

NEWS RELEASE

Trevalli reports additional drill results from new Oyon Zone at Santander Zinc Mine

**Highlights: 24.5 metres* of 5.7% Zn, 4.0% Pb and 6.0 oz/t Ag;
18.9 metres* of 4.1% Zn, 3.4% Pb and 3.5 oz/t Ag; and
14.7 metres* of 5.2% Zn, 5.8% Pb and 2.1 oz/t Ag**

TV-NR-16-12

June 2, 2016

Vancouver, British Columbia: Trevalli Mining Corporation (“Trevalli” or the “Company”) (TSX: TV; BVL: TV; OTCQX: TREV; Frankfurt: 4TI) announces results from four new drill holes of its ongoing 2016 underground exploration drill program at the Santander zinc mine in Peru. The aim of the current drilling is to test recently discovered mineralization in the hanging wall of the Magistral North deposit. Drill holes continue to intersect multiple stacked mineralized massive sulphide replacement zones, or mantos, both within the main Magistral North body as well as in the newly discovered Oyon mantos (Table 1). The intercepts are near existing mine infrastructure and will be quickly incorporated into the near-term (2016-2017) mine plan. Mineralization in both the Magistral North deposit and the new Oyon mantos remains open for expansion and further underground drilling is in progress (Figure 1).

Borehole (dip/azimuth)	From - To (metres)	Zone / Core Length Interval* (metres)	Zn (%)	Pb (%)	Ag oz/ton (g/tonne)
MN-142-16 (-41.20° / 246.10°)	114.90 - 121.20	MN / 6.30	3.33	1.19	1.65 (56.49)
	125.55 – 140.30	MN/OYO / 14.75	5.21	5.78	2.11 (72.26)
	Incl. 125.55 – 132.75	MN/OYO / 7.20	7.37	8.96	2.66 (91.08)
	Incl. 136.85 – 139.15	OYO / 2.30	5.22	4.32	2.50 (85.72)
	147.65 – 153.50	OYO / 5.85	4.69	3.79	5.75 (197.08)
MN-143-16 (-39.20° / 214.70°)	133.90 – 158.45	MN/OYO / 24.55	5.74	3.98	6.00 (205.88)
	Incl. 135.70 – 148.20	MN/OYO / 12.50	5.66	4.67	4.14 (141.94)
	Incl. 149.05 – 157.05	OYO / 8.00	5.67	1.81	10.92 (374.32)
MN-144-16 (-27.20° / 207.30°)	115.20 – 115.90	OYO / 0.70	3.11	3.25	1.40 (47.90)
MN-145-16 (-35.30° / 218.10°)	111.85 – 130.80	MN/OYO / 18.95	4.11	3.40	3.47 (119.01)
	Incl. 124.35 – 130.80	OYO / 6.45	4.80	2.31	6.68 (229.05)
	Incl. 115.40 – 121.90	MN/OYO / 6.50	5.82	6.04	2.72 (93.34)

Table 1: Summary of latest Santander Mine underground drill assay results.

*True widths of the mineralized intervals are estimated at 60-80% of core length. MN-Magistral North; OYO-Oyon.

