

# ChargePoint Omni Port Now Available as a Conversion Kit, Charging Any New EV Regardless of Connector Type

2025-08-21

Omni Port™ Eliminates Charging Station Confusion by enabling any new EV to charge without adapters

CAMPBELL, Calif.--(BUSINESS WIRE)-- **ChargePoint** (NYSE: CHPT), a leading provider of EV charging solutions, today announced conversion kits to install its Omni Port adaptable charging solution on older stations. The kits are now available for immediate delivery, joining new Level 2 stations pre-fitted with the innovation. Omni Port ensures any new EV can charge in any parking space, regardless of its connector type, without the need for expensive or dangerous adapters.

Conversion kits to install ChargePoint's Omni Port adaptable charging solution on older stations are now available for immediate delivery, joining new Level 2 stations pre-fitted with the innovation.

ChargePoint estimates that it holds more than 60% market share in publicly available networked AC charging ports in

North America, so the adoption of Omni Port can eliminate connector issues for a significant amount of the nation's EV drivers. The innovation marks ChargePoint's latest proof point of solving problems for the nascent EV industry.

"As many automakers shift toward the NACS charging port, charging providers need to serve all of their customers - regardless of their vehicle's connector type," said Hossein Kazemi, CTO of Hardware at ChargePoint. "Omni Port enables customers to future proof their charging infrastructure and eliminates the hassle of dedicating parking spaces to a specific connector type. For EV drivers, it ensures they will encounter the connector type they need to charge at any Omni Port location."

Omni Port not only caters to all modern connector types, it also ensures drivers receive a frictionless charging experience. Drivers can simply enter their EV into the ChargePoint app, tap to charge, and the station automatically releases the correct connector type. Notably, Omni Port is available at no incremental cost as a standard feature of applicable new chargers. ChargePoint's modular designs allow station owners to upgrade for new features such as Omni Port instead of replacing their chargers, swapping minimal components as quickly as possible and saving money in the process.

## About ChargePoint Holdings, Inc.

ChargePoint has established itself as the leader in electric vehicle (EV) charging innovation since its inception in 2007, long before EVs became widely available. The company provides comprehensive solutions tailored to the entire EV ecosystem, from the grid to the dashboard of the vehicle. The company serves EV drivers, charging station owners, vehicle manufacturers, and similar types of stakeholders. With a commitment to accessibility and reliability, ChargePoint's extensive portfolio of software, hardware, and services ensures a seamless charging experience for drivers across North America and Europe. ChargePoint empowers every driver in need of charging access, connecting them to over 1.25 million charging ports worldwide. ChargePoint has facilitated the powering of more than 16 billion electric miles, underscoring its dedication to reducing greenhouse gas emissions and electrifying the future of transportation.
