occurrence of a Preliminary Control Event, the Warrantholder may deliver a written notice to the Company, electing to cause the Company to purchase any Warrant, in whole or in part, acquired hereunder that the Warrantholder then holds, at a valuation based on a computation of the option value of the Warrant using Black-Scholes calculation methods and making the assumptions described in the Black-Scholes methodology described in Exhibit A. Payment by the Company to the Warrantholder of such purchase price shall be in cash due only upon the occurrence of the Change in Control and on the date of the occurrence of the Change of Control and simultaneous therewith and with surrender by the Warrantholder of such Warrant, subject to the mechanics described in the last paragraph of Exhibit A. If the Warrantholder does not elect to have the Company purchase any Warrant in its entirety, the Warrantholder will be entitled to receive from the Company within a reasonable time, and in any event not exceeding three (3) Business Days, a new warrant in substantially identical form for the purchase of that number of Shares subject to the outstanding portion of such Warrant. The Company agrees that it will not take any action resulting in a Preliminary Control Event in the absence of definitive documentation providing for such election right of the Warrantholder pursuant to this Section 14. Under no circumstances shall the Warrantholder be restricted from engaging in any hedging or derivative program reasonably necessary in the opinion of the Warrantholder to secure the option value of this Warrant so adjusted.
15. Contest and Appraisal Rights.
- (A) If any determination of Market Price or fair market value is to be made hereunder, and, at such time, a similar determination of "Market Price" or "fair market value" is made under any Existing Warrant then outstanding, the determination of Market Price or fair market

value, as the case may be, hereunder shall be the same as the final determination made with respect to the "Market Price" or "fair market value," as the case may be, under such Existing Warrant. Upon such final determination under such Existing Warrant, the Company shall promptly deliver notice thereof to the Warrantholder.

- (B) If any determination of Market Price or fair market value is to be made hereunder but no similar determination of "Market Price" or "fair market value" is made under any Existing Warrant then outstanding, or if no Existing Warrant is outstanding at such time, the provisions in this Section 15(B) shall apply. Upon each determination of Market Price or fair market value, as the case may be, hereunder, the Company shall promptly give notice thereof to the Warrantholder, setting forth in reasonable detail the calculation of such Market Price or fair market value, and the method and basis of determination thereof, as the case may be. If the Warrantholder (or if there is more than one Warrantholder, a majority in interest of Warranholders) shall disagree with such determination and shall, by notice to the Company given within fifteen (15) days after the Company's notice of such determination, elect to dispute such determination, such dispute shall be resolved in accordance with this Section 15(B). In the event that a determination of Market Price, or fair market value (if such determination solely involves Market Price), is disputed, such dispute shall be submitted, at the Company's expense, to a New York Stock Exchange member firm selected by the Company and acceptable to the Warrantholder, whose determination of Market Price or fair market value, as the case may be, shall be binding on the Company and the Warrantholder. In the event that a determination of fair market value, other than a determination solely involving Market Price, is disputed, such dispute shall be resolved through the Appraisal Procedure.

16. Governing Law. This Warrant shall be binding upon any successors or assigns of the Company. This Warrant shall constitute a contract under the laws of New York and for all purposes shall be construed in accordance with and governed by the laws of New York, without giving effect to the conflict of laws principles.
17. Attorneys' Fees. In any litigation, arbitration or court proceeding between the Company and the Warrantholder as the holder of this Warrant relating hereto, the prevailing party shall be entitled to reasonable attorneys' fees and expenses incurred in enforcing this Warrant.
18. Amendments. This Warrant may be amended and the observance of any term of this Warrant may be waived only with the written consent of the Company and the Warrantholder.

19. Notices. All notices hereunder shall be in writing and shall be effective (A) on the day on which delivered if delivered personally or transmitted by facsimile transmission or e-mail with evidence of receipt and with, in the case of e-mail, a copy mailed on the same day in the manner provided in clause (B) or (C), (B) one Business Day after the date on which the same is delivered to a nationally recognized overnight courier service with evidence of receipt, or (C) five Business Days after the date on which the same is deposited, postage prepaid, in the U.S. mail, sent by certified or registered mail, return receipt requested, and addressed to the party to be notified at the address indicated below (or at such other address and/or facsimile number and/or e-mail address and/or to the attention of such other person as the Company or the Warrantholder may designate by ten-day advance written notice):

(2) if to the Warrantholder, at the address for the Warrantholder set forth in the registry maintained by the Company pursuant to Section 9.

20. Prohibited Actions. The Company agrees that it will not take any action which would entitle the Warrantholder to an adjustment of the Exercise Price if the total number of shares of Common Stock issuable after such action upon exercise of this Warrant, together with all shares of Common Stock then outstanding and all shares of Common Stock then issuable upon the exercise of all outstanding options, warrants, conversion and other rights, would exceed the total number of shares of Common Stock then authorized by its Amended and Restated Articles of Incorporation.
21. Entire Agreement. This Warrant and the forms attached hereto, and the Investment Agreement, contain the entire agreement between the parties with respect to the subject matter hereof and supersede all prior and contemporaneous arrangements or undertakings with respect thereto.

RE: Election to Subscribe for and Purchase Common Stock

The undersigned, pursuant to the provisions set forth in the attached Warrant, hereby agrees to subscribe for and purchase the number of shares of the Common Stock set forth below covered by such Warrant. The undersigned, in accordance with Section 3 of the Warrant, hereby agrees to pay the aggregate Exercise Price for such shares of Common Stock in the manner set forth in the Warrant. A new warrant evidencing the remaining shares of Common Stock covered by such Warrant, but not yet subscribed for and purchased, if any, should be issued in the name set forth below.

Number of Shares of Common Stock: _____

Name and Address of Person to be
Issued New Warrant:

Holder: _____

By: _____

Name: _____

Title: _____

Black-Scholes Assumptions

For the purpose of this Exhibit A:

“*Acquiror*” means (a) the third party that has entered into definitive document for a transaction, or (b) the offeror in the event of a tender or exchange offer, that could reasonably result in a Change of Control upon consummation.

Underlying Security Price:	In the event of a merger or acquisition, (A) in the event of an “all cash” deal, the cash per share offered to the Company’s shareholders by the Acquiror; (B) in the event of an “all stock” deal, (1) in the event of a fixed exchange ratio transaction, the product of (i) the average of the Market Price of the Acquiror’s common stock for the ten (10) trading day period ending on the day preceding the date of the Preliminary Control Event and (ii) the number of Acquiror’s shares being offered for one share of Common Stock and (2) in the event of a fixed value transaction, the value offered by the Acquiror for one share of Common Stock; (C) in the event of a transaction contemplating various forms of consideration for each share of Common Stock, the cash portion, if any, shall be valued as clause (A) above and the stock portion shall be valued as clause (B) above and any other forms of consideration shall be valued by the Company in good faith, without applying any discounts to such consideration. In the event of all other Change of Control events, the average of the Market Price of the Common Stock for the five (5) trading day period beginning on the date of the Preliminary Control Event.
Exercise Price:	The Exercise Price as adjusted and then in effect for the Warrant at the time of the Preliminary Control Event.
Dividend Rate:	The Company’s annualized dividend yield as of the date of the Preliminary Control Event
Interest Rate:	The applicable U.S. 5-year treasury note risk free rate as of the date of the Preliminary Control Event
Model Type:	Black-Scholes
Exercise Type:	American
Put or Call:	Call
Trade Date:	The date of the Preliminary Control Event
Expiration Date:	Expiration Time
Settle Date:	The date of the Preliminary Control Event
Exercise Delay:	0
Volatility:	The average annual volatility over the last 3 years of the Common Stock as listed by Bloomberg L.P., as of the date of the Preliminary Control Event

Preliminary Control Event

Such valuation of the Warrant based on the Black-Scholes methodology shall not be discounted in any way. If the Warrantholder disputes such Black-Scholes valuation pursuant to this Exhibit A as calculated by the Company, the Company and the Warrantholder will choose a mutually-agreeable firm to compute the valuation of the Warrant using the guidelines above, and such valuation shall be final. The fees and expenses of such firm shall be borne equally by the Company and the Warrantholder.

The Company covenants that it will not close the Change of Control transaction or otherwise facilitate the closing of a tender or exchange offer as referenced above until giving the Warrantholder at least five (5) Business Days to sell or distribute the Common Stock to be received in an exchange and will cooperate with the Warrantholder to ensure that there is an effective registration statement available to facilitate such a sale during such five (5) Business Day period or an effective opportunity is provided in the case of a tender or exchange offer as referenced above to tender such shares in to the offer.

EXECUTION VERSION**AMENDMENT NO. 1 TO LOAN AGREEMENT**

This Amendment No. 1 to Loan Agreement, dated as of June 28, 2013 (this “ ***Amendment*** ”), is between **MBIA INSURANCE CORPORATION**, a stock insurance corporation organized under the laws of the State of New York (the “ ***Borrower*** ”), and **BLUE RIDGE INVESTMENTS, L.L.C.**, a Delaware limited liability company, as lender (the “ ***Lender*** ”). Unless otherwise defined herein, all capitalized terms used herein are used herein as defined in the Loan Agreement referred to below.

W I T N E S S E T H:

WHEREAS, reference is made to the Loan Agreement, dated as of May 6, 2013 (the “ ***Loan Agreement*** ”), by and between the Borrower and the Lender;

WHEREAS, the Borrower has requested certain amendments to the Loan Agreement as more specifically set forth below in this Amendment; and

WHEREAS, subject to the terms and conditions set forth in this Amendment, the Lender and the Borrower agree to amend certain provisions of the Loan Agreement as herein set forth; and

NOW THEREFORE, in consideration of the foregoing recitals, mutual agreements contained herein and for good and valuable consideration the receipt and sufficiency of which are hereby acknowledged, the Borrower and the Lender hereby agree as follows:

ARTICLE I
Amendments to Loan Agreement

Section 1.1 **Amendments to Section 1.1.**

(a) Section 1.1 of the Loan Agreement, entitled “ *Certain Defined Terms* ” is hereby amended by amending and restating the definition of “Disposition” or “Dispose” as follows:

“ *Disposition* ” or “ *Dispose* ” means, with respect to any Person, (a) the sale, transfer, license, lease or other disposition (including any sale and leaseback transaction) of any property by such Person (or the granting of any option or other right to do any of the foregoing), including any sale, assignment, transfer or other disposal, with or without recourse, of any notes or accounts receivable or any rights and claims associated therewith or (b) the issuance of any Equity Interests of such Person.

(b) Section 1.1 of the Loan Agreement, entitled “ *Certain Defined Terms* ” is hereby amended by amending and restating the definition of “Permitted Investments” as follows:

“ *Permitted Investments* ” means any of the following types of Investments, to the extent owned by the Borrower or any of its Subsidiaries free and clear of all Liens (other than Liens created under the Security Documents):

(a) readily marketable obligations issued or directly and fully guaranteed or insured by the United States (or, if such Investment is owned by MBIA UK, any Designated European Country) or any agency or instrumentality thereof having maturities of not more than 360 days from the date of acquisition thereof; provided that the full faith and credit of the United States (or, if such Investment is owned by MBIA UK, such Designated European Country, as applicable), is pledged in support thereof;

(b) time deposits with, or insured certificates of deposit or bankers' acceptances of, any commercial bank that (i) (A) is a Lender, (B) is organized under the laws of the United States, any state thereof or the District of Columbia, or is the principal banking subsidiary of a bank holding company organized under the laws of the United States, any state thereof or the District of Columbia and is a member of the Federal Reserve System, or (C) if such Investment is owned by MBIA UK, is organized under the laws of the any Designated European Country or is the principal banking subsidiary of a bank holding company organized under the laws of any Designated European Country, (ii) issues (or the parent of which issues) commercial paper rated as described in clause (c) of this definition and (iii) has combined capital and surplus of at least \$500,000,000, in each case with maturities of not more than 180 days from the date of acquisition thereof;

(c) commercial paper issued by any Person organized under the laws of any state of the United States (or, if such Investment is owned by MBIA UK, any Designated European Country) and rated at least "P-1" (or the then equivalent grade) by Moody's or at least "A-1" (or the then equivalent grade) by S&P, in each case with maturities of not more than 180 days from the date of acquisition thereof;

(d) Investments in fixed income securities rated at least "A" by S&P or "A2" by Moody's on the date of acquisition, other than those issued by Affiliates of the Borrower; and

(e) Investments, classified in accordance with US GAAP or UK GAAP, as applicable, as current assets of the Borrower or any of its Subsidiaries, in money market investment programs registered under the Investment Company Act of 1940 (or, in the case of any Investment held by MBIA UK, the equivalent legislation of any Designated European Country), which are rated AAAm (or the equivalent thereof) or better by S&P or Aaa-mf (or the equivalent thereof) or better by Moody's, and the portfolios of which are limited solely to Investments of the character, quality and maturity described in clauses (a), (b), and (c) of this definition.

(c) Section 1.1 of the Loan Agreement, entitled " *Certain Defined Terms* " is hereby amended by deleting the final sentence of the definition of " *Subsidiary* " therein and replacing such sentence with the following:

"Unless otherwise specified, all references herein to a " *Subsidiary* " or to " *Subsidiaries* " shall refer to any Subsidiary or Subsidiaries of the Borrower, except for those subsidiaries set forth under part (a) of Schedule 5.17 under the heading "Other Subsidiaries"."

(d) Section 1.1 of the Loan Agreement, entitled “ *Certain Defined Terms* ” is hereby amended by adding the following new definitions in the appropriate alphabetical order:

“ *Designated European Countries* ” means the countries of Austria, Belgium, Denmark, Finland, France, Germany, Luxembourg, The Netherlands, Sweden, Switzerland and the United Kingdom.

“ *GSI Portfolio* ” means the Global Strategic Income portfolio of Investments owned by UK Insurance, which is comprised only of Investments in (i) United States Treasury securities, (ii) high yield corporate securities, and (iii) securities issued in, or by issuers located in, emerging markets (either US Dollars or local currencies).

“ *MX GAAP* ” shall mean generally accepted accounting principles in the United Mexican States that are applicable to the circumstances as of the date of determination, consistently applied.

Section 1.2 Amendment of Section 5.9. Section 5.9 entitled “ *Taxes* ” is hereby deleted in its entirety and replaced with the following:

“5.9 Taxes. The Borrower and its Subsidiaries have filed all Tax returns and reports required to be filed, and have paid all Federal, state and other material Taxes, assessments, fees and other governmental charges levied or imposed upon them or their properties, income or assets otherwise due and payable, except those which are being contested in good faith by appropriate proceedings diligently conducted and for which adequate reserves have been provided in accordance with US GAAP, Regulated Accounting Principles, UK GAAP or MX GAAP, as applicable. There is no proposed tax assessment against the Borrower or any Subsidiary that would, if made, reasonably be expected to have a Material Adverse Effect.”

Section 1.3 Amendment of Section 6.1.

(a) Section 6.1(a)(iii) is hereby amended and restated in its entirety as follows:

“(iii) as soon as available, but in any event not later than the earlier of (x) the date that such statements are required to be filed with the New York State Department of Financial Services, (y) the date that is five days after the date such statements are actually filed with the New York State Department of Financial Services and (z) (A) the date that is 45 days after the end of each of the first three Fiscal Quarters of the Borrower, in the case of the first three Fiscal Quarters or (B) the date that is 65 days after the end of each Fiscal Year of the Borrower, in the case of the Fiscal Year, the financial statements of the Borrower prepared in accordance with Regulated Accounting Principles (the “Statutory Financial Statements”) in the form required to be filed with the New York State Department of Financial Services;”

(b) Section 6.1 is hereby amended by adding the following as a new clause (l) at the end of such Section:

“(l) Promptly, and in any event within five Business Days after the occurrence thereof, (A) notice of the consummation of any remediation effort by the Borrower or any of its Subsidiaries, including amendments, compromises or commutations with respect to insurance obligations and settlements of litigation, whether or not they effect the Subject Collateral, (B) a description of such remediation effort, which description shall include the nature of the remediation effort, the material terms of the consummation thereof, the parties to the consummation, the amount paid or transferred by the Borrower and its Subsidiaries as consideration in connection therewith, the source of funds for such payment, and whether (and if so, to what extent) the consummation thereof effects the Subject Collateral and (C) (i) the amount of the Remediation Basket (as defined in Section 7.16) that has been used (and the amount that is remaining) as of such date after giving effect to the consummation of such remediation effort and (ii) the amount by which all remediation efforts, taken as a whole since May 6, 2013, cumulatively and after giving effect to the consummation of such remediation effort, have reduced the Statutory Capital of the Borrower.”

Section 1.4 Amendment of Section 6.2. Section 6.2 entitled “*Payments of Obligations*” is hereby deleted in its entirety and replaced with the following:

“6.2 Payments of Obligations. The Borrower shall, and shall cause its Subsidiaries to, pay and discharge as the same shall become due and payable, all its material obligations and liabilities, including (a) all material tax liabilities, assessments and governmental charges or levies upon it or its properties or assets, unless the same are being contested in good faith by appropriate proceedings diligently conducted and adequate reserves in accordance with US GAAP, Regulated Accounting Principles, UK GAAP or MX GAAP, as applicable are being maintained by the Borrower or such Subsidiary; (b) all lawful claims which, if unpaid, would by law become a Lien upon its property (other than a Permitted Lien); and (c) all Indebtedness, as and when due and payable, in excess of the Threshold Amount, but subject to any subordination provisions contained in any instrument or agreement evidencing such Indebtedness; provided, however, that the Borrower and its Subsidiaries shall not be required to pay any such tax, assessment, charge, levy, claim or Indebtedness which is being contested in good faith by appropriate proceedings and as to which adequate reserves have been established in accordance with US GAAP, Regulated Accounting Principles, UK GAAP or MX GAAP, as applicable, unless the failure to make any such payment could give rise to an immediate right to foreclose on a Lien securing such amounts.

Section 1.5 Amendment of Section 6.8. Section 6.8 entitled “ *Books and Records* ” is hereby deleted in its entirety and replaced with the following:

“6.8 Books and Records. The Borrower shall, and shall cause each of its Subsidiaries to: (a) maintain proper books of record and account, in which full, true and correct entries in conformity with US GAAP, Regulated Accounting Principles, UK GAAP or MX GAAP, as applicable consistently applied shall be made of all financial transactions and matters involving the assets and business of the Borrower or such Subsidiary, as the case may be, and (b) maintain such books of record and account in material conformity with all applicable requirements of any Governmental Authority having regulatory jurisdiction over the Borrower or such Subsidiary, as the case may be.”

Section 1.6 Amendment of Section 6.10. Section 6.10 entitled “ *Compliance with Environmental Laws* ” is hereby deleted in its entirety and replaced with the following:

“6.10 Compliance with Environmental Laws. Except as could not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect, the Borrower shall, and shall cause each of its Subsidiaries to use commercially reasonable efforts to, comply and cause all lessees and other Persons operating or occupying its properties to comply, in all material respects, with all applicable Environmental Laws; obtain and renew all Environmental Permits necessary for its operations and properties; and conduct any investigation, study, sampling and testing, and undertake any cleanup, removal, remedial or other action necessary to remove and clean up all Hazardous Materials from any of its properties, in accordance with the requirements of all Environmental Laws, if required; provided, however, that neither the Borrower nor any of its Subsidiaries shall be required to undertake any such cleanup, removal, remedial or other action to the extent that its obligation to do so is being contested in good faith and by proper proceedings and appropriate reserves are being maintained with respect to such circumstances in accordance with US GAAP, Regulated Accounting Principles, UK GAAP or MX GAAP, as applicable.”

Section 1.7 Amendment of Section 7.1(c). Subsection (c) of Section 7.1 is hereby deleted in its entirety and replaced with the following:

“(c) Liens for taxes not yet due or which are being contested in good faith and by appropriate proceedings diligently conducted, if adequate reserves with respect thereto are maintained on the books of the applicable Person in accordance with US GAAP, Regulated Accounting Principles, UK GAAP or MX GAAP, as applicable;”

Section 1.8 Amendment of Section 7.3(e). Subsection (e) of Section 7.3 is hereby deleted in its entirety and replaced with the following:

“(e) (i) Investments by MBIA UK and its Subsidiaries in the GSI Portfolio (A) to the extent outstanding on May 6, 2013 and set forth on Schedule 7.3(e)(i) hereto or (B) funded solely by the reinvestment of proceeds of Investments (including proceeds from the sale of such Investments, and from any interest or dividends or distributions on such Investments) in the GSI Portfolio made pursuant to this clause

(e)(i), which Investments pursuant to this clause (B) shall be made only in Investments of the type described in the definition of “GSI Portfolio” and (ii) Investments by MBIA Mexico, S.A. de C.V., (A) to the extent outstanding on May 6, 2013 and set forth on Schedule 7.3(e)(ii) hereto or (B) of the type set forth in clause (a) of the definition of “Permitted Investments”, whether issued by the United States or the United Mexican States, provided that such Investments are funded solely by the reinvestment of proceeds of Investments (including proceeds from the sale of such Investments, and from any interest or dividends or distributions on such Investments) made pursuant to this clause (e)(ii);”

Section 1.9 Amendment of Section 7.3(g). Subsection (g) of Section 7.3 is hereby amended and restated in its entirety as follows:

“(g) Investments by the Borrower or any Subsidiary existing on June 28, 2013 and set forth on Schedule 7.3.”

Section 1.10 Amendment of Section 7.6. Subsection (j) of Section 7.6 is hereby amended and restated in its entirety as follows:

“(j) Dispositions of property by any Subsidiary to the Borrower or to a wholly-owned Subsidiary, other than the issuance or other Disposition of any Equity Interests of MBIA UK;”

Section 1.11 Amendment of Section 7.9. Section 7.9 entitled “ *Change in Fiscal Year; Accounting Policies* ” is hereby deleted in its entirety and replaced with the following:

“7.9 Change in Fiscal Year; Accounting Policies. (a) Permit the last day of its Fiscal Year to end on a day other than December 31 or change its method of determining its Fiscal Quarters; or (b) make any change in accounting policies or reporting practices, except as required by US GAAP, Regulated Accounting Principles, UK GAAP or MX GAAP, as applicable.”

Section 1.12 Amendment of Section 7.13. Clause (b) of Section 7.13 is hereby amended by replacing the reference therein to “ Section 7.2(c) ” with “ Section 7.2(k) ”.

Section 1.13 Amendment of Section 7.16. Section 7.16 is hereby amended and restated in its entirety as follows:

“7.16 Commutations. Other than with respect to (a) insurance obligations and settlements of insurance with such counterparties as the Borrower and Lender may agree, as to which no such limitation shall apply, and (b) with respect to MBIA UK and its Subsidiaries, consummate any remediation efforts, including, without limitation, amendments, compromises or commutations with respect to its insurance obligations and settlements of litigation, whether or not they effect the Subject Collateral, to the extent that any amounts paid or transferred by the Borrower and its Subsidiaries as consideration therefor or in connection therewith since June 28, 2013 would exceed \$260,000,000 in the aggregate (the “ Remediation Basket ”), provided that, notwithstanding the foregoing, the Borrower may not, without the written consent of the Lender, consummate any

remediation efforts, including, without limitation, amendments, compromises or commutations with respect to its insurance obligations and settlements of litigation, whether or not they effect the Subject Collateral, if, (x) after giving effect thereto and to any borrowings of Loans in connection therewith, the aggregate principal amount of Loans outstanding would exceed \$200,000,000 or (y) after giving effect thereto, all remediation efforts, including, without limitation, amendments, compromises or commutations with respect to its insurance obligations and settlements of litigation, taken as a whole since May 6, 2013, would, cumulatively, have reduced the Statutory Capital of the Borrower by \$100,000,000 or more.”

Section 1.14 Section 9.2(a)(ii) is hereby amended and restated in its entirety as follows:

“(ii) If to the Lender (in all other cases):

Bank of America Corporation

Section 1.15 Amendment to Schedule 5.17. The Loan Agreement is hereby amended by deleting the current Schedule 5.17 to the Loan Agreement and replacing it with the new Schedule 5.17 attached as Exhibit A hereto.

Section 1.16 Addition of Schedule 7.3(e). The Loan Agreement is hereby amended by adding Schedule 7.3(e) thereto in the form attached as Exhibit B hereto.

Section 1.17 Amendment of Schedule 7.3(g). The Loan Agreement is hereby amended by deleting the current Schedule 7.3(g) to the Loan Agreement and replacing it with the new Schedule 7.3(g) attached as Exhibit C hereto.

ARTICLE II CONDITIONS TO EFFECTIVENESS

Section 2.1 Condition Precedent. This Amendment shall become effective as of the first date on which:

- (a) the Lender and the Borrower shall each have duly executed and delivered counterparts of this Amendment;
- (b) the representations and warranties of the Borrower set forth in (i) Article III hereof and (ii) each of the other Loan Documents shall be true and correct in all material respects (except that, to the extent that any representation and warranty is qualified by materiality, such representation and warranty shall be true and correct in all respects), on and as of the date of the date hereof, except as they relate to an earlier date, in which case they shall have been true and correct in all material respects as of such earlier date;
- (c) after giving effect to Section 3.1, no Potential Event of Default or Event of Default shall exist or shall result from the execution, delivery and performance by the Borrower of the Amendment; and
- (d) the Borrower shall have provided the Lender with a certificate signed by a Responsible Officer of the Borrower certifying that the conditions specified in clauses (b) and (c) of this Section 2.1 have been satisfied.

ARTICLE III MISCELLANEOUS

Section 3.1 Waiver of Past Defaults. Subject to the effectiveness of this Amendment, the Lender hereby permanently waives, as of the date hereof, any Potential Event of Default or Event of Default relating to the matters set forth on Schedule 3.1 hereto, to the extent that such matters would not have constituted a Potential Event of Default or Event of Default under the Loan Agreement as amended by the amendments contemplated in Article I hereof. This waiver is limited solely to the subject matter hereof, and nothing contained in this Amendment shall be deemed to constitute a waiver of any other rights or remedies the Lender may have under the Loan Agreement or under applicable law.

Section 3.2 Representations and Warranties. The Borrower hereby represents and warrants to the Lender that, as of the date hereof:

(a) (i) it has the legal power and authority to execute and deliver this Amendment; (ii) the officer of the Borrower executing this Amendment has been duly authorized to execute and deliver the same and bind the Borrower with respect to the provisions hereof; (iii) the execution, delivery and performance by it of this Amendment does not (x) contravene (A) its Organization Documents, (B) any Applicable Law, (C) any material Contractual Obligation to which it is a party or binding on or affecting it or its property other than any Contractual Obligations that have been waived, or (D) any order, judgment, award, injunction or decree binding on or affecting it or its property or (y) result in, or require the creation or imposition of, any Lien upon or with respect to any of the properties now owned or hereafter acquired by it, except pursuant to the Security Documents; and (iv) this Amendment and each document executed by the Borrower in connection herewith constitute legal, valid and binding obligations of the Borrower, enforceable against it in accordance with their terms, subject to any applicable bankruptcy, insolvency, or similar laws affecting creditors' rights generally and subject to general principles of equity, regardless of whether considered in a proceeding in equity or at law; and

(b) all representations and warranties of the Borrower set forth in the Loan Documents are true and correct in all material respects (except that, to the extent that any representation and warranty is qualified by materiality, such representation and warranty shall be true and correct in all respects), on and as of the date of the date hereof, except as they relate to an earlier date, in which case they shall have been true and correct in all material respects as of such earlier date.

Section 3.3 Loan Documents Unaffected. Except as expressly set forth herein, this Amendment shall not by implication or otherwise limit, impair, constitute a waiver of, or otherwise affect the rights and remedies of the Lender under the Loan Agreement or any other Loan Document, and shall not alter, modify, amend or in any way affect any of the terms, conditions, obligations, covenants or agreements contained in the Loan Agreement or any other Loan Document, all of which are ratified and affirmed in all respects and shall continue in full force and effect. Nothing herein shall be deemed to entitle the Borrower to a consent to, or a waiver, amendment, modification or other change of, any of the terms, conditions, obligations, covenants or agreements contained in the Loan Agreement or any other Loan Document in similar or different circumstances. This Amendment shall apply and be effective only with respect to the provisions of the Loan Agreement specifically referred to herein. The parties hereto acknowledge and agree that this Amendment constitutes a "Loan Document" under the terms of the Loan Agreement.

