

Compass Minerals is a leading global provider of essential minerals focused on safely delivering where and when it matters to help solve nature's challenges for customers and communities.

Every day, Compass Minerals produces what's essential through the responsible transformation of Earth's natural resources to deliver products that help keep people safe, feed the world and enrich lives.

OUR KEY PRODUCT CATEGORIES:

SALT

We are a leading salt producer in North America and the U.K. We produce and manufacture a portfolio of salt products for highway deicing, water care, animal nutrition, culinary use and numerous other industrial applications.

PLANT NUTRITION

Our plant nutrition products contribute to higher crop yields, consistent growth, and improved overall plant health and protection. We are the largest producer in the Western Hemisphere of sulfate of potash (SOP), a premium, low-chloride potassium fertilizer.

FUTURE GROWTH INITIATIVES

Additionally, our company is pursuing development of a sustainable lithium brine resource intended to support the North American battery market, and we are a minority owner of Fortress North America, a next-generation fire retardant company.

WE OPERATE A COMPETITIVE PORTFOLIO OF ADVANTAGED MINING AND MANUFACTURING ASSETS IN THREE COUNTRIES:

UNITED STATES

Our solar evaporation facility located near Ogden, Utah, is both the largest SOP and the largest solar salt and magnesium chloride production site in the Western Hemisphere. We have also identified a lithium resource of 2.4 million metric ton lithium carbonate equivalent at our Ogden site. Additionally, we operate an underground salt mine, a mechanical salt evaporation facility and several packaging plants in the U.S., along with our global headquarters and Innovation Center.

6 SITES // 997 EMPLOYEES

CANADA

We operate the largest underground salt mine in the world in Goderich, Ontario, and produce evaporated salt products at an additional four locations in Canada.

5 SITES // 773 EMPLOYEES

UNITED KINGDOM

We operate the largest dedicated rock salt mine in the U.K. in Winsford, Cheshire, and two DeepStore secure storage locations.
