Safe Harbor Disclosure

This Operating Supplement of MBIA Inc., together with its consolidated subsidiaries, (collectively, “MBIA”, the “Company”, “we”, “us” or “our”) includes statements that are not historical or current facts and are “forward-looking statements” made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The words “believe”, “anticipate”, “project”, “plan”, “expect”, “estimate”, “intend”, “will likely result”, “looking forward”, or “will continue” and similar expressions identify forward-looking statements. These statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those presently anticipated or projected. MBIA cautions readers not to place undue reliance on any such forward-looking statements, which speak only to their respective dates. We undertake no obligation to publicly correct or update any forward-looking statement if the Company later becomes aware that such result is not likely to be achieved.

The following are some of the general factors that could affect financial performance or could cause actual results to differ materially from estimates contained in or underlying the Company’s forward-looking statements:

- increased credit losses or impairments on public finance obligations that National Public Finance Guarantee Corporation (“National”) insures issued by state, local and territorial governments and finance authorities and other providers of public services, located in the U.S. or abroad, that are experiencing fiscal stress;
- the possibility that loss reserve estimates are not adequate to cover potential claims;
- a disruption in the cash flow from National or an inability to access the capital markets and our exposure to significant fluctuations in liquidity and asset values in the global credit markets as a result of collateral posting requirements;
- our ability to fully implement our strategic plan;
- the possibility that MBIA Insurance Corporation will have inadequate liquidity or resources to timely pay claims as a result of higher than expected losses on certain insured transactions or as a result of a delay or failure in collecting expected recoveries, which could lead the New York State Department of Financial Services (“NYDFS”) to put MBIA Insurance Corporation into a rehabilitation or liquidation proceeding under Article 74 of the New York Insurance Law and/or take such other actions as the NYDFS may deem necessary to protect the interests of MBIA Insurance Corporation’s policyholders;
- the impact on our insured portfolios or business operations caused by the global spread of the novel coronavirus COVID-19;
- deterioration in the economic environment and financial markets in the United States or abroad, real estate market performance, credit spreads, interest rates and foreign currency levels; and
- the effects of changes to governmental regulation, including insurance laws, securities laws, tax laws, legal precedents and accounting rules.

The above factors provide a summary of and are qualified in their entirety by the risk factors discussed under “Risk Factors” in Part II, Other Information, Item 1A included in the Quarterly Report on Form 10-Q. The Company encourages readers to review these risk factors in their entirety.

- (1) For exposure classified as Capital Appreciation Bonds (CABs) by the Company, gross par reflects the par amount at the time of issuance of the insurance policy; interest accretion on CABs after the issuance of our insurance policy through to the current reporting period is included in gross par plus CABs accreted interest; interest accretion on CABs after the issuance of our insurance policy through to the final expected maturity of the exposure is included in debt service.
- (2) Internal ratings are provided solely to indicate the underlying credit quality of guaranteed obligations based on the Company's view, before giving effect to the guarantee. They are subject to revision at any time and do not constitute investment advice. The Company's rating symbology has a one-to-one correspondence to the ratings symbolologies used by S&P and Moody's (e.g. aa3 = AA- = Aa3, bbb2 = BBB = Baa2, etc.).
- (3) Credit Rating Not Applicable. Credit consists of four classes of bonds which are independently rated as follows: Class I rated a3; Class II rated bbb2; Class III rated bbb2; and Class IV rated bb1.

(1) Presented on a direct cash flow basis for transactions settled within the reported periods. Liquidity Position excludes assets that are not readily available for sale, such as pledged assets for investment agreements.

(2) Liquidity Position may include assets with stated maturities greater than 12 months that are deemed to be liquid.

(3) Excludes tax escrow investments held under the tax sharing agreement.

Glossary

Adjusted Net Income (Loss): Adjusted Net Income (Loss) is a useful measurement of performance because it measures income from the Company excluding its international and structured finance insurance segment, comprising the results of MBIA Corp. which given its capital structure and business prospects, we do not expect its financial performance to have a material economic impact on MBIA Inc. Also excluded from Adjusted Net Income (Loss) are investment portfolio realized gains and losses, gains and losses on financial instruments at fair value and foreign exchange, and realized gains and losses on extinguishment of debt. The Company applies a zero effective tax rate for federal income tax purposes to its pre-tax adjustments, if applicable. Trends in the underlying profitability of the Company's businesses can be more clearly identified without the fluctuating effects of the excluded items previously noted. Adjusted Net Income (Loss) as defined by the Company does not include all revenues and expenses required by GAAP. Adjusted Net Income (Loss) is not a substitute for and should not be viewed in isolation from GAAP net income.

Adjusted Net Income (Loss) per diluted common share represents that amount of Adjusted Net Income (Loss) allocated to each fully diluted weighted-average common share outstanding for the measurement period.

Amortized Cost: The purchase price of a fixed-maturity security, net of any discount received or premium paid. Amortized cost is adjusted each reporting period to reflect the repayment of principal (par) by the issuer of a security and the accretion of a discount or the amortization of a premium.

Below Investment Grade (BIG): Any security rated below BBB- by S&P or Baa3 by Moody's or bbb- by MBIA.