Section 3.4 Costs, Expenses and Taxes. The Borrower agrees to pay on written demand all costs and expenses of the Lender in connection with the preparation, execution, delivery, administration, modification and amendment of this Amendment and the other instruments and documents to be delivered hereunder. The foregoing agreement shall be in addition to and not in lieu of any similar obligations under the Loan Documents.

Section 3.5 No Other Promises or Inducements. There are no promises or inducements that have been made to any party hereto to cause such party to enter into this Amendment other than those that are set forth in this Amendment. This Amendment has been entered into by each party freely, voluntarily, with full knowledge, and without duress, and, in executing this Amendment no party is relying on any other representations, written or oral, express or implied, made to any other party by the Borrower or the Lender. Each party agrees that the consideration received by each party under this Amendment has been actual and adequate.

Section 3.6 Modification; Waiver. This Amendment may not be modified orally, but only by an agreement in writing signed by the parties hereto. Any provision of this Amendment can be waived, amended, supplemented or modified by written agreement of the parties hereto.

Section 3.7 Governing Law. **THIS AMENDMENT AND THE RIGHTS AND OBLIGATIONS OF THE PARTIES UNDER THIS AMENDMENT SHALL BE GOVERNED BY, AND CONSTRUED AND INTERPRETED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK WITHOUT REGARD TO THE RULES OF CONFLICTS OF LAWS (OTHER THAN SECTION 5-1401 AND SECTION 5-1402 OF THE NEW YORK GENERAL OBLIGATIONS LAW).**

Section 3.8 Entire Agreement. This Amendment sets forth the entire agreement and understanding among the parties as to the subject matter hereof and merges and supersedes all prior discussions, agreements, and undertakings of every kind and nature among them with respect to the subject matter hereof.

Section 3.9 Counterparts; Facsimile or Electronic Transmission of Signature. This Amendment may be signed in any number of counterparts, each of which shall be an original, with the same effect as if the signatures thereto and hereto were upon the same instrument. Delivery of an executed counterpart of this Amendment by facsimile or other electronic transmission shall be as effective as delivery of a manually executed counterpart.

Section 3.10 Severability. In the event any provision of this Amendment shall be held illegal, invalid or unenforceable by any court of competent jurisdiction, the parties hereto agree that such provision shall be ineffective only to the extent of such illegality, invalidity or unenforceability without invalidating the remainder of such provision or any other provisions of this Amendment and shall not invalidate or render unenforceable such provision in any other jurisdiction.

Section 3.11 JURY TRIAL WAIVER. **EACH OF THE PARTIES HERETO HEREBY KNOWINGLY, VOLUNTARILY, AND INTENTIONALLY IRREVOCABLY WAIVES (TO THE EXTENT PERMITTED BY APPLICABLE LAW) ANY RIGHTS IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LITIGATION BASED HEREON, OR ARISING OUT OF, UNDER, OR IN CONNECTION WITH, THIS AMENDMENT OR ANY OTHER LOAN DOCUMENT, OR ANY COURSE OF CONDUCT, COURSE OF DEALING, STATEMENTS (WHETHER VERBAL OR WRITTEN), OR ACTIONS OF THE BORROWER. EACH PARTY HERETO (A) CERTIFIES THAT NO REPRESENTATIVE, AGENT OR ATTORNEY OF ANY OTHER PERSON HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER**

PERSON WOULD NOT, IN THE EVENT OF LITIGATION, SEEK TO ENFORCE THE FOREGOING WAIVER AND (B) ACKNOWLEDGES THAT IT AND THE OTHER PARTIES HERETO HAVE BEEN INDUCED TO ENTER INTO THIS AMENDMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

IN WITNESS WHEREOF, the parties hereto have executed this Amendment as of the date first above written.

THIS SHARE CHARGE is made by way of Deed (the “Deed”) on 9 May 2013

BETWEEN

MBIA INSURANCE CORPORATION, a stock insurance corporation organized under the laws of the State of New York (the “Chargor”); and

BLUE RIDGE INVESTMENTS, L.L.C., a Delaware limited liability company, as agent and trustee for the Loan Agreement Secured Parties (as defined below) (the “Chargee”),

each being a “party” and together being “parties”.

RECITALS

- A. The Chargor and the Chargee are party to a Loan Agreement, dated as of 6 May 2013 (as may be amended, restated, supplemented or otherwise modified from time to time, the “Loan Agreement”), between the Chargor, as borrower, and the Chargee, as lender.
- B. The Chargor has requested that Chargee make loans to the Chargor under the Loan Agreement in an aggregate amount of up to \$500,000,000 (collectively, the “Loans”).
- C. The Chargee has agreed to make available to the Chargor the Loans upon the terms and conditions set forth in the Loan Agreement and the other Loan Documents.
- D. As part of the consideration for the Chargee’s agreement to enter into the Loan Agreement to make the Loans available to the Chargor, the Chargor has agreed to execute and deliver this Deed. It is intended that this document take effect as a deed notwithstanding the fact that a party may only execute this document under hand.

THIS DEED WITNESSES as follows:

1. Interpretation

- 1.1 The recitals above are an integral part of this Deed.

1.2 Terms defined in the Loan Agreement shall, unless defined in this Deed, have the same meaning when used in this Deed, and in addition (unless otherwise specified):

- “ Act ” means the Law of Property Act 1925;
- “ Business Day ” means any day (other than a Saturday or a Sunday) on which banks are open in London and New York for a full range of business;
- “ Company ” means MBIA UK (Holdings) Limited, a company incorporated under the laws of England and Wales with company number 04808006;
- “ Encumbrance ” means a mortgage, charge, pledge, lien or other encumbrance securing any obligation of any person or any arrangement under which money held with a bank or other financial institution may be applied, set off or made subject to a combination of accounts so as to effect discharge of any sum owed or payable to any person or any other type of preferential arrangement (including any title transfer and retention arrangement) having a similar effect;
- “ Enforcement Event ” means an Event of Default which is continuing;
- “ Financial Collateral Legislation ” means:
- (a) the Financial Collateral Arrangements Directive (2002/47/EC); and
 - (b) the Financial Collateral Arrangements (No. 2) Regulations 2003 (SI 2003/3226);
- “ Loan Agreement ” shall have the meaning assigned thereto in the recitals;
- “ Loan Agreement Secured Parties ” means each Lender from time to time party to the Loan Agreement and any agent appointed thereunder on behalf of such Lender;
- “ PRA ” means the UK Prudential Regulation Authority;
- “ Receiver ” means a receiver or receiver and manager or, where permitted by law, an administrative receiver of all or any part of the Security Assets and including any appointee made under a joint and/or several appointment;

“ Related Assets ”

means all present and future:

- (a) dividends, distributions, interest and other monies paid or payable in relation to the Shares; and
- (b) rights, benefits, properties and proceeds accruing, offered or issued in relation to the Shares (whether by way of redemption, bonus, preference, option, substitution, exchange, conversion or otherwise, under option rights or otherwise);

“ Reservations ”

means the principle that equitable remedies are remedies which may be granted or refused at the discretion of the court, the limitation of enforcement by laws relating to bankruptcy, insolvency, liquidation, reorganisation, court schemes, moratoria, administration and other laws generally affecting the rights of creditors, the time barring of claims under legislation, the possibility that an undertaking to assume liability for or to indemnify a person against non-payment of UK stamp duty may be void, defences of set-off or counterclaim and similar principles, rights and defences under the laws of any jurisdiction in which relevant obligations may have to be performed;

“ Secured Liabilities ”

means the Obligations.

“ Security ”

means the security created or intended to be created under this Deed;

“ Security Assets ”

means all assets which are the subject of the Security, including the Shares and the Related Assets;

“ Security Period ”

means the period beginning on the date of this Deed and ending on the date on which all the Secured Liabilities have been paid and discharged in full (other than contingent indemnification obligations to the extent no claims giving rise thereto have been asserted);

“ Shares ”

means the shares in the issued share capital of the Company specified in Schedule 1 held by, to the order or on behalf of the Chargor, including for the avoidance of doubt any shares which shall be issued by the Company to the Chargor from time to time, regardless of the reason of such issuance, whether by way of substitution, replacement, dividend or in addition to the shares held on the date hereof, whether following an exchange, division, free attribution, contribution in kind or in cash or for any other reason, in which case such shares shall immediately be and become subject to the Security; and

“ Trustee Acts ”

means both the Trustee Act 1925 and the Trustee Act 2000 of England and Wales.

1.3

In this Deed (unless otherwise specified):

- (a) any reference to a Clause is to a clause of this Deed and a reference to a paragraph is to a paragraph of the Clause in which it appears;
- (b) any reference to a person includes any individual, firm, partnership, company, corporation, joint venture, consortium, association, organisation, government, state, foundation and trust (in each case whether or not having separate legal personality);
- (c) any reference to a person includes a reference to that person's (and any subsequent) successors and any permitted transferees and assignees in accordance with their respective interests;
- (d) any reference to an individual includes his or her estate and personal representatives;
- (e) any reference to losses includes losses, actions, damages, claims, proceedings, costs, demands, expenses (including fees) and liabilities.
- (f) any reference to time is to London time;
- (g) any reference to a statute, statutory provision or subordinate legislation (“ legislation ”) includes references to:
 - (i) that legislation as re-enacted or amended by or under any other legislation before or after the date of this Deed;

-
- (ii) any legislation which that legislation re-enacts (with or without modification); and
 - (iii) any subordinate legislation made under that legislation before or after the date of this Deed, as re-enacted or amended as described in paragraph (i), or under any legislation referred to in paragraph (ii);
- (h) any reference to this Deed, any Loan Document or any other agreement or document shall be construed as a reference to this Deed or, as the case may be, such Loan Document, other agreement or document as the same may have been, or may from time to time be, amended, waived, varied, refinanced, novated or supplemented (including any supplement to a Loan Document providing for further advances);
- (i) any use of the singular includes the plural and vice versa; and
- (j) any use of any gender includes the other genders.
- 1.4 The index to and the headings in this Deed are inserted for convenience only and are to be ignored in construing this Deed.
- 1.5 Unless the context otherwise requires, a reference to a Security Asset includes the proceeds of sale of that Security Asset.
- 1.6 Failure by one or more parties to execute this Deed on the date hereof shall not invalidate the provisions of this Deed as between the other parties who do execute this Deed. Such non-signatories may execute this Deed on a subsequent date and shall thereupon become bound by its provisions.
- 1.7 This Deed is intended to take effect as a financial collateral arrangement for the purpose of the Financial Collateral Legislation.
- 2. Covenant and charge**
- 2.1 The Chargor shall discharge and pay each of the Secured Liabilities in the manner provided for in the Loan Documents when they fall due.
- 2.2 As continuing security for the due and full payment, discharge and performance of the Secured Liabilities, the Chargor agrees to charge, and hereby charges the Security Assets in favour of the Chargee by way of a first fixed charge and with full title guarantee.

3. Perfection of the Security

The Chargor shall promptly and, in any event, within five Business Days of the Closing Date, and at its own expense:

- (a) deposit with the Chargee (or as it shall direct) any share certificates or other documents evidencing an entitlement to the Shares, together with share transfer forms relating to the Shares duly executed by it with the name of the transferee left blank and undated, received on or after the date of this Deed on the basis that the Chargee shall be able to hold such documents of title and stock transfer forms until the end of the Security Period, and shall be entitled, at any time after an Enforcement Event has occurred, to complete, under its power of attorney given in this Deed, the share transfer forms on behalf of the Chargor in favour of itself or such other person as it shall elect;
- (b) deposit with the Chargee (or as it shall direct) any other documents relating to the Security Assets which the Chargee may reasonably require to enable the Chargee to be registered as the owner of, or otherwise obtain legal title to, the Security Assets; and
- (c) terminate all nominations it may have made in respect of any Security Assets, and pending such termination procure that any person so nominated:
 - (i) shall not exercise any rights, powers or remedies in respect of the Security Assets without the prior written approval of the Chargee; and
 - (ii) shall forward to the Chargee all communications and other information received by it in respect of the Security Assets.

4. Voting rights and dividends

4.1 If no Enforcement Event is subsisting:

- (a) the Chargor shall be entitled to receive and retain all dividends, distributions, interest and other monies paid on or derived from the Security Assets; and
- (b) the Chargor shall be entitled to exercise all voting rights and other rights and powers attaching to the Security Assets, *provided that* it shall not exercise such rights and powers in a manner which would materially and adversely affect the interests of the Chargee or the validity or enforceability of the Security Assets or cause an Event of Default to occur.

4.2 At any time while an Enforcement Event is subsisting, the Chargee shall be entitled, immediately, in its absolute discretion and without prior notice to the Chargor or prior authorisation from the Chargor or any court (subject to the terms of the Loan Agreement) to:

- (a) apply all dividends, distributions, interest and other monies paid on or derived from the Security Assets in accordance with Clause 11 of this Deed;

-
- (b) exercise (or refrain from exercising) any voting rights attaching to the Security Assets; and
 - (c) exercise (or refrain from exercising) the powers and rights conferred on or exercisable by the legal or beneficial owner, holder or bearer of the Security Assets including (without limitation) all rights and powers given to trustees by the Trustee Act or otherwise available to a secured creditor and the right, in relation to the Company, to concur or participate in:
 - (i) the reconstruction, amalgamation, sale or other disposal of such Company or any of its assets or undertaking (including the exchange, conversion or reissue of any shares or securities as a consequence thereof),
 - (ii) the release, modification or variation of any rights or liabilities attaching to any Security Assets, and
 - (iii) the exercise, renunciation or assignment of any right to subscribe for any Security Assets,

in each case in the manner the Chargee thinks fit, and the proceeds of any such action shall form part of the Security Assets.

5. Representations

The Chargor represents and warrants to the Chargee as of the date of this Deed that:

- (a) the Shares are fully paid up and are not subject to any option to purchase or similar rights;
- (b) the Shares represent 65% of the issued share capital of the Company and no person has any option, warrant or other similar right to subscribe for any shares of the Company;
- (c) it is the sole beneficial legal owner of the Shares with full title guarantee and is entitled, subject to this Deed, to transfer the Shares with full title guarantee free from all Encumbrances and together with all rights attaching to them;
- (d) it is the sole legal and beneficial owner with full title guarantee of all the Security Assets free from all Encumbrances (except as created under this Deed) and together with all rights attaching to them;

-
- (e) the constitutional documents of the Company do not:
- (i) restrict or inhibit any transfer of the Shares or creation or enforcement of the Security; or
 - (ii) contain any rights of pre-emption;
- (f) subject to the Reservations, this Deed constitutes a legal, valid and binding obligation on it and creates a valid Encumbrance on the Security Assets and is not liable to be avoided or otherwise set aside on its liquidation, administration or otherwise;
- (g) it has the power to enter into, perform and deliver, and has taken all necessary action to authorise its entry into, performance of and delivery of, this Deed;
- (h) all necessary authorisations to enable it to enter into this Deed have been obtained and remain in full force and effect;
- (i) it has not suspended or threatened to suspend payment of its debts, is not unable to pay his debts as they fall due, has not admitted inability to pay its debts and is not deemed either unable to pay its debts or as having no reasonable prospect of doing so;
- (j) there is no breach of any law or regulation which materially and adversely affects the Security Assets;
- (k) as at the date of this Deed, all stamp or registration duty or similar Tax or charge that is due in its jurisdiction of incorporation in respect of this Deed, if any, has been paid;
- (l) its:
- (i) irrevocable submission under this Deed to the jurisdiction of the courts of England;
 - (ii) agreement that this Deed is governed by English law; and
 - (iii) agreement not to claim any immunity to which it or its assets may be entitled,
- are legal, valid and binding under the laws of its jurisdiction of incorporation; and
- (m) any judgment obtained in England will be recognised and be enforceable by the courts of its jurisdiction of incorporation.

The representations set out in this Deed are made on the date of this Deed. Each representation under this Deed is deemed to be repeated by the Chargor on the date of each request for a Loan to be made, each Borrowing Date and each Interest Payment Date. When a representation is repeated, it is deemed to be repeated in all material respects (without duplication of any materiality qualifier contained therein) and it is applied to the circumstances existing at the time of repetition, in each case except to the extent such representation expressly relates to an earlier date.

6. Restrictions on dealing

- 6.1 During the Security Period, the Chargor undertakes to the Chargee that it shall not at any time except with the prior written consent of the Chargee:
- (a) sell, transfer, lend, assign or dispose of any interests created or intended to be created by this Deed or by law over the Security Assets (or otherwise purport to do so), save as otherwise expressly contemplated or required by the Loan Documents;
 - (b) nominate any person (other than the Chargee) to enjoy any benefits derived from, or otherwise exercise any rights, powers, remedies, obligations or authorities in relation to, the Security Assets;
 - (c) create, grant or permit to subsist any Encumbrance (other than any Encumbrance created by this Deed) over the Security Assets; or
 - (d) cause or permit that any further shares in the share capital of the Company be issued unless such further shares constitute part of the Security.
- 6.2 Any shares or other rights received in exchange for Shares or other Security Assets or any part thereof, or in redemption thereof, or as a result of any merger, consolidation, acquisition or other exchange of assets, shall be and become part of the Security without any further action.
- 6.3 The Chargor shall not do, or permit to be done, any act that would materially depreciate, jeopardise or otherwise prejudice the Security, or diminish the value of any of the Security Assets or the effectiveness of the Security.
- 6.4 While an Enforcement Event is subsisting, the Chargee shall do all such acts or execute all such documents as is reasonably required by the Chargor for the purpose of the enforcement of the Security, including, without limitation, such actions or execution of such documents as may be necessary to obtain approval from the PRA to a transfer, sale or other disposal of the Shares pursuant to Clause 10.2.

7. Calls and other obligations

- 7.1 The Chargor shall promptly pay all calls or other payments which may become due in respect of any of the Security Assets and, if it fails to do so, the Chargee may, following 14 days' notice of such non-payment to the Chargor, elect to make such payments on behalf of the Chargor. Any sums so paid by the Chargee shall be repayable by the Chargor to the Chargee on demand together with interest at the Default Rate from the date of such payment by the Chargee and pending such repayment shall form part of the Secured Liabilities.
- 7.2 The Chargor shall promptly copy to the Chargee and comply with all requests for information which is within its knowledge and which are made under any law (including, without limitation, sections 793, 820, 821, 822, 823, 824 and 825 of the Companies Act 2006) or any similar provision contained in any articles of association or other constitutional document relating to any of the Security Assets and, if it fails to do so, the Chargee may elect to provide such information on behalf of the Chargor.
- 7.3 The Chargor shall remain liable to observe and perform all of the other conditions and obligations assumed by it in respect of any of the Security Assets.
- 7.4 The Chargee shall not be required to perform or fulfil any obligation of the Chargor in respect of the Security Assets or to make any payment, or to make any enquiry as to the nature or sufficiency of any payment received by it or the Chargor, or to present or file any claim or take any action to collect or enforce the payment of any amount to which it may have been or to which it may be entitled under this Deed at any time.

8. Preservation of Security

- 8.1 Until released by the Chargee, the Security shall:
- (a) be a continuing security and shall not be considered as satisfied, discharged or prejudiced by any intermediate payment or settlement of all or any part of the Secured Liabilities or any other act, matter or thing but shall remain in full force and effect to secure the ultimate balance of the Secured Liabilities; and
 - (b) be cumulative to and shall neither be merged with nor in any way exclude, prejudice or be affected by any other Encumbrance now or subsequently held by the Chargee for all or any of the Secured Liabilities or by any rights, powers and remedies otherwise provided by law.

-
- 8.2 Neither the obligations of the Chargor contained in this Deed nor the security interests, powers, rights, remedies and obligations created under or intended to be created under this Deed or by law for the benefit of the Chargee shall be discharged, impaired, waived or otherwise affected by:
- (a) any amendment, variation, extension, compromise, renewal, release of, refusal or neglect to perfect or enforce any act, omission, circumstances, terms of the Loan Documents, rights, powers or remedies against the Chargor or any other person;
 - (b) any refusal, delay, failure or neglect to take all or any part of the security contemplated by the Loan Documents, or otherwise agreed to be taken;
 - (c) any refusal, delay, failure or neglect to realise or perfect the value of, or any release, discharge, exchange or substitution of, any security taken in respect of the obligations of the Chargor or any other person under the Loan Documents;
 - (d) any refusal, delay, failure or neglect to perfect or enforce, any terms of the Loan Documents or any rights or remedies against, or any security granted by, the Chargor or any other person;
 - (e) any other exercise or failure to exercise any powers, rights, remedies and obligations under this Deed or by law;
 - (f) any irregularity, invalidity or unenforceability of any obligations of any person under the Loan Documents or any other document or security to the intent that the Chargor's obligations under this Deed and this Security shall remain in full force and this Deed shall be construed as if there were no such irregularity, invalidity or unenforceability;
 - (g) any legal limitation, disability, incapacity or other circumstances relating to the Chargor, any guarantor or any other person under the Loan Documents or any amendment to or variation of the terms of the Loan Documents or any other deed, document or security; or
 - (h) any other act, event or omission (whether or not known to the Chargor or the Chargee) which might operate to discharge, impair, suspend, vary, waive or otherwise affect any of either the obligations of the Chargor contained in this Deed or derived from the law, any rights, powers and remedies conferred on the Chargee by this Deed or by law, and the interests created or intended to be created by this Deed or by law over the Security Assets.

9. Powers of the Chargee

9.1 *Remedy*

The Chargee shall be entitled (but shall not be obliged) to remedy, at any time, a breach by the Chargor of any of its obligations contained in this Deed, and the Chargee irrevocably authorises the Chargee and its agents to do all such things as are necessary or desirable for that purpose.

9.2 *Appropriation under the Financial Collateral Legislations*

- (a) At any time while an Enforcement Event is subsisting, the Chargor may appropriate all or part of the financial collateral in or towards the satisfaction of the Secured Liabilities. In this Deed, “financial collateral” means any part of the Security Assets which fall within the definition of financial collateral in the Financial Collateral Legislation.
- (b) For the purpose of this Clause, the parties agree that the value of such financial collateral so appropriated shall be the market price of the relevant Security Assets determined by the Chargor by reference to an independent valuation prepared by a properly qualified valuer as the Chargee may reasonably select to identify the market value of the financial collateral. In each case, the parties agree that the method of valuation provided for in this Deed shall constitute a commercially reasonable method of valuation for the purpose of the Financial Collateral Legislation.

9.3 *Mortgagee in possession*

The Chargee shall not, by reason of it taking any action permitted by this Deed or it taking possession of all or any part of the Security Assets, be liable to account as mortgagee in possession or be liable for any loss on realisation or for any default or omission for which a mortgagee in possession might be liable.

10. Enforcement of the Security

- 10.1** At any time while an Enforcement Event is subsisting and in addition to the rights and powers granted to it under Clause 4.1 (b), the Chargee shall be entitled, immediately, in its absolute discretion and without prior notice to the Chargor or prior authorisation from any court, to enforce all or any part of the Security and to exercise any powers and rights conferred on or exercisable by the legal or beneficial owner, holder or bearer of the Security Assets, including (without limitation) all powers and rights given to trustees by the Trustee Acts or otherwise available to a secured creditor, and the right to:

- (a) take possession of and hold all or any part of the Security Assets;

-
- (b) transfer all or any part of the Security Assets into the name of the Chargee or such nominee(s) of the Chargee as it requires;
 - (c) sell or otherwise dispose of all or any part of the Security Assets (at the times, in the manner and on the terms it thinks fit); and
 - (d) collect, recover or compromise and give a good discharge for any monies payable to the Chargor in respect of all or any part of the Security Assets,

in each case in the manner the Chargee thinks fit, and the proceeds of any such action shall form part of the Security Assets.

- 10.2 For so long as the Company has a direct subsidiary which is an entity regulated by the PRA, then notwithstanding Clause 9.2 and Clause 10.1 hereof, the Chargee shall not take possession, transfer, sell or otherwise dispose of (i) 10% or more of the Shares, (ii) 10% or more of the voting rights in the Company or (iii) all or any proportion of Shares or voting rights in the Company as a result of which the Chargee (or its nominee) would be able to exercise significant influence over any such subsidiary regulated by the PRA, in each case without the prior approval of the PRA, unless the statutory period for the PRA providing such approval has expired.
- 10.3 The powers conferred on mortgagees, receivers or administrative receivers by the Act and the Insolvency Act 1986 (as the case may be) shall apply to the Security, unless they are expressly or impliedly excluded. If there is ambiguity or conflict between the powers contained in those acts and those contained in this Deed, those contained in this Deed shall prevail.
- 10.4 The statutory power of sale and all other powers conferred by section 101 of the Act as varied and extended by Clause 10.1, together with all or any of the rights and powers conferred by this Deed on a Receiver, shall be immediately exercisable at any time while an Enforcement Event is subsisting without further notice to the Chargor.
- 10.5 The restrictions contained in sections 93 and 103 of the Act shall not apply to this Deed nor to any exercise by the Chargee of its right to consolidate mortgages or its power of sale.
- 10.6 A certificate in writing by an officer or agent of the Chargee that any power of sale or other disposal has arisen and is exercisable shall be, in the absence of manifest error, conclusive evidence of that fact in favour of a purchaser of all or any part of the Security Assets.
- 10.7 The Secured Liabilities may be enforced against the Chargor without having recourse to any other rights of the Chargee.

11. Application of proceeds

- 11.1 Each payment made by the Chargor under this Deed shall be made in the manner in which payments are to be made by the Chargor under the Loan Agreement.
- 11.2 [Reserved]
- 11.3 Sections 109(6) and (8) of the Act shall not apply to a Receiver under this Deed.
- 11.4 Until the Secured Liabilities have been paid and discharged in full, the Chargor may place and keep (for such time as it shall determine) any money received, recovered or realised pursuant to this Deed or on account of the Chargor's liability in respect of the Secured Liabilities in an interest bearing separate suspense account and the Receiver may retain the same for the period which it and the Chargee consider expedient without having any obligation to apply all or any part of that money in or towards discharge of the Secured Liabilities.

12. Receiver

- 12.1 Except as provided in Clause 12.5, the Chargee may by writing (acting through an authorised officer of the Chargee) without notice to the Chargor appoint one or more persons to be Receiver of all or any part of the Security Assets (each such person being entitled to act individually as well as jointly and for all purposes deemed to be the agent of the Chargor) if:
- (a) the Chargor requests it;
 - (b) an Enforcement Event is subsisting; or
 - (c) a petition or application is presented for the making of an administration order in relation to the Chargor.
- 12.2 Each Receiver appointed under this Deed shall have all the powers conferred by the Act on mortgagees and receivers appointed under the Act (except that section 103 of the Act does not apply), so that the powers set out in schedule 1 to the Insolvency Act 1986 shall extend to every Receiver, whether or not such person is an administrative receiver. In addition, notwithstanding any liquidation of the Chargor, each Receiver shall have power to:
- (a) exercise all rights, powers, obligations, remedies and authorities conferred on the Chargee under this Deed, but only following a written notification from either the Receiver or the Chargee to the Chargor;
 - (b) redeem any prior security on or relating to the Security Assets and settle and pass the accounts of the person entitled to that prior security,

so that any accounts settled and passed shall (subject to any manifest error) be conclusive and binding on the Chargor and the money so paid shall be deemed to be an expense properly incurred by the Receiver;

- (c) settle any claims, accounts, disputes, questions and demands with or by any person who is or claims to be a creditor of the Chargor or relating to all or any part of the Security Assets; and
- (d) do all other acts and things (including signing and executing all documents and deeds) as the Receiver considers to be incidental or conclusive to any of the matters or powers in this Deed, or otherwise incidental or conducive to the preservation, improvement or realisation of all or any part of the Security Assets,

and in each case it shall be entitled to use the name of the Chargor and exercise the relevant power in any manner which it thinks fit.

