# BASIS OF ESTMA REPORT PREPARATION

## INTRODUCTION

This report was prepared in accordance with the Extractive Sector Transparency Measures Act (“ESTMA” or the “Act”) issued by the Government of Canada. The information in this report was prepared by Trevali Mining Corporation (the “Company” or “Trevali”) for the sole purpose of complying with Trevali’s obligations under ESTMA. The information contained in this report is provided solely for the benefit of Natural Resources Canada (“NRCan”) and in connection with Trevali’s obligations under the ESTMA. This report may not be used or relied upon by any other person or for any other purpose without Trevali’s express prior written consent.

## BASIS OF PREPARATION

This report has been prepared in accordance with the requirements of the Act and the NRCan Technical Reporting Specifications. The following is a summary of definitions and judgments that we have made for the purpose of preparing the report.

## REPORTING CURRENCY

Reportable payments have been disclosed in United States (“US”) dollars. This is consistent with Trevali’s functional currency for consolidated accounting and reporting purposes. Payments denominated in currencies other than US dollars were translated converted into US dollars using the following exchange rate on December 31, 2020 as permitted under ESTMA.

Currency	Per US\$
Canadian dollar (CAD)	1.2732
Namibian dollar (NAD)	14.6533
Peruvian sol (PEN)	3.5769
West African franc (XOF)	534.80

## PAYEES

For the purposes of the Act, a payee is:

- a) Any government in Canada or in a foreign state
- b) a body that is established by two or more governments
- c) any trust, board, commission, corporation or body or authority that is established to exercise or perform, or that exercises or performs, a power, duty or function of government for a government referred to in paragraph (a) or a body referred to in paragraph (b).

Payees include governments at any level, including national, regional, state, provincial, local, or municipal levels. Payees may include non-governmental entities if the benefit bestowed would have otherwise been provided by the government. Payees also include any government-owned or government-controlled entities that exercise or perform a power, duty or function of government. Aboriginal and indigenous groups and organizations may also be regarded as a payee under the Act.

The individual department, agency or other body of the payee that received the payment have been disclosed in the notes section of the Report.

## REPORTABLE PAYMENTS

Payments are reported on a net cash basis and have been reported in the period in which the payment was made. Payments to the “same payee”, whether made as a single payment or a series of payments, that meet or exceed US\$ 78,542 (C\$100,000) in one category of payment are disclosed. Payments are rounded to the nearest \$10,000 but rounding was not to be used for determining reportable payments.

Trevali did not make any reportable in-kind payments during the year ended December 31, 2020.

**Taxes** This category consists of taxes paid to governments based on income, profit or production in relation to the commercial development of minerals. The following are not included in total payments to governments:

- Consumption tax, such as value-added tax, excise tax and custom tax
- Personal income tax
- Withholding taxes paid to third parties for goods or services
- Taxes which were offset by credits
- Other taxes that do not relate to the commercial development of minerals, such as payroll tax, stamp tax and personal asset tax.

**Royalties** This category consists of royalties paid to governments relating to the commercial development of minerals.

**Fees** This category consists of fees paid to governments relating to the commercial development of minerals, such as permit and license fees. This does not include amounts paid in the ordinary course of commercial transactions in exchange for services provided by governments, such as utilities paid at market rates.

**Production entitlements** This category includes payments made to governments relating to a share of production under production sharing agreements. There were no production entitlements payments made to governments for the year ended December 31, 2020.

**Bonuses** This category includes signing, discovery, production and any other type of bonuses paid to governments. There were no bonus payments made to governments for the year ended December 31, 2020.

**Dividends** This category consists of dividends paid to governments on shares given in lieu of a bonus, production entitlements, royalties or other fees. This does not include dividends paid to governments as an ordinary shareholder. There were no dividends paid to governments for the year ended December 31, 2020.

**Infrastructure improvement payments** Infrastructure improvements are payments for the construction of infrastructure, such as public roads, libraries, and hospital facilities, excluding payments made in circumstances where the infrastructure is expected to be primarily used for operational purposes. This does not include infrastructure improvement payments that relate primarily to the operational purposes of Trevali. There were no infrastructure improvement payments made to governments for the year ended December 31, 2020 that exceeded the reporting threshold.

## **PROJECTS**

Payments have been reported at the project level as required by the Act. According to the Technical Reporting Specifications issued by NRCan, a project is the operational activities that are governed by a single contract, license, lease, concession or similar legal agreement and form the basis for payment liabilities with a government. If multiple agreements are “substantially interconnected”, they are considered a single project. “Substantially interconnected” means forming a set of operationally and geographically integrated contracts, licenses, leases or concessions or related agreements with substantially similar terms that are signed with a government and give rise to payment liabilities.

We have determined that the operational activities governed by surface or mineral lease contracts related to key operational areas are substantially interconnected and has reported payments related to each such area as a single project. We have considered geographical location and common infrastructure as two key indicators for making this determination.

This report includes payments made that are reportable under ESTMA for all Trevali’s controlled projects. In accordance with the Act, this report does not include payments made by projects that Trevali does not control.
