Maximize the Value of Your Real Estate.
SBA Communications provides comprehensive wireless service solutions that enhance coverage, capacity or both; serving not only your tenants’ wireless needs but also the commercial Wireless Service Providers (WSP) through data offloading. These solutions will increase the Quality of Experience (QoE) for your customers or tenants and have the potential to generate revenue by providing infrastructure for the WSPs.

Wireless Densification is Coming.
The demand for coverage and capacity is needed in all spaces - outdoor and indoor. Partnering with SBA addresses these demands today, whereas you may have to address them at your expense in the future.
What We Provide

Experience
SBA is among the largest wireless communications infrastructure providers in the country, currently operating over 20,000 communication facilities.

Direct Marketing
SBA has extensive contacts within the wireless communications community and will market your property to key wireless carriers. These marketing efforts promote exposure to your property to carriers seeking densification of networks in your area.

Construction, Operations & Management
SBA will handle all the project development start to finish, optimize the wireless network, and receive and distribute payments from each carrier that has equipment on or in your property. As the property owner, you have the potential to receive revenue, without the associated administrative and IT hassles.

What Benefit You Receive
- Enhanced tenant and customer mobile wireless experience
- Optimize your property to stay on top of technology innovations
- Recurring revenue