- 12.3 Any appointment made by the Chargee under Clause 12.1 may be by Deed, under seal or in writing under its hand.
- 12.4 Except as provided in Clause 12.5, any restriction imposed by law on the right of a mortgagee to appoint a Receiver (including under section 109(1) of the Act) does not apply to this Deed.
- 12.5 The Chargee shall not be entitled to appoint a Receiver solely as a result of the obtaining of a moratorium (or anything done with a view to obtaining a moratorium) under the Insolvency Act 2000 except with the leave of the court.
- 12.6 The Chargee may by notice remove from time to time any Receiver (subject to the provisions of section 45 of the Insolvency Act 1986 in the case of an administrative receivership) and, whenever it may deem appropriate appoint a new Receiver in the place of any Receiver whose appointment was terminated for whatever reason.

13. Currency

- 13.1 All monies received or held by the Chargee or any Receiver under this Deed may be converted into any other currency which the Chargee considers necessary to cover the Secured Liabilities in that other currency at the Chargee's spot rate of exchange then prevailing for purchasing that other currency with the existing currency.
- 13.2 No payment to the Chargee (whether under any judgment or court order or otherwise) shall discharge the obligation or liability of the Chargor in respect of which it was made unless and until the Chargee has received payment in full in the currency in which the obligation or liability is payable or, if the currency of payment is not specified, was incurred. To the extent that the

amount of any such payment shall on actual conversion into that currency fall short of that obligation or liability expressed in that currency, the Chargee shall have a further separate cause of action against the Chargor and shall be entitled to enforce the Security to recover the amount of the shortfall.

14. Power of attorney

- 14.1 The Chargor irrevocably appoints the Chargee and each Receiver severally as its attorney to sign, execute, deliver and perfect on its behalf all deeds and documents (including any stock transfer forms and other instruments of transfer) and to do all acts and things necessary to:
- (a) carry out any obligation imposed on the Chargor under this Deed which the Chargor, seven Business Days after receipt of a notice from the Chargee of failure to carry out such obligation, continues to fail to carry out (including without limitation the execution and delivery of any deeds, charges, assignments or other security and any transfers of the Security Assets); or
 - (b) exercise or delegate the exercise of all or any of the rights, powers and authorities conferred on the Chargee by or pursuant to this Deed or by law (including without limitation at any time while an Enforcement Event is subsisting the exercise of any right of a legal or beneficial owner of the Security Assets).
- 14.2 The Chargor shall ratify and confirm all deeds and documents executed and all acts and things done by the attorney in the proper exercise of that power of attorney.

15. Assignment

- 15.1 Subject to Clause 15.2, the Chargor may not assign, transfer, charge or deal in any other manner with all or any of its rights or obligations under this Deed, or enter into any transaction that would result in all or any of those rights or obligations passing to another person without the prior written consent of the Chargee.
- 15.2 Optinuity Alliance Resources Corporation may act as the Borrower's agent to do and perform on behalf of the Borrower any and every act and thing required or necessary to be done pursuant to the terms of this Deed. The Borrower shall remain solely responsible for compliance with its obligations under this Deed.
- 15.3 The Chargee may, subject to the terms of the Loan Agreement, assign or transfer all or any of its rights under this Deed at any time to any person, to the extent permitted by the Loan Documents.

16. Protection of third parties

- 16.1 No purchaser or other person dealing with the Chargee or any Receiver shall be concerned to enquire:
- (a) whether all or any of the Secured Liabilities have become due or payable, or remain unpaid or undischarged;
 - (b) whether any power exercised or purported to be exercised by it or him has become exercisable;
 - (c) whether any money remains due on the Security;
 - (d) as to the propriety or regularity of any of its or his actions; or
 - (e) as to the application of any money paid to it or him.
- 16.2 In the absence of bad faith on the part of such purchaser or other person, such dealings shall be deemed, so far as regards the safety and protection of such purchaser or other person, to be within the powers conferred by this Deed and to be valid accordingly.

17. Release of the Security

- 17.1 If the Chargee, acting reasonably, considers that any amount paid or credited to it is reasonably likely to be avoided, otherwise set aside or reduced by virtue of any bankruptcy, insolvency, liquidation or similar laws such amount shall not be considered to have been irrevocably paid for the purpose of this Deed.
- 17.2 Where any discharge, release or cancellation (whether in respect of this Deed, any other security or otherwise) is made in whole or in part or any arrangement is made on the faith of any payment, security or other disposition which is avoided, reduced or refunded or which must be repaid on bankruptcy, liquidation or otherwise without limitation, this Deed and the liability of the Chargor under this Deed shall continue as if there had been no such discharge, release, cancellation or other arrangement.
- 17.3 The Security constituted by this Deed shall be automatically and irrevocably released and cancelled following the termination of the Security Period and all rights to the Security Assets shall revert to the Chargor. At such time the Chargee shall, at the cost of the Chargor, take such actions as the Chargor may reasonably request in order to evidence the release and cancellation of the Security.
- 17.4 Promptly following the release of the Security in accordance with this Clause 17, the Chargee shall, at the expense of the Chargor, return to the Chargor any share certificates, stock transfer forms and/or any other documents relating to the Security Assets deposited with it in accordance with Clause 3 of this Deed.

17.5 A certificate of the Chargee as to the amount of all or any part of the Secured Liabilities shall, as against the Chargor, be conclusive evidence of such amount in the absence of manifest error.

18. Costs and expenses

18.1 All costs and expenses, including fees and disbursements of counsel, incurred in connection with preparing for, entering into and carrying out this Agreement and performing and consummating the transactions contemplated by this Agreement shall be paid by the Person incurring such costs and expenses.

18.2 All costs and expenses, including fees and disbursements of counsel, incurred in connection with the enforcement or protection of the Chargee's rights (A) in connection with this Agreement, including its rights under this Section, or (B) in connection with the Loans, including all such reasonable out-of-pocket expenses incurred during any workout, restructuring or negotiations in respect of such Loans, shall be paid by the Chargor.

19. Notices

19.1 The Chargor shall, promptly on becoming aware of any of the same, notify the Chargee:

- (a) if any the representation or warranty set out in this Deed is or has become incorrect or misleading in any respect when made or deemed to be repeated; and
- (b) of any breach by it of any provision of this Deed.

19.2 Any notice or other communication given under this Deed shall be sufficiently given and effective if given in accordance with the provisions of the Loan Agreement

20. Chargee as Trustee

This Deed is one of the Loan Documents. The Chargee is party to this Deed in its capacity as agent and trustee for and on behalf of itself and the Loan Agreement Secured Parties pursuant to the terms and conditions of the Loan Agreement. As between the Chargee and the Loan Agreement Secured Parties the terms and conditions of the Loan Agreement which apply to the Chargee under that agreement also apply to it as Chargee under this Deed.

20.1 *Declaration of Trust*

The Chargee declares that it shall hold the Security on trust for those entities which are from time to time Loan Agreement Secured Parties, to the extent that such Security purports to secure the Secured Liabilities.

20.2 *Rights*

The Chargee may rely on, exercise and be protected by the discretions, protections, powers and rights conferred on trustees, mortgagees or receivers under the Act, the Trustee Acts, the Trustee Investment Act 1962 and the Insolvency Act 1986.

20.3 *Duties*

Each of the parties agrees that the Chargee shall have only those duties, obligations and responsibilities expressly specified in this Deed or any other Loan Document (and no others shall be implied).

20.4 *Conflicts*

Section 1 of the Trustee Act 2000 shall not apply to the duties of the Chargee in relation to the trusts constituted by this Deed. Where there are any inconsistencies between the Trustee Acts and the provisions of this Deed, the provisions of this Deed shall, to the extent allowed by law, prevail and, in the case of any inconsistency with the Trustee Act 2000, the provisions of this Deed shall constitute a restriction or exclusion for the purposes of that Act.

20.5 *Resignation and Replacement*

Any resignation or replacement of the Chargee or any appointment of a successor to the Chargee shall take effect in accordance with the provisions of the Loan Agreement save that no resignation of the Chargee as trustee hereunder shall take effect unless at least one other trustee has been appointed.

20.6 *Winding up of Trust*

If the Chargee, with the approval of the Lenders, determines that (a) all of the Secured Liabilities and all other obligations secured by this Deed have been fully and finally discharged and (b) none of the Loan Agreement Secured Parties is under any commitment, obligation or liability (whether actual or contingent) to make advances or provide other financial accommodation to the Chargor pursuant to the Loan Agreement, the trusts set out in this Deed shall be wound up. At that time the Chargee shall, at the request of and at the sole cost of the Chargor, release, without recourse or warranty, all of the Security then held by it and the rights of the Chargee under this Deed, at which time each of the Chargor and Chargee shall be released from its obligations under this Deed (save for those which arose prior to such winding-up).

20.7 *Perpetuity Period*

The perpetuity period for the trusts in this Deed is 125 years from the date of this Deed.

21. Miscellaneous

21.1 *Language*

- (a) Any notice given under or in connection with this Deed must be in English.
- (b) This Deed is in the English language and if this Deed is translated into another language, the English language text shall prevail.

21.2 *No partnership/agency*

Nothing in this Deed is intended to or shall operate to create a partnership between the parties, or to authorise the Chargor to act as agent for the Chargee for any purpose.

21.3 *Entire agreement*

- (a) This Deed, and the documents referred to in it, constitute the entire agreement between the parties relating to the transactions contemplated by this Deed and supersede any previous agreement between the parties relating to such transactions.
- (b) Each party acknowledges that, in entering into this Deed, and the documents referred to in it, it is not relying on, and shall have no remedy in respect of, any statement, representation, warranty, undertaking or assurance of any nature whatsoever of any person (whether party to this Deed or not) other than as expressly set out in this Deed and the documents referred to in it. Each party waives all rights and remedies which, but for this Clause, it might otherwise have had in respect of any such statement, representation, warranty, undertaking or assurance. Nothing in this Clause shall limit or exclude any liability for fraud.

21.4 *Variation*

No variation, amendment or waiver of any right, remedy (whether arising under this Deed or under the general law) or any consent given under this Deed shall be valid unless it is in writing and signed by or on behalf of each party.

21.5 *Invalidity and severance*

- (a) If any provision of this Deed shall be found by any court or administrative body of competent jurisdiction to be illegal, invalid or

unenforceable, such invalidity or unenforceability shall not affect the other provisions of this Deed which shall remain in full force and effect.

- (b) If any provision of this Deed is so found to be or become illegal, invalid or unenforceable but would be valid or enforceable if some part of the provision were deleted, the provision in question shall apply with such modification (s) as may be necessary to make it valid and enforceable.
- (c) The parties shall, in the circumstances referred to in paragraph (a), and if paragraph (b) does not apply, attempt to substitute for any invalid or unenforceable provision a legal, valid and enforceable provision which achieves to the greatest extent possible the same effect as would have been achieved by the illegal, invalid or unenforceable provision. The obligations of the parties under any illegal, invalid or unenforceable provision of this Deed shall be suspended while an attempt at such substitution is made.

21.6 *Counterparts*

This Deed may be executed and delivered in any number of counterparts, each of which, when executed and delivered, shall be an original, and all of which together shall constitute one and the same deed.

21.7 *Rights of third parties*

A person who is not a party to this Deed may not enforce, or enjoy the benefit of, any term impliedly or expressly conferred by this Deed under the Contracts (Rights of Third Parties) Act 1999 save for a Receiver or attorney appointed under this Deed.

21.8 *Perpetuity period*

If the rule against perpetuities applies to any trust created by this Deed, the perpetuity period shall be 125 years (as specified by section 5(1) of the Perpetuities and Accumulations Act 2009).

22. **Governing law and jurisdiction**

22.1 This Deed and any non-contractual obligations arising from or in connection with it or its subject matter shall be governed by and construed in accordance with English law.

22.2 The English courts shall have exclusive jurisdiction to settle any dispute arising out of or in connection with this Deed or any non-contractual obligations arising out of it or in connection with it or its subject matter and the parties submit to the exclusive jurisdiction of the English courts.

-
- 22.3 The Chargor irrevocably appoints the Company whose address is 6 Gracechurch Street, London, EC3V 0AT as its agent in England to receive on its behalf service of any proceedings arising in connection with this Deed.
- 22.4 The Chargee irrevocably appoints the Company whose address is 4th Floor, 6 Gracechurch Street, London, EC3V 0AT as its agent in England to receive on its behalf service of any proceedings arising in connection with this Deed.

**CERTIFICATION PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Joseph W. Brown, certify that:

1. I have reviewed the Quarterly Report of MBIA Inc. (the "Company") on Form 10-Q for the period ending June 30, 2013 as filed with the Securities and Exchange Commission on the date hereof (the "Report");
2. Based on my knowledge, this Report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this Report;
3. Based on my knowledge, the financial statements, and other financial information included in this Report, fairly present in all material respects the financial condition, results of operations and cash flows of the Company as of, and for, the periods presented in this Report;
4. The Company's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Company and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this Report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the Company's disclosure controls and procedures and presented in this Report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this Report based on such evaluation; and
 - (d) disclosed in this Report that there were no changes in the Company's internal control over financial reporting that occurred during the Company's second quarter of 2013 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting; and
5. The Company's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Company's auditors and to the audit committee of the board of directors:
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Company's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Company's internal control over financial reporting.

National Public Finance Guarantee Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 1: Business Developments and Risks and Uncertainties

Summary

National Public Finance Guarantee Corporation is a wholly-owned subsidiary of MBIA Inc. through an intermediary holding company, National Public Finance Guarantee Holdings, Inc. National Public Finance Guarantee Corporation and its subsidiaries are referred to as "National." National Real Estate Holdings of Armonk, LLC is a wholly-owned subsidiary of National.

Through its reinsurance of United States ("U.S.") public finance financial guarantees from MBIA Insurance Corporation and Financial Guaranty Insurance Company, National's insurance portfolio consists of municipal bonds, including tax-exempt and taxable indebtedness of U.S. political subdivisions, as well as utility districts, airports, health care institutions, higher educational facilities, student loan issuers, housing authorities and other similar agencies and obligations issued by private entities that finance projects that serve a substantial public purpose. Municipal bonds and privately issued bonds used for the financing of public purpose projects generally are supported by taxes, assessments, user fees or tariffs related to the use of these projects, by lease payments or by other similar types of revenue streams.

Business Developments and Risks and Uncertainties

As of June 30, 2013, National was rated A with a stable outlook by Standard & Poor's Financial Services LLC and Baa1 with a positive outlook by Moody's Investors Service, Inc.

In May of 2013, MBIA Inc., together with its subsidiaries MBIA Insurance Corporation and National, entered into a comprehensive settlement agreement and related agreements (the "BofA Settlement Agreement") with Bank of America Corporation and certain of its subsidiaries (collectively, "Bank of America"). Additionally, in May of 2013, MBIA Inc., together with its subsidiaries, MBIA Insurance Corporation and National, entered into a settlement agreement with Societe Generale. As a result of the BofA Settlement Agreement, the repayment of MBIA Insurance Corporation's secured loan from National and recent credit ratings upgrades, certain barriers to re-enter the bond insurance market have been removed and National is currently evaluating strategies for such re-entering into the U.S. public finance market. Subsequent to the BofA Settlement Agreement and the Societe Generale settlement, all litigation brought originally by the group of eighteen domestic and international financial institutions, relating to the establishment of National, has been resolved.

National maintains simultaneous repurchase and reverse repurchase agreements ("Asset Swap") with MBIA Inc. for up to \$2.0 billion based on the fair value of securities borrowed. The Asset Swap provides MBIA Inc. with eligible assets to pledge under investment agreements and derivative contracts in MBIA Inc.'s asset/liability products business. As of June 30, 2013, the notional amount utilized under each of these agreements was \$455 million and the fair value of collateral pledged by National and MBIA Inc. under these agreements was \$474 million and \$495 million, respectively. The net average interest rate on these transactions was 0.34% and 0.39% for the six months ended June 30, 2013 and 2012 respectively. The New York State Department of Financial Services ("NYSDFS") approved the Asset Swap in connection with the re-domestication of National to New York. National has committed to the NYSDFS to use commercially reasonable efforts to reduce the amount of the Asset Swap over time.

Note 2: Significant Accounting Policies

National has disclosed its significant accounting policies in "Note 2: Significant Accounting Policies" in the Notes to Consolidated Financial Statements included in Exhibit 99.1 to MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012. The following significant accounting policies provide an update to those included under the same captions in Exhibit 99.1 to MBIA Inc.'s Annual Report on Form 10-K.

National Public Finance Guarantee Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 2: Significant Accounting Policies (continued)

Basis of Presentation

The accompanying consolidated financial statements are unaudited and include the accounts of National and its wholly-owned subsidiaries. The accompanying unaudited interim consolidated financial statements do not include all of the information and disclosures required by accounting principles generally accepted in the United States of America ("GAAP") for annual periods. These statements should be read in conjunction with National's consolidated financial statements and notes thereto included in Exhibit 99.1 to MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012. The accompanying consolidated financial statements have not been audited by an independent registered public accounting firm in accordance with the standards of the Public Company Accounting Oversight Board (U.S.), but in the opinion of management such consolidated financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for the fair statement of National's consolidated financial position and results of operations.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. As additional information becomes available or actual amounts become determinable, the recorded estimates are revised and reflected in operating results.

The results of operations for the three and six months ended June 30, 2013 may not be indicative of the results that may be expected for the year ending December 31, 2013. The December 31, 2012 consolidated balance sheet was derived from audited financial statements, but does not include all disclosures required by GAAP for annual periods. Certain amounts in prior years' financial statements have been reclassified to conform to the current presentation. Such reclassifications had no impact on total revenues, expenses, assets, liabilities, or shareholder's equity for all periods presented.

Subsequent Events

National evaluated all subsequent events as of August 7, 2013, the date of issuance of the consolidated financial statements, for inclusion in National's consolidated financial statements and/or accompanying notes.

Note 3: Recent Accounting Pronouncements

Recently Adopted Accounting Standards

Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (ASU 2013-02)

In February 2013, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") 2013-02, "Comprehensive Income (Topic 220)—Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" that requires an entity to present information about the amounts reclassified out of accumulated other comprehensive income ("AOCI") by component and to present significant amounts reclassified out of AOCI by the respective line items of net income. The amendment only affects National's disclosures and does not affect National's consolidated balance sheets, results of operations, or cash flows. National adopted this standard in the first quarter of 2013.

Refer to the Notes to Consolidated Financial Statements of National included in Exhibit 99.1 to MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012 for further information regarding the effects of recently adopted accounting standards on prior year financial statements.

Note 4: Loss and Loss Adjustment Expense Reserves

For the six months ended June 30, 2013, National recognized \$70 million of loss and loss adjustment expense ("LAE") primarily related to certain general obligation issues.

Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" in the Notes to Consolidated Financial Statements included in Exhibit 99.1 to MBIA Inc.'s Annual Report on Form 10-K for the fiscal year ended December 31, 2012 for information about National's monitoring of outstanding insured obligations and for additional information about its loss reserving process.

National Public Finance Guarantee Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 4: Loss and Loss Adjustment Expense Reserves (continued)

The following table provides information about the financial guarantees and related claim liability included in each of National's surveillance categories as of June 30, 2013:

\$ in millions	Surveillance Categories				Total
	Caution List Low	Caution List Medium	Caution List High	Classified List	
Number of policies	28	4	7	48	87
Number of issues ⁽¹⁾	13	3	6	18	40
Remaining weighted average contract period (in years)	10.7	7.8	10.3	12.3	11.3
Gross insured contractual payments outstanding: ⁽²⁾					
Principal	\$ 1,003	\$ 73	\$ 80	\$ 953	\$2,109
Interest	1,269	33	44	1,036	2,382

Unearned premium revenue	\$ 16	\$ -	\$ 1	\$ 18	\$ 35

(1) - An "issue" represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments.

(2) - Represents contractual principal and interest payments due by the issuer of the obligations insured by National.

The following table provides information about the financial guarantees and related claim liability included in each of National's surveillance categories as of December 31, 2012:

\$ in millions	Surveillance Categories				Total
	Caution List Low	Caution List Medium	Caution List High	Classified List	
Number of policies	20	9	7	48	84
Number of issues ⁽¹⁾	9	4	7	18	38
Remaining weighted average contract period (in years)	11.1	7.4	12.8	13.1	11.7
Gross insured contractual payments outstanding: ⁽²⁾					
Principal	\$ 817	\$ 190	\$ 122	\$ 843	\$1,972
Interest	1,161	88	80	999	2,328
Total	<u>\$ 1,978</u>	<u>\$ 278</u>	<u>\$ 202</u>	<u>\$ 1,842</u>	<u>\$4,300</u>
Gross claim liability	\$ -	\$ -	\$ -	\$ 310	\$ 310
Less:					
Gross potential recoveries	-	-	-	387	387
Discount, net	-	-	-	(6)	(6)
Net claim liability (recoverable)	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ (71)</u>	<u>\$ (71)</u>
Unearned premium revenue	\$ 12	\$ 4	\$ 2	\$ 18	\$ 36

(1) - An "issue" represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments.

(2) - Represents contractual principal and interest payments due by the issuer of the obligations insured by National.

National's potential recoveries are typically based on either salvage rights, the rights conferred to National through the transactional documents (inclusive of the insurance agreement), or subrogation rights embedded within financial guarantee insurance policies. Expected salvage and subrogation recoveries, as well as recoveries from other remediation efforts, reduce National's claim liability. Once a claim payment has been made, the claim liability has been satisfied and National's right to recovery is no longer considered an offset to future expected claim payments, and is recorded as a salvage asset. The amount of recoveries recorded by National is limited to paid claims plus the present value of projected future claim payments. As claim payments are made, the recorded amount of potential recoveries may exceed the remaining amount of claim liability for a given policy.

National Public Finance Guarantee Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 4: Loss and Loss Adjustment Expense Reserves (continued)

While National believes it will be successful in realizing recoveries from contractual claims, the ultimate amounts recovered may be materially different from those recorded by National given the inherent uncertainty in the manner of resolving the claims (e.g. litigation) and the assumptions used in the required estimation process for accounting purposes which are based, in part, on judgments and other information that are not easily corroborated by historical data or other relevant benchmarks.

The following table presents the components of National's loss and LAE reserves and insurance loss recoverable as reported on National's consolidated balance sheets as of June 30, 2013 and December 31, 2012 for insured obligations within National's "Classified List." The loss reserves (claim liability) and insurance claim loss recoverable included in the following table represent the present value of the probability-weighted future claim payments and recoveries reported in the preceding tables.

In millions	As of June 30, 2013	As of December 31, 2012
Loss reserves (claim liability)	\$ 190	\$ 143
LAE reserves	28	9
Loss and LAE reserves	<u>\$ 218</u>	<u>\$ 152</u>
Insurance claim loss recoverable	\$ (173)	\$ (216)
LAE insurance loss recoverable	-	(33)
Insurance loss recoverable	<u>\$ (173)</u>	<u>\$ (249)</u>

The following table presents changes in National's loss and LAE reserves for the six months ended June 30, 2013. Changes in the loss and LAE reserves attributable to the accretion of the claim liability discount, changes in discount rates, changes in the timing and amounts of estimated payments and recoveries, changes in assumptions and changes in LAE reserves are recorded in "Losses and loss adjustment" expenses in National's consolidated statements of operations. LAE reserves are expected to be settled within a one-year period and are not discounted. The weighted average risk-free rate used to discount the claim liability was 2.23% as of June 30, 2013.

In millions	Changes in Loss and LAE Reserves for Six Months Ended June 30, 2013								Gross Loss and LAE Reserve as of June 30, 2013
Gross Loss and LAE Reserve as of December 31, 2012	Loss Payments for Cases with Reserves	Accretion of Claim Liability Discount	Changes in Discount Rates	Changes in Timing of Payments	Changes in Amount of Net Payments	Changes in Assumptions	Changes in Unearned Premium Revenue	Changes in LAE Reserves	
<u>\$ 152</u>	<u>\$ (3)</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 51</u>	<u>\$ (1)</u>	<u>\$ 19</u>	<u>\$ 218</u>

The increase in case reserves for the six months ended June 30, 2013 primarily related to the change in assumptions due to an increase in reserves associated with National's exposure to certain general obligation bond exposures.

The following table presents changes in National's insurance loss recoverable for the six months ended June 30, 2013. Changes in the insurance loss recoverable attributable to the accretion of the discount on the recoverable, changes in discount rates, changes in the timing and amounts of estimated collections, changes in assumptions and the changes in LAE recoverable are recorded in "Losses and loss adjustment" expenses in National's consolidated statements of operations.

In millions	Changes in Insurance Loss Recoverable for the Six Months Ended June 30, 2013							Insurance Loss Recoverable as of June 30, 2013
Insurance Loss Recoverable as of December 31, 2012	Collections for Cases with Recoverables	Accretion of Insurance Loss Recoverable	Changes in Discount Rates	Changes in Timing of Collections	Changes in Amounts of Collections	Changes in Assumptions	Changes in LAE Recoverable	
<u>\$ 249</u>	<u>\$ (52)</u>	<u>\$ -</u>	<u>\$ (1)</u>	<u>\$ -</u>	<u>\$ 17</u>	<u>\$ (7)</u>	<u>\$ (33)</u>	<u>\$ 173</u>

The decrease in insurance loss recoverable for the six months ended June 30, 2013 primarily related to collections on previously reserved case and LAE recoverables.

National Public Finance Guarantee Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 4: Loss and Loss Adjustment Expense Reserves (continued)

Remediation actions may involve, among other things, waivers or renegotiations of financial covenants or triggers, waivers of contractual provisions, the granting of consents, transfer of servicing, consideration of restructuring plans, acceleration, security or collateral enforcement, actions in bankruptcy or receivership, litigation and similar actions. The types of remedial actions pursued are based on the insured obligation's risk type and the nature and scope of the event giving rise to the remediation. As part of any such remedial actions, National seeks to improve its security position and to obtain concessions from the issuer of the insured obligation. From time to time, the issuer of a National-insured obligation may, with the consent of National, restructure the insured obligation by extending the term, increasing or decreasing the par amount or decreasing the related interest rate, with National insuring the restructured obligation.

Costs associated with remediating insured obligations assigned to National's "Caution List—Low," "Caution List—Medium," "Caution List—High" and "Classified List" are recorded as LAE. LAE is primarily recorded as part of National's provision for its loss reserves and included in "Losses and loss adjustment" expense on National's consolidated statements of operations. The following table presents the gross expenses related to remedial actions for insured obligations:

In millions	Six Months Ended June 30,	
	2013	2012
LAE incurred, gross	\$ 23	\$ 4

Note 5: Fair Value of Financial Instruments

Fair value is a market-based measure considered from the perspective of a market participant. Therefore, even when market assumptions are not readily available, National's own assumptions are set to reflect those which it believes market participants would use in pricing an asset or liability at the measurement date. The fair value measurements of financial instruments held or issued by National are determined through the use of observable market data when available. Market data is obtained from a variety of third-party sources, including dealer quotes. If dealer quotes are not available for an instrument that is infrequently traded, National uses alternate valuation methods, including either dealer quotes for similar instruments or modeling using market data inputs. The use of alternate valuation methods generally requires considerable judgment in the application of estimates and assumptions, and changes to such estimates and assumptions may produce materially different fair values.

The accounting guidance for fair value measurement establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available and reliable. Observable inputs are those National believes that market participants would use in pricing an asset or liability based on available market data. Unobservable inputs are those that reflect National's beliefs about the assumptions market participants would use in pricing an asset or liability based on the best information available. The fair value hierarchy is broken down into three levels based on the observability and reliability of inputs, as follows:

- Level 1—Valuations based on quoted prices in active markets for identical assets or liabilities that National can access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail any degree of judgment.
- Level 2—Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly. Level 2 assets include debt securities with quoted prices that are traded less frequently than exchange-traded instruments, securities which are priced using observable inputs and derivative contracts whose values are determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.
- Level 3—Valuations based on inputs that are unobservable and supported by little or no market activity and that are significant to the overall fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques where significant inputs are unobservable, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The availability of observable inputs can vary from product to product and period to period and is affected by a wide variety of factors, including, for example, the type of product, whether the product is new and not yet established in the marketplace, and other characteristics particular to the product. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, National assigns the level in the fair value hierarchy for which the fair value measurement in its entirety falls, based on the least observable input that is significant to the fair value measurement.