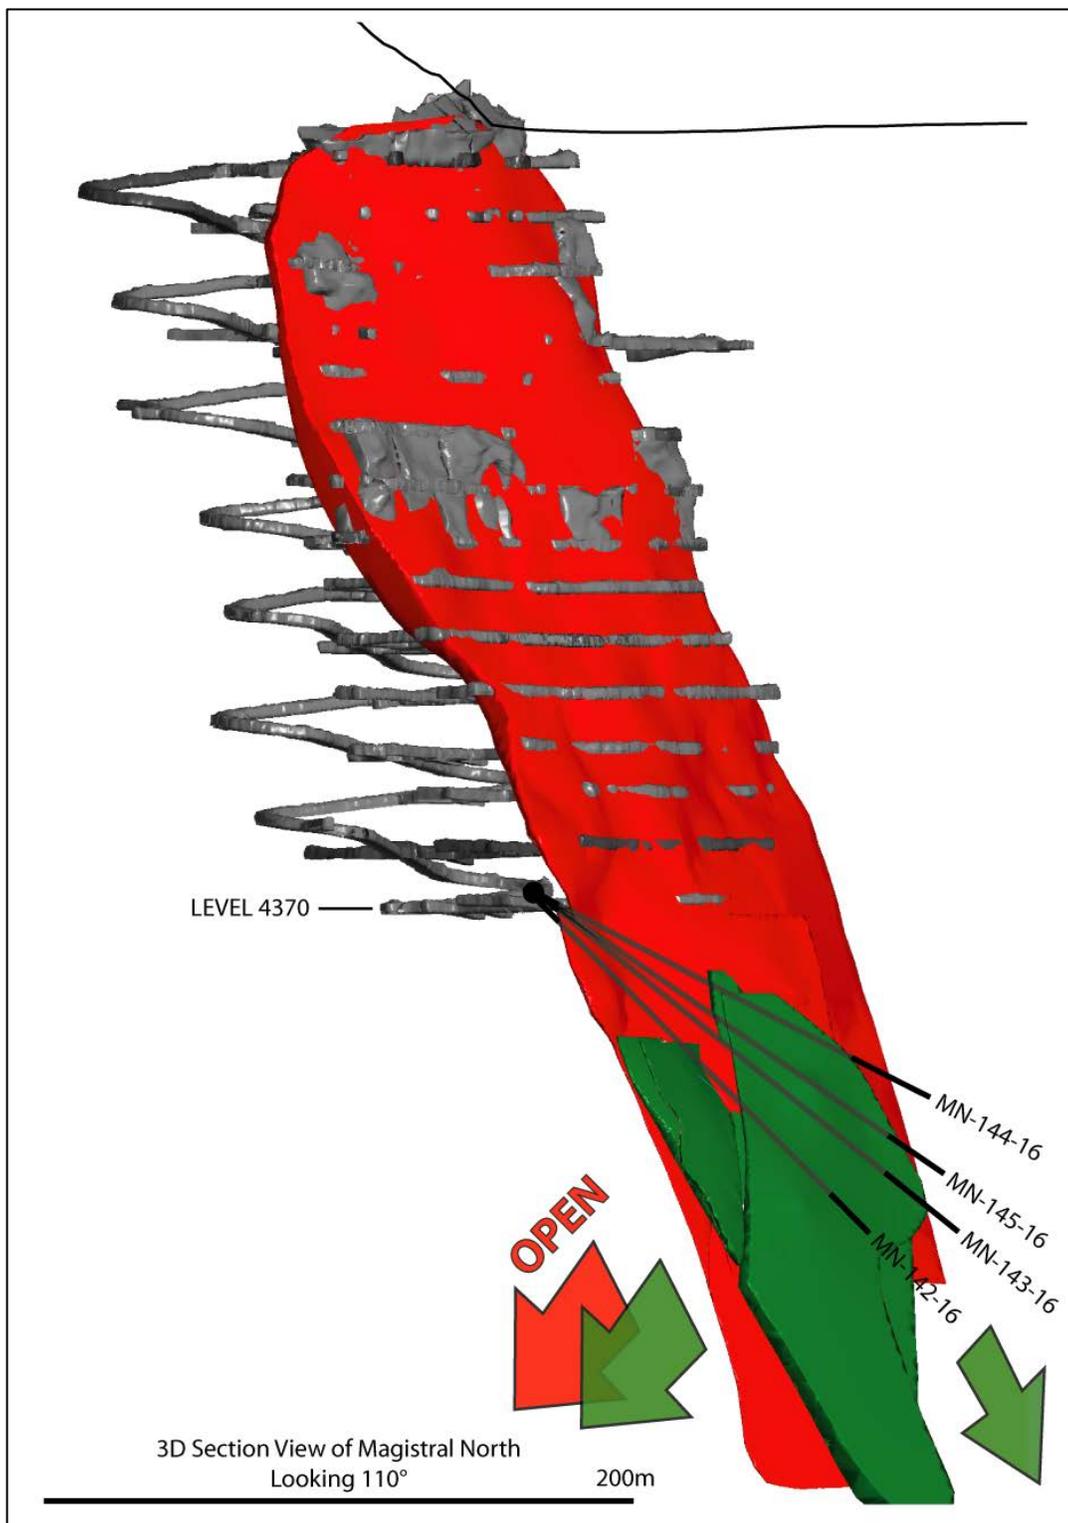

Figure 1: 3D view, looking southeast, and cross section illustrating geometry of the Oyon mineralization and location of recent drillhole intercepts in the Magistral North Deposit at the Santander Mine.

MAGISTRAL NORTH AND OYON ZONES

This latest follow-up expansion-definition drilling program continues to define additional mineralization in the Oyon mantos, located in the hanging wall to the main Magistral North deposit (Figure 1).

As presently defined the Oyon zone contains multiple stacked lenses (or mantos) of replacement semi-massive to massive sulphide mineralization and associated veining that varies from 1 to plus-10-metres thick, a modeled strike length of approximately 100 metres and a currently defined dip length of approximately 180 metres.

