

# ChargePoint Continues to Enhance the EV Driver Experience with Android Auto Integration

4/29/2021

## **New Android Auto™ compatibility unlocks the in-vehicle experience for Android™ users, bringing essential charging functionality directly into the vehicle**

CAMPBELL, Calif.--(BUSINESS WIRE)-- **ChargePoint, Inc.** (NYSE:CHPT), a leading electric vehicle (“EV”) charging network, now working with Android Auto, is making the transition to electric mobility easier and more seamless for drivers. This new integration brings essential EV charging functionality inside the vehicle, allowing drivers to easily access charging information directly from their infotainment system.

Android Auto compatibility brings essential charging functionality directly into the vehicle, helping drivers easily find nearby stations and more. (Photo: ChargePoint)

“At ChargePoint, we know that the shift to electric mobility relies on driver experience, and

ChargePoint’s Android Auto app is another pivotal step in the evolution already underway, driven by software and increased connectivity,” said Bill Loewenthal, Senior Vice President, Product, ChargePoint. “By integrating essential charging data directly into the vehicle’s infotainment system, drivers are even more empowered and informed. With the ability to connect their phone directly to their EV through Android Auto, drivers now have access to ChargePoint app information right on the vehicle display. The enhanced connection between app and vehicle represents the next step in how drivers and passengers are fueling mobility and how ChargePoint is delivering technology solutions to fit the needs of EV drivers now and in the future.”

Beginning today, Android users will be able to harness the power of the ChargePoint app on their vehicle display by simply connecting an Android phone, with the ChargePoint app installed and running Android 6.0 or above, to an Android Auto compatible vehicle. Key features of the application include:

- Map with nearby stations;
- Ability to check station status;
- Select the station list for more detailed information;
- Begin a charging session;
- Filter nearby stations by charging speed, availability and cost;
- Compatibility with the driver’s EV make and model; and

- If a station is busy, the driver can use the in-vehicle app to click Notify Me to find out when the station becomes available again.

This integration with Android Auto underscores ChargePoint's decade-plus commitment to enhancing the experience for drivers and businesses helping to accelerate the shift to electric mobility.

## About ChargePoint

ChargePoint is creating a new fueling network to move people and goods on electricity. Since 2007, ChargePoint has been committed to making it easy for businesses and drivers to go electric with one of the largest EV charging networks and a comprehensive portfolio of charging solutions available today. ChargePoint's cloud subscription platform and software-defined charging hardware are designed to include options for every charging scenario from home and multifamily to workplace, parking, hospitality, retail and transport fleets of all types. Today, one ChargePoint account provides access to hundreds-of-thousands of places to charge in North America and Europe. To date, more than 90 million charging sessions have been delivered, with drivers plugging into the ChargePoint network approximately every two seconds.