Note 5: Fair Value of Financial Instruments (continued)

1. Financial Instruments

Financial instruments held by National primarily consist of investments in debt securities. Substantially all of National's investments are priced by independent third parties, including pricing services and brokers. Typically National receives one pricing service value or broker quote for each instrument, which represents a non-binding indication of value. National reviews the assumptions, inputs and methodologies used by pricing services to obtain reasonable assurance that the prices used in its valuations reflect fair value. When National believes a third-party quotation differs significantly from its internally developed expectation of fair value, whether higher or lower, National reviews its data or assumptions with the provider. This review includes comparing significant assumptions such as prepayment speeds, default ratios, forward yield curves, credit spreads and other significant quantitative inputs to internal assumptions, and working with the price provider to reconcile the differences. The price provider may subsequently provide an updated price. In the event that the price provider does not update their price, and National still does not agree with the price provided, National will try to obtain a price from another third-party provider, such as a broker, or use an internally developed price which it believes represents the fair value of the investment. The fair values of investments for which internal prices were used were not significant to the aggregate fair value of National's investment portfolio as of June 30, 2013 or December 31, 2012. All challenges to third-party prices are reviewed by the staff of National with relevant expertise to ensure reasonableness of assumptions.

In addition to challenging pricing assumptions, National obtains reports from the independent accountants for significant third-party pricing services attesting to the effectiveness of the controls over data provided to National. These reports are obtained annually and are reviewed by National to ensure key controls are applied by the pricing services, and that appropriate user controls are in place at the third-party pricing services organization to ensure proper measurement of the fair values of its investments. In the event that any controls in these reports are deemed as ineffective by independent accountants, National will take the necessary actions to ensure that internal user controls are in place to mitigate the control risks. No deficiencies were noted for significant third-party pricing services used.

2. Internal Review Process

All significant financial instruments are reviewed by committees created by National to ensure compliance with National policies and risk procedures in the development of fair values of financial assets and liabilities. These valuation committees review, among other things, key assumptions used for internally developed prices, significant changes in sources and uses of inputs, including changes in model approaches, and any adjustments from third-party inputs or prices to internally developed inputs or prices. The committees also review any significant impairment or improvements in fair values of the financial instruments from prior periods. From time to time, these committees will reach out to National valuation experts to better understand key methods and assumptions used for the determination of fair value, including understanding significant changes in fair values. These committees are comprised of senior finance team members with the relevant experience in the financial instruments their committee is responsible for. Each quarter, these committees document their agreement with the fair values developed by management of National as reported in the quarterly and annual financial statements.

Valuation Techniques

Valuation techniques for financial instruments measured at fair value or disclosed at fair value are described below.

Fixed-Maturity Securities (including short-term investments) Held as Available-For-Sale, Investments Carried at Fair Value, Investments Pledged as Collateral, and Other Investments

Fixed-maturity securities (including short-term investments) held as available-for-sale ("AFS"), investments carried at fair value, investments pledged as collateral, and other investments include investments in U.S. Treasury and government agencies, foreign governments, corporate obligations, mortgage-backed securities and asset-backed securities ("ABS") (including commercial mortgage-backed securities and collateralized debt obligations ("CDOs")), state and municipal bonds and other investments (including perpetual debt securities, loans receivables and money market mutual funds).

These investments are generally valued based on recently executed transaction prices or quoted market prices. When quoted market prices are not available, fair value is generally determined using quoted prices of similar investments or a valuation model based on observable and unobservable inputs. Inputs vary depending on the type of investment. Observable inputs include contractual cash flows, interest rate yield curves, credit default swap ("CDS") spreads, prepayment and volatility scores, diversity scores, cross-currency basis index spreads, and credit spreads for structures similar to the financial instrument in terms of issuer, maturity and seniority. Unobservable inputs include cash flow projections and the value of any credit enhancement.

National Public Finance Guarantee Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 5: Fair Value of Financial Instruments (continued)

Investments based on quoted market prices of identical investments in active markets are classified as Level 1 of the fair value hierarchy. Level 1 investments generally consist of U.S. Treasury and government agency and money market securities. Quoted market prices of investments in less active markets, as well as investments which are valued based on other than quoted prices for which the inputs are observable, such as interest rate yield curves, are categorized in Level 2 of the fair value hierarchy. Investments that contain significant inputs that are not observable are categorized as Level 3.

Cash and Cash Equivalents, Receivable for Investments Sold, Accrued Investment Income and Payable for Investments Purchased

The carrying amounts of cash and cash equivalents, receivable for investments sold, accrued investment income and payable for investments purchased approximate their fair values due to the short-term nature and credit worthiness of these instruments.

Securities Purchased Under Agreements to Resell

The fair values of securities purchased under agreements to resell are determined based on the underlying securities posted as collateral for the resell agreements.

Secured Loan to an Affiliate

The fair value of the secured loan at December 31, 2012, that was repaid in the second quarter of 2013, was determined using the net present value of expected cash flows from the loan. The discount rate is the yield to maturity of a comparable corporate bond index.

Securities Sold Under Agreements to Repurchase

The fair values of securities sold under agreements to repurchase are determined based on the underlying securities posted as collateral for the repurchase agreements.

Derivative Liabilities

Derivative liabilities are valued using market-based inputs, including interest rate yield curves, foreign exchange rates, and credit spreads. Derivative liabilities are classified as Level 2 within the fair value hierarchy.

Financial Guarantees

Gross Financial Guarantees—The fair value of gross financial guarantees is determined using discounted cash flow techniques based on inputs that include (i) assumptions of expected losses on financial guarantee policies where loss reserves have not been recognized, (ii) amount of losses expected on financial guarantee policies where loss reserves have been established, net of expected recoveries, (iii) the cost of capital reserves required to support the financial guarantee liability, (iv) operating expenses, and (v) discount rates. The CDS spread and recovery rates of a similar municipal bond insurance company are used as the discount rate for National, as National does not have a published CDS spread and recovery rate.

The carrying value of National's gross financial guarantees consists of unearned premium revenue and loss and LAE reserves, net of the insurance loss recoverable as reported on National's consolidated balance sheets.

Ceded Financial Guarantees—The fair value of ceded financial guarantees is determined by applying the percentage ceded to reinsurers to the related fair value of the gross financial guarantees. The carrying value of ceded financial guarantees consists of prepaid reinsurance premiums as reported within "Other assets" on National's consolidated balance sheets.

Note 5: Fair Value of Financial Instruments (continued)

Transfers into and out of Level 3 were \$10 million and \$9 million, respectively, for the three months ended June 30, 2013. Transfers into and out of Level 2 were \$9 million and \$10 million, respectively, for the three months ended June 30, 2013. Transfers into Level 3 were principally related to CDOs, residential mortgage-backed securities ("RMBS") agency and other ABS where inputs, which are significant to their valuation, became unobservable during the quarter. Transfers out of Level 3 were principally for CDOs and other ABS securities where inputs, which are significant to their valuation, became observable during the quarter. These Level 2 inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs.

Transfers into and out of Level 3 were \$10 million and \$6 million, respectively, for the three months ended June 30, 2012. Transfers into and out of Level 2 were \$6 million and \$10 million, respectively, for the three months ended June 30, 2012. Transfers into Level 3 were principally related to RMBS agency, CDOs and perpetual debt securities where inputs, which are significant to their valuation, became unobservable during the quarter. Transfers out of Level 3 were principally for other ABS where inputs, which are significant to their valuation, became observable during the year. These Level 2 inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs.

There were no transfers in or out of Level 1 during the three months ended June 30, 2013 and 2012. All fair value hierarchy designations are made at the end of each accounting period.

There were no changes and no balances in Level 3 liabilities measured at fair value on a recurring basis for the three months ended June 30, 2013 and 2012.

The following tables present information about changes in Level 3 assets (including short-term investments) and liabilities measured at fair value on a recurring basis for the six months ended June 30, 2013 and 2012.

Changes in Level 3 Assets and Liabilities Measured at Fair Value on a Recurring Basis for the Six Months Ended June 30, 2013

Total fixed-maturity investments	2,323	(88)	38	(1)	2,361	(89)
Perpetual debt securities	3	-	-	-	3	-
Total	<u>\$ 2,326</u>	<u>\$ (88)</u>	<u>\$ 38</u>	<u>\$ (1)</u>	<u>\$ 2,364</u>	<u>\$ (89)</u>

National Public Finance Guarantee Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 6: Investments (continued)

In millions	December 31, 2012					
	Less than 12 Months		12 Months or Longer		Total	
	Unrealized		Unrealized		Unrealized	
	Fair Value	Losses	Fair Value	Losses	Fair Value	Losses
Fixed-maturity investments:						
U.S. Treasury and government agency	\$ 68	\$ (1)	\$ -	\$ -	\$ 68	\$ (1)
State and municipal bonds	63	-	41	(1)	104	(1)
Corporate obligations	189	(2)	3	-	192	(2)
Mortgage-backed securities:						
Residential mortgage-backed agency	172	-	-	-	172	-
Residential mortgage-backed non-agency	-	-	2	-	2	-
Commercial mortgage-backed	3	-	-	-	3	-
Asset-backed securities:						
Collateralized debt obligations	1	-	4	-	5	-
Other asset-backed	4	-	-	-	4	-
Total fixed-maturity investments	500	(3)	50	(1)	550	(4)
Perpetual debt securities	1	-	1	-	2	-
Total	\$ 501	\$ (3)	\$ 51	\$ (1)	\$ 552	\$ (4)

With the weighting applied on the fair value of each security relative to the total fair value, the weighted average contractual maturity of securities in an unrealized loss position as of June 30, 2013 and December 31, 2012 was 13 and 16 years, respectively. As of June 30, 2013 and December 31, 2012, there were 11 and 27 securities, respectively, that were in an unrealized loss position for a continuous twelve month period or longer, of which the fair values of 1 and 7 securities, respectively, were below book value by more than 5%.

National has evaluated on a security-by-security basis whether the unrealized losses in its investment portfolios were other-than-temporary considering the duration and severity of unrealized losses, the circumstances that gave rise to the unrealized losses, and whether National has the intent to sell the securities or more likely than not will be required to sell the securities before their anticipated recoveries. Based on its evaluation, National determined that the unrealized losses on these securities were temporary in nature because its impairment analysis, including projected discounted future cash flows, indicated that National would be able to recover the amortized cost of impaired assets. National also concluded that it does not have the intent to sell securities in an unrealized loss position and it is more likely than not that it would not have to sell these securities before recovery of their cost basis. In making this conclusion, National examined the cash flow projections for its investment portfolios, the potential sources and uses of cash in its businesses, and the cash resources available to its business other than sales of securities. It also considered the existence of any risk management or other plans as of June 30, 2013 that would require the sale of impaired securities. On a quarterly basis, National re-evaluates the unrealized losses in its investment portfolios to determine whether an impairment loss should be realized in current earnings based on adverse changes in its expectation of cash flows and changes in its intent to sell securities.

Sales of AFS Investments

Gross realized gains and losses are recorded in "Net gains (losses) on financial instruments at fair value and foreign exchange" in the consolidated statements of operations of National. The proceeds and gross realized gains and losses from sales of AFS investments for the three and six months ended June 30, 2013 and 2012 were as follows:

In millions	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Proceeds from sales	\$ 145	\$ 683	\$ 542	\$ 1,313
Gross realized gains	\$ 3	\$ 8	\$ 34	\$ 14
Gross realized losses	\$ (1)	\$ -	\$ (2)	\$ (1)

National Public Finance Guarantee Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 7: Income Taxes

National's income taxes and the related effective tax rates for the three and six months ended June 30, 2013 and 2012 are as follows:

In millions	Three Months Ended June 30,				Six Months Ended June 30,							
	2013		2012		2013		2012					
Income (loss) before income taxes	\$	13	\$	142	\$	154	\$	191				
Provision (benefit) for income taxes	\$	4	30.8%	\$	42	29.6%	\$	52	33.8%	\$	57	29.8%

For the six months ended June 30, 2013 and 2012, National's effective tax rate was lower than the U.S. statutory rate of 35% primarily due to tax exempt interest, net of proration.

Accounting for Uncertainty in Income Taxes

As of June 30, 2013 and 2012, National did not have any uncertain tax positions and corresponding interest and/or penalties related to income taxes. National is a member of MBIA Inc.'s consolidated U.S. tax group and its only income tax jurisdiction is the U.S. National also files premium and franchise taxes in various states.

Tax Sharing Arrangement

National files its U.S. Corporation Income Tax Return as a member of MBIA Inc.'s consolidated group. National participates in a tax sharing agreement with MBIA Inc. under which it is allocated its share of consolidated tax liability or tax benefit, determined on a separate company basis. In the six months ended June 30, 2013, National has, under the tax sharing agreement, made a tax payment to MBIA Inc. of \$17 million which represented additional tax liability for the tax year ended 2012 and an additional tax payment to MBIA Inc. of \$63 million which relates to the tax year ending 2013. National's payments are being placed in escrow by MBIA Inc. and will remain in escrow until the expiration of a two-year carryback period which would allow National to carryback a separate company tax loss and recover all or a portion of the escrowed funds. After the two year period, the escrow, to the extent not recovered upon carrying back a loss, is released to MBIA Inc. During the first half of 2013, \$115 million was released from escrow.

Note 8: Accumulated Other Comprehensive Income

The following table presents the changes in the components of AOCI for the six months ended June 30, 2013:

In millions	Unrealized Gains (Losses) on AFS Securities, Net ⁽¹⁾
Balance, January 1, 2013	\$ 68
Other comprehensive income before reclassifications	(80)
Amounts reclassified from AOCI	(19)
Net current period other comprehensive income	(99)
Balance, June 30, 2013	\$ (31)

(1) - All amounts are presented net of tax. Amounts in parentheses indicate debits.

The following table presents the details of the reclassifications from AOCI for the six months ended June 30, 2013:

In millions	Amounts Reclassified from AOCI ⁽¹⁾	Affected Line Item on the Consolidated Statements of Operations
Details about AOCI Components		
Reclassification adjustments on sale of securities	\$ (29)	Net gains (losses) on financial instruments at fair value and foreign exchange
	10	Provision (benefit) for income taxes
Total reclassifications for the period	\$ (19)	Net income (loss)

(1) - Amounts in parentheses indicate debits.

Notes to Consolidated Financial Statements (Unaudited)

Note 9: Commitments and Contingencies

The following commitments and contingencies provide an update to those discussed in “Note 14: Commitments and Contingencies” in the Notes to Consolidated Financial Statements included in Exhibit 99.1 of MBIA Inc.’s Annual Report on Form 10-K for the year ended December 31, 2012 and should be read in conjunction with the complete descriptions provided in the aforementioned note included in Exhibit 99.1 of Form 10-K. In the normal course of operating its business, National may be involved in various legal proceedings. Additionally, MBIA Inc. together with its subsidiaries (“MBIA”) may be involved in various legal proceedings that directly or indirectly impact National.

Transformation Litigation

ABN AMRO Bank N.V. et al. v. Eric Dinallo et al.; Index no. 601846/09 (N.Y. Sup. Ct., N.Y. County)

On March 4, 2013, the court issued a decision dismissing the Article 78 proceeding. On April 2, 2013, the remaining plaintiffs filed a Notice of Appeal to the Appellate Division, First Department. In May of 2013, following the Bank of America and Societe Generale settlements, all plaintiffs in this matter dismissed their claims.

ABN AMRO Bank N.V. et al. v. MBIA Inc. et al.; Index No. 601475/2009 (N.Y. Sup. Ct., N.Y. County)

In May of 2013, following the Bank of America and Societe Generale settlements, all plaintiffs in this matter dismissed their claims.

Barclays Bank PLC., et al. v. Wrynn et al.; Index No. 651811/2010 (N.Y. Sup. Ct., N.Y. County)

In May of 2013, following the Bank of America and Societe Generale settlements, all plaintiffs in this matter dismissed their claims.

CQS ABS Master Fund Ltd., CQS Select ABS Master Fund Ltd., and CQS ABS Alpha Master Fund Ltd. v. MBIA Inc. et al.; Civil Action No. 12-cv-6840 (R.S.) (S.D.N.Y.)

On June 24, 2013, the court granted MBIA’s motion to disqualify the plaintiffs’ counsel, White & Case LLP.

Broadbill Partners LP, et al. v. MBIA Inc., et al.; Index No. 653865/2012 (N.Y. Sup. Ct., N.Y. County)

On June 6, 2013, the plaintiffs voluntarily dismissed the litigation without prejudice. A Stipulation of Discontinuance was filed on June 7, 2013.

Corporate Litigation

Bank of America v. MBIA Inc. and The Bank of New York Mellon, as Indenture Trustee; Index No. 70444/2012 (N.Y. Sup. Ct., Westchester County)

In May of 2013, the parties reached an agreement to resolve their respective claims in this action.

MBIA Inc. v. Bank of America Corp. and Blue Ridge Investments, L.L.C.; Index No. 51664/2013 (N.Y. Sup. Ct., Westchester County)

In May of 2013, the parties reached an agreement to resolve their respective claims in this action.

Mary Crescente v. Joseph Brown, et al.; Index No. 17595/2008 (N.Y. Sup. Ct., Westchester County)

On March 25, 2013, a Stipulation of Discontinuance was filed with the court resolving the litigation.

Ambac Bond Insurance Coverage Cases, Coordinated Proceeding Case No. JCCP 4555 (Super. Ct. of Cal., County of San Francisco)

On March 22, 2013, the court granted the Bond Insurer defendants’ motion to strike pursuant to California’s Anti-SLAPP statute dismissing the plaintiffs’ claims under California’s Cartwright Act.

City of Phoenix v. AMBAC et al., Case No. 2:10-cv-00555-TMB (D. Ariz.)

On June 4, 2013, the parties reached an agreement to resolve the City of Phoenix’s claims in this matter.

MBIA and National are defending against the aforementioned actions and expect ultimately to prevail on the merits. There is no assurance, however, that they will prevail in these actions. Adverse rulings in these actions could have a material adverse effect on National’s ability to implement its strategy and on its business, results of operations, cash flows and financial condition. At this stage of the various litigations, there has not been a determination as to the amount, if any, of damages. Accordingly, National is not able to estimate any amount of loss or range of loss.

Note 9: Commitments and Contingencies (continued)

There are no other material lawsuits pending or, to the knowledge of National, threatened, to which National is a party.

Note 10: Subsequent Events

Refer to "Note 9: Commitments and Contingencies" for information about legal proceedings that developed after June 30, 2013.

The accompanying notes are an integral part of the consolidated financial statements.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 1: Business Developments and Risks and Uncertainties

Summary

MBIA Insurance Corporation is a wholly-owned subsidiary of MBIA Inc. (the “Parent” or “MBIA”). The guarantees of MBIA Insurance Corporation and its subsidiaries, (“MBIA Corp.”) insure structured finance and asset-backed obligations, privately issued bonds used for the financing of public purpose projects, which are primarily located outside of the United States (“U.S.”) and that include toll roads, bridges, airports, public transportation facilities, utilities and other types of infrastructure projects serving a substantial public purpose, and obligations of sovereign and sub-sovereign issuers. Structured finance and asset-backed securities (“ABS”) typically are securities repayable from expected cash flows generated by a specified pool of assets, such as residential and commercial mortgages, insurance policies, consumer loans, corporate loans and bonds, trade and export receivables, leases for equipment, aircraft and real property.

Business Developments

In May of 2013, MBIA Inc., together with its subsidiaries, MBIA Corp. and National Public Finance Guarantee Corporation (“National”), entered into a comprehensive settlement agreement and related agreements (the “BofA Settlement Agreement”) with Bank of America Corporation and certain of its subsidiaries (collectively, “Bank of America”), discussed below under “Bank of America Settlement.” As a result of the BofA Settlement Agreement, MBIA Corp. repaid its secured loan from National (the “National Secured Loan”). As of June 30, 2013, MBIA Corp. was rated B with a stable outlook by Standard & Poor’s Financial Services LLC (“S&P”) and B3 with a positive outlook by Moody’s Investors Service, Inc. (“Moody’s”).

Bank of America Settlement

Under the terms of the BofA Settlement Agreement, MBIA Corp. received a payment of approximately \$1.7 billion, consisting of \$1.6 billion in cash and \$136 million principal amount of MBIA Inc.’s 5.70% Senior Notes due 2034. In exchange for such payment, MBIA Corp. agreed to dismiss the litigation commenced in September 2008 against Countrywide Home Loans, Inc. (“Countrywide”), among other parties, and later amended to include claims against Bank of America, relating to breaches of representations and warranties on certain MBIA-insured securitizations sponsored by Countrywide. Bank of America and MBIA have also agreed to the commutation of all of the MBIA Corp. policies held by Bank of America, which had a notional insured amount of approximately \$7.4 billion, of which \$6.1 billion were policies insuring credit default swaps (“CDS”) held by Bank of America referencing commercial real estate (“CRE”) exposures. MBIA Corp. has no further payment obligations under the commuted policies. The New York State Department of Financial Services (“NYSDFS”) advised MBIA Corp. that the NYSDFS did not object to the BofA Settlement Agreement. The \$1.6 billion of cash received in connection with the BofA Settlement Agreement is included in “Proceeds from recoveries and reinsurance” presented under the heading “Cash flows from operating activities” on MBIA Corp.’s consolidated statements of cash flows.

Under the terms of the BofA Settlement Agreement, Bank of America received a five-year warrant to purchase 9.94 million shares of MBIA common stock at a price of \$9.59 per share. Bank of America has also agreed to dismiss the pending litigation between the parties concerning the restructuring transactions announced by MBIA on February 18, 2009 (the “Transformation”) and the pending litigation between the parties concerning the senior debt consent solicitation completed by MBIA in the fourth quarter of 2012. In addition, Bank of America agreed to withdraw the purported “notice of default” it sent in connection with such consent solicitation.

Under the terms of the BofA Settlement Agreement, the dismissals of the litigations referenced above are initially being filed on a “without prejudice” basis. The parties will refile such dismissals on a “with prejudice” basis provided that, within the one-year period following execution of the BofA Settlement Agreement, none of the claims released pursuant to the BofA Settlement Agreement are reinstated and neither party is required to make a payment on any such released claims. MBIA Corp. views the likelihood of such an event as remote, and thus expects that the litigation dismissals will be filed on a “with prejudice” basis at the expiration of such one-year period.

MBIA Corp.’s policies insuring the residential mortgage-backed securities (“RMBS”) securitizations originated by Countrywide will continue to be in full force and effect, and MBIA Corp. will continue to make timely payments of principal and interest if there are shortfalls when due under such policies. Bank of America will have no further representation and warranty liability with respect to the origination of the mortgage loans in the MBIA-insured Countrywide and certain other securitizations.

In addition, MBIA Corp. has entered into a \$500 million three-year secured revolving credit agreement (the “Blue Ridge Secured Loan”) with Blue Ridge Investments, L.L.C. (“Blue Ridge”), an affiliate of Bank of America. Refer to “Note 9: Debt” for a discussion of the Blue Ridge Secured Loan.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 1: Business Developments and Risks and Uncertainties (continued)

The payment from Bank of America, including the MBIA Inc. notes, was used by MBIA Corp. to repay the remaining outstanding balance and accrued interest on the National Secured Loan. The National Secured Loan balance of \$1.7 billion as of March 31, 2013 was reduced to approximately \$1.6 billion prior to the Bank of America settlement as a result of the receipt of \$110 million in settlement of Flagstar Bank's put-back obligation.

The value of the settlement is consistent with amounts recorded on MBIA Corp.'s statutory balance sheet as of December 31, 2012. MBIA Corp.'s liquidity and capital risk profile has substantially improved as a result of the settlement.

Societe Generale Settlement

In May of 2013, MBIA Inc., together with its subsidiaries, MBIA Corp. and National, entered into an agreement with Societe Generale pursuant to which MBIA commuted \$4.2 billion of gross insured exposure comprising ABS collateralized debt obligations ("CDOs"), structured commercial mortgage-backed securities ("CMBS") pools and CRE CDOs. The amount MBIA paid to Societe Generale in consideration of commuting its insured exposure is consistent with MBIA Corp.'s December 31, 2012 aggregate statutory loss reserves for the exposures commuted. Also, pursuant to the agreement, Societe Generale agreed to dismiss the pending litigation between the parties concerning the Transformation, which includes any appeals of the decision denying the Article 78 petition and the plenary case.

Residential Capital LLC Agreement

In May of 2013, MBIA Corp. and the other Consenting Claimants, Residential Capital LLC ("ResCap") and Ally Financial Inc. ("Ally"), agreed to the terms of a comprehensive plan agreement to support ResCap's Chapter 11 plan. The confirmation of ResCap's Chapter 11 plan would resolve MBIA Corp.'s claims against the Residential Funding Company, LLC ("RFC"), GMAC Mortgage LLC ("GMAC") and ResCap estates, and Ally. In June of 2013, the bankruptcy court issued a Memorandum Opinion approving the Plan Support Agreement (the "Plan"). The Plan is now subject to voting by creditors as well as a confirmation hearing by the bankruptcy court. There can be no assurance that the Plan will be confirmed. Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" for a discussion of the ResCap agreement.

Transformation Litigation

Subsequent to the BofA Settlement Agreement and the Societe Generale settlement, all litigation brought originally by the group of eighteen domestic and international financial institutions relating to the establishment of National has been resolved.

Other

As of June 30, 2013 and December 31, 2012, MBIA Corp.'s cash and liquid assets were \$92 million and \$345 million, respectively. Management believes MBIA Corp.'s current liquidity position, together with future cash inflows and amounts available under the Blue Ridge Secured Loan, is adequate to make expected future claim payments. The combination of commutation payments to reduce liabilities and claim payments have placed liquidity pressure on MBIA Corp. MBIA Corp. continues to seek to reduce both the absolute amount and the volatility of its obligations and potential future claim payments through the execution of commutations of insurance policies. During the six months ended June 30, 2013, MBIA Corp. commuted \$19.9 billion of gross insured exposure, primarily comprising structured CMBS pools, investment grade CDOs, ABS CDOs, first-lien subprime RMBS, high yield corporate CDOs, CRE CDOs, structured insurance securities, and first-lien alternative A-paper RMBS.

Risks and Uncertainties

MBIA Corp.'s consolidated financial statements include estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. The outcome of certain significant risks and uncertainties could cause MBIA Corp. to revise its estimates and assumptions or could cause actual results to differ from MBIA Corp.'s estimates. While MBIA Corp. believes that it continues to have sufficient capital and liquidity to meet all of its expected obligations, if one or more possible adverse outcomes were to be realized, its statutory capital, financial position, results of operations and cash flows could be materially and adversely affected.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 1: Business Developments and Risks and Uncertainties (continued)

Significant risks and uncertainties that could affect amounts reported in MBIA Corp.'s financial statements in future periods include, but are not limited to, the following:

- The amount and timing of potential claims from MBIA Corp.'s second-lien RMBS and remaining insured CMBS pools are potentially volatile, as are the projected collections of excess spread and the remaining put-back recoverables. However, management's expected liquidity and capital forecasts for MBIA Corp. for 2013, which include expected availability under the Blue Ridge Secured Loan and expected recoveries from the ResCap agreement, reflect adequate resources to pay expected claims. Further, the remaining insured portfolio, aside from these exposures, could deteriorate and result in loss reserves and claim payments. While management believes it will have adequate resources to pay expected claims, if MBIA Corp. experiences higher than expected claim payments or is unable to commute the remaining exposures that represent substantial risk, MBIA Corp. may ultimately have insufficient resources to continue to pay claims, which could cause the NYSDFS to put MBIA Corp. into a rehabilitation or liquidation proceeding ("an MBIA Corp. Proceeding"), as per Article 74 of the New York Insurance Law ("NYIL"). Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" for information about MBIA Corp.'s reserves and recoveries.
- Management believes that MBIA Corp. has sufficient liquidity resources to meet all of its obligations for the foreseeable future. In order to meet its liquidity requirements, MBIA Corp. may use its ability to finance through third-party facilities, although there can be no assurance that this strategy will be adequate. A failure by MBIA Inc. to settle liabilities that are also insured by MBIA Corp. could result in claims on MBIA Corp.
- MBIA Corp.'s ability to commute insured transactions is limited by available liquidity, including the availability of the Blue Ridge Secured Loan, recoveries from the ResCap agreement and the use of other available financing structures and liquidity, some of which could be subject to regulatory approval by the NYSDFS and/or the United Kingdom's Prudential Regulation Authority. MBIA Corp.'s primary strategy for managing its CMBS pool and ABS CDO exposures has been commutations. There can be no assurance that MBIA Corp. will be able to fund further commutations through borrowings or otherwise. Refer to "Note 5: Loss and Loss Adjustment Expense Reserves" for information about MBIA Corp.'s estimate of losses on its exposures.
- As of June 30, 2013, MBIA Corp. was not in compliance with a requirement under the NYIL to hold qualifying assets in an amount necessary to satisfy its contingency reserves. MBIA Corp. has reported the deficit and has requested approval from the NYSDFS to release a portion of its contingency reserves as of September 30, 2012, December 31, 2012, March 31, 2013 and June 30, 2013. All of these requests were disapproved by the NYSDFS. In addition, as of June 30, 2013, MBIA Corp. reported an overage related to its single risk limits under NYIL. MBIA Corp. previously filed a formal notification with the NYSDFS regarding this overage and submitted a plan to achieve compliance with its limits. While the NYSDFS has not taken action against MBIA Corp., the NYSDFS may restrict MBIA Corp. from making commutation or other payments or may impose other remedial actions for failing to meet these requirements.
- Changes in fair value of insured credit derivatives can be caused by general market conditions and the volatility in the relationship between MBIA Corp.'s credit spreads and those underlying collateral assets on insured credit derivatives may cause significant unrealized gains and losses in MBIA Corp.'s reported results of operations. Refer to "Note 6: Fair Value of Financial Instruments" for information about MBIA Corp.'s valuation of insured credit derivatives.