In general, average grades for all key metals (Zn, Pb and Ag) are significantly higher than current Santander mill feed grades (Table 1). Zinc to lead/silver metal ratios remain high, in the 1:1 to 2:1 range, which is suggestive of the upper to mid-portions of the mineral system and is interpreted to suggest significant additional depth potential remains. Initial targeting suggests that similar style (Pb-Ag rich) mineralization may exist in the hanging wall of the Magistral Central deposit. The Company cautions that additional drilling is required to further test this hypothesis.

The mantos are proximal-to-immediately-adjacent to the main Magistral North deposit and close to existing and future planned mine development. Consequently minimal additional work will be required to begin adding value (feed) to the Santander mill. Both the Magistral North Zone and emergent Oyon Mantos remain open and expansion/definition drilling is ongoing.

AGM RESULTS

At the Company's recent Annual General Meeting of Shareholders held on June 1, 2016, shareholders re-elected the nominated slate of directors. Shareholders also approved: the appointment of PricewaterhouseCoopers LLP, Chartered Accountants, as auditors of the Company for the current fiscal year and authorized the directors to fix the auditors' remuneration; the amended Stock Option and Stock Bonus Plan and Unallocated Options and Other Entitlements under the Plan; and the Shareholder Rights Plan.

	Description of Matter	Outcome of Vote	Votes For	Votes Withheld	Votes Against
1.	Election of the following directors of the Company:	Resolution approved by a show of hands			
	<i>Mark Cruise</i>		141,016,775 (99.89%)	153,725 (0.11%)	n/a
	<i>Anton Drescher</i>		113,957,148 (80.72%)	27,213,352 (19.28%)	
	<i>Christopher Eskdale</i>		138,898,275 (98.39%)	2,270,225 (1.61%)	
	<i>Catherine Gignac</i>		141,016,275 (99.89%)	154,225 (0.11%)	
	<i>Michael Hoffman</i>		135,186,075 (95.76%)	5,984,425 (4.24%)	
	<i>David Huberman</i>		135,176,575 (95.75%)	5,993,925 (4.25%)	
	<i>David Korbin</i>		140,993,775 (99.87%)	176,725 (0.13%)	

2.	Appointment of PricewaterhouseCoopers LLP, Chartered Accountants, as auditors of the Company for the current fiscal year and authorizing the directors to fix the auditors' remuneration	Resolution approved by a show of hands	141,148,000 (99.98%)	22,500 (0.02%)	n/a
3.	Approval of the amended Stock Option and Stock Bonus Plan and Unallocated Options and Other Entitlements under the Plan	Resolution approved by ballot	81,173,363 (57.50%)	n/a	59,997,137 (42.50%)
4.	Approval of the Shareholder Rights Plan	Resolution approved by ballot	140,343,820 (99.41%)	n/a	826,680 (0.59%)

Qualified Person and Quality Control/Quality Assurance

EurGeol Dr. Mark D. Cruise, Trevali's President and CEO and Daniel Marinov, P.Geo, Trevali's VP Exploration, are qualified persons as defined by NI 43-101, have supervised the preparation of the scientific and technical information that forms the basis for this news release. Mr. Marinov is responsible for all aspects of the work, including the quality control/quality assurance programs. Dr. Cruise is not independent of the Company, as he is an officer, director and shareholder. Mr. Marinov is not independent of the Company as he is an officer and shareholder. Drill core samples were processed and assayed in the Santander mine onsite laboratory. Zinc, lead and silver, assays were obtained by Aqua-Regia dissolution followed by Atomic Absorption measurement. Values of lead and zinc over 15% are assayed by volumetric method. Analytical accuracy and precision are monitored by the analysis of reagent blanks, reference material and replicate samples. Quality control is further assured by the use of international and in-house standards. Blind certified reference material is inserted at regular intervals into the sample sequence by Trevali personnel in order to independently assess analytical accuracy. The onsite laboratory is outsourced and managed by SGS-Peru personnel. SGS-Peru's quality system complies with the requirements for the International Standards ISO 9001:2000 and ISO 17025: 1999. Finally, representative blind duplicate samples are routinely forwarded to an ISO compliant third party laboratory for external quality control.

ABOUT TREVALI MINING CORPORATION

Trevali is a zinc-focused, base metals mining company with one producing operation in Peru and another currently undergoing commissioning in Canada.

In Peru, the Company is actively producing zinc and lead-silver concentrates from its 2,000-tonne-per-day Santander zinc mine.

