Tutor Perini Corporation
Regulation G Disclosures

To supplement our unaudited condensed consolidated financial statements presented under GAAP, we are presenting certain non-GAAP financial measures. These non-GAAP financial measures are intended to provide additional insights that facilitate the comparison of our past and present performance, and they are among the indicators management uses to assess the Company's financial performance and to forecast future performance. By presenting these non-GAAP financial measures, we aim to provide investors and stakeholders a clearer understanding of our operating results and enhance transparency with respect to the key financial metrics used by our management in its financial and operational decision-making.

These non-GAAP financial measures, which exclude share-based compensation expense for the periods presented (as well as the tax benefit associated with the expense), consist of adjusted net income attributable to the Company and adjusted earnings per share. We exclude share-based compensation expense because this expense could result in significant volatility in our reported earnings, driven primarily by fluctuations in the expense recognized for certain long-term incentive compensation awards with payouts that are indexed to the Company's common stock. By adjusting for share-based compensation, our non-GAAP measures present a supplemental depiction of our operational performance and financial health. This approach allows stakeholders to focus on our core operational efficiency and profitability without the variable impact to earnings caused by significant changes in our stock price. Our non-GAAP measures are intended to offer a consistent basis for evaluating the Company's performance, which management believes is meaningful to stakeholders.

The non-GAAP financial measures included herein as calculated by the Company are not necessarily comparable to similarly titled measures reported by other companies. Additionally, these non-GAAP financial measures are not meant to be considered as indicators of performance in isolation from or as a substitute for the most directly comparable measures prepared in accordance with GAAP and should be read only in conjunction with financial information presented on a GAAP basis.

Reconciliations of these non-GAAP financial measures are found in the tables below:

(a) The amounts represents share-based compensation expense recorded during the periods presented above. This includes expense associated with certain long-term incentive compensation awards that have payouts indexed to the Company's common stock. As such, significant fluctuations in the price of the Company's common stock during any reporting period have caused and could continue to cause significant fluctuations in the reported expense. The increase in the expense for the 2025 periods, as compared to the prior-year periods was driven by the substantial increase in the price of the Company's stock in 2025.

Note: some figures may not sum due to rounding.
