FINANCIAL INFORMATION AND OPERATING METRICS

Large Customer Base with Solid Gross Profit per Customer

Global Active Customers¹ (millions)

Global TTM Gross Profit / Active Customer^{1, 2}

Gross profit per customer up 4% year-over-year in Q3

(1) Active customers represent unique user accounts that have made a purchase during the trailing twelve months either through one of our online marketplaces or directly with a merchant for which we earned a commission.

(2) During the first quarter 2018, we updated the calculation of this metric to reflect active customers as of the end of the period, rather than the average of active customers as of the beginning and end of period, in the denominator of the calculations. Because our active customer metrics are based on purchases over a TTM period, we believe that this change improves the usefulness of this metric. The prior period amounts have been updated to reflect this change.