In Canada, Trevali owns the Caribou zinc mine and mill, Halfmile mine and Stratmat deposit all located in the Bathurst Mining Camp of northern New Brunswick. The Company is currently commissioning its 3,000-tonne-per-day Caribou zinc mine.

All of the Company's deposits remain open for expansion.

The common shares of Trevali are listed on the TSX (symbol TV), the OTCQX (symbol TREVF), the Frankfurt Exchange (symbol 4TI) and on the Lima Stock Exchange (symbol TV). For further details on

Trevali, readers are referred to the Company's website (www.trevali.com) and to Canadian regulatory filings on SEDAR at www.sedar.com.

On Behalf of the Board of Directors of
TREVALI MINING CORPORATION

This news release contains "forward-looking statements" within the meaning of the United States private securities litigation reform act of 1995 and "forward-looking information" within the meaning of applicable Canadian securities legislation. Statements containing forward-looking information express, as at the date of this news release, the Company's plans, estimates, forecasts, projections, expectations, or beliefs as to future events or results and the Company does not intend, and does not assume any obligation to, update such statements containing the forward-looking information. Such forward-looking statements and information include, but are not limited to statements as to: the intended use of proceeds in connection with the Offering, the accuracy of estimated mineral resources, anticipated results of future exploration, and forecast future metal prices, expectations that environmental, permitting, legal, title, taxation, socio-economic, political, marketing or other issues will not materially affect estimates of mineral resources. These statements reflect the Company's current views with respect to future events and are necessarily based upon a number of assumptions and estimates that, while considered reasonable by the Company, are inherently subject to significant business, economic, competitive, political and social uncertainties and contingencies.

These statements reflect the Company's current views with respect to future events and are necessarily based upon a number of assumptions and estimates that, while considered reasonable by the company, are inherently subject to significant business, economic, competitive, political and social uncertainties and contingencies. Many factors, both known and unknown, could cause actual results, performance or achievements to be materially different from the results, performance or achievements that are or may be expressed or implied by such forward-looking statements contained in this news release and the company has made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: fluctuations in spot and forward markets for silver, zinc, base metals and certain other commodities (such as natural gas, fuel oil and electricity); fluctuations in currency markets (such as the Canadian dollar and Peruvian sol versus the U.S. dollar); risks related to the technological and operational nature of the Company's business; changes in national and local government, legislation, taxation, controls or regulations and political or economic developments in Canada, the United States, Peru or other countries where the Company may carry on business in the future; risks and hazards associated with the business of mineral exploration, development and mining (including environmental hazards, industrial accidents, unusual or unexpected geological or structural formations, pressures, cave-ins and flooding); risks relating to the credit worthiness or financial condition of suppliers, refiners and other parties with whom the Company does business; inadequate insurance, or inability to obtain insurance, to cover these risks and hazards; employee relations; relationships with and claims by local communities and indigenous populations; availability and increasing costs associated with mining inputs and labour; the speculative nature of mineral exploration and development, including the risks of obtaining necessary licenses and permits and the presence of laws and regulations that may impose restrictions on mining, diminishing quantities or grades of mineral resources as properties are mined; global financial conditions; business opportunities that may be presented to, or pursued by, the Company; the Company's ability to complete and successfully integrate acquisitions and to mitigate other business combination risks; challenges to, or difficulty in maintaining, the Company's title to properties and continued ownership thereof; the actual results of current exploration activities, conclusions of economic evaluations, and changes in project parameters to deal with unanticipated economic or other factors; and increased competition in the mining industry for properties, equipment, qualified personnel, and their costs. Investors are cautioned against attributing undue certainty or reliance on forward-looking statements. Although the Company has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated, described or intended. The Company does not intend, and does not assume any obligation, to update these forward-looking statements or information to reflect changes in assumptions or changes in circumstances or any other events affecting such statements or information, other than as required by applicable law.

Trevali's production plan at the Caribou Mine is based only on measured, indicated and inferred resources, and not mineral

reserves, and does not have demonstrated economic viability. Trevali's production plan at the Santander Mine is based only on indicated and inferred mineral resources, and not mineral reserves, and does not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is therefore no certainty that the conclusions of the production plans and Preliminary Economic Assessment (PEA) will be realized. Additionally, where Trevali discusses exploration/expansion potential, any potential quantity and grade is conceptual in nature and there has been insufficient exploration to define a mineral resource and it is uncertain if further exploration will result in the target being delineated as a mineral resource.

We advise US investors that while the terms "measured resources", "indicated resources" and "inferred resources" are recognized and required by Canadian regulations, the US Securities and Exchange Commission does not recognize these terms. US investors are cautioned not to assume that any part or all of the material in these categories will ever be converted into reserves.