As a result of the BofA Settlement Agreement, the risk of an MBIA Corp. Proceeding has been significantly reduced. While MBIA Corp. believes it will have adequate resources to pay expected claims, in the event it does not have adequate resources in the future and the NYSDFS were to commence an MBIA Corp. Proceeding, MBIA Corp. may be subject to the following:

- CDS counterparties may seek to terminate CDS contracts insured by MBIA Corp. and MBIA UK Insurance Limited and make market-based damage claims (irrespective of whether actual credit-related losses are expected under the underlying exposure). MBIA Corp. believes that such an acceleration would likely terminate any residual value.
- Medium-term notes ("MTNs") issued by MBIA's subsidiaries, MBIA Global Funding, LLC ("GFL") and Meridian Funding Company, LLC ("Meridian"), which are insured by MBIA Corp., would accelerate. To the extent GFL failed to pay the accelerated amounts under the GFL MTNs or the collateral securing the Meridian MTNs was deemed insufficient to pay the accelerated amounts under the Meridian MTNs, the MTN holders would have policy claims against MBIA Corp. for scheduled payments of interest and principal.
- An MBIA Corp. Proceeding may accelerate certain investment agreements issued by MBIA Inc. including, in some cases, with make-whole payments. To the extent MBIA fails to pay the accelerated amounts under these investment agreements or the collateral securing these investment agreements is deemed insufficient to pay the accelerated amounts due, the holders of the investment agreements would have policy claims against MBIA Corp.
- Payments under MBIA Corp. insurance policies could be suspended, delayed or reduced, in whole or in part.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 1: Business Developments and Risks and Uncertainties (continued)

- An acceleration of the surplus notes issued by MBIA Corp. and a possible reduction or further delay or suspension of the amounts due.
- MBIA Corp.'s ability to carry out its tax planning strategies. This may cause it to record additional allowances against a portion or all of its deferred tax assets. Refer to "Note 10: Income Taxes" for information about MBIA Corp.'s deferred tax assets. In addition, MBIA Corp. is currently included in the consolidated tax return of MBIA Inc. An MBIA Corp. Proceeding could result in challenges to the tax sharing arrangement among the MBIA affiliates that might adversely affect management's ability to manage taxes efficiently.
- Approval of the rehabilitator and the rehabilitation court (or liquidator and liquidation court, as the case may be) may be required for a variety of actions of importance to MBIA Corp. and its policyholders, including, without limitation, settlement of MBIA Corp.'s put-back litigation and commutation of MBIA Corp.-insured exposures.
- The rehabilitator or liquidator would replace the Board of Directors of MBIA Corp. and take control of the operations and assets of MBIA Corp., which would result in changes to its strategies and management.
- An MBIA Corp. Proceeding would be an event of default under the Blue Ridge Secured Loan and, as a result, the loan could be accelerated and Bank of America would have rights to the loan's collateral.
- MBIA Corp. would be subject to significant additional expenses arising from the appointment of the rehabilitator or liquidator, as receiver, and payment of the fees and expenses of the advisors to such rehabilitator or liquidator.

Note 2: Significant Accounting Policies

MBIA Corp. has disclosed its significant accounting policies in "Note 2: Significant Accounting Policies" in the Notes to Consolidated Financial Statements included in Exhibit 99.2 to MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012. The following significant accounting policies provide an update to those included under the same captions in Exhibit 99.2 to MBIA Inc.'s Annual Report on Form 10-K.

Basis of Presentation

The accompanying unaudited consolidated financial statements do not include all of the information and disclosures required by accounting principles generally accepted in the United States of America ("GAAP") for annual periods. These statements should be read in conjunction with MBIA Corp.'s consolidated financial statements and notes thereto included in Exhibit 99.2 to MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012. The accompanying consolidated financial statements have not been audited by an independent registered public accounting firm in accordance with the standards of the Public Company Accounting Oversight Board (U.S.), but in the opinion of management such financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for the fair statement of MBIA Corp.'s consolidated financial position and results of operations. All material intercompany balances and transactions have been eliminated.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. As additional information becomes available or actual amounts become determinable, the recorded estimates are revised and reflected in operating results.

The results of operations for the three and six months ended June 30, 2013 may not be indicative of the results that may be expected for the year ending December 31, 2013. The December 31, 2012 consolidated balance sheet was derived from audited financial statements, but does not include all disclosures required by GAAP for annual periods. Certain amounts have been reclassified in comparison to prior years' financial statements to conform to the current presentation. Such reclassifications had no impact on total revenues, expenses, assets, liabilities, or shareholders' equity, operating cash flows, investing cash flows, or financing cash flows for all periods presented.

Subsequent Events

MBIA Corp. has evaluated all subsequent events as of August 7, 2013, the date of issuance of the consolidated financial statements, for inclusion in MBIA Corp.'s consolidated financial statements and/or accompanying notes.

Note 3: Recent Accounting Pronouncements

Recently Adopted Accounting Standards

Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (ASU 2013-02)

In February 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2013-02, "Comprehensive Income (Topic 220)—Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" that requires an entity to present information about the amounts reclassified out of accumulated other comprehensive income ("AOCI") by component and to present significant amounts reclassified out of AOCI by the respective line items of net income. The amendment only affects MBIA Corp.'s disclosures and does not affect MBIA Corp.'s consolidated balance sheets, results of operations, or cash flows. MBIA Corp. adopted this standard in the first quarter of 2013.

Disclosures about Offsetting Assets and Liabilities (ASU 2011-11)

In December 2011, the FASB issued ASU 2011-11, "Balance Sheet (Topic 210)—Disclosures about Offsetting Assets and Liabilities." ASU 2011-11 creates new disclosure requirements about the nature of MBIA Corp.'s rights of setoff and related arrangements associated with its financial instruments and derivative instruments. This amendment does not change the existing offsetting eligibility criteria or the permitted balance sheet presentation for those instruments that meet the eligibility criteria. The disclosure requirements are effective for MBIA Corp. beginning in the first quarter of 2013. In January 2013, the FASB issued ASU 2013-01, "Balance Sheet (Topic 210)—Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities." ASU 2013-01 clarifies that ASU 2011-11 applies only to derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with specific criteria contained in the FASB Accounting Standards Codification or subject to a master netting arrangement or similar agreement. These standards only affect MBIA Corp.'s disclosures and do not affect MBIA Corp.'s consolidated balance sheets, results of operations, or cash flows. MBIA Corp. adopted this standard in the first quarter of 2013.

Refer to the Notes to Consolidated Financial Statements of MBIA Corp. included in Exhibit 99.2 to MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012 for further information regarding the effects of recently adopted accounting standards on prior year financial statements.

Note 4: Variable Interest Entities

MBIA Corp. provides credit protection to issuers of obligations that may involve issuer-sponsored special purpose entities ("SPEs"). An SPE may be considered a variable interest entity ("VIE") to the extent the SPE's total equity at risk is not sufficient to permit the SPE to finance its activities without additional subordinated financial support or its equity investors lack any one of the following characteristics: (i) the power to direct the activities of the SPE that most significantly impact the entity's economic performance or (ii) the obligation to absorb the expected losses of the entity or the right to receive the expected residual returns of the entity. A holder of a variable interest or interests in a VIE is required to assess whether it has a controlling financial interest, and thus is required to consolidate the entity as primary beneficiary. An assessment of a controlling financial interest identifies the primary beneficiary as the variable interest holder that has both of the following characteristics: (i) the power to direct the activities of the VIE that most significantly impact the entity's economic performance and (ii) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE. The primary beneficiary is required to consolidate the VIE. An ongoing reassessment of controlling financial interest is required to be performed based on any substantive changes in facts and circumstances involving the VIE and its variable interests.

MBIA Corp. evaluates issuer-sponsored SPEs initially to determine if an entity is a VIE, and is required to reconsider its initial determination if certain events occur. For all entities determined to be VIEs, MBIA Corp. performs an ongoing reassessment to determine whether its guarantee to provide credit protection on obligations issued by VIEs provides MBIA Corp. with a controlling financial interest. Based on its ongoing reassessment of controlling financial interest, MBIA Corp. determines whether a VIE is required to be consolidated or deconsolidated.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 4: Variable Interest Entities (continued)

MBIA Corp. makes its determination for consolidation based on a qualitative assessment of the purpose and design of a VIE, the terms and characteristics of variable interests of an entity, and the risks a VIE is designed to create and pass through to holders of variable interests. MBIA Corp. generally provides credit protection on obligations issued by VIEs, and holds certain contractual rights according to the purpose and design of a VIE. MBIA Corp. may have the ability to direct certain activities of a VIE depending on facts and circumstances, including the occurrence of certain contingent events, and these activities may be considered the activities of a VIE that most significantly impact the entity's economic performance. MBIA Corp. generally considers its guarantee of principal and interest payments of insured obligations, given nonperformance by a VIE, to be an obligation to absorb losses of the entity that could potentially be significant to the VIE. At the time MBIA Corp. determines it has the ability to direct the activities of a VIE that most significantly impact the economic performance of the entity based on facts and circumstances, MBIA Corp. is deemed to have a controlling financial interest in the VIE and is required to consolidate the entity as primary beneficiary. MBIA Corp. performs an ongoing reassessment of controlling financial interest that may result in consolidation or deconsolidation of any VIE.

Nonconsolidated VIEs

The following tables present the total assets of nonconsolidated VIEs in which MBIA Corp. holds a variable interest as of June 30, 2013 and December 31, 2012. The following tables also present MBIA Corp.'s maximum exposure to loss for nonconsolidated VIEs and carrying values of the assets and liabilities for its interests in these VIEs as of June 30, 2013 and December 31, 2012. MBIA Corp. has aggregated nonconsolidated VIEs based on the underlying credit exposure of the insured obligation. The nature of MBIA Corp.'s variable interests in nonconsolidated VIEs is related to financial guarantees, insured CDS contracts and any investments in obligations issued by nonconsolidated VIEs.

The maximum exposure to loss as a result of MBIA Corp.'s variable interests in VIEs is represented by insurance in force. Insurance in force is the maximum future payments of principal and interest, net of cessions to reinsurers, which may be required under commitments to make payments on insured obligations issued by nonconsolidated VIEs.

Consolidated VIEs

The carrying amounts of assets and liabilities of consolidated VIEs were \$6.5 billion and \$5.5 billion, respectively, as of June 30, 2013, and \$7.7 billion and \$6.7 billion, respectively, as of December 31, 2012. The carrying amounts of assets and liabilities are presented separately in "Assets of consolidated variable interest entities" and "Liabilities of consolidated variable interest entities" on MBIA Corp.'s consolidated balance sheets. Additional VIEs are consolidated or deconsolidated based on an ongoing reassessment of controlling financial interest, when events occur or circumstances arise, and whether the ability to exercise rights that constitute power to direct activities of any VIEs are present according to the design and characteristics of these entities. No additional VIEs were consolidated during the three and six months ended June 30, 2013 and 2012. Net realized gains related to the deconsolidation of VIEs were \$1 million for the three and six months ended June 30, 2013, and no net realized gains or losses were recognized related to the deconsolidation of VIEs for the same periods in 2012.

Holders of insured obligations of issuer-sponsored VIEs related to MBIA Corp. do not have recourse to the general assets of MBIA Corp. In the event of nonpayment of an insured obligation issued by a consolidated VIE, MBIA Corp. is obligated to pay principal and interest, when due, on the respective insured obligation only. MBIA Corp.'s exposure to consolidated VIEs is limited to the credit protection provided on insured obligations and any additional variable interests held by MBIA Corp.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves

Loss and Loss Adjustment Expense Process

As of June 30, 2013, the majority of MBIA Corp.'s case basis reserves and insurance loss recoveries recorded in accordance with GAAP were related to insured second-lien and first-lien RMBS transactions. These reserves and recoveries do not include estimates for policies insuring credit derivatives. Policies insuring credit derivative contracts are accounted for as derivatives and carried at fair value under GAAP. The fair values of insured derivative contracts are influenced by a variety of market and transaction-specific factors that may be unrelated to potential future claim payments under MBIA Corp.'s insurance policies. In the absence of credit impairments on insured derivative contracts or the early termination of such contracts at a loss, the cumulative unrealized losses recorded from fair valuing these contracts should reverse before or at the maturity of the contracts.

Notwithstanding the difference in accounting under GAAP for financial guarantee policies and MBIA Corp.'s insured derivatives, insured derivatives have similar terms, conditions, risks, and economic profiles to financial guarantee insurance policies, and, therefore, are evaluated by MBIA Corp. for loss (referred to as credit impairment herein) and loss adjustment expense ("LAE") periodically in a manner similar to the way that loss and LAE reserves are estimated for financial guarantee insurance policies. Credit impairments represent actual payments and collections plus the present value of estimated expected future claim payments, net of recoveries. MBIA Insurance Corporation's expected future claim payments for insured derivatives were discounted using a rate of 5.72%, the same rate it used to calculate its statutory loss reserves as of June 30, 2013. These credit impairments, calculated in accordance with statutory accounting principles ("U.S. STAT"), differ from the fair values recorded in MBIA Corp.'s consolidated financial statements. MBIA Corp. considers its credit impairment estimates as critical information for investors as it provides information about loss payments MBIA Corp. expects to make on insured derivative contracts. As a result, the following loss and LAE process discussion includes information about loss and LAE activity recorded in accordance with GAAP for financial guarantee insurance policies and credit impairments estimated in accordance with U.S. STAT for insured derivative contracts. Refer to "Note 6: Fair Value of Financial Instruments" included herein for additional information about MBIA Corp.'s insured credit derivative contracts.

To date, MBIA Corp. has resolved substantially all of its contract claims (referred to as "put-back" claims) related to those mortgage loans whose inclusion in insured securitizations failed to comply with representations and warranties ("ineligible loans"), with the exception of those ineligible loans securitized by Credit Suisse 2007-2 in the home equity mortgage trust ("HEMT") securitization. Credit Suisse has challenged MBIA Corp.'s assessment of the ineligibility of individual mortgage loans and the dispute is the subject of litigation for which there is no assurance that MBIA Corp. will prevail.

RMBS Case Basis Reserves and Recoveries (Financial Guarantees)

MBIA Corp.'s RMBS reserves and recoveries relate to financial guarantee insurance policies. MBIA Corp. calculated RMBS case basis reserves as of June 30, 2013 for both second-lien and first-lien RMBS transactions using a process called the "Roll Rate Methodology." The Roll Rate Methodology is a multi-step process using a database of loan level information, a proprietary internal cash flow model, and a commercially available model to estimate expected ultimate cumulative losses on insured bonds. "Roll Rate" is defined as the probability that current loans become delinquent and that loans in the delinquent pipeline are charged-off or liquidated. Generally, Roll Rates are calculated for the previous three months and averaged. The loss reserve estimates are based on a probability-weighted average of three scenarios of loan losses (base case, stress case, and an additional stress case).

In calculating ultimate cumulative losses for RMBS, MBIA Corp. estimates the amount of loans that are expected to be charged-off (deemed uncollectible by servicers of the transactions) or liquidated in the future. MBIA Corp. assumes that charged-off loans have zero recovery values.

Second-lien RMBS Reserves

MBIA Corp.'s second-lien RMBS case basis reserves as of June 30, 2013 relate to RMBS backed by home equity lines of credit ("HELOC") and closed-end second mortgages ("CES").

The Roll Rates for 30-59 day delinquent loans and 60-89 day delinquent loans are calculated on a transaction-specific basis. MBIA Corp. assumes that the Roll Rate for 90+ day delinquent loans, excluding foreclosures and Real Estate Owned ("REO") is 95%. The Roll Rates are applied to the amounts in the respective delinquency buckets based on delinquencies as of May 31, 2013 to estimate future losses from loans that are delinquent as of the current reporting period.

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

Roll Rates for loans that are current as of May 31, 2013 ("Current Roll to Loss") are also calculated on a transaction-specific basis. A proportion of loans reported current as of May 31, 2013 is assumed to become delinquent every month, at a Current Roll to Loss rate that persists at a high level for a time and subsequently starts to decline. A key assumption in the model is the period of time in which MBIA Corp. projects high levels of Current Roll to Loss to persist. MBIA Corp. runs multiple scenarios, each with varying periods of time, for which the high levels of Current Roll to Loss rates persist. Loss reserves are calculated by using a weighted average of these scenarios, with the majority of the probability assigned to stressful scenarios (stress case and additional stress case), where the high levels of Current Roll to Loss rates persist for six or twenty four months before reverting to historic levels. In the base case scenario, MBIA Corp. assumes that the Current Roll to Loss begins to decline immediately and continues to decline over the next six months to 25% of their levels as of May 31, 2013. For example, in the base case, as of May 31, 2013, if the amount of current loans which become 30-59 days delinquent is 10%, and recent performance suggests that 30% of those loans will be charged-off, the Current Roll to Loss for the transaction is 3%. In the base case, it is then assumed that the Current Roll to Loss will reduce linearly to 25% of its original value over the next six months (i.e., 3% will linearly reduce to 0.75% over the six months from June 2013 to November 2013). After that six-month period, MBIA Corp. further reduces the Current Roll to Loss to 0% by early 2014 with the expectation that the performing seasoned loans will eventually result in loan performance reverting to lower levels of default consistent with history.

In addition, in MBIA Corp.'s loss reserve models for transactions secured by HELOCs, MBIA Corp. considers borrower draw and prepayment rates and factors that could affect the excess spread generated by current loans, which offsets losses and reduces payments. For HELOCs, the current three-month average draw rate is generally used to project future draws on the line. For HELOCs and transactions secured by fixed-rate CES, the three-month average conditional prepayment rate is generally used to start the projection for trends in voluntary principal prepayments. Due to the current volatility in mortgage prepayment rates, which influence mortgage refinancing and voluntary principal prepayment rates, MBIA Corp. used historical average mortgage rates to model its loss reserves in the second quarter of 2013. Projected cash flows are also based on an assumed constant basis spread between floating rate assets and floating rate insured debt obligations (the difference between Prime and London Interbank Offered Rate ("LIBOR") interest rates, minus any applicable fees). For all transactions, cash flow models consider allocations and other structural aspects of the transactions, including managed amortization periods, rapid amortization periods and claims against MBIA Corp.'s insurance policy consistent with such policy's terms and conditions. In developing multiple loss scenarios, stress is applied by elongating the Current Roll to Loss rate for various periods, simulating a slower improvement in the transaction performance. The estimated net claims from the procedure above are then discounted using a risk-free rate to a net present value reflecting MBIA Corp.'s general obligation to pay claims over time and not on an accelerated basis. The above assumptions represent MBIA Corp.'s best estimates of how transactions will perform over time.

MBIA Corp. monitors portfolio performance on a monthly basis against projected performance, reviewing delinquencies, Roll Rates, and prepayment rates (including voluntary and involuntary). However, loan performance remains difficult to predict and losses may exceed expectations. In the event of a material deviation in actual performance from projected performance, MBIA Corp. would increase or decrease the case basis reserves accordingly. When actual performance remains at peak levels MBIA Corp. includes an additional six month period when calculating the probability-weighted outcome. The addition to MBIA Corp.'s second-lien RMBS case basis reserves, before considering potential recoveries, would be approximately \$90 million.

Second-lien RMBS Recoveries

As of June 30, 2013, MBIA Corp. recorded estimated recoveries of \$1.1 billion, gross of income taxes, related to second-lien RMBS put-back claims on ineligible mortgage loans, consisting of \$18 million included in "Insurance loss recoverable" and \$1.1 billion included in "Loan repurchase commitments" presented under the heading "Assets of consolidated variable interest entities" on MBIA Corp.'s consolidated balance sheets. As of June 30, 2013 and December 31, 2012, MBIA Corp.'s estimated recoveries after income taxes calculated at the federal statutory rate of 35%, were \$736 million and \$2.3 billion, respectively, which was 157% and 432% of the consolidated total shareholders' equity, respectively. As of June 30, 2013, the remaining estimated recoveries relate to MBIA Corp.'s claims based on ineligible mortgage loans asserted against Credit Suisse and the bankruptcy estates of RFC, GMAC and ResCap.

On May 14, 2012, ResCap and its wholly-owned subsidiary companies, RFC and GMAC, each filed for bankruptcy protection under Chapter 11 of the United States Bankruptcy Code. MBIA Corp. asserted claims based on the inclusion of ineligible loans against RFC, GMAC and ResCap, based upon the direct contractual relationship between MBIA Corp., RFC and GMAC.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

As of May 23, 2013, Ally, ResCap, RFC, GMAC and the Consenting Claimants (which includes MBIA Corp.), among other parties, executed a term sheet and supplemental term sheet agreeing to, among other things, a settlement amount of \$796 million (based upon an estimate of estate values at the time of the agreement, which are subject to change) to be paid to MBIA Corp. as part of a proposed plan to resolve claims against Ally, RFC, GMAC and ResCap. The settlement and anticipated recoveries are consistent with the put-back recoveries recorded by MBIA Corp. The agreement will be implemented through a plan of reorganization in ResCap's Chapter 11 cases, subject to anticipated bankruptcy court approval in the fall of 2013. In June of 2013, the bankruptcy court issued a Memorandum Opinion approving the Plan. MBIA Corp. anticipates an initial distribution of funds to MBIA Corp. and other claimants in late 2013. This anticipated timeline may change in the course of events in the bankruptcy court plan confirmation process.

MBIA Corp. continues to refine the indicative scenarios used to calculate put-back recoveries for ResCap based upon information received during the bankruptcy process. MBIA Corp. has made additional adjustments to its recovery calculations related to ResCap in consideration of the agreed upon recovery amount as described in the executed term sheet, supplemental term sheet and plan support agreement submitted in motions filed in May of 2013.

In addition, MBIA Corp. believes that it will prevail in enforcing its contractual put-back rights against Credit Suisse. Based on MBIA Corp.'s assessment of the strength of these claims, MBIA Corp. believes it is entitled to collect the full amount of its incurred losses, and interest on amounts paid. However, uncertainty remains with respect to the ultimate outcome of the litigation with Credit Suisse, which is contemplated in the scenario based-modeling MBIA Corp. utilizes. The Credit Suisse recovery scenarios are based on the amount of incurred losses measured against certain probabilities of ultimate resolution of the dispute with Credit Suisse over the inclusion of ineligible mortgage loans in the HEMT securitization. Most of the probability weight is assigned to partial recovery scenarios.

Expected cash inflows from recoveries are discounted using the current risk-free discount rates associated with the underlying transaction's cash flows which ranged from 1.5% to 2.5%, depending upon the transaction's expected average life, which ranged from 5.2 years to 9.6 years.

MBIA Corp.'s recoveries have been, and remain based on either salvage rights, the rights conferred to MBIA Corp. through the transactional documents (inclusive of the insurance agreement), or subrogation rights embedded within financial guarantee insurance policies. Expected salvage and subrogation recoveries, as well as recoveries from other remediation efforts, reduce MBIA Corp.'s claim liability. Once a claim payment has been made, the claim liability has been satisfied and MBIA Corp.'s right to recovery is no longer considered an offset to future expected claim payments and it is recorded as a salvage asset. The amount of recoveries recorded by MBIA Corp. is limited to paid claims plus the present value of projected future claim payments. As claim payments are made, the recorded amount of potential recoveries may exceed the remaining amount of the claim liability for a given policy.

MBIA Corp. consistently reviews the approach and assumptions it applies to calculate put-back recoveries. The same transactional documents that provide MBIA Corp. with its put-back rights against Credit Suisse also provide that MBIA Corp. is entitled to reimbursement of interest on paid claims at a prescribed interest rate. Following Judge Jed Rakoff's decision on February 7, 2013 in the Assured Guaranty v. Flagstar case (Assured Guaranty Municipal Corp. v. Flagstar Bank, 11-cv-02375, U.S. District Court, Southern District of New York (Manhattan)), in which he confirmed Assured Guaranty's analogous right to recover contractual interest in addition to claims paid, MBIA Corp. has refined its put-back recovery assumptions against Credit Suisse to increase the probability that it will be reimbursed for contractual interest owed on paid claims. Consistent with MBIA Corp.'s probability based put-back recovery calculations, it has determined the interest owed contemplating litigation risk and repayment risk, as well as the potential value in the context of a settlement. MBIA Corp. continues to maintain that in the context of its put-back litigation, MBIA Corp. is entitled to receive interest at the New York State statutory rate. However, MBIA Corp. currently calculates its put-back recoveries using the contractual interest rate, which is lower than the New York State statutory rate.

To date, MBIA Corp. has either settled or agreed to settle the majority of MBIA Corp.'s put-back claims, with only Credit Suisse remaining as an outstanding dispute. The settlement amounts have been consistent with the put-back recoveries previously included in MBIA Corp.'s financial statements. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the BofA Settlement Agreement. Additional information on the status of the litigation against Credit Suisse can be found in the "Recovery Litigation" discussion within "Note 12: Commitments and Contingencies."

MBIA Corp.'s assessment of the remaining unsettled recoveries related to insured Credit Suisse second-lien RMBS is principally based on the following factors:

1. the settlement of the majority of MBIA Corp.'s put-back claims with sellers/servicers, including those with Bank of America and Flagstar Bank in May of 2013;

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

2. Assured Guaranty's favorable court ruling in its put-back litigation against Flagstar Bank, awarding it the vast majority of the claims paid on the relevant transactions plus interest, fees and expenses, as well as their subsequent settlement with Flagstar Bank, which resolved Assured Guaranty's put-back claims; and
3. the court rulings in MBIA Corp.'s put-back litigations.

MBIA Corp. continues to consider all relevant facts and circumstances, including the factors described above, in developing its assumptions on expected cash inflows, probability of potential recoveries (including the outcome of litigation) and recovery period. The estimated amount and likelihood of potential recoveries are expected to be revised and supplemented to the extent there are developments in the pending litigation and/or changes to the financial condition of Credit Suisse. While MBIA Corp. believes it will be successful in realizing recoveries from contractual claims, the ultimate amounts recovered may be materially different from those recorded by MBIA Corp. given the inherent uncertainty of the manner of resolving the claims (e.g., litigation) and the assumptions used in the required estimation process for accounting purposes which are based, in part, on judgments and other information that are not easily corroborated by historical data or other relevant benchmarks.

All of MBIA Corp.'s policies insuring second-lien RMBS for which litigation has been initiated against sellers/servicers are in the form of financial guarantee insurance contracts. In accordance with GAAP, MBIA Corp. has not recorded a gain contingency with respect to pending litigation.

