Hyve Solutions Announces Support for Microsoft's Open CloudServer Specification Version 2

Leading OCP solutions provider to display demo at Open Compute European Summit in Paris, France

PARIS--(BUSINESS WIRE)-- [Hyve Solutions Corporation](#), a subsidiary of [SYNNEX Corporation](#) (NYSE: SNX) and a leading OCP solutions provider, today announced at the 2014 OCP European Summit its support for Microsoft's Open CloudServer specification version 2 (OCS v2), a significant enhancement to the original OCS specification that was contributed to the OCP community earlier this year. The Microsoft Open CloudServer specification provides the blueprints for datacenter servers that deliver the world's most diverse portfolio of cloud services and handle the enormous requirements of Microsoft Azure and Microsoft's global cloud platform.

"By supporting Microsoft's OCS v2 specification, we continue to invest in our customers by providing the necessary tools to help them meet the challenges of a global cloud platform," said Steve Ichinaga, President, Hyve Solutions. "This solution is a game-changer in further enabling our customers to design and build datacenters to handle the enormous availability, scalability and efficiency requirements needed to succeed in today's marketplace."

"At OCP EU Summit, we are contributing the second generation of the Open CloudServer (OCS) specifications, which will enable faster performance and greater flexibility for servers," said Kushagra Vaid, General Manager of Server Engineering at Microsoft. "By supporting this initiative, Hyve Solutions continues to bring innovative cloud solutions to the community to improve today's datacenters."

Hyve Solutions is showcasing server designs that support the Microsoft OCS v2 specification, along with OCP derivative products, such as the innovative Ambient Series, at the OCP European Summit in Paris, France October 30-31st in booth T4.
