

RAW Charging selects ChargePoint as Partner to Expand Fast-Charging Infrastructure Across the UK

2026-03-02

RAW Charging committed to build hundreds of new DC fast charging stations across the UK in 2026 through new multi-year agreement.

CAMPBELL, Calif.--(BUSINESS WIRE)-- **ChargePoint** Holdings, Inc. (NYSE: CHPT), a global leader in electric vehicle (EV) charging solutions, and RAW Charging, one of the UK's leading charge point operators (CPOs), today announced a new multiyear partnership aimed at rapidly expanding access to dependable DC fast charging with more than 300 new charge points across the United Kingdom.

ChargePoint and RAW Charging announced a new multiyear partnership aimed at rapidly expanding access to dependable DC fast charging across the United Kingdom.

Under the agreement, RAW Charging extends and expands its long-standing partnership

with ChargePoint as its technology partner, encompassing charging hardware, software and services. The partnership represents an initial commitment valued at \$7.5 million USD and will play a crucial role in RAW Charging's continuing ambition to be recognised as the leading destination Charge Point Operator in the UK.

"We are excited to support RAW Charging with the solutions they need to expand their business and uphold their reputation for a superior charging experience," said Rick Wilmer, CEO at ChargePoint. "By collaborating with RAW Charging, we're combining proven technology with operational excellence to ensure UK drivers have fast, dependable charging wherever they go."

Every new fast charging station deployed through the collaboration will run on the ChargePoint Platform, the company's flexible and powerful software solution for EV charging, and be backed by ChargePoint's Assure Pro, an advanced maintenance service that ensures maximum network reliability. Together, these elements are designed to provide drivers with a consistently reliable charging experience.

Jason Simpson, CEO at RAW Charging, commented: "As the UK's leading CPO dedicated to hospitality, leisure and retail we are committed to providing seamless charging for the millions of visitors to our world class destinations. The ChargePoint ecosystem provides a best-in-class driver experience for drivers providing easy station location and availability data alongside contactless, app based and roaming payment options."

This collaboration strengthens RAW Charging's Connecting Amazing Places campaign, which is focused on normalizing EV charging at destinations rather than solely enroute. RAW Charging enables drivers to charge while visiting the UK's most iconic destinations.

Through this partnership, the deployment of new charging infrastructure will help advance UK's transition to electric mobility ahead of the government mandate requiring 100% of new car and van sales to be zero emission by 2035. With over one million EVs already on UK roads, the need for accessible, high reliability charging continues to increase nationwide.

Forward Looking Statements

This release includes forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995 relating to, among other things, the number, timing and successful deployment of new charge points and the economic benefits of the partnership between ChargePoint and RAW Charging. Forward-looking statements include statements regarding ChargePoint's expectations, beliefs, intentions or strategies regarding the future, and can be identified by forward-looking words such as "anticipate," "believe," "could," "continue," "estimate," "expect," "intend," "may," "should," "proposed," "will" and "would" or similar words. These forward-looking statements involve risks, uncertainties, and assumptions, including risks associated with the successful execution of the planned charge point deployments, timing and benefits and that those benefits may not materialize in the time and scope that ChargePoint anticipates. Additional risks and uncertainties are included in the "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections in ChargePoint's Form 10-Q filed with the Securities and Exchange Commission ("SEC") on December 5, 2025, which is available on ChargePoint's website at investors.chargepoint.com and on the SEC's website at www.sec.gov. Forward-looking statements are not guarantees of future performance and actual results could differ materially from those expressed or implied by the statements made herein. All forward-looking statements in this press release are based on information available as of the date hereof and ChargePoint assumes no obligation to revise or update any forward-looking statements for any reason, except as required by law.

About ChargePoint Holdings, Inc.

ChargePoint has established itself as the leader in electric vehicle (EV) charging innovation since its inception in 2007, long before EVs became widely available. The company provides comprehensive solutions tailored to the entire EV ecosystem, from the grid to the dashboard of the vehicle. The company serves EV drivers, charging station owners, vehicle manufacturers, and similar types of stakeholders. With a commitment to accessibility and reliability, ChargePoint's extensive portfolio of software, hardware, and services ensures a seamless charging experience for

drivers across North America and Europe. ChargePoint empowers every driver in need of charging access, connecting them to over 1.3 million public and private charging ports worldwide. ChargePoint has facilitated the powering of more than 16 billion electric miles, underscoring its dedication to reducing greenhouse gas emissions and electrifying the future of transportation.