First-lien RMBS Reserves

MBIA Corp.'s first-lien RMBS case basis reserves as of June 30, 2013, which primarily relate to RMBS backed by alternative A-paper and subprime mortgage loans, were determined using the Roll Rate Methodology. MBIA Corp. assumes that the Roll Rate for loans in foreclosure, REO and bankruptcy are 90%, 90% and 75%, respectively. Roll Rates for current, 30-59 day delinquent loans, 60-89 day delinquent loans and 90+ day delinquent loans are calculated on a transaction-specific basis. The Current Roll to Loss rates stay at the May 31, 2013 level for one month before declining to 25% of this level over a 24-month period.

MBIA Corp. estimates future losses by probability-weight averaging three different scenarios: base; stress; and additional stress. The three scenarios differ in the roll rates to loss of 90+ day delinquent loans. In the base scenario, the Company uses deal-specific roll rates obtained from historic loan level roll rate data. In the stress scenario, the MBIA Corp assumes a 90% roll rate for all 90+ day delinquent loans. In the additional stress scenario, the roll rates for each deal are an average of the deal-specific roll rate used in the base scenario and the 90% rate. The Roll Rates are applied to the amounts in each deal's respective 90+ delinquency bucket based on delinquencies as of May 31, 2013 in order to estimate future losses from loans that are delinquent as of June 30, 2013.

In calculating ultimate cumulative losses for first-lien RMBS, MBIA Corp. estimates the amount of loans that are expected to be liquidated through foreclosure or short sale. The time to liquidation for a defaulted loan is specific to the loan's delinquency bucket with the latest three-month average loss severities generally used to start the projection for trends in loss severities at loan liquidation. The loss severities are reduced over time to account for reduction in the amount of foreclosure inventory, anticipated future increases in home prices, principal amortization of the loan and government foreclosure moratoriums.

ABS CDOs (Financial Guarantees and Insured Derivatives)

MBIA Corp.'s insured ABS CDOs are transactions that include a variety of collateral ranging from corporate bonds to structured finance assets (which includes but are not limited to RMBS related collateral, ABS CDOs, corporate CDOs and collateralized loan obligations). These transactions were insured as either financial guarantee insurance policies or credit derivatives with the majority currently insured in the form of financial guarantees. Since the fourth quarter of 2007, MBIA Corp.'s insured par exposure within the ABS CDO portfolio has been substantially reduced through a combination of terminations and commutations. Accordingly, as of June 30, 2013, the insured par exposure of the ABS CDO financial guarantee insurance policies and credit derivatives portfolio has declined by approximately 96% of the insured amount as of December 31, 2007.

MBIA Corp.'s ABS CDOs originally benefited from two sources of credit enhancement. First, the subordination in the underlying securities collateralizing the transaction must be fully eroded and second, the subordination below the insured tranche in the CDO transaction must be fully eroded before the insured tranche is subject to a claim. MBIA Corp.'s payment obligations after a default are timely interest and ultimate principal.

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

The primary factor in estimating reserves on insured ABS CDO policies written as financial guarantee insurance policies and in estimating impairments on insured ABS CDO credit derivatives is the losses associated with the underlying collateral in the transactions. MBIA Corp.'s approach to establishing reserves or impairments in this portfolio employs a methodology which is similar to other structured finance asset classes insured by MBIA Corp. MBIA Corp. utilizes up to a total of four probability-weighted scenarios in order to estimate its reserves or impairments for ABS CDOs.

As of June 30, 2013, MBIA Corp. established loss and LAE reserves totaling \$86 million related to ABS CDO financial guarantee insurance policies after the elimination of \$210 million as a result of consolidating VIEs. For the six months ended June 30, 2013, MBIA Corp. had a benefit of \$48 million of losses and LAE recorded in earnings related to ABS CDO financial guarantee insurance policies after the elimination of a \$26 million benefit as a result of consolidating VIEs. In the event of further deteriorating performance of the collateral referenced or held in ABS CDO transactions, the amount of losses estimated by MBIA Corp. could increase substantially.

Credit Impairments Related to Structured CMBS Pools, CRE CDOs and CRE Loan Pools (Financial Guarantees and Insured Derivatives)

Most of the structured CMBS pools, CRE CDOs and CRE loan pools insured by MBIA Corp. are accounted for as insured credit derivatives and are carried at fair value in MBIA Corp.'s consolidated financial statements. Since MBIA Corp.'s insured credit derivatives have similar terms, conditions, risks, and economic profiles to its financial guarantee insurance policies, MBIA Corp. evaluates them for impairment in the same way that it estimates loss and LAE for its financial guarantee policies. The following discussion provides information about MBIA Corp.'s process for estimating credit impairments on these contracts using its statutory loss reserve methodology, determined as the present value of the probability-weighted potential future losses, net of estimated recoveries, across multiple scenarios, plus actual payments and collections.

MBIA Corp. has developed multiple scenarios to consider the range of potential outcomes in the CRE market and their impact on MBIA Corp. The approaches require substantial judgments about the future performance of the underlying loans, and include the following:

- The first approach considers the range of commutation agreements achieved since 2010 through June 30, 2013, which included 84 structured CMBS pools, CRE CDOs and CRE loan pool policies totaling \$41.6 billion of gross insured exposure. MBIA Corp. considers the range of commutations achieved over the past several years with multiple counterparties. This approach results in an estimated price to commute the remaining policies with price estimates, based on this experience. It is customized by counterparty and is dependent on the level of dialogue with the counterparty and the credit quality and payment profile of the underlying exposure.
- The second approach considers current delinquency rates and uses current and projected net operating income ("NOI") and capitalization rates ("Cap Rates") to project losses under two scenarios. Loans are stratified by size with larger loans being valued utilizing lower Cap Rates than for smaller loans. These scenarios also assume that Cap Rates and NOIs remain flat for the near term and then begin to improve gradually. Additionally, in these scenarios, any loan with a balance greater than \$75 million with a debt service coverage ratio ("DSCR") less than 1.0x, or that was reported as being in any stage of delinquency, was reviewed individually so that performance and loss severity could be more accurately determined. Specific loan level assumptions for this large loan subset were then incorporated into these scenarios, as well as specific assumptions regarding certain smaller loans when there appeared to be a material change in the asset's financial or delinquency performance over the preceding six months. As MBIA Corp. continues to increase the level of granularity in its individual loan assessments, it analyzes and adjusts assumptions for loans with certain mitigating attributes, such as no lifetime delinquency, recent appraisals indicating sufficient value and large capital reserve levels. These scenarios project different levels of additional defaults with respect to loans that are current. This approach makes use of the most recent financial statements available at the property level.
- The last approach is based on a proprietary model developed by reviewing performance data on over 80,000 securitized CRE loans originated between 1992 and 2011. The time period covered during the performance review includes the years 2006 through 2011. MBIA Corp. believes that these five years represent an appropriate time period in which to conduct a performance review because they encompass a period of extreme stress in the economy and the CRE market.

Based on a review of the data, MBIA Corp. found property type and the DSCR to be the most significant determinants of a loan's default probability, with other credit characteristics less influential. As a result, MBIA Corp. developed a model in which the loans were divided into 168 representative cohorts based on their DSCR and property type. For each of these cohorts, MBIA Corp. calculated the average annual probability of default, and then ran Monte Carlo simulations to estimate the timing of defaults. In addition, the model incorporated the following logic:

- NOI and Cap Rates were assumed to remain at current levels for loans in MBIA Corp.'s classified portfolio, resulting in no modifications or extensions under the model, other than as described in the next bullet point, to reflect the possibility that the U.S. economy and CRE market could experience no growth for the foreseeable future.
- Any valuation estimates obtained by special servicers since a loan's origination as well as MBIA Corp.'s individual large loan level analysis for loans with balances greater than \$75 million were incorporated as described in the second approach. However, in the last approach no adjustments were made for loans lower than \$75 million regardless of any mitigating factors.

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

The loss severities projected by these scenarios vary widely, from moderate to substantial losses. Actual losses will be a function of the proportion of loans in the pools that are foreclosed and liquidated and the loss severities associated with those liquidations. If the deductibles in MBIA Corp.'s insured transactions and underlying referenced CMBS transactions are fully eroded, additional property level losses upon foreclosures and liquidations could result in substantial losses for MBIA Corp. Since foreclosures and liquidations have only begun to take place during this economic cycle, particularly for larger properties, ultimate loss rates remain uncertain. Whether CMBS collateral is included in a structured pool or in a CRE CDO, MBIA Corp. believes the modeling related to the underlying bond should be the same. However, adjustments may be needed for structural or legal reasons. MBIA Corp. assigns a wide range of probabilities to these scenarios, with lower severity scenarios being weighted more heavily than higher severity scenarios. This reflects the view that liquidations will continue to be mitigated by loan extensions and modifications, and that property values and NOIs have bottomed for many sectors and markets in the U.S. The weightings are customized to each counterparty. If macroeconomic stress were to increase or the U.S. goes into a recession, higher delinquencies, liquidations and/or higher severities of loss upon liquidation may result and MBIA Corp. may incur substantial additional losses. The foreclosure and REO pipelines are still relatively robust, with several restructurings and liquidations yet to occur, so the range of possible outcomes is wider than those for MBIA Corp.'s exposures to ABS CDOs and second-lien RMBS. Prior to June 30, 2013, MBIA Corp. incorporated an additional approach based on recent Roll Rates experienced within each of the commercial mortgage-backed index series. This actuarial approach was eliminated as a result of more emphasis being placed on loan-specific scenarios.

In the CRE CDO portfolio, transaction-specific structures require managers to report reduced enhancement according to certain guidelines which often include downgrades even when the bond is still performing. As a result, in addition to collateral defaults, reported enhancement has been reduced significantly in some CRE CDOs. Moreover, many of the CRE CDO positions are amortizing more quickly than originally expected as most or all interest proceeds that would have been allocated to more junior classes within the CDO have been diverted and redirected to pay down the senior most classes insured by MBIA Corp.

For the six months ended June 30, 2013, MBIA Corp. had a benefit of \$38 million of losses and LAE recorded in earnings related to CRE CDO financial guarantee insurance policies. For the six months ended June 30, 2013, additional credit impairments and LAE on structured CMBS pools, CRE CDOs and CRE loan pools were estimated to be \$399 million as a result of additional delinquencies and loan level liquidations, as well as continued refinements of MBIA Corp.'s assessment of various commutation possibilities. The cumulative credit impairments and LAE on structured CMBS pools, CRE CDOs and CRE loan pools were estimated to be \$4.0 billion through June 30, 2013. The pace of increases in the delinquency rate has slowed, many loans are being modified and liquidations continue to take place. Some loans were liquidated with minimal losses of 1% to 2%, others experienced near complete losses, and in some cases severities exceeded 100%. These liquidations have led to losses in the CMBS market, and in many cases, have resulted in reductions of enhancement to the individual CMBS bonds referenced by the insured structured CMBS pools. In certain insured transactions, these losses have resulted in deductible erosion. Bond level enhancement and pool level deductibles are structural features intended to mitigate losses to MBIA Corp. However, some of the transactions reference similar rated subordinate tranches of CMBS bonds. When there are broad-based declines in property performance, this leverage can result in rapid deterioration in pool performance. During the second quarter of 2013, MBIA Corp. paid claims on a CMBS pool transaction that experienced deterioration such that all remaining deductible was eliminated.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

Loss and LAE Activity

Financial Guarantee Insurance Losses (Non-Derivative)

MBIA Corp.'s financial guarantee insurance losses and LAE for the six months ended June 30, 2013 are presented in the following table:

Losses and LAE

In millions	Six Months Ended June 30, 2013			
	Second-lien RMBS	First-lien RMBS	Other	Total
Losses and LAE related to actual and expected payments	\$ 99	\$ (2)	\$ 102	\$ 199
Recoveries of actual and expected payments	(219)	(5)	10	(214)
Gross losses incurred	(120)	(7)	112	(15)
Reinsurance	-	-	(61)	(61)
Losses and LAE	<u>\$ (120)</u>	<u>\$ (7)</u>	<u>\$ 51 ⁽¹⁾</u>	<u>\$ (76)</u>

(1) - Includes ABS CDOs, CMBS and other issues.

The second-lien RMBS recoveries of actual and expected payments included in the preceding table primarily include \$308 million in recoveries resulting from ineligible mortgage loans included in insured exposures that are subject to contractual obligations by sellers/servicers to repurchase or replace such mortgages, partially offset by a \$97 million reduction in excess spread. The second-lien RMBS losses and LAE related to actual and expected payments comprise net increases of previously established reserves.

The following table provides information about the financial guarantees and related claim liability included in each of MBIA Corp.'s surveillance categories as of June 30, 2013:

\$ in millions	Surveillance Categories				Total
	Caution List Low	Caution List Medium	Caution List High	Classified List	
Number of policies	45	23	6	204	278
Number of issues ⁽¹⁾	25	16	5	137	183
Remaining weighted average contract period (in years)	8.2	4.9	9.7	9.2	8.5
Gross insured contractual payments outstanding: ⁽²⁾					
Principal	\$ 3,679	\$ 1,263	\$ 58	\$ 8,562	\$ 13,562
Interest	2,549	322	29	4,740	7,640
Total	<u>\$ 6,228</u>	<u>\$ 1,585</u>	<u>\$ 87</u>	<u>\$ 13,302</u>	<u>\$ 21,202</u>
Gross claim liability	\$ -	\$ -	\$ -	\$ 1,562	\$ 1,562
Less:					
Gross potential recoveries	-	-	-	1,471	1,471
Discount, net	-	-	-	244	244
Net claim liability (recoverable)	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ (153)</u>	<u>\$ (153)</u>
Unearned premium revenue	\$ 123	\$ 20	\$ 1	\$ 104	\$ 248

(1) - An "issue" represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments.

(2) - Represents contractual principal and interest payments due by the issuer of the obligations insured by MBIA Corp.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

The following table provides information about the financial guarantees and related claim liability included in each of MBIA Corp.'s surveillance categories as of December 31, 2012:

\$ in millions	Surveillance Categories				Total
	Caution List Low	Caution List Medium	Caution List High	Classified List	
Number of policies	49	25	8	204	286
Number of issues ⁽¹⁾	27	15	8	135	185
Remaining weighted average contract period (in years)	8.2	4.0	6.0	9.5	8.6
Gross insured contractual payments outstanding: ⁽²⁾					
Principal	\$ 4,126	\$ 1,176	\$ 307	\$ 9,412	\$15,021
Interest	2,690	256	69	5,231	8,246
Total	<u>\$ 6,816</u>	<u>\$ 1,432</u>	<u>\$ 376</u>	<u>\$14,643</u>	<u>\$23,267</u>
Gross claim liability	\$ -	\$ -	\$ -	\$ 1,569	\$ 1,569
Less:					
Gross potential recoveries	-	-	-	4,090	4,090
Discount, net	-	-	-	233	233
Net claim liability (recoverable)	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ (2,754)</u>	<u>\$ (2,754)</u>
Unearned premium revenue	\$ 142	\$ 11	\$ 2	\$ 121	\$ 276

(1) - An "issue" represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments.

(2) - Represents contractual principal and interest payments due by the issuer of the obligations insured by MBIA Corp.

The gross claim liability as of June 30, 2013 and December 31, 2012 in the preceding tables represents MBIA Corp.'s estimate of undiscounted probability-weighted future claim payments, which principally relate to insured first-lien and second-lien RMBS transactions and U.S. public finance transactions. The gross potential recoveries represent MBIA Corp.'s estimate of undiscounted probability-weighted recoveries of actual claim payments and recoveries of estimated future claim payments, and principally relate to insured second-lien RMBS transactions and U.S. public finance transactions. Both amounts reflect the elimination of claim liabilities and potential recoveries related to VIEs consolidated by MBIA Corp.

The following table presents the components of MBIA Corp.'s loss and LAE reserves and insurance loss recoverable as reported on MBIA Corp.'s consolidated balance sheets as of June 30, 2013 and December 31, 2012 for insured obligations within MBIA Corp.'s "Classified List." The loss reserves (claim liability) and insurance claim loss recoverable included in the following table represent the present value of the probability-weighted future claim payments and recoveries reported in the preceding tables.

In millions	As of June 30,	As of December 31,
	2013	2012
Loss reserves (claim liability)	\$ 696	\$ 786
LAE reserves	60	60
Loss and LAE reserves	<u>\$ 756</u>	<u>\$ 846</u>
Insurance claim loss recoverable	\$ (902)	\$ (3,610)
LAE insurance loss recoverable	(5)	(38)
Insurance loss recoverable	<u>\$ (907)</u>	<u>\$ (3,648)</u>
Reinsurance recoverable on unpaid losses	\$ 188	\$ 152
Reinsurance recoverable on LAE reserves	26	6
Reinsurance recoverable on paid losses	-	1
Reinsurance recoverable on paid and unpaid losses	<u>\$ 214</u>	<u>\$ 159</u>

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

As of June 30, 2013, loss and LAE reserves include \$1.1 billion of reserves for expected future payments offset by expected recoveries of such future payments of \$385 million. As of December 31, 2012, loss and LAE reserves included \$1.2 billion of reserves for expected future payments offset by expected recoveries of such future payments of \$320 million. As of June 30, 2013, the insurance loss recoverable principally related to expected future recoveries on second-lien RMBS transactions resulting from expected excess spread generated by performing loans in such transactions. As of December 31, 2012, the insurance loss recoverable principally related to estimated recoveries of payments made by MBIA Corp. resulting from ineligible mortgage loans in certain insured second-lien residential mortgage loan securitizations that are subject to a contractual obligation by the sellers/servicers to repurchase or replace the ineligible mortgage loans and expected future recoveries on second-lien RMBS transactions resulting from expected excess spread generated by performing loans in such transactions.

To date, as a result of the Bank of America and Flagstar Bank settlements, as well as the agreement between Consenting Claimants, ResCap and Ally, in the ResCap bankruptcy proceeding discussed above, MBIA Corp. expects to be reimbursed for the majority of its potential recoveries related to ineligible mortgage loans by the end of 2013, which are primarily included in "Loan repurchase commitments" presented under the heading "Assets of consolidated variable interest entities" on MBIA Corp.'s consolidated balance sheets.

For the six months ended June 30, 2013, MBIA Corp. collected approximately \$2.8 billion, net of reinsurance, primarily related to insured second-lien RMBS transactions. MBIA Corp. made payments of \$210 million, of which, \$152 million related to insured second-lien RMBS transactions. For the six months ended June 30, 2013, the decrease in insurance loss recoverable related to paid losses totaled \$2.7 billion, and primarily resulted from the collections of previously established recoveries related to the settlement with Bank of America on the ineligible mortgage loans related to insured second-lien RMBS transactions.

The following table presents the amounts of MBIA Corp.'s second-lien RMBS exposure, gross undiscounted claim liability and potential recoveries related to non-consolidated VIEs and consolidated VIEs, included in MBIA Corp.'s "Classified List," as of June 30, 2013.

Second-lien RMBS Exposure

\$ in billions	Issues	Outstanding		Gross Undiscounted	
		Gross Principal	Gross Interest	Claim Liability	Potential Recoveries
Non-consolidated VIEs	23	\$ 3.7	\$ 1.3	\$ 0.2	\$ 0.9
Consolidated VIEs	11	\$ 1.9	\$ 0.7	\$ 0.1	\$ 1.4

The following table presents changes in MBIA Corp.'s loss and LAE reserves for the six months ended June 30, 2013. Changes in the loss and LAE reserves attributable to the accretion of the claim liability discount, changes in discount rates, changes in the timing and amounts of estimated payments and recoveries, changes in assumptions and changes in LAE reserves are recorded in "Losses and loss adjustment" expenses in MBIA Corp.'s consolidated statements of operations. As of June 30, 2013, the weighted average risk-free rate used to discount MBIA Corp.'s loss reserves (claim liability) was 1.97%. LAE reserves are expected to be settled within a one-year period and are not discounted.

In millions	Changes in Loss and LAE Reserves for the Six Months Ended June 30, 2013								
	Loss Payments	for Cases	Accretion of Claim Liability Discount	Changes in Discount Rates	Changes in Timing of Payments	Changes in Amount of Net Payments	Changes in Assumptions	Changes in Unearned Premium Revenue	Gross Loss and LAE Reserves as of June 30, 2013
Gross Loss and LAE Reserves as of December 31, 2012	with Reserves								
\$ 846	\$ (152)	\$ 6	\$ (62)	\$ 47	\$ 52	\$ 2	\$ 17	\$ -	\$ 756

The decrease in MBIA Corp.'s gross loss and LAE reserves reflected in the preceding table was primarily due to a decrease in reserves related to loss payments on insured first-lien and second-lien RMBS issues and changes in discount rates, partially offset by changes in amount and timing of net payments.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 5: Loss and Loss Adjustment Expense Reserves (continued)

Current period changes in MBIA Corp.'s estimate of potential recoveries may be recorded as an insurance loss recoverable asset, netted against the gross loss and LAE reserve liability, or both. The following table presents changes in MBIA Corp.'s insurance loss recoverable and changes in recoveries on unpaid losses reported within MBIA Corp.'s claim liability for the six months ended June 30, 2013. Changes in insurance loss recoverable attributable to the accretion of the discount on the recoverable, changes in discount rates, changes in the timing and amounts of estimated collections, changes in assumptions and changes in LAE recoveries are recorded in "Losses and loss adjustment" expenses in MBIA Corp.'s consolidated statements of operations.

In millions	Changes in Insurance Loss Recoverable and Recoveries on Unpaid Losses for the Six Months Ended June 30, 2013							
	Gross Reserve as of							Gross Reserve as of
	December 31, 2012	Collections for Cases with Recoveries	Accretion of Recoveries	Changes in Discount Rates	Changes in Timing of Collections	Changes in Amount of Collections	Changes in Assumptions	June 30, 2013
Insurance loss recoverable	\$ 3,648	\$ (2,852)	\$ 13	\$ (22)	\$ -	\$ (1)	\$ 154	\$ (33)
Recoveries on unpaid losses	320	-	2	(20)	-	-	81	2
Total	\$ 3,968	\$ (2,852)	\$ 15	\$ (42)	\$ -	\$ (1)	\$ 235	\$ (31)
								\$ 1,292

MBIA Corp.'s insurance loss recoverable decreased during 2013 primarily due to recoveries associated with issues outstanding as of December 31, 2012, which related to the settlement with Bank of America on the ineligible mortgage loans included in insured second-lien residential mortgage securitization exposures that are subject to contractual obligations by sellers/servicers to repurchase or replace such mortgages. Recoveries on unpaid losses increased primarily due to changes in assumptions on certain general obligation exposures and a toll road transaction, partially offset by changes in discount rates.

The following table presents MBIA Corp.'s total estimated recoveries from ineligible mortgage loans included in certain insured second-lien mortgage loan securitizations as of June 30, 2013. The total estimated recoveries from ineligible mortgage loans of \$1.1 billion include \$18 million recorded as "Insurance loss recoverable" and \$1.1 billion recorded as "Loan repurchase commitments" presented under the heading "Assets of consolidated variable interest entities" on MBIA Corp.'s consolidated balance sheets.

In millions						Total Estimated Recoveries from Ineligible Mortgage Loans as of June 30, 2013
Total Estimated Recoveries from Ineligible Mortgage Loans as of December 31, 2012	Accretion of Future Collections	Changes in Discount Rates	Recoveries (Collections)	Changes in Amount of Collections	Changes in Assumptions	
\$ 3,583	\$ 15	\$ (3)	\$ (2,897)	\$ 1	\$ 434	\$ 1,133

The decrease in MBIA Corp.'s total estimated recoveries from ineligible mortgage loans in the preceding table primarily resulted from the collections of previously established recoveries related to the settlement with Bank of America and Flagstar Bank on the ineligible mortgage loans related to insured second-lien RMBS securitizations.

Remediation actions may involve, among other things, waivers or renegotiations of financial covenants or triggers, waivers of contractual provisions, the granting of consents, transfer of servicing, consideration of restructuring plans, acceleration, security or collateral enforcement, actions in bankruptcy or receivership, litigation and similar actions. The types of remedial actions pursued are based on the insured obligation's risk type and the nature and scope of the event giving rise to the remediation. As part of any such remedial actions, MBIA Corp. seeks to improve its security position and to obtain concessions from the issuer of the insured obligation. From time to time, the issuer of an MBIA Corp.-insured obligation may, with the consent of MBIA Corp., restructure the insured obligation by extending the term, increasing or decreasing the par amount or decreasing the related interest rate, with MBIA Corp. insuring the restructured obligation.

Costs associated with remediating insured obligations assigned to MBIA Corp.'s "Caution List—Low," "Caution List—Medium," "Caution List—High" and "Classified List" are recorded as LAE. LAE is primarily recorded as part of MBIA Corp.'s provision for its loss reserves and included in "Losses and loss adjustment" expenses on MBIA Corp.'s consolidated statements of operations. The following table presents the gross expenses related to remedial actions for insured obligations:

In millions	Six Months Ended June 30,	
	2013	2012
Loss adjustment expense incurred, gross	\$ 33	\$ 79

Note 6: Fair Value of Financial Instruments

Fair Value Measurement

Fair value is a market-based measure considered from the perspective of a market participant. Therefore, even when market assumptions are not readily available, MBIA Corp.'s own assumptions are set to reflect those which it believes market participants would use in pricing an asset or liability at the measurement date. The fair value measurements of financial instruments held or issued by MBIA Corp. are determined through the use of observable market data when available. Market data is obtained from a variety of third-party sources, including dealer quotes. If dealer quotes are not available for an instrument that is infrequently traded, MBIA Corp. uses alternate valuation methods, including either dealer quotes for similar instruments or modeling using market data inputs. The use of alternate valuation methods generally requires considerable judgment in the application of estimates and assumptions, and changes to such estimates and assumptions may produce materially different fair values.

The accounting guidance for fair value measurement establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available and reliable. Observable inputs are those MBIA Corp. believes that market participants would use in pricing an asset or liability based on available market data. Unobservable inputs are those that reflect MBIA Corp.'s beliefs about the assumptions market participants would use in pricing an asset or liability based on the best information available. The fair value hierarchy is broken down into three levels based on the observability and reliability of inputs, as follows:

- Level 1—Valuations based on quoted prices in active markets for identical assets or liabilities that MBIA Corp. can access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail any degree of judgment.
- Level 2—Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly. Level 2 assets include debt securities with quoted prices that are traded less frequently than exchange-traded instruments, securities which are priced using observable inputs and derivative contracts whose values are determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.
- Level 3—Valuations based on inputs that are unobservable and supported by little or no market activity and that are significant to the overall fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques where significant inputs are unobservable, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The availability of observable inputs can vary from product to product and period to period and is affected by a wide variety of factors, including, for example, the type of product, whether the product is new and not yet established in the marketplace, and other characteristics particular to the product. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, MBIA Corp. assigns the level in the fair value hierarchy for which the fair value measurement in its entirety falls, based on the least observable input that is significant to the fair value measurement.

1. Financial Assets (excluding derivative assets)

Financial assets, excluding derivative assets, held by MBIA Corp. primarily consist of investments in debt securities. Substantially all of MBIA Corp.'s investments are priced by independent third parties, including pricing services and brokers. Typically MBIA Corp. receives one pricing service value or broker quote for each instrument, which represents a non-binding indication of value. MBIA Corp. reviews the assumptions, inputs and methodologies used by pricing services to obtain reasonable assurance that the prices used in its valuations reflect fair value. When MBIA Corp. believes a third-party quotation differs significantly from its internally developed expectation of fair value, whether higher or lower, MBIA Corp. reviews its data or assumptions with the provider. This review includes comparing significant assumptions such as prepayment speeds, default ratios, forward yield curves, credit spreads and other significant quantitative inputs to internal assumptions, and working with the price provider to reconcile the differences. The price provider may subsequently provide an updated price. In the event that the price provider does not update their price, and MBIA Corp. still does not agree with the price provided, MBIA Corp. will try to obtain a price from another third-party provider, such as a broker, or use an internally developed price which it believes represents the fair value of the investment. The fair values of investments for which internal prices were used were not significant to the aggregate fair value of MBIA Corp.'s investment portfolio as of June 30, 2013 or December 31, 2012. All challenges to third-party prices are reviewed by staff of MBIA Corp. with relevant expertise to ensure reasonableness of assumptions.