Book Value Adjustments: Management adjusts GAAP book value to remove the book value of MBIA Corp. and for certain items which the Company believes will reverse from GAAP book value through GAAP earnings and comprehensive income, as well as add in the impact of certain items which the Company believes will be realized in GAAP book value in future periods. The Company has limited such adjustments to those items that it deems to be important when measuring financial performance and for which the likelihood and amount can be reasonably estimated. The following provides a description of management's adjustments to GAAP book value:

- *Negative Book value of MBIA Corp.* – We remove the negative book value of MBIA Corp. based on our view that given MBIA Corp.'s current financial condition, the regulatory regime in which it operates, the priority given to its policyholders, surplus note holders and preferred stock holders with respect to the distribution of assets, and its legal structure, it is not and will not likely be in a position to upstream any economic benefit to MBIA Inc. Further, MBIA Inc. does not face any material financial liability arising from MBIA Corp.
- *Net unrealized (gains) losses on available-for-sale ("AFS") securities excluding MBIA Corp.* – We remove net unrealized gains and losses on AFS securities recorded in accumulated other comprehensive income since they will reverse from GAAP book value when such securities mature. Gains and losses from sales and impairments of AFS securities are recorded in book value through earnings.
- *Net unearned premium revenue in excess of expected losses of National* - We include net unearned premium revenue in excess of expected losses. Net unearned premium revenue in excess of expected losses consists of the financial guarantee unearned premium revenue of National in excess of expected insurance losses, net of reinsurance and deferred acquisition costs. In accordance with GAAP, a loss reserve on a financial guarantee policy is only recorded when expected losses exceed the amount of unearned premium revenue recorded for that policy. As a result, we only add to GAAP book value the amount of unearned premium revenue in excess of expected losses for each policy in order to reflect the full amount of our expected losses. The Company's net unearned premium revenue will be recognized in GAAP book value in future periods, however, actual amounts could differ from estimated amounts due to such factors as credit defaults and policy terminations, among others.

Book Yield: Yield of fixed-maturity investment based upon the purchase price or book value of a bond and the timing of future cash flows. The book yield includes appreciation (depreciation) on current amortized cost amounts for fixed-maturity investments purchased at a discount (premium).

Capital Appreciation Bonds: Long-term bonds which pay no current interest, but accrete or compound in value from the date of issuance to the date of maturity.

Capital Ratio: Net debt service outstanding divided by statutory capital.

Collateralized Debt Obligations (CDO): A debt instrument that is secured (collateralized) by a pool of other securities, typically loans and bonds. CDOs can include all types of loans and bonds, including high-yield bonds, emerging market bonds, asset-backed transactions and middle-market bank loans. Collateralized Bond Obligations (CBOs), Collateralized Loan Obligations (CLOs), and Collateralized Mortgage Obligations (CMOs) are types of CDOs.

Claims-paying Resources (CPR): CPR is a key measure of the resources available to National and MBIA Corp. to pay claims under their respective insurance policies. CPR consists of total financial resources and reserves calculated on a statutory basis. CPR has been a common measure used by financial guarantee insurance companies to report and compare resources and continues to be used by MBIA's management to evaluate changes in such resources. The Company has provided CPR to allow investors and analysts to evaluate National and MBIA Corp. using the same measure that MBIA's management uses to evaluate their resources to pay claims under their respective insurance policies. There is no directly comparable GAAP measure.

Claims-paying Resources Ratio: Net debt service outstanding divided by the sum of the capital base, unearned premium reserve (after-tax), present value of installment premiums (after-tax) and gross loss and loss adjustment expense (LAE) reserves.

Commercial Mortgage Backed Securities (CMBS): A type of mortgage-backed security, the word is used to distinguish it from residential mortgage-backed securities (RMBS). Commercial mortgages represent mortgage loans for non-residential properties such as office buildings, retail stores, etc.

Deferred Acquisition Cost (DAC): Deferred acquisition costs include those expenses that relate primarily to, and vary with, the acquisition of new insurance business. The Company periodically conducts a study to determine which operating costs have been incurred to acquire new insurance business and qualify for deferral. For business produced directly by National or MBIA Corp., such costs include compensation of employees involved in underwriting and deferred issuance functions, certain rating agency fees, state premium taxes and certain other underwriting expenses, reduced by ceding commission income on premiums ceded to reinsurers. DAC also include ceding commissions paid by the Company in connection with assuming business from other financial guarantors. DAC, net of ceding commissions received, related to non-derivative insured financial guarantee transactions are deferred and amortized over the period in which the related premiums are earned. Acquisition costs related to insured derivative transactions are expensed as incurred.

Leverage Ratio: Gross par outstanding divided by statutory capital (policyholders' surplus plus contingency reserve).

Par Value: Par Value is the principal (par) amount of the debt. Capital appreciation bonds are reported at the par amount at the time of issuance of the insurance policy.

Residential Mortgage Backed Securities (RMBS): A type of mortgage-backed debt obligation whose cash flows come from residential debt, such as mortgages, home-equity loans and subprime mortgages. A residential mortgage-backed security is comprised of a pool of mortgage loans created by banks and other financial institutions. The cash flows from each of the pooled mortgages is packaged by a special purpose entity into classes and tranches, which then issues securities and can be purchased by investors.

Variable Interest Entity (VIE): A VIE is a legal entity, such as a Special Purpose Entity, trust, limited liability corporation, partnership, or corporation, that has (i) insufficient equity to finance its activities without additional subordinated financing, or (ii) in which the equity holders do not have the power, through voting rights or otherwise, to direct the economic activities or do not absorb losses or receive residual returns of the entity, or (iii) in which the voting rights of some investors are not proportional to their obligation to absorb losses or receive residual returns and substantially all the entity's activities are conducted on behalf of an investor with disproportionately few voting rights.
