HealthSouth Reports Strong Results for First Quarter 2012

Revenue Growth of 6.4%

Discharge Growth of 6.0%

Cash Provided by Operating Activities of \$81.0 million

Adjusted EBITDA Increased by 8.1%

BIRMINGHAM, Ala. - HealthSouth Corporation (NYSE: HLS), the nation's largest owner and operator of inpatient rehabilitation hospitals, today reported its results of operations for the first quarter ended March 31, 2012.

"HealthSouth's first quarter was an excellent start to the year as key operating metrics — discharges, net operating revenues, Adjusted EBITDA, and pre-tax income — all grew significantly compared to last year's first quarter," said Jay Grinney, President and Chief Executive Officer of HealthSouth. "Importantly, we continued to generate significant cash flows from operations and invest in our core business through development of new hospitals, on-going upgrades to existing hospitals, and the installation of our electronic clinical information system. We anticipate opening at least four new hospitals in 2013, with additional openings possible depending on the outcome of several certificate of need proceedings, creating important future value for our shareholders."

First Quarter Results

- Consolidated net operating revenues were \$538.6 million for the first quarter of 2012 compared to \$506.0 million for the first quarter of 2011, or an increase of 6.4%. This increase was attributable to a 6.0% increase in patient discharges and a 2.2% increase in net patient revenue per discharge. Same-store discharges were 5.0% higher in the first quarter of 2012 compared to the first quarter of 2011. Discharge growth was enhanced during the first quarter of 2012 compared to the same period of 2011 by the additional day in February due to leap year. Net patient revenue per discharge increased in the first quarter of 2012 compared to the same period of 2011 primarily due to pricing adjustments from Medicare and managed care payors, a higher percentage of neurological cases which increased the average acuity for the patients we served, and a higher percentage of Medicare patients.
- Income from continuing operations attributable to HealthSouth per diluted share for the first quarter of 2012 was \$0.40 per share compared to \$0.57 per share for the same period of 2011. Earnings per share for the first quarter of 2012 reflected strong operating results and an effective income tax rate of approximately 40%. Earnings per share in the first quarter of 2011 reflected an effective income tax rate benefit of approximately (14%) due primarily to a \$0.27 per diluted share income tax benefit that resulted from a settlement of federal income tax claims with the Internal Revenue Service for tax years 2007 and 2008 and a reduction in unrecognized tax benefits due to the lapse of the statute of limitations for certain federal and state claims.

- Cash flows provided by operating activities were \$81.0 million for the three months ended March 31, 2012 compared to \$89.5 million for the same period of 2011, reflective of anticipated increases in working capital during the first quarter of 2012. Specifically, an increase in payroll liabilities primarily related to the vesting of one of the tranches of our long-term equity incentive plan and the timing of interest payments on long-term debt caused the increase in working capital. The timing difference related to interest payments was a result of our refinancing activities in 2011, and it will reverse in the second quarter of 2012.
- Adjusted EBITDA (see attached supplemental information) for the three months ended March 31, 2012 was \$127.0 million compared to \$117.5 million for the three months ended March 31, 2011, or an increase of 8.1%. This improvement was primarily driven by continued revenue growth as well as improved operating leverage and labor productivity.
- Adjusted free cash flow (see attached supplemental information) for the three months ended March 31, 2012 was \$45.2 million compared to \$48.2 million for the same period of 2011. Adjusted free cash flow for the quarter ended March 31, 2012 reflected expected increases in working capital and the planned investment in our electronic clinical information system.

"During the first quarter of 2012, we continued to improve our balance sheet by repurchasing 25,000 shares of our convertible perpetual preferred stock," said Doug Coltharp, Executive Vice President and Chief Financial Officer of HealthSouth. "This action has the benefit of eliminating the 6.5% annual dividend obligation on the repurchased shares and reducing our diluted share count by 0.8 million shares. Our top priority for investing adjusted free cash flow remains the pursuit of compelling growth opportunities within our core business, and we expect to augment this strategy with opportunistic repurchases of our debt and equity securities."

2012 Guidance

In the Company's Current Report on Form 8-K dated February 23, 2012 and related earnings release, the Company provided 2012 guidance which consisted of Adjusted EBITDA in the range of \$475 million to \$485 million and income from continuing operations attributable to HealthSouth per share in the range of \$1.32 to \$1.39 per share.

Based on its results for the first quarter of 2012, the Company expects its 2012 full-year results to be at the high end of, or higher than, these guidance ranges.

For the three months ended March 31, 2012, net cash used in investing activities was \$32.9 million and resulted primarily from capital expenditures. Net cash used in financing activities during the three months ended March 31, 2012 was \$33.9 million and resulted primarily from net debt borrowings, the repurchase of 25,000 shares of the Company's convertible perpetual preferred stock, distributions paid to noncontrolling interests of consolidated affiliates, and dividends paid on the Company's convertible perpetual preferred stock.

For the three months ended March 31, 2011, net cash used in investing activities was \$23.4 million and resulted primarily from capital expenditures, net settlement payments related to interest rate swaps, and purchases of restricted investments offset by a decrease in restricted cash. Net cash provided by financing activities during the three months ended March 31, 2011 was \$26.5 million and resulted primarily from the proceeds from the Company's March 2011 bond offering offset by net payments on the Company's revolving credit facility, distributions paid to noncontrolling interests of consolidated affiliates, and dividends paid on the Company's convertible perpetual preferred stock.

For the year ended December 31, 2011, net cash used in investing activities was \$24.6 million and resulted primarily from capital expenditures, net settlement payments related to interest rate swaps, and purchases of restricted investments offset by proceeds from the sale of five long-term acute care hospitals in August 2011. Net cash used in financing activities during the year ended December 31, 2011 was \$336.4 million and resulted primarily from net debt payments, including the optional redemption of the Company's 10.75% Senior Notes due 2016, distributions paid to noncontrolling interests of consolidated affiliates, and dividends paid on the Company's convertible perpetual preferred stock.