Note 6: Fair Value of Financial Instruments (continued)

In addition to challenging pricing assumptions, MBIA Corp. obtains reports from the independent accountants for significant third-party pricing services attesting to the effectiveness of the controls over data provided to MBIA Corp. These reports are obtained annually and are reviewed by MBIA Corp. to ensure key controls are applied by the pricing services, and that appropriate user controls are in place at the third-party pricing services organization to ensure proper measurement of the fair values of its investments. In the event that any controls in these reports are deemed ineffective by independent accountants, MBIA Corp. will take the necessary actions to ensure that internal user controls are in place to mitigate the control risks. No deficiencies were noted for significant third-party pricing services used.

2. Derivative Assets and Liabilities

MBIA Corp.'s derivative liabilities are primarily insured credit derivatives that reference structured pools of cash securities and CDSs. MBIA Corp. generally insured the most senior liabilities of such transactions, and at the inception of transactions its exposure generally had more subordination than needed to achieve triple-A ratings from credit rating agencies. The types of collateral underlying its insured derivatives consist of cash securities and CDSs referencing primarily corporate, asset-backed, residential mortgage-backed, commercial mortgage-backed, CRE loans, and CDO securities.

MBIA Corp.'s insured credit derivative contracts are non-traded structured credit derivative transactions. Since insured derivatives are highly customized and there is generally no observable market for these derivatives, MBIA Corp. estimates their fair values in a hypothetical market based on internal and third-party models simulating what a similar company would charge to assume MBIA Corp.'s position in the transaction at the measurement date. This pricing would be based on the expected loss of the exposure. MBIA Corp. reviews its valuation model results on a quarterly basis to assess the appropriateness of the assumptions and results in light of current market activity and conditions. This review is performed by internal staff with relevant expertise. If live market spreads or securities prices are observable for similar transactions, those spreads are an integral part of the analysis. New insured transactions that resemble existing (previously insured) transactions, if any, would be considered, as well as negotiated settlements of existing transactions.

MBIA Corp. may from time to time make changes in its valuation techniques if the change results in a measurement that it believes is equally or more representative of fair value under current circumstances.

3. Internal Review Process

All significant financial assets and liabilities, including derivative assets and liabilities, are reviewed by committees created by MBIA Corp. to ensure compliance with MBIA Corp. policies and risk procedures in the development of fair values of financial assets and liabilities. These valuation committees review, among other things, key assumptions used for internally developed prices, significant changes in sources and uses of inputs, including changes in model approaches, and any adjustments from third-party inputs or prices to internally developed inputs or prices. The committees also review any significant impairment or improvements in fair values of the financial instruments from prior periods. From time to time, these committees will reach out to MBIA Corp. valuation experts to better understand key methods and assumptions used for the determination of fair value, including understanding significant changes in fair values. These committees are comprised of senior finance team members with the relevant experience in the financial instruments their committee is responsible for. Each quarter, these committees document their agreement with the fair values developed by management of MBIA Corp. as reported in the quarterly and annual financial statements.

Valuation Techniques

Valuation techniques for financial instruments measured at fair value are described below:

Fixed-Maturity Securities (including short-term investments) Held as Available-For-Sale, Investments (including fixed-maturity securities) Carried at Fair Value, Other Investments, and Investments Held-to-Maturity, at Amortized Cost.

Fixed-maturity securities (including short-term investments) held as available-for-sale ("AFS"), investments carried at fair value, other investments, and investments held-to-maturity ("HTM"), at amortized cost include investments in U.S. Treasury and government agencies, foreign governments, corporate obligations, mortgage-backed and asset-backed securities (including CMBS and CDOs), state and municipal bonds, perpetual debt and equity securities (including money market mutual funds), and loans receivable with an affiliate.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

These investments are generally valued based on recently executed transaction prices or quoted market prices. When quoted market prices are not available, fair value is generally determined using quoted prices of similar investments or a valuation model based on observable and unobservable inputs. Inputs vary depending on the type of investment. Observable inputs include contractual cash flows, interest rate yield curves, CDS spreads, prepayment and volatility scores, diversity scores, cross-currency basis index spreads, and credit spreads for structures similar to the financial instrument in terms of issuer, maturity and seniority. Unobservable inputs include cash flow projections and the value of any credit enhancement.

The fair value of the HTM investments is determined using discounted cash flow models. Key inputs include unobservable cash flows projected over the expected term of the investment discounted using observable interest rate yield curves of similar securities.

Investments based on quoted market prices of identical investments in active markets are classified as Level 1 of the fair value hierarchy. Level 1 investments generally consist of U.S. Treasury and foreign government and agency investments. Quoted market prices of investments in less active markets, as well as investments which are valued based on other than quoted prices for which the inputs are observable, such as interest rate yield curves, are categorized in Level 2 of the fair value hierarchy. Investments that contain significant inputs that are not observable are categorized as Level 3.

Cash and Cash Equivalents, Accrued Investment Income and Payable for Investments Purchased

The carrying amounts of cash and cash equivalents, accrued investment income and payable for investments purchased approximate fair values due to the short-term nature and credit worthiness of these instruments.

Loans Receivable at Fair Value

Loans receivable at fair value are comprised of loans held by consolidated VIEs consisting of residential mortgage loans, commercial mortgage loans and other whole business loans. Fair values of residential mortgage loans are determined using quoted prices for mortgage-backed securities ("MBS") issued by the respective VIE and adjustments for the fair values of the financial guarantees provided by MBIA Corp. on the related MBS. Fair values of commercial mortgage loans and other whole business loans are valued based on quoted prices of similar collateralized MBS. Loans receivable at fair value are categorized in Level 3 of the fair value hierarchy.

Loan Repurchase Commitments

Loan repurchase commitments are obligations owed by the sellers/servicers of mortgage loans to either MBIA Corp. as reimbursement of paid claims or to the RMBS trusts as defined in the transaction documents. Loan repurchase commitments are assets of the consolidated VIEs. This asset represents the rights of MBIA Corp. against the sellers/servicers for breaches of representations and warranties that the securitized residential mortgage loans sold to the trust to comply with stated underwriting guidelines and for the sellers/servicers to cure, replace, or repurchase mortgage loans. Fair value measurements of loan repurchase commitments represent the amounts owed by the sellers/servicers to MBIA Corp. as reimbursement of paid claims. Loan repurchase commitments are not securities and no quoted prices or comparable market transaction information are observable or available. Loan repurchase commitments at fair value are categorized in Level 3 of the fair value hierarchy. Fair values of loan repurchase commitments are determined using discounted cash flow techniques based on inputs including:

- breach rates representing the rate at which the sellers/servicers failed to comply with stated representations and warranties;
- recovery rates representing the estimates of future cash flows for the asset, including estimates about possible variations in the amount of cash flows expected to be collected;
- expectations about possible variations in the timing of collections of the cash flows; and
- time value of money, represented by the rate on risk-free monetary assets.

Variable Interest Entity Notes

The fair values of VIE notes are determined based on recently executed transaction prices or quoted prices where observable. When position-specific quoted prices are not observable, fair values are based on quoted prices of similar securities. Fair values based on quoted prices of similar securities may be adjusted for factors unique to the securities, including any credit enhancement. When observable quoted prices are not available, fair value is determined based on discounted cash flow techniques of the underlying collateral using observable and unobservable inputs. Observable inputs include interest rate yield curves and bond spreads of similar securities. Unobservable inputs include the value of any credit enhancement. VIE notes are categorized in Level 2 or Level 3 of the fair value hierarchy based on the lowest level input that is significant to the fair value measurement in its entirety.

Note 6: Fair Value of Financial Instruments (continued)

Variable Interest Entity Derivatives

The VIE's have entered into derivative transactions primarily consisting of interest rate swaps, cross currency swaps, and interest rate caps. Fair values of over-the-counter derivatives are determined using valuation models based on observable inputs. These observable and market-based inputs include interest rate and volatilities. These derivatives are categorized in Level 2 or Level 3 of the fair value hierarchy based on the input that is significant to the fair value measurement in its entirety.

Long-term Debt

Long-term debt consists of surplus notes. At December 31, 2012 there was a secured loan from an affiliate which was repaid in the second quarter of 2013. The fair value of the surplus notes is estimated based on quoted market prices for identical or similar securities. The fair value of the secured loan was determined as the net present value of expected cash flows from the loan. The discount rate is the yield to maturity of a comparable corporate bond index. Long-term debt is categorized as Level 2 of the fair value hierarchy.

Insured Credit Derivatives

MBIA Corp. derivative contracts primarily consist of insured credit derivatives which cannot be legally traded and generally do not have observable market prices. MBIA Corp. determines the fair values of insured credit derivatives using valuation models. The fair valuation models are consistently applied from period to period, with refinements to the fair value estimation approach being applied as and when the information becomes available. Negotiated settlements are also considered when determining fair value to provide the best estimate of how another market participant would evaluate fair value.

Approximately 99% of the balance sheet fair value of insured credit derivatives as of June 30, 2013 was valued based on the Binomial Expansion Technique ("BET") Model. Approximately 1% of the balance sheet fair value of insured credit derivatives as of June 30, 2013 was valued based on the internally developed Direct Price Model and a dual-default model. The valuation of insured derivatives includes the impact of its credit standing. All of these derivatives are categorized as Level 3 of the fair value hierarchy as their fair value is derived using significant unobservable inputs.

A. Description of the BET Model

1. Valuation Model Overview

The BET Model estimates what a bond insurer would charge to guarantee a transaction at the measurement date, based on the market-implied default risk of the underlying collateral and the remaining structural protection in a deductible or subordination.

Inputs to the process of determining fair value for structured transactions using the BET Model include estimates of collateral loss, allocation of loss to separate tranches of the capital structure and calculation of the change in value.

- Estimates of aggregated collateral losses are calculated by reference to the following (described in further detail under "BET Model Inputs" below):
 - credit spreads of underlying collateral based on actual spreads or spreads on similar collateral with similar ratings, or in some cases, are benchmarked; for collateral pools where the spread distribution is characterized by extremes, MBIA Corp. models each segment of the pool separately instead of using an overall pool average;
 - diversity score of the collateral pool as an indication of correlation of collateral defaults; and
 - recovery rate for all defaulted collateral.
- Allocation of losses to separate tranches of the capital structure according to priority of payments in a transaction.
- The inception-to-date unrealized gain or loss on a transaction is the difference between the original price of the risk (the original market-implied expected loss) and the current price of the risk based on the assumed market-implied expected losses derived from the model.

Additional structural assumptions of the BET Model are:

- Default probabilities are determined by three factors: credit spread, recovery rate after default and the time period under risk;
- Frequencies of defaults are modeled evenly over time;
- Collateral assets are generally considered on an average basis rather than being modeled on an individual basis; and
- Collateral asset correlation is modeled using a diversity score, which is calculated based on industry or sector concentrations. Recovery rates are based on historical averages and updated based on market evidence.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

2. BET Model Inputs

a. Credit spreads

The average spread of collateral is a key input as MBIA Corp. assumes credit spreads reflect the market's assessment of default probability for each piece of collateral. Spreads are obtained from market data sources published by third parties (e.g., dealer spread tables for assets most closely resembling collateral within MBIA Corp.'s transactions) as well as collateral-specific spreads on the underlying reference obligations provided by trustees or market sources. Also, when these sources are not available, MBIA Corp. benchmarks spreads for collateral against market spreads or prices. This data is reviewed on an ongoing basis for reasonableness and applicability to MBIA Corp.'s derivative portfolio. MBIA Corp. also calculates spreads based on quoted prices and on internal assumptions about expected life when pricing information is available and spread information is not.

MBIA Corp. uses the spread hierarchy listed below in determining which source of spread information to use, with the rule being to use CDS spreads where available and cash security spreads as the next alternative.

Spread Hierarchy:

- Collateral-specific credit spreads when observable;
- Sector-specific spread tables by asset class and rating;
- Corporate spreads, including Bloomberg spread tables based on rating; and
- Benchmark from most relevant market source when corporate spreads are not directly relevant.

There were some transactions where MBIA Corp. incorporated multiple levels within the hierarchy, including using actual collateral-specific credit spreads in combination with a calculated spread based on an assumed relationship. In those cases, MBIA Corp. classified the transaction as being benchmarked from the most relevant spread source even though the majority of the average spread was from actual collateral-specific spreads. As of June 30, 2013, sector-specific spreads were used in 11% of the transactions valued using the BET Model. Corporate spreads were used in 48% of the transactions and spreads benchmarked from the most relevant spread source were used for 41% of the transactions. The spread source can also be identified by whether or not it is based on collateral weighted average rating factor ("WARF"). No collateral-specific spreads are based on WARF. Sector-specific spreads, corporate spreads and some benchmarked spreads are based on WARF. WARF-sourced and/or ratings-sourced credit spreads were used for 69% of the transactions.

Over time, the data inputs change as new sources become available, existing sources are discontinued or are no longer considered to be reliable or the most appropriate. It is always MBIA Corp.'s objective to use more observable spread hierarchies defined above. However, MBIA Corp. may on occasion move to less observable spread inputs due to the discontinuation of data sources or due to MBIA Corp. considering certain spread inputs no longer representative of market spreads.

b. Diversity Scores

Diversity scores are a means of estimating the diversification in a portfolio. The diversity score estimates the number of uncorrelated assets that are assumed to have the same loss distribution as the actual portfolio of correlated assets. While diversity score is a required input into the BET model, due to current high levels of default within the collateral of the structures, diversity score does not have a significant impact on valuation.

c. Recovery Rate

The recovery rate represents the percentage of par expected to be recovered after an asset defaults, indicating the severity of a potential loss. MBIA Corp. generally uses rating agency recovery assumptions which may be adjusted to account for differences between the characteristics and performance of the collateral used by the rating agencies and the actual collateral in MBIA Corp.-insured transactions. MBIA Corp. may also adjust rating agency assumptions based on the performance of the collateral manager and on empirical market data.

Note 6: Fair Value of Financial Instruments (continued)

d. Nonperformance Risk

MBIA Corp.'s valuation methodology for insured credit derivative liabilities incorporates MBIA Corp.'s own nonperformance risk. MBIA Corp. calculates the fair value by discounting the market value loss estimated through the BET Model at discount rates which include MBIA Corp.'s CDS spreads as of June 30, 2013. The CDS spreads assigned to each deal are based on the weighted average life of the deal. MBIA Corp. limits the nonperformance impact so that the derivative liability could not be lower than MBIA Corp.'s recovery derivative price multiplied by the unadjusted derivative liability.

Overall Model Results

As of June 30, 2013 and December 31, 2012, MBIA Corp.'s net insured derivative liability was \$1.6 billion and \$2.9 billion, respectively, and was primarily related to the fair values of insured credit derivatives based on the results of the aforementioned pricing models. In the current environment the most significant driver of changes in fair value is nonperformance risk. In aggregate, the nonperformance calculation resulted in a pre-tax net insured derivative liability that was \$485 million and \$4.4 billion lower than the net liability that would have been estimated if MBIA Corp. excluded nonperformance risk in its valuation as of June 30, 2013 and December 31, 2012, respectively. Nonperformance risk is a fair value concept and does not contradict MBIA Corp.'s internal view, based on fundamental credit analysis of MBIA Corp.'s economic condition, that MBIA Corp. will be able to pay all claims when due.

Accrued Interest Expense

The fair value of the accrued interest expense on the surplus notes due 2033 is determined based on the scheduled interest payments discounted by the market's perception of the credit risk related to the repayment of the surplus notes. The credit risk related to the repayment of the surplus notes is based on recent trades of the surplus notes. The deferred interest payment will be due on the first business day on or after which MBIA Corp. obtains approval to make such payment.

The carrying amounts of accrued interest expense on all other long-term debt approximate fair value due to the short-term nature of these instruments.

Financial Guarantees

Gross Financial Guarantees —The fair value of gross financial guarantees is determined using discounted cash flow techniques based on inputs that include (i) assumptions of expected losses on financial guarantee policies where loss reserves have not been recognized, (ii) amount of losses expected on financial guarantee policies where loss reserves have been established, net of expected recoveries, (iii) the cost of capital reserves required to support the financial guarantee liability, (iv) operating expenses, and (v) discount rates. MBIA Corp.'s CDS spread and recovery rate are used as its discount rate.

The carrying value of MBIA Corp.'s gross financial guarantees consists of unearned premium revenue and loss and LAE reserves, net of the insurance loss recoverable as reported on MBIA Corp.'s consolidated balance sheets.

Ceded Financial Guarantees —The fair value of ceded financial guarantees is determined by applying the percentage ceded to reinsurers to the related fair value of the gross financial guarantees. The carrying value of ceded financial guarantees consists of prepaid reinsurance premiums and reinsurance recoverable on paid and unpaid losses as reported on MBIA Corp.'s consolidated balance sheets.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

Significant Unobservable Inputs

The following tables provide quantitative information regarding the significant unobservable inputs used by MBIA Corp. for assets and liabilities measured at fair value on a recurring basis as of June 30, 2013 and December 31, 2012. These tables exclude inputs used to measure fair value that are not developed by MBIA Corp., such as broker prices and other third-party pricing service valuations.

In millions	Fair Value as of June 30, 2013	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Assets of consolidated VIEs:				
Loans receivable at fair value	\$ 1,790	Quoted market prices adjusted for financial guarantees provided to VIE obligations	Impact of financial guarantee	0% - 18% (4%)
Loan repurchase commitments	1,115	Discounted cash flow	Recovery rates Breach rates	10% - 66% (34%) 67% - 92% (77%)
Liabilities of consolidated VIEs:				
Variable interest entity notes	832	Quoted market prices of VIE assets adjusted for financial guarantees provided	Impact of financial guarantee	0% - 29% (10%)
Credit derivative liabilities, net:				
CMBS	1,024	BET Model	Recovery rates Nonperformance risk Weighted average life (in years) CMBS spreads	25% - 90% (60%) 9% - 53% (23%) 1.6 - 28.5 (3.8) 1.2% - 25.3% (12.0%)
Multi-sector CDO	15	Direct Price Model	Nonperformance risk	53% - 53% (53%)
Other	609	BET Model	Recovery rates Nonperformance risk Weighted average life (in years)	42% - 70% (47%) 13% - 23% (21%) 0.2 - 3.8 (2.3)

In millions	Fair Value as of December 31, 2012	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Assets of consolidated VIEs:				
Loans receivable at fair value	\$ 1,881	Quoted market prices adjusted for financial guarantees provided to VIE obligations	Impact of financial guarantee	0% - 14% (3%)
Loan repurchase commitments	1,086	Discounted cash flow	Recovery rates Breach rates	10% - 75% (47%) 66% - 94% (78%)
Liabilities of consolidated VIEs:				
Variable interest entity notes	1,948	Quoted market prices of VIE assets adjusted for financial guarantees provided	Impact of financial guarantee	0% - 23% (6%)
Credit derivative liabilities, net:				
CMBS	1,590	BET Model	Recovery rates Nonperformance risk Weighted average life (in years) CMBS spreads	21% - 90% (51%) 19% - 59% (58%) 0.1 - 5.6 (4.4) 1% - 23% (13%)
Multi-sector CDO	525	Direct Price Model	Nonperformance risk	59% - 59% (59%)
Other	806	BET Model	Recovery rates Nonperformance risk Weighted average life (in years)	42% - 75% (47%) 42% - 59% (58%) 0.1 - 19.6 (3.0)

Note 6: Fair Value of Financial Instruments (continued)

Sensitivity of Significant Unobservable Inputs

The significant unobservable input used in the fair value measurement of MBIA Corp.'s loans receivable at fair value of consolidated VIEs is the impact of the financial guarantee. The fair value of loans receivable is calculated by subtracting the value of the financial guarantee from the market value of VIE liabilities. The value of a financial guarantee is estimated by MBIA Corp. as the present value of expected cash payments under the policy. As expected cash payments provided by MBIA Corp. under the insurance policy increase, there is a lower expected cash flow on the underlying loans receivable of the VIE. This results in a lower fair value of the loans receivable in relation to the obligations of the VIE.

The significant unobservable inputs used in the fair value measurement of MBIA Corp.'s loan repurchase commitments of consolidated VIEs are the recovery rates and the breach rates. Recovery rates reflect the estimates of future cash flows reduced for litigation delays and risks and/or potential financial distress of the sellers/servicers. The estimated recoveries of the loan repurchase commitments may differ from the actual recoveries that may be received in the future. Breach rates represent the rate at which the mortgages fail to comply with stated representations and warranties of the sellers/servicers. Significant increases or decreases in the recovery rates and the breach rates would result in significantly higher or lower fair values of the loan repurchase commitments, respectively. Additionally, changes in the legal environment and the ability of the counterparties to pay would impact the recovery rate assumptions, which could significantly impact the fair value measurement. Any significant challenges by the counterparties to MBIA Corp.'s determination of breaches of representations and warranties could significantly adversely impact the fair value measurement. Recovery rates and breach rates are determined independently. Changes in one input will not necessarily have any impact on the other input.

The significant unobservable input used in the fair value measurement of MBIA Corp.'s variable interest entity notes of consolidated VIEs is the impact of the financial guarantee. The fair value of VIE notes is calculated by adding the value of the financial guarantee to the market value of VIE assets. The value of a financial guarantee is estimated by MBIA Corp. as the present value of expected cash payments under the policy. As the value of the guarantee provided by MBIA Corp. to the obligations issued by the VIE increases, the credit support adds value to the liabilities of the VIE. This results in an increase in the fair value of the liabilities of the VIE.

Note 6: Fair Value of Financial Instruments (continued)

The significant unobservable inputs used in the fair value measurement of MBIA Corp.'s CMBS credit derivatives, which are valued using the BET Model, are CMBS spreads, recovery rates, nonperformance risk and weighted average life. The CMBS spread is an indicator of credit risk of the collateral securities. The recovery rate represents the percentage of notional expected to be recovered after an asset defaults, indicating the severity of a potential loss. The nonperformance risk is an assumption of MBIA Corp.'s own ability to pay and whether MBIA Corp. will have the necessary resources to pay the obligations as they come due. Weighted average life is based on MBIA Corp.'s estimate of when the principal of the underlying collateral of the CMBS structure will be repaid. A significant increase or decrease in CMBS spreads can result in an increase or decrease in the fair value of the derivative liability, respectively. A significant increase in weighted average life can result in an increase or decrease in the fair value of the derivative liability, depending on the discount rate and the timing of significant losses. Any significant increase or decrease in recovery rates or MBIA Corp.'s nonperformance risk would result in a decrease or increase in the fair value of the derivative liabilities, respectively. CMBS spreads, recovery rates, nonperformance risk and weighted average lives are determined independently. Changes in one input will not necessarily have any impact on the other inputs.

The significant unobservable input used in the fair value measurement of MBIA Corp.'s multi-sector CDO credit derivatives, which are valued using the Direct Price Model, is nonperformance risk. The nonperformance risk is an assumption of MBIA Corp.'s own ability to pay and whether MBIA Corp. will have the necessary resources to pay the obligations as they come due. Any significant increase or decrease in MBIA Corp.'s nonperformance risk would result in a decrease or increase in the fair value of the derivative liabilities, respectively.

The significant unobservable inputs used in the fair value measurement of MBIA Corp.'s other credit derivatives, which are valued using the BET Model, are recovery rates, nonperformance risk and weighted average life. The recovery rate represents the percentage of notional expected to be recovered after an asset defaults, indicating the severity of a potential loss. The nonperformance risk is an assumption of MBIA Corp.'s own ability to pay and whether MBIA Corp. will have the necessary resources to pay the obligations as they come due. Weighted average life is based on MBIA Corp.'s estimate of when the principal of the underlying collateral will be repaid. A significant increase in weighted average life can result in an increase or decrease in the fair value of the derivative liability, depending on the discount rate and the timing of significant losses. Any significant increase or decrease in recovery rates or MBIA Corp.'s nonperformance risk would result in a decrease or increase in the fair value of the derivative liabilities, respectively. Recovery rates, nonperformance risk and weighted average lives are determined independently. Changes in one input will not necessarily have any impact on the other inputs.

(1) - Transferred in and out at the end of the period.

Transfers into and out of Level 3 were \$17 million and \$3 million, respectively, for the three months ended June 30, 2013. Transfers into and out of Level 2 were \$3 million and \$17 million, respectively, for the three months ended June 30, 2013. Transfers into Level 3 were principally related to other ABS, credit derivatives and foreign government securities where inputs, which are significant to their valuation, became unobservable during the quarter. Transfers out of Level 3 were principally RMBS non-agency securities where inputs, which are significant to their valuation, became observable. These Level 2 inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs. There were no transfers into or out of Level 1.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

Transfers into and out of Level 3 were \$30 million and \$0 million, respectively, for the three months ended June 30, 2012. Transfers into and out of Level 2 were \$0 million and \$30 million, respectively, for the three months ended June 30, 2012. Transfers into Level 3 were principally for corporate obligations where inputs, which are significant to their valuation, became unobservable during the quarter. These Level 2 inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs. There were no transfers into level 2. There were no transfers into or out of Level 1.

All Level 1, 2 and 3 designations are made at the end of each accounting period.

The following tables present information about changes in Level 3 assets (including short-term investments) and liabilities measured at fair value on a recurring basis for the six months ended June 30, 2013 and 2012:

Changes in Level 3 Assets and Liabilities Measured at Fair Value on a Recurring Basis for the Six Months Ended June 30, 2013

(1) - Transferred in and out at the end of the period.

Transfers into and out of Level 3 were \$50 million and \$8 million, respectively, for the six months ended June 30, 2013. Transfers into and out of Level 2 were \$8 million and \$50 million, respectively, for the six months ended June 30, 2013. Transfers into Level 3 were principally related to CMBS, foreign governments and ABS where inputs, which are significant to their valuation, became unobservable. Transfers into Level 2 were principally for RMBS non-agency and foreign government securities, where inputs, which are significant to their valuation, became observable. These level 2 inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs. There were no transfers into or out of Level 1.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

Transfers into and out of Level 3 were \$47 million and \$9 million, respectively, for the six months ended June 30, 2012. Transfers into and out of Level 2 were \$9 million and \$47 million, respectively, for the six months ended June 30, 2012. Transfers into Level 3 were principally related to corporate obligations and CDOs where inputs, which are significant to their valuation, became unobservable during the period. Transfers into Level 2 were principally for CMBS where inputs, which are significant to their valuation, became observable. These level 2 inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs. There were no transfers into or out of Level 1.

All Level 1, 2 and 3 designations are made at the end of each accounting period.

Gains and losses (realized and unrealized) included in earnings related to Level 3 assets and liabilities for the three and six months ended June 30, 2013 and 2012 are reported on MBIA Corp.'s consolidated statements of operations as follows:

	Three Months Ended June 30, 2013		Three Months Ended June 30, 2012

Fair Value Option

MBIA Corp. elected to record at fair value certain financial instruments of VIEs that have been consolidated in connection with the adoption of the accounting guidance for consolidation of VIEs, among others.

The following table presents the changes in fair value included in MBIA Corp.'s consolidated statements of operations for the three and six months ended June 30, 2013 and 2012, for all financial instruments for which the fair value option was elected:

In millions	Net Gains (Losses) on Financial Instruments at Fair Value and Foreign Exchange			
	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Fixed-maturity securities held at fair value	\$ (16)	\$ (56)	\$ 2	\$ (57)
Loans receivable at fair value:				
Residential mortgage loans	145	(117)	71	(99)
Other loans	-	(2)	13	(41)
Loan repurchase commitments	50	44	139	43
Long-term debt	(160)	140	(79)	129

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

The following table reflects the difference between the aggregate fair value and the aggregate remaining contractual principal balance outstanding as of June 30, 2013 and December 31, 2012, for loans and VIE notes for which the fair value option was elected:

In millions	As of June 30, 2013			As of December 31, 2012		
	Contractual Principal Outstanding	Fair Value	Difference	Contractual Principal Outstanding	Fair Value	Difference
Loans receivable at fair value:						
Residential mortgage loans	\$ 2,025	\$ 1,704	\$ 321	\$ 2,307	\$ 1,735	\$ 572
Residential mortgage loans (90 days or more past due)	228	86	142	244	54	190
Other loans	-	-	-	22	22	-
Other loans (90 days or more past due)	-	-	-	197	70	127
Total loans receivable at fair value	\$ 2,253	\$ 1,790	\$ 463	\$ 2,770	\$ 1,881	\$ 889
VIE notes	\$ 4,116	\$ 2,687	\$ 1,429	\$ 9,079	\$ 3,675	\$ 5,404

Substantially all gains and losses included in earnings during the periods ended June 30, 2013 and December 31, 2012 on loans receivable and VIE notes reported in the preceding tables are attributable to credit risk. This is primarily due to the high rate of defaults on loans and the collateral supporting the VIE notes, resulting in depressed pricing of the financial instruments.

