

MBIA Inc. Third Quarter 2025 Financial Results

November 4, 2025

MBIA Inc. (NYSE:MBI) (the Company) today reported a consolidated GAAP net loss of \$8 million, or \$(0.17) per share, for the third quarter of 2025 compared to a consolidated GAAP net loss of \$56 million, or \$(1.18) per share, for the third quarter of 2024. The smaller loss versus last year's third quarter was primarily due to a losses and loss adjustment expenses (LAE) benefit for 2025 associated with Puerto Rico Electric Power Authority (PREPA) exposure at National Public Finance Guarantee Corporation (National), which was driven by National's sale of custodial receipts associated with the transfer of certain of its PREPA-related bankruptcy claims and higher estimated recoveries on National's remaining PREPA exposure.

The Company also reported Adjusted Net Income (a non-GAAP measure defined in the attached Explanation of Non-GAAP Financial Measures) of \$51 million or \$1.03 per diluted share for the third quarter of 2025 compared with an Adjusted Net Loss of \$174 thousand or \$(0.00) per diluted share for the third quarter of 2024. The favorable comparison was primarily due to the losses and LAE benefit for 2025 associated with PREPA exposure at National that primarily resulted from National's sale of its PREPA-related custodial receipts and higher estimated recoveries on National's remaining PREPA exposure.

Adjusted Net Income (Loss) provides investors with views of the Company's operating results that management uses in measuring financial performance. Reconciliations of Adjusted Net Income (Loss) to net income, calculated in accordance with GAAP, are available in the current quarter's Operating Supplement.

Year-to-Date Results

The Company recorded a consolidated GAAP net loss of \$126 million, or \$(2.57) per diluted common share, for the nine months ended September 30, 2025 compared with a consolidated GAAP net loss of \$396 million, or \$(8.37) per diluted common share, for the first nine months of 2024. The lower net loss for 2025 was largely due to a losses and LAE benefit for 2025 associated with PREPA exposure at National that largely resulted from National's sale of its PREPA-related custodial receipts and higher estimated recoveries on National's remaining PREPA exposure.

The Company's non-GAAP Adjusted Net Income for the nine months ended September 30, 2025 was \$35 million or \$0.70 per diluted share compared with an Adjusted Net Loss of \$162 million or \$(3.43) per diluted share for the first nine months of 2024.

Forward-Looking Statements

This release includes statements that are not historical or current facts and are "forward-looking statements" made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The words "believe", "anticipate," "project," "plan," "expect," "estimate," "intend," "will," "will likely result," "looking forward," or "will continue," and similar expressions identify forward-looking statements. These statements are subject to certain risks and uncertainties that could

cause actual results to differ materially from historical earnings and those presently anticipated or projected, including, among other factors, the possibility that MBIA Inc. or National will experience increased credit losses or impairments on public finance obligations issued by state, local and territorial governments and finance authorities that are experiencing unprecedented fiscal stress; the possibility that loss reserve estimates are not adequate to cover potential claims; MBIA Inc.'s or National's ability to fully implement their strategic plan; and changes in general economic and competitive conditions. These and other factors that could affect financial performance or could cause actual results to differ materially from estimates contained in or underlying MBIA Inc.'s or National's forward-looking statements are discussed under the "Risk Factors" section in MBIA Inc.'s most recent Annual Report on Form 10-K and Quarterly Report on Form 10-Q, which may be updated or amended in MBIA Inc.'s subsequent filings with the Securities and Exchange Commission. MBIA Inc. and National caution readers not to place undue reliance on any such forward-looking statements, which speak only to their respective dates. National and MBIA Inc. undertake no obligation to publicly correct or update any forward-looking statement if it later becomes aware that such result is not likely to be achieved.

Explanation of Non-GAAP Financial Measures

The following are explanations of why the Company believes that the non-GAAP financial measures used in this press release, which serve to supplement GAAP information, are meaningful to investors.

Adjusted Net Income (Loss): Adjusted Net Income (Loss) is a useful measurement of performance because it measures income from the Company excluding its international and structured finance insurance segment, comprising the results of MBIA Corp. which given its capital structure and business prospects, we do not expect its financial performance to have a material impact on MBIA Inc. Also excluded from Adjusted Net Income (Loss) are investment portfolio realized gains and losses, gains and losses on financial instruments at fair value and foreign exchange, and realized gains and losses on extinguishment of debt. Adjusted Net Income (Loss) eliminates the tax provision (benefit) as a result of a full valuation allowance against the Company's net deferred tax asset. Trends in the underlying profitability of the Company's businesses can be more clearly identified without the fluctuating effects of the excluded items previously noted. Adjusted Net Income (Loss) as defined by the Company does not include all revenues and expenses required by GAAP. Adjusted Net Income (Loss) is not a substitute for and should not be viewed in isolation from GAAP net income.

Adjusted Net Income (Loss) per share represents that amount of Adjusted Net Income (Loss) allocated to each fully diluted weighted-average common share outstanding for the measurement period.

MBIA management further adjusts Adjusted Net Income (Loss) and Adjusted Net Income (Loss) per share by removing the impact of our U.S. public finance insurance

segment VIE consolidations. GAAP requires the Company to consolidate certain VIEs that have issued debt obligations insured by the Company. However, since the Company does not own such VIEs, management uses certain measures that remove the impact of VIE consolidations for our U.S. public finance insurance segment in order to reflect financial exposure limited to its financial guaranty contracts.

Claims-paying Resources (CPR): CPR is a key measure of the resources available to National and MBIA Corp. to pay claims under their respective insurance policies. CPR consists of total financial resources and reserves calculated on a statutory basis. CPR has been a common measure used by financial guarantee insurance companies to report and compare resources and continues to be used by MBIA's management to evaluate changes in such resources. The Company has provided CPR to allow investors and analysts to evaluate National and MBIA Corp. using the same measure that MBIA's management uses to evaluate their resources to pay claims under their respective insurance policies. There is no directly comparable GAAP measure.

Leverage Ratio: Gross Par Outstanding divided by Statutory Capital (Policyholders' Surplus plus Contingency Reserve).