Note 7: Investments

MBIA Corp.'s investments, excluding those elected under the fair value option, include debt and equity securities classified as either AFS or HTM. Other invested assets designated as AFS are primarily comprised of money market funds.

The following tables present the amortized cost, fair value and corresponding gross unrealized gains and losses for AFS and HTM investments in MBIA Corp.'s investment portfolios as of June 30, 2013 and December 31, 2012:

In millions	June 30, 2013

With the weighting applied on the fair value of each security relative to the total fair value, the weighted average contractual maturity of securities in an unrealized loss position as of June 30, 2013 and December 31, 2012 was 28 and 27 years, respectively. As of June 30, 2013 and December 31, 2012, there were 7 and 36 securities, respectively, that were in an unrealized loss position for a continuous twelve-month period or longer, of which the fair values of 5 and 6 securities, respectively, were below book value by more than 5%.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 7: Investments (continued)

Other-Than-Temporary Impairments

MBIA Corp. has evaluated on a security-by-security basis whether the unrealized losses in its investment portfolios were other-than-temporary considering duration and severity of unrealized losses, the circumstances that gave rise to the unrealized losses, and whether MBIA Corp. has the intent to sell the securities or more likely than not will be required to sell the securities before their anticipated recovery. Based on its evaluation, MBIA Corp. determined that the unrealized losses on the remaining securities were temporary in nature because its impairment analysis, including projected future cash flows, indicated that MBIA Corp. would be able to recover the amortized cost of impaired assets. MBIA Corp. also concluded that it does not have the intent to sell securities in an unrealized loss position and it is more likely than not that it would not have to sell these securities before recovery of their cost basis. In making this conclusion, MBIA Corp. examined the cash flow projections for its investment portfolios, the potential sources and uses of cash in its businesses, and the cash resources available to its business other than sales of securities. It also considered the existence of any risk management or other plans as of June 30, 2013 that would require the sale of impaired securities. On a quarterly basis, MBIA Corp. re-evaluates the unrealized losses in its investment portfolios to determine whether an impairment loss should be realized in current earnings. Impaired securities that MBIA Corp. intends to sell before the expected recovery of such securities' fair values have been written down to fair value.

Credit Loss Rollforward

The portion of certain other-than-temporary impairments ("OTTI") losses on fixed-maturity securities that does not represent credit losses is recognized in AOCI. For these impairments, the net amount recognized in earnings represents the difference between the amortized cost of the security and the net present value of its projected future discounted cash flows prior to impairment. Any remaining difference between the fair value and amortized cost is recognized in AOCI.

The following table presents the amount of credit loss impairments recognized in earnings on fixed-maturity securities held by MBIA Corp. as of the dates indicated, for which a portion of the OTTI losses was recognized in AOCI, and the corresponding changes in such amounts. There were no OTTI losses for which a portion was recognized in AOCI for the six months ended June 30, 2013.

<u>In millions</u>	<u>Six Months Ended June 30,</u>
<u>Credit Losses Recognized in Earnings Related to</u>	<u>2012</u>
<u>Other-Than-Temporary Impairments</u>	
Beginning balance	\$ 57
Reductions for credit loss impairments previously recognized on securities impaired to fair value during the period ⁽¹⁾	(57)
Ending balance	\$ -

(1) - Represents circumstances where MBIA Corp. determined in the current period that it intends to sell the security or it is more likely than not that it will be required to sell the security before recovery of the security's amortized cost.

Sales of AFS Investments

Gross realized gains and losses are recorded in "Net gains (losses) on financial instruments at fair value and foreign exchange" on MBIA Corp.'s consolidated statements of operations. The proceeds and gross realized gains and losses from sales of AFS investments for the three and six months ended June 30, 2013 and 2012 are as follows:

<u>In millions</u>	<u>Three Months Ended June 30,</u>		<u>Six Months Ended June 30,</u>

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 8: Derivative Instruments

Overview

MBIA Corp. accounts for derivative instruments in accordance with the accounting principles for derivative and hedging activities, which requires that all such instruments be recorded on MBIA Corp.'s consolidated balance sheets at fair value. Refer to "Note 6: Fair Value of Financial Instruments" for the method used for determining the fair value of derivative instruments.

MBIA Corp. has entered into derivative instruments that it viewed as an extension of its core financial guarantee business but which do not qualify for the financial guarantee scope exception and, therefore, must be recorded at fair value in MBIA Corp.'s consolidated balance sheets. MBIA Corp. insures CDS contracts, primarily referencing corporate, asset-backed, residential mortgage-backed, commercial mortgage-backed, CRE loans, and CDO securities that are intended to be held for the entire term of the contract absent a negotiated settlement with the counterparty.

Changes in the fair value of derivatives, excluding insured derivatives, are recorded each period in current earnings within "Net gains (losses) on financial instruments at fair value and foreign exchange." Changes in the fair value of insured derivatives are recorded each period in current earnings within "Net change in fair value of insured derivatives." The net change in the fair value of MBIA Corp.'s insured derivatives has two primary components: (i) realized gains (losses) and other settlements on insured derivatives and (ii) unrealized gains (losses) on insured derivatives. "Realized gains (losses) and other settlements on insured derivatives" include (i) premiums received and receivable on sold CDS contracts, (ii) premiums paid and payable to reinsurers in respect to CDS contracts, (iii) net amounts received or paid on reinsurance commutations, (iv) losses paid and payable to CDS contract counterparties due to the occurrence of a credit event or settlement agreement, (v) losses recovered and recoverable on purchased CDS contracts due to the occurrence of a credit event or settlement agreement and (vi) fees relating to CDS contracts. The "Unrealized gains (losses) on insured derivatives" include all other changes in fair value of the insured derivative contracts.

In certain instances, MBIA Corp. purchased or issued securities that contain embedded derivatives. In accordance with the accounting guidance for derivative instruments and hedging activities, the balance sheet location of MBIA Corp.'s embedded derivative instruments is determined by the location of the related security.

Variable Interest Entities

VEs consolidated by MBIA Corp. have entered into derivative instruments primarily consisting of interest rate swaps. Interest rate swaps are entered into to hedge the risks associated with fluctuations in interest rates or fair values of certain contracts.

Credit Derivatives Sold

The following tables present information about credit derivatives sold by MBIA Corp. that were outstanding as of June 30, 2013 and December 31, 2012. Credit ratings represent the lower of underlying ratings assigned to the collateral by Moody's, S&P or MBIA.

Internal credit ratings assigned by MBIA on the underlying collateral are derived by MBIA Corp.'s surveillance group. In assigning an internal rating, current status reports from issuers and trustees, as well as publicly available transaction-specific information, are reviewed. Also, where appropriate, cash flow analyses and collateral valuations are considered. The maximum potential amount of future payments (undiscounted) on CDS contracts are estimated as the notional value plus any additional debt service costs, such as interest or other amounts owed on CDS contracts. The maximum amount of future payments that MBIA Corp. may be required to make under these guarantees as of June 30, 2013 is \$27.5 billion. This amount is net of \$72 million of insured derivatives ceded under reinsurance agreements in which MBIA Corp. economically hedges a portion of the credit and market risk associated with its insured derivatives and offsetting agreements with a counterparty. The maximum potential amount of future payments (undiscounted) on insured swaps are estimated as the notional value of such contracts.

MBIA Corp. may hold recourse provisions with third parties in derivative instruments through both reinsurance and subrogation rights. MBIA Corp.'s reinsurance arrangements provide that in the event MBIA Corp. pays a claim under a guarantee of a derivative contract, MBIA Corp. has the right to collect amounts from any reinsurers that have reinsured the guarantee on either a proportional or non-proportional basis, depending upon the underlying reinsurance agreement. MBIA Corp. may also have recourse through subrogation rights whereby if MBIA Corp. makes a claim payment, it is entitled to any rights of the insured counterparty, including the right to any assets held as collateral.

Financial Statement Presentation

Insured CDSs and insured swaps are not subject to master netting agreements. VIE derivative assets and liabilities are not presented net of any master netting agreements.

As of June 30, 2013 and December 31, 2012, MBIA Corp. reported derivative assets of \$7 million, and derivative liabilities of \$1.7 billion and \$3.1 billion, respectively, which are shown separately on MBIA Corp.'s consolidated balance sheets. The following table presents the total fair value of MBIA Corp.'s derivative assets and liabilities by instrument and balance sheet location as of June 30, 2013:

Note 9: Debt

MBIA Corp. has disclosed its debt in "Note 10: Debt" in the Notes to Consolidated Financial Statements included in Exhibit 99.2 to MBIA Inc.'s Annual Report on Form 10-K for the year ended December 31, 2012. The following debt discussion provides an update to those included under the same captions in Exhibit 99.2 to MBIA Inc.'s Annual Report on Form 10-K.

Long-Term Debt

Interest and principal payments on the 14% Fixed to Floating Rate Surplus Notes due 2033 are subject to prior approval by the Superintendent of the NYSDFS. MBIA Corp.'s request for approval of the January 15, 2013, April 15, 2013, and July 15, 2013 note interest payments were denied by the NYSDFS. MBIA Corp. provided notice to the Fiscal Agent that it has not made a scheduled interest payment. The deferred interest payment will become due on the first business day on or after which MBIA Corp. obtains approval to make such payment. No interest will accrue on the deferred interest. As of June 30, 2013, MBIA Corp. had accrued interest related to these surplus notes of \$117 million, which was included in "Other liabilities" on MBIA Corp.'s consolidated balance sheets.

National Secured Loan

In connection with the BofA Settlement Agreement, in May 2013, MBIA Corp. repaid the National Secured Loan and extinguished the agreement.

Note 9: Debt (continued)

Other Borrowing Arrangements

Blue Ridge Secured Loan

In connection with the BofA Settlement Agreement in May of 2013, MBIA Corp. and Blue Ridge entered into the Blue Ridge Secured Loan, pursuant to which Blue Ridge agreed to make revolving loans to MBIA Corp. in an aggregate of up to \$500 million. The following is a summary of the material terms of the Loan Agreement, as amended by Amendment No. 1 entered into in June of 2013. This summary is not complete and is subject to the full text of the document described below.

Use of Proceeds

The proceeds of the Blue Ridge Secured Loan can be used for general corporate purposes. Once the Blue Ridge Secured Loan amount outstanding exceeds \$50 million, the proceeds must be used for the purpose of meeting ordinary course liquidity requirements expected to arise during the 30 days following such borrowing.

Conditions to Borrowings

Blue Ridge's obligation to make loans is subject to usual and customary conditions precedent, including that on the date of the borrowing (i) no default is continuing or would occur as a result of that borrowing and (ii) the representations and warranties specified in the Blue Ridge Secured Loan agreement are true and accurate in all material respects.

Security

The loans are secured by a pledge of collateral consisting of the following: (i) MBIA Corp.'s right to receive put-back recoveries related to ineligible mortgage loans included in its insured RMBS transactions; (ii) MBIA Corp.'s future recoveries on defaulted insured RMBS transactions resulting from expected excess spread generated by performing loans in such transactions; (iii) MBIA Corp.'s future installment premiums; and (iv) 65% of the voting capital stock of MBIA Corp.'s equity interest in MBIA UK (Holdings) Limited (the collateral described in clauses (ii) and (iii) above, the ("Other Prepayment Collateral"). Under the Blue Ridge Secured Loan, the value of the collateral described in clauses (i) through (iii) above, must at all times be greater than \$1.0 billion. As of June 30, 2013, the value of the collateral was approximately \$2.5 billion.

Interest Rate and Fees

Borrowings under the Blue Ridge Secured Loan have a variable interest rate, at MBIA Corp.'s option, based on either: (i) the adjusted LIBOR plus an applicable margin ("LIBOR Loans"), or (ii) the highest between (a) Bank of America's prime rate and (b) the sum of the federal funds effective rate plus 0.5%, and (c) the adjusted LIBOR plus 1.00%, plus an applicable margin ("Base Rate Loans"). The applicable margin for the LIBOR Loans and the Base Rate Loans is 7.50% and 6.50%, respectively. With respect to any available but undrawn amounts under the Blue Ridge Secured Loan, MBIA Corp. is obligated to pay a commitment fee on such undrawn amounts of 2.00% per annum. The amount of the commitment fee expense for the six months ended June 30, 2013 was \$1 million.

Scheduled Repayment

The maturity date of the Blue Ridge Secured Loan is three years from the closing date, at which time any then outstanding loans will be due and payable.

Mandatory Prepayments

Loans are required to be prepaid (and Blue Ridge's commitments reduced) in an amount equal to the following: (i) 100% of the proceeds of any put-back recoveries and (ii) on and after the first anniversary of the closing date, from the proceeds of any Other Prepayment Collateral in an amount equal to (x) from the first anniversary of the closing date to the second anniversary of the closing date, 50% of such proceeds and (y) from the second anniversary of the closing date to the maturity date, 100% of such proceeds. In addition, loans must be prepaid (and Blue Ridge's commitments reduced) in an amount equal to 100% of the proceeds of certain disposals of assets to the extent exceeding \$1 million in aggregate for all such disposals. Finally, loans must be prepaid (but without any commitment reduction) to the extent the proceeds of any borrowing that is a liquidity borrowing are not in fact used for such purposes and have not otherwise been used to repay loans within the required 30-day period.

Representations and Warranties

The Blue Ridge Secured Loan contains certain customary representations and warranties for loan facilities of this type, which are given on the closing date and at each borrowing under the Blue Ridge Secured Loan agreement, including with respect to organization of MBIA Corp., power of authority, enforceability of the loan documents, receipt of any necessary governmental approvals, financial condition and solvency, and compliance with laws.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 9: Debt (continued)

Covenants

The Blue Ridge Secured Loan contains certain affirmative, negative and financial covenants, which are customary for loan facilities of this type in relation to, among other matters, delivery of financial statements, notice of material events, existence and conduct of business, payment of taxes and other obligations, maintenance of books and records, compliance with all material laws, and maintenance of insurance, and includes a requirement that MBIA Corp. maintain at least \$750 million of statutory capital (defined as policyholders' surplus plus contingency reserves).

In addition, MBIA Corp. may not, without Blue Ridge's consent, consummate any amendments, compromises or commutations with respect to insurance obligations and settlements of litigation to the extent (x) that payments made in respect of such remediation efforts subsequent to June 28, 2013 exceed \$260 million in the aggregate, (y) after giving effect thereto and to any borrowings of loans in connection therewith, the aggregate principal amount of loans outstanding would exceed \$200 million or (z) after giving effect thereto, all remediation efforts taken as a whole since the closing date, would, cumulatively, have reduced MBIA Corp.'s statutory capital by \$100 million or more.

In addition, MBIA Corp. may not prepay, redeem, purchase, defease or otherwise satisfy prior to the scheduled maturity thereof in any manner, or make any payment of principal, interest or fees or any other payment on, any of its indebtedness (including the Surplus Notes), except for payments of the loans under the Blue Ridge Secured Loan agreement and except for certain refinancings and refundings of its indebtedness.

Change of Control

MBIA Corp. may be required to prepay all amounts outstanding under the Blue Ridge Secured Loan agreement upon the occurrence of a change of control.

Events of Default

The Blue Ridge Secured Loan agreement contains certain events of default which are customary for loan facilities of this type (and with customary cure periods), including failure to pay principal, interest or fees on the loans, misrepresentation, failure to observe covenants or conditions, failure to pay other material indebtedness, insolvency and bankruptcy matters, and unlawfulness or invalidity of the loan documents.

Note 10: Income Taxes

MBIA Corp.'s income taxes and the related effective tax rates for the three and six months ended June 30, 2013 and 2012 are as follows:

In millions	Three Months Ended June 30,				Six Months Ended June 30,			
	2013		2012		2013		2012	
Income (loss) before income taxes	\$ (257)		\$ 647		\$ (122)		\$ 756	
Provision (benefit) for income taxes	\$ (124)		48.2%		\$ 227		35.1%	
	\$ (95)		77.9%		\$ 281		37.2%	

For the six months ended June 30, 2013, MBIA Corp.'s effective tax rate applied to its pre-tax loss was greater than the U.S. statutory tax rate primarily as a result of the decrease in the valuation allowance. For the six months ended June 30, 2012, MBIA Corp.'s effective tax rate applied to its pre-tax income was greater than the U.S. statutory tax rate primarily as a result of an increase in the valuation allowance.

MBIA Corp. adjusts annual forecasted pre-tax income for mark-to-market income, fair value adjustments, capital gains/losses, and other tax adjustments when projecting its full year 2013 effective tax rate. MBIA Corp. accounted for the discrete items at the federal applicable tax rate after applying the projected full year effective tax rate to its actual six-month results excluding discrete items.

Note 10: Income Taxes (continued)

Deferred Tax Asset, Net of Valuation Allowance

MBIA Corp. recognizes deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Deferred tax assets and liabilities are determined based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on tax assets and liabilities is recognized in income in the period that includes the enactment date.

MBIA Corp. establishes a valuation allowance against its deferred tax asset when it is more likely than not that all or a portion of the deferred tax asset will not be realized. All evidence, both positive and negative, needs to be identified and considered in making the determination. Future realization of the existing deferred tax asset ultimately depends, in part, on the existence of sufficient taxable income of appropriate character (for example, ordinary income versus capital gains) within the carryforward period available under the tax law.

As of June 30, 2013, MBIA Corp. reported a net deferred tax asset of \$1.3 billion. The \$1.3 billion net deferred tax asset is net of a \$3.4 million valuation allowance. As of June 30, 2013, MBIA Corp. had a valuation allowance against a portion of the deferred tax asset related to capital loss carryforwards and losses from asset impairments as these losses are considered capital losses, have a five-year carryforward period, and once recognized, can only offset capital gain income.

MBIA Corp. has concluded that it is more likely than not that its net deferred tax asset will be realized. MBIA Corp. relied on MBIA Inc.'s tax sharing agreement and the Parent's assurance that it intended for no net operating loss ("NOL") or capital loss generated by MBIA Corp., to the extent used in consolidation, to expire without compensation.

Accounting for Uncertainty in Income Taxes

MBIA Corp.'s policy is to record and disclose any change in unrecognized tax benefit and related interest and/or penalties to income tax in the consolidated statements of operations. As of June 30, 2013 and 2012, MBIA Corp. did not have any uncertain tax positions and corresponding interest or penalties.

MBIA Corp.'s major tax jurisdictions include the U.S. and the United Kingdom ("U.K."). MBIA and its U.S. subsidiaries file a U.S. consolidated federal income tax return.

The U.K. tax authorities are currently auditing tax years 2005 through 2010. On June 5, 2013, MBIA Corp. met with HM Revenue and Customs and discussions are ongoing.

As of December 31, 2012, MBIA Corp. had a NOL carryforward of \$685 million, which will expire between tax years 2031-2032. As a result of the commutation activity in the second quarter of 2013, MBIA Corp.'s NOL has significantly increased from the 2012 year end amount as of June 30, 2013. MBIA Corp. also had a capital loss carryforward of \$161 million, which will expire in tax year 2017.

Tax Sharing Arrangement

MBIA Corp. files its U.S. Corporation Income Tax Return as a member of the MBIA Inc. consolidated group and participates in a tax sharing agreement between MBIA Corp. and MBIA Inc. under which MBIA Corp. is allocated its share of consolidated tax liability or tax benefit as determined on a standalone basis under the tax sharing agreement.

As of June 30, 2013, MBIA Corp. has not made tax payments under this tax sharing agreement for 2013 and 2012. If tax payments had been made, all funds would have been placed in escrow by MBIA Inc. and would remain in escrow until the expiration of a two-year carryback period which would allow MBIA Corp. to carryback a separate company tax loss and recover all or a portion of the escrowed funds.

As of June 30, 2013, MBIA Corp. has not received any payment with respect to tax losses contributed to the consolidated group. MBIA Corp. will receive benefits of its losses as it is able to earn out those losses in the future. However, it is MBIA Inc.'s intention not to allow any tax loss generated by MBIA Corp., to the extent used in consolidation, to expire without compensation.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 11: Accumulated Other Comprehensive Income

The following table presents the changes in the components of AOCI for the six months ended June 30, 2013:

In millions	Unrealized Gains (Losses) on AFS Securities, Net ⁽¹⁾	Foreign Currency Translation, Net ⁽¹⁾	Total ⁽¹⁾

	1	Provision (benefit) for income taxes
Total reclassifications for the period	\$ (2)	Net income (loss)

(1) - Amounts in parentheses indicate debits.

Note 12: Commitments and Contingencies

The following commitments and contingencies provide an update to those discussed in “Note 18: Commitments and Contingencies” in the Notes to Consolidated Financial Statements included in Exhibit 99.2 of MBIA Inc.’s Annual Report on Form 10-K for the year ended December 31, 2012, and should be read in conjunction with the complete descriptions provided in the aforementioned note included in Exhibit 99.2 of Form 10-K. In the normal course of operating its business, MBIA Corp. may be involved in various legal proceedings. Additionally, MBIA may be involved in various legal proceedings that directly or indirectly impact MBIA Corp.

Recovery Litigation

MBIA Insurance Corp. v. Countrywide Home Loans, Inc., et al.; Index No. 602825/08 (N.Y. Sup. Ct., N.Y. County)

In May of 2013, the parties reached an agreement to resolve MBIA Corp.’s claims in this action. Refer to “Note 1: Business Developments and Risks and Uncertainties” included herein for a description of the comprehensive settlement agreement.

MBIA Insurance Corp. v. Bank of America Corp.; Countrywide Home Loans, Inc., Countrywide Securities Corp., and Countrywide Financial Corp. et al.; Case No. BC417572 (Ca. Super. Ct., County of Los Angeles)

In May of 2013, the parties reached an agreement to resolve MBIA Corp.’s claims in this action. Refer to “Note 1: Business Developments and Risks and Uncertainties” included herein for a description of the comprehensive settlement agreement.

MBIA Insurance Corp. v. Federal Deposit Insurance Corporation (in its corporate capacity and as conservator and receiver for IndyMac Federal Bank, F.S.B.); Civil Action No. 09-01011 (ABJ) (D.D.C.)

On March 8, 2013, the United States Court of Appeals for the D.C. Circuit affirmed the district court’s ruling dismissing MBIA Corp.’s amended complaint.

MBIA Insurance Corp. v. Credit Suisse Securities (USA) LLC, et al. ; Index No. 603751/2009 (N.Y. Sup. Ct., N.Y. County)

On March 8, 2013, the defendants filed their answer to the amended complaint. On April 19, 2013, the court issued an order scheduling fact discovery to close by June 30, 2014.

MBIA Insurance Corporation and Subsidiaries

Note 12: Commitments and Contingencies (continued)

MBIA Insurance Corp. v. J.P. Morgan Securities LLC (f/k/a Bear, Stearns & Co. Inc.) ; Index No. 64676/2012 (N.Y. Sup. Ct., County of Westchester)

On November 7, 2012, J.P. Morgan Securities LLC withdrew its motion to dismiss and filed its answer on March 26, 2013.

MBIA Insurance Corp. v. Ally Financial Inc. (f/k/a GMAC, LLC) et al. ; 12-cv-02563 SRN/TNL (D. Minn.)

This case is currently stayed.

MBIA Insurance Corp. v. Flagstar ABS, LLC, et al.; 13-cv-0262 (JSR) (S.D.N.Y.)

The parties filed a Stipulation of Discontinuance and Order of Dismissal with Prejudice of this action on May 2, 2013. Under the terms of the settlement, MBIA Corp. dismissed the lawsuit against Flagstar Bank in exchange for \$110 million in cash and other consideration.

Transformation Litigation

ABN AMRO Bank N.V. et al. v. Eric Dinallo et al.; Index no. 601846/09 (N.Y. Sup. Ct., N.Y. County)

On March 4, 2013, the court issued a decision dismissing the Article 78 proceeding. On April 2, 2013, the remaining plaintiffs filed a Notice of Appeal to the Appellate Division, First Department. In May of 2013, following the Bank of America and Societe Generale settlements, all plaintiffs in this matter dismissed their claims. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the settlement agreements.

ABN AMRO Bank N.V. et al. v. MBIA Inc. et al.; Index No. 601475/2009 (N.Y. Sup. Ct., N.Y. County)

In May of 2013, following the Bank of America and Societe Generale settlements, all plaintiffs in this matter dismissed their claims. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the settlement agreements.

Barclays Bank PLC., et al. v. Wrynn et al.; Index No. 651811/2010 (N.Y. Sup. Ct., N.Y. County)

In May of 2013, following the Bank of America and Societe Generale settlements, all plaintiffs in this matter dismissed their claims. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the settlement agreements.

CQS ABS Master Fund Ltd., CQS Select ABS Master Fund Ltd., and CQS ABS Alpha Master Fund Ltd. v. MBIA Inc. et al. ; Civil Action No. 12-cv-6840 (R.S.) (S.D.N.Y.)

On June 24, 2013, the court granted MBIA's motion to disqualify the plaintiffs' counsel, White & Case LLP.

Broadbill Partners LP, et al. v. MBIA Inc., et al. ; Index No. 653865/2012 (N.Y. Sup. Ct., N.Y. County)

On June 6, 2013, the plaintiffs voluntarily dismissed the litigation without prejudice. A Stipulation of Discontinuance was filed on June 7, 2013.

Corporate Litigation

Bank of America v. MBIA Inc. and The Bank of New York Mellon, as Indenture Trustee; Index No. 70444/2012 (N.Y. Sup. Ct., Westchester County)

In May of 2013, the parties reached an agreement to resolve their respective claims in this action. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the comprehensive settlement agreement.

MBIA Inc. v. Bank of America Corp. and Blue Ridge Investments, L.L.C.; Index No. 51664/2013 (N.Y. Sup. Ct., Westchester County)

In May of 2013, the parties reached an agreement to resolve their respective claims in this action. Refer to "Note 1: Business Developments and Risks and Uncertainties" included herein for a description of the comprehensive settlement agreement.

Mary Crescente v. Joseph Brown, et al.; Index No. 17595/2008 (N.Y. Sup. Ct., Westchester County)

On March 25, 2013, a Stipulation of Discontinuance was filed with the court resolving the litigation.

MBIA Insurance Corporation and Subsidiaries
Notes to Consolidated Financial Statements (Unaudited)

Note 12: Commitments and Contingencies (continued)

Ambac Bond Insurance Coverage Cases , Coordinated Proceeding Case No. JCCP 4555 (Super. Ct. of Cal., County of San Francisco)

On March 22, 2013, the court granted the Bond Insurer defendants' motion to strike pursuant to California's Anti-SLAPP statute dismissing the plaintiffs' claims under California's Cartwright Act.

City of Phoenix v. AMBAC et al. , Case No. 2:10-cv-00555-TMB (D. Ariz.)

On June 4, 2013, the parties reached an agreement to resolve the City of Phoenix's claims in this matter.

MBIA and MBIA Corp. are defending against the aforementioned actions in which they are a defendant and expect ultimately to prevail on the merits. There is no assurance, however, that they will prevail in these actions. Adverse rulings in these actions could have a material adverse effect on MBIA Corp.'s ability to implement its strategy and on its business, results of operations, cash flows and financial condition. At this stage of the various litigations, there has not been a determination as to the amount, if any, of damages. Accordingly, MBIA Corp. is not able to estimate any amount of loss or range of loss.

There are no other material lawsuits pending or, to the knowledge of MBIA Corp., threatened, to which MBIA Corp. or any of its subsidiaries is a party.

Note 13: Subsequent Events

Refer to "Note 12: Commitments and Contingencies" for information about legal proceedings that developed after June 30, 2013.
